THE EDITOR'S PREFACE

TO THE THIRTEENTH EDITION.

"SOME men are born to greatness, some men achieve greatness, and some men have greatness thrust upon them." It is not the first of these three classes, nor is it the last, with which this work has to do; it is the one which is the middle, according to the poet's classification, but which is pre-eminently, and for all time, the first and foremost in every true estimate of their relative grandeur. To be born to greatness, or to have greatness thrust upon one, may be gratifying to the individual; but it is of comparatively little public interest; and this work has not been compiled to gratify the vanity of individuals, but to record the achievements of those whose lives are a power on the earth.

Here will be found inscribed the names of those whose master-minds govern the world of intellect—names famous in the arenas of literature, art, science, politics, peace, and war; names of poets, orators, statesmen, astronomers, discoverers, chemists, geologists, naturalists, electricians, engineers, musicians, painters, sculptors, travellers, warriors, physicians, philanthropists, &c.—in short, the names of the distinguished Men and Women of the Time, who, by the greatness of their minds, the devotedness of their lives, or the transcendency of their genius, have earned for themselves "glory and honour," if not "immortality."

Nor are there here only their names; there is likewise a record of their deeds—the deeds of the most powerful thinkers and actors in the drama of life now being played before our very eyes. Mighty is fiction, and stirring are often its incidents when portrayed by genius; but ever, in the perusal of fiction, the unwelcome consciousness that it is not a verity obtrudes itself, and breaks the fascinating spell which had bound us. Here, however, as far as it could be ascertained, all is truth; and yet a more marvellous tale of achievements never was related.

The work tells us of one whose spectroscopic researches discovered the physical constitutions of stars, planets, comets, and nebulae; and of another whose telescopic mind pierced the far-off regions of the stellar

universe, and saw what had never been beheld by mortal eye—the planet which was causing the perturbations in the orbit of Uranus, though that unknown perturbing planet was distant millions of miles beyond what had been considered the boundary of the solar system! Truly the poet was justified in speaking of “the music of the spheres,” so measured is the march, and so marvellously rhythmical are the movements, of the heavenly bodies. But not only has the far-distant been made actually visible, and poetically audible, by men whose lives are here recorded, but the immediately-near also has been vivified into startling life, for we read of one by whose discoveries sound is made visible in curves of exquisite beauty; of another whose invention enables us to hear even the foot-fall of a fly; and of another who has dared to say to the sea of the multitudinous undulations of sound, “Here shall thy proud waves be stayed!” and, at his word, the tones of the human voice are stored up to be reproduced when the lips which uttered them have long been silent in the grave.

By another discoverer, light, which travels with a velocity thousands of times swifter than the fleetest cannon-ball, and yet, when it falls on the tenderly sensitive eyelids of a sleeping infant, disturbs not its slumbers, nor ever stirs the gossamer-down on the wing of the tiniest moth, is made, under certain conditions, to revolve the mica plates of a radiometer! We read of another who has invented an instrument which is so sensitive to caloric rays that it is affected by the heat of a candle when distant 1.71 miles; and of another whose voltaic balance detects the weight of one part of chlorine in 500,000 million parts of water. Yes, here are the memorials of men who have made works so delicately impressionable as to be almost beyond credence, and works so stupendous that their very magnitude might defy the puny arm of man to execute them. However, they would defy in vain; for, one man has built a Babel-like tower which soars up to heaven, but only to be followed by others which will overtop even that; another has tunnelled under a mighty river carrying down millions of tons of water per minute; another has spanned an arm of the sea with a bridge whose daring flight and gigantic strength are the wonder of all beholders; others have constructed engines of such intelligence, I might almost say, that, although weighing thousands of tons, they yet skim like birds over the ocean; others, engines of such power that the pulsation of their heart-throbs has done the work of Titans, and the roar of their voices has said, with a truth undreamed of by Napoleon, “There

shall be no Alps!" for, with diamond teeth, those engines have cut their way through that range of mighty mountains, and Italy and France have become united by bands of iron. All these works find a memorial here.

But not only have the votaries of science their records; here also are the lives of poets who have given to eternal truths, and also to "airy nothings," a local habitation and a name; musicians, too, are here, men whose exquisite melodies thrill the soul with unutterable raptures; painters likewise, whose magic blending of colours makes the canvas glow with life; and sculptors, whose marble creations seem only not to breathe. All are here: men whose works exhibit the gentlest emotions of the heart, and the most stirring incidents of life, as well as the glories of nature, and depict with equal skill the fair forms and opalescent hues of Beauty, and, in all its hideousness, the horrid front of War.

Yes, men of lofty imagination are here, and likewise men of action whose feats of daring and whose heroic self-sacrifices have made their names to be "familiar in our mouths as household words"; and, when their deeds are recounted, we listen with the most absorbed attention, and the pulsations of our hearts quicken, and our breathings become more rapid with emotion under the thrilling recital which tells us of those who, for the rescue of their fellow-men, "counted not their lives dear unto themselves," for neither, on the one hand, did the rigours of arctic winters, when the mercury had fallen 40° Fahr. below zero, nor, on the other, did the stifling heat and pestilential vapours of Darkest Africa, daunt those fearless men. They accomplished their work, and returned victors from the north and from the south; and here are briefly told the stories of their lives—stories of conquests over the forces of nature, of triumphs of the indomitable human will, and of deeds of daring as valorous as are any which, on the field of battle, have won the Victoria Cross for bravery. And they, too, are here—the men who have unflinchingly faced the belching fire of cannon, stormed the deadly breach, and planted the flag of England on the ramparts of the foe.

Nor are the brave deeds of gentle women forgotten; but time would fail me to epitomize here a hundredth part of all that is recorded. I can only refer the reader to the body of the work, and trust that these few introductory remarks will gain for it the perusal of many who have hitherto looked upon it as simply a Biographical Dictionary to be consulted by Editors when a great man has died.

A few words of detail :—The essential features of the work remain unchanged, but the title has been altered from “Men of the Time,” to “Men and Women of the Time;” the size of the pages has been increased, and several internal improvements have been effected; not the least important of which is that the present edition, which is the thirteenth, contains seven-hundred-and-forty-four additional memoirs, and has, as far as was possible, been brought up to date by autobiographical revision. But though it is so comprehensive, containing, as it does, memoirs of two-thousand-four-hundred-and-fifty celebrities, there are others whose memoirs the Editor would have liked to include in it; but, concerning some of them, he has not been able to obtain the requisite information; and some, from motives of modesty, have requested that their names might not be inserted; and it would have been discourteous to refuse.

In the compilation of a work of this sort, it is impossible to avoid errors; the Editor can say only that he has done his best, and will be thankful for any corrections for a future edition.

The Editor's thanks are due to those who have thus assisted in making the work what it is;—the most comprehensive English Dictionary of Contemporary Celebrities that has ever been published; and his thanks are due also to his collaborator in America, Mr. L. E. Jones, of New York, for his valuable services in connection with the United States and Canadian memoirs. His acknowledgments are due likewise to editors of newspapers for memoirs which, from time to time, have appeared in the daily and weekly press, and of which he has availed himself in return for matter freely accorded to them.

Three-hundred-and-seventy of those whose memoirs occur in the previous edition have died since its publication; and the following are the names of those who have died, or whose deaths have come to the Editor's knowledge, after that portion of this work had been printed which contains their memoirs :—

T. G. Balfour, Geo. Bancroft, T. F. de Banville, Sir J. Bazalgette, Earl Beauchamp, A. Bellot, Sir E. Boehm, C. Bradlaugh, H. B. Brady, Dean Church, Lord Cottesloe, Dr. Croll, O. Feuillet, Baron Haussmann, Canon Jackson, A. Johnston, King Kalakaua, A. Karr, C. Marvin, J. L. E. Meissonier, Musurus Pacha, Osman Pacha, Prince Napoleon, Admiral Porter, and L. Windthorst.

GEO. WASHINGTON MOON.

March, 1891.

MEN AND WOMEN OF THE TIME.

AARIFI PACHA was born at Constantinople in 1830, being the son of Shekib Pacha, a distinguished diplomatist. At the age of fifteen he was employed as a supernumerary in the offices of the Divan; and in 1847 he accompanied his father on a mission to Rome. Subsequently he went with his father to the embassy at Vienna, where he resided for two years. On his return to Constantinople he applied himself assiduously to the study of languages; and he was employed in various capacities in the ministry of Foreign Affairs. Some years later he accompanied Aali-Pacha to Vienna as First Secretary; and a year afterwards he went to discharge the same duty in Paris. His knowledge of the French language led to his appointment as First Translator in Paris to the Sublime Porte, and afterwards as First Interpreter to the Divan. The latter office he held till 1872. Subsequent to that date he occupied several important posts in Turkey, being successively Under Secretary of State for Foreign Affairs and Surveyor of Ordnance, President of the Executive Chamber of Justice, and President of the Civil Chamber of the Court of Cassation. He next resumed his diplomatic career as Ambassador in Vienna; and in 1873 he returned to the office of First Interpreter to the Divan, and held it for about a twelvemonth. In 1874 Aarifi Pacha was nominated Minister of Public Instruction; three months later, Minister of Justice, and then, again, Ambassador in Vienna. On the establishment of the new Ottoman Constitution he was appointed President of the Senate, and soon afterwards received the portfolio of Foreign Affairs. He was accredited Ambassador of the Sublime Porte in Paris Nov. 5, 1877, in succession to Khalil Sheriff Pacha. On July 28, 1879, the Sultan issued a decree abolishing the post of Grand Vizier and appointing Aarifi Pacha Prime Minister, with Safvet Pacha as

Minister of Foreign Affairs. The new ministry, however, had but a very brief tenure of office.

ABBE, Cleveland, born in New York city, Dec. 3rd, 1838, is the son of George Waldo Abbe and Charlotte Colgate, both natives of the United States of America, and of purely English ancestry. The earliest American ancestor of this family was John Abbey, of Salem, Massachusetts, in 1637. Mr. Cleveland Abbe graduated in 1857 at the Free College of the city of New York; studied Astronomy under Brünnow at the University of Michigan, 1859-60, also under Gould at Cambridge, Massachusetts, 1860-64, and under Struve at Poulkova, 1865 and 1866. He took the degree of A.B. 1857, A.M. 1860, LL.D. (Michigan University) 1889; became Director of the Cincinnati Observatory, 1868-74, Professor of Meteorology in the Signal Service, and Assistant to the Chief Signal Officer, 1871 to the present date. He is a Member of numerous Scientific Societies; author of "The Weather Bulletin of the Cincinnati Observatory," 1869; "Annual Summary and Review of Progress in Meteorology," 1873 annually to 1888; "Report on the Signal Service Observations of the Total Eclipse of 1878;" "Treatise on Meteorological Apparatus and Methods," 1887; "Preparatory Studies for Deductive Methods in Storm and Weather Predictions," 1890; and numerous smaller memoirs. He was Delegate to the International Convention of 1883 in Washington on Prime Meridian and Standard Time.

ABBEY, Edwin Austin, R.I., was born April 1st, 1852, at Philadelphia, U.S.A.; and was a pupil of the Pennsylvania Academy of Fine Arts. In 1871 he began drawing for the publications of Messrs. Harper & Brothers. In 1876 he became a Member of the American Water Colour Society. In 1878 he re-

moved to England. He has illustrated the following works:—"Selections from the Hesperides and Noble Numbers of Robert Herrick," 1882; "She Stoops to Conquer," 1887; "Old Songs," 1889; "Sketching Rambles in Holland," 1885 (in conjunction with G. H. Boughton, A.R.A.); "The Quiet Life," 1890 (in conjunction with Alfred Parson). The following are his principal water-colour pictures:—"The Stage Office," 1876; "The Evil Eye," 1877; "The Sisters," 1881; "The Widower," 1883; "The Bible Reading," 1884; "An Old Song," 1886; "The March Past," 1887; "Visitors," 1890; "Mayday Morning," 1890 (an oil picture). He was elected Member of Royal Institute of Painters in Water Colours in 1883, and received a second-class medal at the Munich International Exhibition in 1883, and a first-class medal at the Paris Exposition Universelle, 1889.

ABBOTT, The Rev. Edwin Abbott, D.D., born in London in 1838, was educated at the City of London School (1850-57), and at St. John's College, Cambridge, of which he became a Fellow. (B.A. 7th Senior Optime and Senior in the Classical Tripos, 1861, first-class in the Theological Tripos, 1862; M.A. 1864.) He was Assistant Master in King Edward's School, Birmingham, from 1862 to 1864, and subsequently at Clifton College till 1865, when he was appointed Head Master of the City of London School. This school was at that time in Milk Street, Cheap-side; it now possesses sumptuous new buildings on the Embankment at Blackfriars, and under the Head Master's guidance has taken a position as one of the most efficient day-schools in England. Dr. Abbott was twice Select Preacher at Cambridge; Hulsean Lecturer in that university, 1876; also Select Preacher at Oxford, 1877. The Archbishop of Canterbury conferred on him the degree of D.D. in 1872. Dr. Abbott has published the following theological works:—"Bible Lessons," 1872; "Cambridge Sermons," 1875; "Through Nature to Christ," 1877; "Oxford Sermons," 1879; the article on "Gospels" in the ninth edition of the *Encyclopædia Britannica*; and (in conjunction with Mr. W. G. Rushbrooke) "The Common Tradition of the Synoptic Gospels," 1884. His other works are a "Shakespearian Grammar," 1870; "English Lessons for English People" (written in conjunction with Professor J. R. Seeley), 1871; "How to Write Clearly," 1872; "Latin Prose through English Idiom," 1873; "The Good Voices, or, A Child's Guide to the

Bible," and "Parables for Children," 1875; an "English Grammar," in two parts, entitled "How to Tell the Parts of Speech," and "How to Parse," 1875; an edition of Bacon's "Essays," 1876; "Bacon and Essex," 1877; a "First Latin Book" entitled "Via Latina," 1880; "Hints on Home Teaching," 1883; "Francis Bacon, an Account of His Life and Works," 1885; and a "First Latin Translation Book," entitled "The Latin Gate," 1889. Other works published anonymously, but subsequently acknowledged by Dr. Abbott, are "Philochristus," 1878; "Onesimus," 1882; "Flatland, or, A Romance of Many Dimensions," 1884; and "The Kernel and the Husk," 1886. Dr. Abbott resigned the Head-Mastership of the City of London School in 1889, and received a pension from the Corporation in 1890.

ABBOTT, Lyman, D.D., son of the late Jacob Abbott, was born at Roxbury, Mass., Dec. 18, 1835. He graduated at the University of New York in 1853; studied law, and was admitted to the Bar in 1856. After practising that profession for a short time he abandoned it for the study of theology, and was ordained a Congregational minister in 1860. He was pastor of various churches until 1865, when he was appointed secretary of the American Union (Freedmen's) Commission, a position retained by him until 1868. For a portion of this time he was also pastor of the New England Church in New York, but he resigned in 1869, to devote himself to literature and journalism. He had charge of the "Literary Record" in *Harper's Magazine* for several years, at the same time conducting the *Illustrated Christian Weekly*. Subsequently he was associated with Mr. Beecher in editing the *Christian Union*, of which he later became (and still is) the senior editor. On Mr. Beecher's death he was invited to fill temporarily the pulpit of Plymouth Church, Brooklyn, and in 1889 was settled permanently over that church. In conjunction with his brothers Austin and Benjamin, he wrote two novels, "Cone-cut Corners," 1855, and "Matthew Caraby," 1858, which were published under the pseudonym of "Benauly," formed from the initial syllables of the authors' names. He is the author also of "Jesus of Nazareth, His Life and Teachings," 1869; "Old Testament Shadows of New Testament Truths," 1870; "A Dictionary of Bible Knowledge," 1872; "A Layman's Story," 1872; "Illustrated Commentary on the New Testament," 4 vols., 1875-1887; "Life of Henry Ward Beecher," 1883;

"For Family Worship," 1883; "In Aid of Faith," 1886; and "Signs of Promise," 1889; in addition to which he has published a number of pamphlets, among them "The Results of Emancipation in the United States," 1867; and has also edited two volumes of sermons of Mr. Beecher, and a selection from his writings entitled "Morning and Evening Exercises." The degree of D.D. was conferred upon him by Harvard University in 1890.

ABD-UL-HAMID II., Sultan of Turkey, was born Sept. 22, 1842, being a younger son and the fourth child of Abd-ul-Medjid, the Sultan who died in 1861. On August 31, 1876, he succeeded his brother, Mourad V., who was deposed, on proof of his insanity, after a reign of three months. Abd-ul-Hamid was solemnly girt with the sword of Othman, in the Eyoub Mosque, Constantinople, on Sept. 7. He is a Turk and a Mussulman of the old school, and, though without allies, he fought Russia rather than submit to any conditions which should bring about a disintegration of the Ottoman Empire. On April 21, 1877, Russia declared war against the Porte, and in February, 1878, after the fall of Plevna and the passage of the Balkans, the Turks were compelled to sue for peace. Since the Treaty of Berlin, in 1878, the Sultan has shown no great anxiety to carry out the reforms, either in Europe or in Asia, which were therein stipulated, though in regard to Bulgaria and Eastern Roumelia he has been fairly loyal to that Treaty. He was often praised by Lord Beaconsfield for his courage and ability; but of late years he has been given over to the fear of assassination, and his distrust of his ministers is proverbial. He has been at various times under English, German, and Russian influence; the last seems to be now prevailing. The Sultan has never ceased to protest against the proceedings of England in Egypt, and is believed to have secretly stimulated the rebellion of Arabi.

ABDULRAHMAN, or ABDURRAHMAN KHAN, Ameer of Afghanistan, born about 1830, is the eldest son of Afzul Khan, and nephew of the late Ameer Shere Ali. During the civil war in 1864, Abdurrahman played a leading part on the side of his father against his uncle, and gained several battles. The great victories of Shaikhabad and Khelat-i-Ghilzai were mainly due to his ability. He was intrusted with the Governorship of Balkh, where he made himself popular

by his moderation, and by marrying the daughter of the chief of Badakshan. In 1868 he was unable, however, to offer a successful resistance to his cousin, Yakoub Khan, son of Shere Ali, who defeated him at Bajgah, near Bamain, and also finally at Tinah Khan. Abdurrahman then fled from the country, ultimately reaching Russian territory. General Kaufmann permitted him to reside at Samarcand, and allowed him a pension of twenty-five thousand roubles a year. He remained in Turkestan until 1879, when he slowly made his way through Balkh to the Cabul frontier, and in July of the following year he was formally chosen by the leading men of Cabul, and acknowledged by the British Indian Government as Ameer of Afghanistan. From the Government he receives a regular subsidy of £160,000 a year, with large gifts of artillery, rifles, and ammunition to improve his military force. On Dec. 26, 1888, he was shot at by a Sepoy, at Mazar-i-Sherif, but without injury.

ABDY, John Thomas, LL.D., son of Lieut.-Colonel James Nicholas Abdy, was born July 5, 1822, and educated at the Proprietary School, Kensington, whence he proceeded to Trinity Hall, Cambridge, where he graduated as Senior in the Civil Law in 1844. In 1847 he took the degree of LL.B., and was created LL.D. in 1852. In 1850 he was elected a fellow of his college, and in January of that year was called to the Bar by the Inner Temple. For a short time he went the Home circuit, but subsequently chose the Norfolk circuit. In 1854 he was appointed Regius Professor of the Civil Law in the University of Cambridge, and he held that office till the close of the year 1873. He is Lecturer on Law at Gresham College, London. In 1870 he was appointed Recorder of Bedford, and in the following year was promoted to be County Court Judge of Circuit No. 38. Judge Abdy has published "An Historical Sketch of Civil Procedure among the Romans," 1857; and an edition of "Kent's Commentary on International Law," 1866. In collaboration with Mr. Bryan Walker, M.A., he edited, translated, and annotated "The Commentaries of Gaius," 1870, and the "Institutes" of Justinian.

A'BECKETT, Arthur William, youngest surviving son of the late Gilbert Abbott à Beckett, the well-known metropolitan police magistrate and man of letters (the descendant of an ancient Wiltshire family settled in West Lavington for centuries), was born at Portland House, Hammer-smith, Oct. 25, 1844, and educated at

Kensington and Felstead Schools. He entered the War Office, but left the Civil Service after three years' experience of it to become, at the age of 20, editor of the *Glowworm*, a London evening paper. During the next ten years he edited with much success several comic periodicals and monthly magazines. In 1870-71 he was special correspondent to the *Standard* and *Globe* during the Franco-German War. For the next two years he was private secretary to the Duke of Norfolk. Since 1874 he has been on the staff of *Punch*, to which periodical he has contributed, amongst other series, "Papers from Pump-handle Court, by A. Briefless, Junior;" published in a separate volume in 1889. Mr. A. Beckett is author of several novels, and of two three-act comedies, "L.S.D." and "About Town;" a domestic drama in one act, "On Strike;" "Faded Flowers;" and "Long Ago." He has also dramatised (in conjunction with the late Mr. J. Palgrave Simpson) his novel "Fallen among Thieves," under the title of "From Father to Son." In 1887 he edited and in some parts rewrote his father's "Comic Blackstone," originally published in 1845, bringing it up to date. Having, in 1881, been called to the Bar by the Hon. Society of Gray's Inn, in 1887 he was appointed Master of the Revels of that Society by H.R.H. the Duke of Connaught, Treasurer, and the other Masters of the Bench, and in that office edited and produced "The Maske of Flowers" in the Hall of Gray's Inn, in honour of Her Majesty's Jubilee.

ABEL, Carl, Dr. Phil., Professor under the Prussian Government Department of Public Instruction, the son of a Berlin banker, was born at Berlin, Nov. 25, 1837; studied Philology, National Psychology and History at the Universities of Berlin, Munich and Tübingen; travelled and stayed for the purposes of linguistic research in England, France, Switzerland, Italy, Russia, and America. He has devoted himself chiefly to the comparative study of significations and the more exact branches of national psychology dependent upon the appreciation of meanings; showed linguistic concepts to be distinctly national and their comparison the truest means of gauging the intellect and feelings of a race; examined the historical stages of significative development by an inquiry into sundry linguistic concepts of the English, French, German, Russian, Polish, Egyptian and Hebrew idioms; analysed the prehistoric origin of meanings through a combination of Indo-Germanic and Egyptian etymology; disclosed in the

course of these labours an identity of roots, stems and primary phonetic and conceptual laws in the two families of speech; proved these common primary laws, while they did not interfere with the separate laws of later times, to reveal a much more ancient and more perspicuous period of etymology, which unfolds the prehistoric history of reason; demonstrated the primitive variability of sound and sense, the inversion of both and the multiplicity of etymological connections and transitions resulting therefrom; extended his investigations to semitic affinities; sifted, on the basis of facts established, the origin of language, the growth of signification and the theory of synonyms. Professor Carl Abel has acted as *Ilchester Lecturer* on Comparative Slavonic and Latin Lexicography at Oxford University; lectured on various etymological and semasiological topics at the Royal Asiatic Society, the Royal Literary Society, the Berlin Philological, Philosophical and Anthropological Society; taught Philosophical and Comparative linguistics as well as English, French, German and Latin Synonymy in the Berlin Humboldt Academy of Science; was linguistic assistant to the German Foreign Office and the Berlin Law Courts; served as Berlin Correspondent to the *Times* and *Standard*; was a contributor to various German philological and general periodicals. Professor Carl Abel reads all European and several Oriental languages. The following is a list of his principal writings: "Linguistic Essays," London, 1880 (history and theory of signification, synonymy, countersense, origin of language, Latin order of words); "Sprachwissenschaftliche Abhandlungen," Leipzig, 1885 (an amplified German edition of the foregoing); "Slavic and Latin," *Ilchester lectures* on Comparative Lexicography delivered at the University of Oxford, London, 1881; "Gross- und Klein-Russisch. Aus *Ilchester Vorlesungen* übersetzt von R. Dieltz, Leipzig, 1882 (German translation of the foregoing); "Koptische Untersuchungen," Berlin, 1878, 2 volumes (grammatical and semasiological); "Einleitung in ein ägyptisch-indoeuropäisch-semitisches Wurzelwörterbuch," Leipzig, 1886, (Egyptian phonetic and conceptual change, with specimen of application to the two other families of speech); *Wechselbeziehungen der ägyptischen, indoeuropäischen und semitischen Etymologie*, Theil 1, Leipzig, 1889 (Comparative Egyptian and Indo-European analysis of the root "ker," crooked, with generic conclusions); "Ägyptisch-Indoeuropä-

ische Sprachverwandtschaft," Leipzig, 1890 (concise summary of the foregoing, with amplified general conclusions); "Ägyptisch und Indogermanisch Vorlesung vor den Sprachwissenschaftlichen Sectionen des Frankfurter Freien Deutschen Hochstifts, Zweite Auflage," Frankfurt, 1890 (introductory and defensive); "Zur Geschichte der Hieroglyphenschrift. Nach dem Holländischen des Dr. W. Pleyte," Leipzig, 1890; "Letters on International Relations contributed to the *Times*," London, 1871, 2 volumes; and "Russland und die Lage," Leipzig, 1888 (linguistic and national psychology applied to history).

ABEL, Sir Frederick Augustus, C.B., D.C.L., F.R.S., was born in London, in 1827, and is known principally in connection with chemistry and explosives. His published works are:—"The Modern History of Gunpowder," 1866; "Gun Cotton," 1866; "On Explosive Agents," 1872; "Researches in Explosives," 1875; and "Electricity Applied to Explosive Purposes," 1884. He is also joint-author with Colonel Bloxam of a "Handbook of Chemistry." Sir Frederick Abel has been President of the Institute of Chemistry, the Society of Chemical Industry, and the Society of Telegraph Engineers and Electricians. He was appointed Associate Member of the Ordnance Committee in 1867; and is Chemist to the War Department and likewise Chemical Referee to the Government. In 1883 he was one of the Royal Commissioners on Accidents in Mines. He has been Organising Secretary of the Imperial Institute from 1887; and was President of the British Association at the Leeds meeting, 1890. He was created C.B. in 1877, and Hon. D.C.L., Oxford, in 1883, and was knighted in the same year.

ABERDARE (Lord), The Right Hon. Henry Austin Bruce Pryce, is the second son of the late Mr. John Bruce Pryce, of Duffryn St. Nicholas, Glamorganshire, who assumed the name of Bruce in lieu of his patronymic Knight, in 1805, and the name of Pryce in 1837. He was born at Duffryn, Aberdare, on April 16, 1815. At the age of six years he was taken by his family to France, where he remained till 1827. Returning to England in that year, he began his regular studies at the Swansea Grammar School, and continued at that establishment till 1832, when he was removed to London, where he read for two years in the chambers of his uncle, the late Lord Justice Knight Bruce. He was called to the Bar at Lincoln's Inn in 1837, but after practis-

ing for about six years, he withdrew in 1843 from the working ranks of the profession. He was Police-Magistrate of Merthyr-Tydvil and Aberdare, Glamorganshire, from 1847 till 1852, when he entered the House of Commons as Member for Merthyr-Tydvil. That borough he represented in the Liberal interest till the general election of December, 1868, when he lost his seat; but in the following month he was returned for Renfrewshire. Mr. Bruce was Under Secretary of State for the Home Department from Nov. 1862, to April, 1864; and Vice-President of the Committee of Council on Education from the latter date to July, 1866. He was also in 1864 appointed a Charity Commissioner for England and Wales, and sworn a member of the Privy Council. From Nov. 1865, to Aug. 1866, he held the post of second Church Estates Commissioner. On the formation of Mr. Gladstone's cabinet, in Dec. 1868, he took office as Secretary of State for the Home Department, and the following year he was appointed an Ecclesiastical Commissioner. In Aug. 1873, he was raised to the peerage by the title of Lord Aberdare, in order to enable him to hold the high post of Lord President of the Council, in the place of Lord Ripon, resigned. However, he was destined to retain that exalted position only a very short time, as he of course went out of office on the defeat of the Liberal party in Feb. 1874. He presided over the meeting of the Social Science Association held at Brighton in 1875, and has also been President of the Geographical Society. Lord Aberdare edited the "Life of General Sir Wm. Napier, K.C.B., author of 'History of the Peninsular War,'" 2 vols., 1864; and has published "National Education: an Address delivered to the National Association for the Promotion of Social Science," 1866; and his "Speech on the Second Reading of the Education of the Poor Bill," 1867. He has been twice married: firstly, in 1846, to Annabella, daughter of Mr. Richard Beadon (she died in 1852); and, secondly, in 1851, to Norah, daughter of the late Lieutenant-General Sir William P. Napier, K.C.B. His son and heir is Mr. Henry Campbell-Bruce, who was born in 1851.

ABERDEEN, The Right Hon. John Campbell Hamilton Gordon, Seventh Earl of, born August 3, 1847, is the grandson of the Earl of Aberdeen who was Prime Minister in 1851. He was educated at the College Hall, in connection with the University of St. Andrews, and at University College, Oxford, where he graduated M. A. in 1871. He succeeded to the title on the death of

his brother Jan. 27, 1870. He entered the House of Lords as a Conservative, but in the session of 1876 he disagreed with some of the principal measures of his party, and in 1878, when the Earls of Derby and Carnarvon resigned their offices, Lord Aberdeen heartily supported the views of these statesmen. In the debate on the Afghan war he voted against the government of Lord Beaconsfield. In 1875 he was a member and subsequently Chairman of a Royal Commission to enquire into the subject of Railway Accidents. In 1877-78 he was a member of the Committee of the House of Lords on Intemperance. In 1880, having by that time become a recognised member of the Liberal Party, he was appointed Lord-Lieutenant of Aberdeenshire, and High Commissioner to the General Assembly of the Church of Scotland in 1881 and four succeeding years. In 1886 he was appointed by Mr. Gladstone Lord-Lieutenant of Ireland, with the mission of carrying out the Home Rule policy of the Government. In this capacity he was immensely popular in Ireland, and the scene in Dublin on the occasion of the "leave-taking" after the fall of the Gladstone Cabinet is said to have been such as had never been witnessed there before, at least not since the departure of Lord Fitzwilliam in 1795. Lord Aberdeen is a member of many religious and philanthropic societies, and contributed £1,000 towards General Booth's scheme for alleviating distress. He is married to a daughter of the first Lord Tweedmouth.

ABERDEEN AND ORKNEY, Bishop of. See DOUGLAS, The Hon. and Rt. Rev. ARTHUR GASCOIGNE.

ABNEY, Captain, William de Wiveleslie, F.R.S., was born at Derby in 1843, and educated at Rossall, and privately, and at the Royal Military Academy at Woolwich. He was appointed lieutenant in the Royal Engineers in 1861, and captain in 1873. He was formerly Instructor in Chemistry to the Royal Engineers, Chatham, and is now Inspector for Science in the Science and Art Department. He was one of the scientific observers of the transit of Venus in 1874. His works are:—"Instruction in Photography;" "Emulsion Photography;" and "Thebes and its Five Greater Temples." He is the author also of many papers in the *Philosophical Transactions*, and the *Proceedings of the Royal Society* and the *Philosophical Magazine*. He obtained the Rumford Medal of the Royal Society in 1883, for his researches in photography and spectrum analysis.

ACLAND, Sir Henry Wentworth, Bart., K.C.B., F.R.S., Regius Professor of Medicine in the University of Oxford, Hon. D.C.L. of Cambridge, Edinburgh, Durham, and Hon. M.D. Dublin, C.R. Empire of Brazil, Member of various Medical and Scientific Societies in Athens, Christiania, and the United States, is the fourth son of the late Sir Thomas Dyke Acland, Bart. He was born in 1815, and educated at Harrow and Christ Church, Oxford, and was elected, in 1841, to a fellowship at All Souls. He took the degree of M.D. at Oxford in 1848, having been appointed Lee's Reader in Anatomy in 1845. In that capacity, with several able Assistants, especially Professors Beale, Victor Carus, Melville, and Mr. Charles Robertson, he made the extensive Christ Church Physiological Series, on the plan of John Hunter, now in the Oxford University Museum—an institution to the foundation of which Dr. Acland's labours contributed not a little, his aim being to lay the foundation on the widest basis of a complete study of the Kosmos in the old classical university. He became Regius Professor of Medicine in 1858, and Radcliffe Librarian, and is Curator of the Oxford University Galleries and of the Bodleian Library. He was appointed a member of Mr. Gathorne Hardy's Cubic Space Commission in 1866, and of the Royal Sanitary Commission from 1869 to 1872. He represented the University of Oxford on the Medical Council from 1858 to 1875; has been President of the British Medical Association, of the Physiological section of the British Association, and the Public Health section of the Social Science Association. He published a treatise on the "Plains of Troy" in 1839. He has written several works on medical, scientific and educational subjects, including an important sanitary work under the title of "Memoir on the Visitation of Cholera in Oxford in 1854," and another called "Village Health," in 1884. He accompanied the Prince of Wales to America in 1860, and on his return was appointed honorary physician to his Royal Highness. Sir Henry Acland was also Physician to H.R.H. Prince Leopold during his Oxford career. He was President of the General Medical Council from 1874 to 1887, and was made K.C.B. in 1884.

ACLAND, The Right Hon. Sir Thomas Dyke, Bart., P.C., M.A., D.C.L., is the eldest son of the late Sir Thomas Dyke Acland, tenth Baronet, and was born at Killerton, Devon, May 25, 1809. He was

educated at Harrow and at Christ Church, Oxford, where under the tutorship of Thomas Vowler Short, afterwards Bishop of St. Asaph, and Augustus Saunders, afterwards Dean of Peterborough, he gained a double 1st class. At Christ Church his principal friends were Mr. Gladstone, Sir Francis Doyle, the late Lord Blachford, Professor Austice, and the late Lord Elgin, and he also enjoyed the friendship of Frederick Denison Maurice, then at Exeter College. In 1837, while reading Law, he was invited to stand as a Conservative for West Somerset, and on being elected retained the seat for ten years; in these first years he was chiefly occupied in questions connected with the Church of England and Education, particularly in carrying out the plan of Diocesan Training Colleges for Teachers, originated by the late Gilbert Mathison. After the General Election of 1841, when Sir Robert Peel began his reform of Tariffs, Sir Thomas became much interested in the question of Free Trade and Protection; he steadily refused to join the Protectionist Organisation, and when the crisis of 1846 arrived, had no hesitation in supporting the Repeal of the Corn Laws, resigning his seat for West Somerset at the dissolution, 1847. He then applied himself diligently to the study of Agriculture, under Philip Pusey's advice, promoting with the help of Lord Portman and Sir W. Miles the extension of the Bath and West of England Society, the *Journal* of which he personally conducted for seven years, retaining his interest in general education, and being largely instrumental with Bishop Temple in establishing the system of Local Examinations. In 1859 he was invited by the Moderate Liberals of Birmingham to stand against Mr. Bright, but his candidature was unsuccessful. In the same year he began to take an active part in the Volunteer movement, helping to establish five corps of Mounted Rifles in Devonshire. He served on the Schools Inquiry Commission, 1864 to 1867. In 1865 he entered Parliament for the second time as a decided Liberal and a follower of Mr. Gladstone. He continued to represent North Devon until 1885, when he was returned for West Somerset. He was made Privy Councillor in 1883. In 1886 he again stood as a Gladstonian Liberal, but was defeated by Mr. Charles Elton, Q.C. (Conservative). Sir Thomas has two sons in Parliament, **C. T. Dyke Acland**, Liberal Member for North-East Cornwall, who was Parliamentary Secretary to the Board of Trade in 1885, and Second Church Estate Commissioner; and **Arthur H. Dyke**

Acland, (Honorary Fellow of Balliol College, Oxford), Liberal Member for the Rotherham Division of Yorkshire. The latter is well known for his exertions on behalf of the Co-operative movement and Technical Education.

ACTON (Lord), The Right Hon. John Emerich Edward Dalberg Acton, D.C.L., son of Sir Ferdinand Richard Edward Acton, Bart., of Aldenham, Shropshire, by the only daughter of the Duke of Dalberg (afterwards wife of the second Lord Granville), was born at Naples, in 1834, and when about three years of age succeeded to the baronetcy on the death of his father. For a few years he was a student in the Catholic College of St. Mary's Oscott, at the time when Dr. (afterwards Cardinal) Wiseman was at the head of that institution; but his education was mainly due to the renowned ecclesiastical historian, Dr. Döllinger, of Munich, with whom he lived for a considerable time. Sir John Acton represented Carlisle in the House of Commons from 1859 to 1865. In the latter year he stood as a candidate for the borough of Bridgnorth, when he announced in a speech delivered to the electors, that he represented, not the body, but the spirit, of the Roman Catholic Church. He was successful at the poll by a majority of one, but, on a scrutiny, was unseated. In 1869, on the recommendation of Mr. Gladstone, he was created a peer of the United Kingdom by the title of Baron Acton of Aldenham. In the same year he repaired to Rome, on the assembling of the Ecumenical Council, and while there rendered himself conspicuous by his hostility to the definition of the doctrine of Papal Infallibility, and by the activity and secrecy with which he rallied, combined, and urged on those who appeared to be favourable to the views entertained by Dr. Döllinger. It is believed that he was in relation with the *Allgemeine Zeitung*, and that much of the news published by that journal on the subject of the Council was communicated by his lordship. Lord Acton may be regarded as the leader of the "Liberal Roman Catholics," who are more or less out of accord with the traditions of the Holy See. He was the editor of the *Home and Foreign Review*, a trimestral periodical, commenced in 1862, and carried on till 1864, when it ceased to appear, having been condemned by the English Roman Catholic hierarchy. At a later date he edited the *Chronicle*, a weekly newspaper, which for want of adequate support had but a brief existence; and still more recently he conducted the *North British Review*, formerly an organ of the

Congregationalists, which expired under his management. His lordship also published, in September, 1870, "A Letter to a German Bishop present at the Vatican Council" (*Sendeschreiben an einen Deutschen Bischof des Vaticanischen Concils*, Nördlingen, September, 1870). This elicited from Bishop Ketteler, of Mayence, a spirited reply, which has been translated into English. His lordship zealously advocated the cause of Dr. Döllinger, his former preceptor, and of the "Old Roman Catholic" party; and, consequently, upon the occasion of the Jubilee of the University of Munich, in August, 1872, the Philosophical Faculty conferred upon him the honorary degree of Doctor. In 1874 he rendered himself conspicuous by the prominent part he took in the controversy which was raised by the publication of Mr. Gladstone's pamphlet on the Vatican Decrees. His lordship, in a series of letters to the *Times*, brought grave charges against several of the Popes, although he said that there was nothing in life which he valued more than communion with the Roman Catholic Church. Lord Acton is the author of the article on "Wolsey and the Divorce of Henry VIII." in the *Quarterly Review* for Jan. 1877. A French translation of Lord Acton's two letters on Liberty was published with a preface by M. de Laveleye, under the title of "*Histoire de la Liberté dans l'Antiquité et le Christianisme*," 1878. In 1887 Lord Acton was made D.C.L. at Oxford, and in 1890 was elected to an honorary fellowship at All Souls' College, Oxford—a distinction shared only by Mr. Gladstone.

ADAM, Mme. Edmond, née Juliette Lamber, was born at Verberie in 1836. She first married M. La Messine, and afterwards M. Edmond Adam, deputy for the Department of the Seine; he was Préfet de Police at the time of the Franco-German war, and during the siege of Paris remained in the city; he was created a life Senator, but died in 1877. Mme. Adam was with him, and afterwards recorded her experiences in "*Le Siège de Paris: Journal d'une Parisienne*," published 1873. Mme. Adam has published a number of works on political and social subjects, especially the position of women; amongst her other works are "*Garibaldi*," 1859; "*Le Mandarin*," "*Mon Village*," 1860; "*Récits d'une Paysanne*," 1862; "*Voyage autour du Grand-Père*," 1863; "*Récits du Golfe Juan*," 1865; "*Dans les Alpes*," 1867; "*Saine et Sauve*," 1870; "*Laide*," 1878; "*Palenque*," 1879; "*Poètes Grecs Contemporains*," 1881; "*La Patrie Hongroise: Souvenirs*

Personnels," 3rd ed., 1884. In 1879 Mme. Adam started the *Nouvelle Revue*, which she continues to conduct with great ability, and personally contributes the fortnightly articles on Foreign politics.

ADAMS, Charles Francis, great-grandson of the second President of the United States, and grandson of the sixth President, was born at Boston, May 27, 1835, graduated at Harvard College in 1856, and was admitted to the Bar in 1858. During the Civil War he was in command of a regiment of coloured troops, and was brevetted Brigadier-General. He has since been identified with railroad development, has served as Railroad Commissioner of Massachusetts, and since June, 1884, has been President of the Union Pacific Railway Co. He has been a contributor to the *North American Review*, and is the author of "*The Railroad Problem*," 1875; "*Railroads, their Origin and Problems*," 1878; "*Notes on Railroad Accidents*," 1879; "*A College Fetich*," 1883; and, with his brother Henry, of "*Chapters of Erie*," 1871. In 1882 he was elected a member of the Board of Overseers of Harvard University.

ADAMS, John Quincy, brother of the above, was born in Boston, Sept. 22, 1833, graduated at Harvard College in 1853, and was admitted to the Bar in 1855. During the Civil War he was on the staff of Governor Andrew. In 1866 he was elected to the State Legislature as a Republican, but having favoured the "reconstruction" policy of President Andrew Johnson, failed of re-election in the following year. He has since been a prominent leader in the Democratic party, by which he was sent to the Massachusetts Legislature in 1869 and 1870, and nominated for Governor in 1867 and 1871, but he was not elected. In 1877 he was chosen a member of the corporation of Harvard University.

ADAMS, Charles Kendall, LL.D., was born at Derby, Vermont, Jan. 24, 1835. A.B. (Univ. of Michigan), 1861. He was appointed Assistant Professor of History at the University of Michigan in 1863, becoming full Professor in 1868. In 1881 he was made Non-Resident Professor of History at Cornell University, where, in July, 1885, he succeeded to the Presidency on the resignation of President White. While at the former university he reorganised the methods of instruction in history substantially in accordance with the German system, and in 1869—70 founded an historical seminary, which was very efficient in promoting the study

of history and political science. He was also made Dean of the School of Political Science on its establishment at the University of Michigan. He has published "Democracy and Monarchy in France," 1874; "Manual of Historical Literature," 1882, 3rd edit., 1889; "Representative British Orations," 3 vols., 1884; besides a number of pamphlets and papers on historical and educational subjects.

ADAMS, John Couch, M.A., F.R.S., &c., was born on June 5, 1819, at Lidcot, near Launceston, Cornwall, and was educated first at the village school and afterwards at Devonport, where he showed a great aptitude for mathematics and astronomy. In October, 1839, he entered at St. John's College, Cambridge, and in the Mathematical Tripos of 1843 obtained the position of Senior Wrangler. He was soon after elected to a Fellowship, and became one of the Mathematical Tutors of his College. The first great service rendered to astronomy by Mr. Adams was the discovery of the planet Neptune. His attention was first called to the existence of unexplained disturbances in the motion of the planet Uranus by reading Mr. Airy's valuable Report on the recent progress of Astronomy, which appeared in the 1st vol. of the Reports of the British Association. According to a memorandum dated early in July 1841, he had then formed a design of investigating, as soon as possible after taking his degree, "the irregularities in the motion of Uranus which are yet unaccounted for, in order to find whether they may be attributed to the action of an undiscovered planet beyond it, and, if possible, thence to determine the elements of its orbit, which would probably lead to its discovery." Accordingly in 1843 he began his investigations and calculations, and in September, 1845, communicated to Professor Challis the values which he had obtained for the mass, heliocentric longitude, and elements of the orbit of the assumed planet. The same results, slightly corrected, he communicated, before the middle of the following month, to the Astronomer Royal. These communications were made in the hope that a search for the planet would be made, either at Cambridge or at Greenwich, but unfortunately this was not done, in consequence of the pressure of other work. On Nov. 10, 1845, M. Le Verrier presented to the French Academy of Sciences a very elaborate investigation of the perturbations of Uranus produced by Jupiter and Saturn, in which he pointed out several small inequalities

which had previously been neglected. After taking these into account and correcting the elements of the orbit, he still found that the theory was quite incapable of explaining the observed irregularities in the motion of Uranus. On June 1, 1846, M. Le Verrier presented a Second Memoir on the Theory of Uranus to the French Academy, in which he concludes that the discordances between the observations of Uranus and the theory are due to the action of a disturbing planet exterior to Uranus. The place assigned by M. Le Verrier to the disturbing planet was the same, within one degree, as that given by Mr. Adams' calculations, which had been communicated to the Astronomer Royal *seven months before*. This coincidence left no doubt in Mr. Airy's mind of the reality and general exactness of the prediction of the planet's place, and a search was immediately undertaken by Professor Challis of the Cambridge Observatory. The star map of the Berlin Academy for hour xxi. of Right Ascension had lately been published, but the English Astronomers were not aware of its existence. By the help of this map the search would have been extremely easy and rapid, as the observations could have been compared with the map as fast as they were made. On the 2nd Sept., 1846, Mr. Adams addressed a letter to the Astronomer Royal, in which he communicated the results of a new solution of the problem. The result of this change was to produce a better agreement between the theory and the latter observations, and to give a smaller and therefore a more probable value of the eccentricity. Meanwhile, on the 31st Aug., 1846, M. Le Verrier communicated to the French Academy his second paper on the place of the disturbing planet, which, however, did not reach this country till the third or fourth week in September. In this paper, which is a very elaborate one, the author obtains elements of the orbit of the disturbing planet, very similar to those found in Mr. Adams' second solution, and he also attempts to assign limits of distance and longitude within which the planet must be found. M. Le Verrier communicated his principal conclusions to Dr. Galle of the Berlin Observatory on Sept. 23, and guided by them, and comparing his observations with the Berlin star map, that astronomer found the planet on the same evening. The history of both the French and English observations was published, and although the publication of two different investigations which had been carried on nearly simultaneously seemed likely at first to give

rise to controversy respecting priority, yet this danger soon passed away, as it was evident that the *facts* of the case could not be disputed. It was clear that the two researches had been carried on quite independently, therefore the honour paid to one of the investigators could not detract from that due to the other. Soon after the discovery of Neptune, several members of St. John's College, of which Mr. Adams was then a Fellow, raised a fund, which was offered to the University and accepted by grace of the senate, for the purpose of founding a prize to be called "The Adams Prize," and to be awarded every two years to the author of the best essay on some subject of Pure Mathematics, Astronomy, or other branch of Natural Philosophy. In February, 1851, Mr. Adams was elected President of the Royal Astronomical Society, an office which he held for the usual period of two years. In May, 1852, Mr. Adams communicated to the Royal Astronomical Society new tables of the moon's parallax, to be substituted for those of Burckhardt. In the *Philosophical Transactions* for 1853 there is an important paper by Mr. Adams "On the Secular Variation of the Moon's Mean Motion." As Mr. Adams had not taken Holy Orders, his Fellowship at St. John's expired in 1852, but he continued to reside in the college until the following year, when he was elected to a Fellowship at Pembroke College. In the autumn of 1858 he obtained the Professorship of Mathematics in the University of St. Andrew's, and he resided there and taught the classes until the end of the session in May, 1859, although in the meantime he had been appointed to the Lowndean Professorship of Astronomy and Geometry in the University of Cambridge, in the room of the late Professor Peacock, which office he still holds. For some years after the appearance of Mr. Adams' paper on the Lunar Acceleration in 1853, no other investigation appears to have turned his attention to the subject, but in 1859, M. Delaunay, who had invented a new and beautiful method of treating the lunar theory, found by means of it a result entirely confirming that given nearly six years before by Mr. Adams. In Feb., 1866, the Royal Astronomical Society awarded the gold medal to Professor Adams for his investigations respecting the Lunar Parallax and the Secular Acceleration of the Moon's Mean Motion. In 1861 Professor Challis resigned the office of Director of the Cambridge Observatory, and Professor Adams was appointed to succeed him. Since then he has contributed a number of valuable

papers to the publications of the Royal Astronomical Society and the British Association. Professor Adams was one of the Delegates for Great Britain at the International Prime Meridian Conference, which was held at Washington in October, 1884, and he is a member of numerous distinguished scientific societies, both British and foreign.

ADAMS, William, F.R.C.S., was born in London February 1, 1820, his father being a surgeon in Finsbury Square. He was educated at Mr. W. Simpson's, Hackney, and afterwards at King's College, London. He was appointed in 1842 Demonstrator of Morbid Anatomy at St. Thomas's Hospital; in 1851, Assistant Surgeon; and in 1857 Surgeon to the Royal Orthopædic Hospital; in 1854 Lecturer on Surgery at the Grosvenor Place School of Medicine; in 1855 Surgeon to the Great Northern Hospital; and in 1874 Surgeon to the National Hospital for the Paralysed and Epileptic. Mr. Adams was elected vice-president of the Pathological Society of London in 1867; president of the Harveian Society of London in 1873; and president of the Medical Society of London in 1876. He is the author of "A Sketch of the Principles and Practice of Subcutaneous Surgery," 1857; "On the Reparative Process in Human Tendons after Division," 1860; "Lectures on Pathology and Treatment of Lateral Curvature of the Spine," 1865, 2nd edit., 1882; "On the Pathology and Treatment of Club-foot," 1866 (being the Jacksonian prize essay of the Royal College of Surgeons for 1864), 2nd edit., 1873; "Subcutaneous Division of the Neck of the Thigh Bone, for Bony Ankylosis of the Hip-Joint," 1871; "On the Treatment of Dupuytren's Contraction of the Fingers; and on the Obliteration of Depressed Cicatrices by Subcutaneous Operation," 1879, 2nd edit., 1890; and "On Congenital Displacement of the Hip-Joint," 1890.

ADAMS, William Henry Davenport, author and journalist, born in 1828, began his career as the editor of a provincial newspaper, and, removing to London at an early age, became connected with several influential journals and periodicals. In the course of the last forty years he has produced a large number of books, dealing chiefly with historical and biographical subjects. His adaptations from the French of Louis Figuier, Arthur Mangin, and Michelet have passed through several editions. Amongst his numerous publications we may mention an annotated edition of

Shakespeare, "The Bird World," "The Arctic World," "Memorable Battles in English History," "Woman's Work and Worth," "Heroes of the Cross," "Plain Living and High Thinking," "A Concordance to Shakespeare," "The Merry Monarch," "Good Queen Anne," "The White King," "Witch, Warlock, and Magician," "England at Sea," etc. Mr. Adams was editor of *The Scottish Guardian* from June, 1870, to Dec., 1877; and is a frequent contributor to the periodical press. His son, **W. Davenport Adams**, has produced a "Dictionary of English Literature," and a work on "Famous Books," besides publishing three collections of annotated poetry, entitled "Lyrics of Love from Shakspeare to Tennyson," "The Comic Poets of the Nineteenth Century," and "Latter-Day Lyrics." He is the author also of "Rambles in Book-land," and other volumes of literary criticism; and is connected with the London press.

ADAMS-ACTON, John, sculptor, born Dec. 11, 1836, at Acton, Middlesex, and educated at Ealing Grove School, was admitted to the Royal Academy in 1855, where he gained the first silver medal in each school, and also the gold medal for an original composition in sculpture, *subject*—"Eve supplicating forgiveness at the feet of Adam." He was sent to Rome by the Royal Academy as travelling student. His principal works in ideal sculpture produced in Rome and in England are "The Lady of the Lake," "The First Sacrifice" (Abel), "Il Giuocatore di Castelletto," "Pharaoh's Daughter," "Zenobia," "Cupid," "Psyche," from Morris's "Earthly Paradise." Mr. Adams-Acton has executed portrait statues or busts of Mr. Gladstone (St. George's Hall, Liverpool), Lord Brougham (Reform Club and Fishmongers' Hall), Mr. Bright (Seaforth Hall), and the National Liberal Club, the last bust for which Mr. Bright gave sittings. Mr. Cobden, Sir Wilfred Lawson, George Cruikshank, John Gibson (Royal Academy), George Moore, Charles Dickens, Dr. Jobson, and John Prescott Knight, R.A.; also the following statues and busts for India:—The Prince of Wales, Lord Napier of Magdala, and E. Powell (for Madras). The most important monuments executed by him are the Angel of the Resurrection, Mausoleum of Sir Titus Salt at Saltaire, Memorial to John and Charles Wesley in Westminster Abbey, the Waldegrave Memorial in Carlisle Cathedral, Charles Prost, Rev. John Farrar, and Sir Frances Lycett in the City Road Chapel, a bust of Mr. George Routledge,

J.P., and a half-length portrait of Mr. John Landseer, A.R.A., reading a book.

ADLER, Felix, Ph.D., was born at Alzey, Germany, August 13, 1851. He went to America when young, and graduated at Columbia College (N.Y.), in 1870, and subsequently studied at Berlin and Heidelberg, where he obtained the degree of Ph.D. in 1873. He was Professor of Hebrew and Oriental Languages and Literature at Cornell University from 1874 to 1876, and since then has been at the head of the Ethical Society of New York, a new religious society established by him, which he addresses every Sunday and which maintains a number of charities. His principal work is "Creed and Deed," 1877; in addition to which he has contributed many papers to periodical literature.

ADLER, The Rev. Hermann, Ph.D., M.A., son of Dr. Nathan Marcus Adler, was born in Hanover on May 29, 1839, and in 1845 accompanied his father to London. He studied at University College, London, and subsequently at the universities of Prague and Leipzig. He obtained his B.A. degree at the University of London in 1859, and that of Doctor of Philosophy at Leipzig in 1861. In 1862 he was ordained Rabbi by the famous Rapoport, Chief Rabbi of Prague, under whom he had studied Theology. In 1863 Dr. Adler was appointed Principal of the Jews' College in London, and in the following year Chief Minister of the Bayswater Synagogue. When the health of his father, the Chief Rabbi, began to fail in 1879, he was appointed his coadjutor, with the title of Delegate Chief Rabbi. He is the joint author of "A Jewish Reply to Dr. Colenso's Criticism on the Pentateuch," 1865. He has published "Sermons on the Passages in the Bible adduced by Christian Theologians in support of their faith," 1869; "The Jews in England," "The Chief Rabbis of England," "Ibn Gabirol the Poet Philosopher," "The Purpose and Methods of Charitable Relief," "Hebrew, the Language of our Prayers," "A Pilgrimage to Zion, A Father's *Barmitzvah* Exhortation," "The Sabbath and the Synagogue," "Sermons in memoriam of Sir George Jessel, Master of the Rolls, Sir Moses Montefiore, and the Baroness de Rothschild," "Is Judaism a Missionary Faith?" in reply to Professor Max Müller, &c. Dr. Adler has published also many lectures and articles which have appeared in various periodicals, more especially in the *Nineteenth Century*, in

which review he conducted a vigorous polemic against Professor Goldwin Smith on the subject of Jews as Citizens. In his article "Recent Phases of Judæophobia," in 1881, he drew public attention to the persecutions of the Jews in Russia. He was appointed a member of the Mansion House Committee constituted for their relief, and in this capacity attended, in conjunction with Sir Julian Goldsmid, the Berlin Conference of representatives of the principal European Hebrew Congregations, and in 1885 visited the colonies founded by Russian refugees in the Holy Land. In 1887 he was elected Chairman of the Council of Jews' College, an institution for the training of Ministers and Teachers. In 1888 he gave evidence before the Select Committee of the House of Lords on the Sweating System. During his tenure of office Dr. Adler has organized a system of visitation among the poor Jews in the East of London, assisted in establishing Religious Classes in connection with several Board Schools, and started a Fund for subventioning poor Ministers in the Provinces. After the death of his father in 1890 he was solicited to act provisionally as Chief Rabbi during the interval preceding the election. In 1867 he married Rachel, eldest daughter of the late S. Joseph, by whom he has issue one son and two daughters.

ADYE, General Sir John Miller, G.C.B., son of the late Major James P. Adye, R.A., was born on Nov. 1, 1819, at Sevenoaks, Kent, and entered the Royal Artillery at the close of the year 1836. Throughout the Crimean War and the Indian Mutiny he was Adjutant-General of the Royal Artillery. He also served in the Sitana Campaign of 1863-4, for which he received a medal; and he has received, besides, the Crimean, Turkish, and Indian Mutiny medals, and the 4th Class of the Medjidieh. He was created a C.B. in 1855, and a K.C.B. in 1873. In Feb. 1874, the Queen granted to Sir J. M. Adye her royal licence and authority to accept and wear the insignia of Commander of the Order of the Legion of Honour conferred upon him by the President of the French Republic as a promotion from the class of Officer of the same order which he received for his services during the Crimean War. He was Director of Artillery from 1870 to 1875, and was appointed Governor of the Royal Military Academy at Woolwich, in July, 1875. He became a Lieutenant-General in the army in 1879. In 1880 he resigned the post of Governor of the Royal Military Academy at Woolwich, on being ap-

pointed Surveyor-General of Ordnance. The following year he became Colonel Commandant of the Royal Artillery. He was Chief of the Staff and second in command of the expeditionary force sent to Egypt in 1882, and for his services he received the Egyptian medal and Khedive's star, the thanks of Parliament, the Grand Cross of the Order of the Bath, and the 1st Class of Medjidieh. In January, 1883, he was appointed Governor of Gibraltar, in succession to Lord Napier of Magdala, from which appointment he retired in November, 1886. Sir John Adye is the author of "The Defence of Cawnpore by the Troops under the Orders of Major-General C. A. Windham in Nov., 1857," 1858; "A Review of the Crimean War to the Winter of 1854-55," 1860; "Sitana: a Mountain Campaign on the Borders of Afghanistan in 1863," 1867. He married, in 1856, Mary Cordelia, eldest daughter of the late Vice-Admiral the Hon. Sir Montagu Stopford, K.C.B.

AIKINS, The Hon. James Cox, a Canadian statesman, was born in the township of Toronto, county Peel, Ontario, March 30, 1823. He was educated at Victoria College, Cobourg, and entered public life in 1854, by representing his native county in the Canadian Assembly, which he continued to do until 1861. In the following year he was elected a member of the Legislative Council for the "Home" Division, comprising the counties of Peel and Halton. He continued to sit in the Council until it was abolished by Confederation, after which he was raised to the Senate. In December, 1869, he became a member of the Privy Council, and entered the Macdonald Government as Secretary of State, remaining in that office until the fall of the Government in 1873. In 1872 he framed and carried through Parliament the Public Lands Act of that year, and subsequently organized the Dominion Lands Bureau, a department of government entrusted with the management of the lands acquired in the North-West, chiefly from the Hudson's Bay Company, a department which is now controlled by the Canadian Minister of the Interior. On the return of the Macdonald Government to power, in 1878, Senator Aikins resumed the portfolio of Secretary of State, exchanging it two years later for the office of Minister of Inland Revenue. In 1882 he was appointed Lieutenant-Governor of the province of Manitoba and district of Keewatin, an office which he retained until his term expired in 1888.

AINSWORTH, William Francis, Ph.D., L.R.C.S., F.S.A., F.R.G.S., was born in 1807. Having travelled abroad, he became, in 1829, editor of the *Journal of Natural and Geological Science*. On the breaking out of cholera in Sunderland, in 1832, he was one of the first to repair thither in order to study the new epidemic, and he published the result of his observations in a work "On Pestilential Cholera." He was successively appointed surgeon to the cholera hospitals at St. George's, Hanover Square, and at Westport, Ballinrobe, Clarendon, and Newport, in Ireland. Whilst in that country he lectured on geology in Dublin and Limerick. In 1835 he was appointed surgeon and geologist to the Euphrates Expedition, and published "Researches in Assyria, Babylonia, and Chaldæa," 1838, in which year he was also sent by the Royal Geographical Society, and the Society for Promoting Christian Knowledge, to the Nestorian Christians in Kurdistan. His "Travels in Asia Minor, Mesopotamia, and Armenia," 1842, and "Travels in the Track of the Ten Thousand Greeks," of which an analysis was also given in Bohn's edition of Xenophon's "Anabasis," were the result of the two journeys, extending over a period of seven years. Dr. Ainsworth has edited "Claims of the Oriental Christians," "Lares and Penates; or, Cilicia and its Governors," "The Euphrates Valley Route to India," "On an Indo-European Telegraph by the Valley of the Tigris" (since carried out by the Turkish Government), "All Round the World," "The Illustrated Universal Gazetteer," &c. Dr. Ainsworth has since published "Personal Recollections of the Euphrates Expedition," 2 vols., 8vo., and "The River Karun an Opening to Commerce," sm. 8vo. Dr. Ainsworth is a member of many foreign societies. He was one of the founders of the "West London Hospital," of which he is at present the Treasurer and one of the Trustees.

AIRY, Sir George Biddell, K.C.B., D.C.L., LL.D., F.R.S., the late Astronomer Royal, a native of Alnwick, Northumberland, born June 27, 1801, was educated at private schools at Hereford and Colchester, and at the Colchester Grammar School, whence he proceeded to Trinity College, Cambridge, in 1819. In 1822 he was elected Scholar, and in 1824 Fellow, of Trinity, having graduated B.A. in the previous year, when he came out Senior Wrangler. In 1825 Mr. Airy called attention to an optical malady of the human eye, which has since received the name of "Astigmatism," examined its

nature and provided a remedy for it. In 1826 he took his degree of M.A., and was elected Lucasian Professor. This office, rendered illustrious by having been filled by Barrow and Newton, had become a sinecure. No sooner was Professor Airy elected, than he resolved to turn it to account, and to deliver public lectures on Experimental Philosophy. He began this good work in 1827, and continued it to 1836, the series being known as the first in which the Undulatory Theory of Light was efficiently illustrated. In 1828 he was elected to the Plumian Professorship, and in that capacity was intrusted with the entire management of the Cambridge Observatory. On taking charge of this post he began a course of observations, and introduced improvements in the form of the calculation and publication of the observations, which have served as a pattern at Greenwich and other observatories. Professor Airy also superintended the mounting of the Equatorial, the Mural Circle, and the Northumberland Telescope (the last entirely from his own plans), at the Cambridge Observatory. In 1835 he succeeded Mr. Pond as Astronomer Royal. In this capacity he distinguished himself by giving greater regularity to the proceedings in the Observatory at Greenwich, by maintaining the general outline of the plan which its essential character and its historical associations have imposed upon that institution, while he introduced new instruments and new modes of calculation and publication, by which the value of the Observatory to science is much increased. Sir G. B. Airy, who computed, edited, and published the observations of Groombridge, Catton, and Fallows, and reduced the Greenwich observations of planets and observations of the moon from 1750 down to the present time, has also thrown much light on ancient chronology, by computing several of the most important eclipses of former ages. He has illustrated the Newtonian theory of gravitation, and approximated the great object of ascertaining the weight of the earth, by a series of experiments on the relative vibrations of a pendulum at the top and at the bottom of a deep mine (the deep Dolcoath Mine, near Camborne, in Cornwall, and at the Harton Colliery, near South Shields); has paid great attention to the testing and improvement of marine chronometers, and to the diffusion, by galvanic telegraph, of accurate time-signals. In 1838 he was consulted by the Government respecting the disturbance of the compass in iron-built ships, and

the result of the experiments and theory developed by him on that occasion was the establishment of a system of mechanical correction by means of magnets and iron, which has since been universally adopted. He was chairman of the Commission appointed to consider the general question of standards, and of the Commission intrusted with the superintendence of the new Standards of Length and Weight, after the great fire which destroyed the former national standards in the Houses of Parliament in 1834. The account of the proceedings on these occasions, published in the "Philosophical Transactions," is from his pen. He advocated the establishment of a decimal coinage and, acting as one of three Royal Commissioners on Railway Gauges, recommended the narrow as opposed to the broad gauge on our railways; conducted the astronomical operations preparatory to the definition of the boundary between Canada and the United States, and aided in tracing the Oregon boundary. Sir G. B. Airy contributed to the "Cambridge Transactions," "The Philosophical Transactions," "The Memoirs of the Royal Astronomical Society," the *Philosophical Magazine*, and the *Athenæum* (often under the signature of A.B.G.). In the *Athenæum* are several papers on antiquarian subjects, especially British. He also wrote strongly in the *Athenæum* and elsewhere in opposition to the legislation proposed by the University Commissioners in reference to his own university, and more especially to his own college. In 1869 he communicated a remarkable discovery to the Royal Astronomical Society, in a "Note on Atmospheric Chromatic Dispersion, as affecting Telescopic Observation, and on the Mode of Correcting it." He was intrusted with the entire direction of the British portion of the enterprise for observing the transit of Venus in Dec. 1874; on the results of which a Report was communicated to the House of Commons in 1877. More recently he has suggested a new method of treating the Lunar Theory. He added to the original course of labours at the Royal Observatory a complete system of magnetic, meteorological, photoheliographic, and spectroscopic observations. The principal works written by Sir G. B. Airy are, "Gravitation," for the *Penny Cyclopædia*, published separately also; "Mathematical Tracts" (fourth edition); "Ipswich Lectures on Astronomy" (fourth edition), (adopted as text-book in the Australian Universities); "Treatise on Errors of Observation" (1861); "Treatise on Sound" (1869); "Treatise

on Magnetism" (1870); also "Trigonometry;" "Figure of the Earth;" and "Tides and Waves;" in the *Encyclopædia Metropolitana*, since republished separately; and "Notes on the early Hebrew Scriptures." Sir G. B. Airy has received the Lalande medal of the French Institute, the Copley Medal and the Royal Medal of the Royal Society; the Medal of the Royal Astronomical Society; the Albert Medal, presented by the Prince of Wales; and the medal of the Institution of Civil Engineers for suggestions on the construction of bridges of very wide span. From the Universities of Oxford, Cambridge, and Edinburgh he has also received the honorary degrees of D.C.L. and LL.D.; he is a F.R.S., a Fellow of the Royal Astronomical Society, Member of the Cambridge Philosophical Society, Honorary Member of the Institution of Civil Engineers; one of the eight Foreign Associates of the Institute of France; and has long been connected, as Foreign Correspondent, with many other foreign academies. He was appointed one of the first members of the Senate of the University of London, but soon after resigned the office. He was nominated a Companion (Civil) of the Bath, May 17, 1871; and created a Knight Commander of the same order, July 30, 1872. On Dec. 1, 1873, Sir G. B. Airy resigned the position of President of the Royal Society which he had held for two years. He was honoured by admission to the freedom of the City of London in 1875; and he was elected a Foreign Associate of the Dutch Academy of Sciences in 1878. On his resignation of the post of Astronomer Royal in 1881 the Treasury awarded him a pension of £1,100 per annum in consideration of his long and valuable services.

AITCHISON, George, A.R.A., architect, was born at 52, Edgeware Road, London, went to Merchant Taylors' School until his sixteenth year, was then articled to his father, George Aitchison, architect, and became student of the Royal Academy in 1847, and subsequently entered University College, London, where he gained prizes for mathematics, and graduated B.A. at the London University in 1850. From 1853 to 1855 he travelled in France, Switzerland and Italy; was elected a Fellow of the Royal Institute of British Architects in 1862; subsequently became a member of the Council, and in 1889 was elected Vice-President. He was for several years one of the examiners for the Voluntary Architectural examination, and is also

examiner for the National Art Prizes at South Kensington. Mr. Aitchison gained medals at the following exhibitions, viz., Philadelphia, 1876; Sydney, 1879; Adelaide, 1887, and two at Melbourne; a bronze in 1881, and silver in 1888; was made an officer of Public Instruction by the French Government in 1879, having designed the fittings and furniture for the British Art section of the Paris Exhibition, 1878. On June 2, 1881, he was elected an Associate of the Royal Academy in the place of the late William Burges, A.R.A. He gave lectures on architecture at the Royal Academy in 1882, '83, '84, '85, '86 and '87. In 1885 he was elected a corresponding member of the Société Centrale des Architectes in Paris; was elected Professor of Architecture at the Royal Academy in 1887; in 1888 he gave the Cantor Lectures on Decoration at the Society of Arts. He decorated Kensington Palace for H.R.H. the Princess Louise, and the house and Arab hall for Sir Fred. Leighton. He has added to, altered, and decorated houses for the Duke of Montrose, Lord Hillingdon, the Duchess of Newcastle, Lord Leonfield, Sir Wilfrid Lawson, M.P., Sir S. Waterlow, M.P., and others.

AITCHISON, Brig. Surgeon James Edward Tierney, M.D., C.I.E., LL.D., Edin., F.R.S., son of the late Major James Aitchison, H.E.I.C.S.; was born in 1835; M.D. Edin., 1856; F.R.C.S. Edin., 1863; M.R.C.P. Edin., 1868; F.R.S. Edin., 1882; F.R.S. London, 1883; LL.D. Edin., 1889; entered the Bengal Medical Dept. 1858; became surgeon 1870; surgeon-major 1873; and brig. surgeon 1885; retired 1888. He was British commissioner, Laduk, 1872; served with Kuram field force at the advance on and taking of the Peshawar Khotal, 1878 (medal with clasp), and as botanist to the force 1879-1880. He was secretary to the surgeon-general H.M. Forces 1883-8, and naturalist with the Afghan Delimitation Commission 1884-85; and was created C.I.E., 1883. His published works are:—"A Catalogue of the Plants of the Punjab and Sindh," 1869; "Handbook of the Trade Products of Leh," 1874. In the Linnean Society's Journal of Botany, 1864, "Flora of the Thelum District;" 1868, "Luhul, its Flora and Vegetable Products;" 1869, "Flora of the Hushcarpur District;" 1880, "Flora of the Kuram Valley, &c., Afghanistan;" 1882, continuation "Flora of the Kuram Valley, Afghanistan." In the Transactions of the Linnean Society, 1888, "The Botany of the Afghan Delimitation Commission;" 1889, "The Zoology of the Afghan Delimita-

tion Commission." He married in 1862, Elean Carmichael, daughter of Robert Craig, Esq., Newbattle, N. B.

AITKEN, Sir William, Knt., M.D., LL.D., F.R.S., Professor of Pathology in the Army Medical School at Netley, Hants, was born in Dundee, Forfarshire, April 23rd, 1825, and was educated at the High School there. After serving an apprenticeship to his father, a surgeon in Dundee, he became Resident Medical Officer at the Dundee Infirmary. He matriculated as a student in the University of Edinburgh in 1842, attending first the Arts Classes, subsequently passing through the Medical curriculum, and finally proceeding to the Degree of Doctor of Medicine in 1848. In the same year he became a Licentiate of the Royal College of Surgeons in Edinburgh. In the autumn of 1848 he was selected by Dr. Allen Thomson, the Professor of Anatomy in the University of Glasgow, as his Demonstrator of Anatomy in that university. He continued to hold this office, and also that of Pathologist to the Glasgow Royal Infirmary, till April, 1855, when he volunteered for service in the Hospitals in Turkey during the Russian War. He received an appointment from the Right Hon. the Secretary of State for War, as one of a special Pathological Commission, "to proceed to the seat of war in the East, to investigate the nature of the diseases from which the troops were suffering, and especially at Scutari on the Bosphorus." The results of that commission of inquiry were published (jointly with that of the late Dr. R. D. Lyons, Professor of Medicine in the Roman Catholic University of Dublin) in a Parliamentary Report, at the request of the Secretary of State for War, in 1856. During his service in the East, Dr. Aitken had the honour of being elected a corresponding member of the following foreign medical societies:—The Royal Imperial Society of Physicians of Vienna; the Society of Medicine and Natural History of Dresden; and the Imperial Society of Medicine of Constantinople. He was appointed on 28th January and gazetted on 27th March, 1860, as Professor of Pathology in the Army Medical School. On the death of his colleague, Dr. Parkes, he was appointed his successor as secretary to the Senate of the Army Medical School; and also as Examiner in Medicine for the Military Medical Services of the Queen at the London Examinations which are held in February and August of each year. He was elected a Fellow of the Royal Society of London in 1875, and a Member of the Athenæum Club in 1881. He

had the honour of Knighthood conferred upon him on the occasion of the Queen's Jubilee in 1887. He received the honorary degree of LL.D. from the University of Edinburgh on 18th April, 1888; and also from the University of Glasgow in August of the same year. He was President of the section of Pathology at the General Annual Meeting of the British Medical Association in Glasgow in August, 1888. Sir William Aitken has been mainly occupied as a teacher, investigator and writer on Anatomy and Pathology, and especially taking an active part in the business of the Army Medical School, and that of the several official positions which he has held, as well as in medical education, and the general progress of science. He is the author of numerous published papers on Pathology and the Science of Medicine, of which his dissertation "On Inflammatory effusions into the substance of the lungs as modified by contagious fevers, illustrated with drawings of microscopic and ordinary appearances of the pulmonary lesions," gained for him the gold medal on his graduation as Doctor of Medicine in the University of Edinburgh in 1848, and some reputation as a worker in Pathology. This dissertation was published in the *Ed. Med. and Surgical Journal*, 1849. He is the author of "Contributions to the Pathology of Acute Chorea and Tetanus;" of "Acute Hypertrophy of the Mamma terminating fatally;" of "Circoid Aneurism;" of "Thoracic Aneurism;" of "The Specific Gravity of the Brain and Nervous Centres, and of the Spinal Cord in Health and Disease," in the first volume of the *Glasgow Medical Journal*; of a joint report with Dr. Lyons "On the Pathology of the Diseases of the Troops in the East during the Russian War of 1855-56;" "On the Diseases of the Troops and on the Climate of Scutari on the Bosphorus," published in the *Glasgow Medical Journal*, April, 1857; "Medical History of the War with Russia," in the *Glasgow Medical Journal*, July, 1857; "On the Persistent Pernicious influence of the residence in Bulgaria on the subsequent Health of the British Troops in the Crimea," communicated to the Royal Medico-Chirurgical Society of London and published in their Transactions, Vol. XL; "On conducting *Post-mortem* Examinations at Coroners' Inquests," *Glasgow Med. Journal*, 1857; "On the Pathological Connections and Relations of Epidemic Disorders in Man and the Lower Animals, with special reference to the relationship between the health of man and the condition of his food," *Med. Times and Gazette*, April, 1857; "Analy-

tical Review of Royal Med. Ch. Society of London's Transactions, Vol. XLI., in *Med. Ch. Review*, 1859; "Critical and Analytical Review of recent Works on the Pathology of Vaccination, and its Protective Influence from Small-pox," in *Med. Ch. Review*, Oct. 1857; "Analytical and Critical Review of the first Decennium of the Pathological Society of London," in *Med. Ch. Review*, 1858; "Handbook of Science and Practice of Medicine," 1858. In the 2nd. edit. published in 1861, the use of the thermometer was for the first time expounded in any English text book of medicine as a means of determining the temperature of the body in cases of fever, and charts were given characteristic of the ranges of temperature in specific febrile diseases. This work has now (1890) reached its 7th edit. "The Growth of the Recruit and Young Soldier," 2nd edit.; "On the Doctrine of Evolution in its application to Pathology," in *Glasgow Med. Journal*, 1885-86; "Diseases of Spleen," in *Quain's Dictionary of Medicine*; "On the Animal Alkaloids," 2nd edit., 1889.

AITKEN, The Rev. William Hay Macdowall Hunter, is the youngest son of the late Rev. Robert Aitken by his second wife Wilhelmina, daughter of the late Col. Macdowall Grant, of Arndilly, Banffshire, N.B. He was born at Liverpool, educated at his home in Pendeen, Cornwall, matriculated in 1859 at Wadham College, Oxford, and graduated in honours (2nd class Lit. Hum.), taking his degree B.A. in 1865. He was ordained at Christmas, 1865, on his nomination by the late Rev. W. Pennefather to the curacy of St. Jude's, Mildmay Park, N., where he continued until the year 1871, when he accepted the incumbency of Christ Church, Everton, Liverpool. Here he worked for more than four years. In the year 1869 the "twelve days' mission" was held in London, and Mr. Aitken took a prominent part in it. From that time forward his services were in great request for this kind of work, and in the year 1875, finding that mission work, in addition to the care of a large parish, entailed too severe a strain, he resigned his living and gave himself up to the work of a mission preacher. As such he has conducted mission services in several of our cathedrals, e.g., in Canterbury, York, Bristol, and Manchester, and in most of the old parish churches of our large towns. A few years ago he visited the United States at the request of the bishop and clergy of New York, to assist in the general New York mission, and

in furthering the mission movement throughout the States. Mr. Hay Aitken has been chiefly instrumental in founding the "Church Parochial Mission Society," which has for its object the supply of mission preachers to carry on this work. The society was organised as a memorial to Mr. Aitken's father, and bore the name at first of the Aitken Memorial Mission Fund. He is the author of the following works:— "Mission Sermons," 3 vols.; "Newness of Life;" "What is your Life?" "God's Everlasting Yea;" "The Glory of the Gospel;" "The Highway of Holiness;" "Around the Cross;" "The Revealer Revealed;" "The Love of the Father;" "Easter tide;" "The School of Grace;" and "The Difficulties of the Soul."

AKERS-DOUGLAS, Aretas, M.P., eldest son of the late Rev. Aretas Akers, of Malling Abbey, Kent, was born in 1851, and educated at Eton and at University College, Oxford. He was called to the Bar at the Inner Temple in 1874, and in 1875 assumed the additional name of Douglas. In 1880 he entered Parliament as Conservative member for the East Kent Division, and now represents the new St. Augustine's Division. In both Lord Salisbury's administrations he has held the post of Political Secretary to the Treasury, or "Whip."

ALBANI, Madame. See GYE, MADAME.

A. K. H. B. See BOYD, THE REV. A. K. H.

ALBANS, St., Bishop of. See FESTING, THE RT. REV. JOHN W.

ALBANY (Duchess of), H.R.H. Hélène Fredrica Augusta, the daughter of the Prince and Princess of Waldeck-Pyrmont, and sister of the Queen of the Netherlands, was born on Feb. 17, 1861. She married H.R.H. the late Prince Leopold, Her Majesty's youngest son, on April 27, 1882, and became a widow by his sudden death at Cannes, on March 28, 1884. The Princess lost her mother in 1888. She has two children, one of whom was born after the Prince's death; the Princess Alice Mary Victoria Augusta Pauline, born at Windsor Castle, Feb. 25, 1883; and the Prince Leopold Charles Edward George Albert, Duke of Albany, born at Claremont, July 19, 1884. The Princess receives a pension of £6,000 a year from the British Government.

ALBERT, King of Saxony, K.G., born April 23, 1828; succeeded his father Oct. 29, 1873. He received a thorough military

education, and took part in the Danish war of 1848. He fought also on the side of the Austrians in the disastrous battle of Sadowa in 1866, and likewise in the Franco-German war in the operations before Metz, and in the operations which terminated in the surrender of Napoleon at Sedan, and the siege of Paris, when he held the right bank of the Seine. On the conclusion of the war he was made Field-Marshal and Inspector-General of the German Army. He married Caroline, the daughter of Prince Gustavus Vasa of Sweden. His heir is his brother, Prince George.

ALBERT (Archduke of Austria), Frederick Rodolph, born August 3, 1817, is the son of the late Archduke Charles and the Princess Henrietta of Nassau-Weilburg. He married, in 1844, the Princess Hildergarde, of Bavaria, who died April 2, 1864, leaving two daughters. At an early age he entered the army, commanded a division in Italy in 1849, took an important part in the battle of Novara, received at the end of the campaign the command of the 3rd Corps d'Armée, and was afterwards appointed Governor-General of Hungary. During a leave of absence accorded to Field-Marshal Benedek, in 1861, he was appointed to the command of the Austrian troops in Lombardy and Venetia. During the campaign of 1866 he gained a victory over the Italian army at Custozza, and, after the battle of Sadowa, he was made (July 13, 1866) Commander-in-Chief of the Austrian army, which title he retained till March, 1869, when he exchanged it for that of Inspector-General of the army. He published, in 1869, a work on "Responsibility in War" (*Ueber die Verantwortlichkeit im Kriege*). This has been translated into French by L. Dufour, captain of artillery, and an English translation of it is given in Capt. W. J. Wyatt's "Reflections on the Formation of Armies, with a View to the Reorganization of the English Army," 1869.

ALBERT VICTOR, H.R.H. Prince. See CLARENCE AND AVONDALE, DUKE OF.

ALBONI, Madame. See PETOLO, MADAME.

ALCESTER (Baron), The Right Hon. Frederick Beauchamp Paget Seymour, G.C.B., is the only surviving son of the late Sir Horace Beauchamp Seymour, M.P., by his first wife, Elizabeth Mallett, daughter of the late Sir Lawrence Palk, Bart.; and a grandson of Vice-Admiral Lord Hugh Seymour. He was born in Bruton Street, London, on April 12, 1821,

was educated at Eton, and entered the Royal Navy in Jan., 1834, receiving his Lieutenant's commission in March, 1842. He became a captain in 1854, rear-admiral in 1870, vice-admiral in 1876, and admiral in 1882. He served as a volunteer in the Burmese war of 1852-3 as aide-de-camp to General Godwin, and led the storming party of Fusiliers at the capture of the works and pagoda of Pegu. He was also present in numerous other engagements on land and water, was four times gazetted, and awarded the Burmese medal with the clasp for Pegu, at the close of the campaign. In 1854 he served against the Russians in the operations in the White Sea, and is in receipt of the Baltic medal. A few years later, viz., 1860-1, as commodore in command of the Australian station, he took part in the operations of the Naval Brigade in New Zealand, again distinguishing himself, and receiving a severe wound on June 27, 1860. In 1861 he was awarded the Companionship of the Bath, and subsequently the New Zealand medal. In 1866 he was appointed an aide-de-camp to the Queen. From 1868 till 1870 he was private secretary to the First Lord of the Admiralty, and he commanded the Detached Squadron from December, 1870, till May, 1872, from which date till March, 1874, he was one of the Lords of the Admiralty. From October, 1874, till November, 1877, when he was made a K.C.B., he commanded the Channel Squadron, and he was appointed Commander-in-Chief in the Mediterranean in February, 1880. In September of the same year he assumed the supreme command of the Allied Fleet of the European Powers, which made a naval demonstration off the Albanian coast in consequence of the refusal of the Porte to agree to the cession of Dulcigno to Montenegro. Eventually the Turks consented to the cession, and the object for which the European fleet had been assembled in the Adriatic having thus been achieved, it dispersed on Dec. 5. Sir Beauchamp Seymour received the thanks of Her Majesty's Government for the manner in which he performed his duty on this occasion, and he was created a Grand Cross of the Bath in the following year (1881). In the warlike operations in Egypt, in 1882, he took a conspicuous part as Commander-in-Chief of the Mediterranean Fleet. On the 6th of July he demanded of Arabi Pasha the instant cessation of the works on the forts at Alexandria, under penalty of bombardment; and on the 10th he dispatched an ultimatum to the Egyptian Ministry, demanding, not only the cessa-

tion of all defensive works, but also the surrender of the forts at the mouth of the harbour. This being refused, early on the morning of the 11th, eight British ironclads and five gunboats advanced to the attack, and although the Egyptian gunners fought their guns exceedingly well, the forts were, in a few hours, laid in ruins or silenced, with slight loss on the British side, and with trifling damage to the ships. For his services he received the thanks of Parliament, was voted the sum of £20,000, and was elevated to the peerage by the title of Baron Alcester of Alcester, in the county of Warwick.

ALCOCK, Sir Rutherford, K.C.B., D.C.L., F.R.C.S., is the son of Dr. Thomas Alcock, and was born in 1809, and educated for the medical profession. He was on the medical staff of the British Auxiliary Forces in Spain in support of Isabella II., against the Carlists, and in Portugal in support of Maria II., against the Miguelists; and for his services in the Peninsula received honours and decorations from the English, the Spanish, and the Portuguese Governments. Subsequently he was consul at Foo-chow (1844); at Shanghai (1846); and at Canton (1858). Thence he was transferred to the diplomatic service, and became envoy extraordinary, minister plenipotentiary, and consul-general in Japan. Sir Rutherford Alcock was created K.C.B. in 1862; and in 1865 was transferred to Pekin as Chief Superintendent of Trade in China, and remained there till 1870. He is the author of "Notes on the Medical History of the British Legion in Spain," 1838; "Elements of Japanese Grammar," 1861; "The Capital of the Tycoon," 1863; and "Familiar Dialogues in Japanese," 1878. In 1876 he was President of the Royal Geographical Society, and in 1882 presided over the health department of the Social Science Congress.

ALDRICH, Thomas Bailey, an American author, was born at Portsmouth, New Hampshire, Nov. 11, 1836. He has contributed prose and verse to various periodicals, most of which has subsequently been published separately. Among the collected volumes of verse are "The Bells," 1855; "The Ballad of Baby Bell and other Poems," 1856; "The Course of True Love never did Run Smooth," 1858; "Pampinea and other Poems," 1861; a volume of "Poems," 1865; "Cloth of Gold and other Poems," 1874; "Flower and Thorn," 1876; "Lyrics and Sonnets," 1880; "Friar Jerome's Beautiful Book," 1881; "From

Ponkapog to Pesth," 1883; "Mercedes and Later Lyrics," 1884; "Wyndham Towers," 1889; and "The Sisters' Tragedy and other Poems." Among his prose tales are "Daisy's Necklace and What Came of It," 1857; "Out of his Head: a Romance in Prose," 1862; "The Story of a Bad Boy," 1869; "Margery Daw," 1873; "Prudence Palfrey," 1874; "The Queen of Sheba," 1877; and "Stillwater Tragedy," 1880. From 1881 to the present year (1890) he has been the editor of the *Atlantic Monthly*, Boston, but he recently resigned that position in order to devote himself entirely to writing.

ALEXANDER I. (Obrenovitch), KING OF SERBIA, was born on Aug. 14, 1876, and succeeded his father, the ex-King Milan, who abdicated in favour of his son, March 6, 1889, after divorcing his consort, Queen Natalie (*q. v.*). He is under the guardianship of two Regents. When Crown Prince he accompanied his mother, Queen Natalie, into exile after her separation from the King, but was forcibly removed from her at Berlin, and conveyed back to Belgrade.

ALEXANDER III. (Alexandrovitch), EMPEROR OF ALL THE RUSSIAS, who succeeded to the throne on the murder of his father by Nihilist conspirators on March 13 (N. S.), 1881, was born March 10, 1845. For some time after his elevation to the throne he seldom appeared in public, but lived in the closest retirement at Gatchina, being in constant dread of the machinations of the secret societies of Socialists. His coronation took place at Moscow, May 27, 1883. He married, in 1866, Mary-Féodorovna (formerly Mary Sophia Frederica Dagnar), daughter of Christian IX., King of Denmark, and sister of the Princess of Wales and the King of Greece. The principal concern of the Czar has been to put down Nihilism; to develop the military power of Russia; to organise her Asiatic and Caucasian provinces; and to keep a steady eye upon Constantinople. By means of the ability and watchfulness of Prince Bismarck, the *Dreikaiserbund* (League of the Three Emperors) has been consolidated, as was shown by the meetings at Skiernivice (Poland) in 1884; and more especially by the recent action of Russia in Bulgaria. The Czar never forgave his cousin Alexander Joseph of Battenberg for acting independently of Russia in the crisis of 1885; and lately his vengeance has been consummated (see next Memoir). In October, 1888, the Czar with his family narrowly escaped death by a railway accident on the Transcaspiian railway.

ALEXANDER, Joseph, of Battenberg, recently Prince of Bulgaria, is the son of Prince Alexander of Battenberg (Hesse), who died Dec. 15, 1888, brother of the late Empress of Russia, and was born April 5, 1857. His mother, born Countess von Kauck, was the daughter of a former Polish Minister of War, and was raised to the rank of Princess on her morganatic marriage with the ruler of Hesse. The ex-Prince of Bulgaria is a second son of this union, an elder brother is serving in the English Navy. Prince Alexander served with the Russian army during the war with Turkey. Part of the time he rode in the ranks of the 8th Regiment of Uhlans, and he was also attached to the staff of Prince Charles of Roumania, as well as to the Russian head-quarters. He was present with Prince Charles at the siege of Plevna, and crossed the Balkans with General Gourko. Soon after returning to Germany from the Russo-Turkish campaign he was transferred from the Hessian Regiment of Dragoons, to which he had belonged, to the Prussian Life Guards, and did garrison duty in Potsdam. He was elected hereditary Prince of Bulgaria by the Assembly of Notables at Tirnova, April 29, 1879, and by a vote of the Grand National Assembly on July 13, 1881, he was invested with extraordinary legislative powers for seven years. He was appointed an honorary Knight Companion of the Order of the Bath in June, 1879. Prince Alexander's decision on the revolution of Philippopolis led to the declaration of war against Bulgaria by King Milan, of Serbia, in 1885, when the Prince at once proved himself more than equal to his neighbour. Although the Bulgarian army was the smaller and quite inexperienced, Prince Alexander, by his personal bravery and strategic skill, obtained several victories, and on the intervention of the European Powers, King Milan was obliged to consent to a Treaty of Peace, which was signed at Bucharest. By consenting to the union of the two Bulgarias, Prince Alexander incurred the jealousy and displeasure of the Czar, who struck his name off the Russian army list. The position of the Prince continued exceedingly difficult until on Friday, Aug. 20, 1886, part of his army, influenced by Russian intrigue, revolted and forced him to sign his abdication. He was taken prisoner and carried down the Danube to Russian territory, but the outburst of popular indignation in Bulgaria secured his liberation, and he returned a few days later to his country, meeting with an enthusiastic reception at Rustchik, Philippopolis, and Sofia. It was all,

however, of no avail; for, the Prince decided that he could not make head against his Russian enemies, and he formally abdicated, his place being temporarily taken by a Council of Regency, and afterwards by Prince Ferdinand of Coburg. Prince Alexander's engagement to the Princess Victoria of Germany caused much excitement in 1888, and the match being opposed by the Czar, was broken off. On January 11, 1889, the Prince took the name of "Comte de Hartenau;" and, in the month following, married the Fräulein Amalia Loisinger, a celebrated actress, and retired to his estate at Gratz, in Styria.

ALEXANDER, The Right Rev. William, D.D., D.C.L., Bishop of Derry and Raphoe, son of a clergyman beneficed in the north of Ireland, and nephew of Dr. Alexander, late Bishop of Meath, and cousin of the Earl of Caledon, was born at Londonderry, April 13, 1824. He was educated at Funbridge School, and at Exeter and Brasenose Colleges, Oxford, where he graduated B.A. and M.A. He graduated in classical honours (Honorary 4th, 1847). He won the Theological Prize Essay in 1850, and the Sacred Prize Poem in 1860, and was selected to recite a congratulatory ode to Lord Derby in the Sheldonian Theatre, 1853. Having entered holy orders, he served a curacy in the north of Ireland, and was preferred to one or two livings in the gift of the Bishop of Derry. He was formerly Rector of Camus-juxta-Morne, co. Tyrone, and Chaplain to the Marquis of Abercorn, Lord-Lieutenant of Ireland. In 1864 he was nominated to the Deanery of Emly, and in 1867 was an unsuccessful candidate for the chair of poetry at Oxford. He was appointed to the Bishopric of Derry and Raphoe, rendered vacant by the death of Dr. Higgin, July 12, 1867, being consecrated in Armagh Cathedral, Oct. 13 following. Before his elevation to the episcopal bench he was created D.D., by diploma, and subsequently D.C.L. at the Encænna, 1876, at Oxford. The Bishop has been Select Preacher before the Universities of Oxford, Cambridge, and Dublin. He is author of Commentaries on Colossians, 1st and 2nd Thessalonians, Philemon, and the three Epistles of St. John, vols. iii., iv. "Speaker's Commentaries;" of "The Witness of the Psalms, Bampton Lectures," 1876; of "The Great Question and other Sermons," 1885. In 1887 he published a volume of poems. He is also the author of a large series of single Sermons, Charges, and Reviews, Essays, and Poems, in periodicals of the day.

The Bishop has endowed his See permanently with £2000 a year and the See House, for which he has received the thanks of the Diocesan Synod of Derry and Raphoe, and a recognition from the Diocesan Council of "gratitude for his large sacrifice of income." He is married to Miss Cecil Frances Humphreys, who is herself well known as the author of "Moral Songs," "Hymns for Children," and "Poems on Old Testament Subjects."

ALEXANDRA, Princess of Wales. See WALES, PRINCESS OF.

ALFONZO XIII., KING OF SPAIN, was born (posthumously) May 17, 1886; his mother, Maria Christina, being appointed Queen Regent.

ALFORD, The Right Rev. Charles Richard, D.D., formerly Bishop of Victoria, Hong Kong, was born in 1816 at West Quantoxhead, Somersetshire, of which parish his father was rector. From St. Paul's School he was sent to Trinity College, Cambridge, with a Camden Exhibition (B.A., 1839; M.A., 1842; D.D., 1867). After taking orders he became incumbent of St. Matthew's, Rugby, in 1841; incumbent of Christ Church, Doncaster, in 1846; Principal of the Metropolitan Training Institution at Highbury, in 1854; and incumbent of Holy Trinity, Islington, in 1865, where he had a high reputation as an Evangelical preacher. He was consecrated Bishop of Victoria, Hong Kong, Feb. 2, 1867, in place of Dr. George Smith, who had resigned that See in the previous year. He himself resigned the See of Victoria in 1872. He was vicar of Christ Church, Cloughton, near Birkenhead, from June, 1874, till Sept., 1877, when he accepted the incumbency of the new district of St. Mary, Sevenoaks, Kent. He was appointed Commissary of the diocese of Huron, Canada, in 1880. Dr. Alford is the author of "First Principles of the Oracles of God;" a "Charge" on China and Japan; and various sermons and pamphlets.

ALGER, William Rounseville, was born at Freetown, Massachusetts, Dec. 28, 1822. He graduated at the Cambridge Divinity School, 1847, and became pastor of a Unitarian Church at Roxbury, near Boston. In 1855 he succeeded Theodore Parker as minister of the Society of "Liberal Christians" in Boston; and in 1874 became minister of the Unitarian Church of the Messiah in New York, where he remained until 1879. He then preached for a year at Denver, and after

a few weeks' stay in Chicago went to Portland, Maine, but returned to Boston in 1882. He has published "A Symbolic History of the Cross of Christ," 1851; "The Poetry of the Orient," 1856 (new edition, 1883); "A Critical History of the Doctrine of a Future Life," 1861; "The Genius of Solitude," 1866; "Friendships of Women," 1867; "Prayers Offered in the Massachusetts House of Representatives," 1868; "Life of Edwin Forrest," 1877; and "The School of Life," 1881.

ALİ PACHA, a Turkish diplomatist, commenced his political career by being one of the referendaries of the Imperial Divan. In 1858, when Fuad Pacha went to Paris as Plenipotentiary representing the Porte at the Conference which had assembled to draw up the conventions respecting the United Principalities, he attached Ali Bey to his mission, and the latter rendered himself conspicuous by his general intelligence and aptitude for diplomacy. In 1861 he was appointed First Secretary to the Ottoman Embassy in Paris, and when in 1862 he went on leave of absence to Constantinople, the Government entrusted him with the delicate mission of Commissioner to Servia after the bombardment of Belgrade. Owing to his address and tact he succeeded in settling nearly all the difficulties. Whilst performing these functions, he was in 1865 placed in charge of the political direction of the province of Bosnia. In 1868 he was appointed member of the Council of State, and afterwards undertook several other missions. In 1869 he was nominated to the post of Under-Secretary of State at the Ministry of Public Works. He remained in that office until 1870, when he was made governor of Erzeroum, and afterwards of Trebizond, on which occasion he was raised to the dignity of Pacha. In 1872 he became Prefect of Constantinople, where he introduced several reforms, and in Sept., 1873, he was sent as ambassador from the Ottoman Porte to the French Republic. He was recalled in Jan., 1876, and appointed Governor-General of the Herzegovina. A few days before his deposition by the Sottas (May 30, 1876), the late Sultan Abdul-Aziz appointed Ali Pacha Governor-General of Scutari, in Northern Albania.

ALISON, General Sir Archibald, Bart., K.C.B., son of Sir Archibald Alison, the first baronet, author of "The History of Europe," was born at Edinburgh, Jan. 21, 1826, and received his education in the Universities of Glasgow

and Edinburgh. Entering the military service of his country in 1846, he became a captain in the 72nd Highlanders in 1853; brevet-major in 1856; lieutenant-colonel in 1858; and colonel in 1867. In the latter year he succeeded to the baronetcy on the death of his father. He served in the Crimea at the siege and fall of Sebastopol; in India, during the mutiny, as Military Secretary on the staff of the late Lord Clyde; and on the Gold Coast as Brigadier-General of the European Brigade, and second in command of the Ashantee Expedition in 1873-4. He commanded his brigade at the battle of Amoaful, the capture of Bequah, the action of Ordahsu, and the fall of Coomassie. He lost an arm at the relief of Lucknow. Sir Archibald was Assistant Adjutant-General at Aldershot from Oct., 1870, to Oct., 1874, and Deputy Adjutant-General in Ireland from Oct., 1874, to Oct., 1877, when he was promoted to the rank of major-general. Subsequently he was appointed Commandant of the Staff College in Jan., 1878, and Chief of the Intelligence Department at the War Office in May, 1878. He commanded the 1st brigade, 2nd division, in the military expedition dispatched to Egypt in 1882. A few days after the bombardment of Alexandria by Sir Beauchamp Seymour (now the Rt. Hon. Baron Alcester), a small body of British troops was landed (July 17), under the command of Sir Archibald Alison, who was, however, neither able nor authorized to strike a blow at Arabi's army. He confined his proceedings at first to securing a position covering Alexandria, and occupying the line of railway which connected Alexandria with the suburb of Ramleh. At the decisive battle of Tel-el-Kebir he led the Highland brigade which fought so gallantly on that memorable occasion; and after Arabi's surrender, a British army of occupation, consisting of 12,000 men, under the command of Sir Archibald Alison, was left in Egypt to restore order and to protect the Khedive. Sir Archibald was included in the thanks of Parliament for his energy and gallantry, and was promoted to the rank of lieutenant-general (Nov., 1882). In May, 1883, he relinquished the command of the army of occupation in Egypt, and returned home. In Aug., 1883, he was appointed to the command at Aldershot, and in Feb., 1885, he became adjutant-general. In Oct., 1885, he resumed the command at Aldershot on the return of Lord Wolseley from Egypt. He was promoted to the rank of General, Feb. 20, 1889. He published an able treatise, "On Army Organization," in 1869.

ALLBUTT, Thomas Clifford, M.A., LL.D., M.D., F.R.C.P., F.R.S., F.L.S., J.P., D.L., is the son of the Rev. Thomas Allbutt, sometime Vicar of Dewsbury in Yorkshire, and afterwards Rector of Debachum-Boulge in Suffolk. He was born at Dewsbury in 1836, and was educated by a private tutor at Ryde in the Isle of Wight, and afterwards under Archdeacon Hey at St. Peter's School, York. He went up to Caius College in 1856, took a scholarship in his first year, and subsequently three other scholarships in the college. Soon afterwards, however, he decided to enter the medical profession, and after a pass degree in Arts, went out in the Natural Science Tripos in the first class, with distinctions in chemistry and geology. On leaving Cambridge he entered at St. George's Hospital, and afterwards spent some time in the hospitals of Paris, and graduated in due course as M.A. and M.D. of Cambridge. After a brief stay in London, Dr. Allbutt removed to Leeds, where he was soon after elected physician to the Leeds Infirmary, and rapidly obtained a large consulting practice in medicine, and for the last fifteen years of his residence in Yorkshire had perhaps the largest purely consulting physician's practice ever carried on in the provinces. During the same time he contributed largely both to medical and general literature. His earliest works were concerned with the bodily temperature in health and disease, and by devising the "Short Clinical Thermometer," did much to forward clinical thermometry in hospital and general practice. His friendship with G. H. Lewes and Lockhart-Clarke engaged him in the study of the pathology of the nervous system, and in the *Pathological Transactions* and elsewhere he published researches on this subject, among which his demonstrations of the pathology of tetanus and hydrophobia are best known, the latter being the first observations of the kind. Dr. Clifford Allbutt was also an early worker in the field of medical ophthalmoscopy, and published a work on that subject in 1868, which included investigations on insanity, and the first demonstration of atrophy of the optic nerve in general paralysis. Other researches were published at various dates on diseases of the nervous system, of the stomach and kidneys, and on the nature and treatment of consumption, in which latter attention was drawn to the value of the climate of the high Alps in the cure of phthisis, then little recognized in England. In 1884 Dr. Clifford Allbutt delivered the Gulstonian Lectures at the Royal College of Physicians on Visceral

Neuroses, which were published in the same year; and in 1885, in conjunction with Mr. Teale, he published a volume on the "Treatment of Scrofulous Neck." In 1888 he delivered the Address on Medicine to the British Medical Association at Glasgow, his subject being the Classification of Disease, and received the honorary degree of LL.D. of that University. In 1889 he retired from practice, and was appointed a Commissioner in Lunacy. He was elected a Fellow of the Linnean Society, and of the Society of Antiquaries, in 1867, and a Fellow of the Royal Society in 1880. He also acted for some years as a Justice of the Peace for the West Riding of Yorkshire, and is a Deputy-Lieutenant for the West Riding and the city and county of York.

ALLEN, Charles Grant Blairfindie, B.A., best known as Grant Allen, the second son of Joseph Antisell Allen, was born at Kingston, Canada, Feb. 24, 1848, and educated at Merton College, Oxford; matriculated Oct. 19, 1867; B.A. 1871. Mr. Allen began to write early, and soon established a reputation as one of the most popular of scientific authors. He has been called "The Darwinian St. Paul;" his expositions of the Darwinian theory being particularly vivid, clear, and captivating. Besides a multitude of contributions to periodical literature, he has written the following books on more or less serious subjects:—"Physiological Aesthetics," 1877; "The Colour Sense," 1879; "The Evolutionist at Large," 1881; "Anglo-Saxon Britain," 1881; "Vignettes from Nature," 1881; "Colours of Flowers," 1882; "Colin Clout's Calendar," 1883; "Flowers and their Pedigrees," 1884; and "Charles Darwin" (in Mr. Andrew Lang's series of "English Worthies"), 1885. In 1883, Mr. Allen began to attempt fiction, his first attempt in which line was "Strange Stories." Since that date he has produced the following novels:—"Philistia," 1884; "Babylon," 1885; "For Maimie's Sake," 1886; "In All Shades," 1887; "The Devil's Die," 1888; "This Mortal Coil," 1888; "The Tents of Shem," 1889; and several others.

ALLIES, Thomas William, the son of a gentleman of Bristol, was born in 1813, and educated at Eton, where he obtained the Newcastle Scholarship. He afterwards became in succession Scholar and Fellow of Wadham College, Oxford, where he graduated B.A. in 1832, taking a first-class in classics. He became ex-

aming chaplain to Dr. Blomfield, Bishop of London, who appointed him, in 1842, to the rectory of Launton, Oxfordshire, which he resigned in 1850, on becoming a Roman Catholic. He had previously published a volume of sermons, a work, entitled, "The Church of England cleared from the charge of Schism, upon the testimonies of Councils and Fathers of the first six centuries," 1846, 2nd edit., 1848; and "Journal in France in 1845 and 1848," with "Letters from Italy in 1847—of Things and Persons concerning the Church and Education," 1849. To give the grounds of his conversion he wrote, "The See of St. Peter, the Rock of the Church, the Source of Jurisdiction and the Centre of Unity," 1850; preceded by, "The Royal Supremacy viewed in reference to the two Spiritual Powers of Order and Jurisdiction," 1850. He has since written "St. Peter, his Name and Office as set forth in Holy Scripture," 1852, 2nd edit., 1871; "The Formation of Christendom," 3 parts, 1865-75; "Dr. Pusey and the Ancient Church," 1866; "Per Crucem ad Lucem, the Result of a Life," 1879; and several other works. Mr. Allies was appointed Secretary to the Catholic Poor School Committee for Great Britain in 1853.

ALLINGHAM, Mrs. Helen, eldest child of Alexander Henry Paterson, M.D., was born near Burton-on-Trent, Sept. 26, 1848. The family removed to Altrincham, Cheshire, and after Dr. Paterson's death, to Birmingham. At the beginning of 1867, Miss Paterson came to reside in London under the care of her aunt, Miss Laura Herford, who was an artist, and who, about five years previous, had practically opened the schools of the Royal Academy to women. Miss Paterson herself entered the Royal Academy schools in April, 1867. She afterwards drew on wood for several illustrated periodicals, and eventually became one of the regular staff of the *Graphic*. She also furnished illustrations to novels running in the *Cornhill Magazine*—"Far from the Madding Crowd," and "Miss Angel." In the intervals of drawing on wood she produced several water-colour drawings. "May," "Dangerous Ground," &c., were exhibited at the Dudley Gallery; "The Milkmaid" and "Wait for Me," at the Royal Academy, 1874. "Young Customers," 1875, attracted much attention; as did also "Old Men's Gardens, Chelsea Hospital," at the Old Water-colour Exhibition, 1877. In 1875 she was elected an Associate of the Royal Society of Painters in Water-Colour, and in 1890 to the honour of full membership. Mrs. Alling-

ham has also exhibited "The Harvest Moon," "The Clothes-Line," "The Convalescent," "The Lady of the Manor," "The Children's Tea," "The Well," "Lessons," and many scenes of English rural life. Among her later works are several portraits of Thomas Carlyle. Special exhibitions of Mrs. Allingham's drawings were held in 1886, 1887, and 1889, at the rooms of the Fine Art Society, and had great success. Miss Paterson was married, Aug. 22, 1874, to the late Mr. William Allingham, the poet.

ALLMAN, Professor George James, M.D., LL.D., F.R.C.S.I., F.R.S., F.R.S.E., M.R.I.A., F.L.S., Corr. M.Z.S.L., Hon. F.R.M.S., member of the Royal Dublin Society, and honorary member of various British and foreign societies, was born at Cork in 1812, and educated at the Belfast Academic Institution. He graduated in Arts and Medicine in the University of Dublin in 1844; and in the same year was appointed to the Regius Professorship of Botany in that university, when he relinquished all further thought of medical practice. In 1851 he was elected a Fellow of the Royal Society, and in 1855 he resigned his professorship in the University of Dublin on his appointment to the Regius Professorship of Natural History and Regius Keeper of the Natural History Museum in the University of Edinburgh, which he held until 1870. Shortly after this the honorary degree of LL.D. was conferred on him by the University of Edinburgh. His chief scientific labours have been among the lower organisations of the animal kingdom, to the investigation of whose structure and development he has specially devoted himself. For his researches in this department of biology the Royal Society of Edinburgh awarded to him in 1872 the Brisbane Prize; in the following year a Royal Medal was awarded to him by the Royal Society of London; and in 1878 he received the Cunningham Gold Medal from the Royal Irish Academy. He was one of the Commissioners appointed by Government in 1876 to inquire into the state of the Queen's Colleges in Ireland. Soon after his election to the Edinburgh chair he was nominated one of the Commissioners of Scottish Fisheries, an honorary post which he continued to hold until the abolition of the Board in 1881. On the resignation of Mr. Bentham, he was elected to the presidency of the Linnean Society, a post which he held until 1883, when he resigned it in favour of Sir J. Lubbock. In 1879 he was President of the British Association for the Advancement of Science. On the com-

pletion of the exploring voyage of the "Challenger," the large collection of Hydroids made during that great expedition was assigned to him for determination and description—a service which he had already performed for the Hydroids collected during the exploration of the Gulf Stream under the direction of the United States Government. He has served on the council of the Royal Society of London and on those of the Royal Society of Edinburgh and of the Royal Irish Academy, and has filled the post of Examiner in Natural History for the Queen's University in Ireland, for the University of London, for Her Majesty's Army, Navy and Indian Medical Services, and for the Civil Service of India. Results of his original investigations are contained in memoirs published in the Philosophical Transactions, the Transactions of the Royal Society of Edinburgh, the Transactions of the Royal Irish Academy, and the Transactions of the Linnean and Zoological Societies of London; as well as in Reports presented to the British Association for the Advancement of Science, to the Mus. Comp. Zool. Harvard University, and to the Commission of the "Challenger" Exploration; and in communications to the *Annals of Natural History*, the *Quarterly Journal of Microscopic Science*, and other scientific journals. His more elaborate works are "A Monograph of the Freshwater Polyzoa," fol. 1856, and "A Monograph of the Gymnoblatic Hydroids," fol. 1871-72, both published by the Ray Society, and largely illustrated with coloured plates. Dr. Allman is a member of the Athenæum Club. He married Hannah Louisa, third daughter of Samuel Shaen, Esq., of Crix, J.P. and D.L. for the county of Essex.

ALLMAN, Professor George Johnston, LL.D., D.Sc., F.R.S., younger son of William Allman, M.D., Professor of Botany in the University of Dublin (1809—1844), born in Dublin Sept. 28, 1824, was educated at Trinity College, Dublin, where he graduated B.A. in 1844, and LL.D. in 1853. In the same year he was appointed Professor of Mathematics in Queen's College, Galway, and still occupies that post; he was also appointed Bursar of the Queen's College in 1864, member of the Senate of the Queen's University in Ireland in 1877, and in 1880 he was nominated by the Crown one of the first Senators of the Royal University of Ireland. In 1863 he was elected by the Corporate Body of the Queen's College, Galway, a member of the College Council and has been re-elected on each

expiration of his term of office since that date; and in 1888 he was sent by it as Delegate to the University of Bologna on the occasion of the celebration of the Octocentenary of that University. He is LL.D. *ad eundem* of the Queen's University (1863), D.Sc. *honoris causâ* (1882), and F.R.S. (1884). In 1853, Dr. Allman communicated to the Royal Irish Academy "An Account of the late Professor MacCullagh's Lectures on the Attraction of Ellipsoïds," which he compiled from his notes of the lectures (Transactions of the Royal Irish Academy, vol. xxii). He has since published "Some Properties of the Paraboloids" (*Quarterly Journal of Mathematics*, 1874), and "Greek Geometry from Thales to Euclid" (*Hermathena*, vol. iii., No. V., 1877; vol. iv., No. VII., 1881; vol. v., No. X., 1884, No. XI., 1885; vol. vi., No. XII., 1886, No. XIII., 1887), and has collected these articles, made some additions, and published them in 1889 in a volume with the same title. He has also contributed "Ptolemy" (Claudius Ptolemaeus) and some other articles to the last edition of the "Encyclopædia Britannica."

ALLON, The Rev. Henry, D.D., Congregational minister, was born on the 13th of Oct. 1818, at Welton, near Hull, Yorkshire, and educated for the ministry at Cheshunt College, Hertfordshire. In Jan., 1844, he was appointed minister of Union Chapel, Islington, officiating at first as co-pastor with the Rev. Thomas Lewis, on whose death, in 1852, he became sole pastor. He was Chairman of the Congregational Union in 1861-5. Although for the space of forty-six years he has been actively engaged in the pastoral and public duties of his ministry, he has found time to contribute largely to periodical literature, including the *Contemporary* and other *Reviews*, *Cassell's Biblical Educator*, &c. He also contributed an essay on Worship to "Ecclesia," a volume of Essays edited by Dr. Reynolds. He wrote a "Memoir of the Rev. J. Sherman," which was originally published in 1863, and has passed through three editions; also a critical biography of the Rev. Dr. Binney, prefixed to a posthumous volume of his sermons, which Dr. Allon edited. In 1876 he published a volume of sermons, entitled "The Vision of God," which has gone through three editions. He has done much to promote church music in the Nonconformist churches, and compiled the "Congregational Psalmist," which is very extensively used. For twenty-two years he was editor of the *British Quarterly Review*. In 1871 he received the honorary

degree of D.D. from Yale College, New Haven, Connecticut; and in 1885 the same degree was conferred by the University of St. Andrew's. A new church, or "Congregational Cathedral," erected for him in Compton Terrace, Islington, the total cost of which was nearly £50,000, was opened Dec., 1877. In 1881, the Jubilee year of the Congregational Union, he was for the second time elected chairman.

ALMA-TADEMA, Lawrence, R.A., a distinguished painter, was born at Dronryp, in the Netherlands, Jan. 8, 1836. He was intended for one of the learned professions, and in training for it the works of the ancient classical writers of course engrossed much of his attention. In 1852 he went to Antwerp, and entered the Academy there as a student. Afterwards he placed himself with the late Baron Henry Leys, whom he assisted in painting several of the large pictures with which the Baron's name is associated. Subsequently he came to London, where he has resided for many years. He obtained a gold medal at Paris in 1864; a second-class medal at the International Exhibition at Paris in 1867; a gold medal at Berlin in 1872, and the grand medal in 1874. Mr. Alma-Tadema became a member of the Academy of Fine Arts at Amsterdam in 1862; Knight of the Order of Leopold (Belgium) in 1866; Knight of the Dutch Lion in 1868; Knight First Class of the Order of St. Michael of Bavaria in 1869; member of the Royal Academy of Munich in 1871; Knight of the Legion of Honour (France) in 1873; member of the Society of Painters in Water Colours in 1873; and member of the Royal Academy of Berlin in 1874. In Jan., 1873, he received letters of denization from the Queen of England, having resolved to reside permanently in this country. He was nominated a Chevalier of the Legion of Honour in 1873, and elected an Associate of the Royal Academy of London, Jan. 26, 1876. In the latter year, he was also elected a Knight of the Third Class of the Golden Lion of Nassau; in 1877, a Knight of the Third Class of the Crown of Prussia, and an honorary member of the Royal Scottish Academy; in 1878 he obtained a first-class medal at the Paris International Exhibition, and he was nominated an Officer of the Legion of Honour in the same year. Mr. Alma-Tadema was elected a Royal Academician June 19, 1879. He is an honorary member of the Royal Academies of Madrid, Vienna, Stockholm, and Naples. The Emperor of Germany, in Jan., 1881, appointed him a

foreign Knight of the Order *Pour le Mérite* (Art and Sciences Division); and in the following month the French Academy of Fine Arts elected him its London correspondent in the section of Painting. His principal paintings are:—"Entrance to a Roman Theatre," 1866; "Agrippina Visiting the Ashes of Germanicus," 1866; "A Roman Dance," 1866; "The Mummy," 1867; "Tarquinus Superbus," 1867; "The Siesta," 1868; "Phidias and the Elgin Marbles," 1868; "Flowers," 1868; "Flower Market," 1868; "A Roman Amateur," 1868; "Pyrrhic Dance," 1869; "A Negro," 1869; "The Convalescent," 1869; "A Wine Shop," 1869; "A Juggler," 1870; "A Roman Amateur," 1870; "The Vintage," 1870; "A Roman Emperor," 1871; "Une Fête intime," 1871; "The Greek Pottery," 1871; "Reproaches," 1872; "The Mummy" (Roman period), 1872; "The Improvisatore," 1872; "A Halt," 1872; "Death of the Firstborn," 1872; "Greek Wine," 1872; "The Dinner," 1873; "The Siesta," 1873; "The Cherries," 1873; "Fishing," 1873; "Joseph Overseer of Pharaoh's Granaries," 1874; "A Sculpture Gallery," 1874; "A Picture Gallery," 1874; "Autumn," 1874; "Good Friends," 1874; "On the Steps of the Capitol," 1874; "Water Pets," 1875; "The Sculpture Gallery," 1875; "An Audience at Agrippa's," 1876; "After the Dance," 1876; "Cleopatra," 1876; "The Seasons" (4 pictures), 1877; "Between Hope and Fear," 1877; "A Sculpture's Model" (Venus Esquilina), "A Love Missile," 1878; "A Hearty Welcome," "Down to the River," "Pomona Festival," "In the Time of Constantine," 1879; "Spring Festival," "Not at Home," "Fredegonda," 1880; "Sappho," 1881; "An Orleander," and "The Way to the Temple" (his diploma work), 1883; "The Emperor Hadrian visiting a British Pottery," 1884; "A Reading from Homer," 1885; "An Apodyterium," 1886; "At the Shrine of Venus," and "A Dedication to Bacchus," 1889. At the Grosvenor Gallery in 1876 he exhibited a series of three pictures—"Architecture," "Sculpture," and "Painting," also "Cherries." A special exhibition of his pictures was held at the Grosvenor Gallery in 1883. He received the Fine Art Medal of Honour at the Paris Exhibition, 1889. By his first wife he had two daughters, one of whom is the author of "Love's Martyr" and the other has lately made a brilliant *début* as a water-colour painter. His second wife, whom he married in 1871, is Laura, youngest daughter of Dr. George Epps. This lady is an accomplished artist and

has exhibited several pictures at the Royal Academy, at the Society of French Artists and at the Grosvenor Gallery.

ALMAVIVA. See SCOTT, CLEMENT.

ANDERSON, Mrs. Elizabeth Garrett, M.D., eldest daughter of Newson Garrett, Esq., of Aldeburgh, Suffolk, was born in London in 1836, and educated at home, and at a private school. Miss Elizabeth Garrett began to study medicine at Middlesex Hospital in 1860; completed the medical curriculum at St. Andrew's, Edinburgh, and the London Hospital; and passed the examination at Apothecaries' Hall, receiving the diploma of L.S.A. in Oct., 1865. She was appointed General Medical Attendant to St. Mary's Dispensary in June, 1866; obtained the degree of M.D. from the University of Paris in 1870, and in the same year was appointed one of the visiting physicians to the East London Hospital for Children and Dispensary for Women. On Nov. 29, 1870, Miss Garrett was elected a member of the London School Board, being returned by a large majority at the head of the poll for Marylebone. She was married Feb. 9, 1871, to Mr. J. G. S. Anderson, of the Orient line of steamships to Australia. In 1872, Mrs. Anderson aided in the establishment and organisation of the New Hospital for Women, then at 222, Marylebone Road, and now at 144, Euston Road, of which the acting medical staff is composed entirely of women. Mrs. Anderson has been for some years its Senior Visiting Physician. She is also Dean and Lecturer on Medicine at the London School of Medicine for Women, Brunswick Square. She is on the Councils of Bedford College, and of the North London Collegiate School for Girls. In 1885 she visited Australia and spent several months in New South Wales. Mrs. Garrett-Anderson continues to practise in London as a physician for women and children. She has written various papers on medical and social questions, and is a member of the British Medical Association.

ANDERSON, Dr. John, LL.D., F.R.S., F.R.S.E., F.R.G.S., &c., son of the late Mr. Thomas Anderson, Secretary to the National Bank of Scotland, Edinburgh, was born in that city on Oct. 4, 1833; educated at the George Square Academy and the Hill Street Institution, and finally at the Edinburgh University. He took the degree of M.D. in 1862, and received a gold medal for his thesis

entitled "Observations in Zoology." Immediately after his graduation he was appointed Professor of Natural Science in the Free Church College, Edinburgh; but he resigned the office in 1864, having been offered the Curatorship of a Museum which the Government of India intended to found in Calcutta, and of which the Collections of the Asiatic Society of Bengal were to form the nucleus. He arrived in India in July, 1864, and in the following year was appointed Superintendent of the Indian Museum, and two or three years afterwards he was also given the Chair of Comparative Anatomy in the Medical College, Calcutta. In 1868 he was selected by the Government of India to accompany an expedition to Western China *via* British and Independent Burmah, in the capacity of Scientific Officer. Again, in 1874, he was chosen by the Government of India to proceed once more to Western China in the same capacity as on the former expedition and with instructions to advance from Bhamô to Shanghai. This expedition, was attacked by the Chinese and was obliged to retreat to Burmah; Augustus Raymond Margary having been treacherously murdered at Mawwyne. In 1881, Dr. Anderson was sent by the Trustees of the Indian Museum, Calcutta, to investigate the Marine Zoology of the Mergui Archipelago, off the coast of Tenasserim. In 1887 he retired from the service of the Government of India. Besides numerous papers on Zoology, a list of which is to be found in the Royal Society's Catalogue of scientific papers, Dr. Anderson is the author of the following independent works:—"A Report on the Expedition to Western China *via* Bhamô," published by the Government of India, 1871; "Maidalay to Moumien," an account of the two expeditions to Western China, the first under Major (afterwards Colonel Sir Edward) Sladen, and the second under the command of Colonel Horace Browne, 1875; "Anatomical and Zoological Researches," including an account of the Zoological Results of the two expeditions to Western China, 1868-9 and 1875; 4to with 1 vol. plates, 1878. "Catalogue of the Mammalia in the Indian Museum," Part I. published by the Trustees of the Indian Museum, 8vo, 1879. "Handbook to the Archæological Collections of the Indian Museum, Calcutta," 2 Vols., 8vo, published by the Trustees, 1881 and 1882. The scientific results of his researches in the Mergui Archipelago were published by the Linnean Society of London in Vols. 21 and 22 of their Journal, which were devoted exclusively to the subject; the various animal groups having been

worked out by specialists. Dr. Anderson described the Mammals, Birds, Reptiles and Batrachia, and gave an exhaustive account of the Selungs, the human inhabitants of the islands, adding a vocabulary of their language. And in connection with the same Expedition to Mergui, a town which was once in Siamese Territory, he published, in 1890, in Trübner's Oriental Series, a full account of "English Interchange with Siam in the Seventeenth Century." Dr. Anderson is a Fellow of the Royal Societies of London and Edinburgh, of the Linnean Society, and the Zoological Society of London, of the Royal Geographical Society of London, of the Society of Antiquaries of London and of Edinburgh, of the Royal Physical and Botanical Societies of Edinburgh, and of the Asiatic Society of Bengal. He is also a Fellow of the Calcutta University, and is a Corresponding Fellow of the Ethnological Society of Italy. In 1885 the University of Edinburgh conferred on him the honorary degree of LL.D.

ANDERSON, Mary. See NAVARRO, MADAME ANTONIO.

ANDERSON, General William Warden, second son of the late Sir George Anderson, K.C.B., Governor of the Mauritius and of Ceylon, was born at Surat, in India, 1824, and appointed cornet in the 2nd Bombay Lancers in 1840. He served through the Punjaub campaign of 1848; and was present at the siege and capture of Mooltan, as well as the siege of Awah and of Kotah, 1857. He served throughout the Indian Mutiny, 1857, and was severely wounded in the engagement with the rebels at Gwalior. From 1858 to 1867, he acted as Assistant-Political Resident, and Superintendent of the Guicowar's contingent of horse, in Katywar. From 1867 to 1874 he was Political Agent in that province. He was promoted to brevet-major for services at Gwalior, against the rebels, 1857 (Medal with Clasps), Major-General, 1878; Lieut.-General, 1882; General, 1888. He more than once received the thanks of the Governor-General of India for the efficient manner in which he had discharged the duties of Political Agent in Katywar.

ANDERSON, William, D.C.L., Director-General of Ordnance Factories, was born at St. Petersburg on Jan. 5, 1835. He obtained his early education at the High Commercial School in his native city, and when he left in 1849 he was head of the school, silver medallist, and, although

a British subject, he had conferred upon him the freedom of the city of St. Petersburg. In 1849 Mr. Anderson became a matriculated student in the Applied Sciences Department of King's College, London, and went through the complete three years' course, taking many prizes, and leaving in 1851 with the degree of Associate, to become a pupil of the late Sir William Fairbairn at Manchester. He remained with Messrs. William Fairbairn & Sons for three years, and during that time was much employed in looking after important outwork. In 1855 Mr. Anderson entered into partnership with Messrs. Courtney & Stephens, of Dublin, and remained with them till 1864, being engaged chiefly in the construction of bridges, cranes, signals, and other fittings for railways. He devoted much attention to the theory of diagonally braced girders then but little understood, and contributed several papers to the Institution of Civil Engineers of Ireland, of which body he became president in 1863. In the autumn of 1864 Mr. Anderson removed to London, joining the old-established firm of Easton & Amos, with the object of building new works on the Thames at Erith, the old premises in Southwark Street having been found inconvenient for large and heavy work. Mr. Anderson, under whose direct management the Erith works have been since their erection, became eventually the head of the firm of Easton & Anderson. He is a member of Council of the Institute of Civil Engineers, a vice-president of the Institute of Mechanical Engineers, a visitor of the Royal Institution, a vice-president of the Society of Arts, and has contributed numerous papers on a variety of subjects to these bodies. His knowledge of the Russian language has enabled him to abstract many interesting papers for the "Foreign Abstracts" published by the Institution of Civil Engineers. He has also translated the remarkable works of Chernoff on steel, and the researches of the late General Kalakontsky, on the internal stresses in cast-iron and steel. He was selected by the Institute of Civil Engineers to deliver one of the heat series of lectures, namely, that on the "Generation of Steam;" by the School of Military Engineering at Chatham, to lecture on "Hydraulic Machinery and on Hydro-pneumatic Monocrief Gun-carriage;" and delivered for the Society of Arts, under the Howard Trust, a course of lectures on the "Conversion of Heat into Work." In August, 1889, he was appointed by Mr. Stanhope (Secretary of State for War) Director-General

of the Royal Ordnance Factories, which comprise the laboratory, the carriage departments, and the gun factory at the Royal Arsenal, Woolwich, the Royal Gunpowder Factory at Waltham Abbey, and the small-arms factories at Enfield and Birmingham. The University of Durham has conferred on him the honorary degree of D.C.L., and he was in 1889 elected president of section G of the British Association.

ANDREWS, St., Bishop of. *See* WORDSWORTH, THE RT. REV. CHARLES.

ANDREWS, Thomas, F.R.S., F.R.S.E., M.I.C.E., F.C.S., &c., was born in 1847 in Sheffield, and is the only son of the late Mr. Thos. Andrews of the same town. He was educated at Broomhank School by the late Rev. Thos. Howarth, M.A., and subsequently by private tuition, and was carefully trained in metallurgy, mining, and engineering by his father. On the death of his father, in 1871, he succeeded him as proprietor of the Wortley Iron Works (one of the oldest-established iron works in England), and the Wortley Silkstone Colliery. In addition to conducting and managing the iron-works, Mr. Andrews has rendered excellent service to metallurgical, physical, and engineering science, by a series of original researches, extending over many years, and connected with various branches of the above sciences. He has determined the relative corrosibility of wrought-iron and modern steels in sea water and in tidal streams, and shown that iron corrodes much less than steels. He has made elaborate researches, published by the Institute of Civil Engineers, on the "Effects of Temperature on the Strength of Railway Axles, in an Investigation extending over Seven Years," and has therein determined, on a large experimental scale, the resistance of metals to sudden concussion at varying temperatures down to zero Fahrenheit; and indicated the influence of climatic temperature changes on the strength of railway material, and at the same time has ascertained some of the causes leading to accidental fractures on railways. He has also studied the influence of sudden chilling on the physical properties of metals. He has conducted numerous other original investigations on the electro-motive force between metals at high temperatures, &c., and also an intricate research on "Electro-chemical Effects on Magnetising Iron," Parts I., II., III.; the results of the latter research have shown that magnetised

iron or steel is electro-positive to unmagnetised in certain chemical solutions. In another part of this research Mr. Andrews observed that a current was produced when the opposite poles of two electrically connected magnets of approximately equal strength were immersed in solutions of various chemical substances, the north pole being generally positive to the south pole. Mr. Andrews has written papers on the "Passive State of Iron and Steel," discovering in these researches that the passive state of iron was influenced by magnetism; and he also determined the relative passivity of the various modern steels, and the influence of chemical composition, physical structure, &c., on the passivity of the metals. Mr. Andrews has also experimented on the "Heat Dilatation of Metals from very Low Temperatures." In the course of another research he has made determinations of the plasticity of ice, and also on the relative conductivity of ice and snow, and on the contractibility of ice at low temperatures. He has also contributed various articles to *Iron*, *The Engineer*, *Chemical News*, *Nature*, *Poggendorff's Annalen*, and other periodicals. The results of these numerous researches are embodied in about thirty-three papers, published in the "Proceedings" of the Royal Society, London; "Transactions and Proceedings" of the Royal Society, Edinburgh; "Proceedings" of the Institute of Civil Engineers; "Transactions" of the Society of Engineers; "Transactions" of the Midland Mining Institute; "British Association Reports;" "Transactions" of the Institute of Marine Engineers;" &c. For some of these papers Mr. Andrews was awarded at different times by the Institute of Civil Engineers, a Telford Medal and three Telford Premiums successively, and also a premium by the Society of Engineers. He was, in 1888, elected a Fellow of the Royal Society, London, and has also been elected Fellow of the Royal Society of Edinburgh, Member of the Institute of Civil Engineers, Fellow of the Chemical Society, &c. Numerous quotations are made from his metallurgical researches in the recent valuable standard work on the "Metallurgy of Steel," by Henry M. Howe, Boston, U.S.A. He is patentee of an invention for hydraulic machinery in connection with the manufacture of iron. Mr. Andrews had recently the honour of being requested to furnish a report to His Majesty the King of the Netherlands on matters relating to the metallurgy of iron and modern steels, receiving a gracious acknowledgment of thanks from His Majesty in connection therewith.

Mr. Andrews takes a practical interest in all Christian and educational labour, and has conducted large night-schools. For some years he served as a Guardian of the Poor for Wortley Union. He dwells among his workmen at Wortley, and some years ago built a handsome stone building, furnished with free sittings, for the benefit of the workpeople, and on Lord's Day evenings humbly endeavours to expound the Holy Scriptures; on a weekday evening he presides over a Bible class and prayer meeting held there. He is also on the committee of the Sheffield Technical School. In 1870 he married Mary Hannah, eldest daughter of the late Mr. Charles Stanley, of Rotherham.

ANGUS, Joseph, D.D., was born Jan. 16, 1816, at Bolam, Northumberland, and educated at King's College, Stepney College, and Edinburgh, where he graduated in 1836, taking the first prizes in nearly all his classes. He was appointed Secretary of the Baptist Missionary Society in 1840, and President of Stepney College in 1849, which college was removed to Regent's Park in 1857. Dr. Angus, who was for several years English Examiner to the University of London, and to the Indian Civil Service, is the author of the "Handbook of the Bible," "Handbook of the English Tongue," "English Literature," "Christ our Life," and several other works. He has also edited Butler's "Analogy and Sermons," with notes, and Dr. Wayland's "Moral Science." He was a member of the New Testament Company for the Revision of the Scriptures, and for ten years a member of the London School Board. In recent years the college at Regent's Park has made provisions for largely extending its work; and, in addition to the foundation of several scholarships, the sum of £30,000 has just been contributed to it through Dr. Angus, for increasing its efficiency. Special chairs are founded, and more than one lectureship has been established.

ANNANDALE, Professor Thomas, F.R.S.E., M.D., F.R.C.S. London and Edinburgh, and member of many Foreign Societies, was born at Newcastle-on-Tyne, Feb. 2, 1838, and educated at the Newcastle Infirmary, and the University of Edinburgh. He became private assistant to the late Professor Syme, Demonstrator of Anatomy in the University of Edinburgh, and Surgeon and Lecturer on Surgery to the Edinburgh Royal Infirmary. Dr. Annandale's high reputation as a practical and operating surgeon and teacher of surgery led to his appointment

in Oct., 1877, as Regius Professor of Clinical Surgery in the University of Edinburgh. He is Senior Surgeon to the Royal Infirmary, Consulting Surgeon to the Royal Sick Children's Hospital, and to the Royal Maternity Hospital; and is the author of "The Malformations, Diseases, and Injuries of the Fingers and Toes, and their Surgical Treatment," 1865, being the Jacksonian Prize Essay of the Royal College of Surgeons of London for 1864; "Abstracts of Surgical Principles," 1868-70, 2nd edit., 1876; "Clinical Surgical Lectures," 1874-75, reported in the *Medical Times* and *British Medical Journal*; "On the Pathology and Operative Treatment of Hip Disease," 1876; author of articles "Diseases of the Breast," "Internal derangements of the knee-joint, and their treatment by operation," "On the removal of bone to promote healing of wounds," and numerous contributions to professional periodicals.

ANNENKOW, General Michael, son of General Michael Annenkow, constructor of the Russian Central Asian railroad, was born in 1838, and educated in St. Petersburg. He received his first commission in 1863 in the mounted pioneers of the guard. He afterwards entered the Russian Staff College, and served as a staff-captain during the Polish insurrection; at the end of which he became colonel, though only twenty-eight years of age. He spent four years in Poland, in police service, and in 1870 was attached to the German armies during the campaign in France; and was afterwards given the chief direction of troops in Russia, and created the railway battalions. Not only the Samarcand line, but several other Russian strategic lines are due to him.

ANSTEY, F. See GUTHRIE, THOMAS ANSTEY.

ARABI, Ahmed, the leader of the military insurrection in Egypt, 1882, was born of a fellah family, resident in a small village in the province of Charkieh, in the eastern portion of Lower Egypt, nearly on the borders of the desert. He was enlisted in the army during the reign of Said Pacha, who initiated the system of replacing the foreign officers by native Egyptians. Arabi was one of those thus selected, and he rose rapidly in rank; but the Viceroy was capricious, and one day he had Arabi punished with some hundred blows of a stick, and relegated him to half-pay. Arabi, who had learned to read and write, and had compatriots

at Ezher, the religious university of Cairo, went thither to study science, and although he could not complete a course which requires about twenty years to accomplish, he learnt sufficient to enable him to pass for a *savant* among his colleagues in the army. Ismail Pacha restored him to the army, and from this time Arabi was regarded by his Egyptian colleagues as a pious and learned man, his conduct being, according to Mussulman morality, irreproachable. He married the daughter of the nurse of El Hami Pacha, son of Abbas Pacha, who had been brought up in the Prince's palace: this afforded him somewhat of a competence. During the Abyssinian campaign he managed to have the charge of the transport, and remained at Massama to forward the convoys. After the campaign he was employed in the transport of sugar from the Khedive's factories in Upper Egypt, and having a quarrel with the manager of the Khedive's property, he returned to Cairo, and was again replaced in the army, being at the time lieutenant-colonel. He became the intimate counsellor of Ali Bey El Roubi, who was the means of raising Arabi from his obscurity. During the years 1876-8 he organized a sort of secret society among the fellah officers, which was not noticed, in consequence of the events that were then engaging the attention of the Khedive and the State. Some weeks previous to the *coup d'état* of Ismail Pacha against the European Ministry, several officers, among whom were Arabi and El Roubi, went to Ali Pacha Moubarek, a fellah of Charkiéh, and proposed to place him at their head to overthrow the Khedive, and the European Ministry. Ali Pacha Moubarek, who was a member of the Ministry of Wilson and Blignières, related the whole to the Khedive, who had an interview with the society of El Roubi and Arabi, and with their aid made the famous revolution which brought about the fall of the European Ministry of 1879. Ismail Pacha would doubtless have suppressed the society had he remained a week or a fortnight longer in Egypt. At the accession of Tewfik, the bulk of the public were yet ignorant of the name of Arabi. In a short time afterwards the Khedive made him colonel and entrusted him with a regiment. Ali Bey El Roubi was sent to Mansourah as President of the Tribunal of First Instance; but the conspiracy could not be destroyed, especially because no one in the Government, except perhaps the Khedive himself, considered that it had any real importance. At this time began the intrigues of the ex-Khedive, of Halim Pacha, and

the Porte, and each party endeavoured to get hold of the only power that appeared to remain in Egypt, that is to say, this conspiracy of officers, which had drawn to it a large number of non-commissioned officers, and even of soldiers, by promising them an increase of pay, with better clothing and rations. The tactics of Arabi were to awaken the interest of the people in the movement which he was preparing, and to which he gave the name of "The Awakening of the National Party." In Sept., 1881, Arabi appeared at the head of a military and popular revolt, compelling the Khedive, Tewfik Pacha, to dismiss his former Ministry, and to convene a sort of Parliament called the Assembly of Notables, which met about the beginning of 1882. The affair of Sept. 8 resulted in the overthrow of Riaz Pacha's Administration, which was unpopular because it was supposed to be too deferential to certain foreign interests. Sheriff Pacha, who was thereupon appointed Prime Minister, pledged the Khedive to establish a Parliamentary Government. A manifesto was issued by the "National Party" on Dec. 18, 1881, containing an exposition of their views and purposes. They professed loyalty to the Sultan both as Imperial Suzerain and as Caliph of the Mussulman community, but would never suffer Egypt to be reduced to a Turkish Pachalic, and they claimed the guarantee of England and of Europe for the administrative independence of Egypt. They also professed loyalty to the Khedive, but would not acquiesce in a despotic rule, and they insisted upon his promise to govern by the advice of a representative assembly. At the beginning of 1882 the Khedive and Sheriff Pacha called together the Assembly of Notables. Arabi was then appointed Under-Secretary for the War Department, and was raised to the rank of Pacha. The Assembly of Notables wanted to vote the budget. This claim was refused by the Khedive's Government on account of the financial Controllers, and hence arose the Egyptian crisis. Arabi and the army had, however, a monopoly of power. The Khedive was forced to accept a National Ministry, and the Organic Law, adopted in defiance of the protests of the Controllers, placed the budgets in the hands of the Notables, thus subverting the authority of England and France embodied in the Control. Arabi, now substantially Dictator, and supported almost undisguisedly by the Sultan, proceeded to more daring measures. Eventually the English Government felt obliged to intervene by armed force. Then followed the bombardment of Alexandria by the

fleet under the command of Sir Beauchamp Seymour (July 11, 1882), and subsequently (Sept. 13), the decisive defeat of Arabi and his army at Tel-el-Kebir by the British troops under Sir Garnet Wolseley. Arabi and his lieutenant, Toulba Pacha, fled to Cairo, where they surrendered to General Drury Lowe. It was intended at first to charge Arabi with murder and incendiarism, but he was actually brought to trial on the simple charge of rebellion (Dec. 3). He pleaded guilty, and was condemned to death, but immediately afterwards the sentence was commuted by the Khedive to perpetual exile from Egypt and its dependencies. Ceylon having been chosen as the place of banishment, Arabi, with other leaders in the rebellion, were landed at Colombo, Jan. 16, 1883.

ARCH, Joseph, leader of the agricultural labourers' movement, was born at Barford, Warwickshire, on Nov. 10, 1826. His father was a labourer, and he himself had, from an early age, to work in the fields for his living. He married the daughter of a mechanic, and at her suggestion he added to his slender stock of book learning. He used often to sit up late at night reading books, whilst smoking his pipe by the kitchen fire. In this way he contrived to acquire some knowledge of logic, mensuration, and surveying. He likewise perused a large number of religious works, and for some years he occupied a good deal of his spare time in preaching among the Primitive Methodists. When the movement arose among the agricultural labourers, he became its recognised leader. In 1872 he founded the National Agricultural Labourers' Union, of which he became president. He went through the principal agricultural districts of England, addressing crowded meetings of the labouring classes, and afterwards he visited Canada to inquire into the questions of labour and emigration. Having once or twice offered himself unsuccessfully as a candidate for a seat in Parliament, Mr. Arch was elected in 1885 Liberal member for North-west Norfolk, but after the dissolution of 1886, he was defeated by his former Conservative opponent, Lord Henry Bentinck.

ARCHER, James, R.S.A., was born in Edinburgh, June 10, 1824, and educated at the High School in that city. He received his art education in the school founded by the Honourable Board of Trustees for Manufactures in Scotland, and was appointed an Associate of the Royal Scottish Academy in 1850, and a

full Academician in 1858. Mr. Archer, who left Scotland for London in 1862, first exhibited in the Royal Academy a cartoon of a design of the Last Supper, followed by an oil picture of the same the year after. He made a series of pictures from the "Morte d'Arthur," of which one was exhibited in the Royal Academy—"The Mystic Sword Excalibur." He painted a series of pictures of children in costume, exhibited in the Royal Academy, of which "Maggie, you're Cheating" is the chief. He became a portrait painter in 1871, exhibiting a portrait of Col. Sykes, M.P., from which time he painted many portraits, one of the principal being that of Professor Blackie. Since that he has painted four large subject pictures, the first "The Worship of Dionysius," "*Dieu le veut*, Peter the Hermit preaching the first Crusade," "In the Second Century. You! a Christian?" and the fourth, "St. Agnes, a Christian Martyr." In 1884 he went for a few months to the United States, where he painted James G. Blaine, who that year was the defeated candidate for the Presidency; among others Andrew Carnegie, the well-known Pittsburg Millionaire. In 1886 he went to India, where he remained for three years, spending the winters always in Calcutta. There he painted several of the Native Rajahs, chiefly members of the well-known family of Ragore, one branch of which is an adherent to the reformed religious movement of the Brahmo Somaj. In Simla he painted Lady Dufferin in her silver-wedding dress, as well as her son, then Lord Clandeboye: there he also painted a posthumous portrait of Sir Charles Macgregor, and designed his commemorative medal. He returned to London in 1889.

ARCHIBALD, The Hon. Sir Adams George, D.C.L., K.C.M.G., Q.C., P.C., a Canadian statesman, was born at Truro, N.S., May 18, 1814. He was educated at Pictou Academy, and called to the Bar in 1839. He became Solicitor-General in the government of Nova Scotia in 1856, and Attorney-General four years later. He was a delegate to England in 1857 on the subject of the Mines and Minerals of Nova Scotia, and also to ascertain the views of the British Government on the question of the Union of the North American Provinces, and took an active part in the subsequent conferences on that subject in Canada, being present in London with the delegation which in 1866 arranged the terms of Confederation. He was made a member of the Canadian Privy Council in 1867, and the same year served as Secretary of State

for the Provinces. From May, 1870, until Dec., 1872, he was Lieut.-Governor of Manitoba and the North-west Territories, and upon resigning that position was appointed Judge in Equity in his native province. Upon the death of the Hon. Joseph Howe, he was appointed his successor in the Lieut.-Governorship of Nova Scotia, and was created a Companion of the Order of St. Michael and St. George. His second term as Lieut.-Governor expired in 1883. In 1884 he received the degree of D.C.L. from King's College, Windsor, and in 1885 was made K.C.M.G. In the latter year he became a Governor of Dalhousie University, and was chosen Chairman of the Board of Governors. Since 1886 he has been President of the Nova Scotia Historical Society, and since 1888 a member of the House of Commons of the Dominion.

ARDITI, Luigi, a musical composer, born July 22, 1822, at Crescentino, Piedmont, was educated as a violinist at the Conservatoire at Milan. After filling the post of musical conductor in various places in Italy and America, where he remained ten years, he came to London in 1857, and was appointed musical director at Her Majesty's Theatre. Since that time he has conducted Italian opera and other music at other great theatres and concert-rooms up to the present day. Whilst in Constantinople he received from the Sultan the Order of the Medjidieh in acknowledgment of his talent as a composer. In addition to numerous songs composed by Signor Arditi, may be mentioned the opera "*La Spia*," written in New York in 1856; "*Il Bacio*," written in London; and various pieces for the violin.

ARGYLL (Duke of), His Grace George Douglas Campbell, K.G., K.T., P.C., only surviving son of the seventh duke, was born at Ardincaple Castle, Dumbartonshire, in 1823, and, before he had succeeded his father, in April, 1847, had become known as an author, politician, and public speaker. As Marquis of Lorne he took an active part in the controversy in the Presbyterian Church of Scotland relating to patronage, and was looked upon by Dr. Chalmers as an important and valuable adherent. As early as 1842 he published a pamphlet which exhibited considerable literary ability, under the title of "*A Letter to the Peers from a Peer's Son*." His brochure, "*On the Duty and Necessity of Immediate Legislative Interposition in behalf of the Church of Scotland, as determined by Considerations of Constitutional Law*," was an historical

view of that Church, particularly in reference to its constitutional power in ecclesiastical matters. In the course of the same year he published "*A Letter to the Rev. Thomas Chalmers, D.D., on the Present Position of Church Affairs in Scotland, and the Causes which have led to it*." In this pamphlet he vindicated the right of the Church to legislate for itself; but condemned the Free Church movement then in agitation among certain members of the General Assembly; maintaining the position taken up in his "*Letter to the Peers*," and expressing his dissent from the extreme view embodied in the statement of Dr. Chalmers, that "*lay patronage and the integrity of the spiritual independence of the Church has been proved to be, like oil and water, immiscible*." In 1848 the Duke published an essay, critical and historical, on the ecclesiastical history of Scotland since the Reformation, entitled "*Presbytery Examined*." It was a careful expansion of his earlier writings, and was favourably received. His Grace was a frequent speaker in the House of Peers on such subjects as Jewish Emancipation, the Scottish Marriage Bill, the Corrupt Practices at Elections Bill, the Sugar Duties, Foreign Affairs, the Ecclesiastical Titles Bill, the Scottish Law of Entail, and the Repeal of the Paper Duties. During the administration of Lord John Russell he gave the government a general support, at the same time identifying his political views with those of the Liberal Conservatives. His Grace actively interested himself in all questions affecting Scottish interests brought before the Legislature, especially in the affairs of the Church of Scotland. In 1851 he was elected Chancellor of the University of St. Andrews. In 1852 he accepted office in the Cabinet of the Earl of Aberdeen, as Lord Privy Seal. On the breaking-up of that ministry, in February, 1855, in consequence of the secession of Lord John Russell, and the appointment of Mr. Roebuck's Committee of Inquiry into the state of the British Army before Sebastopol, his Grace retained the same office under the Premiership of Lord Palmerston. In the latter part of 1855 he resigned the Privy Seal, and became Postmaster-General. In Lord Palmerston's Cabinet of 1859 the Duke resumed the office of Lord Privy Seal, which he exchanged for that of Postmaster-General on Lord Elgin being sent, in 1860, on his second special mission to China. He was re-appointed Lord Privy Seal in 1860, was elected Rector of the University of Glasgow in Nov., 1854; presided over the twenty-fifth annual meeting of the British Association for the

Advancement of Science, held at Glasgow, in Sept. 1855; and was elected President of the Royal Society of Edinburgh in 1861. On the formation of Mr. Gladstone's Cabinet, in Dec. 1868, he was appointed Secretary of State for India, and he held that position till the downfall of the Liberal Government in Feb. 1874. In the ensuing session he warmly supported the measure introduced and carried by the Conservative Government for the transfer of the patronage in the Church of Scotland from individuals to congregations. He was appointed Lord Privy Seal for the third time in May, 1880, on Mr. Gladstone returning to power. That post he held till April, 1881, when he resigned it, in consequence of a difference with his colleagues in the Cabinet concerning some of the provisions of the Irish Land Bill. In announcing the circumstance to the House of Lords (April 8) he stated that in consequence of certain provisions of the Bill which, in his view, put the ownership of Irish property in commission and abeyance, he had felt obliged to resign his office in the Government, and his resignation had been accepted by Her Majesty. Since that time the Duke has taken an important part, by speech and pen, in political controversy, taking the Whig side; especially on the questions of Home Rule and those arising out of the Crofter agitation. His Grace is Hereditary Master of the Queen's Household in Scotland, Chancellor of the University of St. Andrews, a Trustee of the British Museum, and Hereditary Sheriff and Lord-Lieutenant of Argyllshire. In 1866 His Grace published "The Reign of Law," which has passed through numerous editions; in 1869 "Primeval Man; an Examination of some Recent Speculations;" in 1870, a small work on the History and Antiquities of Iona, of which island his Grace is proprietor; in 1874 "The Patronage Act of 1874 all that was asked in 1843, being a Reply to Mr. Taylor Innos;" in 1877 (for the Cobden Club) observations "On the Important Question Involved in the Relation of Landlord and Tenant;" in 1879 "The Eastern Question, from the Treaty of Paris to the Treaty of Berlin, and to the second Afghan War," 2 vols.; and in 1884 "The Unity of Nature," a work on the Philosophy of Religion; being a sequel to the "Reign of Law," and "An Economic History of Scotland." He is a frequent contributor to scientific journals, chiefly on Geology, the Darwinian Theory, &c. He married first, in 1844, the eldest daughter of the second Duke of Sutherland (she died May 25, 1878); and secondly, in 1881, Amelia Maria,

eldest daughter of Dr. Claughton, Bishop of St. Alban's, and widow of Col. Augustus Henry Archibald Anson. His Grace's eldest son, the Marquis of Lorne, married, in 1871, the Princess Louise, (See LORNE.)

ARGYLL AND THE ISLES, Bishop of. See CHINNERY-HALDANE, THE RT. REV. JAMES ROBERT ALEXANDER.

ARMAGH, Archbishop of. See KNOX, THE MOST REV. ROBERT BENT.

ARMITAGE, Professor Edward, R.A., an historical and mural painter, descended from a Yorkshire family, was born in London, May 20, 1817, and educated in France and Germany. In 1837 he entered the studio of Paul Delacroix at Paris, and, in 1839, he was selected by that master to assist him in the decoration of the "Hemicycle" at the School of Fine Arts. To the Cartoon Exhibition at Westminster Hall, in 1843, Mr. Armitage sent "The Landing of Julius Cæsar in Britain," which took a first-class prize of £300. In 1844 he was a contributor to the Westminster Hall Exhibition of works in fresco, but not with similar success, receiving no prize. At the third competition in 1845 he was again successful, taking a £200 prize for a cartoon and coloured design, "The Spirit of Religion;" and, finally, in 1847, another first prize of £500 was awarded to him for an oil picture, "The Battle of Meane," now the property of the Queen. After this, Mr. Armitage went to Rome, where he remained one year. During the war with Russia he visited the Crimea, and the result was two pictures, "The Heavy Cavalry Charge of Balaklava," and "The Stand of the Guards at Inkermann." In 1858 he produced a colossal figure entitled "Retribution," allegorical of the suppression and punishment of the Indian Mutiny. In the Roman Catholic Church of St. John at Islington, he painted "St. Francis and his early followers before Pope Innocent III.," and decorated the apsis with figures of Christ and the twelve Apostles. In 1869 he was engaged upon the monochrome series of wall-paintings in University Hall, Gordon Square. Mr. Armitage was elected A.R.A. in 1867, R.A. in Dec., 1872; and was appointed Professor and Lecturer on Painting to the Royal Academy in 1875. To the annual exhibitions of that body he has been a regular contributor since 1848.

ARMSTEAD, Henry Hugh, R.A., sculptor, was born in London, June 18, 1828, and received his artistic education at the

School of Design, Somerset House, Leigh's School, Maddox Street, Mr. Carey's School, and the Royal Academy. Among his masters were Mr. McManus, Mr. Herbert, R.A., Mr. Bailey, R.A., Mr. Leigh, and Mr. Carey. As a designer, modeller, and chaser for silver, gold, and jewellery, and a draughtsman on wood, he has executed a large number of works. Among those in silver, the most important are the "Charles Kean Testimonial," the "St. George's Vase," "Doncaster Race Plate," the "Tennyson Vase" (Silver Medal obtained for that and other works in Paris, 1855), and the "Packington Shield." His last important work in silver (for which the Medal from the 1862 Exhibition was obtained) was the "Outram Shield," always on view at the South Kensington Museum. His works in marble, bronze, stone, and wood, include the South and East sides of the podium of the "Albert Memorial," Hyde Park, representing the musicians and painters of the Italian, German, French, and English Schools, and some of the greatest poets. There are also four large bronze figures on the Albert Memorial by Mr. Armstead, viz., Chemistry, Astronomy, Medicine, and Rhetoric. He also designed the external sculptural decorations of the new Colonial Offices—reliefs of Government, Europe, Asia, Africa, America, Australasia, and Education, statues of Earl Grey, Lord Lytton, Duke of Newcastle, Earl of Derby, Lord Ripon, Sir W. Molesworth, Lord Glenelg, and on the façade, reliefs of Truth, Fortitude, Temperance, and Obedience. Mr. Armstead designed the whole of the carved oak panels (beneath Dyce's Frescoes) in Her Majesty's Robing Room in New Palace, Westminster, illustrating the life of King Arthur, and the history of Sir Galahad; also the external sculpture of Eaton Park, Warwickshire, the large Fountain in the fore court of King's College, Cambridge, the marble reredos of the "Entombment of our Lord," at Hythe Church, Kent, and other works, including the effigies of the late Bishop of Winchester in Winchester Cathedral, of Dean Howard and Archdeacon Moore in Lichfield Cathedral, of Dean Close in Carlisle Cathedral, and of Lord Thynne in Westminster Abbey. The marble doorway in the crush-room of the Holborn Restaurant, including the wrought-iron screens for the fireplaces, &c., are also by him, as well as the exterior stone doorway and corbel of the Hôtel Metropole. One of his most important works is the "Street Memorial," now in the central hall of the Law Courts, including life-size marble statue and *alto relievo* of the "Arts and

Crafts required for the erection and due enrichment of a great public building." The following works also have been executed by him:—The effigy of Bishop Ollivant, now in Llandaff Cathedral, in marble, the bronze statue of Lieutenant Waghorn, R.N., the "Overland Route," erected at Chatham, and the memorial to Mrs. Craik, which is about to be placed in Tewkesbury Abbey, also the marble monument in St. Paul's Cathedral (in the crypt) containing the effigy of the late Rev. B. Webb, and a reredos for the St. Mary's Church, Aberavon, containing statuettes of our Lord and the four Evangelists, erected in memory of the late Mr. Llewellyn of Baglan Hall. Mr. Armstead was elected an Associate of the Royal Academy, Jan. 16, 1875, and an Academician, Dec. 18, 1879.

ARMSTRONG, Sir Alexander, K.C.B., F.R.S., LL.D., J.P., is a son of the late A. Armstrong, Esq., of Crahan, co. Fermanagh, Ireland. He was educated at Trinity College, Dublin, and at the University of Edinburgh, where he graduated. Having entered the Royal Navy, he served in various parts of the world, including the Mediterranean, South America, North America, West Indies, Pacific stations, Africa, Asia Minor, in the exploring expedition to Xanthus in Lycia, and elsewhere, and for five years continuously in the Arctic regions. He is one of the few surviving officers who circumnavigated the continent of America, and was frequently mentioned in the despatches connected therewith. He was present in H.M.S. *Investigator* at the discovery of the North-West Passage, having entered the Polar Sea *via* Behring's Strait, and returned to England through Baffin's Bay, with the surviving officer and crew of H.M.S. *Investigator*. During the Russian War he served in the Baltic, was present at the bombardment of Sweaborg, and also in two night attacks with a flotilla of rocket-boats, for which he was gazetted. He has been Deputy Inspector-General of the Mediterranean fleet and the naval hospitals at Malta, Haslar, and Chatham; and he was promoted to be Inspector-General for special services in 1866. Three years later he became Director-General of the Medical Department of the Navy, from which office he retired in 1880. He was created a Knight Commander of the Order of the Bath, Military Division, in 1871, for his services. Sir Alexander Armstrong has received the Arctic, Baltic, and Jubilee medals; also Sir Gilbert Blane's gold medal. He is a Justice of the Peace for Middlesex, City and Liberties of West-

minster, and County of London; and is the author of "A Personal Narrative of the Discovery of the North-West Passage," 1857; and "Observations on Naval Hygiene, particularly in connection with Polar Service."

ARMSTRONG, Professor George Francis, M.A., D.Lit., born in the county of Dublin, May 5, 1845, is the third and only surviving son of the late E. J. Armstrong, Esq., and Jane, daughter of the late Rev. Henry Savage, of Glastry, J.P., Incumbent of Ardkeen, co. Down. He received his early education partly in Dublin and partly in Jersey. In 1862 he made a long pedestrian tour in France with his elder brother, the poet, Edmund Armstrong. In the same year he obtained a civil appointment in Dublin, and matriculated in Dublin University. In 1864 he won the First Composition prize and the medal for oratory in the University Philosophical Society. In 1865 he gained the Vice-Chancellor's Prize for a poem on the subject of "Circassia;" and in the same year, on the death of his brother Edmund, he was elected his successor in the Presidential Chair of the Philosophical Society, and he brought out the first edition of his brother's "Poem." In 1866 he won the gold medal for composition in the Historical Society. In 1867 he was re-elected President of the Philosophical Society, and won its Gold Medal for essay writing. In 1869 he published a volume of "Poems, Lyrical and Dramatic." In 1870 appeared "Ugone: a Tragedy," written for the most part during his residence in Italy. In 1871 he was appointed Professor of History and English Literature in Queen's College, Cork, and a Professor of the Queen's University in Ireland; and the next year he was presented with the degree of M.A. by Trinity College, Dublin, in recognition of his "high literary character and attainments." In 1872 he published "King Saul" (the first part of the "Tragedy of Israel"), and new editions of "Poems, Lyrical and Dramatic" and "Ugone." In 1874 these were followed by "King David" (the second part of the "Tragedy of Israel"), and in 1876 by "King Solomon," which completed the Trilogy. In 1877 he published the "Life and Letters" of his brother Edmund, together with a volume of his "Essays," and a new and enlarged edition of his "Poetical Works." In 1882 he was presented with the degree of Doctor of Literature, *honoris causa*, by the Queen's University, and was elected a Fellow of the Royal University of Ireland; and in the spring of the same year he

published a volume of poems, under the title of "A Garland from Greece," suggested by travels in Greece and Turkey a year or two before. In 1886 Mr. Armstrong published a new volume of poems entitled "Stories of Wicklow;" in 1887 "Victoria Regina et Imperatrix: A Jubilee song from Ireland;" and in 1888 "Mephistopheles in Broadcloth: A satire in verse." In 1879 Mr. Armstrong married Marie Elizabeth, younger daughter of the late Rev. John Wrixon, M.A., Vicar of Malone, co. Antrim.

ARMSTRONG, Professor George Frederick, M.A., C.E., F.R.S.E., F.G.S., is the elder son of Mr. George Armstrong and of Mary Ann, daughter of Thomas and Phoebe Knowles, of Doncaster, Yorkshire, and was born May 15, 1842. He received his general education at private schools and at Jesus College, Cambridge. Having from an early age developed a strong taste for mechanical pursuits and a more than ordinary skill in constructive art, it was naturally thought that engineering would afford him a suitable career. He was accordingly educated professionally in the Engineering Department of King's College London; in the Plant Works and Locomotive Shops of the Great Northern Railway; and in the office of the Engineer-in-Chief, Mr. R. Johnson, M. Inst. C.E., on whose staff he was subsequently employed for several years in the design and execution of many important works, and generally in the maintenance of the line. He was afterwards engaged in private practice in London, and in 1869 became Engineer to the promoters of the Isle of Man Railways, for whom he made all the requisite plans and surveys, and prepared designs for way and works, and for the necessary rolling stock in connection with the lines then projected. In 1871 he was appointed first Professor of Engineering in the new Applied Science School at McGill University, Montreal; five years later he was offered and accepted the corresponding chair in the newly established Yorkshire College of Science at Leeds; and in 1885 was selected by the Crown to succeed the late Professor Fleming Jenkin, F.R.S., as Regius Professor of Engineering in the University of Edinburgh; which appointment he still holds. For many years Professor Armstrong has taken an active part in the promotion of technical education at home and in the colonies, and has been closely identified with its progress. His Inaugural Address at Edinburgh (which is published) was devoted to a consideration of the question in special relation to the educa-

tion of engineers, and attracted considerable attention at the time of its delivery. He has at other times publicly dealt with the question in lectures, and in the columns of the *Times*. By intimately associating himself with the work of each of the International Exhibitions held in Edinburgh since 1885; filling, in the Exhibition of 1890, the positions of Convener of the Engineering and Machinery Committee, and vice-chairman of the Executive Councils, he has rendered acceptable service in the cause of industrial enterprise. Professor Armstrong is the author of a number of papers on professional as well as on general science subjects which have been read before various learned societies, or contributed to scientific publications. During the summer and autumn of 1879 he undertook an extensive series of observations and experiments with a view of determining the diurnal variation in the amount of carbon dioxide in the air, the results of which were communicated in a paper to the Royal Society, and have since been accepted as a standard of reference on the continent as well as in this country. In 1889, the Council of King's College, London, elected Professor Armstrong to the Fellowship of the College; the highest distinction the College is empowered to bestow on its Alumni. He is an Examiner for Science Degrees in the Departments of Engineering, Public Health and Agriculture in the University of Edinburgh; Hon. President of the East of Scotland Engineering Association; and member of most of the professional institutes and societies.

ARMSTRONG, Lord, formerly Sir William George, C.B., LL.D., D.C.L., F.R.S., son of the late Mr. William Armstrong, a merchant and alderman of Newcastle-upon-Tyne, by the daughter of Mr. William Potter, formerly of Walbottle Hall, Northumberland, was born in 1810. He was educated at the school of Bishop Auckland, and afterwards articled to an eminent solicitor at Newcastle, who subsequently adopted him as a partner; but a strong bent for scientific pursuits eventually diverted him from the law. Early in life he began investigations on the subject of electricity, which resulted in the invention of the hydro-electric machine, the most powerful means of developing frictional electricity yet devised. For this he was elected, whilst a very young man, a Fellow of the Royal Society. He then invented the hydraulic crane, and, between 1845 and 1850, the "accumulator," by which an artificial head is substituted for the natural head gained

only by altitude; and he extended the application of hydraulic power to hoists of every kind, machines for opening and closing dock gates and spring bridges, capstans, turntables, waggon-lifts, and a variety of other purposes. For the manufacture of this machinery he and a small circle of friends founded the Elswick Engine Works, near Newcastle. There, in December, 1854, he constructed the rifled ordnance gun that bears his name. In 1858 the Rifle Cannon Committee recommended the adoption of the Armstrong gun for special service in the field, and Mr. Armstrong, on presenting his patents to the Government, was knighted, made a C.B., and appointed Engineer of Rifled Ordnance, with a salary of £2,000 a year. Between the years 1858 and 1870 the Armstrong gun and the position of Sir W. G. Armstrong in reference to the Government underwent many changes; but the leading feature of the gun, whether rifled or smooth, muzzle-loading or breech-loading, is in the coiling of one wrought-iron tube over another until a sufficient thickness is built up. The Armstrong gun has been largely adopted by foreign Governments. Sir William Armstrong extended the system to guns of all sizes, from the 6-pounder to the 600-pounder, weighing upwards of 20 tons, and within three years introduced three thousand guns into the service. The Committee of Ordnance of the House of Commons, in their report, July, 1863, state that they "have had no practical evidence before them that even at this moment any other system of constructing rifled ordnance exists which can be compared to that of Sir W. Armstrong." In February, 1863, Sir William resigned his appointment, and rejoined the Elswick manufacturing company, which has since expanded to one of the largest and most important manufacturing establishments in Europe, and has taken a leading part in the further development of artillery and other implements of war. In the same year he acted as President of the British Association meeting held at Newcastle-upon-Tyne. In that capacity he drew attention to the gradual lessening of our supply of coal, and the probability of actual exhaustion at some future time. The discussion suggested by this important address led to the appointment of a Royal Commission to inquire into all the circumstances connected with our national coal supply, and he was nominated a member of this Commission. He received the honorary degree of LL.D. from the University of Cambridge in 1862, and the honorary degree of D.C.L.

from the University of Oxford in 1870. Lord Armstrong is a Knight Commander of the Danish Order of the Dannebrog, of the Austrian Order of Francis Joseph, and of the Brazilian Order of the Rose. He was nominated a Grand Officer of the Italian Order of SS. Maurice and Lazarus in 1876. Lord Armstrong has taken an active part in the inquiries concerning the operation of the Patent Laws, he being very hostile to them in their present forms. He has been President of the Institution of Mechanical Engineers, and also of the Newcastle Literary and Philosophical Society. At the general election of 1886, Sir W. Armstrong stood as a Unionist Liberal candidate for Newcastle, in opposition to Mr. John Morley, but was defeated. He was raised to the Peerage under the title of Baron Armstrong in 1887, the year of the Queen's Jubilee.

ARNOLD, Arthur, third son of Robert Coles Arnold, Esq., of Whartons, Framfield, Sussex, and Heath House, Maidstone, was born May 28, 1833. On the passing of the Public Works (Manufacturing Districts) Act, 1863, to meet the necessities of the cotton famine, Mr. Arnold was appointed Assistant-Commissioner, and in that capacity resided in Lancashire till 1866, during which time he wrote "The History of the Cotton Famine," of which the original edition was published in 1864, followed by a cheaper one in 1865. After two years of subsequent travel in the south and east of Europe and in Africa, Mr. Arnold returned to England in 1868, when he published "From the Levant," in two vols., containing letters descriptive of his tour. He then became the first editor of the *Echo*, which, under his direction and control, attained a great success. In 1873, the King of Greece conferred the Golden Cross of the Order of the Redeemer upon Mr. Arnold, with special reference to his work, "From the Levant." In the same year, upon the death of Mr. Baring, Mr. Arnold was an unsuccessful candidate for the representation of Huntingdon. He resigned his connection with the *Echo* in 1875, and passed a year in travelling through Russia and Persia. The notes of this journey appeared in 1877 under the title of "Through Persia by Caravan." In 1879-80 he issued two works; one entitled "Social Politics," and the other "Free Land." At the general election of 1880, he was returned to Parliament for Salford. In the same year, in succession to Sir Charles Dilke, Mr. Arnold was elected Chairman of the Greek Committee which was actively concerned in promoting the

enlargement of the Hellenic kingdom in accordance with the suggestions of the Treaty of Berlin. In 1882, Mr. Arnold proposed in the House of Commons resolutions in favour of uniformity of franchise throughout the United Kingdom, and redistribution of political power, and upon a motion for adjournment, the policy of the resolutions was, for the first time, sanctioned by a large majority. In 1883, he moved for an elaborate return of electoral statistics which the Government adopted in connection with the Reform Bill of 1884. In 1885, Mr. Arnold established and was elected President of the Free Land League, which quickly obtained the support of a large number of members of Parliament. At the general election of that year and of 1886, he unsuccessfully contested the Northern Division of Salford. Upon the formation of the London Council in 1889, Mr. Arnold was elected a County Alderman for the double term of six years. In May, 1890, he accepted an invitation from the North Dorset Liberal Association to contest that division at the next election. In 1867, Mr. Arnold married Amelia, only daughter of Captain H. B. Hyde, 96th Regiment.

ARNOLD, Sir Edwin, K.C.I.E., C.S.I., second son of Robert Coles Arnold, Esq., J.P. for the counties of Sussex and Kent, and brother of the above, born June 10, 1832, was educated at the King's School, Rochester, and King's College, London, and was elected to a scholarship at University College, Oxford. In 1852 he obtained the Newdigate prize for his English poem on the "Feast of Belshazzar," and was selected in 1853 to address the late Earl of Derby on his installation as Chancellor of the University. He graduated in honours in 1854. Upon quitting college, he was elected Second Master in the English Division of King Edward the Sixth's School, Birmingham, and subsequently appointed Principal of the Government Sanskrit College at Poona, in the Bombay Presidency, and Fellow of the University of Bombay, which offices he held during the Mutiny, and resigned in 1861, after having twice received the thanks of the Governor in Council. He has contributed largely to critical and literary journals, and is the author of "Griselda, a Drama," and "Poems, Narrative and Lyrical," with some prose works, among which are "Education in India," "The Euterpe of Herodotus,"—a translation from the Greek text, with notes—"The Hittopadesa," with vocabulary in Sanskrit,

English, and Murathi. The last two were published in India. Sir Edwin Arnold has published also a metrical translation of the classical Sanskrit work "Hitopadesa," under the title of "The Book of Good Counsels," a "History of the Administration of India under the late Marquis of Dalhousie," 1862-4, as well as a popular account, with translated passages, of "The Poets of Greece." Since 1861 he has been upon the editorial staff of the *Daily Telegraph*. On behalf of the proprietors of that journal he arranged the first expedition of Mr. George Smith to Assyria, as well as that of Mr. Henry Stanley, who was sent by the same journal in conjunction with the *New York Herald*, to complete the discoveries of Livingstone in Africa. He is a Fellow of the Royal Asiatic and the Royal Geographical Societies of London, and Hon. Correspondent of that of Marseilles. He published in 1874 "Hero and Leander," a translation in heroic verse from the Greek of Musæus; and in the following year "The Indian Song of Songs," being a metrical paraphrase from the Sanskrit of the Gita Govinda of Jayadeva. Upon the occasion of the proclamation of the Queen as Empress of India, on Jan. 1, 1877, he was named a Companion of the Star of India. In 1879 he produced "The Light of Asia," an Epic poem upon the Life and Teaching of Buddha, which has since passed through more than forty editions in England, and eighty in America. For this work the King of Siam decorated him with the Order of the White Elephant. In 1881 he published a volume of oriental verse under the title of "Indian Poetry," and he has printed several translations from the Sanskrit Epic the Mahābhārata, and in 1883 "Pearls of the Faith, or Islam's Rosary; being the ninety-nine beautiful names of Allah, with comments in verse." Sir Edwin received the Second Class of the Imperial Order of the Medjidich from the Sultan in 1876, and the Imperial Order of Osmanie in 1886. In January, 1888, he was created Knight Commander of the Indian Empire by the Queen, and in October of the same year published "With a Sa'di in the Garden," or "The Book of Love," a poem founded on the 3rd chapter of the Bostān of the Persian poet Sa'di, for which he subsequently received from the Shah of Persia the Order of the Lion and Sun. He also published in 1888 a volume comprising most of his previous English poems and some new ones, under the title of "Poems, National and Non-Oriental."

ARNOLD, Thomas, M.A., is the second

son of the late Dr. Arnold, of Rugby, and was born at Laleham, Staines, Nov. 30, 1823. Educated at Winchester, Rugby, and University College, Oxford, he took his degree (First Class Classics) in 1845. After serving for some time in the Colonial Office he went to New Zealand; passed thence to Tasmania in 1850, with the appointment of Inspector of Schools; and, on becoming a Roman Catholic, returned to this country in 1856. He became a Professor in the Roman Catholic University at Dublin, thence moved to the Oratory School, Birmingham, and thence to Oxford. He is the author of several works on English Literature, and editions of old texts, among them, "A Manual of English Literature" (now in a sixth edition); an edition of "Select English Works of Wyclif," 3 vols., 1869; "Selections from the *Spectator*"; "Clarendon, Book 6"; "Beowulf," text, translation, and notes; and, for the Master of the Rolls' Series, editions of "Henry of Huntingdon," and "Symeon of Durham." He is now engaged upon the "Chronicles of the Abbey of Bury St. Edmunds." On the establishment of the Royal University of Ireland Mr. Arnold was appointed a Fellow. He married in Tasmania Julia Sorell, granddaughter of a former Governor of the Colony. She died in 1888, and he has since married Josephine, daughter of the late James Benison, of Slieve Russell, co. Cavan.

ASAPH, St., Bishop of. See EDWARDS, THE RIGHT REV. ALFRED GEORGE.

ASHBOURNE, Lord, The Right Hon. Edward Gibson, P.C., Lord Chancellor of Ireland, was born in Dublin in 1838, and educated at Trinity College, Dublin. In 1875 he entered Parliament as member for Dublin University, and in 1877 was made Attorney-General for Ireland. He held his post until 1880, when he went out of office with his party, but continued to sit for Dublin University. During the Liberal rule from 1880 to 1885, Mr. Gibson was the chief spokesman of the Opposition on Irish questions, and the chief critic of the Irish Land Bill of 1881. On the accession of Lord Salisbury to office in 1885 Mr. Gibson was raised to the peerage with the title of Baron Ashbourne, and was made Lord Chancellor of Ireland, a post which he again filled under Lord Salisbury's second administration in 1886. He is responsible for Lord Ashbourne's Act (1885), for facilitating the sale of Irish holdings to tenants.

ASHBURNHAM, Bertram, 5th Earl of,

Viscount St. Asaph, and Baron of Ashburnham, F.S.A., was born at Ashburnham, Oct. 28, 1840, being the son of Bertram, 4th Earl, by his wife Katherine Charlotte, daughter of George Baillie, Esq., of Millerstain and Jerviswoode, and sister of George, 10th Earl of Haddington. He was educated at Westminster School, and at Fontainebleau in France, and was attached to the Marquis of Bath's special embassy to convey the Order of the Garter to the Emperor of Austria in 1867. He succeeded his father as 5th Earl in 1878. He presided over the first meeting held in England to advocate "Home Rule" for Ireland, and was elected Chairman of the British Home Rule Association in 1886. Lord Ashburnham is the chief representative of the Ashburnham family, which, in a direct male line, has continued at Ashburnham in Sussex from before the Norman Conquest, and is described by Fuller in the early part of the 17th century, as a "family of stupendous antiquity wherein the eminence hath equalled the antiquity." Lord Ashburnham is the owner of the collection of MSS. and printed books formed by the late Earl, some portions of which have recently been sold to the British and Italian Governments.

ASHLEY, The Hon. Evelyn, son of the late Earl of Shaftesbury by his marriage with Lady Emily Cowper, eldest daughter of the 4th Earl Cowper, was born in July, 1836, and educated at Harrow and at Trinity College, Cambridge, graduating M.A. in 1858. He was called to the Bar at Lincoln's Inn in Trinity Term, 1863, and joined the Oxford Circuit. Mr. Ashley, who is a magistrate for Dorset, for Hampshire, and for the county of Sligo, unsuccessfully contested the Isle of Wight in February, 1874; he was, however, elected for Poole in May of the same year, and continued to represent that borough down to 1880, when he was elected for the Isle of Wight. Mr. Ashley was formerly private secretary to the late Lord Palmerston, and from 1863 to 1874 he was a Treasurer of County Courts. When the Liberals returned to power in April, 1880, Mr. Ashley was appointed Parliamentary Secretary to the Board of Trade, and in May, 1882, he was chosen by Mr. Gladstone to succeed Mr. Courtney in the office of Under-Secretary of State for the Colonies. He was also second Church Estates Commissioner. At the general election of 1885 Mr. Ashley was defeated in the Isle of Wight contest by Sir Richard Webster, Conservative. Mr. Ashley is the author of "The Life of Henry John Temple, Viscount Palmers-

ton." He married in 1866 Sybella Charlotte, daughter of Sir Walter Rockliffe Farquhar, Bart.

ASHMEAD-BARTLETT, Ellis, M.P., eldest son of the late Mr. Ellis Bartlett, a Dissenting Minister, was born at Brooklyn in 1849, and educated at Torquay and at Christ Church, Oxford, where he took a first-class in the final schools, and was President of the Oxford Union. He was called to the Bar at the Inner Temple in 1877, and was for some time an examiner in the Education Department. In 1880 he entered Parliament as member for Eye; and in 1885, and again in 1886, was returned for the Eccleshall Division of Sheffield. In both Lord Salisbury's administrations Mr. Ashmead-Bartlett has held the post of Civil Lord of the Admiralty. He has been a frequent and copious speaker in the House and on public platforms, especially on questions of foreign policy, and his antipathy to Russia is inveterate. He is understood to write for the weekly journal *England*, in which he is interested. His brother is married to Baroness Burdett-Coutts.

ASQUITH, Herbert Henry, Q.C., M.P., second son of the late J. Dixon Asquith, Esq., of Croft House, Morley, Yorks, was born at Morley Sept. 12, 1852, and was educated at the City of London School and Balliol College, Oxford, of which he was Scholar, and afterwards Fellow. B.A. 1874; 1st class classics, and Craven Scholar. He was called to the Bar at Lincoln's Inn, June, 1876; appointed a Queen's Counsel, Feb. 1890; elected M.P. for East Fife in July, 1886. He married, in 1877, Helen, daughter of F. Melland, Esq., of Manchester.

ATKINSON, The Rev. John Christopher, D.C.L., was born at Goldhanger, in Essex, in 1814, and received his education at Kelvedon, in that county, and at St. John's College, Cambridge (B.A. 1838). He was appointed vicar of Danby, in the North Riding of Yorkshire, and Domestic Chaplain to the late Viscount Downe in 1847, and Chaplain to the High Sheriff of Yorkshire in 1851. Dr. Atkinson is the author of "Walks, Talks, &c., of Two Schoolboys," 1859; "Playhours and Half-holidays," 1860; "Sketches in Natural History," 1861; "Eggs and Nests of British Birds," 1861; "Stanton Grange; or, Life at a Private Tutor's," 1864; "A Glossary of the Cleveland Dialect," 1868; "Lost; or what Came of a Slip from Honour Bright," 1869; besides many papers on archæological and philo-

logical subjects in the "Proceedings" of various learned societies. For some time he was engaged on "The History of Cleveland, Ancient and Modern," partly published, and he has since edited the Chartularies of Whitby, in two volumes, for the Surtees Society, the Chartulary of Rievaulx Abbey, for the same series, and the Furness Coucher Book, in three volumes. Previous to the completion of the Furness and Rievaulx Chartularies, he had issued "A Handbook of Ancient Whitby and its Abbey." In the year 1887 he had the honorary degree of D.C.L. conferred upon him by the University of Durham "in recognition of his many services to literature."

ATLAY, The Right Rev. James, D.D., Bishop of Hereford, was born at Wakerley, Northamptonshire, in 1817, and after a preliminary training at Grantham and Oakham Schools, entered St. John's College, Cambridge, where he obtained a fellowship. He was vicar of Madingley, near Cambridge, from 1847 to 1852, and Queen's Preacher at the Chapel Royal, Whitehall, from 1856 to 1858. He occupied the position of a senior tutor in his college at the time he was elected to the vicarage of Leeds out of 38 candidates, by the trustees of the vicarage, who are 25 in number. This was in 1859, when the Rev. Dr. Hook, the former vicar of Leeds, was appointed to the deanery of Chichester. Dr. Atlay was appointed a Canon of Ripon in 1861; and in 1868 was nominated by the Crown to the See of Hereford, in succession to Dr. Hampden. He married in 1859 Frances Turner, younger daughter of Major William Martin, of the Bengal army.

ATTFIELD, Professor John, M.A. and Ph.D. of the University of Tübingen, F.R.S., Professor of Practical Chemistry to the Pharmaceutical Society of Great Britain was born near Barnet, Hertfordshire, on Aug. 28, 1835. His first taste for science was given by the physical and chemical lectures of his schoolmaster, the Rev. Alex. Stewart, at Barnet. In 1850 he was articled to Mr. W. F. Smith, manufacturing pharmaceutical chemist, London. In 1853-4 he was a student in the Pharmaceutical Society's School, and First Prize-man in all subjects—chemistry, botany, pharmacy, and materia medica. From 1854 to 1862 he was Demonstrator of Chemistry at St. Bartholomew's Hospital, and lecture-assistant and research-assistant to the Professors of Chemistry there, Dr. Stenhouse, F.R.S., and afterwards Dr. Frankland, F.R.S., at the hospital, at the Addiscombe Military College, and at the

Royal Institution. During the same period he wrote most of the chemical articles in "Brande's Dictionary of Art, Science, and Literature," and in the Arts and Sciences Division of the "English Cyclopædia," besides being a frequent scientific contributor to several journals and newspapers. In 1862 he took his University degrees, his thesis being an account of an original research "On the Spectrum of Carbon," a paper read before the Royal Society, and published in the "Philosophical Transactions." In the same year he was appointed to the Chair of Practical Chemistry in the Pharmaceutical Society's School, where he is now (1890) senior professor and dean. He is a fellow, and was for several years on the Council, of the Chemical Society; is a Fellow, was one of the founders, and was for several years on the Council of the Institute of Chemistry of Great Britain and Ireland; is a Life Member, and on the General Committee, of the British Association for the Advancement of Science; is a Fellow of the Society of Chemical Industry; was for two years President of the Hertfordshire Natural History Society; was one of the five founders, for seventeen years Senior Secretary, and for two years President, of the British Pharmaceutical Conference, an organization for the encouragement of original research in pharmacy, each of his presidential addresses "On the Relations of Pharmacy and the State" drawing supporting leading articles from the *Times* and other chief newspapers; the members, on his retirement, presenting him with an illuminated vellum and five hundred specially bound volumes of general literature. He was Secretary of the Food Jury at the International Health Exhibition. He also wrote the Exhibition Handbook on "Water and Water Supplies," which has reached a third edition. He has written largely on pharmaceutical education, and the relation of education to examination, his views, especially as regards compulsory public curricula, having gradually won the support of all leading pharmacists. The present chemical nomenclature of the Pharmacopœias of Great Britain and the United States was adopted on his recommendation and long advocacy. His great work is "A Manual of Chemistry: General, Medical and Pharmaceutical," of which there have been published thirteen large editions in twenty-three years, seven being adapted to British and six to American medical and pharmaceutical requirements. For this book he was awarded a gold medal at the exhibition in Vienna in 1883. He was appointed

by the General Council of Medical Education and Registration of the United Kingdom to be one of the three editors of the "British Pharmacopœia of 1885," has since been Annual Reporter on the "Pharmacopœia" to the Council, and has been appointed by the Council Editor of an Addendum to the "Pharmacopœia." In the production of the latter he has successfully brought about the recognised co-operation of the two leading representative bodies of medicine on the one hand and pharmacy on the other; co-operation that will, doubtless, be maintained in the compilation of future editions of the great medicine-book of the empire. In the Royal Society's Catalogue he appears as author of thirty-seven original scientific papers, mostly of pharmaceutical interest, published in the "Transactions of the Royal, Chemical, and Pharmaceutical Societies." His scientific and educational work has gained for him not only the much coveted honour of being a Fellow of the Royal Society, but also the following twenty honorary distinctions:—Honorary Member of the Pharmaceutical Societies of Great Britain, Paris, St. Petersburg, Austria, Denmark, East Flanders, Australasia, and New South Wales; of the American Pharmaceutical Association; of the Colleges of Pharmacy of Philadelphia, New York, Massachusetts, Chicago, and Ontario; and of the Pharmaceutical Associations of New Hampshire, Virginia, Liverpool, Manchester, Georgia, and the Province of Quebec. At the Chicago College the chief lecture theatre is named "Attfield Hall," and his portrait in oils is hung on the College walls "in recognition of his aid in raising the College from its ashes after the great fire of 1871, and of his devotion to the cause of education." Professor Attfield is a chemical analyst, and consultant, as well as teacher. Resides at "Ashlands," Watford, Hertfordshire, and is a namesake and probable descendant of the John Attfield who flourished in "the Ville of Staundon" (now Standon), Hertfordshire, in the fourteenth century.

AUDIFFRET-PASQUIER, Edmé Armand Gaston, Duc d', a French politician, was born in 1823. His father, the Comte d'Audiffret, under the Restoration, was Director of Customs, Director of the National Debt, Councillor of State, and afterwards Receiver-General. His uncle, the Marquis d'Audiffret, was a Peer of France, and President of the *Cour des Comptes*. The name of d'Audiffret is that of an old family of Dauphiné, and their armorial bearings were to be seen

in the Crusades. The Comte d'Audiffret, father of the present Duke, married the daughter of M. Pasquier, Director-General to the Tobacco Manufactories, and brother of the Chancellor Pasquier. It is from the latter, who died without issue, and who had adopted him in 1844, that the subject of this memoir derives his ducal title. In 1845 young d'Audiffret, scarcely 22 years old, entered the Council of State as Auditor, and married Mademoiselle Fontenillat, daughter of the Receiver-General of the Gironde. Successive family afflictions deprived him of his children and induced him to wish for a retired life; and M. d'Audiffret went to live in Normandy on an estate which belonged to him. Here he passed 20 years of his life, occupied with agriculture and with political studies, in the midst of his books, the old library of the d'Audiffret family being one of the most ample literary collections which any individual could possess. In 1858 he presented himself for election to the Council-General, and in 1866 and 1869 to the Corps Législatif. On every occasion the battle was strongly contested. Victorious the first time, the candidate was beaten on the two other occasions by the efforts of official pressure. After the fall of the Empire he was elected to the National Assembly in the Conservative interest by the Department of the Orne (Feb. 8, 1871), and voted with the Right Centre. He was nominated president of the commission on purchases, and in this capacity acquired sudden renown by the masterly way in which he encountered in debate M. Rouher, the champion of the fallen dynasty. By his eloquence he soon acquired a great and strong position in the Assembly. He was one of the principal originators of the downfall of M. Thiers, but he had assumed an attitude which would not permit of his being included in a ministry of which Bonapartists were members. After the check given to the proposed Monarchical Restoration, the Duke, as president of the Right Centre, was among those who supported the Septennate, and who powerfully contributed, in conjunction with his brother-in-law, M. Casimir Périer, to the solution of Feb. 25, 1875. On the formation of the Buffet Ministry, he was elected President of the National Assembly. On Dec. 9, 1875, the Duc d'Audiffret-Pasquier, a few days previous, had joined the Left Centre, was the first person who was elected a Life Senator by the Assembly, by a majority amounting to four-fifths of all the votes recorded. In the sitting of March 13, 1876, he was elected President

of the Senate. He continued to hold that office till Jan. 1879, after the Senatorial elections, which gave the Republicans a majority in the Upper Chamber. On Dec. 26, 1878, he was elected to the seat in the French Academy lately filled by Mgr. Dupanloup. Of the 27 members present 22 voted for him, and 5 abstained from voting.

AUFRECHT, Professor Theodor, LL.D., M.A., an orientalist, was born at Leschnitz, Silesia, Jan. 7, 1822, and educated in the University of Berlin. He was appointed Professor of Sanskrit and Comparative Philology in the University of Edinburgh in 1862. On April 21, 1875, that university conferred on him the degree of LL.D., and shortly afterwards he left Scotland for Bonn, where he had been appointed Professor of Sanskrit. Professor Aufrecht has published "A Complete Glossary to the Rig Veda, with constant reference to the Atharva Veda;" "De Accentu Compositorum Sanskritorum," 1847; "Halayudha's Abhidhanaratnamala; a Sanskrit Vocabulary, edited with a Complete Sanskrit-English Glossary;" "The Hymns of the Rig Veda, transcribed into English letters," 2 vols.; and "Ujvaladatta's Commentary, the Unadistras," from a manuscript in the Library of the East India House, 1859.

AUMALE, (Duc d'), Henri-Eugène-Philippe-Louis d'Orleans, prince of the family of Orleans, born in Paris, Jan 16, 1822, the fourth son of the late king Louis-Philippe and his queen Marie-Amélie, was educated, like his brothers, in the Collège Henri IV., and at the age of seventeen entered the army. In 1840 he accompanied his brother, the Duke of Orleans, to Algeria, took part in the campaign which followed, returning to France in 1841, and he completed his military education at Courbevoie. From 1842 to 1843 he was again in Algeria, where, at the head of the subdivision of Medeah, he conducted one of the most brilliant campaigns of the war, capturing the camp and all the correspondence of Abd-el-Kader, together with 3,600 prisoners and an immense treasure, for which service he was made a lieutenant-general, and appointed to the command of the province of Constantine. In 1844 he directed the expedition against Biskarah, and in the same year married Marie Caroline Auguste de Bourbon, daughter of Prince Leopold of Salerno, who was born April 26, 1822. She died at Twickenham, Dec. 6, 1869. In 1847 the duke succeeded Marshal Bugeaud as

Governor-General of Algeria, which position he filled upon the surrender of Abd-el-Kader to the French authorities. On receiving the news of the revolution of Feb., 1848, he resigned his command to General Cavaignac, and joined the ex-royal family in England. With his brother, the Prince de Joinville, he protested against the decree banishing his family from France, and afterwards resided chiefly in England, devoting himself to literary pursuits. At the beginning of 1861, a pamphlet, addressed by him to Prince Jérôme Napoleon Bonaparte, excited great sensation, and led to a species of political persecution by the French authorities, who condemned the printer and publisher of it to fine and imprisonment. The duke challenged Prince Napoleon, whose refusal to meet him excited great indignation in France. The same year the Literary Fund of London invited the duke to preside at their annual dinner, on which occasion his speech also excited attention. The Duc d'Aumale, who, as heir of the great house of Condé, possesses an ample fortune, owns a beautiful seat on the banks of the Thames, near Twickenham, and a fine estate in Worcestershire, where he formerly occupied his time as a practical agriculturist. He is also the owner of a superb collection of works of art, and lately bought from the family of Lord Dudley "The Three Graces," a little picture by Raphael, for the enormous price of 25,000 guineas. Shortly before the elections for the National Assembly on Feb. 8, 1871, the Duc d'Aumale, who, during the Franco-German war, had in vain sought permission to serve in the French army, addressed from London a proclamation to the electors of the Department of the Oise, in which, while declaring his preference for a constitutional monarchy, he stated his willingness to bow to the national will, if a Liberal Republic were adopted as the form of government. His candidature was successful, but he did not return to France until after the law banishing the members of the Orleans family was repealed on June 8. He did not take his seat in the Assembly until Dec. 19, 1871. Previous to this, in Oct., 1871, he had been chosen President of the Council-General of the Oise. He was elected a member of the French Academy, Dec. 30, 1871, by 27 votes against 1, in succession to the illustrious Montalembert. The Duc d'Aumale was nominated a General of Division, Mar. 10, 1872, and in this capacity he presided over the Council of War before which Marshal Bazaine was arraigned. At the elections

for the Assembly in Feb., 1876, the Duc d'Aumale declined to come forward again as a candidate in order that he might devote his undivided attention to his military command. The first two volumes of his "Histoire des Princes de la Maison de Condé," appeared in 1869, and were translated into English by Mr. Robert Brown - Borthwick. The Duc d'Aumale was elected a member of the Academy of Fine Arts, Feb. 14, 1880. His eldest son, Louis-Philippe-Marie-Léopold D'Orléans Prince de Condé, born in 1845, died in June, 1866. His second son, François-Louis-Marie-Philippe d'Orléans, Duke of Guise, was born at Twickenham, Jan. 5, 1854, and died in France, July 25, 1872. Recently, after the passing of the Bill of Expulsion against the head of his family, the Duc d'Aumale was struck off the French Army List by the Minister of War, General Boulanger, and withdrew from France. Much sensation was caused soon afterwards by the publication of some letters in which the same General, on his promotion, had effusively thanked "Monseigneur" for his good offices. Soon after he had left France, it was discovered that he had given his château of Chantilly, with all the priceless treasures it contained, to the Institute, in trust for the French nation. The decree banishing the duke from France was revoked in March, 1889. The same month he was elected President of the French Academy for three months.

AUSTIN, Alfred, poet, critic, and journalist, was born at Headingley, near Leeds, May 30, 1835. His father was a merchant and magistrate of the borough of Leeds, and his mother was the sister of Joseph Locke, the eminent civil engineer, and M.P. for the borough of Honiton, of which he was lord of the manor. Both his parents being Roman Catholics, he was sent to Stonyhurst College, and afterwards to St. Mary's College, Oscott. From Oscott he took his degree at the University of London in 1853, and in 1857 he was called to the Bar of the Inner Temple. But the publication, though anonymously, of a poem called "Randolph," at the age of eighteen, showed the bent of his disposition; and it may be stated, on the authority of Mr. Austin himself, that he ostensibly embraced the study of the law only in deference to the wishes of his parents, and from his earliest years was imbued with the desire, and the determination, to devote his life mainly to literature. The expression of this resolve may be found in a novel written and published while

he was yet a minor. On the death of his father in 1861, he quitted the Northern Circuit, and went to Italy. His first acknowledged volume of verse, "The Season, a Satire," appeared in 1861. A third and revised edition of "The Season" appeared in 1869. His other poetical productions are:—"The Human Tragedy: a Poem," 1862, republished in an amended form 1876, and again finally revised in 1889; "The Golden Age: a Satire," 1871; "Interludes," 1872; "Rome or Death!" 1873; "Madonna's Child," 1873; "The Tower of Babel," a drama, 1874; "Leszko the Bastard: a Tale of Polish Grief," 1877; "Savonarola," a tragedy, 1881; "Soliloquies in Song," "At the Gate of the Convent," "Love's Widowhood and other Poems," "Prince Lucifer," and "English Lyrics," all published between the years 1881 and 1890. He has published three novels:—"Five Years of it," 1858; "An Artist's Proof," 1864; and "Won by a Head," 1866; also "The Poetry of the Period," reprinted from *Temple Bar*, 1870; and "A Vindication of Lord Byron," 1869, occasioned by Mrs. Stowe's article "The True Story of Lord Byron's Life." He has written much for the *Standard* newspaper and for the *Quarterly Review*. During the sittings of the Œcumenical Council of the Vatican, he represented the *Standard* at Rome, and he was a special correspondent of that journal at the headquarters of the King of Prussia in the Franco-German war. His political writings include "Russia before Europe," 1876; "Tory Horrors," 1876, a reply to Mr. Gladstone's "Bulgarian Horrors;" and "England's Policy and Peril; a letter to the Earl of Beaconsfield," 1877. Messrs. Macmillan have announced for publication a collected edition of his "Poetical Works," in six volumes.

AUSTRIA, Emperor of. See FRANCIS JOSEPH I.

AUTOCRAT of the Breakfast Table. See HOLMES, OLIVER WENDELL.

AYRTON, Professor W. E., F.R.S., born in London, 1847, is the son of Mr. E. N. Ayrton, M.A., Barrister. He was educated at University College School, where he gained numerous prizes, and entering subsequently into the College, gained the Andrews Exhibition in 1865 and the Andrews Scholarship in 1866. Passing the examination, with honours, for his first B.A. in 1867, Mr. Ayrton in the same year came out first in the Entrance Examination for the Indian

Government Telegraph Service. He was then sent by the Secretary of State for India to study electrical engineering with Prof. Sir William Thomson, coming out first at the advanced Examination for the Indian Government Telegraph Service, and won the Scholarship. When in India Prof. Ayrton acted first as the Assistant Electrical Superintendent, and subsequently as the Electrical Superintendent in the Government Telegraph Department, introducing, with the late Mr. Schwendler, throughout British India, a complete system of immediately determining the position of a fault in the longest telegraph line by electrically testing at one end. In 1872-3 Prof. Ayrton was on special duty in England on behalf of the Indian Government Telegraph Department, and in charge of the Great Western Telegraph Manufactory in London, on behalf of the Engineers, Prof. Sir William Thomson and the late Prof. Fleeming Jenkin. From the latter year until 1879 Prof. Ayrton was the Professor of Natural Philosophy and of Telegraphy at the Imperial College of Engineering, Japan, the largest English-speaking Technical University in existence at that date. In 1879 he was appointed Professor of Applied Physics at the City and Guilds of London Technical College, Finsbury, and in 1884 the Chief Professor of Physics at the Central Institution, South Kensington, of the City and Guilds of London Institute; in 1880 a Secretary of the Mathematical and Physical Section of the British Association; and in 1881 was elected a Fellow of the Royal Society. Prof. Ayrton is a Vice-President of the Physical Society, a Vice-President of the Institution of Electrical Engineers, a Member of Council of the Royal Society, and of the British Association; he has been a Juror in the majority of the Electrical Exhibitions in England and abroad, and is joint editor of Cassell's "Manuals of Technology," and the author of "Practical Electricity," the most recently-published work in this series, but already in its third edition. His lecture on the "Electric Transmission of Power," given at the meeting of the British Association at Bath, in 1888, was so much appreciated that, at the request of the town, this lecture was repeated to an audience of 3,000, the first time in the annals of the British Association that one of their lectures has been repeated. With the late Prof. Perry he is the joint inventor of the well-known Ammeters, Voltmeters, Electric Power Meter, Ohmmeter, Dispersion - Photometer, Transmission, Dynamometer, Dynamometer Coupling, Governed Electric Motor, Oblique Coiled Dynamo Machine, and

Secohmmeter; and with the late Prof. Fleeming Jenkin and the late Prof. Perry, of the system of Automatic Electric Transport known as "Telpherage." About 90 Papers published in the *Proceedings and Transactions* of the Royal Society, Physical Society, Society of Telegraph-Engineers, and other societies have been contributed by Prof. Ayrton conjointly with the late Prof. Perry, of which some of the most important are:—"The Specific Inductive Capacity of Gases;" "The Contact Theory of Voltaic Action;" "A New Determination of the Ratio of the Electromagnet to the Electrostatic Unit of Quantity;" "A Duplex Partial Earth Test;" "Electricity as a Motive Power;" "Experiments on the Heat Conduction of Stone;" "On a Neglected Principle that may be Employed in Earthquake Measurements;" "The Magic Mirror of Japan;" "Electric Railways;" "Measuring Instruments used in Electric Lighting and Transmission of Power;" "Economic Use of Gas Engines;" "Electromotors and their Government;" "A New Form of Spring for Electric and other Measuring Instruments;" "The Gas Engine Indicator Diagram;" "The Most Economical Potential Difference to use with Incandescent Lamps;" "The Winding of Voltmeters;" "Economy in Electrical Conductors;" "Uniform Distribution of Power from an Electrical Conductor;" "Modes of Measuring the Coefficients of Self and Mutual Induction;" "The Driving of Dynamos with very Short Belts;" "Portable Voltmeters for Measuring Alternate or Direct Potential Differences;" "The Magnetic Circuit in the Dynamo;" "The Efficiency of Incandescent Lamps with Direct and Alternate Currents." Prof. Ayrton, with the late Prof. Perry, has also taken out twenty-six patents in Great Britain, several of them also in France, Germany, America, and other foreign countries.

BAB. See GILBERT, WILLIAM SCHWENCK.

BABINGTON, Professor Charles Cardale, M.A., F.R.S., F.S.A., F.L.S., F.G.S., son of the late Rev. Joseph Babington, M.A., L.M., and grandson of Thomas Babington, Esq., of Rothley Temple, Leicestershire, was born at Ludlow in 1808, and educated at St. John's College, Cambridge (B.A. 1830; M.A. 1833). He is Professor of Botany in the University of

Cambridge, and he was elected to a professorial fellowship at St. John's College in Oct. 1882. Professor Babington is well known as a naturalist, and has published "*Flora Bathoniensis*," "*The Flora of the Channel Islands*," a "*Manual of British Botany*," which has passed through eight editions, "*Flora of Cambridgeshire*," "*The British Rubi*," also many botanical articles in the scientific journals. In addition to these works he has published "*A History of the Chapel of St. John's College, Cambridge*," 1874; and has contributed "*Ancient Cambridgeshire*" (1883), and other papers, to the publications of the Cambridge Antiquarian and other societies.

BACON, The Right Honourable Sir James, P.C., was born in 1798, and is the eldest son of the late Mr. James Bacon, barrister-at-law of the Middle Temple. He was called to the Bar at Gray's Inn, in 1827, and afterwards became a member of Lincoln's Inn, of which he is still a bencher. He obtained a silk gown in 1846, and in 1868 he was appointed Commissioner of Bankruptcy for the London District, and continued to hold that office till the end of 1869, when he was appointed Chief Judge in Bankruptcy. In August, 1870, he succeeded to the Vice-Chancellorship vacated by Sir William Milbourne James, and in 1875 was made a Judge of the High Court of Justice, Chancery Division. He continued in active work up to Nov. 1886, when he resigned the Vice-Chancellorship. As a Judge his sayings were often memorable, and his judgments seldom reversed. Sir James Bacon was appointed a Member of the Privy Council upon his retirement.

BADEN, Grand Duke of. See **FREDERICK WILLIAM LOUIS**.

BADEN-POWELL, Sir George Smyth, M.P., K.C.M.G., F.R.S., was born at Oxford on Dec. 24, 1847. His grandfather, Baden-Powell, of Langton, a much respected Kentish squire, was high sheriff of his county in 1832. His father was the well-known Rev. Baden-Powell, Professor of Geometry in the University of Oxford, whose *magnum opus* was written to demonstrate that Science and Revelation are in harmony rather than antagonistic. He was one of the most illustrious of the contributors to *Essays and Reviews*. Sir George's mother is a daughter of the distinguished Admiral W. H. Smyth, K.S.F., D.C.L., F.R.S. Sir George was educated at St. Paul's School; at Marlborough, under the present Dean of

Westminster, and at Balliol College, Oxford, where he graduated in honours in 1876, winning the Chancellor's prize for the English Essay. In the interlude, between his leaving Marlborough and taking up his residence at Balliol, he spent three years in making a prolonged sojourn in India and Australia, and visiting the Cape and foreign lands, and the principal cities on the continent of Europe. The first year of his university career saw published his "*New Homes for the Old Country: a Personal Experience of the Political and Domestic Life, the Industries, and the Natural History of Australia and New Zealand*." This important book—which was truly of imperial interest—was very favourably and generally noticed by the press, the *Times*, in a review of three columns, pronouncing it "a standard work," and the *Athenæum* declaring it to be "an encyclopædia of Australian knowledge." He was also diligently applying himself to the study of the relations of the Upper and Lower Houses of Colonial Legislature; the effect of our tariff on the colonial wine industry; the defence of our colonies; and the questions involved in our commercial treaties with France and Spain. During these years he published his two well-known books on political economy, "*Protection and Bad Times*," and "*State Aid and State Interference*." In 1877 he was serving as private secretary to Sir George Bowen, Governor of Victoria. During 1880-81, Sir George Baden-Powell went to the West India Islands, to investigate for himself the actual effect of the Sugar Bounty System on West India Sugar Planting. In Nov. 1882, Mr. Gladstone's Government offered him the post of joint Commissioner with Col. Sir W. Crossman, R.E., to enquire into and report on the administration, revenues, and expenditure of our West India Colonies. Accepting this honourable task he again left England for the West Indies, returning home in the following summer to work out all the questions referred to the Commissioners, and the Report, contained in five Blue Books, concluded by Easter, 1884, is regarded as a complete summary of West Indian affairs. For this work he was created a C.M.G. In Jan. 1885, he went to South Africa, and joined Sir Charles Warren in Bechuanaland, assisting him in his diplomatic negotiations with the native chiefs; made a tour of investigation into the affairs of Basutoland, Zululand, and other places, and returned to England at the beginning of 1885. In the winter of 1886-7, Mr. Baden-Powell was in Canada and in

the United States, drawing up a clear statement of all the facts and details of the Fishery Dispute, of which Mr. Chamberlain was subsequently commissioned to negotiate a final arrangement. In the autumn of 1887 Sir George was sent by the Government to Malta, as the colleague of Sir George Bowen, G.C.M.G., as Special Commissioner to arrange the details of the new Malta Constitution. He was, at the same time, offered the honour of knighthood for his previous Colonial and especially his South African services. He is an industrious author, as the following more detailed list of his published writings will show:—"New Homes for the Old Country: a Personal Experience of the Political and Domestic Life, the Industries, and the Natural History of Australia and New Zealand," 1872; "The Political and Social Results of the Absorption of Small States by Large," 1876; "Protection and Bad Times," with special reference to the new British Empire, 1879; "State Aid and State Interference," 1882; "The Truth about Home Rule," essays on the Irish Question by leading Unionists, 1888; besides numerous articles in the *Quarterly*, *Westminster*, *Nineteenth Century*, *Fortnightly*, *Contemporary*, *National*, and *Fraser*; dealing with Australian Constitutions; Imperial Defence; Import Duties; Fiscal Policy; various details of West Indian, South African, and Colonial Policy; Industries in the United States; Sugar Bounties; Canadian Commercial Policy; Imperial Federation; German Colonial Expansion; The Imperial Institute; Fifty years of Colonial Growth; The Expansion of the Queen's Title; Practical Tory Administration; Colonial Home Rule; Self Government *versus* Home Rule; and several series of articles and letters in the *Times* and other papers dealing with political, fiscal, and commercial affairs in our Colonies and the United States, and other similar subjects. Of his public addresses the following are the most notable:—"On Tariffs and Commercial Treaties," and "On Local Option," before the Social Science Congress, 1881; "Protectionist Victoria and Free Trade New South Wales," before the British Association, 1881; "Tariff Reform in the British Empire," before the British Association, 1882; "Scheme for the Complete Defence of the Empire," before the Royal Colonial Institute, 1882; "The Maintenance of the Political Unity of the Empire," before the Royal Colonial Institute, 1884; "Africa South of the Equator," before a Special Meeting of the London Chamber of Commerce, 1885; "War Risk at Sea," before the Colonial

Exhibition Conference, 1886; "Emigration," before the Working Men's College, 1886; "The Commercial Relations of the Empire," before a Special Meeting, at the Mansion House, of the Colonial Conference Delegates, 1887; "Colonial Government Securities," before the Royal Colonial Institute, 1887; "Territorial Waters," before the Conference of the Association for the Modification of the Law of Nations, in the Guildhall, London, 1887.

BAILEY, Philip James, son of Thomas Bailey, author of the "Annals of Notts," who died in 1856, was born at Nottingham, April 22, 1816. Having been educated at various schools in his native town, he in 1831 matriculated at the University of Glasgow, where he studied for two sessions under Professors Buchanan, Sir D. K. Sandford, Thomson, and Milne. In 1833 he began to study the law, was admitted a member of Lincoln's Inn in 1835, and called to the Bar in 1840. Having little inclination for legal pursuits, Mr. Bailey before this time had carried on an extensive and varied course of reading in the libraries of the British Museum and Lincoln's Inn, as well as at home. He was accustomed to the composition of verse from early years. "Festus," conceived and planned originally in 1836, and published in 1839, was well received in this country and in America, where it has passed through many editions. The eleventh, or Jubilee edition (so called, from the fact that it was issued fifty years after the first edition), with a prose preface explanatory of the purpose of the poem, was published by Messrs. Routledge in 1889. "The Angel World," 1850; "The Mystic," 1855; "The Universal Hymn," 1867; all since mainly incorporated with "Festus;" "The Age," a Satire, 1858; and a prose work on the international policy of the Great Powers, with a few minor and miscellaneous poems, comprise nearly the whole of Mr. Bailey's contributions to contemporary literature. The several characteristics of "Festus" as a poem are too widely known to require to be here specified. A learned professor has said recently in one of his lectures: "The main aim of 'Festus,' a marvellous poem saturated with science and philosophy, is to show the immortality of man and the final absolute triumph of the highest, which is infinite goodness and love in God."

BAIN, Professor Alexander, LL.D., born at Aberdeen in 1818, entered Marischal College in 1836, where he took the

degree of M.A. in 1840. From 1841 to 1844 he taught, as deputy, the class of Moral Philosophy in Marischal College; from 1844 to 1845, the Natural Philosophy Class. In 1845 he was elected Professor of Natural Philosophy in the Andersonian University, Glasgow, but retired at the end of a year. In 1847 he was appointed by the Metropolitan Sanitary Commissioners their Assistant-Secretary, and in 1848 became Assistant-Secretary to the General Board of Health, which post he resigned in 1850. From 1857 to 1862 he was Examiner in Logic and Moral Philosophy in the University of London. In 1858, 1859, 1860, 1863, 1864, 1868, and 1870, he acted as Examiner in Moral Science at the India Civil Service Examinations. In 1860 he was appointed by the Crown Professor of Logic in the University of Aberdeen. In 1864 he was re-elected Examiner in the University of London, and continued to hold that position till 1869. His first literary production was an article, in 1840, in the *Westminster Review*, to which he has since contributed at various times. In 1847-8 he wrote text-books on Astronomy, Electricity, and Meteorology, in Messrs. Chambers's school series, several of Chambers's "Papers for the People," and the articles on Language, Logic, the Human Mind, and Rhetoric in the "Information for the People." In 1852 he published an edition of the "Moral Philosophy of Paley," with dissertations and notes. "The Senses and the Intellect" appeared in 1855, and "The Emotions and the Will," completing a systematic exposition of the human mind, in 1859; both works are now in their third editions. "The Study of Character, including an Estimate of Phrenology," was published in 1861, an English Grammar in 1863, and a "Manual of English Composition and Rhetoric" in 1866. His more recent works are, "Mental and Moral Science," 1868; "Logic, Deductive and Inductive," 1870; "Mind and Body; Theories of their Relation," 1873; a collection of "The Minor Works of George Grote, with Critical Remarks on his Intellectual Character, Writings, and Speeches," 1873; "A Companion to the Higher English Grammar," 1874; "Education as a Science," 1879; "James Mill, a Biography," "John Stuart Mill, a Criticism, with Personal Recollections," 1882; and "Practical Essays," 1884. In 1880 he retired from the Logic chair of Aberdeen University. In 1881 he was elected, by the students, Lord Rector of the University; and again elected in 1884. In 1887 appeared Part I. of a revised and enlarged edition of the "Manual of Rhetoric," being devoted to

the "Intellectual Qualities of Style;" accompanying which was a volume on "Teaching English." The year following, 1888, was published Part II. of the "Rhetoric," on the "Emotional Qualities."

BAIRD, Lieutenant-Colonel Andrew Wilson, R.E., F.R.S., A.I.C.E., F.R.G.S., born at Aberdeen, April 26, 1842, is the son of the late Mr. Thomas Baird, of Woodlands, Cults, and was educated at Marischal College and University, and was for some years a pupil of Dr. Rennet, LL.D., the Mathematical Tutor in Aberdeen. Entering Addiscombe College as a Cadet of the Hon. E. India Co.'s service in the beginning of 1860, he was transferred to the Royal Military Academy, Woolwich, at the end of the year, and obtained a commission in the Corps of Royal Engineers in Dec., 1861. After having finished his course of military engineering studies at Chatham, Lieutenant Baird proceeded to India in Feb., 1864, and served under the Bombay Government; he was employed as Special Assistant in the Harbour Defences at Bombay, and held charge of the construction of the Middle Ground and Oyster Rock Batteries at various times between April, 1864, and December, 1865, when he was appointed as Special Assistant Engineer in the Government Reclamations which were being carried out on the foreshore of the harbour. From January till July, 1868, Lieutenant Baird was employed as Assistant Field Engineer with the Abyssinian Expedition (medal), during which time he held the charge of Traffic Manager of the railway, and he was mentioned in despatches for zeal and management in bringing safely and expeditiously troops and baggage for embarkation. Shortly after his return to Bombay, Lieutenant Baird was appointed to the Great Trigonometrical Survey of India (in December, 1868). Employed successively on the triangulation in Kattywar and Guzerat, Lieutenant Baird suffered considerably from the trying work in the very hot weather, and was obliged to go on furlough to England in May, 1870, and while on furlough he was selected by General Walker, R.E. (then chief of the Great Trigonometrical Survey); and employed by order of the Secretary of State for India to study the practical details of tidal observations, and their reductions by harmonic analysis as carried on under the superintendence of Sir William Thomson for the British Association. On his return to India in April, 1872, Lieutenant Baird carried out a recon-

naissance of the Gulf of Cutch, with a view to selecting sites for three Tidal Observatories, one at the mouth, and one at the head and as far into the "Runn" as possible, and one about the middle of the gulf. The tidal observatories and the levelling operations in connection therewith were carried out for special reasons in connection with the question of the depression of the great tract called the Runn of Cutch; and Captain Baird was sent to England to carry out the calculations for reducing the tidal observations. Returning to India in June, 1877, Captain Baird was appointed to the general superintendence and control of tidal observatories on the Indian coasts; these operations were gradually extended, until twenty tidal observatories (in India, Burmah, Ceylon, the Andaman Islands, and Aden) were working simultaneously, and as five years' work was completed at minor stations the observatories were removed to other places, and now over thirty stations have been observed at. In August and September, 1881, Captain Baird was sent as one of the Commissioners from India to the Venice Geographical Congress and Exhibition. Here the Survey of India exhibited a complete set of tidal and levelling apparatus, diagrams, &c., and was awarded a Diploma of Honour; and the Congress awarded Captain Baird a medal of the First Class for his works on tidal observations; the Secretary of State for India and the Government of India recorded their thanks to Captain Baird for his services at this Congress. After furlough in England, Major Baird returned to India in April, 1883, and resumed charge of the tidal and levelling operations until he was appointed to officiate as Mint Master of Calcutta in July, 1885; since then he has acted several times as Mint Master of Calcutta and Bombay, and in the intervals held the appointment of Assistant Surveyor-General. He was promoted to Lieutenant-Colonel in December, 1888, and was confirmed as Mint Master, Calcutta, in August, 1889. For his services in the tidal research Colonel Baird was elected a Fellow of the Royal Society in May, 1885. The following are the works of a public or official character which Colonel Baird has written:—Articles on the Gulf of Cutch, Little Runn, and Gulf of Cambay for the *Bombay Gazetteer*; Notes on the Harmonic Analysis of Tidal Observations, published by order of the Secretary of State, 1872; Paper on the Tidal Observations of the Gulf of Cutch, read before the British Association, 1876; Account of the Tidal Dis-

turbances caused by the Volcanic Eruption at Krakatoa (Java) in August, 1883, presented to the Royal Society; Auxiliary Tables (two Pamphlets) to facilitate the calculations of Harmonic Analysis of Tidal Observations, published in India, 1879 and 1882; Joint Report with Professor G. H. Darwin, F.R.S., &c., of the results of the Harmonic Analysis of Tidal Observations, presented to the Royal Society and reprinted from their Proceedings, March, 1885; Account of the Spirit-Levelling Operations of the Great Trigonometrical Survey of India, read before the British Association in 1885, and afterwards printed among the supplementary papers of the Royal Geographical Society; Manual of Tidal Observations, published at the expense of the British Association; Tide Tables for India Ports, prepared annually by Major Baird and Mr. Roberts of the Nautical Almanac Office by order of the Secretary of State for India. Colonel Baird is also an Associate of the Institute of Civil Engineers, and a Fellow of the Royal Geographical Society.

BAKER, John Gilbert, F.R.S., F.L.S., born at Guisborough, in Yorkshire, Jan. 13, 1834, was educated at schools belonging to the Society of Friends at Ackworth and York. He was appointed Assistant-Curator of the Herbarium of the Royal Gardens, Kew, in 1866, (which office he still holds,) and Lecturer and Demonstrator of Botany to the Apothecaries' Company in 1882. He was for many years Lecturer on Botany to the London Hospital, and one of the assistant editors to *Seemann's Journal of Botany*. Formerly Mr. Baker was Curator, and afterwards Secretary, of the London Botanical Exchange Club. His works on descriptive botany are as follows:—"Synopsis Filicum," a descriptive catalogue of all known ferns, with plates of the genera—a work planned and commenced by the late Sir W. Hooker, 1868, 2nd edit. 1874; "Monograph of the Ferns of Brazil," in folio, 1870, with fifty plates; and since of the "Compositæ, Ampelidæ and Conaracæ" of the same country; "Revision of the order Liliacæ," 7 parts, 1870—80; "Monograph of the British Roses," 1869; "Monograph of the British Mints," 1865; Monographs of Papilionacæ and other Orders in Oliver's "Floral of Tropical Africa," 1868—1871; Descriptions of the Plants figured in Vols. I., III., and IV. of Saunders' "Refugium Botanicum," 1869—71; "Popular Monographs of Narcissus, Crocus, Lilium, Iris, Crinum, Aquilegia, Sempervivum, Epimedium, Tulipa, Nerine, and Agave," 1870—7;

"Monograph of the Papilionaceæ of India," 1876; "Systema Iridacearum," 1877; "Flora of Mauritius and the Seychelles," 1877; "A Monograph of Hypoxidaceæ," 1879; "A Monograph of Selaginella," 1884—5; "On the tuber-bearing species of Solanum," 1884. The following are the titles of Mr. Baker's works on geographical botany, &c:—"An Attempt to Classify the Plants of Britain according to their Geographical Relations," 1855; "North Yorkshire: Studies of its Botany, Geology, Climate, and Physical Geography," 1863; "A new Flora of Northumberland and Durham, with Essays on the Climate and Physical Geography of the Counties" (aided by Dr. G. E. Tate), 1868; "On the Geographical Distribution of Ferns through the World, with a Table showing the Range of each Species," 1868; "Elementary Lessons in Botanical Geography," 1875; Many papers on the "Botany of Madagascar," containing descriptions of above 1000 new species, 1881—1890; "A Flora of the English Lake District," 1885. In 1883 he edited, in conjunction with the Rev. W. Newbould, the first published edition of Watson's "Topographical Botany;" 1887; "A Handbook of the Fern Allies," 1888; "A Handbook of the Amaryllidæ," 1889; and "A Handbook of the Bromeliaceæ," 1890.

BAKER, Sir Samuel White, M.A., F.R.S., eldest son of the late Samuel Baker, Esq., of Lypiatt Park, Gloucestershire, was born in London, June 8, 1821, and was educated at a private school and in Germany. He married, in 1843, Henrietta, daughter of the Rev. Charles Martin. In 1847 he established an agricultural settlement and sanatorium at Newera Ellia, in the mountains of Ceylon, at an altitude of 6,200 feet above the sea level. At great personal cost he, together with his brother, conveyed emigrants from England, and the best breeds of cattle and sheep, to found the mountain colony. The impulse given by this adventure secured the assistance of the Colonial Office, and with the increasing prosperity of Ceylon, Newera Ellia has become a resort of considerable importance, the most recent development being the cultivation of the valuable Cinchona plant. In 1854, Mr. Baker retired from Ceylon after eight years' residence, and at the death of his wife in 1855 he proceeded to the Crimea, and he was subsequently engaged in Turkey in the organization of the first railway. In 1861 he commenced an enterprise entirely at his own cost for the discovery of the Nile sources in the hope of meeting the Government expedition

under the command of Captain Speke, who had started from Zanzibar for the same object. Having married, in 1860, Florence, daughter of M. Finnian von Sass, he was accompanied throughout this arduous journey by his wife. Leaving Cairo April 15, 1861, he reached, on June 13, the junction of the Atbara with the Nile. For nearly a year he explored the regions of Abyssinia whence comes the Blue Nile; and in June, 1862, he descended to Khartoum, at the junction of the Blue and the White Nile, where he organised a party of ninety-six persons to explore the course of the latter river. They set out in Dec. 1862, and reached Gondokoro in Feb. 1863. Here Mr. Baker had the good fortune to meet Captains Speke and Grant, who had succeeded in reaching the Lake Victoria N'yanza, which they believed to be the primary source of the Nile. Mr. Baker, having resolved to supplement their explorations, supplied them with the necessary vessels for the voyage to Khartoum, and started from Gondokoro by land, Mar. 26, 1863, without either interpreter or guide, in defiance of the opposition of the slave-hunters, who attempted to bar his progress. The route was first eastward, then nearly south, and afterwards turned towards the east. On March 14, 1864, he came in sight of a great fresh-water lake, the "Mwootan N'zige," until then unknown, which he named the Albert N'yanza. After navigating the lake from N. lat. $1^{\circ} 14'$ to the exit of the Nile at $2^{\circ} 15'$, he set out on his homeward journey early in April, 1864, but owing to illness and the disturbed condition of the country he did not reach Gondokoro until March 23, 1865. This was the first successful expedition directed from the North in the history of Nilotic discovery; Mr. Baker having carried with his vessels all the numerous transport animals which alone enabled him to proceed from Gondokoro in the absence of native carriers. The Royal Geographical Society awarded to him its Victoria Gold Medal, and on his return to England in 1866, he was created M.A. of the University of Cambridge and received the honour of knighthood. In Sept. 1869, he undertook the command of an expedition to Central Africa under the auspices of the Khedive, who placed at his disposal a force of 1,500 picked Egyptian troops, and intrusted him for four years with absolute and uncontrolled power of life and death. He undertook to subdue the African wilderness, and to annex it to the civilized world; to destroy the slave trade, and to establish regular commerce in its place; to open up to civilization those vast

African lakes which are the equatorial reservoirs of the Nile; and to add to the kingdom of the Pharaohs, the whole of the countries which border on that river. Sir Samuel, having first received from the Sultan the Order of the Medjidieh and the rank of Pacha and Major-general, left Cairo with his party on Dec. 2, 1869, Lady Baker, as in former journeys, accompanying him. He returned in 1873. Sir Samuel is the author of "The Rifle and the Hound in Ceylon," 1854, new edit. 1874; "Eight Years' Wanderings in Ceylon," 1855, new edit. 1874; "The Albert N'yanza, Great Basin of the Nile, and Explorations of the Nile Sources," 2 vols., 1866, translated into French and German; "The Nile Tributaries of Abyssinia and the Sword Hunters of the Hamram Arabs," 1867, 4th edit. 1871; "Cast up by the Sea," a Story, 1869, translated into French by Madame P. Fernand under the title of "L'Enfant du Naufrage;" "Ismailia: a Narrative of the Expedition to Central Africa for the Suppression of the Slave Trade; arranged by Ismail, Khedive of Egypt," 2 vols., 1874. In 1879, shortly after the British occupation of Cyprus, he visited every portion of the island thoroughly to investigate its resources, the results of which journey he published in a volume entitled "Cyprus as I saw it in 1879." Thence he proceeded upon various researches through Syria, India, Japan, and America. In 1883 he published "True Tales for my Grandsons," and in 1890, "Wild Beasts and their Ways," reminiscences of Europe, Asia, Africa, and America. Sir Samuel is a Fellow of the Royal Geographical Society of London, and an honorary member of the Geographical Societies of Paris, Berlin, Italy, and America. He has received the Grande Médaille d'Or of the Société de Géographie de Paris. He is a Deputy-Lieutenant of Gloucestershire, and J.P. of Devon; he has the Orders, the Grand Cordon of the Medjidieh, and the second and third classes, in addition to the second class of the Osmanieh.

BAKER, The Rev. William, D.D., Head Master of Merchant Taylors' School, youngest son of the late George Baker, Esq., of Reigate, was born at Reigate in Dec., 1841, and educated at Merchant Taylors' School and St. John's College, Oxford, of which he was sometime Fellow and Tutor. He obtained a first class in classics at Moderations in 1862, and a second class in the Final Classical School in 1864, and was elected Denyer and Johnson Theological Scholar in 1866. He was appointed Head Master of Merchant

Taylors' School, on the retirement of Dr. Hessey, at Christmas, 1870, and Prebendary of St. Paul's in 1880. He is the author of "A Manual of Devotion for School Boys," published in 1876; "Lectures on the Historical and Dogmatical Position of the Church of England," 1882; "A Plain Exposition of the Thirty-nine Articles," 1883; "Daily Prayers for Younger Boys," 1886.

BALFOUR, The Right Hon. Arthur James, P.C., LL.D., F.R.S., &c., son of the late James Maitland Balfour, Esq., of Whittinghame, and Lady Blanche Mary Harriet, daughter of the second Marquis of Salisbury, born July 25, 1848, educated at Eton, and at Trinity College, Cambridge (M.A. 1873, Hon. LL.D. Edinburgh 1881, St. Andrews 1885, and Cambridge 1888); is a D.L. for East Lothian and Ross-shire; was private secretary to the Marquis of Salisbury when Secretary of State for Foreign Affairs 1878-80; employed on special mission of Lords Beaconsfield and Salisbury to Berlin, June 1878; P.C., 1885; president of Local Government Board June 1885 to Jan. 1886; and secretary for Scotland July 1886 to March 1887; since which time he has been chief secretary for Ireland, with a seat in the Cabinet since Nov. 1886. He sat for Hertford Feb., 1874 to Nov., 1885, and since then he has sat for the Eastern division of Manchester. He was elected Lord Rector of St. Andrews University, Nov. 1886; was Keeper of the Privy Seal, Ireland, 1887; Chancellor of the Order of St. Patrick, 1887; vice-president of the Committee of Council on Education for Scotland; chairman of the Commission on Bi-Metallism, 1887; elected F.R.S., 1888; member of the Senate of London University, 1888; the Freedom of the City of London was conferred on him in 1888; and he was elected member of the Committee on Town Holdings, Procedure of the House of Commons, &c. He is the author of a "Defence of Philosophic Doubt," published 1879, and various magazine articles.

BALFOUR, Professor Isaac Bayley, Botanist, M.D. (Edin.), D.Sc. (Edin.), M.A. (Oxon.), F.R.S., F.R.S.E., F.L.S., F.G.S., and member of other British and foreign scientific societies, was born in Edinburgh March 31, 1853, being the second son of John Hutton Balfour, Professor of Botany in the University of Edinburgh, 1845-79. He was educated at the Edinburgh Academy and at the University of Edinburgh, where he was Baxter Natural Science Scholar, and graduated with honours in Science and Medi-

cine. In 1879 he was appointed Regius Professor of Botany in the University of Glasgow, which chair he resigned on being elected in 1884 Sherardian Professor of Botany in the University of Oxford. This chair he resigned in 1888 on his receiving the appointment of Queen's Botanist in Scotland, Keeper of the Royal Botanic Garden in Edinburgh and Regius Professor of Botany, having previously been elected Professor of Botany in the University of Edinburgh. These positions he now holds. In 1874 he was appointed, by the Royal Society, Naturalist to the Transit of Venus Expedition to Rodriguez. The natural history results of the Expedition are published in the *Philosophical Transactions*, vol. 168 (1879). In 1880 he undertook, on behalf of the Royal Society and the British Association, the exploration of the island of Socotra. Reports upon the results of the Expedition have appeared in publications of the British Association and of the Royal Institution. The botany of the island constitutes vol. xxxi. (1886) of the *Trans. Roy. Soc. Edin.* Prof. Balfour has contributed papers, chiefly on botanical subjects, to the various botanical journals and publications of scientific societies.

BALFOUR, The Right Hon. John Blair, Q.C., LL.D., P.C., is the son of the late Rev. Peter Balfour, minister of Clackmannan, by Jane Ramsay, daughter of Mr. John Blair of Perth. He was born at Clackmannan in 1837, and was educated at Edinburgh Academy and the University of Edinburgh. He was called to the Scottish Bar in 1861, and was appointed Solicitor-General for Scotland on the formation of Mr. Gladstone's Administration in 1880. Mr. Balfour entered Parliament as M.P. for the counties of Clackmannan and Kinross, in Nov., 1880, in the place of the late Mr. W. P. Adam, on the appointment of the latter as Governor of Madras, and was again elected in Nov., 1885, and in July, 1886. In Aug., 1881, he was appointed Lord Advocate for Scotland in the room of Mr. McLaren, who had been raised to the judicial bench; held the office till the resignation of Mr. Gladstone's Administration in June, 1885; was re-appointed Lord Advocate in Feb., 1886; was made Privy Councillor, 1883; elected Dean of the Faculty of the Advocates July, 1885, and again May, 1889, and Deputy-Lieutenant for the County of the City of Edinburgh. He is also Hon. LL.D. of the Universities of Edinburgh and St. Andrews. Mr. Balfour has been twice married—first, in 1869, to Lillias Oswald, daughter of Lord

Mackenzie (a Judge of Sessions of Scotland); and, secondly, in 1877, to the Hon. Marianne Eliza Wellwood-Moncreiff, younger daughter of Lord Moncreiff late Lord Justice Clerk of Scotland.

BALFOUR, Thomas Graham, M.D., Q.H.P., F.R.S., son of John Balfour, Merchant, Leith, and great grandson of James Balfour, Professor of Moral Philosophy, and of Robert Whytt of Bennoch, Professor of Medicine in the University of Edinburgh, was born in Edinburgh, March 18, 1813. He was educated at the High School, the Edinburgh Academy, and the University, where he took the degree of M.D., in 1834. He was gazetted to the Medical Staff of the Army, in 1836, and was immediately employed at Head Quarters, with Deputy-Inspector-General Marshall and Lieutenant Tulloch, in drawing up the first series of Statistical Reports on the health of the Army—the first ever published by any Government. In 1840 he was appointed to the Grenadier Guards, and served in them till promoted in 1848. In 1857 he was selected to be Secretary to the Royal Commission, presided over by Mr. Sidney Herbert, appointed to inquire into the regulations affecting the sanitary condition of the Army, and the organisation of the Medical Department. In 1859, on the consequent re-organisation of the Army Medical Service, he was promoted to be Head of the Statistical Branch, then, for the first time, formed in the Department. He held this post till he became Surgeon-General in 1873, and, after serving as Principal Medical Officer at Netley and at Gibraltar, retired in 1876. He became fellow of the Royal Society in 1858, Fellow of the Royal College of Physicians in 1860, Honorary Physician to the Queen in 1887; Corresponding Foreign Member of the Académie Royale de Médecine de Belgique; Fellow, and formerly Vice-President of the Royal Medical and Chirurgical Society; Fellow of the International Statistical Institute; Fellow, and in 1888 and 1889, President, of the Royal Statistical Society. In 1867 Dr. Balfour was sent by the Government as a Delegate to the International Statistical Congress at Florence, and was the only Englishman appointed President of a Section there. In 1880 he represented the Army Medical Department at the International Medical Congress held in London. He has also served on the following committees:—in 1864-5, on the Admiralty Committee to inquire into the subject of Contagious Diseases in the Army and Navy; from 1863 to 1868 on a committee of the Royal College of

Physicians on the Nomenclature of Diseases for Statistical Returns; and in 1889 on the committee appointed by Government to inquire into the Pay, Status, and Conditions of Service of the Medical Officers of the Army and Navy. In addition to a number of articles in the *British and Foreign Medical Quarterly*, and elsewhere (unsigned), he was the author, conjointly with Sir A. Tulloch, of five volumes of Statistical Reports "On the Health of the Army;" as Head of the Statistical Branch, of thirteen Annual Reports, 1859-71; of a paper "On the Health of the Troops in the Madras Presidency," in the *Edin. Med. and Surg. Journal*, No. 172; of two papers in the *Medico-Chirurgical Transactions*, "On Spirometry," and on "The Protection afforded by Vaccination;" and of several papers in the *Journal of the Statistical Society*.

BALL, The Right Hon. John Thomas, M.P., LL.D., D.C.L., eldest son of Major Benjamin Marcus Ball, was born at Dublin in 1815, and educated at Trinity College, Dublin, graduating B.A. in 1836, and LL.D. in 1844. He was called to the Irish Bar in 1840, and became successively a Queen's Counsel, Queen's Advocate and Judge of the Provincial Consistorial Court at Armagh. At the general election of 1868 he was returned to the House of Commons in the Conservative interest by the University of Dublin, and for a few weeks in Nov. and Dec. of that year he was successively Solicitor-General and Attorney-General for Ireland under Mr. Disraeli's administration. In 1870 the University of Oxford conferred on him the honorary degree of D.C.L. Dr. Ball proved himself to be a ready and energetic debater by his numerous speeches on the Church Bill, the Land Bill, and other measures affecting Ireland. When the Conservatives came into power in Feb. 1874, Dr. Ball again became Attorney-General for Ireland, and at the close of that year he was appointed Lord Chancellor of Ireland. He took the oaths of office Jan. 1, 1875, and resigned in May, 1880. He has been Vice-Chancellor of the University of Dublin, since Jan. 1880. He married, in 1852, Catherine, daughter of the Rev. Charles R. Elrington, Regius Professor of Divinity in the University of Dublin.

BALL, Sir Robert Stawell, LL.D., F.R.S., was born at Dublin, July 1, 1840, and educated at Chester by Dr. Brindley. He was appointed University Student at Trinity College, Dublin, in 1861; Lord Rosse's Astronomer at Parsonstown in

1865; Professor of Applied Mathematics and Mechanism at the Royal College of Science for Ireland in 1867; Fellow of the Royal Society in 1873; Andrews Professor of Astronomy in the University of Dublin, and Royal Astronomer of Ireland in 1874. He obtained the Cunningham Gold Medal of the Royal Irish Academy. He is author of the following works among others:—"The London Science Class-books on Astronomy and Mechanics," which have gone through several editions; "Theory of Screws," Dublin, 1876; "Story of the Heavens," 1885; "Time and Tide" 1889; besides many papers on mathematics, astronomy, and physical science in various publications. Several of his works have been translated into foreign languages. He has frequently lectured on Astronomy at the leading institutions in the United Kingdom. His most widely circulated work is the little volume entitled "Starland." It contains the Christmas Talks about the Stars with Juveniles at the Royal Institution of Great Britain. He is also the editor of the new Admiralty manual of scientific inquiry. He was knighted on Jan. 25th, 1886.

BALL, Valentine, LL.D., F.R.S., F.G.S., M.R.I.A., was born in Dublin July 14, 1843, and is the second son of the late Robert Ball, LL.D., and was educated at Dr. Brindley's, Chester, Dr. Fleury's and Dr. Benson's, Dublin, private schools, and at Trinity College, Dublin. He graduated in the University of Dublin, B.A., 1864; M.A., 1872; LL.D. (*honoris causa*), 1889. He was elected Fellow of the Geological Society of London, 1874; Fellow of the Calcutta University (*honoris causa*), 1875; Fellow of the Royal Society of London, 1882; and President of the Royal Geological Society of Ireland, 1882. He was appointed (1) Clerk in the Receiver Master's Office, Dublin, 1860-64; (2) to the Staff of the Geological Survey of India, from 1864 to 1881 (17 years); (3) Professor of Geology and Mineralogy in the University of Dublin, from 1881 to 1883; (4) Director of the Science and Art Museum in 1883, which office he holds at present. Its duties include, besides the general management of the museum, the local administrative control, under the direction of the Science and Art department of the Metropolitan School of Art, the Royal Botanic Gardens, Glasnevin, and the National Library of Ireland. Dr. Ball is also Honorary Secretary of the Royal Zoological Society of Ireland; and Member of the Council of the Alexandra (Ladies') College, and of that of the Royal Irish Academy. His published

works are:—(1) "Jungle Life in India, or the Journeys and Journals of an Indian Geologist," 1880; (2) "The Diamonds, Coal and Gold of India," 1881; (3) "The Economic Geology of India," 1881; (4) an English Translation of "Tavernier's Travels in India," with notes, appendices, &c., 1889. Besides numerous contributions to Learned Societies, he has published several Memoirs on the Geology of extensive tracts in India, and accounts of his visits to, and explorations in, Afghanistan and Beluchistan, the Andaman and Nicobar Islands, the Himalayas, &c. As a collateral result of his explorations in the wild and then little known central regions of the Peninsula of India, where he first discovered several coal fields, he was enabled to suggest to the Government the most desirable line of route for a direct railway between Calcutta and Bombay. This route has now been adopted after several years spent in surveys of the various alternative routes. Several of his more important recent contributions to Societies are upon the "Identification of the Animals, Plants, and Minerals of India which were known to the Ancients." In the year 1884 he presented a Report to the Science and Art Department on the Museums of America; it was subsequently published in the Department's Annual Report. Dr. Ball was married in the year 1879, to Mary, daughter of the late Mr. John Stewart-Moore, of Moyarget, County Antrim, by whom he has had five children.

BALLANTYNE, John, R.S.A., was born in Kelso, Roxburghshire, in 1815. His father, Alexander, was proprietor and editor of *The Kelso Mail* newspaper, and was an intimate friend of Sir Walter Scott. John was educated in the Edinburgh Academy, and received his first instruction in drawing and painting under Sir William Allan, P.R.S.A., and Thomas Duncan, A.R.A. In 1832 he went to London and studied in the Royal Academy for several years; he also studied in the Academies of Paris and Rome. In 1834 he exhibited a picture in the Royal Academy and has continued, with intermissions, to exhibit there ever since. He frequently visited the picture galleries of the Continent, and made many copies there. He was elected a Member of the Royal Scottish Academy in 1845, and at the commencement of the volunteer movement was made Captain of the Artists' Company, and in 1860 Commandant of the Edinburgh Artillery Regiment. Mr. Ballantyne has painted many "*tableaux de genre*," and a few his-

torical pictures. Amongst his works may be mentioned a series of "Portraits of Celebrated Painters in their Studios," one of which, Sir Edwin Landseer's, has just been presented to the National Gallery by Mr. Agnew.

BANCROFT, George, Ph.D., LL.D., D.C.L., was born at Worcester, Massachusetts, Oct. 3, 1800. He entered Harvard College in 1813, and graduated in 1817. Almost immediately afterwards he went abroad, where he remained for five years, studying at Göttingen and Berlin, travelling through Germany, Italy, Switzerland, and Great Britain, and making the personal acquaintance of many of the leading European scholars. He received the degree of Ph.D. at Göttingen in 1820, and returning to America in 1822, was for a year Greek tutor in Harvard College. In 1823, in conjunction with Dr. Joseph Cogswell, afterwards noted as the organiser of the Astor Library in New York, he founded the Round Hill School at Northampton, Massachusetts. He published in 1824 a translation of Heeren's "Politics of Ancient Greece." He was also at this time meditating and collecting materials for his "History of the United States," the first volume of which appeared in 1834. In 1835 he removed to Springfield, Massachusetts, where he resided for three years, and completed the second volume of his history. In 1838 he was appointed Collector of the Port of Boston, a position which he occupied until 1841, being also a frequent speaker at political meetings, and still keeping up his historical labours. The third volume of his history appeared in 1840. In 1844 he was the Democratic candidate for Governor of Massachusetts, but was not elected. In 1845, Mr. Polk having been elected President, Mr. Bancroft entered his Cabinet as Secretary of the Navy, and also served for a month as Acting Secretary of War. In 1846 he was sent as Minister to Great Britain, where he successfully urged upon the British Government the adoption of more liberal navigation laws, and was especially earnest in vindicating the rights of persons naturalized as citizens of the United States. During this residence in Europe he made use of every opportunity to perfect his collections of documents relating to American history. He returned to the United States in 1849, took up his residence in New York, and set about the preparation of the remainder of his history, of which the tenth volume was published in 1874. This brings the narrative to the close of the Revolutionary War,

and completes the body of the work. Two supplementary volumes were issued in 1882 under the title of "History of the Foundation of the Constitution of the United States," which bring the narrative down to 1789. After his return from England he for many years devoted himself wholly to literary labour. In Feb., 1866, he delivered before Congress an address in memory of Abraham Lincoln, for which he received a vote of thanks from both Houses. In May, 1867, he was appointed Minister to Prussia; in 1868 he was accredited to the North German Confederation; and in 1871 to the German Empire. He was recalled from this mission at his own request, in 1874. During his mission to Germany several important treaties were concluded with the various German States, relating especially to the naturalization of Germans in America. Mr. Bancroft is a member of numerous learned societies. In 1855 he published a volume of "Miscellanies," comprising a portion of the articles which he had contributed to the *North American Review*. In 1883 the first volume of a carefully revised edition of his History was published, of which the sixth and concluding one appeared in 1885. He published in 1886 "A Plea for the Constitution of the United States wounded in the House of its Guardians." His latest publication is "Martin Van Buren to the end of his Public Career," 1889. He has resided at Washington, D.C., for several years, passing his summers at Newport, Rhode Island, where he has one of the finest rose gardens in the world.

BANCROFT, Mrs., *née* Marie Effie Wilton, actress, who belongs to an old Gloucestershire family, is the eldest daughter of the late Mr. Robert Pleydell Wilton, and a native of Doncaster. After acting from early childhood in the provinces, chiefly at the old Theatre Royal, Bristol, she first appeared in London in Sept., 1856, at the Lyceum Theatre, as the boy in "Belphegor" and "Perdita the Royal Milkmaid." Subsequently she fulfilled various engagements at London houses, notably making the fortune of the celebrated burlesques at the Strand Theatre. Miss Wilton, in partnership with Mr. H. J. Byron, became manager of the Prince of Wales's Theatre, London, at Easter, 1865. Shortly afterwards she gave up burlesque acting, and devoted her entire attention to the production of English comedies, chiefly written by the late T. W. Robertson. She was married to Mr. S. B. Bancroft in Dec., 1867. Mr. and Mrs. Bancroft continued their successful

career at the Prince of Wales's Theatre until January, 1880, when they migrated to the Haymarket, of which theatre they had become the lessees. The characters with which Mrs. Bancroft's name is best associated are *Polly Eccles*, *Naomi Tighe*, *Mary Nedley*, *Peg Woffington*, *Jenny Northcote*, *Nan*, *Lady Franklin*, and *Lady Teazle*. Mr. and Mrs. Bancroft retired from theatrical management in July, 1885, the occasion being a tribute to their popularity both before and behind the curtain. Mrs. Bancroft has since shown considerable power as a writer by her important share in the book of reminiscences called "Mr. and Mrs. Bancroft on and off the Stage." Mr. Bancroft in the course of his farewell speech on retiring from the management said, "Most of us, I think, owe Mrs. Bancroft something, but I am by far the heaviest in her debt. I alone know how she has supported me in trouble, saved me from many errors, helped me to many victories; and it is she who has given to our work those finishing touches, those last strokes of genius, which, in all art, are priceless."

BANCROFT, Squire Bancroft, actor and theatrical manager, born in London, May 14, 1841, made his first appearance on the stage at the Theatre Royal, Birmingham, in Jan., 1861. He afterwards accepted engagements in Dublin and Liverpool, playing almost every line of character, including important Shaksperian parts, with Charles Kean and G. V. Brooke. He made his *début* in London on the occasion of the opening of the Prince of Wales's Theatre, under the management of Mr. Byron and Miss Marie Wilton, April 15, 1865. Mr. T. W. Robertson's popular comedies, "Society," "Ours," "Caste," "Play," "School," and "M.P.," were brought out at this theatre, and in each of them Mr. Bancroft created one of the leading characters. In 1867 Mr. Bancroft married Miss Marie Wilton, and a large share of the management of the Prince of Wales's Theatre thenceforward devolved upon him. Among other parts subsequently performed by him at that house were Sir Frederick Blount in "Money," Joseph Surface in the "School for Scandal," Triplet in "Masks and Faces," Sir George Ormond in "Peril," Dazzle in "London Assurance," Blenkinsop in "An Unequal Match," Count Orloff in "Diplomacy," and Henry Spreadbrow in "Sweethearts." Mr. Bancroft's successful career at the Prince of Wales's Theatre was brought to a close on Jan. 29, 1880. In Sept., 1879, he had become lessee of the Haymarket, and after expending nearly twenty thousand

pounds on its internal rebuilding and decorations, he began his management of that theatre on Jan. 31, 1880. The first performance was Lord Lytton's comedy, "Money." "Odette" was produced in April, 1882, Mr. Bancroft taking the part of Lord Henry Trevene, with Madame Modjeska as Odette. This was followed by the "Overland Route" (Sept. 1882), and "Caste" and "School" (Feb., 1883). Then followed an elaborate revival of "The Rivals." Mr. and Mrs. Bancroft, having realized a large fortune, retired from their exceptionally successful career of management on July 20, 1885. Mr. Bancroft reappeared on the stage in the autumn of 1889 at the Lyceum Theatre, acting with great success the part of the Abbé Latour in "The Dead Heart." Mr. Bancroft generously offered to subscribe £1,000 towards General Booth's scheme for alleviating distress, if ninety-nine others would subscribe the same amount. The Earl of Aberdeen was the first to follow suit.

BANGOR, Bishop of. See LLOYD, THE RIGHT REV. DANIEL LEWIS.

BANKS, Mrs. G. Linnæus, née Varley, a poet and novelist, was born in Oldham Street, Manchester, March 25, 1821. Her father was a man of genius and culture; artistic, scientific, and literary. The education which Mrs. Banks received, in part from a classical master, was largely supplemented by home influences, a good library, and the intelligent, literary, theatrical, and artistic friends who thronged her gifted father's house. At the age of eleven she wrote a song, and delighted her younger sister and little friends with stories of her own invention. Her first contribution to the press (in the *Manchester Guardian*, April 12, 1837), was a sentimental poem entitled "The Dying Girl to her Mother." It was followed at intervals by others of a higher order. Later, at the request of Mr. Rogerson, editor of the *Odd Fellows' Quarterly Magazine*, she sent him a poem called "The Neglected Wife," and gained by it a prize of three guineas, which was her first literary honorarium. She was barely eighteen when she succeeded to a long-established school for young ladies, at Cheetham, Manchester, which she carried on with success. In 1844 was issued her "Ivy Leaves; a Collection of Poems." Two years later, viz., Dec. 27, 1846, she was married at the Collegiate Church, Manchester, to Mr. George Linnæus Banks, of Birmingham, a many-sided man, poet, orator, and journalist. She greatly assisted her husband in his literary

labours, and conjointly with him produced a favourably received volume of verse under the title of "Daisies in the Grass." Many of their songs have been set to music, and are extremely popular. Mrs. Banks's first publication after marriage was a "Lace Knitter's Guide," followed, after a long interval, by "Light Work for Leisure Hours." It was not until June, 1865, that she published her first novel, "God's Providence House." It established her reputation. Next in turn appeared a North Country story, "Stung to the Quick," 1867; "The Manchester Man," 1876; a Wiltshire story entitled "Glory," 1877; a Lancashire novel entitled "Caleb Booth's Clerk," 1878; "Wooers and Winners," a Yorkshire story, 1880; "Forbidden to Wed," 1883; and "In his Own Hand," 1885. A cheap and uniform edition of her novels was commenced in 1881. In addition to the foregoing novels, excepting "God's Provident House," the series includes the story "More than Coronets," a number of weird stories entitled "Through the Night," and a second volume of short tales under the title of "The Watchmaker's Daughter, and Other Stories," and a third volume entitled "Sybilla, and Other Stories." In 1878 a collection of Mrs. Banks's later poems was published under the title of "Ripples and Breakers." Mrs. Banks has written much for the leading magazines, including *All the Year Round*, *Argosy*, *Gentleman's Magazine*, *Temple Bar*, *Belgravia Annual*, *Cassell's Family Magazine*, *Quiver*, *Girl's Own Paper*, *The Fireside*, *Odd Fellow's Quarterly*, *Once a Week*, *Country Words*, many of the Christmas Annuals, Holiday Numbers, &c. During her residence at Harrogate she lectured with considerable success on "Woman as she was, as she is, and as she may be." She baptized the Shakespeare Oak, planted by Mr. Phelps, the tragedian, on Primrose Hill, at Shakespeare's tercentenary, and delivered an address on the occasion.

BANKS, Nathaniel Prentiss, was born at Waltham, Massachusetts, Jan. 30, 1816. While a boy he worked in a cotton factory, and afterwards learned the trade of a machinist. In time he became editor of a country newspaper, and received an appointment in the Boston Custom House. He also studied law, was admitted to the Bar, and in 1849 was elected to the lower branch of the Legislature of Massachusetts, of which he was chosen Speaker in 1851; and in the following year he was elected a member of Congress, nominally as a Democrat;

but he soon formally withdrew from the Democratic party, and in 1854 was re-elected by the concurrent vote of the "American" and Republican parties. At the following meeting of Congress he was chosen Speaker on the 133rd ballot, after the longest contest ever known. He was also a member of the next Congress, and in 1857 was elected Governor of Massachusetts, and re-elected in 1858 and 1859. On the outbreak of the civil war he was made major-general of volunteers, was assigned the command of a corps in the army of the Potomac, and was subsequently placed at the head of the forces for the defence of the city of Washington. In December he succeeded General Butler in command at New Orleans, and in July, 1863, took Port Hudson on the Mississippi. In the spring of 1864 he made an unsuccessful expedition up the Red River, in Louisiana, and was in May relieved of his command. He again entered upon political life, and was re-elected to Congress from his old district in 1866, and again in 1868 and 1870. In 1872 he took an active part in favour of the election of Horace Greely to the presidency. In 1876 he was again elected to Congress by the votes of the Democrats and of that portion of the Republicans who were opposed to the policy of President Grant, but he acted with the Republican party. From 1879 to 1888 he was U. S. Marshal for the district of Massachusetts, but he has recently (1889) re-entered Congress as a Republican Representative from Massachusetts.

BANKS, William Mitchell, M.D., F.R.C.S., was born at Edinburgh in 1842, and was educated at the Edinburgh Academy, and at the University of Edinburgh. In 1864 he took the degree of M.D. with honours, gaining the University Gold Medal for an anatomical thesis on the Wolfian Bodies. After graduating, he acted as Demonstrator of Anatomy in the University of Glasgow under the late Professor Allen Thomson for two years, and then settled in Liverpool as a consulting and operating surgeon. Mr. Banks has contributed numerous surgical papers to various journals and societies, but his name has been more especially associated with the advocacy of extensive operative measures for the removal of cancer of the breast, and with attempts to find the most suitable operation for the radical cure of rupture. His chief work, however, has been in connection with the resuscitation of the Medical School of Liverpool, and with the origination of the University College of that city, now

one of the three colleges of the Victoria University. In the laying down of the original constitution of the college, and in the arrangements of the regulations for the medical degrees of the university, Mr. Banks's work has been of acknowledged service. He has also devoted much time and labour to the building of the new Liverpool Royal Infirmary, now on the eve of completion, having endeavoured, by the introduction of the latest forms of construction, and the most recent improvements in building materials, to render this hospital a model of sanitary science. On the formation of the Liverpool Biological Society in 1886, Mr. Banks was appointed its first President, and at the present time he is President of the Liverpool Medical Institution, Senior Surgeon and Chairman of the Medical Board of the Royal Infirmary, and Representative of the Victoria University in the General Medical Council.

BANVILLE, Théodore Faullain de, French writer, was born at Moulins, March 14, 1823, the son of a ship's captain. He settled early in Paris, and devoted himself entirely to literary work. He has published a number of poems, amongst which are: "*Les Caryatides*," 1842; "*Les Stalactites*," 1846 (new edit, 1873); "*Les Exilés*," 1866; "*Idylles Prussiennes*," 1872; "*Poésies Occidentales*," "*Rimes Dorées*," 1875. He has also written plays, the best known of which are: "*Le Beau Léandre*," 1856; "*Diane au Bois*," 1863; "*La Pomme*," 1865; "*Gringoire*," 1866. His novels are: "*La Vie d'une Comédienne*," 1855; "*Esquisses Parisiennes*," 1859; "*Les Fourberies de Nérine*," 1864; "*Les Parisiens de Paris*," 1866. Both his poetical and his prose styles are remarkable for grace and delicacy. His comedies were published collectively in 1878, and his poems in 1879.

BAPTISTET. See DAUDET, ALPHONSE.

BARA, Jules, a Belgian statesman, born at Tournai, August 21, 1835, was educated in his native town, and afterwards admitted an advocate. At an early age he was appointed a professor in the University of Brussels. While occupying that position he composed a series of "*Essays on the Relations between the State and Religions, from a Constitutional Point of View*." In 1862 he was elected a Deputy for Tournai in the Liberal interest, and he soon distinguished himself in the Chamber of Representatives by his skill in debate, and by his zealous advocacy of M. Frère-Orban's policy. In

Nov., 1865, he was nominated Minister of Public Justice in the place of M. Victor Tesch, resigned. He held this office until the Conservative party came into power, in July, 1870. When a liberal ministry was formed in June, 1878, M. Bara was again appointed Minister of Justice.

BARDSLEY, The Right Rev. John Wareing, D.D., Bishop of Sodor and Man, born in 1835, at Keighley, in Yorkshire, is the son of late Rev. Canon Bardsley, M.A., Rector of St. Ann's, Manchester. He was educated at Burnley and Manchester Grammar Schools, and at Dublin University, M.A., J.D. He was Vicar of St. Saviour's, Liverpool, 1870-87; Archdeacon of Warrington, 1880-86; Archdeacon of Liverpool, 1886-87; and Bishop of Sodor and Man, 1887. He is the author of "Counsels to Candidates for Confirmation," 1882. "The Origin of Man," Victoria Institute, 1883.

BARING, Sir Evelyn, C.B., K.C.S.I., G.C.M.G., first cousin of the present Lord Northbrook, was born February 26, 1841, and was formerly a European Commissioner of the Public Debt in Egypt, and was appointed one of the Controllers-General, representing England and France, when the Khedive Ismail was deposed by the Sultan's firman in 1879, and Tewfik Pacha became ruler of Egypt. In co-operation with his French colleague, M. de Blignières, Sir Evelyn Baring successfully carried on the Control until he accepted, towards the close of 1880, the office of Finance Minister of India, under the Marquis of Ripon, left vacant by Sir John Strachey's resignation. In this capacity he framed and carried three successful budgets. In May, 1883, he was appointed to succeed Sir Edward Malet, at Cairo, with the status of Minister. He married, in 1876, Ethel, daughter of Sir Rowland Stanley Errington.

BARING-GOULD, The Rev. Sabine, M.A., of Lew-Trenchard, born at Exeter, in 1834, is the eldest son of Edward Baring-Gould, Esq., of Lew-Trenchard, Devon, where the family has been seated for nearly 300 years. He was educated at Clare College, Cambridge, where he took the degree of M.A. in 1856. He was appointed Incumbent of Dalton, Thirsk, by the Viscountess Down in 1869, and Rector of East Mersea, Colchester, by the Crown in 1871. On the death of his father in 1872 he succeeded to the family property, and in 1881 to the rectory of Lew-Trenchard. He is justice of peace for the County of Devon. Mr. Baring-Gould is the author of "Paths of the Just," 1854; "Iceland :

its Scenes and Sagas," 1861; "Post-mediaeval Preachers," 1865; "The Book of Werewolves," 1865; "Curious Myths of the Middle Ages," 1st series 1866, 2nd series 1867; "The Silver Store," 1868; "Curiosities of Olden Times," 1869; "The Origin and Development of Religious Belief," vol. i. 1869, vol. ii. 1870; "The Golden Gate," 1869-70; "In Exitu Israel, an Historical Novel," 1870; "Lives of the Saints," 15 vols., 1872-77; "Some Modern Difficulties, a course of Lectures preached at St. Paul's Cathedral," 1874; "The Lost and Hostile Gospels: an Essay on the Toledoth Jeschu, and the Petrine and Pauline Gospels of the First Three Centuries of which Fragments remain," 1874; "Yorkshire Oddities," 2 vols., 1874; "Some Modern Difficulties," in nine lectures, 1875; "Village Sermons for a Year," 1875; "The Vicar of Morwenstowe," 1876; "The Mystery of Suffering," 1877; "Germany, Present and Past," 1879; "The Preacher's Pocket," 1880; "The Village Pulpit," 1881; "The Last Seven Words," 1884; "The Passion of Jesus," 1885; "The Birth of Jesus," 1885; "Our Parish Church," 1885; "The Trials of Jesus," 1886. "Our Inheritance," 1888; "Old Country Life," 1889; "Historic Oddities," 1889. He was editor of *The Sacristy*, a quarterly review of ecclesiastical art and literature, 1871-73. Of late years Mr. Baring-Gould has won celebrity as a novelist. He is the author of "Mehalah," "John Herring," and "Court Royal," as well as of many short stories.

BARKER, Lady. See BROOME, LADY.

BARKLY, Sir Henry, K.C.B., G.C.M.G., is of Scottish extraction, being the only son of the late Æneas Barkly, Esq., of Ross-shire, an eminent West India merchant in London, where his son was born in 1815. Having received a sound commercial education at Bruce Castle School, Tottenham, he applied himself to business, in which he obtained that practical experience which has placed him in the foremost rank of our colonial administrators. In 1845 he was elected M.P. for Leominster, which constituency he represented till 1849, as a "firm supporter of Sir R. Peel's commercial policy." In 1849 he was appointed Governor and Commander-in-Chief of the settlement of British Guiana (where he owned estates), and during his governorship laid before Parliament some valuable information respecting the colony, advocating the introduction of Coolies and Chinese as labourers. Sir Henry also endeavoured to develop the resources of the colony by

the introduction of railways, and by reconciling the factions which had retarded its advancement. As Governor of Jamaica, from 1853 to 1856, he was equally successful. Sir William Molesworth, Secretary of State for the Colonies, in 1856 appointed him to the important governorship of Victoria, for which his business habits and his large commercial experience peculiarly fitted him; and in 1863 he was appointed Governor of the Mauritius. In August, 1870, he was appointed Governor of the Cape of Good Hope, and he held that office till Dec. 1876. He was appointed High Commissioner for settling the affairs of the territories adjacent to the eastern frontier of the Cape of Good Hope in Nov., 1870. Sir Henry Barkly was created a K.C.B. (Civil division) in 1853, on returning home from British Guiana; and G.C.M.G. in 1874.

BARLOW, William Henry, F.R.S. (L. & E.), Past Pres. Inst. C.E., Hon. Member Société des Ingénieurs Civils, &c., born at Woolwich, 1812; is the son of Prof. Barlow; was educated at Woolwich; pupil of H. R. Palmer, M.I.C.E.; went to Constantinople in 1832 for Messrs. Maudslay & Field; erected the establishment for the re-construction of the Turkish ordnance; and was employed to report on the lighthouses at the entrance of the Bosphorus in the Black Sea. For his services in Turkey he received the decoration of the "Nishan." Returned to England, 1833, he became Assistant Engineer on the Manchester and Birmingham Railway; Resident Engineer on the Midland Counties; and Engineer to the Midland Railway on the formation of that Company. He took offices in London in 1857, and became Consulting Engineer of the Midland Company. He made many of the new lines of the Midland, including the London end of the line and the St. Pancras Station. He was Joint Engineer with Sir J. Hawkshaw for the completion of Clifton Bridge; was the Engineer of the New Tay Bridge; and acted jointly with Sir J. Fowler and Mr. T. Harrison to settle the design of the Firth of Forth Bridge; went to America as one of the Judges of the Centennial Exhibition; and was one of the Vice-Presidents of the Royal Society in 1881. After the labours of Bessemer and others had reduced the cost of obtaining steel, Mr. Barlow took an active part in obtaining the recognition, in the rules and regulations of the Board of Trade, of the superior strength of this material for structural purposes. He served in three Commissions appointed by the Board of Trade. (1.) To settle the co-efficient to be used for steel in

engineering structures. (2.) To enquire into the cause of the fall of the former Tay Bridge. (3.) To report on the provision to be made to resist wind pressure in engineering structures. He was for many years a Director of the Indo-European Telegraph Company; was appointed a member of the Ordnance Committee in 1881, from which duty ill health compelled his retirement in 1888. He has contributed several papers to the "Philosophical Transactions," including one on the "Diurnal Variation of Electric Currents on the Surface of the Earth;" and several papers to the Institution of Civil Engineers. He married Selina Crawford, daughter of W. Caffin, of the Royal Arsenal.

BARNABY, Sir Nathaniel, K.C.B., was born in 1829, at Chatham, and belongs to a family which has produced many generations of shipwrights in the Royal Dockyard there. He was apprenticed to the trade of shipwright at Sheerness in 1843, and in 1848 he won, by competition, an Admiralty Scholarship in the School of Naval Architecture at Portsmouth. In 1854 he superintended the construction of the "Viper" and "Wrangler" gunvessels built by contract for the Royal Navy. In 1855 he entered the designing office at the Admiralty, and during the thirty years he served there he was concerned in the design and construction of all but three of the entire list of sea-going fighting ships, armoured and unarmoured, which were in existence or were building at the date of his retirement, from ill-health, in October, 1885. The exceptions were the "Neptune," "Orion," and "Belleisle." He was appointed Chief Naval Architect in 1872, and afterwards, by change of title, Director of Naval Construction. He was the means of inaugurating the change in construction from iron to steel in shipbuilding in England, which has marked the last few years so notably. He initiated and was responsible for the formation of an Admiralty List of Merchant Ships, having considerable security against foundering in collision, and appreciable fighting value as auxiliaries in war. He was one of the four original founders of the Institution of Naval Architects in 1860, and has contributed many papers on professional subjects to its Transactions, as well as the articles on the "Navy" and "Shipbuilding" to the "Encyclopædia Britannica." He was made a Companion of the Bath in 1876 on the recommendation of Mr. Disraeli, and a Knight Commander of the Bath in June 1885, on the recommendation of Mr. Gladstone.

BARNARD, Henry, LL.D., American educator, was born at Hartford, Connecticut, Jan. 24, 1811. He graduated at Yale College in 1830, studied law, and was admitted to the Bar in 1835. From 1837 to 1840 he was a member of the Connecticut Legislature, and carried through that body a complete re-organization of the common school system, and was for four years (1838-42) a member and secretary of the Board of Education created by it. Displaced by a political change in 1842, he spent more than a year in an extensive educational tour through the United States, with a view to the preparation of a History of Public Schools in the United States. He was called from the prosecution of this work to take charge of the public schools of Rhode Island; and after five years returned to Hartford, in 1849. In 1850 a State Normal School was established in Connecticut, and he was appointed Principal, with the added duties of State Superintendent of Public Schools. After five years of severe labour he retired from this work, but soon began the publication of the *American Journal of Education*, Hartford, in 1855, which is still continued. In addition to this he has been engaged for many years in the publication of a Library of Education, which, in 53 vols., embraces about 800 separate works. He has been President of the American Association for the Advancement of Education, was elected in 1856 President and Chancellor of the University of Wisconsin, which office he resigned in 1859; he was President in 1865-7 of the St. John's College, Annapolis, Maryland, and United States Commissioner of the Department of Education in 1868-70. While secretary of the Board he established the *Connecticut Common School Journal*, and founded, when in Rhode Island, the *Rhode Island School Journal*. His own contributions to educational literature have been so numerous, that but few of them can be mentioned here:—"School Architecture," 1839; "Education in Factories," 1842; "National Education in Europe," 1851; "Normal Schools in the United States and Europe," 1851; "Tribute to Gallaudet with History of Deaf Mute Instruction," 1852; "School Libraries," 1854; "Hints and Methods for the Use of Teachers," 1857; "English Pedagogy," 1862; "National Education," 1872; "Military Schools," 1872; "American Pedagogy," 1875.

BARNEY, Joseph, musician, was born at York, Aug. 12, 1838; was Chorister in York Minster, 1846-52; Student at the Royal Academy of Music, 1854-57; Organist St.

Andrew's, Well Street, 1863-71; Organist St. Anne's, Soho, 1871-86; Conductor of Oratorio Concerts at St. James's and Exeter Halls, 1865-72. He succeeded Gounod as conductor of the Royal Albert Hall Choral Society, 1872; and was appointed Precentor and Director of Musical Instruction at Eton College, 1875. His Compositions are:—Motett, "King all Glorious," produced at St. James's Hall, 1868; Oratorio, "Rebekah," produced 1870; Cantata (Psalm cxvii.), Leeds Festival, 1883; and many hundreds of Services, Anthems, Part Songs, Trios, Songs, Hymn Tunes, Chants, &c. He conducted the first Passion Service in England at Westminster Abbey, 1871; State Receptions of the Shah at the Royal Albert Hall, 1873 and 1889; State Reception of the Czar, 1874; Opening of the Fishery and Colonial Exhibitions, and other Royal and State Functions.

BARNETT, Rev. Samuel Augustus, M.A., was born in 1844, and educated at Wadham College, Oxford, where he took a Second in Mods. and in 1865 a Second in History. He was ordained deacon in 1867, and priest in 1868, and was from 1867-72 curate of St. Mary's, Bryanston Square. He was then appointed Vicar of St. Jude's, Whitechapel. There has hardly been a scheme for the elevation or education of the people of East London which he and Mrs. Barnett have not initiated or supported. Their names are identified with Poor Law Reform, the Extension of University Teaching, Charity Organisation, the Children's Country Holidays Fund and many other philanthropic movements. With the help of friends from Oxford and elsewhere, Mr. Barnett has built "Toynbee Hall," close to St. Jude's Church, a kind of college, dedicated to the memory of the late Arnold Toynbee, which forms a centre for university men who come and settle for a time to work among the poor. The success of his free exhibitions of loan-collections of pictures is attested by the increased number of people—many of them of the humblest classes—who every year crowd to see them. In theology Mr. Barnett belongs to the Broad Church School.

BARNUM, Phineas Taylor, was born at Bethel, Connecticut, July 5, 1810. He began business at the age of thirteen, and in 1834 removed to New York, where in 1841 he purchased the American Museum, by which in a few years he acquired a fortune. In 1844-6 he exhibited the dwarf, General Tom Thumb, in Great Britain and France, appearing

before the crowned heads and nobility and reaping a large pecuniary harvest. In 1850 he engaged Jenny Lind to visit America. She gave 93 concerts under his management, the receipts of which amounted to \$712,000 in a period of nine months. In 1847 he took up his residence in Bridgeport, Connecticut, where (in addition to his New York Museum) he engaged largely in real estate. Through endorsing the obligations of a Clock Manufacturing Company which promised to remove its plant to the new city of East Bridgeport of which Mr. Barnum was the founder and principal owner, he became bankrupt. Having effected a compromise with the "Clock" creditors, he resumed the management of the museum and soon retrieved his fortunes. Mr. Barnum served four times in the Connecticut Legislature (1865, 1866, 1877 and 1878), was elected Mayor of Bridgeport in 1875, and was an unsuccessful candidate for Congress in 1866. In 1857 his palatial residence "Iranistan" was destroyed by fire, since which time his great museums and menageries have been burnt four times (1865, 1868, 1872 and 1877). His entire losses by these fires, exceeding two millions of dollars, he has borne with remarkable equanimity and cheerfulness. Mr. Barnum has lectured in England and America on temperance, "The World and how to live in it," and other topics; and besides some smaller works has published "The Life of P. T. Barnum written by himself," to which he adds an appendix annually. In October, 1889, Mr. Barnum transported his entire "Greatest Show on Earth" to London at an expense of two hundred thousand dollars. He exhibited it a hundred days in that city with marked success, and brought it directly back to New York without accident. He received many social attentions and civilities from the nobility and most distinguished personages in Great Britain. His latest publication, "Funny Stories Told by P. T. Barnum," was published by Messrs. Routledge & Sons simultaneously in London and New York in June, 1890.

BARODA, The Maharajah Gaekwar of, His Highness Maharajah Syagi Rao Gaekwar was born on the 10th of March 1863, at the town of Kavalana in the Nassick District, and is the son of the late Rao Bhikaji Rao Gaekwar. He was educated at the "Maharajah's School" at Baroda, under the personal supervision and tuition of Mr. F. Elliot, of the Indian Civil Service. It will be in the memory of our readers how the late

Gaekwar, Mulhar Rao, for his attempt to poison Colonel Phayre, the British Resident, and for continual and gross misgovernment, was, after being tried by a mixed commission of European officials and native chiefs, deposed from his government and sent into exile at Madras, where he died at the end of 1882. On Mulhar Rao's deposition, and with the consent of the Earl of Northbrook, then Viceroy of India, the Maharanee Junna Bai adopted, on the 27th of May, 1875, the present Maharajah, who was on the same day installed on the *guddee* or throne. During the minority of the Maharajah the administration was carried on by a Council of Regency under the direction of the European representative; and Raja Sir Tadjore Madhava Rao, Bahadoor, K.C.S.I., who was the Dewan to His Highness Maharajah Scindiah of Gwalior, was specially selected to fill the post of Prime Minister, together with a seat at the Regency Board. On the 28th December, 1881, and at the early age of 18, His Highness was invested with full and sovereign powers, and since he has held the reins of state, he has, with the assistance of Sir Madhava Rao, whom he has retained as his Prime Minister, given satisfaction by his aptitude for work and desire to introduce reforms. His Highness is an excellent English scholar, speaking the language as fluently as his own.

BARR, Mrs. Amelia Edith, née Huddleston, was born at Ulverston, Lancashire, March 29, 1831. She was educated at the Glasgow High School, and in 1850 married Mr. Robert Barr. In 1854 she went to the United States, and after residing for a few years at Austin, Texas, removed to Galveston in the same state, where, in 1867, her husband and three sons died of yellow fever. She went to New York in 1869 with her daughters, and taught for two years, and then began writing for publication. In addition to newspaper and magazine contributions, she has published "Romance and Reality," 1872; "Young People of Shakespeare's Time," 1882; "Cluny McPherson," 1883; "Scottish Sketches," 1883; "The Hallam Succession," 1884; "The Lost Silver of Briffault," 1885; "Jan Vedder's Wife," 1885; "A Daughter of Fife," 1886; "The Last of the McAllisters," 1886; "The Bow of Orange Ribbon," 1886; "Between Two Loves," 1886; "The Squire of Sandal-Side," 1887; "Paul and Christina," 1887; "A Border Shepherdess," 1887; "Master of his Fate," 1888; "Remember the Alamo," 1888; "Christopher and other

Stories," 1888; and "Feet of Clay," 1889. A serial entitled "Friend Olivia" is now (1890) running in *The Century Magazine*.

BARRETT, Lawrence, American actor, was born at Paterson, New Jersey, April 4, 1838. His first appearance on the stage was in 1853 at Detroit, as Murad in "The French Spy." For a year he played there in various minor characters; then acted at Pittsburg, St. Louis, Chicago and elsewhere till the latter part of 1856, when he went to New York, where his first representation was Sir Thomas Clifford in "The Hunchback." Under an engagement with Mr. Burton he stayed at New York for about two years and then went to Boston, taking leading parts until the outbreak of the Civil War (1861), in which he served for a time with distinction as a captain in an infantry regiment. He resumed his acting at Philadelphia, and thence went again to Boston and New York. Later he acquired an interest in the management of a New Orleans theatre, where, for the first time, he assumed the rôles of Shylock, Hamlet and Richelieu. He made his first starring tour as the leading character of Wallack's "Rosedale" in 1864. From 1867 to 1870 he was manager of a San Francisco theatre; and in 1871-2 he took charge again of the New Orleans theatre. In 1870 he played leading parts with Edwin Booth, and the two have repeatedly acted together since. At the great revival of "Julius Cæsar" in New York in 1875, Mr. Barrett took the part of Cassius, and later he appeared as Lear, as Iago, Othello, Brutus, Lanciotto (in "Francesca di Rimini"), and numerous other characters, in addition to the parts already named. He has made many tours throughout the United States, both alone and with Mr. Booth, and has visited England a number of times, appearing in his favourite rôles. A "Life of Edwin Forrest" was published by him in 1881.

BARRETT, Wilson, actor, is the son of a gentleman-farmer, and was born in Essex, on Feb. 18, 1846. He was educated at a private school, and entered the dramatic profession by his own choice at an early age. His first appearance on any stage was at Halifax. Mr. Barrett first essayed management as the lessee of the Burnley Theatre. In 1874 he took the Amphitheatre at Leeds; this house was destroyed by fire in 1876, and a limited company then built the Grand Theatre, Leeds, which was opened, with Mr. Barrett as lessee in 1878. Mr. Barrett

is also the lessee of the Grand Assembly Room, Leeds, and the Theatre Royal, Hull. In 1879 he undertook the management of the Court Theatre, London. Here he produced "Heartsease;" an adaptation of Schiller's "Marie Stuart;" "The Old Love and the New." In 1881, Mr. Barrett became sole lessee and manager of the Princess's Theatre. He revived "The Old Love and the New." In the following September he produced Mr. G. K. Sims' drama, "The Lights o' London," and played Harold Armytage for over 200 nights. "The Romany Rye," by the same author, was produced in 1882; and the "Silver King" in the same year. In this drama Mr. Barrett created the part of Wilfred Denver, which he played for 300 consecutive nights. In Oct. 1884 he made his first appearance in London as Hamlet. "Hamlet" was played for 117 nights, and then Mr. Barrett appeared as Junius Brutus in the late Lord Lytton's tragedy, "Junius; or, The Household Gods." This was followed by revivals of "The Silver King" and "The Lights o' London." In 1885, Mr. Barrett produced the drama "Hoodman Blind," written by Mr. Henry A. Jones and himself, in which he played Jack Yeulett for 171 nights. Mr. Barrett is also part author with Mr. Clement Scott of the modern drama "Sister Mary," produced at Brighton in 1886, and with Mr. Sydney Grundy of the classical tragedy "Clito," which followed "The Lord Harry" at the Princess's. He subsequently produced "Good Old Times," in collaboration with Mr. Hall Caine; and in 1889 his romantic drama of "Now-a-days." On May 18 of that year he took farewell of his patrons for a long engagement in America.

BARRIE, J. M., was born on May 9, 1860, at Kirriemuir, a small weaving town in Forfarshire. He attended school there, and afterwards went for five years to Dumfries Academy. Subsequently he took the art-classes at Edinburgh University, and graduated as an M.A. in 1882. He was for eighteen months leader-writer on a Nottingham paper; then became a journalist in London, writing chiefly for the *St. James's Gazette*, to which paper and the *British Weekly*, the *Speaker*, and the *Scots Observer*, he still frequently contributes. His first book, "Better Dead," a satire on London life, appeared in 1887, and was followed by two more important works the following year, namely "Auld Licht Idylls," and "When a Man's Single." In 1889 he published "A Window in Thrums," and in 1890 "My Lady

Nicotine." The "Thumbs" of three of these stories is his native town.

BARROW-IN-FURNESS, Bishop of. See WARE, THE RIGHT REV. HENRY.

BARRY, The Right Rev. Alfred, D.D., D.C.L., late Bishop of Sydney, is the second son of the late eminent architect, Sir Charles Barry, and was born in 1826. He was educated at King's College, London, and at Trinity College, Cambridge, where he graduated B.A. as fourth Wrangler, second Smith's prizeman, and seventh in the first class of the Classical Tripos in 1848, obtaining a fellowship in the same year. Dr. Barry, who was ordained in 1850, was from 1851 to 1854 Sub-Warden of Trinity College, Glenalmond; and subsequently held from 1854 to 1862 the Head Mastership of the Grammar School at Leeds, which he raised to a very high position by his energy and ability; and in 1862 he was appointed to the Principalship of Cheltenham College. In 1868 he became Principal of King's College, London; in 1869 Examining Chaplain to the Bishop of Bath and Wells; in 1871 was made a Canon of Worcester; in 1875 Honorary Chaplain, and in 1880 Chaplain in Ordinary to the Queen; and in 1881 Canon of Westminster. He was also a member of the London School Board from 1871 to 1877. On Jan. 1, 1884, he was consecrated Primate of Australia, Metropolitan of New South Wales, and Bishop of Sydney, which office he resigned in May, 1889, and is now acting as Bishop Coadjutor in the diocese of Rochester. Dr. Parry is the author of an "Introduction to the Old Testament," "Notes on the Gospels," "Life of Sir C. Barry, R.A.," "Cheltenham College Sermons," "Sermons for Boys," "Notes on the Catechism," "Religion for Every Day; Lectures to Men," 1873, "What is Natural Theology?" the Boyle Lectures for 1876, "The Manifold Witness for Christ," the Boyle Lectures for 1877, 1878, &c.

BARRY, Charles, F.S.A., is the eldest son of the late Sir Charles Barry, and was born in 1823. He showed an early desire to be an architect, and was educated for the profession in his father's office, and was for several years assisting him in various important works, both public and private, including the New Houses of Parliament. His health failing, in 1846 he went abroad and travelled through France, Germany, and Italy, studying the architectural works in those countries, and was absent 1½ years. He did not return to his father's office, but

at his recommendation started practice on his own account, associating with him as partner the late Robert E. Banks, Esq., who had for some years been one of the principal assistants of Sir Charles. This association (which was founded on sincere personal friendship as well as artistic sympathy) remained unbroken till the death of Mr. Banks in 1872. During that time, and since, Mr. Barry has had an extensive and varied practice. In 1856, at the International competition for the "Government Public Offices," the design sent in by his partner and himself was placed second in merit by the assessors for the then projected Foreign Office; the work was however given (after strong remonstrances) to Sir Gilbert (then Mr.) Scott, whose design had obtained only the third place. Among his more public works may be named the New Burlington House, Piccadilly, the New College at Dulwich, and the large Industrial School at Feltham for the County of Middlesex. Among a large number of works for private clients may be mentioned "Bylaugh Hall," Norfolk, "Stevenstone," North Devon, for the Hon. Mark Rolle, and the almost rebuilding "Clumber House," Nottinghamshire, for the Duke of Newcastle. Mr. Barry has since 1858 held the office of architect and surveyor to the Dulwich estate, and has erected there several churches, and a large number of private residences, besides his work at the old College and the erection of the new College. In 1876 Mr. Barry was elected President of the Royal Institute of British Architects, and held that office for three years. In 1878 he was one of the Royal Commission for the French Universal Exhibition for that year, and acted therein as the sole representative British Member of the small International Jury of the Fine Arts Section for making the awards for Architecture from the various countries therein represented. In recognition of this service the French Government, at the instance of the Prince of Wales, conferred on him the distinction of the Cross of an Officer of the Legion of Honour. In 1877 Mr. Barry received from his colleagues of the Royal Institute of British Architects the Queen's Gold Medal of the Institute, which is awarded once in three years to an architect of eminence. He is an Honorary Member of the Academies of Fine Arts at Vienna and Milan, and was elected a Fellow of the Society of Antiquaries of London in 1876, and is one of the original members of the Surveyors' Institution. Mr. Barry has been from its foundation a Member of Council of the City and Guilds of London Institute, and has always taken

an active part in the proceedings of that body.

BARRY, The Right Hon. Charles Robert, born at Limerick, in 1834, received his academical education at Trinity College, Dublin, was called to the Irish Bar in 1845, was made a Queen's Counsel in 1849, and was the first Crown Prosecutor in Dublin from 1859 to 1865. Mr. Barry was law adviser to the Crown from 1865 to 1869, during which period he represented Dungarvan, in the House of Commons. He was appointed Solicitor-General for Ireland in 1869, and Attorney-General in Jan., 1870, succeeding, in the latter office, Mr. Sullivan, who had been appointed Master of the Rolls in Ireland. In Dec., 1871, he was appointed a Judge of the Queen's Bench in Ireland, in the room of the Right Hon. John George, deceased. In Aug., 1878, he was nominated a member of the Royal Commission appointed to inquire into the provisions of the draft Code relating to Indictable Offences. In June, 1883, he accepted the office of Lord Justice of Appeal, vacant by the death of Lord Justice Deasy.

BARRY, John Wolfe, M.I.C.E., is the fifth and youngest son of the late Sir Charles Barry, R.A., and was born in 1836. He was educated at Trinity College, Glendalmond (where his elder brother, the Rev. Alfred Barry, afterwards Bishop of Sydney and Primate of Australia, was sub-warden), and at King's College, London. To acquire a practical knowledge of work, he was placed with Messrs. Lucas Brothers, and was afterwards articled to Mr. (now Sir John) Hawkshaw. While with Sir John Hawkshaw, he was engaged as Resident-Engineer on the bridges over the Thames and the large stations at Charing Cross and Cannon Street. On leaving Sir John Hawkshaw's service in 1867, he commenced practice on his own account, and has carried out the Lewes and East Grinstead Railway; the Earl's Court Station, and the Ealing and Fulham Extensions of the Metropolitan District Railway; the St. Paul's Station and the new bridge over the Thames at Blackfriars; the railways for the completion of the "Inner Circle" (in conjunction with Sir John Hawkshaw); the Barry Dock, near Cardiff (the largest single dock in the United Kingdom), and railways connecting it with the South Wales coalfield; and very many less important undertakings. Mr. H. M. Brunel, son of the late I. K. Brunel, joined Mr. Barry in partnership in 1878, and has been associated with him in most of the above

works. Mr. Barry is now carrying out for the Corporation of London the Tower Bridge, which work was commenced in conjunction with Sir Horace Jones, the City Architect (since deceased), to whom were entrusted the architectural features of the bridge, as distinguished from the engineering work. In 1872 Mr. Barry visited the Argentine Republic and laid out a railway from Buenos Ayres to Rosario. In 1886 the Government appointed Mr. Barry on the Royal Commission on Irish Public Works, and important legislation, based on the Reports of the Commission, has taken place on the subjects of drainage, light railways, and fishery harbours. In 1889 he was nominated by the Board of Trade, jointly with Admiral Sir George Nares, K.C.B., and Sir Charles Hartley, K.C.M.G., on a commission ordered by Parliament to settle certain important matters connected with the River Ribble; and, in December, 1889, he was appointed, by the Government, on the Western (Scottish) Highlands and Islands Commission, a commission having objects similar to those of the Royal Commission on Irish Public Works. Mr. Barry is a Member of Council of the Institution of Civil Engineers; a Member of the Institution of Mechanical Engineers; Associate of Council of the Surveyors' Institution; a Fellow of the Royal Institution; and a Lieut.-Colonel in the Engineer and Railway Volunteer Staff Corps. He is the author of a small volume, "Railway Appliances," in the Text-books of Science Series (Longmans, 1876), and of a course of lectures delivered at the School of Military Engineering, Chatham, in conjunction with Sir F. J. Bramwell, on the "Railway and the Locomotive," published in 1882.

BARTHELEMY-SAINT-HILAIRE, Jules, member of the Institution, was born in Paris, Aug. 19, 1805, and was at first attached to the Ministry of Finance in 1825; but this did not prevent him from writing in the *Globe*, and he signed the protestation of the journalists, July 26, 1830. After the revolution he founded the *Bon Sens*, and, as a Liberal he took an active part in politics writing with Carrel in *Le National*; but towards the close of 1833 he showed signs of a desire to renounce political life, and to apply himself to literature. In 1834 he was made tutor of French literature in the Polytechnic School, and undertook about the same time a complete translation of the works of Aristotle, which served as a pendant to the translation of Plato, published by Cousin. For this service he was in

1838 appointed to the chair of Greek and Latin Philosophy in the College of France, and in 1839 was admitted into the Academy of the Moral and Political Sciences. The revolution of February again drew him into the political arena, and he entered the Constituent Assembly, and became one of the chiefs of the Republican *tiers-parti*. He did not oppose the candidature of Louis Napoleon, and supported the administration of M. Odilon Barrot. After the *coup d'état* of Dec. 2, 1851, and the downfall of the parliamentary system, he refused to take the oath, and resigned the chair in the College of France. At the general election of 1869 he was returned to the Corps Législatif as deputy for the first circonscription of Seine-et-Oise. He voted with the extreme Left, and was one of those who signed the manifesto after the disturbances caused by the funeral of the Deputy Baudin. During the siege of Paris he remained in the capital, which he quitted after the armistice, in order to take his seat in the National Assembly, having been elected a deputy for the department of Seine-et-Oise. He was a zealous supporter of his old friend M. Thiers, to whom he acted as General Secretary. He was elected a life Senator by the National Assembly, Dec. 10, 1875, and took his seat among the Republican minority. At the termination of the ministerial crisis, occasioned by the execution of the decrees against the unauthorized religious communities, he accepted the portfolio of Foreign Affairs, in succession to M. de Freycinet, in the Cabinet which was reconstituted under the presidency of M. Jules Ferry (Sept. 23, 1880). His principal works are a very important series of translations of the works of Aristotle; "De l'Ecole d'Alexandrie," report to the Institute, preceded by an "Essai sur la Méthode des Alexandrins et le Mysticisme," 1845; "Des Vedas," 1854; "Du Bouddhisme," 1855; "Le Bouddha et sa Religion," 1866; "Mahomet et le Coran," 1867; "Mémoire sur le Sankhya, dans les Mémoires de l'Académie des Sciences morales et politiques," "Pensées de Marc-Aurèle," 1876; "L'Inde Anglaise," 1887; "La philosophie dans ses rapports avec les Sciences et la Religion," 1889; "François Bacon," 1890.

BARTHOLDI, Augusta, was born at Colmar (Alsace), was intended for a lawyer, but Ary Scheffer, who was a friend of the family, recognized his latent artistic talent, and the use of Ary Scheffer's studio was the turning point of a life subsequently noteworthy for the production of the Lion de Belfort and

the gigantic Liberté éclairant le Monde, which, constructed in copper, on an internal iron frame designed by M. Eiffel, was, in 1884, presented by the French Committee to the United States, and has since been erected at the entrance to the harbour of New York. It is by far the largest bronze statue in the World, being 150 ft. high, or higher than the column in the Place Vendôme at Paris, and than (according to repute) even the Colossus of Rhodes.

BARTELOT, Sir Walter Barttelot, Bart., M.P., eldest son of the late George Barttelot, Esq., of Stopham House, Pulborough, was born in 1820, and educated at Rugby. He entered the 1st Royal Dragoons in 1839 and served until 1853, when he retired. In 1860 he entered Parliament as Conservative member for West Sussex, and continued to represent the same constituency until 1885, when, after the Redistribution Act, he was returned for the new Division of Horsham, North West Sussex, with a majority of over 2,000, and again returned unopposed in 1886. Throughout these years he has been regarded as a typical county member, and has taken a keen interest in all matters connected with the magistracy, the land-laws, game-laws, &c. He has also taken an active part in all questions relating to the Army. In 1875, in return for his active services on behalf of the Conservative party, he was created a Baronet by Mr. Disraeli. He is a magistrate and Deputy-Lieutenant for the county of Sussex, he is also a County Councillor, and an Hon.-Colonel of the 2nd Rifle Volunteer Battalion Royal Sussex Regiment.

BASING, Lord, The Right Hon. George Slater-Booth, F.R.S., P.C., son of the late William Lutley Slater, Esq., of Hoddington House, Hampshire, by Anne Maria, daughter of the late William Bowyer, Esq., was born in London in 1826. From Winchester School, where he obtained the gold medal for Latin verse, he proceeded to Balliol College, Oxford (B.A. 1847). He was called to the Bar of the Inner Temple in 1851. In 1857 he assumed, by royal licence, the name of Booth in addition to his patronymic; and in the same year he was elected M.P. for North Hampshire, which constituency he has continued to represent in the Conservative interest down to the present time. During the first ten years of his Parliamentary career Mr. Slater-Booth was a frequent and active member of Select Committees, and became very conversant with the

public and private business of the House of Commons. As Secretary to the Poor Law Board in 1867 he represented that department in the Lower House, his chief, Lord Devon, being the first peer who had ever filled the office of President. On the resignation of Lord Derby in Feb., 1868, the following year, Mr. Scater-Booth was appointed to the Secretaryship of the Treasury in the room of Mr. Hunt, who became Chancellor of the Exchequer. He passed the estimates through the House of Commons, and conducted the financial business of the Treasury till the general election of 1868, when Mr. Disraeli's Government resigned. During Mr. Gladstone's administration (1868-74) Mr. Scater-Booth's attention continued to be constantly directed to public business, and he served during the greater part of that time as Chairman of the important Committee on Public Accounts. On the formation of Mr. Disraeli's Government in 1874, he was sworn in as a Privy Councillor, and appointed to the office of President of the Local Government Board, which he held till the Conservatives resigned in April, 1880. During the period of Mr. Gladstone's administration, 1880-1885, Mr. Scater-Booth acted as Chairman in conducting the new experiment of Grand Committees. He is chairman of the Hants County Council, and official Verderer of the New Forest. On the occasion of Her Majesty's Jubilee, in 1887, Mr. Scater-Booth was raised to the peerage by the style of Baron Basing of Basing Byflete and Hoddington in the County of Hampshire.

BASSET, Alfred Barnard, M.A., F.R.S., is the only son of the late Mr. Alfred Basset of London, and was born on July 25, 1854. His father died during his childhood, and he was brought up by his grandfather. He was educated at Grove House School, Tottenham, entered Trinity College, Cambridge, in Oct., 1873, and was elected to a foundation scholarship in April, 1876. He graduated B.A. in 1877, having been 13th Wrangler in the Mathematical Tripos of that year. After leaving Cambridge, he studied law in the chamber of Mr. John Rigby, Q.C., and was called to the Bar on June 20, 1879; but after the expiration of a few years he gave up the practice of his profession, and resumed the study of Mathematics. He was elected a Fellow of the Royal Society on June 8, 1889, and is the author of a "Treatise on Hydro-dynamics," in two volumes, and also of several papers on Mathematical Physics.

BASTIAN, Professor Henry Charlton, M.D., F.R.S., F.L.S., was born at Truro, in Cornwall, April 26, 1837, and educated at a private school at Falmouth, and in University College, London. He graduated M.A. in 1861, M.B. in 1863, and M.D. in 1866; these degrees being conferred by the University of London. He was elected F.R.S. in 1868, and F.R.C.P. in 1871. Dr. Bastian is a Fellow of several Medical Societies; he is also a Corresponding Member of the Royal Academy of Medicine of Turin, and of the Soc. Psychol. Physiolog. of Paris. In 1836 he was appointed Lecturer on Pathology, and Assistant-Physician to St. Mary's Hospital. These posts he held until his appointment as Professor of Pathological Anatomy in University College, and Assistant-Physician to University College Hospital in Dec., 1867. He was elected a physician to this hospital in 1871; and in 1878, on taking charge of in-patients, a professorship of Clinical Medicine was conferred upon him. In 1887 he resigned the Chair of Pathological Anatomy at University College, and was elected Professor of the Principles and Practice of Medicine. Dr. Bastian was Dean of the Faculty of Medicine in University College during the sessions 1874-5 and 1875-6; he served as Examiner in Medicine to the Queen's University in Ireland for 1876-79, and he has discharged similar duties for the University of Durham, and for the Royal College of Physicians of London. In 1887 the honorary degree of M.D. was conferred upon him by the Royal University of Ireland, and he was elected an Honorary Fellow of the King and Queen's College of Physicians in Ireland. For some years past he has acted as one of the Crown Referees in cases of Supposed Insanity. Dr. Bastian has published the following works:—"The Modes of Origin of Lowest Organisms," 1871; "The Beginnings of Life," 2 vols., 1872; "Evolution and the Origin of Life," 1874; "Clinical Lectures on the Common Forms of Paralysis from Brain Disease," 1875; "The Brain as an Organ of Mind," 1880 (the latter work has been translated into French and German); and "Paralyses; Cerebral, Bulbar, and Spinal," 1886. He is also the author of "Memoirs on Nematoids: Parasitic and Free," in the *Philosophical Transactions* and the *Transactions of the Linnæan Society*. In his monograph on the Anguillulidæ he described 100 new species discovered by him in this country. Dr. Bastian is the author of numerous papers on Pathology and Medicine, in the *Trans. of the Pathological and Medico-Chirurgical Societies*;

of papers on the more recondite departments of Cerebral Physiology in the *Journal of Mental Science, Brain*, and other periodicals; and of some joint articles with the editor in Dr. Reynold's "System of Medicine." Dr. Bastian is likewise one of the principal contributors to Quain's "Dictionary of Medicine" (1882), having written nearly the whole of the articles on Diseases of the Spinal Cord, as well as many others on Diseases of the Nervous System.

BATEMAN, Kate Josephine. See CROWE, MRS. GEORGE.

BATES, Henry Walter, F.R.S., was born Feb. 8, 1825, at Leicester, of middle-class parentage, educated at Commercial Schools of the town, and at Billesdon, and in due time was placed with a manufacturing firm as the commencement of a mercantile career. He evinced, at an early age, a love for Natural History, which was gratified by long, and mostly solitary, country rambles, and by the study first of Botany and Geology, afterwards of Entomology. In 1848 he threw up his prospects in commercial life, and arranged with Mr. A. R. Wallace a joint voyage to South America and exploration of the valley of the Amazons. March of that year was spent in visiting the museums and botanical gardens of London, and making arrangements for the disposal of the collections which they would send home. He sailed from Liverpool for Pará April 26. Mr. Wallace returned to England in 1852, and Mr. Bates remained, carrying his investigations to the upper river, his last station being 1,800 miles distant from the Atlantic. He returned to England in July, 1859; and published his narrative, "The Naturalist on the River Amazons," in 1863. The more technical scientific results were published at intervals in the journals of various scientific societies, and in the "Annals of Natural History," in a series of Memoirs beginning in 1861. His paper on "Mimetic Resemblances as illustrated by the Heliconiæ," in which the now generally accepted theory of these phenomena was propounded, appeared in the transactions of the Linnean Society in 1862. He was elected F.R.S. in 1881. In April, 1864, he was appointed Assistant-Secretary and Editor of publications to the Royal Geographical Society, a post he still retains.

BAVARIA, Regent of. See LUITPOLD, PRINCE CHARLES JOSEPH WILLIAM.

BAYARD, The Hon. Thomas Francis, American statesman, was born at Wilmington, Delaware, Oct. 29, 1828. He at first entered mercantile life, but abandoned it for the study of law, and was admitted to the Bar in 1851. In 1853 he was appointed U. S. District Attorney for Delaware, but resigned in 1854. In 1869 he succeeded his father as U. S. Senator from Delaware, and was successively re-elected in 1875 and 1881, retaining the position until March, 1885, when he entered Mr. Cleveland's Cabinet as Secretary of State. He was for many years regarded as the leader of the Democratic party in the Senate, was for a short time its presiding officer, and was the principal competitor with Mr. Cleveland for the presidential nomination in 1884. Since the close of Mr. Cleveland's administration in 1889 Mr. Bayard has held no public office.

BAYER, Karl Emmerich Robert, an Austrian writer, generally known by his *nom de guerre* of Robert Byr, was born at Bregenz in the Tyrol, April 15, 1835 and received his education in the Military Academy at Wiener-Neustadt, which he left on his appointment as lieutenant in the Count Radetzky's Hussar Regiment. In 1859 he was advanced to the rank of captain, and during the Italian campaign he was placed on the general staff. After the conclusion of peace, Bayer began his literary career by the publication of his "Sketches of Military Life" (*Kantonierungsbilder*, 1860). In 1862 he retired from active service and settled in his native town, where he still continues to reside. Bayer is chiefly known to fame as a novelist; his tragedy "Lady Gloster" (1872), being his only essay in dramatic composition. Military life he has described in his first work, already mentioned, in "Austrian Garrisons" ("Oesterreichische Garnisonen," 1863), and in "Quarters" ("Auf der Station," 1866). His "In the years Nine and Thirteen" ("Anno Neun und Dreizehn," 1865), contain biographical sketches of actors in the German war of Independence. To another class of works belong the following novels: "The Home of a

German Count" ("Ein deutsches Grafenhaus," 1866); "With a Brazen Face" ("Mit eherner Stirn," 1868); "The Struggle for Life" ("Der Kampf ums Dasein," 1869); "Sphinx," 1879; "Nomaden," 1871; "Ruin" ("Trümmer," 1871); "Quatuor," a collection of tales, 1875; "Ghosts" ("Larven," 1876); and "A Secret Despatch" ("Eine geheime Depesche," 1880); and "Sesam," 1880. "The Path to the Heart" ("Der Weg zum Herzen," 1881); "Turn of Life" ("Am Wende punkt des Lebens," 1881); "Implacable" ("Unversöhnlich," 1882); "Lydia," 1883; "Andor," 1883; "Am I to do it?" ("Soll Ich?" 1884); "Castell Ursani," 1885; "Dora," 1886; "Villa Mirafior," 1886; "Will-of-the-Wisp" ("Irreische," 1887); "The Path to Fortune" ("Der Weg zum Glück," 1889); "Woodidyl" ("Waldidyll," 1889). He has also written plays which have been performed in public.

BAYLEY, Sir Stewart Colvin, K.C.S.I., C.I.E., Secretary in the Political and Secret Department of the India Office, formerly Lieutenant-Governor of Bengal, was educated at Haileybury, and arrived in India in 1856. His first post was that of assistant-magistrate and collector of the 24 Pergunnahs, and he subsequently rose through various grades till he was appointed Commissioner of the Dacca division in 1873. Four years later he was acting as personal assistant to the Viceroy for famine affairs. His more recent appointments have been—Chief Commissioner of Assam, June, 1880; Resident at Hyderabad (Nizam's dominions), March, 1881; a member of the Governor-General's Council, May, 1882; and Lieutenant-Governor of Bengal, April, 1887.

BAYLY, Miss Ada Ellen, "Edna Lyall," is the youngest daughter of the late Robert Bayly of the Inner Temple, barrister-at-law. She was born and educated at Brighton, and at an early age made up her mind to write. Her first story, "Won by Waiting," was published in 1879. This was followed by "Donovan," 1882; "We Two," 1884; "In the Golden Days," 1885; "Knight-Errent," 1887; "Autobiography of a Slander," 1887; "Derrick Vaughan, Novelist," 1889; "A Hardy Norseman," 1889. Like some other writers, "Edna Lyall" has been a good deal annoyed by an impostor who assumes her name, and who presumably was the original cause of the false reports as to the author's mental health, which, despite rumour, has always been excellent, and her creed which has

always been, and still remains, that of the Church of England.

BAYNE, Peter, M.A., LL.D., born in the manse of Fodderty, Ross-shire, Scotland, Oct. 19, 1830, was educated at Marischal College, Aberdeen, where he took his M.A. degree. He was the winner of a prize for a poem, open to competition by the whole university, and after taking his degree he won the Blackwell prize (£40) for a prose essay. He was appointed successively editor of the *Glasgow Commonwealth*, the *Edinburgh Witness*, the *Dial*, and the *Weekly Review*, the last two published in London. His biographical sketches in an Edinburgh magazine attracted attention, and led to the publication, in 1855, of "The Christian Life in the present Time," followed by two volumes of Essays published in America, 1857. A volume of Biographical and Critical Essays, a treatise on "The Testimony of Christ to Christianity," and an historical drama on "The Days of Jezebel," written by him, have been published in this country. His "Life and Letters of Hugh Miller" appeared in 1871. A volume on "The Chief Actors in the Puritan Revolution," appeared in 1878. He has since written "Lessons from my Masters," and "Two Great Englishwomen, with an Essay on Poetry." He has been a contributor to the *Contemporary*, *Fortnightly*, *British Quarterly*, *London Quarterly Reviews*, *Fraser*, *Blackwood*, and other magazines. In 1879 the University of Aberdeen presented him with the degree of LL.D. For upwards of twenty years Dr. Bayne has occupied an important place on the staff of the *Christian World*, advocating liberal opinions both in theology and in politics. In the latter part of 1883, he became engaged in the composition of an original Life of Martin Luther, and the book was published in 1887. It was considered by Protestants generally as giving a life-like presentation of the Reformer, and it deeply offended High Churchmen by its vehement repudiation of Newmanite and Tractarian views.

BAZALGETTE, Sir Joseph William, K.C.B., son of the late Captain Joseph William Bazalgette, R.N., was born at Enfield, Middlesex, in 1819. At the age of eighteen he was articled as pupil to Sir John MacNiel, C.E. In 1845 he was practising on his own account as an engineer in Great George Street, Westminster. In November of the year in which the railway mania began he was at the head of a large staff of engineering assistants, designing and

laying out schemes for railways, ship canals, and other engineering works in various parts of the United Kingdom, and preparing the surveys and plans for parliamentary deposit, which had to be accomplished by the last day of November. While his remarkable success was most encouraging, its effects soon began to tell upon his health, which completely gave way in 1847; and he was compelled to retire from business and go into the country, where a year of perfect rest restored him to health. In 1848 he accepted an appointment as assistant-engineer under the Metropolitan Commission of Sewers. On the death of the chief engineer of the Commissioners in 1852, Mr. Bazalgette was selected from among thirty-six candidates to fill the vacant position, being first appointed under the title of General Surveyor of Works, and soon afterwards of Chief Engineer. His report on the failures of the new system of drainage in certain provincial towns led to the resignation of the Commissioners, and the appointment of a new Commission by Lord Palmerston. Mr. Bazalgette was elected engineer to the Metropolitan Board of Works on its establishment in 1856, and was instructed to devise a scheme for the drainage of London. Accordingly, he prepared estimates and designs, which were executed between 1858 and 1865. The main intercepting drainage of London is original in design, and it is also perfect and the most comprehensive, and at the same time the most difficult work of its class that has ever been executed. Though little thought of now, because it is unseen, it is the work for which its author's reputation as an engineer will ever stand highest in the opinion of professional engineers. Between 1863 and 1874 the Victoria, the Albert, and the Chelsea Embankments, were designed and executed by him; his latest works are a new granite bridge over the Thames at Putney, a steel suspension bridge at Hammersmith, and an iron bridge at Battersea; besides many other metropolitan improvements, such as new streets, subways, and artisans' dwellings. He has also designed and carried out the drainage of many other towns. He was created a Companion of the Bath in 1871, and knighted in 1874. In 1889, when the Metropolitan Board of Works was superseded by the London County Council, Sir Joseph Bazalgette retired from the position of Chief Engineer, which he had held for 40 years. He is a past President of the Institution of Civil Engineers and a member of the Athenæum Club.

BEACH, The Rt. Hon. Sir Michael Edward Hicks. See **HICKS-BEACH**.

BEAL, James, was born in 1829, at Chelsea, and educated at private schools. He took an active part as the colleague of James Taylor, the founder of the Freehold Land movement, in establishing Land and Building Societies. He was the first to institute legal proceedings against the curate of St. Barnabas, Pimlico, for conducting the services with high ritual, in a suit, afterwards merged in a similar suit brought by Mr. Westerton, and known as "*Westerton and Beal v. Liddell*," which was the commencement of the movement that culminated in the Public Worship Regulation Act of 1874. He was also instrumental in securing the passing of the Metropolitan Gas Act, 1860, and subsequently the City of London Gas Act, 1868, and he has been a prominent politician in Westminster since 1852. Mr. Beal has devoted much time to parliamentary inquiries into the government and taxation of the metropolis. He was an active member of the City Guilds Reform Association, organised to secure a reform in the administration of the City Companies, and was the honorary secretary of the Metropolitan Municipal Association, formed to create a municipality of London. Mr. Beal is the author of "*Free Trade in Land*," 1855, of pamphlets against the Stamp Duty on Newspapers, and on Direct Taxation. He took an active part in securing the Royal Commission on City Parochial Charities, secured the Royal Commission on "*the Livery Companies of the City Corporation*," and has been twice examined before the Commission. He contends that the guilds are an integral part of the Corporation, and that their estates and property and halls are public property. He has formulated a demand for the restitution of Christ's Hospital to the poor of London, and claims that it shall be handed over to the London School Board. Mr. Beal was elected on the County Council at Fulham in 1889.

BEALE, Dorothea, daughter of the late Mr. Miles Beale, M.R.C.S., was born in London, 1831, and educated chiefly at home. She attended the opening lectures of Queen's College in 1848, when for the first time public examinations were thrown open to women. In 1850 she was appointed the first lady Mathematical Tutor, and was also appointed Latin Tutor under Dr. Plumptre. In 1858 she was elected Principal of the Ladies' College, Cheltenham, which, numbering at that time 69 pupils, has since risen to about

700. Miss Beale has published some school books, and has contributed many articles to the *Journal of Education*, *Fraser*, *The Nineteenth Century*, *Atlanta*, *Parents' Magazine*, *Monthly Packet*, &c. She edits the *Ladies' College Magazine*. Miss Beale has been largely instrumental in advancing the movement for the Higher Education of Women. The Ladies' College gained a gold medal at the International Exhibition, and Miss Beale received the title of *Officier d'Académie*. She is a member of the *Société des Sciences et Lettres*.

BEALE, Professor Lionel Smith, M.B., F.R.S., Physician to King's College Hospital, and Professor of the Principles and Practice of Medicine at King's College, London, lately Examiner in Medicine, Professor of Physiology and of General and Morbid Anatomy, and afterwards Professor of Pathological Anatomy, was born in London in 1828, and educated in King's College School, and in the Medical Department of King's College. He was elected a Fellow of the Royal College of Physicians in 1859, is an Hon. Fellow of King's College, a Fellow of the Medical Society of Sweden, of the Microscopical Societies of New York and California, the Royal Medical and Chirurgical, the Microscopical, and the Pathological Societies; he was formerly President and is now Treasurer of the Royal Microscopical Society, and of the Quekett Club, member of the Academy of Sciences of Bologna, Corresponding Member of the *Académie Royale de Médecine de Belgique*, &c., and the author of several works on medicine, physiology, medical chemistry, and the microscope. Among these works are "The Microscope in its Application to Practical Medicine;" "How to work with the Microscope," of which there have been several editions; "The Structure of the Tissues of the Body;" "Protoplasm; or, Life, Matter, and Mind;" "Disease Germs, their supposed and real Nature, and on the Treatment of Diseases caused by their Presence;" "Life Theories, their Influence upon Religious Thought," 1871; "The Mystery of Life: Facts and Arguments against the Physical Doctrine of Vitality, in reply to Sir William Gull," 1871; "Our Morality and the Moral Question," 1887; "The Liver," 1889; "On Life and on Vital Action in Health and Disease;" "The Anatomy of the Liver;" "Urine, Urinary Deposits and Calculous Disorders," 4 editions; "Urinary and Renal Derangements and Calculous Disorders: Diagnosis and Treatment;" "One Hundred Urinary Deposits,"

in eight sheets; "On Slight Ailments;" "The Physiological Anatomy and Physiology of Man," in conjunction with the late Dr. Todd and Mr. Bowman; and of other works. He has contributed several memoirs to the Royal Society, on the structure of the liver, on the distribution of nerves to muscle, on the anatomy of nerve-fibres and nerve-centres, &c., which are published in the "Philosophical Transactions," and in the "Proceedings" of the Royal Society. He was the editor of the "Archives of Medicine," and has also contributed to the *Lancet*, *Medical Times and Gazette*, *Medical and Chirurgical Review*, and the *Microscopical Journal*.

BEAUCHAMP, (Earl) Frederic Lygon, D.C.L., sixth Earl, is the second son of the fourth Earl by the second daughter of the Earl of St. Germans. He was born in 1830, and was educated at Eton and at Christ Church, Oxford. He was elected Fellow of All Souls' in 1852. On the death of his brother in 1866 he succeeded to the title. From March to June, 1859, he was a Lord of the Admiralty, and Lord Steward of the Queen's Household from 1874 to 1880. He represented Tewkesbury from April, 1857, to October, 1863, and Worcestershire (West) from the latter date to March, 1866, and is a Conservative. In 1870 the University of Oxford conferred on him the honorary degree of D.C.L., and in 1876 he was appointed Lord-Lieutenant of Worcestershire. In 1885, in Lord Salisbury's first government, he was appointed Paymaster-General, and again in August, 1886, but resigned in March, 1887. Lord Beauchamp is a prominent member of the High Church party, and was influential in founding Keble College, Oxford, of the council of which he is a member.

BEAUFORT (Duke of), Henry Charles Fitzroy Somerset, Marquis and Earl of Worcester, Earl of Glamorgan, Viscount Grosmont, &c., was born Feb. 1, 1824. His Grace, who is a Conservative in politics, and succeeded his father as eighth Duke, Nov. 17, 1853, is Lieut.-Colonel in the army, was Master of the Horse under Earl Derby's second administration, 1858-9, and was re-appointed to that office under Earl Derby's third administration, in July, 1866. He takes a great interest in horse-racing, and is President of the Four-in-Hand Club. He is one of the joint editors of the sporting books known as "The Badminton Library." His Grace married, July 3, 1845, Georgina Charlotte, eldest daughter of the late Earl Howe.

BEAUREGARD, Pierre Gustave Toutant, was born at New Orleans, Louisiana, in

1818. He graduated from West Point Military Academy in 1838, and was at first assigned to the artillery, whence he was subsequently transferred to the corps of engineers. He served in the Mexican war, and was twice wounded, and twice brevetted. He was promoted to a captaincy of engineers in 1853, and was on duty, superintending the erection of Government buildings in New Orleans, and fortifications on the Gulf coast till Jan. 1861, when he was for five days (Jan. 23-28) Superintendent of the United States Military Academy at West Point. He resigned Feb. 20, 1861, joined the Confederates, and began the civil war by the bombardment of Fort Sumter, April 12, 1861. He was in actual command of the Southern troops at Bull Run, July 21, 1861, in which the Federals experienced a defeat; for this service he was made a full general, the highest grade. He was second in command, under General Albert S. Johnston, at the battle of Shiloh, or Pittsburgh Landing, Tennessee, April 6-7, 1862, until General Johnston was killed on the afternoon of the first day, when General Beauregard succeeded him as commander-in-chief. From the summer of 1862 until the spring of 1864 he successfully defended Charleston and its outworks when besieged by General Gillmore. He was subsequently second in command in the army of Joseph E. Johnston in North Carolina up to the time of that general's surrender, April 26, 1865, which brought the war to a close. Since the termination of the war, General Beauregard has resided in Louisiana, one of the Southern States; he became President of the New Orleans, Jackson, and Mississippi Railroad; and for a number of years has been one of the managers of the Louisiana State Lottery, and was also Adjutant-General of Louisiana.

BECKER Bernard Henry, author and journalist, born in 1833, was for years attached to *All the Year Round*, and has written a large number of original stories and sketches in that journal, as well as in the *World* and other papers, and was formerly on the staff of the *Daily News*. In 1874 he produced "Scientific London"—an account of the rise, progress, and condition of the great scientific institutions of the capital. Mr. Becker published in 1878 a book in two volumes, entitled "Adventurous Lives." Having in the winter of 1878-9 acted as the "Special Commissioner" of the *Daily News* in Sheffield, Manchester, and other distressed districts of the North and Midlands, he was sent in a similar capacity to Ireland in the autumn of

1880, when he discovered Mr. and Mrs. Boycott herding sheep, and wrote those letters on the state of Connaught and Munster, which has since appeared in a collected form as "Disturbed Ireland," and given rise to several discussions in the House of Commons. In 1884 Mr. Becker produced "Holiday Haunts," the title of which explains itself, like that of the more recent "Letters from Lazy Latitudes" published in 1886.

BECKLES, The Right Rev. Edward Hyndman, D.D., son of the late John Alleyne Beckles, Esq. (descended from the Beckles family, of Durham), was born in Barbados, in 1816, received his education at Codrington College, Barbados, and after holding different cures in the West Indies was consecrated Bishop of Sierra Leone in 1859. He resigned that See in 1870, being succeeded in it by Dr. Cheetham. In the same year he was appointed rector of Wooton, Dover, and in 1873 rector of St. Peter's, Bethnal Green, London. In Feb., 1877, he was appointed Superintending Bishop of the English Episcopalian congregations in Scotland.

BEDDOE, John, M.D., F.R.S., born at Bewdley, in Worcestershire, September 21, 1826, was educated at Bridgnorth School, University College, London, and the University of Edinburgh. He graduated B.A. in London in 1851, and M.D. in Edinburgh in 1853. Dr. Beddoe served on the civil medical staff during the Crimean war. Since then he has practised as a physician at Clifton, and held sundry hospital appointments. He was President of the Anthropological Society in 1869 and 1870, and he was a member of the council of the British Association for several years. He was elected a Fellow of the Royal Society, and a Fellow of the Royal College of Physicians in 1873, and is an honorary member of sundry continental and American scientific societies. Dr. Beddoe has written numerous papers, medical, statistical, and anthropological, and he has largely applied the numerical method to ethnology. In 1868 his Essay on the Origin of the English Nation took the first prize, £150, of the Welsh National Eisteddfod. It formed the basis of his principal work, "The Races of Britain," which was not published until 1885. His other most considerable works and papers are "Stature and Bulk of Man in the British Isles;" "Relations of Temperament and Complexion to Disease;" "On Hospital Dietaries;" "Comparison of Mortality in England and Australia;"

and on the "Natural Colour of the Skin in certain Oriental Races." He is joint author of the "Anthropological Instructions for Travellers" of the British Association; and was elected President of the Anthropological Institute in 1889 and 1890.

BEDFORD, Bishop of. See BILLING, the Rt. Rev. ROBERT CLAUDIUS.

BEESELY, Professor Edward Spencer, was born at Feckenham, Worcestershire, in 1831, and educated at Wadham College, Oxford. He was appointed Assistant-Master of Marlborough College in 1854, and Professor of History in University College, London, in 1860. At the General Election of 1885 he was the unsuccessful Liberal candidate for Westminster, and in 1886 he stood, also without success, for East Marylebone. Professor Beesly is the author of several review articles, pamphlets, &c., on historical, political, and social questions, treated from the Positivist point of view. He is one of the translators of Comte's "System of Positive Polity." A series of lectures by Professor Beesly on Roman history, entitled "Catiline, Clodius, and Tiberius," was published in 1878.

BEET, Professor the Rev. Joseph Agar, was born on September 27, 1840, at Sheffield, to which town his paternal grandfather went in boyhood from Wortley, a village about nine miles away, where his family had lived for generations. He was educated at Wesley College, Sheffield, and then at the Wesleyan College, Richmond, Yorks; was engaged in pastoral work for twenty-one years; became Professor of Systematic Theology at Richmond College in September, 1885, which position he now holds. In August, 1877, he published a "Commentary on the Epistle to the Romans," now in its seventh edition. Since then volumes on "I. & II. Corinthians," and on "Galatians." He hopes to publish before the end of 1890, a volume on "Ephesians," "Philippians," and "Colossians." He delivered at Sheffield in August, 1889, the Fernley Lecture on "The Credentials of the Gospel," which has been published. For more than ten years he has been a frequent contributor to the *Expositor*. The aim of his studies has been to learn all that he could about God, and the mutual relations of God and man, assured that this is the most worthy object of human research. His chief method has been a careful and consecutive examination of the Christian documents in the light of modern philological science.

BEETON, H. C., was born in London on May 15, 1827; is a Merchant, and has been Agent-General in England, for British Columbia, since 1883. He was a Commissioner of the International Fisheries' Exhibition, 1883; and of the Health Exhibition, 1884; and Royal Commissioner of the Colonial and Indian Exhibition, 1886.

BELGIANS, King of the. See LEOPOLD II.

BELL, Alexander Graham, Ph.D. was born at Edinburgh, March 3, 1847. He was educated at the Edinburgh High School and Edinburgh University, and also studied for a time at the London University. He went to Canada in 1870, and thence, in 1872, to the United States. He had acquired prominence as a teacher of deaf-mutes before his inventions of the speaking telephone and photophone (first exhibited in 1876 and 1880 respectively) brought him wealth and fame. He is a member of various learned societies, and has published a number of papers on electrical subjects and the teaching of speech to deaf-mutes.

BELL, Charles Dent, D.D., Hon. Canon of Carlisle, son of Henry Humphrey Bell, Esq., landed proprietor, was born Feb. 10, 1819, at Ballymagnigan, County Derry, Ireland. He was educated at the Academy, Edinburgh, at the Royal School, Dungannon, County Tyrone, and entered Trinity College, Dublin as Queen's Scholar, in 1839; received the Degree of B.A. and Divinity Testimonial, 1842; and was Vice-Chancellor's Prizeman for English verse, 1840, 1841, 1842; M.A., 1852; B.D. and D.D., 1878; Deacon, 1843; Priest, 1844. The following have been his appointments:—Curate of Hampton-in-Arden, 1843-45; Curate of St. Mary's Chapel, Reading, 1845-46; Curate of St. Mary's-in-the-Castle, Hastings, 1846-54; Incumbent of St. John's Chapel, Hampstead, 1854-61; Vicar of Ambleside, and Rural Dean, 1861; Hon. Canon of Carlisle, 1869; Vicar of Rydal with Ambleside, 1872; Rector of Cheltenham, 1879; Surrogate of Cheltenham, 1884. He is the author of "Night Scenes of the Bible, and their Teachings," 1860; "The Sainly Calling," 1874; "Hills that bring Peace," 1876; "Voices from the Lakes," 1876; "Angelic Beings and their Ministry," 1877; "Roll Call of Faith," 1878; "Songs in the Twilight," 1878; "Hymns for Church and Chamber," 1879; "Our Daily Life, its Dangers and its Duties," and "Life of Henry Martyn," 1880; "Choice of Wisdom," and "Living Truths for Head and

Heart," 1881; "Songs in Many Keys," 1884; "The Valley of Weeping and Place of Springs," and "Gleanings from a Tour in Palestine and the East," 1886; "A Winter on the Nile," 1888; "Reminiscences of a Boyhood in the Early Part of the Century, a New Story by an Old Hand," 1889. Dr. Bell is one of the promoters of the Dean Close Memorial School, Cheltenham, Chairman of Committee, and a Trustee; Ex-Officio Chairman of the Committee of the Cheltenham Training College for Male and Female Students. During his Incumbency he has restored the fine old Parish Church of Cheltenham, and has built in the parish a large new church (St. Matthew's).

BELL, The Rev. George Charles, M.A., fifth in the succession as Master of Marlborough College, is the eldest son of George Bell, Esq., Merchant of London, and was born July 9, 1832 at Streatham. He was educated, 1842-51, at Christ's Hospital (the Bluecoat School), in London, where he carried off every prize and distinction that a boy could take. As a Grecian, he gained a scholarship at Lincoln College, Oxford, 1851, and went up to the University in 1851, having, in addition, the first scholarship of the school. In his second year he migrated to Worcester College, where he had again won a valuable scholarship, 1852. As an undergraduate, he acquired a familiarity with the language and literature of several European nations, and in addition made himself a musician of no small repute. In the last term of 1854 he took a First Class in the Final Mathematical School, and, in the following spring, a First in the Final Classical School. In 1857 Mr. Bell gained the Senior University Mathematical Scholarship, and was elected Fellow and Mathematical Lecturer of his College. He received Deacon's Orders in 1859, and six years later, was appointed Under Master of Dulwich College. In 1868 Mr. Bell received his nomination as Head Master of his own old school, Christ's Hospital. In the following year he was ordained priest. Mr. Bell remained at Christ's Hospital for eight years, and in 1876, on the resignation of Archdeacon Farrar, he accepted the Mastership of Marlborough. While in London, Mr. Bell took an active part in supporting Mrs. William Grey's scheme for the education of girls: in recognition of this, he was appointed a Vice-President of the Girl's Public Day School Company. He has been an active member of the Head Masters' Conference since its foundation, and was Chairman

of its Committee for three periods of three years each. He has also, for many years, been a member of the Council of the College of Preceptors. The following is a list of the various stages in Mr. Bell's remarkable career:—Scholar of Lincoln College, Oxford, 1851; Scholar of Worcester College, Oxford, 1852; First Class Mathematical Moderations, 1852; First Class Classics (Final Schools), 1854; First Class Mathematics (Do.), 1855, B.A., 1855; Senior Mathematical Scholar, 1857; Fellow of Worcester, 1857, and M.A.; Mathematical Lecturer of Worcester College, 1857-65; Mathematical Moderator, 1859-60; ordained Deacon, 1859, Priest, 1869, by Samuel Wilberforce, Bishop of Oxford; Mathematical Examiner, 1863; Select Preacher, 1867 and 1885; Second Master of Dulwich College, 1865-68; Head Master of Christ's Hospital, 1868-76; Master of Marlborough College, 1876; Prebendary of Sarum, 1886; has published nothing but two sermons, "The Increase of Faith," preached in Salisbury Cathedral, 1887; "Confidence in Christ," preached in Westminster Abbey, 1888. He married in 1870, Elizabeth, second daughter of Edward Milner, Esq., of Dulwich Wood.

BELL, Sir Isaac Lowthian, Bart., F.R.S., D.C.L., was born in 1816. After completing his studies of physical science at Edinburgh University, and the Sorbonne at Paris, he entered the chemical and iron works at Walker. In 1850 he became connected with the chemical works at Washington, in the county of Durham, then in the hands of his father-in-law, the late H. L. Pattinson, F.R.S. Under his direction they were greatly enlarged, and an extensive establishment was constructed for the manufacture of oxychloride of lead, a pigment discovered by Mr. Pattinson. In 1873 he ceased to be a partner in these works, which are now carried on by a grandson of Mr. Pattinson's. Mr. Bell, in connection with his brothers, Messrs. Thomas and John Bell, founded, in 1852, the Clarence Works on the Tees, one of the earliest, and now one of the largest iron-smelting concerns on that river, which these gentlemen carry on in connection with extensive collieries and ironstone mines. Recently, arrangements have been made for obtaining salt from a bed of the mineral, found at a depth of 1,200 feet at Port Clarence. Mr. Bell has been a frequent contributor to various learned societies on subjects connected with the metallurgy of iron, and has recently completed a very elaborate experimental research on the chemical phenomena of the blast-furnace. He has filled the posts

of President to the Iron and Steel Institute, to the Institution of Mechanical Engineers, to the Mining and Mechanical Engineers of the North of England, and now is President of the Society of Chemical Industry. In recognition of his services as Juror of the International Exhibitions at Philadelphia in 1876, and at Paris in 1878 and 1889, he was elected an honorary member of the American Philosophical Institution, and an Officer of the Legion of Honour. He has filled the office of Sheriff, and was twice elected Mayor of Newcastle-on-Tyne, the last time in order to receive the members of the British Association at their meeting in the year 1863. He was elected M.P. for Hartlepool in July, 1875, but ceased to represent that borough in 1880. Sir Lowthian Bell is the author of several important writings on the iron and steel industries.

BELL, James, C.B., D.Sc., Ph.D., F.R.S., born in 1825, is a native of the county Armagh; was educated principally by private tuition, and at University College, London, where he distinguished himself in chemistry and mathematics. He became Deputy-Principal of the Somerset House Laboratory, Inland Revenue Department, in 1867, and Principal in 1875. In connection with his official position, he was made, in 1868, Chemical Examiner of lime and lemon juice for the supply of the British merchant navy, and from 1869 he has acted as consulting chemist to the Indian Government, and several of the principal public departments. On the passing of the Sale of Food and Drugs Act in 1875, he became Chemical Referee under that act for the United Kingdom. He was elected a Fellow of the Royal Society in 1884, and the degree of Doctor of Science was conferred upon him in 1886 by the Senate of the Royal University, Dublin. He obtained the degree of Doctor of Philosophy under the ordinary statutes of the University of Erlangen; and was President of the Institute of Chemistry of Great Britain and Ireland in 1888, and created a Companion of the Bath in 1889. As regards his scientific work, Dr. Bell is, perhaps, best known from his valuable series of chemical researches into the composition of articles of food, and the variations that occur in their constituents. The results of these original researches with improved methods of analysis, were elaborated and embodied by him in a work entitled "The Chemistry of Foods," and published in three parts, 1881-3. This work has since been translated into German, and published in Berlin. Among his other scientific work may be

mentioned his study of the grape and malt ferments, published in the *Journal of the Chemical Society*, 1870, and also his laborious and interesting research on tobacco, the results of which were published in 1887, in the form of a pamphlet entitled "The Chemistry of Tobacco." In addition to his scientific labours, Dr. Bell has compiled two departmental books, partly educational and partly legal and technical.

BELL, John, sculptor, born in Norfolk, in 1811, exhibited at the Royal Academy, in 1832, a religious group, followed by "Psyche feeding a Swan," and other poetic works. In 1837 he exhibited the model of his "Eagle-slayer," a composition which was exhibited in Westminster Hall in 1844, and again at the International Exhibition in 1851. Reduced casts in bronze were subsequently executed for the Art Union. Mr. Bell took an active part in the original movement which culminated in the Great Exhibition of 1851, and gave rise to the South Kensington Museum and the Schools connected with it. In 1841 he exhibited his well-known and beautiful figure of "Dorothea." The first statue which Mr. Bell was commissioned to execute for the new Houses of Parliament was that of "Lord Falkland." Among his other works, which are almost wholly of the poetic class, may be mentioned "The Babes in the Wood," in marble, now in the South Kensington Museum, an "Andromeda," a bronze, purchased by the Queen, and "Sir Robert Walpole," in St. Stephen's Hall; also "Miranda," "Imogen," "The Last Kiss," "The Dove's Refuge," "Herod Stricken on his Throne," "Lalage," "The Cross of Prayer," "The Octoroon," "Una and the Lion," "Cromwell," at the South Kensington Museum, "James Montgomery," the poet, at Sheffield, and various busts and statuettes. He executed the Wellington monument at Guildhall, with colossal figures of Peace and War; and the marble statue of armed science at Woolwich. Among his public works are the "Guards Memorial" in Waterloo Place, Pall Mall, and the Crimean Artillery Memorial on the Parade at Woolwich. In 1859 he received the medal of the Society of Arts for the origination of the principle of Entasis and definite proportions applied to the obelisk; and he was one of the sculptors employed in the completion of the Prince Consort Memorial in Hyde Park, his portion being the colossal marble group of the United States directing the progress of America, a large copy of which, in terra-cotta, is now at

Washington. He has for some years retired from the active practice of his art, but still continues executing small statues of a poetic class, and has been lately employed on the restoration of the lost Venus of Cnidus and the mutilated statue of the Venus of Melos. He has lately presented some of the original models of his larger statues to the Town Hall of Kensington.

BELLAMY, Edward, an American writer, was born at Chicopee Falls in Massachusetts, in 1850. He was educated at Union College and in Germany; studied law and was admitted to the Bar, but never practised his profession, as he preferred a literary life. During 1871-72 he was on the staff of the *New York Evening Post*, and for the five years following was an editorial writer and critic for the *Springfield Union*. His health failing him, he made a voyage in 1876-77 to the Sandwich Islands, and on his return founded, with others, the *Springfield News*. After two years more of journalism, he abandoned it in order to devote himself entirely to original writing. He has contributed many short stories to the magazines, and in addition, has published, "Six to One: a Nantucket idyl," 1878; "Dr. Heidenhoff's Process," 1880; and "Miss Ludington's Sister," 1884. His greatest success, however, has been in his socialistic novel, "Looking Backward," issued in 1888, and of which more than 300,000 copies were sold in America within two years of its first appearance. Mr. Bellamy still resides at Chicopee Falls, and interests himself in advancing the ideas of nationalism advocated in his book.

BELMORE (Earl), The Right Hon. Somerset Richard Lowry-Corry, P.C., K.C.M.G., Fourth Earl of, son of the third Earl, whom he succeeded in 1845, was born in London in 1835, and educated at Cambridge. He was elected a representative peer for Ireland in 1857; was Under-Secretary of State for the Home Department in Lord Derby's third administration, from July, 1866, to July, 1867; and was Governor of New South Wales from Jan., 1868, to Feb., 1872. He is a Privy Councillor in Ireland, 1867, and a Knight Grand Cross of St. Michael and St. George, 1890.

BELOT, Aldophe, was born at Pointe-à-Pitre, in the island of Guadeloupe, Nov. 6, 1829, and while yet very young travelled extensively in the United States, Brazil, and other parts of North and South America, and also India and Cochin China. He studied law in Paris,

and became an advocate at the Bar of Nancy in 1854. His first attempt in literature was "Châtiment," Paris, 1855, a novel, which failed to attract attention. Two years later he brought out "A la Campagne," a one-act comedy, which gave no indication of the immense and lasting success of his second dramatic composition, "Le Testament de César Girodot," a comedy in three acts, written in conjunction with M. Charles Edmond Villetard, first performed at the Odéon Theatre, Paris, Sept. 30, 1859, and subsequently at the Comédie Française; altogether it has been performed nearly 1,000 times. M. Belot has written a large number of other dramatic pieces: "L'article 47," "Miss Multon," "Le Pavé de Paris," &c. He is also the author of numerous novels, some of which have passed through as many as 100 editions. The most celebrated of these is "Mademoiselle Giraud, ma femme," 1870. His later works are, "Hélène et Mathilde," "La Femme de Feu," "La Femme de Glace," "Deux Femmes," "Folies de Jeunesse," "La Sultane Parisienne," and an elaborate romance in four volumes, 1875-6, entitled respectively,—"Les Mystères Mondains," "Les Baigneuses de Trouville," "Madame Vitel et Mademoiselle Lelièvre," and "Une Maison centrale de Femmes." M. Belot was nominated a Chevalier of the Legion of Honour in 1867, Officier d'Académie and Chevalier de l'Ordre d'Isabelle la Catholique.

BENEDEN, Professor, Pierre J. Van, M.D., LL.D., was born at Malines, Dec. 16, 1809, and became Professor at the Faculty of Sciences at Louvain in 1836. He has devoted a long life to researches in many branches of anatomy, zoology, physiology, ichthyology (fossil and recent), and ethnology. Besides his larger works Professor Van Beneden has published nearly 300 memoirs in the transactions of various scientific societies. Professor Van Beneden is M.D. and D.Sc., LL.D., Edinburgh, member of the Academy of Science of Belgium, Foreign Member of the Royal Society of London, Member of the Institute of France, of the Academies of Berlin, Boston, Lisbon, Montpellier, Munich, and of numerous scientific societies, and Knight Commander, or Grand Officer of orders of Belgium, Brazil, Italy, and other countries.

BENEDETTI, Vincent, a French diplomatist, of Italian extraction, born in Corsica, about 1815, was educated for the consular and diplomatic service. After having been appointed consul at Palermo in 1848, he became First Secre-

tary to the Embassy at Constantinople, until May, 1859, when he was appointed to succeed M. Bourée as Envoy Extraordinary and Minister at Teheran. M. Benedetti, who declined to accept the office, was some months afterwards named Director of Political Affairs to the Foreign Minister,—a position associated with the successful career of MM. de Rayneval and d'Hauterive, and with the names of Desages, Armand, Lefebvre, and Thouvenel. It fell to the lot of M. Benedetti to act as secretary and editor of the protocols in the Congress of Paris in 1856, and he was made Chevalier of the Legion of Honour in June, 1845, Officer in 1853, Commander in 1856, Grand Officer in June, 1860, and Grand Cross in 1866. Having been appointed Minister Plenipotentiary of France at Turin in 1861, on the recognition of the Italian Kingdom by the French Government, he resigned when M. Thouvenel retired from the Ministry of Foreign Affairs, and was appointed Ambassador at Berlin, Nov. 27, 1864. M. Benedetti obtained great notoriety in connection with the remarkable draft of a secret treaty between France and Prussia, which was published in the *Times* on the 25th of July, 1870, at the very beginning of the war between those two powers. The document stated that the Emperor Napoleon III. would allow and recognise the Prussian acquisitions consequent upon the war against Austria; that the King of Prussia would promise to assist France in acquiring Luxemburg; that the Emperor would not oppose a Federal re-union of North and South Germany; that if the Emperor should occupy or conquer Belgium, the King should afford armed assistance to France against any other Power that might declare war against her in such case; and that the two Powers should conclude an offensive and defensive alliance. The publication of this extraordinary document caused great consternation and excitement throughout Europe. Its authenticity was not denied, but France declared that although M. Benedetti had written the document, he had done so at the dictation of Count Bismarck; whereas the latter statesman declared that through one channel or another France had incessantly demanded some compensation for not interfering with Prussia in her projects. Both statesmen agreed in saying that their respective sovereigns declined to sanction the treaty. On the outbreak of the war, M. Benedetti was of course recalled from Berlin; and since the fall of the Empire he has disappeared from public notice. In Oct., 1871, how-

ever, he published a pamphlet, in which he threw upon Count Bismarck the whole responsibility of the draft treaty, but the German Chancellor utterly crushed his opponent by a weighty reply. In 1872 he was elected a member of the Conseil Général of Corsica, and since then he has been an advocate at the Bar of Ajaccio.

BENHAM, The Rev. William, B.D., was born at West Meon, Hants, Jan. 15, 1831, his father being the village postmaster, as his grandfather had been before him. He was educated at the village National school, and was favourably noticed by the rector, Archdeacon Bayley, who, being blind, took him to his house as his little secretary. He taught the youth Latin and Greek, and after his death in 1844, Mr. Benham was sent to St. Mark's College, Chelsea, to be trained for a schoolmaster. After working in that capacity for a few years, Archdeacon Bayley's family furnished him with the means of going through the Theological Department of King's College, London. He went out with a first-class, and was ordained by the late Archbishop of Canterbury, then Bishop of London, as Divinity Teacher to his old college at Chelsea. He remained there from 1857 to 1864, when he became Editorial Secretary to the Society for Promoting Christian Knowledge, and curate of St. Lawrence Jewry, under the present Dean of Exeter. In 1867 he was favourably noticed as a preacher by some members of Archbishop Longley's family, unknown to himself, and this led to the Archbishop offering him the vicarage of his own parish of Addington. He acted as the Primate's private secretary during the first Lambeth Conference, and passed the Resolutions through the press, and also his last Charge. Archbishop Tait also made him one of the Six Preachers of Canterbury in 1872, and gave him the vicarage of Margate in the same year. His chief work there was the carrying out the restoration of the parish church. In 1880 he was appointed to the vicarage of Marden, and in 1882 to the rectory of St. Edmund the King, Lombard Street, in the City of London. In 1889 the present Archbishop conferred on him an honorary Canonry in Canterbury Cathedral. Mr. Benham has published "The Gospel of St. Matthew, with notes and a commentary," 1862; "English Ballads, with introduction and notes," 1863; "The Epistles for the Christian Year, with notes and commentary," 1864; "The Church of the

Patriarchs," 1867; the "Globe" edition of Cowper's works, 1870; Commentary on the Acts in the "Commentary of the Society for Promoting Christian Knowledge," 1871; "A Companion to the Lectionary," 1872; a new translation of Thomas à Kempis's "Imitatio Christi," 1874; "Memoirs of Catherine and Craufurd Tait," 1879; "Readings on the Life of our Lord and his Apostles," 1880; "How to Teach the Old Testament," 1881; "Short History of the American Church," 1884; editor of "Cowper's Letters," 1885; "Diocesan History of Winchester," 1885; "Sermons for the Church's Year," 2 vols., 1885; and a "Dictionary of Religion." He is editor of Griffith and Farran's "Library of Ancient and Modern Theology." He has also contributed articles to "The Bible Educator," *Macmillan's Magazine*, and other periodicals.

BENNETT, Sir James Risdon, M.D., F.R.S., LL.D., Ex-President of the Royal College of Physicians, eldest son of the Rev. James Bennett, D.D., by Sarah, daughter of Mr. John Comley, of Romsey, Hampshire, was born at Romsey, in 1809. He was educated by private tuition and received his professional education in Paris and Edinburgh, at which latter university he took his degree of M.D. in 1833. After travelling for two years on the Continent, he settled in London, and lectured at the Charing Cross Hospital and Grainger's School in the Borough. He was elected, in 1843, Assistant-Physician to St. Thomas's Hospital, and on becoming full Physician, lectured there for many years on the "Practice of Medicine." He was one of the Founders and Secretary of the first Sydenham Society for the Publication of Medical Works. After filling the offices of Censor, Lumleian and Croonian Lecturer, and Representative of the College of Physicians in the General Medical Council, he was elected President of the College in 1876, and annually re-elected up to 1881. In the same year he had been elected Fellow of the Royal Society. Sir Risdon Bennett is Consulting Physician to the Victoria Park Hospital for Diseases of the Chest, Hon. Physician and Governor of St. Thomas's Hospital, and Fellow of various medical and scientific societies. He has published a translation from the German of Kramer on "Diseases of the Ear;" "An Essay on Acute Hydrocephalus," which gained the Fothergillian Gold Medal; "Lumleian Lectures on Cancerous and other Intra-Thoracic Growths." He has also contributed numerous papers to the *Transactions of the Pathological*

Society and various medical journals. Sir Risdon Bennett was one of the Commissioners of the Paris Universal Exhibition for 1878. In that year he received from the University of Edinburgh the honorary degree of LL.D. In 1881 he received from Her Majesty the honour of knighthood, and was elected Chairman of the Executive Committee of the International Medical Congress. Sir Risdon has been Member of the Council, and Vice-President of the Royal Society. He married, in 1841, Miss Ellen Selge Page, daughter of the Rev. Henry Page, M.A., of Rose Hill, Worcester.

BENNETT, William Cox, LL.D., is the son of Mr. John Bennett, watchmaker, of Greenwich, where he was born October 14, 1820. Whilst still a youth, he took an active part in the formation of a literary institution on the most popular basis, in connection with which he formed a library consisting of above 12,000 volumes. Perhaps best known as a song-writer, Dr. Bennett has since published "Poems," 1850; "Verdicts," 1852; "War Songs," 1855; "Queen Eleanor's Vengeance, and other Poems," 1857; "Songs, by a Song-Writer," 1859; "Baby May, and other Poems on Infants," 1861; "The Worn Wedding Ring," &c., 1861; "The Politics of the People," Part I. and II. 1865; "Our Glory Roll, National Poems," 1866; "Contributions to a Ballad History of England," 1868; "Songs for Sailors," 1872; republished with music by J. L. Hatton, 1878; "Prometheus, the Fire-giver," an attempted restoration of the lost First Part of the "Promethean Trilogy of Æschylus," 1877; "Sea Songs," 1878; "Songs for Soldiers," 1879. He edited a monthly periodical, "The Lark,—Songs, Ballads, and Recitations for the People," from Aug., 1883, to Sept., 1884. Dr. Bennett has been a frequent contributor to periodicals. A collected edition of his poems appeared in 1862, in "Routledge's British Poets." Dr. Bennett is also a political writer, and was attached to the staff of the *Weekly Dispatch*, during the years 1869-70. The University of Tusculum conferred on him the degree of LL.D. in 1869.

BENNIGSEN, Rudolph von, born at Lüneberg, Hanover, July 10, 1824, studied jurisprudence at Göttingen and Heidelberg, and qualified as an advocate, but entered the judiciary and rose to the functions of a judge at Göttingen. In 1855 the city of Aurich elected him to the Second Chamber of the Hanover Legislature, but the King

refused him the indispensable consent of the Crown to accept that legislative office. Thereupon he resigned his judgeship, took his seat in the Parliament (1856), and at once assumed a position as leader of the Opposition. In 1859 Bennigsen and Miguel, with a few others, drew up and issued a programme or scheme of German unity. In this document it was declared that only Prussia could be at the head of a united Germany, and in fact Bennigsen advocated at this period that which Prince Bismarck long afterwards accomplished. The National-Verein held its first sitting Sept. 16, 1859, at the invitation of Bennigsen, and he himself was chosen President. The Frankfort Assembly formed the permanent organisation of the National-Verein, and fixed its seat in the city of Coburg. At the time of its dissolution in 1866, it numbered 30,000 members, of whom 10,000 were from Prussia. In that year the organisation of the North German Confederation making inevitable the speedy realisation of the Empire, the Union had no further *raison d'être*, and it was accordingly dissolved. Bennigsen, who by the annexation of Hanover was made a Prussian, became a member both of the Prussian Lower Chamber and of the North German Reichstag. During the war of 1870 he was in confidential relations with the Prussian authorities, and undertook two important missions—one to the South German States, where he discussed the conditions of a possible unity; the other, to the camp of Versailles in the winter of 1871, where the same negotiations were afterwards carried out to a practical result. In 1873 he was elected President of the Prussian House of Deputies. At the elections of 1877 the Socialist party opposed his candidature, but without success.

BENSLY, Professor Robert Lubbock, was born August 24, 1831, at Eaton, near Norwich, and was educated at King's College, London, and at Gonville and Caius College, Cambridge; B.A. 1855; M.A. 1859; also at the University of Halle, 1857-59. He has been Lecturer in Hebrew at Gonville and Caius College, 1861-90; was elected Fellow 1876; and Lord Almoner's Professor of Arabic in the University of Cambridge 1887. He was a Member of the Company for the revision of the authorized version of the Old Testament, 1870-86. Professor Bensly has served as Examiner to the University of London in the text of the Old and New Testaments; and has been twice sent as a Delegate by the University

of Cambridge to the International Congress of Orientalists, in 1881 and 1889. He has published "The Missing Fragments of the Latin Version of the 4th Book of Ezra," 1875; "The Harklean Version of the Epistle to the Hebrews" (the unpublished portion), 1890.

BENSON, The Most Rev. Edward White, D.D., Archbishop of Canterbury, Primate of all England, and Metropolitan, son of Edward White Benson, Esq., of Birmingham Heath, and formerly of York, was born near Birmingham in 1829. He was educated at King Edward's School, Birmingham, and at Trinity College, Cambridge, of which he was successively Scholar and Fellow, and where he graduated B.A. in 1852, as a First Class in classical honours, and Senior Chancellor's Medallist, obtaining also the place of a Senior Optime in the Mathematical Tripos. He graduated M.A. in 1855, B.D. in 1862, and D.D. in 1867, Hon. D.C.L. (Oxford), 1884. He was for some years one of the masters in Rugby School, and he held the head mastership of Wellington College from its first opening in 1858 down to 1872. For several years he was Examining Chaplain to the late Bishop of Lincoln, by whom he was appointed Chancellor and Canon Residentiary of Lincoln, having been a Prebendary of the same cathedral for three years previous. He was Select Preacher to the University of Cambridge (1864, 1871, 1875, 1876, 1879, and 1882), and to the University of Oxford (1875-76), Hon. Chaplain to the Queen, 1873, and Chaplain in Ordinary, 1875-77. In Dec., 1876, he was nominated by the Crown, on the recommendation of the Earl of Beaconsfield, to the newly restored Bishopric of Truro, and was consecrated in St. Paul's Cathedral, April 25, 1877. The diocese, which was taken out of the diocese of Exeter, consists of the county of Cornwall, the Isles of Scilly, and five parishes of Devonshire, constituting the old Archdeaconry of Cornwall, with the church of St. Mary, Truro, as a Cathedral. During his occupation of the See he began the building of a new Cathedral at Truro (with Mr. J. L. Pearson as architect), of which the outward shell has cost over £100,000, much of that sum having been gathered through the energy of the Bishop. In Dec., 1882, Dr. Benson was appointed by the Crown, on Mr. Gladstone's recommendation, to the Archbishopric of Canterbury, in succession to Dr. Tait. Dr. Benson has published "*Σαλπισι*. A memorial Sermon preached after the death of Dr. Lee, first Bishop of Manchester," 1870; "Work, Friendship,

Worship," being three sermons preached before the University of Cambridge in 1871; "Boy-Life, its trial, its strength, its fullness, Sundays in Wellington College, 1859-72," Lond., 8vo, 1874; "Single-heart," 1877; "The Cathedral, its necessary place in the Life and Work of the Church," 1879; "The Seven Gifts," 1885; and "Christ and His Times," 1889. Dr. Benson married, in 1859, Mary, daughter of the late Rev. William Sidgwick, of Skipton, Yorkshire.

BENTINCK, The Right Hon. George Augustus Frederick Cavendish, P.C., son of the late Major-General Lord Frederick Bentinck, K.C.B., was born in 1821, and educated at Westminster School, and at Trinity College, Cambridge. Mr. Bentinck unsuccessfully contested Taunton in April, 1859; but he was elected in the following August, and continued to represent that borough till July, 1865, when he was returned for Whitehaven, which he has represented up to the present time. He was appointed Parliamentary Secretary to the Board of Trade in Feb., 1874. In Nov., 1875, he was appointed Judge-Advocate-General, and sworn of the Privy Council. He went out of office with his party in April, 1880.

BENTLEY, Professor Robert, F.L.S., botanist, who has more particularly directed his attention to the applications of botany to Medicine, was born at Hitchin, Herts, on March 25, 1821, and became a member of the Royal College of Surgeons in 1847. He is a Fellow of King's College, London, and Medical Associate, and Emeritus Professor of Botany there; Honorary Member of, and Emeritus Professor of Materia Medica and Botany to, the Pharmaceutical Society of Great Britain; Honorary member of the American Pharmaceutical Association, and of Philadelphia College of Pharmacy; and Member of the Council, and Vice-President of the Royal Botanic Society of London, &c. Professor Bentley was for many years Professor of Botany in the London Institution; and was formerly Examiner in Botany to the Royal College of Veterinary Surgeons of England; Lecturer on Botany at the Medical Colleges of the London, Middlesex, and St. Mary's Hospitals; and for twenty years Dean of the Medical Faculty in King's College, London. Professor Bentley was President of the British Pharmaceutical Conferences in 1866 and 1867. He has contributed numerous articles to the *Pharmaceutical Journal*, of which for ten years he was one of the editors. He has written a "Manual of

Botany," which has reached the fifth edition; has jointly edited two editions of Pereira's *Materia Medica and Therapeutics*; is the author of an elementary work on Botany, in the series of *Manuals of Elementary Science*, published by the Society for Promoting Christian Knowledge; also "Student's Guide to Structural, Morphological, and Physiological Botany"; "Student's Guide to Systematic Botany"; "Text Book of the Organic Materia Medica"; has edited, with Professors Redwood and Attfield, the "British Pharmacopœia, 1885"; and is joint author, with Dr. Trimen, of an illustrated work on Medicinal Plants, in four volumes. Professor Bentley has published also a Series of Papers "On New American Remedies," a Lecture "On the Characters, Properties, and Uses of Eucalyptus globulus," "Lectures on the Organic Materia Medica of the British Pharmacopœia," and numerous other Lectures and Papers on Botany and Materia Medica in the *Pharmaceutical Journal* and elsewhere.

BERESFORD, Lord Charles William de la Poer, second son of the Rev. John Beresford, fourth Marquis of Waterford, by Christiana Julia, fourth daughter of the late Colonel Charles Powell Leslie, of Glaslough, co. Monaghan, was born Feb. 10, 1846, at Philpottown, co. Dublin. He entered the Royal Navy in 1859, was appointed a lieutenant in 1868, and advanced to the rank of commander in 1875. He served successively in the "Marlborough," the "Defence," the "Clio," the "Tribune," the "Sutlej," the "Research," the Royal yacht "Victoria and Albert," the "Galatea," the "Goshawk," and "Bellerophon." In 1872 he was appointed Flag Lieutenant to the Commander-in-Chief at Devonport; and he accompanied the Prince of Wales as naval aide-de-camp to India in 1875-76. In 1877 he joined the "Thunderer," and was commander of the Royal yacht "Osborne" from 1878 to 1881. His lordship received the gold medal of the Royal Humane Society, and of the Liverpool Shipwreck and Humane Society, for having on three occasions jumped overboard and saved lives at sea. On one of these occasions, when he rescued a marine who had fallen overboard at Port Stanley, Falkland Island, he was attired in heavy shooting clothes, and his pockets were filled with cartridges. At the time of the bombardment of the forts of Alexandria, Lord Charles Beresford was in command of the gunboat "Condor," and in the action of July 11, 1882, he greatly distinguished

himself by his gallant conduct. The ironclad, "Temeraire," which got ashore at the beginning of the engagement, was safely assisted off by the "Condor." Then the formidable Marabout batteries, which constituted the second strongest defence of the Port of Alexandria, were effectually silenced. This latter success was chiefly due to the gallant way in which the "Condor" bore down on the fort and engaged guns immensely superior to her own. So vigorous, indeed, was the attack on the big fort, that the Admiral's ship signalled "Well done, 'Condor.'" It was ascertained that the Khedive, who had taken refuge with Dervish Pacha at Ramleh, was in imminent danger. Arabi Pacha had sent a body of troops to guard the palace, and ordered them to kill the Khedive, but Tewfik and Dervish managed to bribe the men, and to communicate with Admiral Sir Beauchamp Seymour, who dispatched the "Condor" in shore to keep the Egyptian troops in check. The Khedive then succeeded in getting away, and drove to Ras-el-Tin. As the conflagration and looting continued in the city of Alexandria, the Americans were asked to land marines to assist in keeping order, and a regular police system was organised under Lord Charles Beresford, while Captain Fisher, of the "Inflexible," took command of the land forces. Strong measures were necessary to subdue the looters. Several of the scoundrels detected in the very act of setting fire to houses were summarily shot in the great square, and those caught plundering were flogged. Lord Charles Beresford was promoted to the rank of captain (Aug. 7, 1882) for the services he had rendered at the bombardment of Alexandria. In Sept., 1884, he was appointed on the staff of Lord Wolseley for the Nile Expedition, and assisted in the arduous work of getting the boats up to Korti. In command of the Naval Brigade with Sir Herbert Stewart across the Desert, he was the only man not killed of those in immediate charge of the machine-gun at Abu Klea, and was subsequently left in charge of zeraba when the troops marched on Gubat. In Feb. 1885, with the small river steamer "Safia," he rescued Sir Charles Wilson's party (who had been wrecked on their return from Khartoum), after having had the boiler of his steamer repaired while anchored for twenty-four hours under fire of the enemy's fort, which fire was kept down solely by the two machine-guns on board. His lordship sat in the House of Commons, as member for the county of Waterford, in the Conservative interest,

from Feb. 1874, till April, 1880, when his candidature was unsuccessful. In Nov. 1885, he was returned for the Eastern Division of Marylebone by a majority of 944 over the late sitting member, and easily retained the seat at the election of 1886. He was appointed Junior Lord of the Admiralty on the accession of Lord Salisbury to power, which post he resigned in 1888 on a question affecting the strength of the Navy. In Dec. 1889, he was appointed to the command of the first class armoured cruiser "Undaunted," for service in the Mediterranean. He married in 1878 Mina, eldest daughter of the late Mr. Richard Gardner, M.P.

BERKLEY, George, Civil Engineer, was born in London on April 26, 1821, and educated at private schools, and apprenticed to Samuda Bros. in 1835, with whom he worked in the shops and on designs of atmospheric systems of working railways, steam-engines, &c. From 1841 to 1849 he was Assistant to Robert Stephenson, during which period he was engaged on experiments with Locomotives, alteration of gauge, and Rolling Stock of the Eastern Counties and North Eastern Railways; inquiry into systems of working atmospheric Railways, question of gauge referred to Royal Commission in 1846, and other work. From 1849 to 1859, he was engaged on inquiry into the Water supply of Liverpool and neighbourhood for Robert Stephenson; Engineer to London and Blackwall Railway; North and South Western Junction Railway and Branch to Hammersmith, Hampstead Junction Railway, Stratford and Loughton Railway, Wimbledon and Croydon, East Suffolk system of Railways; Wells and Fakenham and other lines, and from 1851—1859 represented Robert Stephenson as Engineer to the Great Indian Peninsula Railway and succeeded to the post on the death of Robert Stephenson. In 1874 he was appointed one of the Consulting Engineers to the Colonial Office for Railways in Natal, and viaducts and other work in the Cape Colony. In 1885, he was appointed Consulting Engineer to the Indian Midland Railway, and in 1887, in conjunction with his son, was appointed Engineer to the Argentine North Eastern Railway. In 1845, he wrote a paper on the atmospheric system of Railways, and in 1870 a paper on the strength of Iron and Steel, for the Institution of Civil Engineers. He is senior Vice-President of the Institution of Civil Engineers; a member of the Athenæum Club, and has been for some years on the board of Managers of the Royal Institution.

BERNARD-BEERE, Mrs., is a daughter of Mr. Wilby Whitehead, and widow of Capt. E. C. Dering, a son of Sir Edward Dering, Bart. She was prepared for the stage by Mr. Herman Vezin, and made her *début* at the Opera Comique, but soon after, on the occasion of her marriage, abandoned the profession. On her return to the stage she appeared as Julia, in "The Rivals," at the St. James's Theatre, and during her engagement there played Lady Sneerwell, Grace Harkaway, and Emilia. She subsequently took part in "The School for Scandal," and "The Rivals." On April 12, 1882, Mrs. Bernard-Beere represented Bathsheba Everdene, in "Far from the Madding Crowd," at the Globe. After this she proceeded to the Haymarket, where, on May 5, 1883, she was "cast for" the title part of Mr. Herman Merivale's version of "Fédora." Her next characters were Mrs. Devenish, in "Lords and Commons," and Princess Zieka, in "Diplomacy."

BERNAYS, Albert James, son of Adolphus Bernays, Professor of the German Language and Literature at King's College, London, was born in London Nov. 8, 1823, and was educated at King's College School and at the University of Giessen. He is Dr. of Philosophy of Giessen, Fellow of the Chemical Society, Fellow of the Institute of Chemistry, Lecturer on Agricultural Chemistry, in 1845; Lecturer on Chemistry and Practical Chemistry at St. Mary's Hospital Medical School, 1854-60; and has been Lecturer on Chemistry, Practical Chemistry and Practical Toxicology at St. Thomas's Hospital since 1860, and is Public Analyst, St. Giles's, Camberwell, and St. Saviour's Southwark; late Examiner in Chemistry to the Colleges of Surgeons and Physicians. He has published "Household Chemistry," 3 editions; "First Lines in Chemistry," "Science of Home Life," 1862; "Notes for Students in Chemistry," sixth edition; "Notes on Analytical Chemistry for Students in Medicine," 3rd edition in separate form, 1889; "Food," 1876; "Chemistry," and various papers on food, Hygiene, Cremation, &c.

BERNHARDT, Rosine (called Sarah). See DAMALA, MME.

BERRY, Sir Graham, was a shopkeeper in Chelsea, who went out to Victoria in 1852 in the height of the gold-digging fever, but instead of turning his attention to the gold mines he settled down to

business at Melbourne. In 1860 he was elected to the Victorian Parliament as an advanced Liberal, and again in 1864, but was defeated in the next election, and then, devoting his energies to journalism, became proprietor and editor of the *Geelong Register*. He soon, however, re-entered Parliament, and in 1870 first took office as Treasurer, and five years later became Premier for a short time. In 1877 Sir G. Berry was returned at the head of an overwhelming majority, and once more took the Premiership. While in office he passed several important democratic measures, including a land tax on large estates, but failed to carry a proposal for a fundamental reform of the Legislative Council. Sir G. Berry then visited England in order to induce the Imperial Parliament to take up the matter, but failed, though through his efforts the question was eventually settled. On his return the general election of 1880 placed him in a minority, but he was subsequently restored to power, and carried some noteworthy reform measures. Again thrown out by a want of confidence vote, Sir G. Berry entered a coalition Ministry, in which he was Chief Secretary. Early in 1886, Sir G. Berry, with Mr. Service, was Victorian delegate to the first Federal Council, and shortly afterwards Sir G. Berry was appointed Agent-General in London for Victoria. The honour of knighthood was conferred on Sir Graham Berry in recognition of his services to the colony. He was Executive Commissioner for the Colonial and Indian Exhibition.

BERTHELOT, P. E. Marcelin, a French chemist, the son of a physician, was born at Paris, October 25, 1827. From a very early age he has devoted himself to scientific studies, and made special researches into the synthesis of fatty bodies and alcohol, and into thermo-chemistry. The degree of Doctor of Sciences was conferred upon him in April, 1854, and in 1861 the Academy of Sciences awarded him the sum of 3,500 francs for his researches. In 1859 he was appointed Professor of Organic Chemistry at the Superior School of Pharmacy, and in 1865 at the request of the Academy of Sciences a new chair of organic chemistry was created for him at the Collège de France. He was elected a Member of the Académie de Médecine in February, 1863, and entered the Académie des Sciences, March 3, 1873, in the place of Dumas. He has since been elected Foreign Member of the Royal Society of London, and of most of the Academies of Europe and the United States. On September 2, 1870,

he was elected President of the Scientific Committee of Defence, and during the siege of Paris was engaged in the manufacture of guns and ammunition, and especially of nitro-glycerine and dynamite. Since 1878 he has been President of the Committee on explosives, to which body the new smokeless powder is due. On April 6, 1876, he was named Inspector-General of Higher Education. The labours of M. Berthelot have had for their object, principally, the reproduction of the substances which enter into the composition of organised beings, and his labours have opened a new field for science, which, up to his time, had limited itself almost entirely to analysis. The dyeing trade has benefited largely by his discoveries in extracting dyes from coal-tar. He has for forty years contributed extensively to the *Annales de Chimie et de Physique*, of which he is now editor, *La Synthèse des Carbures d'Hydrogène*, &c., and has written "Chimie Organique fondée sur la Synthèse," 1860; "Leçons sur les Principes Sucres," 1862; "Leçons sur les Méthodes Générales de Synthèse," 1864; "Leçons sur l'Isomérisie," 1865; "Traité Élémentaire de Chimie Organique," "Sur la Force de la Poudre et des Matières Explosives," 1872 and 1889; "Vérification de l'Aréomètre de Baumé," 1873; "Les Origines de l'Alchimie," 1885; "Collection des anciens Alchimistes grecs," 1888, besides numerous scientific and philosophical articles for the *Revue des Deux Mondes*, the *Revue des Cours Scientifiques*, *Le Temps*, &c., which have been collectively published under the title "Science et Philosophie." One of these articles, entitled "Science Idéale et Science Positive," a letter to M. Renan, in the *Revue des Deux Mondes*, 1863, is very remarkable. M. Berthelot was decorated with the Legion of Honour in 1861, made an officer in 1867, commander in 1879, and grand officer in 1886, in which year he became, for a short time, a member of the French Cabinet. In 1889 he was elected Secrétaire perpétuel de l'Académie des Sciences de Paris.

BERTRAND, Joseph Louis François, a French mathematician, born in Paris, March 11, 1822, evinced from a very early age an extraordinary taste for mathematics, and when eleven years of age on leaving the College of St. Louis, he entered the École Polytechnique. He was successively Professor at the Lycée Saint-Louis; Examiner for admissions at the École Polytechnique, teacher of analysis at the same school, Assistant Professor of Mathematical Physics at the College of France, and Professor of

Special Mathematics at the Lycée Napoléon. In 1856 he was admitted to the Académie des Sciences, in place of Sturm, and on the death of Elie de Beaumont, in 1874, was elected perpetual secretary. Besides his three great works, "Traité d'Arithmétique," 1849; "Traité d'Algèbre," 1856, and "Traité de Calcul Différentiel Intégral," 1864—1870, he has written a number of memoirs relative to physics, pure mathematics and mechanics, of which the following are the principal: "Sur les Conditions d'Intégralité des Fonctions différentielles," "Sur la Théorie Générale des Surfaces," "Sur la Similitude en Mécanique," "Sur la Théorie des Phénomènes Capillaires," "Sur la Théorie de la Propagation du Son," &c. He was made an officer of the Legion of Honour in August, 1867.

BESANT, Walter, was born at Portsmouth, in 1838, and educated at King's College, London, and Christ's College, Cambridge, where he graduated in high mathematical honours. He was intended for the church, but abandoned this career. He was then appointed Senior Professor in the Royal College of Mauritius, but was compelled by ill health to resign, and returned to England, where he has since resided. In 1868 he produced his first work, "Studies in Early French Poetry." In 1873 he brought out "The French Humourists;" in 1877, "Rabelais," for the "Ancient and Foreign Classics;" and, in 1882, "Readings from Rabelais;" in 1879, "Coligny;" and in 1881, "Whittington," for the "New Plutarch" series. Mr. Besant acted for many years as secretary of the Palestine Exploration Fund, in which capacity he wrote, in 1871, a "History of Jerusalem," with the late Professor Palmer; and was editor of the great work entitled, "The Survey of Western Palestine." He has contributed to most of the magazines. In 1871 he entered into the partnership with the late Mr. James Rice, which produced the series of novels that bear their joint names. Mr. Besant has also written, under his own name, "The Revolt of Man," "The Captain's Room," "All Sorts and Conditions of Men," 1882; "All in a Garden Fair," 1883; "Dorothy Forster," 1884; "Uncle Jack," 1885; "Children of Gibeon," 1886; "The World Went Very Well Then," 1887; "For Faith and Freedom," 1888; "The Bell of St. Paul's," 1889; "Armored of Lyonesse," 1890; and two volumes of collected Stories entitled: "To Call her Mine," and "The Holy Rose." He also, with Mr. Rice, put on the stage two

plays, one performed at the Royal Court, a dramatic version of "Ready Money Mortiboy;" and the other, "Such a good Man," the play from which their story bearing the same title was written. Mr. Besant has also written a biography of the late Professor Palmer, 1883, and "The Eulogy of Richard Jefferies," 1888. On the establishment of the "Incorporated Society of Authors," he was elected the First Chairman of the Executive Committee, and, in succession to the late Sir Frederick Pollock, he has been re-elected to the same office.

BESANT, William Henry, M.A., D.Sc., F.R.S., the son of a merchant at Portsmouth, was born at Portsmouth in 1828, and was educated at the Grammar School, and at a Proprietary School at Southsea, and proceeded, in 1846, to St. John's College, Cambridge, where he graduated B.A. in 1850, as Senior Wrangler, and First Smith's Prizeman. He was elected to a Fellowship at St. John's College in 1851, and was appointed Lecturer in 1853. The Fellowship ceased in 1859, but he was retained as Lecturer, and held that appointment until June, 1889. In 1856 he was Moderator, and in 1857 Examiner for the Mathematical Prizes, and in 1885 he was again Moderator. From 1859 to 1864 he was one of the Examiners for the University of London. In 1871 he was elected a Fellow of the Royal Society. He is also a Member of the Royal Astronomical Society, and of the London Mathematical Society. In 1883 he received the degree of Doctor of Science, being the first D.Sc. created by the University of Cambridge. He has been very active as a Private Tutor, College Lecturer, and Examiner in Cambridge and elsewhere. In May, 1889, he was re-elected to a Fellowship at St. John's College. Dr. Besant has published treatises on "Hydro-Mechanics," "Elementary Hydrostatics," "Geometrical Conic Sections," "Dynamics," "Roulettes and Glissettes," and has written various papers in the *Messenger of Mathematics*, and in the *Quarterly Journal of Mathematics*.

BESIEGED Resident. See LABOUR-CHIEF, H.

BESSEMER, Sir Henry, F.R.S., civil engineer and inventor, whose name is inseparably connected with the development of the steel industry in England and other countries, is the son of the late Mr. Anthony Bessemer, and was born in Hertfordshire in 1813. From his earliest youth he was fond of modelling and designing patterns, and, at the age of

20, he was an exhibitor in the Royal Academy; he, however, chose engineering as a profession, and, after taking out numerous patents for mechanical invention, he, in 1856, read before the British Association, at Cheltenham, his first paper on the manufacture of malleable iron and steel. His discovery of the means of rapidly and cheaply converting pig iron into steel, by blowing a blast of air through the iron when in a state of fusion, was the result of costly and laborious experiments which extended over a period of several years, and in which the ultimate result was attained only after many and disheartening failures. Prior to this invention, the entire production of cast steel in Great Britain was only about 50,000 tons annually; and its average price, which ranged from £50 to £60 per ton, was prohibitory of its use for many of the purposes to which it is now universally applied. The manufacture of steel by the Bessemer process in Great Britain alone, in the year 1889, amounted to no less than 2,140,791 tons, of which 943,083 tons were made into rails, having a mean selling price of £5 per ton, whereas cast steel bars, of a weight equal to a railway bar, had never been produced in Sheffield at a less cost than £50 per ton, prior to the introduction of Bessemer-steel. The quantity of steel produced by this process in the seven principal steel making countries in the year 1889, amounted to 8,278,813 tons, effecting a saving of at least 12 millions of tons of coal in its production. The steel made by the Bessemer process, while it retains more than the toughness of the best iron, is at least 50 per cent. stronger, and is now rapidly superseding the use of iron for the construction of the hulls of ships, their masts, yards, and standing rigging; also for the construction of bridges, viaducts, girders, and large span roofs; while for steam-boilers, locomotive engines, and other railway purposes it has almost entirely banished the use of iron. It is difficult to realize the fact that an invention which has revolutionized the whole iron trade of the world in the short space of thirty years, was in its early infancy so pooh-poohed, cried down, and fought against, by the great steel trade of Sheffield, as to have been in danger of being wholly lost to the world; but Mr. Bessemer, with the courage and indomitable energy so characteristic of the man, determined, on the refusal of the trade to take up his invention, to become himself a steel manufacturer. With this object he built steel works in Sheffield, determined to beard

the lion in his den, and force, by an irresistible competition, the trade to adopt and carry out his invention, and become Licencees under his Patents; in this he was eminently successful, and to-day there is manufactured in England by the Bessemer process more than forty-five times the quantity of steel that was made by the old process prior to his invention. The first honorary recognition of the importance of the Bessemer process in this country was made by the Institution of Civil Engineers about 1853, when that body awarded Mr. Bessemer the Gold Telford Medal, for a paper read by him before them on the subject. The knowledge of the new process soon spread to Sweden, Germany, Austria, and France, and the inventor received from these countries several gold medals in recognition of the merits of his invention. The Americans have adopted a very special method of showing their appreciation of Mr. Bessemer's services to science. In the midst of one of the richest iron and coal districts in the world, in Indiana, they have built a new city, which, from its geographical position and local advantages, is destined eventually to become one of the largest centres of trade in America. To this city they have given the name of Bessemer. In 1872, the Albert Gold Medal of the Society of Arts was awarded, by the Council, to Mr. Bessemer "for the eminent services rendered by him to arts, manufactures, and commerce, in developing the manufacture of steel." In 1871 he was elected President of the Iron and Steel Institute of Great Britain, and, during his Presidency, he instituted the "Bessemer Gold Medal," which has since been awarded annually for the most important improvement in the iron or steel manufacture made during the year. Mr. Bessemer was elected a member of the Institution of Civil Engineers in 1877. The first Howard quinquennial prize, being that for the year 1877, was awarded by the Institution of Civil Engineers to Mr. Bessemer as—in terms of the bequest—"the inventor of a new and valuable process relating to the uses and property of iron." Mr. Bessemer was elected a Fellow of the Royal Society, June 12, 1879, and on the 26th of the same month he was knighted by the Queen at Windsor. On April 15, 1880, the Company of Turners presented the Freedom and livery of their company to Sir Henry Bessemer, and on Oct. 6 in the same year he was presented with the Freedom of the City of London, "in recognition of his valuable discoveries which have so largely benefited the iron industries of this country, and

his scientific attainments, which are so well known and appreciated throughout the world."

BEST, William Thomas, organist, son of a solicitor at Carlisle, was born there Aug. 13, 1826. He was educated in his native city under a private tutor. It was intended that he should adopt the profession of a civil engineer, but he chose music as a profession before the completion of his term in the former pursuit. He became Organist of the Panopticon, Leicester Square, in 1853; Organist of the chapel of Lincoln's Inn; Organist of St. Martin's-in-the-Fields; Organist of St. George's Hall, Liverpool, in 1855 (a position he still holds); and Organist of the Royal Albert Hall, Kensington, in 1871. In 1840, English organs were unsuitable for the performance of Bach's great organ works, the functions of the separate or "obligato" pedal not then being appreciated. Goss, Turle, and other well-known men of the same day played the organ as a clavier instrument, with an occasional holding-note on the pedals. Mr. Best, however, induced organ-builders to re-construct their instruments in accordance with Bach's system, in which the bass of organ music should be chiefly assigned to the pedals and not to the left hand. This requires a complete and separate organ for the feet, the same as the keyboards for the hands. Bach's System is now universal in England. Mr. Best has published the following organ works:—"Modern School for the Organ," 1854, a collection of original studies; "Art of Organ-Playing," 1870; Sonatas, Preludes, and Fugues; Concert pieces in all styles, 1850-86; "Arrangements from the scores of the Great Masters," 5 vols., 1873; "The Organ Student," 2 vols., and several of Händel's works, including "Choral Fugues," 1856; "Organ Concertos," 1858-79; "Händel Album," 1880; and "Opera and Oratorio Songs," 1881. He has also composed some pianoforte music, an overture for orchestra, and triumphal march, as well as many species of church music. In 1885 a complete English edition of Bach's organ works was begun under Mr. Best's editorship. In 1880 he received a Civil List pension of £100 per annum.

BETHAM - EDWARDS, Miss Matilda Barbara, was born at Westerfield, Suffolk, in 1836, and began to write when quite young. Her first effort in fiction, a story, "The White House by the Sea," published when she was nineteen, has been many times reprinted in popular

editions, also translated into Norwegian and other languages; since that time she has devoted herself entirely to literature, contributing to *Punch*, the *Graphic*, the *Pall Mall Gazette*, *Macmillan's Magazine*, and other leading periodicals, and publishing numerous novels and novellettes. Amongst the most popular are: "John and I," "Doctor Jacob," "Kitty," "The Sylvestres," "Bridget," "Exchange no Robbery," "Disarmed," "Pearla," "Love and Mirage," "The Parting of the Ways." Many of these stories originally appeared in American and English serials, and have been translated into French, German, and Norwegian. They have also been re-issued in popular editions in America, Germany, and at home. Amongst Miss Betham-Edwards's miscellaneous contributions to literature, may be mentioned, "A Winter with the Swallows in Algeria," and "A Year in Western France." In 1885 she published a volume of "Poems," containing, among other reprints, "The Golden Bee," which attracted the attention of Charles Dickens, when the authoress was in her teens. In 1889 this writer issued a centennial edition of Arthur Young's "Travels in France," with notes, biography, and general sketch of France, the result of personal experience and observations; also, "The Roof of France, or, Travels in N. Lozère."

BETTANY, George T., M.A., born at Penzance, March 30, 1850, eldest son of the late Mr. G. Bettany, was educated privately, at Guy's Hospital, London, and at Caius College, Cambridge, where he was Tancered Student in Medicine, Foundation Scholar in Natural Science, and Shuttleworth Scholar. He graduated at London University B.Sc., 1871, with first-class honours in Geology; B.A. Cambridge 1874 (bracketed third in first-class of Natural Sciences Tripos, 1873); M.A., 1877. He lectured for some years on Biology at Gorton and Newnham Colleges, Cambridge; was lecturer on Botany at Guy's Hospital, 1877-1886; has edited for Ward, Lock & Co. "Science Primers for the People," the "Popular Library of Literary Treasures," and "The Minerva Library of Famous Books," the latter a very successful monthly series, which began in April, 1889. He is the English editor of *Lippincott's Monthly Magazine*. Mr. Bettany's principal books are, "The Morphology of the Skull," 1877 (conjointly with Prof. W. K. Parker, F.R.S.); "Elementary Physiology," 1883; "Eminent Doctors, their Lives and their Work," 1885; "Life of Charles Darwin," (Great Writers Series), 1887;

"The World's Inhabitants," an extended illustrated work on Ethnology, issued serially in 1887-8; "The World's Religions," a companion work, 1889-90. He is a contributor to the *Times*, *Athenæum*, "Dictionary of National Biography," &c.

BETTANY, Jeanie Gwynne, only daughter of the late Mr. S. G. Gwynne, was born at Audley, Staffordshire, Jan. 25, 1857, educated by her father and at University College, London, and married 1878 Mr. G. T. Bettany (*see above*). She has written a successful novel of life in the South Staffordshire "Black Country," entitled "The House of Rimmon," 3 vols., 1885, issued serially in *Sylvia's Home Journal* for 1889, and in 1 Vol. in the same year. This book has been very highly praised by many novelists and reviewers, as being original in style and full of acute characterisation and humour. Mrs. Gwynne Bettany has also written "A Laggard in Love," a 1 vol. novel, in *Lippincott's Magazine* for Nov. 1890; and "Aunt Saracen's Two Legacies," a humorous description of the pranks of two boys, and numerous short stories in the *Argosy*, *Temple Bar*, *Belgravia*, &c.

BEVERLEY, Bishop of. *See* CROSTHWAITE, THE RT. REV. ROBERT J.

BICKERSTETH, The Very Rev. Edward, D.D., F.R.E.G.S., Dean of Lichfield, the second son of the late Rev. John Bickersteth, M.A., nephew of the late Lord Langdale, and brother of the late Bishop of Ripon, was born in 1814, at Acton, Suffolk; entered Trinity College, Cambridge, in 1832, and graduated B.A. in honours, from Sidney Sussex College in 1836, having previously obtained the Taylor's Mathematical Exhibition. He afterwards entered as a student in theology at Durham University, where he gained the first prize for a Theological Essay in 1837; was ordained deacon at the end of that year, and priest in Jan. 1839. He served as curate to Archdeacon Vickers at Chetton, Shropshire, in 1838-39, when he was appointed to the curacy, with sole charge, of the Abbey, Shrewsbury. Having occupied this position for nine years, he was presented by the late Earl Howe in 1848 to the incumbency of Penn Street, Buckinghamshire. Dr. Bickersteth was appointed Rural Dean of Amersham, by the Bishop of Oxford, the same year; Vicar of Aylesbury and Archdeacon of Buckingham in 1853; Select Preacher before the University of Cambridge in 1861, 1864, 1873 and 1878; and Deputy Prolocutor of the Convocation of Canterbury in 1861-2. He

was elected Prolocutor of the Convocation of Canterbury upon the resignation of the Dean of Bristol, and admitted to the degree of D.D., *propter merita*, by a Grace of the Senate of the University of Cambridge in 1864; again elected Prolocutor at the opening of the new Convocation in 1866, and First Honorary Canon of Christ Church, Oxford. He was for the third time elected Prolocutor in Dec. 1868; and again for the fourth time in 1874. He was appointed Select Preacher before the University of Oxford in 1875. In Feb. 1875, he was nominated by the Crown to the Deanery of Lichfield, which had become vacant by the death of the Very Rev. William Weldon Champneys. He has published "Questions illustrating the Thirty-nine Articles," "Catechetical Exercises on the Apostles' Creed," "Prayers for the Present Times," Charges delivered at his Visitations in 1855, 1856, 1858, 1859, 1861, 1862, 1864, 1865, 1867, 1868, and 1870; "The Reform of Convocation," 1877; "The Mercian Church and St. Chad,"—an Address delivered in Lichfield Cathedral on March 2, 1880; "Marriage with a Deceased Wife's Sister," Oct. 1881, besides other tracts and numerous sermons. He also brought out a new edition of Evans' "Bishopric of Souls," 1877. Dean Bickersteth was a member of the company appointed by Convocation to revise the New Testament; and he is the writer of an Exposition of St. Mark's Gospel for the "Pulpit Commentary," which is now in its 6th edition. Dean Bickersteth is Chairman of the Executive Committee of the Central Council of Diocesan Conferences.

BICKERSTETH, The Right Rev. Edward Henry, D.D., Bishop of Exeter, born at Islington, Jan. 25, 1825, son of the late Rev. Edward Bickersteth, Rector of Watton, was educated at Watton and Trinity College, Cambridge. He was Chancellor's English Medallist in 1844, 1845, and 1846; proceeded B.A. (Sen. Opt.) in 1847, Classical Tripos, 3rd Class; took the degree of M.A. in 1850; and gained the Seatonian Prize in 1854. Mr. Bickersteth became Curate of Banningham, Norfolk, in 1848; Curate of Christ Church, Tunbridge Wells, 1852; Rector of Hinton Martell, Dorset, in the same year; Vicar of Christ Church, Hampstead, in 1855; Chaplain to the Bishop of Ripon in 1861; and Rural Dean of Highgate in 1878; and Dean of Gloucester in 1884. On the translation of Dr. Temple to the See of London, Dr. Bickersteth was appointed Bishop of Exeter, and was consecrated in

1885. He is author of the following books:—"Poems," 1848; "Water from the Well-Spring," 1853; "The Rock of Ages; or Scripture Testimony to the One Eternal Godhead of the Father, and of the Son, and of the Holy Spirit," 1858; "Practical and Explanatory Commentary on the New Testament," 1864; "Yesterday, To-day, and for Ever: a Poem in 12 books," 1866; "The Spirit of Life; or, Scripture Testimony to the Divine Person and Work of the Holy Ghost," 1868; "The Hymnal Companion to the Book of Common Prayer," 1870; "The Two Brothers, and other Poems," 1871; "The Master's Home-Call," 1872; "The Reef and other Parables," 1873; "The Shadowed Home and the Light Beyond," 1874; and, "The Lord's Table," 1882. The "Hymnal Companion," of which a revised and enlarged edition, with tunes, appeared in 1876, is now in use in more than four thousand churches in England and the Colonies.

BICKMORE, Albert Smith, was born at St. George's, Maine, March 1, 1839. He graduated at Dartmouth College in 1860, and immediately began to study natural history under Agassiz, who, in the following year, placed him in charge of the department of Mollusca in his Museum of Comparative Zoology at Cambridge, Mass. He had, very early in his scientific career, determined to establish at New York a Museum of Natural History. Partly to make collections for this, and partly to supply some deficiencies in the Museum of Comparative Zoology, he sailed in 1865 for the East Indies. He spent one year making collections of shells and small animals in the East Indian Archipelago; then traversed a large portion of China, visited and explored Japan, crossed Siberia, visiting its mines, Central and Northern Russia, and other European countries, and returned to New York after an absence of about three years. In 1869 he published in London and New York a volume of his "Travels in the East Indian Archipelago," and a German edition at Jena. In 1870 he was elected Professor of Natural History in Madison University, Hamilton, New York. He has been a frequent contributor to the American Journal of Science, and the Journal of the Royal Geographical Society; and is now Secretary of the Museum of Natural History, New York, which was inaugurated at the close of 1877.

BIDDULPH, General Sir Michael Anthony Shrapnel, K.C.B., is the second son of the late Rev. Thomas Shrapnel

Biddulph, of Amroth Castle, Pembroke-shire, sometime Prebendary of Brecknock, by Charlotte, daughter of the Rev. James Stillingfleet, Prebendary of Worcester, and was born in 1825. He was educated at Woolwich, and entered the Royal Artillery in 1843 as a second lieutenant. He was promoted to first lieutenant in 1844; became captain in 1850, brevet major in 1854, brevet lieutenant-colonel in 1856, colonel in 1874, major-general in 1877, lieutenant-general in 1881, and general in 1886. General Biddulph served throughout the Eastern campaign of 1854-55, including the battles of Alma, Balaklava, and Inkerman, and the siege and fall of Sebastopol. He was Deputy Adjutant-General of Artillery in India from 1868 to 1871; and in 1876 he was appointed Brigadier-General in command of the Rohilkund district; he also commanded the Quetta field force in Afghanistan in 1878-9. He was nominated a Companion of the Order of the Bath (military division) in 1873, and promoted to a Knight Commander-ship of that Order in 1879. In 1881 he was appointed to the divisional staff of the army in Bengal. Sir Michael Biddulph married, in 1857, Katherine, daughter of Captain Stamati, Commandant of Balaklava.

BIDDULPH, Sir Robert, G.C.M.G., C.B., is the son of the late Mr. Robert Biddulph, of Ludbury, Herefordshire, by Elizabeth, daughter of Mr. George Palmer, M.P., of Nazing Park, Essex. He was born in London, August 26, 1835, and educated at the Royal Military Academy, Woolwich. He was appointed second lieutenant in the Royal Artillery in 1853; captain in 1860; major in the army in 1861; lieutenant-colonel in 1864; colonel in 1872; brigadier-general in 1879; major-general in the army in 1883; and lieutenant-general in 1887. He was Deputy Assistant-Adjutant-General in India from 1858 to 1860; Military Secretary in China in 1860-61; Military Secretary in Madras from 1861 to 1865; and Deputy Assistant-Quartermaster-General at Woolwich from 1868 to 1871. He was one of the Assistant Boundary Commissioners under the Reform Act of 1867, and acted as private secretary to Mr. Cardwell when that statesman was Secretary for War, in 1871-73. From 1873 to 1878 he was Assistant Adjutant-General at headquarters; in March, 1879, he was nominated Her Majesty's Commissioner for arranging the payment due to the Turkish Government under the Convention concluded in the previous year; and in May, 1879, he was appointed High

Commissioner and Commander-in-Chief of the island of Cyprus, on the transfer of Sir Garnet Wolseley to Natal; Inspector-General of Recruiting, 1886-7; Quartermaster-General of the army in 1887; Director-General of Military education since March 1888. Under his administration the state of the island of Cyprus has very greatly improved; and to him is due much of the credit for the successful "locust war" urged against that deadly insect-plague. He was nominated a Companion of the Order of the Bath (military division) in 1877, and created a Knight Commander of the Order of SS. Michael and George in 1880, a G.C.M.G. in 1886. He married, in 1864, Sophia, daughter of the Rev. A. L. Lambert, rector of Chilbolton, Hampshire, and widow of Mr. R. Stuart Palmer.

BIDWELL, Shelford, F.R.S., eldest son of the late Shelford Clarke Bidwell, Esq., J.P., was born on March 6, 1848, at Thetford, Norfolk, and was educated privately, and at Caius College, Cambridge. He graduated B.A. (Mathematical Tripos) in 1870, LL.B. (Law Tripos) in 1871, and M.A. in 1873, and was called to the Bar (Lincoln's Inn) in 1874. He has devoted much time to experimental scientific work, especially in relation to electricity and magnetism. Accounts of his researches are contained in numerous papers published in the "Philosophical Transactions" and the "Proceedings of the Royal Society," the "Proceedings of the Physical Society," the *Philosophical Magazine, Nature*, and other scientific journals. He was elected a Fellow of the Royal Society in 1886, is a Vice-President of the Physical Society, and a member of the Institution of Electrical Engineers and other associations. He married, in 1874, Annie Wilhelmina Evelyn, daughter of the Rev. E. Firmstone, M.A., rector of Wyke, near Winchester, and has three children.

BIERSTADT, Albert, was born near Düsseldorf, in Germany, Jan. 7, 1830. His parents emigrated to the United States when he was two years of age, and settled in New England. He went to Germany in 1853, studied painting in Düsseldorf, spent a winter in Rome, made the tour of Switzerland and the Apennines, and returned to the United States in 1857. In 1859 he accompanied General Lander's expedition to the Rocky Mountains, where he spent several months in making sketches. He was made an Academician in 1860. In 1863 he produced his celebrated picture,

"View of the Rocky Mountains,—Lander's Peak," which at once gave him a high reputation. Among his subsequent works, the most noticeable have been—"Sunlight and Shadow," "The Storm in the Rocky Mountains," "Domes of the Yosemite," "Laramie Peak," "Emigrants Crossing the Plains," "Mount Hood," "Mount Whitney," "Scene near Fort Laramie," "Geysers of the Yellowstone," "Great Trees of California," "Matterhorn," "Rocky Mountain Sheep," "Settlement of California," "Discovery of the Hudson," "Last of the Buffalo," and "Landing of Columbus." He travelled in Europe in 1867, 1878, and 1883, and in 1863 and 1873 visited the Pacific coast, and in 1889 went to Alaska. In 1871 he was made a member of the Academy of Fine Arts of St. Petersburg. He has received medals in Belgium, Germany, Bavaria, and Austria, the Legion of Honour, the Russian Order of St. Stanislaus, and the Turkish Order of the Medjidieh. His house and studio at Irvington, New York, were destroyed by fire in November, 1882; but, though his loss was considerable, his more valuable pictures were fortunately at his studio in New York City, and so escaped destruction.

BIGELOW, Hon. John, was born at Malden-on-Hudson, New York, Nov. 25, 1817. He graduated at Union College in 1835, was admitted to the Bar in 1839, became joint proprietor with William C. Bryant, and Managing Editor of the *New York Evening Post* in 1849, was appointed Consul at Paris by President Lincoln in 1861, *Chargé d'Affaires* in December, 1864, and Envoy Extraordinary and Minister Plenipotentiary to the Court of France in April, 1865; he resigned, and returned to the United States in the beginning of 1867 to devote himself to literary pursuits. He was appointed chairman of the commission organized at the request of Governor Tilden to investigate the management of the canals of the State of New York in 1874, in 1875 was elected Secretary of State of the State of New York, in 1884 was offered the position of Chamberlain of the City of New York, and in 1885 the position of Assistant Treasurer of the United States at New York, both which he declined. During the years 1843-5 Mr. Bigelow was a frequent contributor to the *Democratic Review*. He was one of the five inspectors of the state prison at Sing Sing, 1845-8, and was the author of all their annual reports to the Legislature. He visited the island of Jamaica in 1850, and upon his return

published "Jamaica in 1850; or the Effect of Sixteen Years of Freedom on a Slave Colony." During his residence in Paris he published "*Les États Unis en 1863*." Also while in Paris he became possessed of the original manuscript of the autobiography of Benjamin Franklin, from which he published in 1868, the first correct copy ever printed of that famous story. Among his other writings are "Some Recollections of Antoine Pierre Berryer," 1869; "France and Hereditary Monarchy," 1871; a "Life of Benjamin Franklin," in 3 vols., 1875; "The Wit and Wisdom of the Haytians," 1877; and "Molinos, the Quietist," 1882. He also edited the "Writings and Speeches of Samuel J. Tilden," 2 vols., 1885, and "The Writings of Benjamin Franklin," in 10 vols., 1888. "Some Recollections of Laboulaye" were printed privately for him in 1889, and he contributed a "Life of William Cullen Bryant" to the "American Men of Letters" series in 1890. Mr. Bigelow is one of the executors of the will of the late Samuel J. Tilden, and is President of the Board of Trustees of the "Tilden Trust." In 1886 the New York Chamber of Commerce, in response to an invitation of M. de Lesseps, requested Mr. Bigelow to accompany him to visit the works of the Panama Canal Company and report their situation and prospects. Mr. Bigelow's report was published by the Chamber of Commerce, to which body he was immediately after elected an honorary member. He was also sole Commissioner of the United States to the International Exposition of Sciences and Industry at Brussels in 1888.

BIGELOW, Hosea. See LOWELL, JAMES RUSSELL.

BILCESCO, Mlle. Sarmisa, Doctor at Law, a Roumanian by birth, is the first lady who obtained the degree of a Doctor at Law in France. She was born in 1867 at Bucharest, where her father is Governor of the National Bank. When only sixteen she graduated as Bachelor of Letters, and the year after as Bachelor of Sciences. Encouraged by these early successes, Mlle. Bilcesco felt tempted to continue her studies in Paris, where she arrived with her mother in 1884. She at once put herself under the direction of M. Georges Bourdon, *Secrétaire* of the *Chamber des Députés*, and *rédauteur* of the journal *Le Temps*, who prepared her for all examinations. After having been admitted as student at the Sorbonne, Mlle. Bilcesco studied three years for the degree of a licentiate, and two years

longer for that of a doctor. She passed all her examinations with honours, and took the first place among the licentiates of her year. But her crowning triumph was her examination for the degree of a doctor, which took place on June 12, 1890. The thesis she selected was "The Status or Position of Mothers under French and Roman Laws," a paper of 504 pages, which she read before a large audience, the jury congratulating her on the choice of the subject, and the remarkable manner in which she had treated the same. Mlle. Bilcesco, is not only a first-rate scholar, but likewise a talented musician. She returns to Bucharest, where she proposes to claim admission to the Roumanian Bar, not so much to set up as a lawyer, as to decide the question of a woman's right to practice the profession of the law.

BILLING, The Rt. Rev. Robert Claudius, D.D., Oxon., Bishop of Bedford (suffragan of London), 1888; Prebendary of St. Paul's, Chaplain of the 2nd Brigade of the Tower Hamlets Royal Volunteers; and Rector of St. Andrew, Undershaft, E.C.

BINNIE, Alexander R., M.Inst C.&M.E., F.G.S., F.R.M.S., &c., Engineer to the London County Council, was born in London in 1839, and was educated at various private academies. He was a pupil and assistant to the celebrated J. F. Le Trobe Bateman, F.R.S., who was president of the Institution of Civil Engineers, and Engineer to the Glasgow and Manchester Waterworks. In early life Mr. Binnie was engaged on railway construction in England and Wales. He entered the Public Works Department of India by open competition in 1868, and during his six years' service in that country was engaged in the exploration which led to the discovery of coal in the Central Provinces, for which he received the commendation of the Government of India; he successfully designed and constructed the whole of the works for the supply of the City of Najpur with water, for which he again received the commendation of Government; he was also engaged on railway work, and for a short period acted as Assistant Secretary, Public Works Department, to the Chief Commission of the Central Provinces. For fifteen years he was Engineer to the Bradford Corporation, during which period he designed and successfully constructed many large works at a cost of over one million sterling, and among them the highest reservoir embankment (125 feet) in the United Kingdom; he also laid out and designed for the Corporation a large

extension of the water works in the Nedd Valley at an estimated cost of £1,250,000. Mr. Binnie is the author of a paper on the Najpur water works, for which he received from the Institution of Civil Engineers a Telford medal and premium. He has been appointed on more than one occasion Lecturer on Water Works at the School of Military Engineering at Chatham, and his lectures have been published by Government, besides which he is the author of many valuable professional reports, and an address as President to the Bradford Philosophical Society on "Heat in its Relation to Coal."

BIRCH, Charles Bell, A.R.A., sculptor, the only surviving son of the late Jonathan Birch, was born at Brixton, in Surrey, Sept. 28, 1832. At the age of twelve he was sent to study at the Somerset House School of Design. In 1845 the family removed to Berlin, and Charles became a student of the Berlin Royal Academy, drawing and modelling from the antique, and attending the life, anatomical, perspective, and animal classes. He also received valuable instruction, as a pupil, in the studios of Professors Rauch and Wichmann. He remained at the Berlin Academy until 1852. Before leaving, he produced his first work of any importance—a bust of the late Earl of Westmoreland, English Ambassador at Berlin, subsequently executed in marble for the King of Prussia. On his return to England in 1852 Mr. Birch passed through the schools of the Royal Academy, gaining two medals, and after some further years spent in study, entered the studio of the late J. H. Foley, R.A., where for ten years he acted as principal assistant. In 1864 the Art Union of London, having offered a premium of £600 for the best original figure or group, a prize open to all nations, Mr. Birch was the successful competitor with his group "A Wood Nymph." The work was subsequently executed in marble, and it was selected by the Royal Commissioners as one of the representative works of British Art for the Vienna, Philadelphia, and Paris Exhibitions. The following list comprises a selection from Mr. Birch's contributions to the Royal Academy since 1852:—Busts of the late E. M. Ward, R.A., and Mrs. E. M. Ward; statuette of Mary Agatha, youngest daughter of Lord and Lady John Russell; bust of Prince Frederick William of Prussia, from sittings taken at Buckingham Palace before his marriage with the Princess Royal; bust of Lord John Russell, in marble, for the City Liberal Club; colossal statue of S. T. Chadwick, M.D.,

executed in bronze for the town of Bolton in Lancashire; and an ideal work, "Retaliation," subsequently cast in bronze and purchased by the Commissioners of the Sydney Art Gallery. In 1879 Mr. Birch exhibited "The Last Call," a group of heroic size, representing a trumpeter of Hussars and his horse shot down simultaneously whilst in the act of charging. In 1880 he exhibited a group representing Lieutenant Hamilton, V.C., in his last and gallant attempt to save the Residency at Cabul in Sept. 1879. In 1881 he executed a colossal statue in bronze of the late Maharajah of Bulram-pore, a colossal figure of Earl Beaconsfield for Liverpool, and a statue of the late General Earle, and a large group "Godiva," both which are erected in front of St. George's Hall. Mr. Birch executed in 1880 the dragon on Temple Bar Memorial; in 1883 an equestrian statuette of William III., executed in silver, for H.M. the King of the Netherlands, being the inaugural prize for a race founded by H.M. to be run at Goodwood, and called "The Orange Cup." The statuette is now in the possession of H.R.H. the Princess of Wales; in 1887 two colossal allegorical figures in marble, representing "Justice" and "Plenty," decorating the entrance of the Australian Joint Stock Bank, Sydney, N.S.W.; in 1888 a colossal marble statue of the late Earl of Dudley, erected at Dudley; life size marble statue of the late Earl of Beaconsfield, K.G., erected in the Junior Carlton Club, London; memorial to the late Jenny Lind Goldschmidt, erected in Malvern cemetery; "A Water Nymph," statue in bronze, life size, apex to a fountain erected at Sydney, N.S.W. "Chambers Challenge Shield," presented to the Universities of Oxford and Cambridge by old university athletes. In 1889 a colossal marble statue of H.M. the Queen for the Moharana of Oodeypore, erected at Oodeypore; and a life-size statue of Margaret Wilson, the Christian martyr, drowned in the Solway, A.D. 1685. Mr. Birch also modelled equestrian statuettes of Lord Sandwich, the late Lord Lonsdale, and the Marquis of Exeter, all which were executed in silver and presented to them by the officers of their respective regiments, and in addition various other busts and statuettes, and several shields, &c., for race cups. As a draughtsman on wood and stone, Mr. Birch for many years contributed to the pages of the *Illustrated London News* and other periodicals and books. He executed, in 1880, a series of twenty original designs for the Art Union of London, in illustration of Lord Byron's

poem of "Lara." He was elected an Associate of the Royal Academy, April 23, 1880.

BIRDWOOD, Sir George Christopher Molesworth, M.D., LL.D., C.S.I., K.C.I.E., eldest son of the late General Christopher Birdwood, 3rd Bombay Native Infantry, and Commissary-General, Bombay, was born at Belgaum, Bombay, Dec. 8, 1832. He was educated at Plymouth New Grammar School, and the University, Edinburgh, where he took the degree of M.D., and passed the usual examination of the College of Surgeons, in 1854. He was appointed to the Medical Staff of the East India Company on their Bombay Establishment in the same year. His first charge was of the Southern Mahratta Horse, Kalludghee, in 1855. Later he was transferred to the 1st Battery 2nd Brigade of Artillery at Sholapore, where he was also at different times in charge of the 8th Madras Cavalry, 3rd Bombay Native Infantry, and the Civil Station. In 1856 he was sent to the Persian Gulf in medical charge of the Company's steamship "Ajdaah," and on his return to Bombay in April, 1857, he was appointed Acting Professor of Anatomy and Physiology in Grant Medical College, and from that date to his leaving India continued to be connected with the college almost without interruption in the chairs successively of Anatomy and Physiology, and Botany and Materia Medica. In the same year Dr. Birdwood was appointed Curator of the Government Central Museum at Bombay. Later he was appointed Registrar of the University; and he also held the offices of Honorary Secretary to the Bombay Branch of the Royal Asiatic Society, and Honorary Secretary to the Agri-Horticultural Society of Western India, with the assistance of the late eminent Hindu physician, Dr. Bhau Daje. He was mainly instrumental in establishing the Victoria and Albert Museum, and the Victoria Gardens in Bombay. In 1864 he was appointed Sheriff of Bombay. In 1869 he was forced finally to leave India, through permanently broken health. On the occasion of the proclamation of the Queen as Empress of India, Jan. 1, 1877, he was appointed to the Companionship of the Star of India: and the honour of knighthood was conferred on him in Sept. 1881. In 1887, he had conferred on him the honorary degree of LL.D., Cambridge, and was decorated with the insignia of the Knight Companionship of the Order of the Indian Empire. He still maintains his official ties with India, having been appointed, about 1879, Special Assistant in the

Revenue, Statistics, and Commerce Department of the India Office. He was a Royal Commissioner and Member of the Finance Committee of the Colonial and Indian Exhibition of 1886; and Chairman of the Committee of the British Indian Section of the Paris Exhibition of 1889. He is the author of "Catalogue of the Economic Products of the Bombay Presidency (Vegetable)," 1st edit., 1862, 2nd edit. 1868; "The Genus *Boswellia* (Frankincense plants), with illustrations of three new species;" in "The Transactions of the Linnean Society," vol. xxvii.; the article "Incense," in the "Encyclopædia Britannica;" "The Perfumes of the Bible," in Cassell's "Bible Educator;" "Handbook to the British Indian section, Paris Exhibition of 1878;" the article "On an Ancient Silver Patena," in "The Transactions of the Royal Society of Literature," vol. xi., New Series, 1881; "Handbook on the Industrial Arts of India," 1880; "The Arts of India," 1881; "Ausstellung Indischer Kunst-Gegenstände, zu Berlin," 1881; "Indiens Konstslojd en Kortfattad Skildring," Stockholm, 1882; "Indiens Kunstindustrie, Kjöbenhavn," 1882; Report on the Miscellaneous Old Records of the India Office, 1879, reprinted 1890. He contributed introductions to "The Miracle Play of Hasan and Husain," by Sir Lewis Pelly, 1879; to "Eastern Carpets," by Mrs. Vincent Robinson, 1882; to "The Dawn of the British Trade in the East," by Henry Stevens, 1886; to "Representative Men of India," by Sorubji Jehanghier, 1889; the "Catalogue of the Indian Section of the Edinburgh Forestry Exhibition," 1884; and an Appendix on "The Aryan Fauna and Flora," to Professor Max Müller's "Biographies of Words," 1888. He was a constant contributor to the Indian Press, and for some time editor of the *Bombay Saturday Review*. Letters by him on the opium trade, which had appeared in the *Times*, were republished in Mr. W. H. Brereton's "Truth about Opium," 1882. He is also the author of the article "Are we Despoiling India?—A Rejoinder, by 'John Indigo,'" in the *National Review* for September, 1883; and of a review of Sir Henry Yule's "Hobson Jobson," in the *Quarterly Review*, for 1887; and of the following articles in the *Asiatic Quarterly Review*:—"The Christmas Tree," Jan. 1886; "The Empire of the Hittites," Jan. 1888; "The Mahratia Plough," Oct. 1888; and "Leper in India," April, 1890. He has been a contributor also to the *Bombay Quarterly Review*, the *Journal of the East Indian Association*, the *Journal of the National Indian Association*, the *Journal of the*

Society of Arts, and the *Journal of Indian Art*. Sir George Birdwood married, in 1856, Frances Anne, eldest daughter of the late Edward Tolcher, Esq., R.N., of Harewood, Plympton St. Mary's, Devon.

BIRRELL, Augustine, M.P., youngest son of the Rev. C. M. Birrell, of Liverpool, and Harriet Jane Grey, daughter of the Rev. Henry Grey, D.D., of Edinburgh, was born Jan. 19, 1830, at Wavertree, near Liverpool. He was educated at Amersham Hall School, near Reading, and Trinity Hall, Cambridge, where he graduated with honours in Law and History in 1872. He was called to the Bar by the Inner Temple, Nov. 1875, and practises in the Chancery Division; is the author of "Obiter Dicta," two series, 1884 and 1887, and "Life of Charlotte Brontë," 1887. He contested the Walton Division of Liverpool in 1885, and the Widnes Division of Lancashire in 1886, both unsuccessfully. He was returned to Parliament for West Fife in July, 1889, on the retirement of the Hon. R. P. Bruce. He married first, in 1878, Margaret, daughter of the late Archibald Mirrieles, formerly of St. Petersburg (she died in 1879); and second, in 1888, Eleanor, widow of the Hon. Lionel Tennyson, and daughter of Frederick and Lady Charlotte Locker.

BISHOP, William Henry, American author, was born at Hartford, Connecticut, Jan. 7, 1847, and graduated at Yale College in 1867. He has been a frequent contributor to periodical literature, and in addition has published "Detmold," 1879; "The House of a Merchant Prince," 1882; "Choy Susan and other Stories," 1884; "Old Mexico and Her Lost Provinces," 1884; "Fish and Men in the Maine Islands," 1885; "The Golden Justice," 1887; and "The Brown Stone Boy and other Queer People," 1888.

BISMARCK-SCHÖNHAUSEN (Prince von) Karl Otto, statesman, born at Schönhausen, April 1, 1815; studied at Göttingen, Berlin, and Griefswald; entered the army, and was afterwards a lieutenant in the Landwehr. He became a member of the Diet of the province of Saxony in 1846, and of the General Diet, in which he made himself remarkable by the boldness of his speeches, in 1847. On one occasion he argued that all great cities should be swept from the face of the earth, because they were the centres of democracy and constitutionalism. Nor did the events of 1848 modify his opinions. In 1851 he entered the diplomatic service,

and was intrusted with the legation at Frankfort. Regarding Austria as the antagonist of Prussia, he was sent in 1852 to Vienna, where he proved a constant adversary to Count Rechberg. In 1858, a pamphlet entitled "*La Prusse et la Question Italienne*" appeared, the authorship of which was generally attributed to him. In this publication reference was made to the antagonism existing between Austria and Prussia, and a triple alliance between France, Prussia, and Russia was advocated. In March, 1859, M. von Bismarck was sent as ambassador to St. Petersburg, which post he held until 1862, and having conciliated the Czar, was decorated with the order of Saint Alexander Newski. In May, 1862, he was appointed Ambassador to Paris, where he received the Grand Cross of the Legion of Honour from the Emperor Napoleon, and he was made Minister of the King's House and of Foreign Affairs in Prussia, Sept. 22. The budget having been rejected by the Deputies, but adopted by the Upper Chamber, M. Bismarck, in the name of the King, dissolved the former after a series of angry altercations. The newspapers which protested against this despotic act were proceeded against with great severity, as were numerous public officials, magistrates, and others, who openly expressed views hostile to the Government. In Jan., 1863, he protested against an address which the Deputies presented to the King, in which he was accused of having violated the constitution. Shortly after, the affairs of Poland caused fresh difficulties. The Chamber of Deputies, by a majority of five to one, censured the Ministry for having concluded (Feb. 8) a secret treaty with Russia. After the close of the aggressive war waged by Prussia and Austria against Denmark, in which Austria had very reluctantly taken part, Bismarck thought the time had arrived for carrying out his long-cherished project of making Prussia the real head of Germany. His preparations for another aggressive war were completed, and, aided by an alliance with Italy, in a campaign of a few weeks' duration, Austria and her allies were defeated. It is probable that dread of a still more formidable alliance induced M. von Bismarck to stop short in his career of victory, as the Emperor Napoleon, in his speech to the French Chambers, declared that he had arrested the conqueror at the gates of Vienna. A preliminary treaty of peace with Austria was concluded at Nikolsburg, July 26, 1866, as Austria consented to retire from Germany, the terms of a general pacification were arranged. M. von Bismarck was

created a Count, Sept. 16, 1865, on which occasion he received from the King of Prussia a valuable estate in Luxembourg. He lost no time in turning to account the victory gained by Prussia over Austria, and in advancing his favourite scheme for the unification of Germany, provinces and kingdoms were at once annexed. The free town of Frankfort received a Prussian garrison in spite of the indignant protests of the population; Hanover was incorporated in the Germanic Confederation; and at the close of the year 1866 Count Bismarck succeeded in concluding with Bavaria, Baden, and Wurtemberg treaties of peace and of alliance offensive and defensive, with a proviso that in the event of war the King of Prussia should have the chief military command. In 1867 Count Bismarck organised the North German Confederation, which comprised twenty-two States, representing a population of 29,000,000. The King of Prussia was at the head of this powerful Confederation, and a Federal Council composed of delegates of the different States was established, together with a Diet or common Parliament, the members of which were elected by universal suffrage. The new federal constitution was adopted by the Prussian Chambers in June, and came into operation on the 1st of the following month, Count Bismarck receiving as the reward of his services the post of Chancellor of the Confederation and President of the Federal Council. The Luxemburg question now gave rise to serious differences between the Prussian and French Governments, and Count Bismarck strenuously opposed the projected cession of that province by Holland to France. Eventually the dispute was settled by the Luxemburg territory being neutralized, and the fortresses dismantled. After this both Powers declared their intention to be pacific, but nevertheless they both increased their already bloated armaments. Ill-health compelled Count Bismarck to retire from public life for a short period in 1868, but he returned to Berlin in October of that year, and resumed the direction of affairs. On the 1st of January he entered on his functions as Foreign Minister of the North German Confederation. In July, 1870, it transpired that General Prim had sent a deputation to Prussia to offer the Crown of Spain to Prince Leopold of Hohenzollern. The French people were greatly agitated at the receipt of this intelligence. Some of their leading statesmen declared that France would never consent to see a Prussian prince seated on the throne of Spain, and explanations were demanded from the Berlin cabinet. It was alleged

by Count Bismarck that the King of Prussia gave his consent to the acceptance of the crown by the prince only as the head of the Hohenzollern family, and not as an act of the Government. A few days later the withdrawal of the prince's candidature was announced; but in spite of this, France declared war against Prussia, and the campaign began, the latter Power receiving great assistance from the troops sent into the field by the King of Bavaria and the Dukes of Baden and Württemberg. This is not the place to record the complete successes of the German armies. Suffice it to say, that Count Bismarck accompanied the King throughout the campaign, and that after the capitulation of Paris he dictated the terms of peace, which were adopted by the Assembly then sitting at Bordeaux. He succeeded in uniting Germany, and on January 18, 1871, he had the satisfaction of seeing King William of Prussia crowned Emperor of Germany in the Palace of the French kings, at Versailles. In the same month he was appointed by his Imperial master Chancellor of the German Empire, and in the following March raised to the rank of Prince. In September of the same year he was present at the memorable meeting of the German and Austrian emperors at Gastein. Subsequently Prince Bismarck greatly offended the Roman Catholic party throughout Germany by promoting the legal measures which were directed against the freedom of the Church, and which resulted in the expulsion of the Jesuits, and the incarceration of several bishops. In Dec., 1872, he resigned the presidency of the State Ministry, although he continued to confer with the Emperor on the affairs of the empire and its foreign policy. The Emperor also authorized him, in the event of his being unable to appear personally at a meeting of the Ministry of State, to give his vote on matters concerning the interests of the empire through the President of the Imperial Chancellery. On this occasion Prince Bismarck received from the Emperor the Order of the Black Eagle, set in diamonds. In Oct., 1873, he was re-appointed as Prussian Premier. Two attempts have been made on the life of the Chancellor, the first on May 7, 1866, by a step-son of Karl Blind; and the second on July 13, 1874, as the Prince was driving in the country at Kissingen; he was fired at by a young man named Kullman, and slightly wounded by a shot which grazed his right wrist. The culprit was apprehended, and eventually sentenced to fourteen years' hard labour, with a further ten years' loss of civil rights, with

police inspection, and costs. An attempt was made to prove that Kullman was connected with the clerical party, and a statement to that effect made by Prince Bismarck himself afterwards led to an exciting scene in the German Parliament. Towards the close of 1874, at the instigation of Prince Bismarck, Count Arnim was imprisoned, and tried on the charge of having abstracted documents from the archives of the German embassy at Paris. Prince Bismarck presided over the Congress of the representatives of the Great Powers which assembled at Berlin to discuss the provisions of the Treaty of San Stefano in 1878. In Prussia, he has made peace with the Roman Catholic Church, and has done much (by laws of National Insurance, &c.) to establish a system of State Socialism, intended to counterwork the schemes of the Social Democrats. He has striven to found a German Colonial Empire; and if he has not as yet succeeded in establishing any prosperous settlements, he has done a great deal to spread German trade all over the world. In foreign policy, his aim has been to strengthen the Austro-German Alliance, and to secure the Czar against any temptation that France might offer for the formation of a Franco-Russian alliance against Germany. The recent action of Prince Bismarck in the Bulgarian affair has undoubtedly been guided by this motive. Books on Bismarck exist without number in Germany: those most generally known are the works of Dr. Busch entitled "Bismarck and his People" [q.v.]. Prince Bismarck's eldest son, Count Herbert, is now head of the Prussian Foreign Office. The Prince retired into private life in March, 1890, when the Emperor conferred on him the title of Duke of Lautenburg. Up to his retirement, his activity was as great and as unceasing as of old.

BISMARCK-SCHÖNHAUSEN, Count Herbert von, son of Prince Bismarck, was born at Berlin, Dec. 28, 1849. He is a Major in the German Army, has served the German Empire in various diplomatic capacities, and was Embassy Secretary in London, and Minister at the Hague. He sits in the Reichstag as one of the members for Schleswig-Holstein, and is head of the German Foreign Office. In Jan. 1889, the Emperor conferred on him the Order of the Red Eagle, First Class.

BJÖRNSSEN, Bjørnstjerne, a Norwegian novelist and dramatic poet, born Dec. 8, 1832, first became known in consequence of some articles and stories which he contributed to newspapers, especially the

Folkeblad, an illustrated journal, in the columns of which appeared his "Aanum," "Ole Stormsen," and "En munter Mand." The years 1856 and 1857 he passed at Copenhagen, where he studied the works of Baggesen, of Oelenschläger, and of the principal Danish writers. Afterwards he published in *Fædrelandet*, his novel of "Thron," which was followed by "Arne" and "Synnøve Solbakken." He has also produced several tragedies and other pieces for the stage. The following works of his have been translated into English:—"Arne: a Sketch of Norwegian Country Life," translated from the Norwegian, by A. Plesner and S. Rugeley Powers, 1866; "Ovind: a Story of Country Life in Norway," translated by S. and E. Hjerleid, 1869; "The Fisher Maiden," a Norwegian tale translated from the author's German edition, by M. E. Niles, 1869—also translated from the Norwegian, under the title of "The Fishing Girl," by A. Plesner and F. Richardson, 1870; "The Happy Boy: a Tale of Norwegian Peasant Life," translated by H. R. G., 1870; "The Newly-married Couple," translated by S. and E. Hjerleid, 1870; and "Love and Life in Norway," translated from the Norwegian, by the Hon. A. Bethell and A. Plesner, 1870.

BLACK, William, was born at Glasgow in 1841, and received his education at various private schools. His youthful ambition was to become an artist, and he studied for a short time in the Government School of Art in his native city, but eventually he drifted into journalism, becoming connected with the *Glasgow Weekly Citizen* while yet in his teens. In 1864 he came to London, and wrote for magazines. He was attached, in the following year, to the staff of the *Morning Star*, and was special correspondent for that paper during the Prusso-Austrian war of 1866, scenes from which appeared in his first novel, "Love or Marriage," published in 1867. This novel dealt too much with awkward social problems, and was not successful, but the author's next work of fiction was favourably received. It was entitled "In Silk Attire," 1869, and a considerable portion of it was devoted to descriptions of peasant life in the Black Forest. Then followed "Kilmeny" and "The Monarch of Mincing Lane," the former dealing mostly with Bohemian artistic life in London. But his first real hold of the novel-reading public was obtained by "A Daughter of Heth," 1871, which went through many editions, Next

came "The Strange Adventures of a Phaeton," 1872, which literally described a driving excursion that the author made from London to Edinburgh with a thread of fiction interwoven. It is said that a good many Americans, amongst others, have adopted this plan of exploring the English Counties, and have taken the "Adventures" as a sort of guide-book. In 1873 was published "A Princess of Thule." It was followed by "The Maid of Killeena and other Stories," 1874; "Three Feathers," 1875, the scene of which was laid in Cornwall; "Madcap Violet," 1876; "Green Pastures and Piccadilly," 1877; "Macleod of Dare," 1878; "White Wings: a Yachting Romance," 1880; "Sunrise: a story of these Times," 1881; "The Beautiful Wretch," 1882; "Shandon Bells," 1883; "Yolande," 1883; "Judith Shakespeare," 1884; "White Heather," 1885; "Sabina Zembra," 1887; "The Strange Adventures of a House-Boat" (a sequel to the Phaeton Adventures), 1888; "In Far Lochaber," 1889, and "The New Prince Fortunatus," 1890. For four or five years Mr. Black was assistant editor of the *Daily News*, but he practically ceased his connection with journalism fifteen years ago.

BLACKBURN (Baron), The Right Hon. Colin Blackburn, second son of the late John Blackburn, Esq., of Killearn, co. Stirling, by Rebecca, daughter of the late Rev. Dr. Gillies, was born in 1813, and educated at Eton and at Trinity College, Cambridge, where he graduated B.A. as a high Wrangler in 1835. He was called to the Bar at the Middle Temple, and for some years went the Northern circuit. For about eight years he conducted, with the late Mr. Ellis, the regular recognised Reports in the Court of Queen's Bench, and the eight or ten volumes of "Ellis and Blackburn" are of high authority. He published an excellent legal work "On Sales." At Liverpool he had secured a large amount of business in heavy commercial cases, when, in 1859, he was made a puisne judge of the Queen's Bench. On that occasion he received the honour of knighthood. In Oct., 1876, he was made a Lord of Appeal under the provisions of the Appellate Jurisdiction Act (1876), and created a peer for life under the title of Baron Blackburn. In Aug., 1878, he was nominated a member of the Royal Commission appointed to consider the provisions of a draft Code relating to Indictable Offences. Baron Blackburn retired in 1886.

BLACKBURN, Henry, son of Mr. Charles

Blackburn, B.A., of Cambridge, was born at Portsea, February 15, 1830, and educated at King's College, London; he was appointed private secretary to the Right. Hon. E. Horsman, M.P., in 1853. He is a foreign correspondent and art critic for London papers and reviews. Mr. Blackburn visited Spain and Algeria in 1855, 1857 and 1864, and delivers illustrated lectures on these subjects. He was appointed editor of *London Society* in 1870, but resigned that post in 1872. He also held an appointment in the Civil Service Commission. Mr. Blackburn wrote, and partly illustrated, the following works; "Life in Algeria," 1864; "Travelling in Spain," 1866; "The Pyrenæes," (illustrated by Gustave Doré) 1867; "Artists and Arabs," 1868; "Normandy Picturesque," 1869; "Art in the Mountains: the Story of the Passion-Play in Bavaria," 1870; "Hartz Mountains," 1873; "Breton Folk," 1879; and "Mémorial of Randolph Caldecott," 1887. Mr. Blackburn is the originator of the system of Illustrated Catalogues of Exhibitions, with Facsimiles of Sketches drawn by the artists. He is editor of the annual *Academy Notes*, *Grosvenor and New Gallery Notes*, and is a lecturer on Art.

BLACKIE, John Stuart, formerly Professor of Greek in the University of Edinburgh, son of a banker in Aberdeen, was born at Glasgow in July, 1809, and was educated at Aberdeen and Edinburgh. During two years passed in Göttingen, Berlin, and Rome, he devoted himself to the study of German, Italian, and classical philology. In 1834 he published a metrical translation of Goethe's "Faust," with notes and prolegomena, 2nd edit., 1880, and was called to the Scottish Bar. In 1841 he was appointed to the newly-formed chair of Latin Literature in Marischal College, Aberdeen. This post he held for eleven years. He contributed several philological articles to the *Classical Museum*, published in 1850, then edited by Dr. L. Schmitz, and a metrical translation of *Æschylus*, which led to his appointment, in 1852, to the Greek chair in the University of Edinburgh. This was followed by an essay on the "Pronunciation of Greek, Accent and Quantity," 1852; a "Discourse on Beauty, with an Exposition of the Theory of Beauty according to Plato appended," 1858; "Songs and Legends of Ancient Greece," 1857, 2nd edit., 1880; and another volume of Poems, English and Latin, 1860. He is the author of various articles in the *North British Review*, an article on Plato in the "Edinburgh Essays," and the

article "Homer" in the "Encyclopædia Britannica." Professor Blackie has been very active as a popular lecturer, and made himself somewhat conspicuous as a warm advocate of Scottish nationality. In 1866 he published "Homer and the Iliad," containing a translation of the Iliad in ballad measure, a third volume of Critical Dissertations, and a fourth of Notes Philological and Archaeological; and in 1869 "Musa Burschicosa," a volume of songs for students and university men. In 1870 he put forth a volume of "War Songs of the Germans," with historical sketches. In 1872 he published "Lays of the Highlands and Islands." Professor Blackie also appeared as a lecturer in the Royal Institution, London, where he combated the views of Mr. John Stuart Mill in moral philosophy, of Mr. Grote in his estimate of the Greek sophists, and of Professor Max Müller in his allegorical interpretation of ancient myths. His principal philological papers appeared in a collected form in 1871, under the title of "Horse Hellenicæ;" and in the same year he put forth a little volume of practical advice to young men, entitled "Self-Culture," which had a large sale in England, India, and America. His more recent works are "The Wise Men of Greece," 1877; "The Natural History of Atheism; a defence of Theism against modern Atheistic and Agnostic tendencies," 1877; "Lay Sermons: a series of discourses on important points of Christian doctrine and morals," 1881; "The Language and Literature of the Highlands of Scotland, with poetical translations of some of the most popular pieces of Gaelic poetry," 1875; "Altavona; or, fact and fiction from my life in the Highlands," 1882. The foundation of a Celtic chair in the University of Edinburgh, for which by four years' considerable exertion he collected a sum of £12,000, is mainly owing to Professor Blackie. He resigned the chair of Greek in the University of Edinburgh in Aug., 1882. In 1883 he put forth his ripe views on the character and influence of Goethe, in "The Wisdom of Goethe." Then he published "The Scottish Highlanders" and "The Land Laws," 1885; also "What History Teaches," 1886; in 1887 a "Life of Robert Burns," in the Great Writer series; in 1888 a volume on his favourite theme of "Scottish Song," with biographical notices and the music; and in 1889, "A Song of Lewes," being a series of historical ballads on the persons of representative men from Abraham to Wellington and Nelson; and in 1890 "Essays on subjects of Moral and Social

Interest," in which he gives his life, conclusions on education, religion, politics, and other topics of the day. Latterly he has resumed his philological mission in behalf of Modern Greek; has lectured on this subject at Oxford, Cambridge and Haylebury; and to the same effect has published papers in the *Proceedings of the Royal Society, Edinburgh*, in the *Nineteenth Century*, and in the *Scottish Review*.

BLACKLEY, The Rev. Canon William Lewery, M.A., is the second son of the late Travers R. Blackley, Esq., of Ash-town Lodge, co. Dublin, and Bohogh, co. Roscommon. He was born at Dundalk, Ireland, Dec. 30, 1830, and received part of his early education on the Continent. Having entered Trinity College, Dublin, in his sixteenth year, he obtained his B.A. degree in 1850, and his M.A. in 1854, in which year he was ordained to the curacy of St. Peter's, Southwark; shortly after, he became curate of Frensham, where he remained thirteen years, and was then promoted by Bishop Sumner in 1867 to the rectory of North Waltham, Hants; whence, in 1883, he was preferred, by Bishop Harold Browne, to the vicarage of King's Somborne, in the same county, and to an Honorary Canonry in the Cathedral of Winchester. In 1889 he was appointed by the Dean and Chapter of Westminster, to the vicarage of St. James the Less, Westminster, which he now holds. In 1857 he published his metrical translation from the Swedish, of Bishop Tegner's famous poem, "The Frithjof Saga." This was followed by the publication of his "Practical German Dictionary," which, in its original and abridged forms, has passed through many editions. In 1867 he published his "Critical English New Testament;" and his volume on "Word Gossip" followed in 1869. He also, besides frequent contributions to all the leading Reviews, wrote, for the National Society, the Teacher's Manual, "How to Teach Domestic Economy," 1879; and "The Social Economy Reading Book," 1881; and his book on "Thrift and Independence, a Word to Working Men," was published by the S.P.C.K. in 1883. In Nov., 1878, he published an article in the *Nineteenth Century*, under the title of "National Insurance, a cheap, practical and popular way of preventing Pauperism," this immediately attracted public attention. A sermon, preached by Canon Blackley in Westminster Abbey, in Sept., 1879, on "Our National Impotence," also attracted much notice. The National Providence League was

formed in 1880, for the purpose of educating public opinion on the subject of National Insurance. Canon Blackley's proposals have reached far beyond this country, with the result that movements more or less upon his lines have been started in France, Switzerland, Italy, and New Zealand; while a complete system of National Insurance has been established throughout the whole German Empire, securing sick pay, accident pay, and old age pensions to all workers.

BLACKMORE, Richard Doddridge, son of the Rev. John Blackmore, was born at Longworth, Berkshire, in 1825. His maternal grandmother was a granddaughter of Dr. Doddridge. He was educated at Tiverton School, and Exeter College, Oxford, where he obtained a scholarship and graduated B.A. in 1847, taking a second class in classics. He was called to the Bar at the Middle Temple in 1852, and afterwards practised as a conveyancer. He is the author of "Eric and Karine," "Epyllia," "The Bugle of the Black Sea," and the following novels;—"Clara Vaughan," 1864; "Cradock Nowell: a Tale of the New Forest," 1866; "Lorna Doone: a Romance of Exmoor," 1869; "The Maid of Sker," 1872; "Alice Lorraine: a Tale of the South Downs," 1875; "Cripps the Carrier: a Woodland Tale," 1876; "Eréma; or, My Father's Sin," 1877; "Mary Anerley," 1880; "Christowell; a Dartmoor Tale," 1882; "Tommy Upmore," 1884; "Springhaven," and "Kit and Kitty." Mr. Blackmore has also published "The Fate of Franklin," a poem, 1860; "The Farm and Fruit of Old," a translation of the first and second Georgics of Virgil, 1862; and a translation of "The Georgics of Virgil," 1871.

BLACKWELL, Elizabeth, was born in Bristol, Feb. 3, 1821. Her father, in 1832, removed to the United States, where he died in 1838, and, through misfortune, left his widow and nine children almost penniless. Miss Blackwell aided in their support by teaching, studied medicine at Charleston, and at Philadelphia. She applied for admission to a number of medical schools, but was refused by all, except those of Castleton, Vermont, and Geneva, New York, and at the latter she matriculated in 1847, and in 1849 received the first medical degree conferred upon a woman in the United States. After her graduation she spent a year and a half in the Maternité Hospital of Paris, and that of St. Bartholomew in London, and in 1851 established herself as a physician, mainly in the treatment of women

and children, at New York, where, in 1837, she founded the Infirmary for Women and Children. She has published "The Laws of Life," 1852; "Counsel to Parents on the Moral Education of their Children," 1879; and other professional works. In 1859 she again visited England, and delivered a course of medical lectures. In 1868 she returned to England, where she has since resided. She is connected with the Women's Medical College in London, and has taken an active part in other organizations for moral and social effort.

BLAIKIE, Professor William Garden, D.D., LL.D., son of an eminent lawyer, who afterwards rose to be Lord Provost of Aberdeen, was born at Aberdeen in 1820, and educated at the Grammar School and University of his native town. As soon as he was qualified, he received an appointment to the parish of Drunblade; but on the Disruption in 1843 he and his congregation joined the Free Church of Scotland. After a short ministry in the country he was invited to go to Edinburgh, and there, in company with other young men of zeal, founded a Mission Church. In 1864 the University of Edinburgh conferred on him the Degree of D.D., and a few years later he received the degree of LL.D. from the University of Aberdeen. In 1868 he was appointed Professor of Apologetics and Pastoral Theology in New College, Edinburgh. In 1888, as "Cunningham Lecturer," he delivered a course of lectures on "The Preachers of Scotland," afterwards published. Dr. Blaikie was one of the chief promoters of "The Alliance of Reformed Churches holding the Presbyterian system," commonly called "The Pan-Presbyterian," and was one of the chief secretaries at each of the four meetings in Edinburgh, Philadelphia, Belfast and London. He has edited various periodicals: he has also written "Better Days for Working People," "Personal Life of David Livingstone," "The Work of the Ministry," and numerous other works on theological and philanthropic subjects. He has contributed to many magazines and journals, including the *Quiver*, the *Expositor*, *Harper, Macmillan, Good Words, Sunday at Home, &c.*

BLAINE, Hon. James Gillespie, American statesman, was born at West Brownsville, Washington County, Pennsylvania, Jan. 31, 1830. He entered the preparatory department of Washington College in his thirteenth year, and graduated in 1847 at the head of his class. He then went to Kentucky, where he was Profes-

sor of Mathematics in a military institute. Here he met his wife, who was from Maine, and at her persuasion removed to Augusta, Maine, where he has since resided. Adopting journalism as a profession, he became part owner and editor of the *Kennebec Journal* in 1854, and editor of the *Portland Daily Advertiser* in 1857. He was one of the organizers of the Republican party in Maine, and served in the State Legislature from 1858 to 1862, the last two years being Speaker. In 1862 he was elected a Representative in Congress, and was re-elected for each successive term until 1876. He was Speaker of the House of Representatives from 1869 to 1874, and was again the Republican candidate in 1875, but was not elected as the Democrats were then in control of that body. In 1876 Mr. Blaine was appointed U.S. Senator from Maine to fill a vacancy, and was subsequently elected for the term expiring in 1883. This position he resigned in March, 1881, to accept the Secretaryship of State offered him by Mr. Garfield. The assassination of the latter caused Mr. Blaine, with the rest of the Cabinet, to tender his resignation to Mr. Arthur, which was accepted, Dec. 1881. At the Republican National Convention in 1884, he was nominated for the Presidency, but owing to dissensions in his party, his Democratic opponent, Mr. Cleveland, was elected. During the administration of the latter, Mr. Blaine held no public office but occupied himself in completing the writing of his recollections of "Twenty Years in Congress" (2 vols., 1884-86) begun by him on leaving the Cabinet, and in travelling in Europe. He returned to America in time to take part in the Presidential campaign of 1886, in which he had declined to be himself a candidate, in favour of the Republican nominee, Gen. Harrison. On the election of President Harrison, Mr. Blaine was offered and accepted the position he had previously held in Mr. Garfield's Cabinet, the Secretaryship of State, an office which he still (1890) occupies.

BLAIR, Lieut.-General, James, C.B., F.C., entered the army on June 10, 1844; Lieut., Mar. 19, 1848; Captain, Oct. 23, 1857; Major, June 10, 1864; Lieut.-Col. June 10, 1870; Colonel, June 10, 1875; Major-Gen., July 2, 1885; Lieut.-General Jan. 9, 1889. Lieut.-General J. Blair served throughout the Indian Mutiny campaign of 1857-59, and was present at the siege of Neemuch, siege and assault of Kotah, and pursuit of Tantia Topce (Medal with clasp, and Victoria Cross); he received the F.C. "for having on two occasions

distinguished himself by his gallant and daring conduct. First, on the night of Aug. 12, 1857, at Neemuch, in volunteering to apprehend seven or eight armed mutineers, who had shut themselves up for defence in a house, the door of which he burst open. He then rushed in among them, and forced them to escape through the roof; in this encounter he was severely wounded. In spite of his wounds, he pursued the fugitives, but was unable to come up with them in consequence of the darkness of the night. Second, on Oct. 23, 1857, at Jeerum, in fighting his way most gallantly through a body of rebels, who had literally surrounded him. After breaking his sword on one of their heads, and receiving a severe sword cut on his right arm, he rejoined his troop. In this wounded condition, and with no other weapon than the hilt of his broken sword, he put himself at the head of his men, charged the rebels most effectually, and dispersed them."

BLAKE, The Hon. Edward, Q.C., LL.D., Canadian statesman, was born at Adelaide, Ontario, Oct. 13, 1833, and became M.A. of Toronto University, 1858. He began the practice of law in 1859, and in 1864 became a Queen's Counsel. In 1867 he was elected to the Ontario Legislature and also to the Dominion Parliament, and in 1871-72 was Premier of Ontario. This position he retained for only one Session, being obliged to resign it on account of the passage of the dual representation Act. He became a member, in 1873, of the Canadian Cabinet under the Mackenzie administration, serving for various periods as Minister of Justice and as President of the Council. The Chancellorship of Ontario and the Chief Justiceship of the Supreme Court of the Dominion were offered to him, but he declined both. In 1878 he, with many other members of his party, was defeated for re-election, but he re-entered the parliament in the following year, and has since been generally recognized as the leader of the Liberal party. He was chosen Chancellor of the University of Toronto in 1876, and has repeatedly been re-elected since. The honour of knighthood was declined by him in 1877. In 1889 the degree of LL.D. was conferred upon him by the University of Toronto.

BLAKE, Henry Arthur, K.C.M.G., F.R.G.S., born at Corbally, Limerick, Jan. 18, 1840, is the eldest son of Peter Blake, Esq., County Inspector of Irish Constabulary, second son of Peter Blake, Esq., of Corbally Castle, Co. Galway (see title "**WALLSCOURT**," *Burke's Peerage*),

and Jane, daughter of John Lane, Esq., of Lanespark, Co. Tipperary (Capt. 17th Light Dragoons). He was educated at Dr. St. John's academy, Kilkenny, and Santry College; entered the Royal Irish Constabulary Feb., 1859; Resident Magistrate 1876; was one of the five Special Resident Magistrates (now Divisional Commissioners) selected in Jan., 1882, to concert and carry out measures for the pacification of Ireland; had executive charge of the following counties—Kildare Co., Queen's Co., Meath, Carlow, Galway East and Galway West; was Governor of Bahama 1884 to 1887; Governor of Newfoundland 1877 to 1888, in which year he was appointed Governor of Queensland, but resigned his commission on return to England. He was appointed Captain-General and Governor-in-Chief of Jamaica, Jan., 1889. He has contributed from time to time articles in *The Westminster Review*, *The Nineteenth Century*, *The Fortnightly*, *The St. James's Gazette*, &c.; and has published "Pictures from Ireland," by Terence M'Grath. He married, 1st, in 1862, Jane, eldest daughter of Andrew Irwin, Esq., Ballymore, Co. Roscommon; she died in 1866; 2nd, 1874, Edith, eldest daughter of Ralph Bernal Osborne, Esq., of Newton Anner, Co. Tipperary.

BLASHILL, Thomas, Capt. H.A.C., son of Henry Blashill, Esq., of Sutton-on-Hull; was educated at Hull and Scarborough, and professionally in London offices, and at University College. He is the Superintending Architect of Metropolitan Buildings, and Architect to the London County Council, is a Member of Council of the Royal Institute of British Architects, and of the British Archaeological Association; a Past President (1862) of the London Architectural Association; a Fellow of the Surveyors' Institution, and F.Z.S. He was elected a District Surveyor of Metropolitan buildings 1876, and Superintending Architect 1887. He has published a "Guide to Tintern Abbey," 1879, and has read papers "On Health, Comfort, and Cleanliness in the House," before the Society of Arts; on "Oak and Chestnut in Old Timber Roofs," before the Institute of Architects; on "Party-walls, &c.," before the Architectural Association; on "Shoring," "The Growth and Seasoning of Timber," and on "English and Continental Doors," before the Carpenters' Company; and on "The Influence of the Public Authority on Street Architecture" before the Congress at Edinburgh in 1889.

BLAVATSKY, Madame Helena Petrovna, the foundress of the "Theosophical Society," was born at Ekaterinopol, in

the south of Russia, in 1831. She is, on her father's side, the daughter of Colonel Peter Hahn and grand-daughter of General Alexis Hahn von Rottenstern Hahn (a noble family of Mecklenburg, Germany, settled in Russia), and, on her mother's side, the daughter of Helene Fadeef and grand-daughter of Privy Councillor Andrew Fadeef and of the Princess Helene Dolgorouky; she is the widow of the Councillor of State, Nicephore Blavatsky, a late high official at Tiflis under the Grand Duke Michael, then viceroy of the Caucasus. At the early age of seventeen, she was married to a husband of sixty, for whom she had no affection and to whom she engaged herself in a fit of girlish petulance. Three months, however, put an end to this unsuitable union; by mutual agreement they separated, Madame Blavatsky going to her father and then abroad. At Constantinople she had the good fortune to meet one of her friends, the Countess K—, under whose protection she travelled for a time in Egypt, Greece and other parts of Eastern Europe. Ten years passed before she again saw her family, during which time her unquenchable love of travel and search for out-of-the-way knowledge carried her to all parts of the world, Colonel Hahn supplying his eccentric daughter with the requisite funds. In 1851 she started for Quebec to make acquaintance with the Red Indians so graphically described to her imagination in the novels of Fennimore Cooper. Disgusted by her personal acquaintance with the "noble red man," she went off to New Orleans, in quest of the Voodooes, a sect of negroes much given to magical practices. Thence she travelled through Texas to Mexico, and managed to see most of that insecure country, protected by her natural daring and fearlessness even in the roughest and most brutal communities. Leaving Mexico, with two companions of similar tastes, she sailed by the Cape and Ceylon to Bombay and attempted to enter Thibet by Nepal. Failing in this endeavour, she travelled through Southern India, and then on to Java and Singapore, whence she returned to Europe. The next two years were passed in the United States, but in 1855 Madame Blavatsky again went to India by Japan and the Straits, and with four compatriots made a second attempt to enter Thibet through Kashmir. Two of her companions were politely, but immediately conducted back to the frontier, and a third was prostrated with fever. In a suitable disguise, however, and conducted by a friendly Tartar Shaman, she herself succeeded in cross-

ing the frontier and penetrating the dreary deserts of that little known country. After some very strange adventures and getting lost in the pathless wilds of Thibet, she was mysteriously reconducted to the frontier by a party of horsemen. The mutiny troubles shortly afterwards beginning, she sailed from Madras to Java and thence again to Europe, and after spending some time in France and Germany returned home to Russia in 1858. From Pskoff, Madame Blavatsky went to Tiflis, where, riding one day in the forest, she was thrown from her horse and sustained a fracture of the spine which was the cause of a strange psychological experience. For eighteen months she lived a complete dual existence, and considerably puzzled the cleverest physicians who attended her. On her recovery in 1863, she left the Caucasus and went to Italy, passing the following four years in Europe and experiencing a multiplicity of adventures. From 1867 to 1870 she again visited the East. On her return, the vessel on which she was sailing from the Piræus to Spezzia, and which was carrying a cargo of gunpowder, blew up, and Madame Blavatsky was one of the very few passengers saved. From Greece she went to Alexandria and thence to Cairo, where she established a Society for the investigation of modern "Spiritualism" of which she then had had no experience; but speedily threw it up in disgust, and, after spending some time at Boulak, returned to her family at Odessa in 1872. In 1873 she again left Odessa for Paris and crossed to New York which she made her headquarters for the next six years, becoming a naturalized American. During this period, she investigated some of the most striking phenomena of American "Spiritualism," and in 1875—together with Colonel Olcott, a well known and distinguished officer of the American army and a lawyer and journalist by profession, and other literary friends—founded the "Theosophical Society," with which her name has ever since been prominently connected. In defence of her opinions, Madame Blavatsky in 1876 published her first work, "Isis Unveiled, a Master-key to the Mysteries of Ancient and Modern Science and Theology," in 2 vols. 8vo. In 1887 she settled in London, and started a Theosophical magazine, called "Lucifer, the Light-bringer," of which she is still editor together with Mrs. Annie Besant. In France she has been actively connected with three Theosophical reviews, viz. "Le Lotus," "L'Annuaire Théosophique," and "Le Lotus Bleu." In 1888 appeared the first two

volumes of her greatest work, "The Secret Doctrine, the Synthesis of Science, Religion and Philosophy." This was followed in 1889 by "The Key to Theosophy, a Clear Exposition in the Form of Questions and Answers of the Ethics, Science and Philosophy, for the Study of which the Theosophical Society has been founded;" and by a smaller work, "The Voice of the Silence, or Fragments from the Book of the Golden Precepts."

BLIND, Karl, was born at Mannheim, Sept. 4, 1826, and studied jurisprudence and ancient Germanic literature at Heidelberg and Bonn. Active among students, working men, gymnastic associations, and the army, as a leader of Democratic circles, he was in 1846 and 1847 tried and imprisoned in Baden and Bavaria on charges of high treason, but acquitted. In 1848, at Karlsruhe, he took a leading part in the preparations for a national rising. Arrested while endeavouring to expand the movement into one for a German Commonwealth, he was freed by the successes of the Revolution. During the Provisional Parliament at Frankfort, he insisted, at mass-meetings, on the abolition of the princely Diet, and the election of a provisional revolutionary executive. Wounded in a street-riot, he was proscribed after participating in the Republican rising led by Hecker. From Alsace he agitated for a new levy. Falsely accused of being implicated in the Paris Insurrection of June, he was imprisoned at Strassburg, and transported in chains to Switzerland; the Mayor of St. Louis generously preventing his surrender to the Baden authorities, which had been planned by the French police. During the first Schleswig-Holstein war, he, with Gustav von Struve, led, in Sept., 1848, the second Republican Revolution in the Black Forest. At the storming of Staufen, he fought on the barricade, and was among the last who left the town. Being made a prisoner through the treachery of some militiamen, he was court-martialled: his life being saved by the secret sympathy of two of the privates who were members of the Court. Sentenced, after a State trial, lasting ten days, to eight years imprisonment in the spring of 1849, he was being secretly transported to the fortress of Mainz, when he was liberated by the people and soldiers breaking open the prison at Bruchsal. Heading the same day a hastily formed number of free corps, he endeavoured, with Struve, to take Rastatt, and then entered the capital of Baden. He was a firm opponent of Brentano, the chief of the new Government, whom he

accused of being in occult connection with the ejected dynasty—a fact afterwards proved when Brentano was declared a "traitor" by the Constituent Assembly. With Dr. Frederick Schütz he was sent on a diplomatic mission to Paris, accredited to Louis Napoleon, the then President of the Republic. There, in violation of the law of nations, he was arrested as being implicated in Ledru-Rollin's rising for the protection of the Roman Republic, and threatened with being surrendered to the Prussian courts-martial if he continued to uphold his diplomatic quality. He refused to yield, and after several months of imprisonment, was banished from France. After this, he lived in Belgium, with his wife, who has made many sacrifices for the popular cause, and also undergone imprisonment. New prosecutions induced him to come with his family to England, whence he carried on a Democratic and National German Propaganda. After an amnesty in 1862, the House of Deputies at Stuttgart gave him a banquet. He was the speaker of the London Germans at Garibaldi's entry. He promoted the Schleswig-Holstein movement in connection with leaders of the Schleswig Diet, whose confidential communications he transmitted to the English Foreign Office; and he was at the head of the London Committee during the war of 1863-64. At Berlin, his step-son met with a tragic death in the attempt on the life of Prince Bismarck on May 7, 1866. For many years, Karl Blind operated with Mazzini, Garibaldi, and other European leaders, and supported the cause of Hungary, Poland, the American Union, and the American Republic; for which thanks were expressed to him by President Lincoln, and President Juarez. During the war of 1870-71, he supported his country's cause. In England he has been a member of Executive Committees on Transvaal, Egyptian, and other affairs. Many political writings, and essays on history, mythology, and Germanic literature, published in Germany, England, America, Italy, and Spain, have proceeded from his pen. He has asserted himself to bring about the national testimonial for the philosopher Feuerbach, and the monuments for the great minne-singer Hans Sachs, and for the famed minne-singer, Walther von der Vogelweide.

BLOMFIELD, The Right Rev. Alfred, D.D., Bishop of Colchester, is the youngest son of the late Dr. Charles James Blomfield, Bishop of London, and was born at Fulham, Aug. 31, 1833. From Harrow

school he proceeded to Balliol College, Oxford, where he obtained a first-class in classical moderations in 1853, and in *Literæ Humaniores* in 1854. In the latter year he gained the Chancellor's Prize for Latin Verse. He was elected to a Fellowship at All Souls' College, and took the degree of B.A. in 1855 and M.A. in 1857. He was ordained priest in 1858; was curate of Kidderminster 1857-60; perpetual curate of St. Philip's, Stepney, 1862-65; vicar of St. Matthew's, City Road, 1865-71; and vicar of Barking, Essex, 1871-82. In 1869 he was chosen as a Select Preacher at Oxford. He was appointed Archdeacon of Essex in 1878, and Archdeacon of Colchester in 1882. In the latter year he was also appointed Bishop of Colchester, as suffragan to the Bishop of St. Alban's, and he was consecrated in St. Alban's Cathedral by the Archbishop of Canterbury (June 24). A few days before he had been created D.D., *honoris causa*, by the University of Oxford. He is the author of "Memoirs of Bishop Blomfield," his father, 2 vols., 1863; and "Sermons in Town and Country," 1871.

BLOUËT, Paul "Max O'Rell," was born in Brittany (France), on March 2, 1848, educated in Paris, and took his degree of B.A. and B.Sc. in 1864 and 1865. He received his commission in the French army in 1869; fought in the Franco-Prussian war, was made a prisoner at Sedan on Sept. 3, 1870; fought against the Commune; was severely wounded, and pensioned. He came to England as newspaper correspondent in 1873; was appointed Head French Master of St. Paul's School in 1876, and resigned his mastership in 1884. He is the author of "John Bull and his Island," 1883; "John Bull's Daughters," 1884; "The Dear Neighbours," 1885; "Drat the Boys," 1886; "Friend MacDonald," 1887; and "Johnathan and his Continent," 1889. He has also written educational works, amongst which is "French Oratory," 1883. Several orders, French and others, have been conferred on "Max O'Rell." During the years 1887, 1888, 1889, and 1890, he gave lectures in the United Kingdom, and in America, where he has paid two visits.

BLUMENTHAL, Field-Marshal Leonard von, Chief of the General Staff of the Prussian Army, was born on July 30, 1810, at Schwedt, on the Oder. He was, like the majority of the leaders of the Prussian army, a soldier from childhood. Educated from 1820 to 1827 in the military academies of Culm and Berlin, he was entered on July 27, 1827, as Second Lieutenant in the Guard Landwehr regiment (the present

Fusilier Guards), attended from 1830-1833 the general military school in Berlin, was from 1837-1845 Adjutant to the Coblenz Landwehr battalion, and became for the first time in 1846 Premier Lieutenant in the topographical division of the General Staff. In order that he might be thoroughly acquainted with technical military science, Blumenthal had been ordered for service during the following years to the Artillery Guards and the division of the Pioneer Guards. He had already, in March, 1848, taken part as Lieutenant in the Fusilier battalions of the 31st Infantry Regiment in the street-fights in Berlin. Some months later, Blumenthal was transferred as Captain (Jan. 1, 1849) to the General Staff, to which he has, with slight interruptions, belonged for about twenty-five years. In 1849 he took, as a member of the staff of General von Bonin, part in the Schleswig-Holstein campaign, and fought in the skirmishes at Auenbüll and Beuschau, in the battle of Colding, and in the affairs at Alminde, Gudsøe, and Tauloo-Church, and took, in the siege and battle of Fredericia, so active and conspicuous a part, that he was, on May 14, 1849, promoted as Chief of the General Staff of the Schleswig-Holstein Army. His capabilities were regarded as being so brilliant, that in the following year (1850) he was named as General Staff officer of the Mobile Division under General von Tietzen in the electorate of Hesse. He was next sent, intrusted with special military propositions, to England, and was rewarded with the Order of the Red Eagle (fourth class, with swords). On June 18, 1853, advanced to the rank of Major in the Grand General Staff, Blumenthal was, as military companion and as General Staff officer of the 8th Division, appointed to take part in the spring exercises of that year in Thuringia and at Berlin. His linguistic and departmental knowledge led to his being intrusted with further commissions to England. In 1859 he was named the personal Adjutant of Prince Frederic Charles. On July 1, 1860, he became Colonel and Commander of the 31st, later of the 71st Infantry Regiment. In 1861 he accompanied General von Bonin to the British Court, and became then the conductor of the foreign officers at the autumn manœuvres on the Rhine, and military companion of the Crown Prince of Saxony at the coronation in Königsberg. Colonel von Blumenthal had been for some time Chief of the Staff of the Third Army Corps, when, on Dec. 15, 1863, he was nominated the Chief of the General Staff of the combined

Mobile Army Corps against Denmark, and then had the first opportunity of exhibiting his splendid abilities. The part which he took in that war, especially at Missunde, in the storming of the trenches at Düppel, and the passage on to the island of Alsen, was so extremely important, that on June 25, 1864, he was promoted to be Major-General, and received the Order *pour le Mérite*. After the peace, General von Blumenthal commanded first the 7th and next the 30th Infantry Brigade. In the Austrian war of 1866 he was Chief of the General Staff of the Second Army of the Crown Prince, and for his distinguished services received the Oak-leaf of the Order *pour le Mérite* (one of the rarest distinctions in the army) and the Star of Knight Commander of the Order of the House of Hohenzollern. On Oct. 30, 1866, he was designated Commander of the 14th Division in Düsseldorf, and accompanied the Crown Prince in the autumn of 1866 to St. Petersburg. When, on the outbreak of the war with France, the Crown Prince was intrusted with the supreme command of the Third Army, General von Blumenthal was requested to accept the important post of Chief of the General Staff; and his Imperial Highness, when presented by the Emperor of Germany with the Iron Cross, declared that the same distinction was equally due to General von Blumenthal. In 1871 he was sent to England to represent the German Empire at the autumn manoeuvres at Cobham. It is unnecessary to add more than that von Blumenthal was made Field-Marshal in 1888, and is recognized as one of the most distinguished strategists of modern times.

BLUNT, Arthur Cecil (known on the stage as Arthur Cecil), the son of a well-known solicitor, was educated at East Sheen, and at first intended for the army. But he soon displayed a great talent for music and acting, and first appeared as an amateur at the little theatre on Richmond Green, which had once witnessed the triumphs of Kean, and the *début* of Helen Faucit. In 1869 he appeared at the "Gallery of Illustration" in Mrs. German Reed's company, as Mr. Churchmouse in "No Cards," and as Box in the musical version of "Box and Cox." He acted for five years in Mrs. German Reed's company, and it was here that he attained that power of disguise of face and manner which has always been one of his chief characteristics. Mr. Cecil's principal parts on the stage proper have been Dr. Downward in Wilkie Collins's "Miss Gwilt;" Sir Woodbine Grafton in

"Peril;" The Rev. Noel Haygarth in "The Vicarage;" John Hamond, M.P., in "Duty;" Baron Verduret in "Honour;" Baron Stein in "Diplomacy;" Ned Guyon in the "Millionaire;" and Mr. Posket in the "Magistrate;" Mr. Cecil was joint manager with Mr. John Clayton, of the old Court Theatre, Sloane Square, from 1883 to 1887. At the New Court Theatre he has appeared under Mrs. John Wood's management in "Mamma" and "Aunt Jack," and is now (1890) playing the title rôle in "The Cabinet Minister."

BLYTH, Sir Arthur, C.B., K.C.M.G., F.R.G.S., third son of the late William Blyth, of Birmingham, who married Sarah, the third daughter of the Rev. William Wilkins of Bourton-on-the-water, Gloucestershire, was born in Birmingham on March 19, 1823. He migrated, with his father, mother, and three brothers, to South Australia in 1839, leaving King Edward's School, Birmingham, where he finished his education. He entered public life in South Australia as member for Tatata, under the Old Constitution, in 1855, and assisted in the passing of the New Constitution Act; was Commissioner of Public Works in the Responsible Government, 1857, '58, '59, '60, Treasurer in 1861, '62, '63 and '76, and Premier in 1872. He was Commissioner of Crown Lands and Immigration, 1864, '65, '70, and '71, Chief Secretary 1866, '67, Chief Secretary and Premier 1873, '74, '75; was appointed Agent-General for South Australia in London February 16, 1877; was a Commissioner for South Australia at the Paris Exhibition of 1878, and also Executive Commissioner at the Colonial and Indian Exhibition held in London in 1886; he was created a Knight Commander of the most distinguished Order of St. Michael and St. George in 1877, and a Companion of the most honourable Order of the Bath, Civil Division, in 1886.

BODDA-PYNE, née Louisa Pyne, a popular English singer, daughter of a well-known singer, Mr. G. Pyne, was born in 1832, and was at a very early age the pupil of Sir George Smart, and made her first appearance about 1842. She sang in Paris with great success in 1847, appeared in opera in 1849, performed at the Royal Italian Opera in 1851, and visited the United States, where she was enthusiastically received, in 1854. After an absence of three years she returned to her native land, and was, in conjunction with Mr. Harrison, joint lessee for a short season of the Lyceum and Drury Lane, and from

1858 till 1862 of Covent Garden Theatre. The enterprise having failed, she transferred her services to Her Majesty's Theatre, and has frequently performed at Her Majesty's Concerts at Windsor Castle and Buckingham Palace. She is married to Mr. Frank Bodda.

BODICHON, M^{de}., whose maiden name was Barbara Leigh Smith, the eldest daughter of the late Mr. Benjamin Smith, many years M.P. for Norwich, was born April 8, 1827, at Watlington, Sussex, and at an early age took a deep interest in social questions. In 1855-56 she started, in conjunction with some personal friends, a movement having for its object to secure to married women their own property and earnings; and although their efforts did not prove successful in obtaining directly from Parliament the measure they desired, they led to a change in the law of marriage and divorce. Miss Smith established at Paddington a school for the education of the daughters of artisans of the middle class. In July, 1857, she married M. Eugène Bodichon, M.D. (now deceased), and has since resided in Algeria. Madame Bodichon, by her efforts and munificent donation of £1000, was mainly instrumental, with Miss Emily Davies, in founding the now flourishing and well-known College for Women at Girton, near Cambridge, where precisely the same course of academical instruction which is afforded to men in the universities is given to female students. It is, however, as a charming and original water-colour artist that Madame Bodichon is best known to the public, her collection of water-colour drawings having been exhibited several times in London, at the Royal Academy and Dudley Gallery, also in Paris and elsewhere.

BODY, George, D.D., Canon Missioner of Durham, was born at Cheriton, Fitzpaine, Devonshire, on January 7, 1810, and was educated at Blundell's School, Tiverton, under the head mastership of Rev. T. B. Hughes, M.A. From this school he passed as a Diocesan Student, from the Diocese of Exeter, to St. Augustine's Missionary College, Canterbury. Through ill-health he had to give up his purpose of undertaking foreign missionary work, and passed from Canterbury to St. John's College, Cambridge, in October, 1859. In Lent, 1863, he was ordained Deacon, his first Curacy being at St. James's, Wednesbury, in the Diocese of Lichfield. From Wednesbury he went to the Curacy of Sedgley, in the same Diocese, and from Sedgley to Wolverhampton. In 1870 he

was appointed Rector of Kirby, Misperton, on the nomination of the Earl of Feversham, which benefice he held until 1884. In 1883 he was called to the Diocese of Durham as Canon Missioner. From 1880-85 he represented The Archdeaconry of Cleveland in the Convocation of York. In 1885 he was made D.D. of Durham (*honoris causa*), and in 1890 was elected a Vice-President of the Society of the Propagation of The Gospel in Foreign Parts as a recognition of his interest in foreign mission work. He has published many Sermons and two volumes of Lectures: (1) "The Life of Justification," in 1870, and (2) "The Life of Temptation," in 1870, each of which is in its 7th edition.

BOEHM, Sir Joseph Edgar, Bart., R.A., sculptor, was born in Vienna, July 6, 1831, of Hungarian parents. His father was Director of the Mint in the Austrian Empire. He was educated at Vienna, and from 1848 to 1851 in England. He studied also in Italy, and for three years in Paris, but has been settled in England since 1862. He received the first Imperial Prize and exemption from military conscription in Vienna in 1856. He was elected a member of the Academy of Florence in 1875; an Associate of the Royal Academy of London in 1878; a member of the Academy of Rome in 1880; and a full Academician by the Royal Academy here in 1882. He was nominated in 1881 Sculptor in Ordinary to the Queen, and he has delivered lectures on sculpture in the Royal Academy. In Aug., 1882, the gold medal given by Austria-Hungary at the Vienna Art Exhibition was awarded to him. Mr. Boehm executed a colossal statue in marble of the Queen for Windsor Castle, in 1869; also a monument of the Duke of Kent in St. George's Chapel, and bronze statuettes of the Prince of Wales and all the Royal Family (for the Queen); also a colossal statue at Bedford of John Bunyan, 1872; and another in gilded bronze of the Duchess of Bedford for the Park, Woburn Abbey, 1874; a statue of Sir John Burgoyne in Waterloo Place; a colossal equestrian statue of the Prince of Wales for Bombay, 1877; a colossal figure of an angel in marble for Castle Ashby for the Marquis of Northampton; and an equestrian group in bronze for Eaton; also a marble statue of the late King Leopold of Belgium, for St. George's Chapel at Windsor; and he was commissioned by the Queen to execute a recumbent statue of the late Princess Alice and her daughter, Princess Maud, for the Royal Mausoleum at Frogmore, and a replica of

it for Darmstadt. After the death of the Prince Imperial he was commissioned to execute a recumbent statue of him for Westminster Abbey; but public opinion being strong against its being placed there, it was transferred to St. George's Chapel, Windsor. A statue, 12 feet high, of William Tyndall (the first translator of the Bible into English) has been executed by him for the Thames Embankment. He has also executed a marble bust of General Gordon as well as a recumbent statue of the General for St. Paul's; likewise a colossal statue of the Queen for Sydney (Australia); and has received a command from Her Majesty for the effigy of H.R.H. the late Duke of Albany in Highland Costume for the Albert Chapel at Windsor, and busts for the Mausoleum and Balmoral Castle. In 1889 Mr. Boehm was created a Baronet of the United Kingdom, and is at present (1890) engaged upon a fountain with mythological subjects for the Duke of Bedford, an equestrian group for Baron Rothschild, and an equestrian statue of the late Lord Napier of Magdala, which is to be placed between the United Service Club and the Athenæum.

BOISSIER, Professor Marie Louis Gaston, born August 15, 1823, at Nîmes, was educated at the Lycée of that town, and at the Collège Louis-le-Grand, Paris. In 1846 he became Professor of Rhetoric at Angoulême, and ten years later was called to Paris as supplementary professor at the Lycée Charlemagne. In 1861 he proceeded to the Collège de France, as Professor of Latin Oratory. On June 8, 1876, he was elected a member of the French Academy. M. Boissier has written "Le Poète Attius," 1856; "Une Étude sur Terentius Varron," 1859; "Cicéron et ses Amis," 1866; "La Religion Romaine d'Auguste aux Antonins," 1875; and many critical papers in the *Revue des Deux Mondes*, and the *Revue de l'Instruction Publique*.

BONAPARTE, His Highness the Prince Louis-Lucien, is the fourth son of Lucien Bonaparte, Prince of Canino, brother of the Emperor Napoleon I. He was born at Thorn Grove, near Worcester, on Jan. 4, 1813, during the time that his father was prisoner on parole in England. After the battle of Waterloo, the family of the young prince removed into the Papal States, where he passed his early youth. Later on, he resided at Florence, and remained there until the revolution in 1848, when he entered France, and was elected deputy for Corsica, and shortly afterwards member of the Legislative

Assembly. On Dec. 31, 1855, he was elected senator, and received the title of Highness, and, in 1863, was nominated Grand Cross of the Legion of Honour. He is a D.C.L. of Oxford, and honorary Fellow of the Royal Society of Literature. His Highness was one of the founders of the Copenhagen Royal Society of Northern Antiquaries; is honorary member of the St. Petersburg Imperial Academy of Sciences; one of the twenty-five honorary members of the Scotch Society of Antiquaries; and Vice-President of the Philological Society of London. In 1884 the prince was placed on the English Civil List, and granted a pension of £250 per annum, in recognition of his eminence as a philologist. His works, most of which have been privately printed, embrace nearly all the European languages, but it is the Basque language which he has made his special study. His earliest writings were chiefly upon chemical subjects, such as "Recherches chimiques sur le venin de la vipère," in the *Gazzetta Toscana delle Scienze Medico-Fisiche* of Florence, and "Recherches sur les valérianates de quinine et de zinc, sur le lactate de quinine, la phloridzine et leur application à la Thérapeutique," in the *Journal de Chimie-Médicale*. His philological publications have extended from 1847 to the present time, and we can quote only a few: "Specimen lexicæ comparativæ omnium linguarum Europæarum," Florence, 1847; "La verbe basque, par l'abbé Inchauspe; Langue basque et Langues finnoises," London, 1862; "Carte des sept provinces basques, montrant la délimitation actuelle de l'euskara et sa division en dialectes, sous-dialectes et variétés," London, 1863; "Classification morphologique des Langues Européennes," London, 1863; "Formulaire de grammaire en langue basque conservé naguère dans l'église d'Arbonne, réédité et suivi de quelques observations linguistiques sur les sous-dialectes bas-navarrais et navarro-souletin de France et d'Espagne," London, 1866; "Orthographe applicable au patois de la Langue d'Oïl," London, 1867; "Le verbe basque en tableaux," London, 1869; "Beatrice. Notti tre. Per Giulio Luca in Partenabo (an anagram of the Italian spelling of his Highness's name) de' Cadolingi, cavaliere Etrusco. Osservazioni fonetiche, onde agevolare a' non Italiani, non che a molti Italiani, la corretta pronunzia toscana," London, 1879; "The simple sounds of all the Slavonic Languages compared with those of the principal Neo-Latin and Germano-Scandinavian Languages," London, 1880; "A list of the living Euro-

pean Languages into which the Bible has been translated and printed," London, 1881; "Descubrimiento de manuscritos bascos en Inglaterra," Pamplona, 1884; "Linguistic Islands of the Neapolitan and Sicilian Provinces of Italy, still existing in 1889, with eleven maps," Hertford, 1890.

BOND, Edward Augustus, C.B., LL.D., F.S.A.; son of the Rev. Dr. Bond, of Hanwell, Middlesex, was born Dec. 31, 1815. He was educated in his father's house, and at Merchant Taylors' School, London. In 1832 he received an appointment under the Commissioners of Public Records. In 1838 he entered the British Museum as an Assistant in the Department of Manuscripts. He was appointed Librarian of the Egerton MSS. in 1852, Assistant-Keeper of the MSS. in 1854, and Keeper of the Department in 1866. In Aug., 1878, he was appointed Principal Librarian of the British Museum, and resigned the office in July, 1888. As Keeper of the MSS., Mr. Bond designed, and, with the help of his staff, completed in 1870, a Class-Catalogue of the several collections of manuscripts in the British Museum, and subsequently he published a Catalogue of all the Manuscripts, Papyri, and Charters acquired during the years 1854-75, in two 8vo volumes; also a series of Facsimiles of Anglo-Saxon and other Ancient Charters in the Museum, with exact Readings, in four parts. He has contributed papers to the *Archæologia* of the Society of Antiquaries, including an "Account of Money-lending Transactions of Italian Merchants in England in the Thirteenth and Fourteenth Centuries," 1839. He passed through the press, for the Oxford Commissioners, the "Statutes of the University," in 3 vols. 8vo, 1853; edited for the Hakluyt Society, in 1856, Dr. Giles Fletcher's "Russe Commonwealth," and Sir Jerome Horsey's "Travels in Russia;" edited for Government "The Speeches in the Trial of Warren Hastings," 4 vols. 8vo, 1859-61; and for the Rolls Series of Chronicles, the "Chronicon Abbatæ de Melsi," in 3 vols. In 1870, conjointly with his colleague, Mr. E. M. Thompson, he founded the Palæographical Society, of which he is President, and, in collaboration with that gentleman he has edited the series of "Facsimiles of Ancient Manuscripts and Inscriptions," produced by the Society. The University of Cambridge conferred on Mr. Bond the honorary degree of LL.D. in 1879. He was made a Companion of the Bath in the year 1885; and he has received the

Order of the Crown of Italy. In the year 1847 he married Caroline Frances, eldest daughter of the Rev. Richard Harris Barham, author of the "Ingoldsby Legends."

BOND, The Right Rev. William Bennett, M.A., LL.D., Bishop of Montreal, was born at Truro, in 1815. He received his education in various public and private schools in Cornwall and in London, and at an early age emigrated to Newfoundland, where he studied for the ministry with Archdeacon Bridge; and at Montreal, to which he had meantime repaired, was, in 1840, or aided a deacon, and in 1841 a priest. For several years, under the direction of the late Bishop Mountain, of Quebec, he organised many mission stations in the Eastern Townships of the Province of Quebec; was incumbent of Lachine for a number of years; and assistant minister in St. George's, Montreal, of which he finally became incumbent. He maintained his connection with this parish for the long period of thirty years, successively becoming Archdeacon of Hochelaga and Dean of Montreal. On the resignation of Bishop Oxenden, he was in 1879 elected by the synod of the diocese to the Bishopric of Montreal. Bishop Bond is President of the Theological College of the Diocese of Montreal, and is an LL.D. of the University of McGill College.

BON GAULTIER. See MARTIN, SIR THEODORE.

BONGHI, Ruggiero, Italian writer and statesman, was born at Naples, March 20, 1828. At the age of eighteen he published a translation of Plotinus, which was followed in 1846 by a translation, with critical notes, of Plato's "Philibe." At the beginning of the revolutionary movement of 1848 he established a journal in Florence, *Il Nazionale*, and took an active part in the events up to 1849, for which he was exiled from the kingdom of Naples. He then formed a close friendship with Manzoni and Rosmini, and again took up his philosophic studies. In 1857 he published an important translation of Aristotle's *Metaphysics*, and in 1858 a new edition of the works of Plato. In 1859 he was made Professor of Philosophy at the new Academy at Milan, and the following year entered the Italian Parliament. In 1863 he started at Turin a journal, *La Stampa*, in the cause of moderate democracy, and in 1864 was appointed Professor of Greek Literature in the University of that city. The next year he went to Florence as Professor of Latin, and

became a member of the Superior Council for Teaching. Subsequently he returned to his Chair at the Academy at Milan, and there edited *La Perseveranza*. From Milan he went to the University at Rome as Professor of Ancient History, and thence to Naples in 1872 to assume direction of the *Unità Nazionale*. On the 3rd October, 1874, Signor Bonghi was appointed Minister of Public Instruction in the Minghetti Cabinet. He has done much to promote education in Italy, and has written much and admirably on the questions of Church and State. Besides the works already mentioned he is the author of "Lettere critiche sul perchè la letteratura italiana non è popolare in Italia," 1873, 3rd edit.; "Storia della finanza italiana," 1864-68; "La Vita e i Tempi di Valentino Bassini," 1869; "Frati, Papi e Rè," 1873; "Leone XIII. e l'Italia," 1878; "Il Congresso di Berlino e la crisi d'Oriente," 1878; "Francesco d'Assisi," 1884.

BONHEUR, Mademoiselle Rosalie, called Rosa, an artist unrivalled amongst her own sex for the minute and spirited delineation of the various forms of animal life, was born at Bordeaux, March 22, 1822. The daughter of a French artist of some distinction, she profited by the instructions of her father, who was her sole adviser in the mechanism of painting. As the avocations of her family compelled them to reside in Paris, the indulgence of her own particular tastes in the choice of subjects for study was somewhat difficult of attainment, and she derived her early instruction from a study of such animal life as could be seen by her in the streets and *abattoirs* of Paris. In 1841 she entered upon her career by exhibiting two pictures, "*Chèvres et Moutons*" and "*Les Deux Lapins*," which established her reputation. These were followed by a succession of highly finished compositions, amongst which may be cited the celebrated "*Labourage Nivernais*," which was completed in 1849, and has been added to the collection in the Luxembourg. She attends the horse-markets both in France and abroad, adopting the masculine garb, which is not ill-suited to the decided character of her face, and enables her to inspect and to purchase her subject with less interruption and remark. She has fitted up an ante-chamber divided only by a partition from her studio, as a stable for the convenience of the various animals domesticated therein, and has established a small fold in its immediate vicinity for the accommodation of sheep and goats. It is owing, in a measure, to this conscientious

examination of the developments of animal life that she has produced such masterpieces of representation as the "*Horse Fair*," a picture which formed the chief attraction at the French Exhibition of pictures in London during the season of 1855, and which almost monopolized for a time the attention of artists and connoisseurs. In 1855 she sent to the Universal Exhibition in Paris a new landscape of large dimensions, "*The Haymaking Season in Auvergne*." Rosa Bonheur has evinced in her works a wonderful power of representing spirited action, which distinguishes her from other eminent animal painters of the day, and which endows her pictures as compositions with extraordinary interest. Several of this lady's productions have been engraved for the English public. Since 1849 she has directed the gratuitous School of Design for Young Girls of Paris. She obtained a first-class medal in 1848, and another in 1855. She was decorated with the Legion of Honour, June 10, 1865, and in 1868 she was appointed a member of the Institute of Antwerp. During the siege of Paris in 1870-71, her studio and residence in Fontainebleau were spared and respected by special order of the Crown Prince of Prussia. Two important pictures by this artist, "*A Foraging Party*," and "*On the Alert*," were exhibited at the Antwerp Academy in 1879, and in London in 1881. "*The Lion at Home*," exhibited in London, 1882, was a result of the painter's study of a fine couple of Nubian lions which were presented to her by a friend. In Jan., 1880, the King of the Belgians conferred the Leopold Cross on Mdlle. Rosa Bonheur, who was the first lady to receive this distinction; and in the following month she received from the King of Spain the Commander's Cross of the royal Order of Isabella the Catholic, this being the first instance in Spain of such a distinction being conferred upon a woman.

BONNAT, Léon, a French painter and Member of the Institute, was born at Bayonne, June 20, 1833, was a pupil of Madrazo and Léon Cogniet, and in 1857 obtained the second prize at Rome for his "*Résurrection de Lazare*." Since that time he has been a constant exhibitor at the annual Salons. Among his works may be mentioned "*Le bon Samaritain*," 1859; "*Adam et Eve trouvant Abel mort*," 1861; "*Pèlerins dans l'église Saint Pierre de Rome*," 1864; "*Ribéra dessinant à la porte de l'Ara Coeli à Rome*," 1867. After a tour in the East he produced the "*Assumption*," 1869;

"Femme fellah et son enfant," 1870; "Femmes d'Ustaritz," 1872, and many others which have been rendered popular through engravings. M. Bonnat obtained two medals of the second class in 1861 and 1867, and the Medal of Honour in 1869. In 1867 he was decorated with the Legion of Honour. For many years he has confined himself to portraiture, and his best portraits, such as those of Thiers and Victor Hugo, have gained for him great and wide celebrity.

BONNEY, Professor, The Rev. Thomas George, D.Sc. (Cantab.), LL.D. (Montreal), F.R.S., F.S.A., F.G.S., &c., son of late Rev. T. Bonney, M.A., was born July 27, 1833, at Rugeley, and educated at Uppingham School and St. John's College, Cambridge, where he graduated as 12th Wrangler and 16th in second class classics in 1856. He was elected in 1859, to a Fellowship, which he still holds. From 1856 to 1861 he was Mathematical Master at Westminster School, but returned to Cambridge in the latter year. During his residence there he was active in securing for Natural Science a due place in Academic studies and promoting reforms in the University. He was appointed a tutor of the College in 1868, and was lecturer in Geology. In 1877 he was elected Professor of Geology at University College, London, and in 1881, on being appointed Secretary of the British Association, finally quitted Cambridge to reside at Hampstead. He resigned the latter post in 1885, was President of the Geological Section at the Meeting in 1886, and delivered one of the Evening Discourses in 1888. He was for six years Secretary of the Geological Society, and afterwards President. In 1880 he received the Wollaston Medal. He has been also President of the Mineralogical Society. In Geology, Prof. Bonney has chiefly devoted himself to Petrological and Physical questions, and has written numerous papers printed in the Quarterly Journal of the Geological Society, the *Geological Magazine*, the publications of the Royal Society, &c. He is a member of the Alpine Club, and has been its President. On Alpine subjects, he is the author of "Outline Sketches in the High Alps of Dauphiné," 1865; "The Alpine Regions," 1868; besides furnishing the text to several illustrated works on the Alps, Norway, &c. He has also contributed largely to several works of descriptive topography, such as "Picturesque Europe," "Our Own Country," "English Cathedrals," &c., and translated Pierotti's "Jerusalem Explored," 1864; and "Customs of Palestine," 1864. Or-

dained in 1857, Professor Bonney was one of the Cambridge Preachers at the Chapel Royal, Whitehall, 1876-8, and has been five times a special preacher before the University of Cambridge, on the last occasion being Hulsean Lecturer. These lectures, "On the Influence of Science on Theology," have been published (1885), besides two other small volumes and several detached sermons. He is an Examining Chaplain to the Bishop of Manchester, and an Honorary Canon of that Cathedral.

BOOTH, Edwin, American actor, was born at Bel Air, near Baltimore, Maryland, Nov. 15, 1833. He is a son of the late Junius Brutus Booth, and was trained for the dramatic profession under his father's guidance. Having filled a few minor parts, he made his first regular appearance on the stage as Tressel, in "Richard III.," at Boston, in 1849, and in 1851 performed the character of Richard III., at New York, in place of his father, who had been suddenly taken ill. After a tour through California, Australia, and many of the Pacific Islands, he re-appeared at New York in 1857, visited England and the Continent in 1861, and returning to New York commenced a series of Shakspearean revivals at the Winter Garden Theatre in 1863. After a series of engagements in Boston, Philadelphia, and other large cities, he began, in 1868, the erection of a new theatre in New York, which was opened Feb. 3, 1869; but the cost of the building, in which Mr. Booth had invested all his means, prevented ultimate pecuniary success, and the theatre passed from his hands and was finally pulled down (1882). For several years he virtually retired from the stage, but near the close of 1877 he began in New York a series of performances. He rarely undertakes any except the leading characters of Shakspeare: Hamlet, Othello, Iago, Shylock, and Richard III., Hamlet being his most admired impersonation. In 1881 he went to England, where he remained for two years, and where he alternately took the parts of Othello and Iago with Mr. Irving. In the early part of 1883 he played Shakspearean parts at Berlin and Hamburg. He published in 1877-78 an edition of the principal plays in which he has appeared, with the text as adapted by himself for stage use, and with introductions and notes by William Winter (15 vols.).

BOOTH, The Rev. William, General of the Salvation Army, was born at Notting-ham, April 10, 1829, and educated at a private school in that town. He studied

theology with the Rev. Wm. Cooke, D.D., became a minister of the Methodist New Connexion in 1850, and was appointed mostly to hold special evangelistic services, to which he felt so strongly drawn that when the Conference of 1861 required him to settle in the ordinary circuit work, he resigned, and began his labours as an evangelist amongst the churches wherever he had an opportunity. Coming in this capacity to the East End of London he observed that the vast majority of the people attended no place of worship, and he started "The Christian Mission" in July, 1865. To this mission, when it had become a large organisation, formed upon military lines, he gave in 1878 the name of "The Salvation Army," under which it soon became widely known, and grew rapidly until it had in Dec., 1885, 1,322 corps, at stations established in the United Kingdom, France, the United States, Australia, India, the Cape of Good Hope, Canada, and Sweden. 3,076 officers or evangelists are entirely employed in and supported by this Army under the General's absolute direction, and they hold upwards of 25,496 services in the open air and in theatres, music halls, and other buildings every week. The General has published several hymn and music books, volumes entitled "Salvation Soldier," "Training of Children," and "Letters to Soldiers," describing his views as to religious life and work. "Holy Living," and "Orders and Regulations for the Salvation Army," are some of the smaller publications issued by him for the direction of the Army as to teaching and services. He also contributed an article on "The Salvation Army," to the *Contemporary Review* for Aug., 1882. Mrs. Booth shared largely in all the General's efforts, and further explained their views in "Practical Religion," "Aggressive Christianity," "Godliness," "Life and Death," and "The Salvation Army in relation to Church and State." She died of cancer, in Oct., 1890, after a painful illness borne with Christian fortitude. The General's eldest son is his Chief of Staff, managing all the business, his eldest daughter with her husband directs the work in France, the second son commands the forces in America, the third son is in charge of the work in Great Britain, the second daughter, together with her husband, supervises the operations in India and Ceylon, the third daughter, as Field Commissioner, conducts mass meetings in the chief English cities, the fourth daughter is at the head of the Women's Training Depôts established in various

parts of London, so that each member of the family is actively employed in some branch of the Army's service. The General established *The War Cry* as a weekly gazette of the Army in 1880. It is now published weekly in England, similar papers being published at each Colonial and Foreign headquarters, so that there are now 28 weekly *War Cry's*, with a united circulation of over 558,000. *En Avant* in Paris, *Strids Ropet* in Stockholm, the *Jangi Pokar* (Gujarati) edition in Gujarat, a Tamil one in Madras, a Singhalese one in Ceylon, and an English and Marathi edition in Bombay. Belgium, Holland, and Germany also publish separate editions in their respective languages. In Nov., 1890, he published a volume entitled "Darkest London," containing a scheme for the enlightenment and industrial support of the lower classes. This has met with almost universal support; H.R.H. the Prince of Wales, the Archbishops and Cardinals, and many others having testified their approval of the scheme.

BORTHWICK, Sir Algernon, Bart., M.P., is the son of the late Mr. Peter Borthwick, formerly member for Evesham. When a young man he went to Paris as correspondent to the *Morning Post* (with which his father was connected), and was present at the *Coup d'Etat* in Dec., 1851. On the death of his father in 1853 he came to London and undertook the management of the *Morning Post*, subsequently becoming owner of the property. Sir Algernon was the chief promoter of the *Owl*, a paper which appeared during the parliamentary session of 1864, and created a great sensation on account of the bold way in which State secrets were revealed and discussed. The authorship was kept a secret for many years, and the paper itself came to an end in 1870. In 1880 Mr. Borthwick offered himself as a Conservative candidate for the borough of Evesham, formerly represented by his father; he was, however, defeated by a small majority and did not enter Parliament till 1886, when he was returned for South Kensington. At the general election of 1886 Sir Algernon was again returned for South Kensington. He is President of the Press Fund, and also of the Newspaper Society; vice-President of the Institute of Journalists, and a Fellow of King's College, London. Sir Algernon married, in 1870, Alice Beatrice, youngest daughter of the late Lady Theresa Lewis, and niece of the Earl of Clarendon and of Earl Russell.

BORTON, General Sir Arthur, G.C.B.,

G.C.M.G., is the youngest son of the late Rev. John Drew Borton, rector of Blofield, Norfolk, by Louisa, daughter of the Rev. Thomas Carthew, of Woodbridge, Suffolk. He was born at Blofield in 1814, and educated at Eton and at the Royal Military College at Sandhurst. He entered the army in 1832, became captain in 1841, and served with the 9th Regiment in the Afghanistan campaign of 1842, and the Sutlej campaign of 1845-6. He became lieutenant-colonel in 1853, was promoted to colonel in 1854, and served in the Crimea in command of the above regiment. His subsequent promotions were:—major-general 1868, lieutenant-general 1875, colonel of the 1st West Indian Regiment 1876, of the 9th—the Norfolk Regiment—in 1889, and general 1878. He was nominated a Companion of the Order of the Bath (Military Division) in 1854, and was promoted to a Knight Commander-ship of the same Order in 1877, and Knight Grand Cross in 1884. From 1878 to 1884 he was Governor and Commander-in-Chief of the island of Malta, and is a Knight of the Legion of Honour, and the 3rd class of the Medjidieh. General Sir Arthur Borton married, in 1850, Caroline, daughter of the late Rev. John Forbes Close, rector of Morne, County Down.

BOSISTO, Joseph, C.M.G., was born March 21, 1827, at Hammersmith. He became a druggist, and emigrated to Adelaide, South Australia, in 1848, where he remained for three years, and established the wholesale business of Messrs. Faulding & Co. After a short attack of the gold fever in 1851, he went to Melbourne, and began business at Bridge Road, Richmond. The business, at first almost purely a pharmaceutical one, soon developed into a regular manufacturing concern, and upon its founder discovering the remarkable antiseptic properties of the eucalyptus trees, it developed into a large undertaking. The Pharmaceutical Society of Victoria was founded by Mr. Bosisto in 1857, with the aid and cordial co-operation of a few of the chief pharmacists of Victoria, and has proved to have exerted a highly beneficial influence in the development of pharmaceutical and therapeutical knowledge throughout the Colony. Mr. Bosisto has sat as a Municipal Councillor for over 12 years, in the course of which time he held the office of Mayor for two consecutive periods. He was elected Chairman of the Richmond Magisterial Bench for five years successively, was returned to Parliament in 1874, and has always been placed at the head of the poll in the elections which have occurred since. Mr.

Bosisto was appointed President of the Royal Commission of Victoria at the Colonial and Indian Exhibition, 1886.

BOTTOMLEY, James Thomson, M.A., F.R.S., F.R.S.E., was born at Fortbreda, County Down, Ireland, on Jan. 10, 1845. His father was William Bottomley, merchant of Belfast, and Justice of the Peace; his mother was second daughter of the late Dr. James Thomson, Professor of Mathematics in the University of Glasgow, and a sister of Sir William Thomson, F.R.S., and Professor James Thomson, F.R.S., both professors in Glasgow University. Mr. Bottomley was educated partly at a private school and partly at the Royal Belfast Academical Institution. His parents intended that he should enter the then Established Church in Ireland, and he was sent to Trinity College, Dublin, with that object; but when he had passed through half of his undergraduate course, the desire of following a scientific career became so strong that he was permitted to pursue his bent. He then became a pupil, and subsequently an assistant, of the late Dr. Thomas Andrews, F.R.S., Professor of Chemistry in Queen's College, Belfast—studying with him Chemistry and Chemical Physics, and devoting much attention at the same time to Mathematics and Natural Philosophy. He finally took the degree of B.A. in Trinity College, Dublin, and the degrees of B.A. and M.A., with first-class Honours and Gold Medals in Natural Philosophy and Chemistry, in the Queen's University in Ireland. After a year's residence in Glasgow, with his uncle, Sir William Thomson, where he studied Chemistry under the late Dr. Thomas Anderson, and Physics in the Natural Philosophy Laboratory, Mr. Bottomley was appointed Demonstrator in Chemistry at King's College, London, under the late Dr. W. A. Miller, F.R.S. He held this office only one year; for, to his great disappointment, his health became injuriously affected in the Chemical Laboratory, and he was glad, with the consent of Dr. Miller, and at the wish of Professor W. G. Adams, to be transferred to the post of Demonstrator in Natural Philosophy in King's College. In 1870 he removed to Glasgow to take part in the teaching of the Natural Philosophy Class in the University, under a special arrangement made for that purpose, Sir William Thomson being at that time actively engaged in the great work of laying some of the submarine cables; and Mr. Bottomley has continued to assist, and when necessary represent, Sir William Thomson since that time. He

is the author of original papers as "Conduction of Heat," "Radiation of Heat," "Elasticity of Wires, &c.," which have been published in "The Philosophical Transactions of the Royal Society," "The Royal Society Proceedings," *Philosophical Magazine*, "Proceedings of the British Association," and elsewhere. He is also the author of elementary text-books on "Dynamics," and on "Hydrostatics," and of "Four Figure Mathematical Tables." He is Fellow of the Royal Society, of the Royal Society of Edinburgh, and of the Chemical Society, Member of the Institution of Electrical Engineers, and of the Physical Society.

BOUCHARDAT, Apollinaire, pharmacist, member of the Academy of Medicine, was born at l'Isle-sur-le-Serein (Yonne) about 1810, studied medicine in Paris whilst very young, and was named a Fellow of that faculty in 1832. He was pharmacist-in-chief at the hospital of Saint-Antoine, and in 1834 was appointed to the same functions at the Hôtel Dieu, which he fulfilled until 1855, when he resigned, in order to devote himself to scientific works. In 1838 he disputed with much talent the chair of pharmacy and organic chemistry in the faculty of Medicine with M. Dumas. In 1845 he was appointed a member of the Council of Health, and created a Chevalier of the Legion of Honour. He became a member of the Academy of Medicine in 1850, and, after competition, obtained the chair of Hygiène in 1852. In addition to numerous botanical and medical "memoirs," which have been published collectively under the titles of "Recherches sur la Végétation," M. Bouchardat has written a "Cours de Chimie Élémentaire, avec ses principales Applications à la Médecine et aux Arts," published in 1834-5; "Cours des Sciences Physiques," in 1841-4; "Éléments de Matière Médicale et de Pharmacie," in 1838; "L'Annuaire de Thérapeutique," since 1841; "Nouveau Formulaire Magistral," in 1840; "Formulaire Vétérinaire," in 1849; "Opuscules d'Economie Rurale," in 1851; "Archives de Physiologie," in 1854; and *Répertoire de Pharmacie*, published monthly since 1847. He has written a series of interesting works upon vines and wines. "L'Influence des Eaux Potables sur la Production du Goûtre et du Crétinisme;" a work upon "Diabetes," and numerous "Mémoires," presented to the Academy of Medicine, and "Traité d'Hygiène Publique et Privée basée sur l'Étiologie," 1881.

BOUGHTON, George Henry, A.R.A., was

born in Norfolk, in 1833. His family went to America about 1836 and he passed his youth in Albany, New York, where he early developed an artistic taste. In 1853 he came to London, and passed several months in the study of art. Returning to America, he settled in New York, and soon became known as a landscape painter. In 1859 he went to Paris, where he devoted two years to study, and in 1861 he opened a studio in London. He was elected an Associate of the Royal Academy, June 19, 1879. Among his best works are:—"Winter Twilight," "The Lake of the Dismal Swamp," "Passing into the Shade," "Coming into Church," "Morning Prayer," "The Scarlet Letter," "The Idyl of the Birds," "The Return of the Mayflower," "Councillors of Peter the Headstrong," and "A Morning in May, Isle of Wight." Mr. Boughton has of late years made a special study of the picturesque aspects of the old Puritan life of New England, and many of his recent works have illustrated it. He has also visited Holland, and painted a number of Dutch scenes, and, with Mr. Edwin Abbey, is the author of "A Sketching Tour in Holland," 1885. He has frequently exhibited at the National Academy of New York, and was made a member of that Academy in 1871.

BOUGUEREAU, Guillaume Adolphe, a French painter, and Member of the Institute, was born at La Rochelle, Nov. 30, 1835. He began life in a business house at Bordeaux, but obtained permission to attend the drawing school of M. Alaux for two hours a day. His fellow-pupils treated him with contempt on account of his business connections, and when, at the end of the year, he gained the first prize, the excitement was so great that a riot ensued, and a formal protest was made by the pupils against his receiving it, but without effect. He then turned all his attention to painting, and entered the studio of Picot in Paris, and later entered the Ecole des Beaux Arts, where his progress was rapid. In 1850 he went to Rome, and in 1854 exhibited "The Body of St. Cecilia borne to the Catacombs," since which time he has occupied a leading position among the artists of the Modern French School. His next great work was "Philomela and Procne," 1861. Both these pictures are now in the Luxembourg. "Mater Afflictorum," or "Vierge Consolatrice," 1876, was purchased by the French Government for 12,000 francs. Among his pictures exhibited at the Salon may be mentioned "The Bather," 1870; "Harvest Time," 1872; "The Little Marau-

ders," 1873; "Homer and his Guide," 1874; "Flora and Zephyrus," 1875; "Pieta," 1876; "Youth and Love," 1877; "The Scourging of Our Lord," 1880; "The Virgin with Angels," 1881; "Slave carrying a Fan," 1882; "The Youth of Bacchus," 1885; and "Byblis," 1886. M. Bouguereau executed the mural paintings in the St. Louis Chapel of the Church of St. Clotilde, and in the Church of St. Augustine. Many of his pictures have been engraved by François.

BOULANGER, General George Ernest Jean Marie, French ex-Minister of War, was born at Rennes, 1837. His mother, who is still alive, is a native of Wales. In 1856 he was appointed Sub-Lieutenant in 1st Regiment of Algerian Tirailleurs. From that time his military career has been very distinguished, and his advance in his profession unusually rapid. In 1857 he took part in the Kabyle expedition. In 1859 he was wounded at Turbigo, and received the decoration of the Legion of Honour after three years' service. In 1861 he was with the expedition in Cochin China. During the Franco-Prussian war he acted as Chief of Battalion in the army of Paris, and was wounded at Champigny. In 1880 he was appointed Brigadier-General, in which position he began to show signs of a great talent for organisation. He was, moreover, sent to the United States as head of the mission on the Centenary of Independence. For a short time he was attached to the War Office as Director of Infantry, which position he quitted to proceed as General of Division in Africa. In twenty months he returned to the War Office as Minister, Jan. 7, 1886. During his tenure of previous offices he had shown great zeal and determination. His activity had led in some instances to dispute. Such had been the result in Tunis of his arbitrary resolution to exalt the military over the civil authority. During his early career he had moreover been in close relations with the Extreme Left in politics, and his appointment was regarded as a concession to the power of M. Clémenceau. His republican sympathies were shown by the energy with which he urged forward the expulsion of the Princes from France, though it was afterwards proved that he had written in almost fulsome terms of gratitude to the Duc d'Aumale, his superior officer, when promoted Brigadier-General. The General is an energetic and capable organiser, and was, before his downfall described as the rising hope of the party of "La Revanche" in France. At the election of 1888 the General was elected for the Nord by 172,528 votes as against

75,901 for his most successful opponent. In July of that year he fought a duel with M. Floquet, and was severely wounded in the throat. He was idolised by the populace as the coming man who was to save France from the blunders of incompetent statesmen; but having been charged by the Senate with appropriating, while Minister of War, £10,000 of public money for purposes of his own propaganda, he fled first to Brussels, and then to London, in order to avoid arrest. He is at present residing in Jersey. It is said that "the sinews of war," for the support of Boulangerism, were supplied by the Duchesse d'Uzès, and amounted to 3,000,000 francs.

BOULEY, Henri, a French veterinary surgeon, born in Paris in 1814, professor of clinical medicine and surgery at the school at Alfort, and since 1855 a member of the Academy of Medicine (veterinary section), was appointed Inspector-General of Veterinary Schools, Jan. 6, 1866. He is the author of the following works:— "Causes Générales de la Morve dans nos Régiments de Cavalerie," 1840; "Traité de l'Organisation du Pied du Cheval," 1851; "De la Péripneumonie Epizootique du gros Bétail," 1854; "Nouveau Dictionnaire Pratique de Médecine, de Chirurgie, et d'Hygiène Vétérinaires," 1855-72, vols. i. to x., in conjunction with M. Raynal; "Dictionnaire Lexicographique et Descriptif des Sciences Médicale et Vétérinaire," 1863, conjointly with Messieurs Raige-Delorme, Charles Darenberg, J. Mignon, and Charles Lamy; "Peste bovine," a report presented to the Minister of Agriculture, 1867; and "La Rage, moyens d'en éviter les dangers, et de prévenir sa propagation," 1870. He has likewise published several notices and memoirs; and edited, since 1844, the Reports, "Bulletin de la Société Centrale de Médecine Vétérinaire." M. Bouley was made a Knight of the Legion of Honour, Dec. 25, 1844, and promoted to the rank of Officer, Dec. 9, 1865. He was elected a member of the Academy of Sciences in 1868, and was nominated a member of the commission appointed to organise the Institut Agronomique, Aug. 11, 1876.

BOURKE, The Right Hon. Robert, M.P., P.C., third son of the 5th Earl of Mayo, was born at Hayes, co. Meath, June 11, 1827, and educated at Enniskillen School, at Hall Place, Kent, and at Trinity College, Dublin. Called to the Bar at the Inner Temple in 1852, he went the South Wales Circuit, and attended the Knutsford sessions for twelve years. Mr. Bourke

also had a large business at the Parliamentary Bar. He was elected M.P. for Lynn Regis, in the Conservative interest, at the general election of Dec., 1868, and continued to represent that borough in the House of Commons until 1886. When Mr. Disraeli came into power in February, 1874, Mr. Bourke was appointed Under-Secretary of State for Foreign Affairs, and he held that office till April, 1880, when he was added to the Privy Council. In 1880 he was commissioned to go to Turkey to arrange the external debt of that country, and succeeded in effecting a settlement of the question. In 1885 he resumed his former place at the Foreign Office under Lord Salisbury, and remained there till the defeat of the Government in Jan., 1886. On the retirement of Sir M. E. Grant-Duff, in 1886, Mr. Bourke was appointed Governor of Madras. He has travelled in America, India, and the Holy Land, and contributed his views upon these countries to various magazines. Mr. Bourke is also the author of "Parliamentary Precedents." He married, in 1863, Lady Susan Georgiana, eldest daughter of the first Marquis of Dalhousie.

BOWEN, The Right Hon. Sir Charles Synge Christopher, P.C., F.R.S., Hon. D.C.L. of Oxford University and Hon. LL.D. of the University of Edinburgh, one of the Lords Justices in the Court of Appeal, is a son of the Rev. Christopher Bowen, of Freshwater, in the Isle of Wight, formerly rector of St. Thomas's, Winchester, by Catharine Emily, daughter of Sir Richard Steele, Bart. He was born at Wollaston, Gloucestershire, in 1835, and educated at Rugby and at Balliol College, Oxford. He carried off three of the great University prizes, including the Hertford and Ireland scholarships, and, together with several distinguished contemporaries, he was placed, in 1858, in the first class in classical honours. Called to the Bar at Lincoln's Inn in 1861, he joined the Western Circuit. He was senior member of the "Truck Commission" in 1870, was appointed Junior Standing Counsel to the Treasury, in 1872, and Recorder of Penzance in the same year. Though he never "took silk," he acquired a leading position in his profession, and in June, 1879, he was appointed a judge of the Queen's Bench Division of the High Court of Justice on Mr. Justice Mellor's retirement from the Bench, and was knighted by the Queen at Windsor, June 26. In May, 1882, he was appointed a Lord Justice in the Court of Appeal in the room of the late Sir John Holker, and sworn of the

Privy Council. He was formerly Fellow and now is Visitor of Balliol College, Oxford. He is the author of an historical essay entitled "Delphi," of a pamphlet "On the Alabama Question," and of a translation of part of Virgil into English Verse. He married, in 1862, Emily Frances, daughter of the late Mr. James Medows Rendel, F.R.S.

BOWEN, The Rt. Hon. Sir George Ferguson, G.C.M.G., Hon. D.C.L., and Hon. LL.D., the eldest son of the late Rev. Edward Bowen, born in 1821, was educated at the Charterhouse and Trinity College, Oxford, where he obtained a scholarship in 1840, and graduated B.A. as first-class in classics in 1844. In the same year he was elected to a fellowship of Brasenose College, and became a member of Lincoln's Inn. He was Chief Secretary to the Government of the Ionian Islands from 1854 to 1859, and was appointed in that year the first Governor of the new colony of Queensland, in Australia, comprising the north-eastern portion of the Australian continent. He was appointed, in 1868, Governor of New Zealand; and in May, 1873, Governor of Victoria. He was Governor of Mauritius from 1875 to 1883, when he was appointed Governor of Hong Kong. He retired on his pension in 1887; but, in 1888, he was appointed Royal Commissioner at Malta to make arrangements respecting the new Constitution granted to that island. Sir George is the author of "A Handbook for Travellers in Greece,"—one of Murray's Handbooks; "Mount Athos, Thessaly, and Epirus: a Diary of a Journey from Constantinople to Corfu," 1852; "Ithaca in 1850;" and "Imperial Federation," 1886, &c. A full account of his public services will be found in "Thirty Years of Colonial Government," being a selection from the "Despatches and Letters of the Right Hon. Sir G. F. Bowen, G.C.M.G., Hon. D.C.L. Oxford, Hon. LL.D. Cambridge. Edited by Stanley Lane-Pool." Sir George Bowen is a member of the Governing Bodies of the Imperial Institute, and of Charterhouse School, and married, in 1856, the Countess Roma, only surviving daughter of Count Roma, G.C.M.G., then President of the Senate of the Ionian Islands.

BOWMAN, Sir William, Bart., M.D., LL.D., F.R.S., consulting-surgeon to the Royal London Ophthalmic Hospital, Moorfields, some time surgeon to King's College Hospital, and Professor of Physiology and General and Morbid Anatomy at King's College, London, is a son of the late John Eddowes Bowman, F.L.S.,

F.G.S., and was born at Nantwich, July 20, 1816. Having received his medical education, partly at King's College, London, he began practice as a surgeon in the West-end of London, but gradually diverged more and more into the ophthalmic branch of his profession. The Royal Medal in Physiology was awarded to him by the Royal Society in 1842. He has been a Vice-President of that society, and three times on its council. He is a corresponding member of the Royal Academy of Science of Turin and of Stockholm, of the Royal Academy of Medicine of Sweden and of Belgium, of the Société Philomathique, of the Société de Chirurgie, and of the Société de Biologie in Paris, of the Royal Medical Society, and the Medico-Chirurgical Society of Edinburgh, of the Philosophical Society of Cambridge, and of the medical societies of Geneva, Dresden, Athens, Kieff, Pesth, and Massachusetts. He received the honorary degree of M.D., Dublin, in 1867, and that of LL.D., Cambridge, in 1880, and Edinburgh, in 1881. He was first President of the Ophthalmological Society of the United Kingdom, is Vice-Chairman of the Clerical, Medical and General Life Assurance Society, a member of the council of King's College, London, of the council of St. John's House Training Institution for Nurses, and of the council of the Nightingale Fund. He succeeded the late Wm. Spottiswoode, P.R.S., as Hon. Secretary of the Royal Institution of Great Britain during three years; and was created a baronet in 1884. He is the author of some important surgical works on the eye: "Lectures on the Parts concerned in the Operations of the Eye," "Observations on Artificial Pupil," and of "The Physiological Anatomy and Physiology of Man" (the latter in conjunction with the late Dr. Todd), as well as of papers in the "Philosophical Transactions," and "The Cyclopædia of Anatomy." He has gradually retired from practice.

BOWRING, Edgar Alfred, C.B., a younger son of the late Sir John Bowring, was born in 1826, and educated at University College, London. He entered the civil service in the Board of Trade in 1841, and filled in succession the post of private secretary to the Earl of Clarendon, to Earl Granville, and to Lord Stanley of Alderley. He was appointed Précis Writer and Librarian to that department in 1848, and Registrar in 1853, but retired from the service on the abolition of his office at the end of 1863. He acted as Secretary to the Royal Commission for the Great

Exhibition of 1851, and held that appointment until his election as M.P. for Exeter at the general election of 1868. His services were so highly appreciated by the late Prince Consort, the President of the Commission, that, immediately after H.R.H.'s decease, her Majesty was pleased to nominate Mr. Bowring a Companion of the Order of the Bath, civil division. Mr. Bowring lost his seat for Exeter at the general election of Feb., 1874. He is the author of an English poetical version of "The Book of Psalms," English versions of the poetical works of Schiller, Goethe, and Heine, and (jointly with Lord Hobart) of a reply to the "Sophisms of Free Trade," by Mr. Justice Byles. Besides having been a frequent contributor to periodical literature, he is understood to have translated two small volumes of German hymns, selected by the Queen, and privately printed for her Majesty's use, one volume on the death of the Duchess of Kent, and the other on that of Prince Albert.

BOYD, The Rev. Andrew Kennedy Hutchison, D.D. and LL.D., born at Auchinleck, Ayrshire, of which parish his father was incumbent, Nov., 1825, was educated at King's College, London, and at the University of Glasgow, where he obtained the highest honours in philosophy and theology, and was author of several prize essays, taking the degree of B.A. in April, 1846. He was ordained in 1851, and has been incumbent successively of the parishes of Newton-on-Ayr, Kirkpatrick-Ingongray, in Galloway, St. Bernard's, Edinburgh, and of the University city of St. Andrew's, which he still holds. He first became known as a writer, by papers which appeared in *Fraser's Magazine*, under the signature of A.K.H.B. Of these, the most important have been reprinted; the best known of these being "The Recreations of a Country Parson" (three series). Dr. Boyd is also the author of many volumes of sermons, under the titles of "The Graver Thoughts of a Country Parson," and "Counsel and Comfort spoken from a City Pulpit," "Present-day Thoughts: Memorials of St. Andrew's Sundays," 1870; "Towards the Sunset," 1883; "What Set Him Right," 1885; and "The Best Last" in 1888. He received the degree of D.D. from the University of Edinburgh in 1864, and of LL.D. from the University of St. Andrew's in 1889. In May, 1890, he was elected Moderator of the General Assembly of the Church of Scotland.

BOYESEN, Professor Hjalmar Hjorth,

was born at Frederiksvaern, Norway, Sept. 23, 1848. He went to the United States in 1869, and became a Professor of Latin and Greek at Urbana University, Ohio. From 1874 to 1880 he was Professor of German at Cornell University; and since 1881 has held a similar position at Columbia College, New York; and is now (1890) Professor of Germanic Languages and Literature. He has published "Tales from Two Hemispheres," 1876; "Gunnar," 1873; "A Norseman's Pilgrimage," 1875; "Goethe and Schiller," 1878; "Falconberg," 1878; "Ilka on the Hill-top," and "Queen Titania," 1881; "Idyls of Norway," 1882; "Daughter of the Philistines," 1883; "The Story of Norway," 1886; "The Modern Vikings," 1887; "Vagabond Tales," and "The Light of Her Countenance," 1889; and is also the author of a play "Alpine Roses," 1883, which ran for 100 nights at the Madison Square Theatre, New York.

BOYLE, The Very Rev. George David, Dean of Salisbury, is the eldest son of the late Right Hon. David Boyle, Lord Justice-General and President of the Court of Session in Scotland, by his second marriage with Camilla Catherine, eldest daughter of the late Mr. David Smythe, of Methven, Perthshire, and was born in 1828. He was educated at the Edinburgh Academy, the Charterhouse, and at Exeter College, Oxford (B.A. 1851, M.A. 1853). Between 1853 and 1860 he held in succession the curacies in Kidderminster and Hagley. He was incumbent of St. Michael's, Handsworth, from 1861 to 1867, and rural dean of Handsworth, 1866-67. He was appointed vicar of Kidderminster in 1867, and rural dean in 1877, and he was honorary canon of Worcester from 1872 till 1880, when he was appointed Dean of Salisbury. Dean Boyle is the author of "Aids to the Divine Life," "Richard Baxter," and editor of "Characters and Episodes of the Great Rebellion from Clarendon." He married, in 1861, Mary Christiana, eldest daughter of the late Mr. William Robins, of Hagley, Worcestershire.

BOYS, Charles Vernon, F.R.S., was born at Wing, near Oakham, Rutland, and is the youngest son of the Rev. Charles Boys, who last year (1889) completed his fiftieth year as rector of the parish. Mr. C. V. Boys was educated at Marlboro' College and at the Royal School of Mines, of which he is an associate. He was appointed Demonstrator in 1881, and Assistant Professor of Physics in 1889, at the Normal School of Science and Royal School of Mines, South Kensington and

Jermyn Street. He is the author of several papers published by the Royal Society, the Physical Society, the Royal Institution, and the Society of Arts; of which the more important, or the best known, are on integrating and other calculating machines, on quartz fibres, on the "radio-micrometer," and other instruments for measuring radiant heat, and on the "Cavendish" experiment. The radio-micrometer is so sensitive to caloric rays that it registers the heat of a candle when at a distance of more than two miles! and Professor Boys is able to melt a piece of quartz and spin it into fibres so fine that each is only 100,000th of an inch in diameter, therefore a piece of quartz the size of a walnut could be spun into a thread that would go more than six times round the world! He is the author also of the article "Tricycle," in the "Encyclopædia Britannica," and of the supplement of Guthrie's "Electricity and Magnetism." He is a Fellow of the Royal Society, Officer of Public Instruction of France, Hon. Demonstrator and Librarian of the Physical Society of London, and Member of the Royal Institution, London.

BRABOURNE (Lord), The Right Hon. Edward Hugessen Knatchbull-Hugessen, P.C., is a son of the late Right Hon. Sir Edward Knatchbull, Bart., of Mersham Hatch, Kent (many years M.P. for East Kent, and at one time Paymaster of the Forces under Sir Robert Peel), by his second marriage with Fanny Catharine, daughter of Edward Knight, Esq., of Godmersham Park, Kent, and of Chawton House, Hampshire. He was born at Mersham Hatch, April 29, 1829, and educated at Eton and at Magdalen College, Oxford, where he graduated in 1850. He entered the House of Commons as M.P. for Sandwich in April, 1857, and represented that constituency in the Liberal interest until his elevation to the peerage. He withdrew his support from the Gladstone Government in consequence of their Irish legislation and abandonment of the Transvaal in 1881, and formally joined the Conservative party in 1885. He was a Lord of the Treasury from June, 1859, till May, 1866; Under-Secretary of State for the Home Department from Dec., 1863, to Jan., 1871; and Under-Secretary for the Colonies from the last-named date to Feb., 1874. He was Chairman of the Treasury Commission which sat in Dublin in 1866 (the other members being Sir Richard Mayne, Sir Donald Macgregor, Col. Ward, and Mr. Law), to inquire into the condition of the Irish Constabulary, which at that time had no

fewer than 1500 vacancies. The result of the investigation was an increase of their pay, and improvement of their condition, the force being thus restored to its former popularity. Mr. Knatchbull-Hugessen was sworn of the Privy Council March 24, 1873; and in May, 1880, he was created Lord Brabourne, of Brabourne, in the county of Kent. His lordship is a magistrate and deputy-lieutenant for Kent, and he assumed the name of Hugessen by Royal licence. His publications are:—"Stories for my Children," 1869; "Crackers for Christmas," 1870; "Moonshine," 1871; "Tales at Tea-time," 1872; "Queer Folk," 1873; "Whispers from Fairyland," 1874; "River Legends, or River Thames and Father Rhine," 1874; "Higgledy-Piggledy; or, Stories for Everybody and Everybody's Children," 1875; "Uncle Joe's Stories," 1878; "Other Stories," 1879; "Mountain Sprite's Kingdom," 1881; "Ferdinand's Adventure," 1883; and "Friends and Foes from Fairyland," 1885. He has also edited "Letters of Jane Austen" (his maternal great-aunt), 1885, and published two pamphlets, "Life, Times and Character of Oliver Cromwell," 1877; and "The Truth about the Transvaal," 1881. He married, in 1852, Anna Maria Elizabeth, younger daughter of the Rev. M. K. Southwell, vicar of St. Stephen's, St. Albans.

BRACKENBURY, Lieut.-General Henry, C.B., R.A., born at Bolingbroke, Lincolnshire, Sept. 1, 1837, was educated at Tonbridge, Eton, and Woolwich. He was appointed to the Royal Artillery in April, 1856; and served in the suppression of the Indian Mutiny in 1857-58. Subsequently he was appointed to the staff of the Royal Military Academy at Woolwich, first as officer for discipline, then as Instructor in Artillery, finally as Professor of Military History. He served throughout the Franco-German war as chief representative of the British National Society for aid to sick and wounded in war, received the Iron Cross from the Emperor of Germany, and was made Officer of the Legion of Honour by the French Government, and Knight of the First Class of the Bavarian Order of St. Michael. Being appointed Military Secretary to Sir Garnet Wolseley, he served with him throughout the Ashanti Campaign, 1873-4. He served as a member of a special mission to Natal in 1875; was assistant Adjutant-General to the Cyprus Expeditionary Force in 1878; and raised and organised the Cyprus Military Police. In 1879 he accompanied

Sir G. Wolseley to South Africa as Military Secretary, and later succeeded Sir G. Colley as Chief of the Staff, in which capacity he served throughout the closing operations of the Zulu war and the campaign against Sekukuni. In 1880 he was appointed Private Secretary to the Viceroy of India, and returned to England with the Earl of Lytton, on his resignation. He was Military Attaché to the British Embassy at Paris from Jan., 1881, to May, 1882, when he was appointed Assistant Under-Secretary for Ireland, to deal with all matters relating to police and crime in that country. He resigned the latter post, however, on July 19, 1882. In 1884 he was appointed Deputy Adjutant-General of the Nile Expeditionary Force; and subsequently Brigadier-General and second in command of the River Column of the Expedition. When General Earle was killed during the action of Kirbekan, General Brackenbury assumed command of the Column, and conducted it to near Abu Hamed, whence it was recalled by Lord Wolseley, down the rapids to Korti. He was promoted to be a Major-General, June 15, 1885, for distinguished service in the field; and Lieut.-General, April 1, 1888. He was appointed head of the Intelligence Department of the War Office, 1st Jan., 1886. In 1888 he was appointed a member of a Royal Commission under the Chairmanship of Lord Hartington to inquire into the administration of the Naval and Military Departments of the State. He is the author of "Fanti and Ashanti," 1873; "Narrative of the Ashanti War;" "The River Column;" and of several military pamphlets.

BRADDON, Edward Nicholas Coventry, son of Henry Braddon of Skirton Lodge, Cornwall, was born June 11th, 1829; educated at private schools and by private tutor, and at the London University; went to India in 1847 to the mercantile house of his cousins, Messrs. Bagshaw and Co. (afterwards Braddon and Co.), Calcutta. After eight years spent in mercantile pursuits he was engaged in civil engineering in charge of an Assistant Engineer's length of the East India Railway, during which time he led a small force of volunteers against the insurgent Santhals; he subsequently served as a volunteer with the 7th N. I. against the rebels, and on the close of the rebellion pursued and captured 14 of the leading Santhals implicated in the murder of several Europeans and natives. As some recognition of these services he received the appointment of Assistant Commissioner in charge of the Deoghur District,

Santhal Pergunnahs, Oct. 1857. He served under Sir George Yule as a volunteer against the rebel Sepoys in the Purneah and adjoining districts (Mutiny medal and favourable mention in dispatches). Raised a regiment of Santhals, for which service he was thanked specially by the Lieut.-Governor of Bengal. In April 1862, Mr. Braddon was promoted to be Superintendent of Excise and Stamps, Oudh; subsequently made Inspector General of Registration, and Superintendent of Trade Statistics in that Province, and during 18 months acted in addition as Revenue Secretary to the Financial Commissioner. Retired from the service, Mr. Braddon made Tasmania his home. He arrived there in May, 1878, and was elected in July, 1879, a member of the House of Assembly for West Devon. That seat he retained through four elections until he left Tasmania as Agent General. In 1886 he was appointed leader of the Opposition. In 1887 he took office in a new administration as Minister of Lands and Works and Education. On Oct. 29, 1888, he was appointed Agent General for Tasmania. Mr. Braddon has contributed many articles to reviews, magazines and newspapers. His one published work, "Life in India," came out in 1870.

BRADDON, Mary Elizabeth. See **MAXWELL, MRS. JOHN.**

BRADFORD, Sir Edward Ridley Colbourne, K.C.S.I., Commissioner of Police in succession to Mr. Monro, is a son of the late Rev. W. M. K. Bradford, rector of West Meon, Hants, by Mary, daughter of the late Rev. H. C. Ridley, and he was born in 1836. He entered the Madras Army in 1853, became lieutenant in 1855, captain in 1865, major in 1873, lieutenant-colonel in 1879, and colonel in 1883. Sir Edward Bradford served with the 14th Light Dragoons in the Persian campaign from Feb. 21 till June 8, 1857, in the Jubbulpore district during 1857, and afterwards in the North-Western Provinces in 1858, with General Michel's force in Mayne's Horse against Tantia Topce in that year. He was present at the general action of Scindwha and the action and pursuit at Karai, and served with General Napier's columns in Mayne's Horse from Dec., 1858, to Sept. 1859, and was present in several actions with the enemy, gaining the medal, and being twice thanked in despatches. The new Commissioner has held the position of Resident First Class and Governor-General's Agent for Rajpootana, and has been Chief Commissioner in Ajmere. He has since his

return to this country been secretary of the Political and Secret Department of the India Office. Sir Edward, who was appointed A.D.C. to the Queen last year (1889), accompanied H.R.H. the Duke of Clarence and Avondale on his recent visit to India. He has lost one of his arms, the result of an encounter with a tiger some years ago.

BRADFORD (Earl of), The Right Hon. Orlando George Charles Bridgeman, was born April 24, 1819, succeeded his father as third earl, March 22, 1865, and married, April 30, 1844, Selina Louisa, youngest daughter of the first Lord Forrester. His Lordship is Captain of the South Salopian Yeomanry Cavalry, has been Vice-Chamberlain to the Queen's Household, and held the office of Lord Chamberlain of the Household under Lord Derby's third Administration, from July, 1866, to 1868. He held the office of Master of the Horse to the Queen from Feb., 1874, to May, 1880, and again under Lord Salisbury's first administration from June, 1885, to Jan. 1886.

BRADLAUGH, Charles, M.P., son of Mr. Charles Bradlaugh, a solicitor's clerk, was born in the East-end of London, Sept. 28, 1833. He was educated at elementary schools in Bethnal Green and Hackney Road; and afterwards became successively errand-boy, coal-dealer, Sunday-School teacher, and a free-thought lecturer. In Dec. 1850, he enlisted in the 7th Dragoon Guards, and served for some time in Ireland. He became Orderly-room clerk, got his discharge, and in 1853 returned to London, becoming clerk to a Mr. Rogers, a solicitor. Having become confirmed in his Secularist views he began to write and lecture regularly, adopting the pseudonym of "Iconoclast." He lectured at the Hall of Science, City Road; wrote abundantly, and in a few years was well-known throughout the country for his discussions with clergy and others on public platforms. In 1868 he began his efforts to enter Parliament, and after three times contesting Northampton in vain, was returned for that borough in 1880, his colleague being Mr. Labouchere. Since his entering Parliament, his name has been chiefly heard in connection with his claim to take, or to dispense with, the oath of allegiance. He lost his seat once by judicial decree, once by his expulsion by the House, and the third time because he resigned in order to appeal to his constituency against the House, and was thrice, after fierce contests, re-elected; subsequently the Affirmation Bill was

brought in, but, in spite of one of Mr. Gladstone's finest speeches, was lost by a majority of 3. Finally, however, after the Parliament of 1880-85 was dead, Mr. Bradlaugh (who had been again elected by Northampton) was allowed to take his seat in peace. He has since then taken a prominent part in debate, and has signalled himself by successfully moving for the establishment of a Labour Bureau which has since proved very useful. In 1887 he procured the appointment of a Royal Commission on Market rights and tolls, and carried an Act extending and amending the truck laws. In 1888 he carried through Parliament a bill giving to all persons the right to affirm instead of taking oath. In 1889 he was nominated a member of the Royal Commission on Vaccination, and was selected by the Indian National Congress to represent in Parliament the views of the Congress party. Mr. Bradlaugh has also headed the agitation against perpetual pensions, and has latterly strongly opposed the promulgation of socialism.

BRADLEY, Professor Andrew Cecil, son of the Rev. Charles Bradley, of St. James's, Clapham, was born at Clapham, March 26, 1851. He was educated at Cheltenham College, whence in 1869 he passed as an Exhibitioner to Balliol College, Oxford. Having taken his degree, with a first class in honours, in 1873, he was in the following year elected to a fellowship in Balliol College, and soon afterwards gained the Chancellor's prize for an English Essay. He was elected to a lectureship in philosophy, and continued as a teacher at Balliol until the beginning of 1882, when he became Professor of Modern Literature and History at the newly-founded University College, Liverpool. Here he remained until July, 1889, when, on the resignation of Professor Nichol, he was appointed Regius Professor of English Language and Literature in the University of Glasgow. Besides various literary and philosophical articles and addresses, he is the author of an essay on Aristotle's Conception of the State, published in Mr. Evelyn Abbott's "*Hellenica*." He is also the editor of the "*Prolegomena to Ethics*," a work left unfinished by Professor Green, who was his tutor at Oxford.

BRADLEY, The Very Rev. George Granville, D.D., LL.D., Dean of Westminster, is one of the sons of the Rev. Charles Bradley, who was for many years vicar of Glasbury, in the county of Brecon, and some time incumbent of St. James's Episcopal Chapel at Clapham, Surrey.

He was born in 1821, and educated under Dr. Arnold at Rugby, from which school he was elected to an open scholarship at University College, Oxford, where he was a favourite pupil of Dean Stanley, who at that time was tutor. He took his bachelor's degree in Easter Term, 1844, as a First Class in Classical honours, and in 1845 obtained the Chancellor's prize for a Latin essay, his subject being "*The Equestrian Order in the Roman Republic*." Having been elected to a Fellowship in 1844, he proceeded M.A. in 1847. Mr. Bradley was one of the assistant masters of Rugby School for some years, under Dr. Tait and his successor, Dr. Goulburn, and was elected in 1858 to the Headmastership of Marlborough College, on the preferment of his predecessor, Dr. Cotton, to the bishopric of Calcutta. Mr. Bradley was ordained deacon in 1858 by the Bishop of London, and priest in the same year by the Bishop of Salisbury. In Dec. 1870, he was elected to the mastership of University College, Oxford, in the place of the late Dr. Plumptre. The honorary degree of LL.D. was conferred upon him by the University of St. Andrew's, Feb. 25, 1873. He was appointed examining chaplain to the Archbishop of Canterbury in 1874; was Select Preacher at Oxford, 1874-75; and held the post of Honorary Chaplain to the Queen 1874-75; of Chaplain in Ordinary 1876-81. In Oct. 1880, he was nominated a member of the Oxford University Commission, in the place of Lord Selborne resigned. He obtained a canonry in Worcester Cathedral in Feb. 1881; and in Aug. the same year he was appointed by the Crown to the Deanery of Westminster, in succession to the late Dean Stanley. The degree of D.D. was conferred upon him at Oxford, Oct. 28, 1881. In 1882 he delivered at Edinburgh a series of lectures, afterwards published under the title of "*Recollections of Arthur Penrhyn Stanley*," 1883. Since the death of Mr. Theodore Walrond in 1887, Dr. Bradley has been entrusted with the task of preparing for publication the memoirs and letters of Dean Stanley. In 1885 he published a volume of Westminster Abbey Lectures on the Book of Ecclesiastes, and in 1887 a similar volume on the Book of Job. He is also the writer of a book on Latin Prose, which has had a large circulation. Dr. Bradley married, in 1849, Marian Jane, fifth daughter of the Rev. Benjamin Philpot, formerly Rector of Great Cressingham, Norfolk. One of his daughters, Margaret L. Woods, wife of the President of Trinity College, Oxford, is the authoress of "*A Village Tragedy*," 1887; another,

Miss E. T. B., of the memoirs of Lady Arabella Stuart, 1889.

BRADY, Professor George Stewardson, born in 1832, at Gateshead-on-Tyne, was educated at Ackworth School, Yorkshire, Tulketh Hall, Lancashire, and at the University of Durham College of Medicine, Newcastle-upon-Tyne; M.D., and LL.D. (hon.) St. Andrews; F.R.S.; Corresponding Member of the Zoological Society of London, and Academy of Nat. Science, Philadelphia, &c. Professor of Natural History in the Durham College of Science, Newcastle-upon-Tyne; Hon. Physician to the Sunderland Infirmary. His principal published works are as follows: "A Monograph of the Recent British Ostracoda" in Transactions of the Linnean Society, 1868; "A Monograph of the Post Tertiary Entomostraca of Scotland and Parts of England and Ireland" (Palæontographical Society, 1874—jointly with H. W. Crosskey and D. Robertson); "A Monograph of the fossil Ostracoda of the Antwerp Crag" (Transactions of the Zoological Society of London, 1875); "A Monograph of the free and semiparasitic Copepoda of the British Islands," 3 vols. (Ray Society, 1877-80); "Report on the Ostracoda of the 'Challenger' Expedition" (1880); "Report on the Copepoda of the 'Challenger' Expedition" (1884); "A Monograph of the Marine and Fresh-water Ostracoda of the North Atlantic and of North Western Europe: Section 1, Podocopa" (Transactions of Royal Dublin Society, vol. iv. 1889—jointly with the Rev. Canon Norman, D.C.L.), besides numerous contributions to Medical and Scientific Journals.

BRADY, Henry Bowman, LL.D., F.R.S., F.G.S. &c., born at Gateshead-on-Tyne, 1835; is a son of Henry Brady (a medical man in large practice at Gateshead), by Hannah, daughter of Ebenezer Bowman of One Ash Grange, Derbyshire, both deceased. He was some time Lecturer on Botany in the Newcastle College of Medicine in connection with Durham University; has been for many years a member of the Council and of the Board of Examiners of the Pharmaceutical Society of Great Britain; and was a member of the Council of the Royal Society, 1888-1889. He has published a large number of memoirs on scientific subjects, chiefly on the Foraminifera; of which the most important are "A Monograph on Carboniferous and Permian Foraminifera (the genus *Fusulina* excepted)," Palæontographical Society, 1876, 4to, 12 plates; and the "Report on the

Foraminifera of the 'Challenger' Expedition," 2 vols. 4to, 116 plates.

BRADY, The Rev. William Maziere, D.D., youngest son of the late Sir N. W. Brady, and nephew to Sir Maziere Brady, Baronet, late Lord High Chancellor of Ireland, was born at Dublin in 1825, and educated at Trinity College, Dublin, where he was a prizeman in classics. He was appointed Chaplain to several successive Viceroy, and became rector of Farrahy, co. Cork, in 1851; he held afterwards the vicarage of Newmarket, in the same county, and became rector of Kilberry and vicar of Donoughpatrick, Meath. Dr. Maziere Brady has written much upon various historical, antiquarian, and political subjects in many of the newspapers and magazines of the day, and notably in *Fraser* and the *Contemporary Review*. His sermon preached in the Chapel Royal, Dublin, towards the end of Lord Carlisle's vice-royalty, in which he openly denounced the State Church in Ireland, which applied the whole of the ancient ecclesiastical revenues for the benefit of a mere fraction of the people, excited astonishment, and was strongly censured by the organs of the Conservative party, and led to Dr. Brady's omission from the list of chaplains under Lord Kimberley's lieutenancy. The chief works published by Dr. Brady are "Clerical and Parochial Records of Cork, Cloyne, and Ross," 3 vols.; "Remarks on Irish Church Temporalities;" "Facts or Fictions;" "The McGillicuddy Papers;" "The Irish Reformation;" "State Papers concerning the Irish Church in the Time of Queen Elizabeth;" and "Essays on the English State Church in Ireland," 1869. Dr. Brady's writings undoubtedly facilitated the progress of Mr. Gladstone's Irish Church Abolition Bill, and were copiously quoted in and out of Parliament. His work on the Irish Reformation went through five editions, and provoked innumerable replies. Upon the passing of the Irish Church Act, Dr. Brady, whose health had been seriously affected by an attack of bronchitis, went to Rome, and from the archives there extracted many particulars concerning the ecclesiastical affairs of England, Scotland, and Ireland. He afterwards resigned his rectory of Donoughpatrick, and was received into the Roman Catholic Church by Mgr. Kirby, of the Irish College at Rome, in May, 1873. He has since written a work on "The Episcopal Succession in England, Scotland, and Ireland," the third volume of which was published at Rome in 1877.

BRAHMS, Johannes, musical composer, was born May 7, 1833, at Hamburg, where his father played the double-bass in the orchestra. He received his first instructions in music from his father, and then studied under Eduard Marxsen. Schumann's warm recommendation in the *Neue Zeitschrift für Musik* (Oct. 28, 1853) called the attention of musicians, of the public, and of the publishers to the young man, who subsequently made slow but constant progress on the road to permanent artistic fame. After several years of activity as director of music at the court of Lippe-Detmold he devoted a considerable period of time to assiduous study and composition in his native town. Thence he proceeded, in 1862, to Vienna, which city became his second home; for although he quitted it after holding for one year the post of director of the Singing Academy (1864), he never felt at ease in the other towns which he visited—Hamburg, Zürich, Baden-Baden—and accordingly, in 1869, he returned to the Austrian capital. He conducted, from 1872 to 1874, the concerts of the Society of Amateur Musicians, until Herbeck, who had in the meantime resigned his post of Court Director of Music, resumed the functions of that office. Brahms then resided for some time away from Vienna, chiefly near Heidelberg, but returned in 1878. Undoubtedly Brahms is entitled to rank among the greatest composers now living. At first he followed the "New German" school which had been inaugurated by Schumann in the journal mentioned, but when the heated judgment of youth had been succeeded by calmer reflection, he inclined more to the classical school, so that now he is criticised by the *Baireuther Blätter*, and recognised by conservative institutes as a classical composer. In fact he combines in himself the different styles, and may be claimed both by musical progressists and by classicists as belonging to them. Although Brahms attracted public notice in consequence of Schumann's recommendation, the recognition of his genius in wider circles dates only from the year 1868, when his "Deutsches Requiem" (Op. 45) was produced. Among his later works are "Rinaldo," a cantata; "Schicksalslied;" "Triumphlied;" "Rhapsodie" from Goethe's "Hartzeise;" besides string-quartets, symphonies, and a great number of songs, duets, choruses, concertos, motets, trios, sextets, &c. His songs, in which he mainly follows Schumann's style, have become popular all over the world, as are those compositions in which he embodies Hungarian national melodies. A sonata

of his in D minor, Op. 108, for piano and violin, was performed for the first time in London, in May, 1882.

BRAMWELL, Sir Frederick Joseph, Bart., D.C.L., F.R.S., Past President of the Institution of Civil Engineers, youngest son of the late George Bramwell, banker, was born in the year 1818. From his earliest boyhood he showed great interest in mechanics, as evinced by his endeavours to repeat, in a rough model, the steam engines and winding machinery which he had seen at the age of nine in use in the construction of the St. Katharine's Dock. In 1834 he was apprenticed to one of the old school of mechanical engineers, John Hague, with whom he served his time, and with whom he continued for a few years as principal draughtsman; then, after a varied experience in the employment of others, in 1853 he began business on his own account as a civil engineer. In 1856 he was elected an Associate of the Institution of Civil Engineers; in 1862 was transferred to full membership of that body; in 1867 was elected a Member of its Council, and in 1884-85 had the honour of filling the position of President, having previously been, in the years 1871-75, President of the Institution of Mechanical Engineers. In 1881, on the formation of the present Ordnance Committee, he was appointed one of the two lay members of that Committee. He has also, in the exercise of his profession, and at the instance of the Government, served on several committees which have been appointed for various purposes. Having been for some years a member of the British Association, he was, in 1872, made President of Section G (Mechanical Section), and was selected to refill this office on the occasion of a visit of the Association to Montreal in 1884, and was elected President of that body for the year commencing with the Bath meeting, Sept. 1888. In 1873 he was elected a Fellow of the Royal Society, and in the year 1878 served on its Council. Having been a member of the Board of Managers of the Royal Institution for some time, he was, on the retirement of Sir William Bowman, in 1885, appointed to the position of Honorary Secretary of that body. In 1884 he was nominated by H.R.H. the Prince of Wales to the position of Chairman of the Executive Council of the Inventions Exhibition which was held in the following year. On the formation of the City and Guilds of London Institute for the Advancement of Technical Education, he was appointed by the Goldsmiths' Company as one of their repre-

sentatives, being at that time Prime Warden of the Company, and was elected by the Executive Committee of the Institute to be their Chairman. In 1881 he received the honour of knighthood in connection with his services in the promotion of technical education, and, in 1886, the honorary degree of D.C.L. from Oxford. In 1889 he was created a Baronet.

BRAMWELL (Lord), The Right Hon. Sir George William Wilsher, P.C., son of the late Mr. George Bramwell, banker, was born in London, in 1808. In early youth he was placed in his father's counting-house, where he acquired a practical knowledge of the business of banking, which in after years proved of great value to him. Having resolved to try the legal profession, he practised for some time as a pleader, and was, in 1838, called to the Bar, and went the Home circuit. He gradually obtained a large business as a lawyer and pleader; in 1849 was a member, with Sir J. Jervis, Sir A. Cockburn, Mr. Willes, and Mr. Baron Martin, of the Common Law Procedure Commission, which resulted in the Common Law Procedure Act of 1852. In 1851 he became a Queen's Counsel, and was a member of the Commission for inquiring into the law of partnership. Differing in opinion with the majority of the Commission, he recommended the adoption of a law of limited liability as now existing. In answer to the objection that persons might deal with limited liability companies believing them to be unlimited, Mr. Bramwell suggested a distinguishing addition to their name as "limited." This advice was adopted, and gave great satisfaction. Mr. Bramwell was, in 1856, made a Baron of the Exchequer, and received the honour of knighthood. In Oct. 1876, he was made a Judge of the intermediate Court of Appeal, and sworn of the Privy Council. He retired from the bench at the close of the year 1881, when a complimentary banquet, attended by the judges and the principal members of the legal profession, was held in his honour. In Feb. 1882, he was raised to the peerage by the title of Baron Bramwell, of Haver, in the county of Kent. Lord Bramwell's frequent letters to the *Times*, whether in his own name or signed "B," have generally attracted attention.

BRAMWELL, John Milne, M.B., born at Perth, N.B., May 11, 1852, is the son of James Paton Bramwell, M.D., of Perth, and was educated at Perth Grammar School, and the University of Edinburgh,

where he took the degree M.B. and C.M., 1873. Immediately after graduating, he was appointed surgeon in the Liverpool, Brazil and River Plate Mail S.S. Co., remained a year in the Company, made three voyages to Brazil and River Plate, then settled in Goole as partner with Malcolm Morris (now Lecturer on Skin Diseases, St. Mary's Hospital, London), and has remained in Goole ever since. He has recently devoted much study to Hypnotism, to which his attention was first drawn by seeing, when a child, hypnotic experiments performed by his father. He read Dr. Gregory's book on the subject, and a translation from the German book by Reichenbach, and never lost interest in the subject; but he commenced its serious study only six years ago, and has read all important Continental literature bearing upon it. He introduced it into his private practice about fifteen months ago; at first cautiously and amongst personal friends. Last July he visited Nancy, and observed the methods employed there, and at La Salpêtrière at Paris. Their methods of inducing hypnosis differ. He combined the two methods, and found the result far more successful than that obtained by either of the French Schools, and pushed hypnotic practice more boldly after returning from France, and has treated, up to date, about 500 cases. He induced hypnosis in every instance, and has treated every kind of disease that presented itself: Deafness, Chorea, Epilepsy, Neuralgia, Rheumatism, Rheumatic Fever, Typhoid Fever, Stammering, Drunkenness, Insomnia, Chronic Constipation, &c. The result has been cure or benefit in all cases. On March 28, 1890, he gave to medical men at Leeds demonstration of hypnotism as an Anæsthetic, a report of which was published in *The Lancet* and *The British Medical Journal* of April 5, 1890. Mr. Bramwell's publications are:—"Extractions under Hypnotism;" *The Journal of the British Dental Association*, March 15, 1890; and an article in *Health* on Hypnotism May 16, 1890. He has been for some time engaged in writing a book on "Hypnotism," in which the statistics, &c., differ widely from any hitherto published.

BRANDES, George, a Danish author of Jewish family, was born at Copenhagen, Feb. 4, 1842. He studied in the University of his native city, 1859-64, applying himself first to Jurisprudence and then to philosophy and æsthetics. In 1862 he gained the gold medal of the University by an essay on "Fatalism

among the Ancients," and afterwards passed the examination for his degree with the highest distinction. As soon as he had graduated he left Denmark and spent several years in different countries on the Continent. He was at Stockholm in 1865; passed the winter of 1866-67 at Paris; was in Germany in 1868; and in France and Italy in 1870-71. He published "Dualismen von nyeste Filosofi" ("The Dualism of the Philosophy of the Present Time") in 1866, with reference to the relations between science and faith—a work which exposed him to violent attacks from the orthodox party; "Æsthetic Studies," 1868; "Criticism and Portraits," 1870; and "French Æsthetics at the Present Day," 1870. On returning from his travels he became a private tutor in the University of Copenhagen, and delivered the series of lectures which were published at Copenhagen in 5 vols., 1872-82, under the title of "Hovedstrømninger i det 19 Aarhundredes literatur" ("The Great Literary Currents of the Nineteenth Century"), and were subsequently translated into German by himself. He has given Danish translations of John Stuart Mill's essay on the "Subjection of Women," 1869; and his "Utilitarianism" 1872; and edited "Søren Kierkegaard," 1877; and "Danske Digtere" (Danish Poets), 1877. In Oct. 1877, Brandes left Denmark and settled in Berlin, where he diligently studied and made himself master of the German language. At Berlin he composed the biographies "Esajas Tegnér" and "Benjamin d'Israeli," both published in 1878. In the spring of the year 1883 he returned to Denmark, his fellow-countrymen having guaranteed him an income of 4,000 crowns for ten years, with the single stipulation that he should deliver public lectures on literature at Copenhagen. He has further published "Ferdinand Lassalle," 1881; "Men and Works," 1883; "The Men of the modern Literary Revival," 1883; "Ludwig Holberg," 1884; "Berlin," 1885; "Impressions of Poland," 1888; "Impressions of Russia," 1888; and 2 volumes of "Essays," 1889. English translations of his works, edited in England and America, are "Lord Beaconsfield," 1880; "Eminent authors of the nineteenth century," 1886; and "Impressions of Russia," 1889.

BRANDIS, Sir Dietrich, Ph.D., K.C.I.E., F.R.S., son of Dr. Christian August Brandis, Professor of Philosophy at the University of Bonn, by Caroline, daughter of Bernhard Houssmann of Hanover, was born at Bonn, on the 31st March, 1824.

He was educated at the high school (gymnasium) of Bonn, and from 1837 to 1839, while in Athens (where his father had been called to assist in organizing the University), was educated by Dr. Ernst Curtius, now Professor at Berlin. He studied at the Universities of Copenhagen, Göttingen, and Bonn; took his degree as Doctor of Philosophy at Bonn in 1848, was lecturer of Botany at that University from 1849 to 1855; was appointed by Lord Dalhousie, then Governor General of India, Superintendent of Forests in Pegu, which appointment he gained in January, 1856. The charge of the Forests of Tenasserim and Martaban was added in 1857. On the amalgamation of the provinces he was appointed Superintendent of Forests in British Burmah. In November 1862 Dr. Brandis was called to Calcutta to organize Forest administration in the provinces immediately under the Government of India, and in 1864 he was appointed Inspector General of Forests to the Government of India. On several occasions he was deputed to assist in the organization of Forest business in the minor Presidencies, viz.: to Sind in 1868, to Bombay in 1870, and to Madras in 1881. While on furlough to recruit his health, Dr. Brandis published (in 1874) a Forest Flora of North-West and Central India. In 1878 he founded the Indian Forest School at Dehra Dün in North-West India, for the education of natives of India for the post of forest rangers. In 1883 he retired from the service. Of his numerous official publications the most important are a "Report on the Attaran Forests," published at Calcutta in 1861, and a "Report on the Forest administration in the Madras Presidency," published at Madras in 1883. In 1878 Dr. Brandis was created a Companion of the Indian Empire, and in 1887 the honour of a Knight Commander of the same order was conferred upon him. In 1874 Dr. Brandis was made an Honorary Member of the Scottish Arboricultural Society, and in 1875 he was elected a fellow of the Royal Society. Of the numerous papers contributed by him to scientific periodicals may be mentioned: "On the Distribution of Forests in India," "Ocean Highways," 1872; "Progress of Forestry in India," Transactions *Scottish Arboricultural Society*, 1884; "Regen und Wald in Indien," *Deutsch Meteorologische Zeitschrift*, October, 1887.

BRASSEY, (Lord) Thomas, K.C.B., first Baron, son of Thomas Brassey, the well-known contractor for public works, was born at Stafford in 1836, and edu-

cated at Rugby and University College, Oxford, graduating in honours in the modern law and history school. He was elected for Devonport in 1865, has represented Hastings from 1868 to 1886, and was appointed Civil Lord of the Admiralty in 1880, and Secretary to the Admiralty in 1884. He is the author of "Work and Wages," "Lectures on the Labour Question," "English Work and Foreign Wages," "British Seamen," "The British Navy," in 5 volumes, and "The Naval Annual," a serial publication, commenced in 1886. He has published numerous pamphlets on political, economical, and naval questions. Lord Brassey began his career in Parliament by seconding a motion by Mr. Thomas Hughes in 1869 for an inquiry into the Labour Laws. In 1871 he began the first of a series of speeches on Naval Administration. The subjects dealt with have included the defence of the commercial harbours, the organization of the Comptroller's Department and of the Dockyards, the principal reform advocated being a more decentralized management. In treating of ship-building policy, the objections to extreme dimensions have been strongly urged. The question of the Naval Reserves was brought forward by Lord Brassey in Parliament on several occasions, and he succeeded in obtaining the consent of the Admiralty to the enrolment of a second class reserve, for which the fishing population would be eligible. The present strength of the force is 10,000. He also took an active part in establishing the Royal Naval Artillery Volunteers. Lord Brassey moved for a select committee on the Euphrates Valley Railway in 1871, and for a Royal Commission on Marine Insurance in 1875. In 1879 he seconded Mr. Chaplin's motion for the appointment of a Royal Commission on Agriculture. In 1874-5 he served on the Royal Commission on unseaworthy ships, and in 1885 he was appointed a member of the Commission on the defence of the coaling stations. As a yachtsman, Lord Brassey has made many distant voyages. In 1876-7 he went round the world in the "Sunbeam." In 1884 he visited the West Indies, and in 1886-7, India, Australia, and the Cape. A series of letters by him on the state of the defences of the coaling stations on the route to Australia by the Suez Canal, and to India by the Cape of Good Hope, was published in the *Times*. He was the first yachtsman who obtained a Board of Trade certificate for competency to navigate as master. The late Lady Brassey was the author of the well-known work, "Voyage of the 'Sunbeam,'" and other

popular books of travel. She died Oct. 14, 1887. At the general election of 1886 Lord Brassey withdrew from Hastings and offered himself as a Gladstonian Liberal for one of the divisions of Liverpool. He was defeated, and on the resignation of Mr. Gladstone's Government he was raised to the peerage. Lord Brassey has taken an active part in the organization of the Imperial Federation league. He introduced the deputation to Lord Salisbury at whose instance the convening of the colonial Conference of 1887 was considered by the Government. On Sept. 8, 1890, Lord Brassey married the Hon. Sybil de Vere Capell, youngest daughter of the Viscountess Malden, and granddaughter of the Earl of Essex.

BRAZIL, President of the Republic of, see FONSECA, MARSHAL DEODORO DA.

BREAL, Michel Jules Alfred, a French philologist, was born at Landau, Bavaria, of French parentage, March 26, 1832. He received his early education in France, and studied Sanskrit at Berlin, under Professor Weber. Returning to Paris, he joined the staff at the Bibliothèque Impériale, and in 1862 obtained the Academy's prize for his "L'Étude des Origines de la Religion Zoroastrienne." In 1864 he was made Professor of Comparative Grammar at the College of France. M. Béal was elected a Member of the Institute Dec. 3, 1875, and made Director at the École des hautes études. In 1879 he was appointed Inspector-General of Public Instruction for high-class teachers. Among his works are "Hercule et Cacus, Étude de Mythologie comparée," 1863; translation of the "Grammaire comparée des Langues Indo-Européennes," 1867-72; "Quelques Mots sur l'Instruction publique en France," 1872; "L'Enseignement de la Langue Française," 1878; "Excursions pédagogiques," 1880; "La Réforme de l'orthographe Française," 1890.

BRECHIN, Bishop of. See JERMYN, The RIGHT REV. HUGH WILLOUGHBY.

BREITMANN, Hans. See LELAND, CHARLES GODFREY.

BRETT, Hon. Reginald Baliol, was born in London June 30, 1852, and is the eldest son of Lord Esher, Master of the Rolls. He was educated at Cheam School, in Surrey, and at Eton, and Trinity College, Cambridge, where he graduated in 1874, and took his M.A. degree in 1877. At the end of that year

he was appointed Private Secretary to the Marquis of Hartington, then the leader of the Liberal party. At the general election in 1880, Mr. Brett was returned to Parliament for Falmouth, defeating Sir Julius Vogel, the late Prime Minister of New Zealand. Mr. Brett continued for a time to act as unpaid secretary to the Marquis of Hartington, who was appointed Secretary of State for India in Mr. Gladstone's Government. At the general election of 1885, Mr. Brett contested Plymouth, and was defeated by Sir Edward Clarke, M.P. Mr. Brett is the author of several articles in the *Fortnightly Review*, and of certain letters to the *Times* on political questions of the day. In Sept. 1879, he married Eleanor, the youngest daughter of M. Sylvain Van de Weyer, one of the founders of Belgian independence, a member of the Provisional Government of 1830, and for many years subsequently Belgian Minister at the Court of St. James.

BREWER, The Rev. E. Cobham, LL.D., second son of John Sherren Brewer, Esq., "a man of Kent," was born May 2, 1810, in Russell Square, London, and educated by private tutors. He proceeded to Trinity Hall, Cambridge, in 1832, obtained the Freshmen's Prizes for Latin and English Essays, and took his degree in the Civil Law, First Class, in 1835. He was ordained deacon in 1834, priest in 1836, proceeded to the degree of LL.D. in 1840, and devoted himself to literature. In 1850 was published his "Guide to Science," which soon attained a large circulation, and was translated by himself into French. Dr. Brewer has published also a "Dictionary of Phrase and Fable" (21st edition, 1889); "Reader's Handbook" (12th edition, 1888); "Theology in Science," "History (political and literary) of France," 1863; "History (political and literary) of Germany," 1881; "Dictionary of Miracles," 1884; "Historic Note Book," 1890; about thirty educational books, and a number of pamphlets under various pseudonyms.

BRIALMONT, General Alexis Henri, a Belgian military engineer, and writer on military subjects, son of General Laurent Mathieu Brialmont, was born at Venloo, in the province of Limburg, May 25, 1821. He quitted the military school at Brussels with the rank of sub-lieutenant in 1843. Being connected, as an engineer officer, with the management of the fortifications, he was appointed to carry out the works at the fortress of Diest. From 1847 to 1850 he was private secretary to General Chazal, then Minister of War. In 1855

he left the corps of engineers and became a member of the staff, attaining to the rank of Captain in 1857. In due course he became Major-General, and in 1877 Lieutenant-General. He was appointed Inspector-General of Fortifications and of the Sappers and Miners in Belgium in 1875. Lieut.-General Brialmont has written many works on military history and tactics. The following are the principal:—"Éloge de la Guerre, ou réfutation des doctrines des Amis de la Paix," 1 vol. in 12mo, 1849; "Précis d'Art militaire," 4 vols. in 12mo, 1850; "Considérations politiques et militaires sur la Belgique," 3 vols. in 8vo, 1851-52; "Histoire du Duc de Wellington," 3 vols. in 8vo, 1856; "Agrandissement général d'Anvers," 1 vol. in 8vo, with atlas, 1858; "Complément de l'Œuvre de 1830," 1 vol. in 8vo, 1860; "Études sur la Défense des États et sur la Fortification," 3 vols. in 8vo, with atlas, 1863; "Études sur l'Organisation des Armées," 1 vol. in 8vo, 1867; "Traité de Fortification polygonale," 2 vol. gr. 8vo, with atlas, 1869; "La Fortification à fossés secs," 2 vols. gr. in 8vo, with atlas, 1872; "La Fortification improvisée," 1 vol. in 12mo, 1870; "Études sur la Fortification des Capitales et l'investissement des Camps retranchés," 1 vol. gr. in 8vo, 1873; "La Défense des États et les Camps retranchés," 1 vol. in 8vo, 1876; "La Fortification du champ de bataille," 1 vol. gr. in 8vo, with atlas, 1879; "Manuel de Fortification de Campagne," 1 vol. in 8vo, 1879; "Étude sur les Formations de Combat de l'Infanterie, l'attaque et la défense des positions retranchées," 1 vol. in 8vo, 1880; "Tactique des trois Armées," 2 vols. in 8vo, with atlas, 1881; "Situation militaire de la Belgique, travaux de défense de la Meuse," 1 vol. in 8vo, 1882; "Le général Todleben, sa vie et ses travaux," 1 vol. in 12mo, 1884; "La Fortification du temps présent," 2 vols. gr. in 8vo, with atlas, 1885; "Influence du Tir plongeant et des Obus-torpilles sur la Fortification," 1 vol. gr. in 8vo, with atlas, 1888; "Les régions fortifiées," 1 vol. gr. in 8vo, with atlas, 1890; and forty pamphlets on political and military subjects, published from 1846-90. General Brialmont made the principal fortifications of Antwerp in 1858; the fortifications of Bucarest in 1883, as well as those of Liège, and of Namur in 1887.

BRIDGE, John Frederick, Mus. D., Organist at Westminster Abbey, was born Dec. 5, 1844, at Oldbury, Worcestershire, educated at Rochester Cathedral School, under John Hopkins, and afterwards

became a pupil of Sir John Goss. He was appointed Organist of Holy Trinity Church, Windsor, in 1865; of Manchester Cathedral in 1869; Professor of Harmony at Owens College, Manchester, in 1871; Permanent Deputy Organist of Westminster Abbey in 1875; and succeeded to the full offices of Master of the Choristers and Organist in 1882. He is also Professor of Harmony and Counterpoint at the Royal College of Music. Dr. Bridge has composed the oratorio "Mount Moriah;" a cantata "Boadicea;" "Hymn to the Creator" (the song of St. Francis), produced at the Worcester Festival, 1884; "Rock of Ages" (Latin translated by Mr. Gladstone), produced at the Birmingham Festival, 1885; "Callirhoe" at the Birmingham Festival, 1889; church music and part songs. He is the author of theoretical works on Counterpoint, Double Counterpoint, and Canon, and "Organ Accompaniment"—all published in Novello's series of Primers.

BRIDGMAN, Frederic Arthur, figure painter, was born at Tuskegee, Alabama, Nov. 10, 1847. His father died when he was three years of age, and when ten his mother took him North, and he lived for a few years in Massachusetts. He then entered the American Bank Note Company (New York) to learn engraving, residing at Brooklyn, where he studied painting in evening art-schools. Although he made rapid progress as an engraver, he preferred to adopt painting as his art, and so resigned his position in the Bank Note Company; and in 1866, assisted by friends, went to Paris, where he studied under Gérôme in the École des Beaux-Arts for three years. From 1866 to 1871 he spent some time in Brittany. In 1871 he passed six months in London, and the next two years in the Pyrenees, on the Spanish border. The winter of 1872-73 was passed in Algiers, and that of 1873-74 in Egypt, Nubia, and on the Nile. In 1877 he received a medal in the Paris Salon, and also one at the International Exhibition of 1878. Soon after he was made a member of the Legion of Honour. An exhibition of his works was held at New York in 1881, and again in the spring of 1890. For twenty years pictures by him have appeared at nearly every exhibition of the Royal Academy, London. "Winters in Algeria," written and illustrated by him, appeared in 1889.

BRIERLY, Sir Oswald Walters, R.W.S., F.R.G.S., marine painter to the Queen, is the son of the late Thomas Brierly, Esq.,

of an old English family bearing arms granted in 1615, and was born at Chester. He was on board H.M.S. "Rattlesnake" during her surveys of the Great Barrier Reef of Australia, the Louisiade Archipelago, and part of New Guinea, and in the "Meander" with Capt. the Hon. Henry Keppel, visited New Zealand, Tongatabu, Tahiti, and many other places; has cruised in different parts of the world for eleven years on board various of H.M. ships—an island of the Louisiade, and a point in Australia are named after him, Brierly—was during the first year of the Russian war present at all the operations with the fleet in the Baltic, and afterwards on shore and with the fleet in the Black Sea, and at operations in the Sea of Azoff; he was present by command on board the Royal yacht at the great naval review at the close of the Russian war to make sketches for the Queen. In 1867 he was with H.R.H. the Duke of Edinburgh in his voyage round the world in the "Galatea," and his sketches of the cruise were exhibited at South Kensington; in 1868 he was attached to the suite of the Prince and Princess of Wales during their trip up the Nile; he has painted many important historical marine pictures, the principal of which have been engraved. He has been awarded the 4th class Medjidieh, 4th class Osmanieh, and the Turkish war medal, and is an Officer of the Redeemer of Greece. He was formerly J.P. for Auckland, New South Wales, and is at present Curator of the Painted Hall, Greenwich. In 1886 he received the honour of knighthood.

BRIGHT, Jacob, M.P., son of the late Mr. Jacob Bright and brother of the late Right Hon. John Bright, was born in 1821 and educated at the Friends' School, York. He sat for Manchester from 1867 to 1874, and again from 1876 to Nov. 1885, when he was defeated; he was returned in 1886 for the South-West Division of Manchester. Mr. Jacob Bright has identified himself with the chief Radical movements of his time, and has for many years been in favour of Home Rule for Ireland. He obtained the Municipal vote for women in 1869, and has always supported their efforts to obtain the parliamentary vote. In 1883 he succeeded in preventing the ratification of a treaty which proposed to give both banks of the Congo to Portugal. Mr. Gladstone then made the unprecedented promise that the treaty should not be ratified without the consent of the House of Commons. Nothing more was heard of the treaty, and shortly after-

wards freedom of commerce on the Congo was secured by the African Conference at Berlin.

BRIGHT, The Rev. William, D.D., was born at Doncaster, Dec. 14, 1824. From Rugby School he was elected scholar of University College, Oxford, where he graduated in the first class in classics in 1846. The next year he was elected a fellow of his college, and gained the Johnson Theological Scholarship and the Ellerton Theological Prize, and in 1849 he proceeded M.A. Applying himself to the study of divinity, he was ordained deacon in 1848, and priest in 1850, and in the succeeding year became theological tutor in Trinity College, Glenalmond. He returned to Oxford in 1859, and was afterwards appointed tutor of University College. He was promoted in 1868 to the Regius Professorship of Ecclesiastical History, and to the canonry of Christ Church, which is attached to that chair. The University conferred upon him the degree of D.D. in 1869. He became Proctor for the Chapter in convocation in 1878, and on subsequent occasions, and Examining Chaplain to the Bishop of Lincoln in 1885. Dr. Bright's works are, "Ancient Collects selected from various Rituals," 1857; "A History of the Church, from the Edict of Milan to the Council of Chalcedon," 1860; "Select Sermons of St. Leo on the Incarnation, with his 'Tome' translated with notes," 1862, 1886; "Faith and Life: Readings from Ancient Writers," 1864. In collaboration with the Rev. P. G. Modd, M.A., he published, in 1865, a Latin version of the Book of Common Prayer; "Hymns and other Verses," 1866 and 1874; reprints of "Eusebius's Ecclesiastical History," "St. Athanasius's Orations against the Arians," "Socrates' Ecclesiastical History," "Select Anti-Pelagian Treatises of St. Augustine," and "St. Athanasius's Historical Writings," with introductions, in 1872, 1873, 1878, 1880, and 1881; "Chapters of Early English Church History," 1878, 1888; "Later Treatises of St. Athanasius, translated, with notes and appendix," in the "Library of the Fathers," 1881; "Notes on the Canons of the First Four General Councils," 1882; "Private Prayers for a Week," 1882; "Family Prayers for a Week," 1885; "Iona, and other Verses," 1886. "Addresses on the Seven Sayings from the Cross," 1887; and "The Incarnation as a Motive Power," 1889.

BRISSON, Eugène Henri, a French politician, born July 31, 1835, at Bourges, is the son of a lawyer in that

city, studied law in Paris, and entered the profession in 1859. He wrote for the *Temps* and the *Avenir National*, and established in 1868, in conjunction with MM. Lacour and Allain-Targé, the *Revue Politique*. As a democratic candidate at the elections in 1869 he was unsuccessful in obtaining a seat in the Corps Législatif, but after the Revolution of the 4th Sept., 1870, he was appointed Deputy Mayor of Paris by the Government for the National Defence. This position he resigned on Oct. 3. On Feb. 8, 1871, he was elected as representative of the Seine in the Assembly, and submitted a proposition of amnesty for all political crimes. At the General Elections in Feb., 1876, he was elected for the 10th arrondissement of Paris, and followed in the new Chamber the same political line. He was one of the 363 deputies who refused a vote of confidence to the Broglie Cabinet. At the opening of the session of 1879, M. Brisson was elected Vice-President, and was named President of the Budget Commission on Feb. 27 of the same year. He succeeded M. Gambetta as President of the Chamber Nov. 3, 1881, and was re-elected in 1883. He accepted the office of Prime Minister on the fall of M. Ferry in 1885, but, after a few months gave place to M. de Freycinet.

BROADHURST, Henry, M.P., son of a journeyman stonemason, was born at Littlemore, near Oxford, in 1840, and received some education at a village school there. He worked as a journeyman stonemason up till the year 1872, when he became Secretary of the Labour Representation League. In 1875 he was appointed Secretary of the Parliamentary Committee of the Trades Union Congress. During the agitation on the Eastern Question he took a leading part in the organization of meetings, &c., in support of Mr. Gladstone's policy. He was elected member of Parliament for Stoke-on-Trent in 1880; was a member of the Royal Commission on Reformatories and Industrial Schools in 1881-2; served on the Royal Commission on the Housing of the Working Classes in 1884-5; and at the general election of 1885 he was returned for the Bordesley Division of Birmingham. In Feb., 1886, he was appointed Under-Secretary of State for the Home Department in Mr. Gladstone's Ministry. At the general election of 1886 he successfully stood for West Nottingham. He took a leading part in the passing of the Employers' Liability Act, 1880, and many other measures affecting the industrial classes. He is the author

of the Leasehold Enfranchisement Bill and the Sites for Chapels Bill, and during the sessions of 1884-5 he had charge of the Deceased Wife's Sister Bill.

BROCK, THOS., A.R.A., sculptor, was born in 1847, at Worcester, where his father was a decorator. He was educated first at the Government School of Design in that city, then came to London and studied at the Royal Academy, where he obtained both silver and gold Medals. He became a pupil and afterwards an assistant of the late J. H. Foley, the sculptor. After Mr. Foley's death he completed the numerous works left unfinished by him, the chief of these being the O'Connell monument in Dublin. Among Mr. Brock's ideal works may be mentioned "Salmacis," "Hercules Strangling Antæus," statuettes of Paris and Enone, and a large equestrian group, "A Moment of Peril," purchased for the nation by the Royal Academy. He exhibited at the Royal Academy in 1889 "The Genius of Poetry." Among portrait statues may be named Richard Baxter, Robert Raikes, Sir Rowland Hill, Sir Richard Temple, Sir Erasmus Wilson, and the poet Longfellow (the latter for the Westminster Abbey Memorial). He was elected an Associate of the Royal Academy Jan. 16, 1883.

BRODRICK, The Hon. George Charles, LL.B., D.C.L., Warden of Merton College, Oxford, is the second son of the late Viscount Middleton, formerly Dean of Exeter, and was born at Castle Rising, Norfolk, May 5, 1831. He was educated at Eton School, and at Balliol College, Oxford, taking his degree in 1854, and being elected a Fellow of Merton College in 1855. He obtained a double first-class at Oxford, as well as the English Essay Prize and the Arnold Historical Prize. He also carried off, in 1858, the Law Scholarship at the University of London, where he took the degree of LL.B. In 1885 he was created D.C.L. of Oxford by a University decree. He was called to the Bar from Lincoln's Inn in 1859, and for some years practised as a barrister on the Western circuit. In conjunction with Mr. Fremantle, he edited in 1865 "The Ecclesiastical Judgments of the Privy Council." In 1877 Mr. Brodrick was unanimously elected by the School Board for London to fill a death vacancy, being the first member so elected. He long served on the Council of the London Society for the Extension of University Teaching, and he is a member of the governing body of Eton College. He

took an active part in promoting the University Tests Act, and other measures of academical, and generally of educational, interest. In Feb., 1881, he was elected Warden of Merton College in the place of the late Dr. Bullock-Marsham. Mr. Brodrick is known to have contributed largely, but for the most part anonymously, to the daily Press and leading periodicals. A selection of articles published under his own name, together with two more elaborate treatises on "Primogeniture" and "Local Government," and other occasional essays, were re-published in a volume entitled "Political Studies" in 1880. In the following year he published a work entitled "English Land and English Landlords," being an inquiry into the origin, structure, and proposed reform of the English Land system; and he afterwards discussed the Irish Land question, and the claim of Tenant-right for British farmers, in three articles which appeared in *Fraser's Magazine* for 1891-2. Mr. Brodrick is also the author of articles on "The Progress of Democracy in England," and "Democracy and Socialism," which appeared in the *Nineteenth Century* during 1883 and 1884. His latest contributions to literature are mainly connected with academical history, including a volume entitled "Memorials of Merton College," a compendious "History of the University of Oxford," and several papers on kindred subjects.

BRODRICK, Hon. William St. John Fremantle, M.P., eldest son of Viscount Middleton, and nephew of the Hon. G. C. Brodrick, Warden of Merton College, was born in 1856 and educated at Eton and at Balliol College, Oxford, where he graduated B.A. 1879, and M.A. 1882. He was also President of the Oxford Union Debating Society. He represented West Surrey in the parliament of 1880-85, and after the passage of the Redistribution Act successfully stood for the Guildford Division of the county, which he still represents. He served on the Royal Commission on Prisons in Ireland, 1883-1885. In Lord Salisbury's second administration, 1886, Mr. Brodrick was appointed Financial Secretary to the War Office. He married Lady Hilda Charteris, third daughter of the Earl of Wemyss.

BROGLIE, Charles Jacques Victor Albert, Duc de, eldest son of the eminent French statesman Achille Charles Léonce Victor, Duc de Broglie (who died Jan. 25, 1870), was born in Paris, June 13, 1821. He was educated in the University of Paris, where, at an early age, he

gained a high reputation as a publicist, and became one of the editors of the *Correspondant*, in which journal he defended Roman Catholic interests and the doctrines of moderate constitutional liberalism. He was elected a member of the French Academy in 1862. He was secretary of the French embassies in Madrid and Rome, prior to the revolution of 1848; he then retired from public life, in consequence of his political opinions, until Feb., 1871, when he was elected Deputy for the department of the Eure, and nominated by M. Thiers's government French Ambassador in London. On his retirement from the ambassadorship, he, as the acknowledged leader of the Conservative party in the National Assembly, moved the order of the day which led to the resignation of M. Thiers and the acceptance by Marshal MacMahon of the Presidency of the Republic, April 24, 1873. The Duc de Broglie then became Minister of Foreign Affairs and President of the Council; and for more than a year he directed the policy of the new government, but having undertaken a project of a new Constitution, including the establishment of a Grand Council or Second Chamber, which was to be invested with the power of dissolving the Assembly, he was defeated on a question of procedure, and resigned with his ministry, May 16, 1874. At the elections of Jan. 30, 1876, M. de Broglie was elected a Senator by the department of the Eure: his term of office expired in 1885. On May 17, 1877, he succeeded M. Jules Simon as President of the Council of Ministers, Keeper of the Seals and Minister of Justice, which posts he resigned in December of the same year after the elections had given a large majority to the Republican party.—As a writer, the Duc de Broglie is well known by a translation of Leihnitz's "Religious System," 1846; his "*Etudes Morales et Littéraires*," 1853; "*L'Eglise et l'Empire Romain au Quatrième Siècle*," 6 vols., 1856, a work which passed through five editions; "*Une Réforme administrative en Algérie*," 1860; "*Questions de Religion et d'Histoire*," 1860; "*La Souveraineté Pontificale et la Liberté*," 1861; "*La Liberté Divine et la Liberté Humaine*," 1865; "*Le Secret du Roi: Correspondance Secrète de Louis XV. avec ses Agents Diplomatiques*," 2 vols., 1878; "*Frédéric II. et Marie Thérèse*," 1882; "*Frédéric II. et Louis XV., d'après des documents nouveaux*," 1885; "*Marie Thérèse Impératrice*," 2 vols., 1887.

BROOKE, The Rev. Augustus Stopford,

born in Dublin in 1832, was educated at Trinity College, Dublin, where he gained the Downe prize and the Vice-Chancellor's prize for English verse. He graduated B.A. in 1856 and M.A. in 1858. He was curate of St. Matthew, Marylebone (1857-59); curate of Kensington (1860-63); minister of St. James's Chapel, York Street, St. James's Square (1866-75); and became minister of Bedford Chapel, Bloomsbury, June, 1876. He was appointed a Chaplain in Ordinary to the Queen in 1872. Mr. Brooke is the author of "*Life and Letters of the late Frederick W. Robertson*," 1865; "*Theology in the English Poets*," 1874; "*Primer of English Literature*," and four volumes of "*Sermons*," 1868-77; "*The Early Life of Jesus*," and a volume of poems, 1888. He is at present, 1890, engaged on a "*History of English Poetry*." In 1880 he seceded from the Church of England, his reason for this step being that he had ceased to believe that miracles were credible, and that, since the Established Church founded its whole scheme of doctrine on the miracle of the Incarnation, disbelief in that miracle put him outside the doctrines of the Church of England. Mr. Brooke has joined the Unitarian Church, and officiates at Bedford Chapel, Bloomsbury.

BROOKS, The Rev. Phillips, D.D., was born at Boston, Massachusetts, Dec. 13, 1835, and received the degree of B.A. (Harvard University), 1855, and subsequently that of D.D. He studied in the Episcopal Theological Seminary at Alexandria, Virginia, was ordained in 1859, and in the same year became rector of the Church of the Advent in Philadelphia, where he remained until 1862, when he was transferred to the Church of the Holy Trinity. Since 1870 he has been rector of Trinity Church, Boston. Mr. Brooks, whose preaching is as highly valued in London as in the United States, is regarded as one of the most eloquent of the American Clergy, and is frequently chosen as the orator on public occasions. At the request of the late Dean Stanley, Dr. Brooks preached in Westminster Abbey; and both Dean Stanley and Canon Farrar have preached for him in Boston. He is an active philanthropist as well as a popular preacher. In May, 1886, he was elected Assistant Bishop of Pennsylvania, but declined the position. He has published "*Lectures on Preaching*," 1877; "*Sermons*," 1878; "*Influence of Jesus*," 1879; "*Candle of the Lord*," 1881; "*Sermons Preached in English Churches*," 1883; and "*Twenty Sermons*," 1886.

BROOME, Sir Frederick Napier, K.C.M.G., son of the late Rev. F. Broome, rector of Kenley, Shropshire, was born in Canada in 1842, educated at Whitechurch Grammar School in the above county, and emigrated to Canterbury, New Zealand, in 1857. Visiting England in 1864, he married Mary Anne, relict of the late Sir George Barker, R.A., K.C.B. [q. v.], and returned to his "sheep station" in New Zealand the following year, but in 1869 he came back to England. Almost immediately on his arrival in London, Mr. Broome was employed by the *Times*, and was for five years a general contributor, reviewer, and art-critic to that journal, which he represented in Russia at the marriage of the Duke of Edinburgh, and on many other important occasions. He has contributed prose and verse to the *Cornhill*, *Macmillan*, and other magazines, and has published two volumes of poetry, "Poems from New Zealand," 1868, and "The Stranger of Seriphos," 1869. In 1870 Mr. Broome was appointed Secretary to the Fund for the Completion of St. Paul's Cathedral; in 1873, Secretary to the Royal Commission on Unseaworthy Ships; in 1875 Colonial Secretary of Natal, to which Colony he proceeded as a member of Lord (then Sir Garnet) Wolseley's special mission, and in 1877, Colonial Secretary of the Island of Mauritius. He was appointed Lieutenant-Governor of the latter colony in 1880; and Governor of Western Australia in 1882. He was nominated a Companion of the Order of St. Michael and George in 1877, and a Knight Commander in 1884. In 1885 Sir Frederick visited England, and read before the Royal Colonial Institute a paper on Western Australia, which attracted much notice. For the first time on such an occasion at the Institute, H.R.H. The Prince of Wales took the chair, and a very large and distinguished audience was present. In 1890, Sir Frederick again came to England to give evidence upon the Western Australia Constitution Bill before the House of Commons. This mission, undertaken at the request of the Legislature of the Colony, concluded Sir Frederick's seven years of office in that Government. During this period the Colony had been greatly advanced by his exertions, and the departure of Lady Broome and himself from Western Australia was the occasion of a remarkable manifestation of the esteem and affection of the Colonists.

BROOME, Lady Mary Ann (formerly Lady Barker, under which name most of her books were published), is the eldest daughter of the late W. G. Stewart, Esq;

Island Secretary of Jamaica, in which island she was born. Sent to England at two years old, she returned to Jamaica in 1850. In 1852 she married Captain (afterwards Colonel) G. R. Barker, Royal Artillery, who distinguished himself very highly in the Crimean War and the Indian Mutiny, and was made K.C.B. for services in the field. Lady Barker went to India to join Sir George in 1860, but he died that year, and she returned to England. In 1865 Lady Barker married Mr. Frederick Napier Broome, [q. v.] then of Canterbury, New Zealand, and accompanied him back to the Middle Island. In 1869 Mr. Napier Broome and Lady Broome returned to England. "Station Life in New Zealand," from Lady Broome's pen, was published in that year, and its success encouraged the author to write, in the following year, a small volume for children, called "Stories About." This second work was soon followed by "A Christmas Cake in Four Quarters," "Spring Comedies," "Travelling About," "Holiday Stories," "Ribbon Stories," "Sybil's Book," "Station Amusements in New Zealand," "Boys," "The White Rat," &c., besides many articles for magazines. In 1874 Lady Broome published also a little book called "First Principles of Cooking," of which the circulation has been large; and almost immediately after its appearance she accepted the post of Lady Superintendent of the National Training School of Cookery, South Kensington. Lady Broome was also for some years editor of *Evening Hours*, a family magazine. Mr. Napier Broome having entered the Colonial service in 1875, Lady Broome's next experiences were of South Africa and Mauritius. Her life in the former country is described in "A Year's Housekeeping in South Africa," 1877. In 1883, her husband having been appointed Governor of Western Australia, Lady Broome went to that colony, which is described in her last published book, "Letters to England," 1885. On leaving Western Australia in 1890, Lady Broome received an affectionate farewell from the people of the colony, by whom she was greatly beloved.

BROUGH, Lionel, comedian, was born at Pontypool, Monmouthshire, March 10, 1836, being the fourth son of Mr. Barnabas Brough, and a younger brother of the well-known comic authors, "The Brothers Brough." His first employment was in the capacity of office-boy to Mr. J. Timbs, in the *Illustrated London News* office, in Douglas Jerrold's time. Subsequently he published the first number of the *Daily Telegraph*, and for

five years he was connected with the *Morning Star*. Going to Liverpool with other members of the Savage Club to give amateur theatrical performances in aid of the Lancashire Relief Fund, he achieved so decided a histrionic success that he was offered a regular engagement by Mr. A. Henderson, and accordingly made his first professional appearance at the Prince of Wales's Theatre at Liverpool in 1864. His first appearance in London was at the Queen's Theatre in 1867. Since that date he has played the principal low-comedy characters in London and all through the provinces. He has represented Tony Lumpkin, Bob Acres, Marplot, Touchstone, and many other well-known characters with great success. Mr. Brough was manager of Covent Garden Theatre for Mr. Dion Boucicault during the season in which "Babil and Bijou" was produced. He afterwards became, for a short time, joint lessee of the Novelty Theatre, Great Queen Street.

BROUGHTON, Miss Rhoda, a popular English novelist, is the daughter of a clergyman, and was born Nov. 29th, 1840, in North Wales. Her principal works are:—"Cometh Up as a Flower," 1867; "Not Wisely, but Too Well," 1867; "Red as a Rose is She," 1870; "Goodbye, Sweetheart, Goodbye," 1872; "Nancy," 1873; "Tales for Christmas Eve," 1873 (republished in 1879 under the title of "Twilight Stories;") "Joan," 1876; "Second Thoughts," 1880; "Belinda," 1883; and "Doctor Cupid," 1886.

BROWN, Ford Madox, a painter, by some considered to belong to the Pre-Raphaelite school, was born at Calais, of English parents, in 1821. He is grandson of Dr. John Brown, of Edinburgh, founder of the Brunonian theory of Medicine, and father of the late Oliver Madox-Brown, the author of "Gabriel Denver." In 1844 he sent two cartoons to Westminster Hall. In the competition in 1845 he was unsuccessful, though Haydon, in his Diary, speaks of his fresco as "the finest specimen of that difficult method in the Hall." Shortly after this he visited Italy. In 1848 he sent his "Wycliff reading his Translation of the Scriptures" to the Free Exhibition, near Hyde Park, where, in 1849, he exhibited "King Lear," one of his most characteristic works. At the Royal Academy, in 1851, he produced his large picture of "Chaucer at the Court of Edward the Third," which had been several years in progress. This picture, among those selected by Government for the Paris Exhibition of 1855,

received the Liverpool prize of £50 in 1858, and is now in Australia, having been purchased for the Sydney Museum. At the Royal Academy, in 1852, was first seen his picture of "Christ washing Peter's Feet," which received the Liverpool prize in 1856, and was among the Art Treasures at Manchester in 1857. After 1852, this artist, though exhibiting at times at Liverpool, Edinburgh, and other places, did not again come before the London public till 1865, when he opened an exhibition in Piccadilly of 50 pictures, and as many cartoons and sketches. Here for the first time were seen in the metropolis his pictures of "The Last of England," "The Autumn Afternoon," "Wilhelmus Conquistator," and "Work." The last-mentioned was longer in hand than any of his other productions, and was considered by the painter and his admirers his chief work at that time. It now hangs in the Manchester Art Gallery, purchased by the Corporation. Since then he has produced "The Coat of Many Colours," "Cordelia's Portion," "Elijah and the Widow's Son," "Romeo and Juliet," "The Entombment," "Don Juan," and "Jacopo Foscari," at present in different private collections. Most of these last-named works formed part of the Royal Jubilee Exhibition at Manchester in 1887, of which exhibition he, with his assistants, decorated the spandrels of the dome with eight huge canvases, each 35 feet long, each canvas representing one of the industries of Lancashire. He completed in 1878 a picture of "Cromwell," representing the great Protector dictating the famous protest to the Duke of Savoy against the cruelties which that sovereign inflicted on the Vaudois Protestants. His last oil picture of importance is "Wycliff on Trial in old St. Paul's," a composition including more than a hundred figures, now one of a fresco series on which he has been engaged for eleven years in the Manchester Town Hall. The subjects already painted are: "The Romans building Mancunium," "The Baptism of Eadwine," "The Expulsion of the Danes," "Introduction of Flemish Weavers," "Wycliff on Trial," John of Gaunt, Duke of Lancaster, defending him, "Weights and Measures Tested," "Crabtree Watching the Transit of Venus," "Chetham founds his School," "Kaye, inventor of the Fly-shuttle," "Dalton, inventor of the Atomic Theory," and "Stages of Cruelty," begun in 1856, and finished in 1890. Mr. Madox Brown has also frequently lectured and written on art.

BROWN, Pisistratus. See BLACK, WILLIAM.

BROWN, John George, American figure painter, was born at Durham, England, Nov. 11, 1831. He began his art studies at the age of eighteen, at first at Newcastle-on-Tyne, and afterwards spent a year at the Edinburgh Royal Academy. Removing to America, in 1853, he entered the schools of the National Academy of Design in New York, and in 1856 opened a studio in Brooklyn, where he remained until 1860, when he transferred his studio to New York City. He was made an Academician in 1863, and was one of the founders of the Water-Colour Society, of which for some years he was Vice-President. He held the same office in the Artists' Fund, in which also he was interested. He has twice (in 1880 and in 1885) exhibited at the London Royal Academy. His principal pictures are: "His First Cigar," "Curling in Central Park," "The Longshoreman's Noon," "Tough Customers," "The Thrilling Moment," "The Passing Show," "The Dress Parade," "The Three (Scape) Graces," "Left his Money on the Piano," "The Lost Child," "The Transit of Venus," "A Merry Air and a Sad Heart," "Clear the Track!" "The Dog Show," "A Collection of Antiques," "As Good as New!" "The Old Folks at Home," "Plotting Mischief," "Under the Weather," "The Wounded Playfellow," "A Jolly Lot," "The Monopolist," "Day Dreams," "You're a Nice Pup," and "Watching the Clouds." A number of his works have been photographed and engraved.

BROWN, Robert ("Campsterianus"), M.A., Ph.D., F.L.S., &c., is the only son of Thomas Brown, Esq., of Campster, Caithness, where he was born, March 23, 1842. After being educated privately, he studied in the University of Edinburgh, where he gained several medals and other prizes, and in later years in the scientific schools and universities of Leyden, Copenhagen, and Rostock, receiving from the latter the degree of Phil. Doc. (*summa cum laude*) his thesis being "Species Thujæ et Libocedri quæ in America-Septentrionale gignuntur." In 1861 he visited Jan Mayen, Spitzbergen, Greenland, and the western shores of Baffin's Bay, discovering the now universally admitted cause of the discoloration of the Arctic Ocean, and numerous other scientific facts. Between 1863-66 he travelled for scientific purposes in many of the least-known parts of America, and some of the Pacific Islands, from the West Indies and Venezuela to Alaska and Behring Sea Coast, as Botanist of the British Columbia Expedition and Commander of the Vancouver

Island Exploring Expedition, during which he introduced various new plants into Europe, and charted all the interior of Vancouver, then unknown. His researches are recorded in numerous memoirs and volumes in English, German, and Danish. In 1867 he visited Greenland, making, with E. Whymper, the first attempt by Englishmen to penetrate the inland ice, and formed those theoretical conclusions regarding its nature afterwards confirmed by Nansen. Since then Dr. Brown has travelled extensively in the Barbary States of North Africa, and has been Lecturer on Geology, Botany, or Zoology in the Royal High School, Edinburgh, and Heriot Watt College (School of Arts), Edinburgh, the Mechanics' Institution, Glasgow, and elsewhere. He is an honorary or ordinary member of many learned societies in this country, in America, and on the Continent, and has been President of the Royal Physical Society, Vice-President of the Botanical Society, and President of the Naturalists' Club, Edinburgh; and was in 1890 elected Vice-President of the Institute of Journalists. Among other new species discovered by him his name has been attached, by different English and foreign naturalists and geographers, to *Aralia Browniana* (fossil), *Verrucaria Campsteriana*, and *Lecidea Campsteriana*, and to Brown's Range, Mount Brown, and Brown's River in Vancouver Island, and to Cape Brown in Spitzbergen, and Brown's Island, north of Nova Zembla. In 1876 he removed to London, in order to devote himself entirely to literary work. He is the author wholly or conjointly of about 26 volumes, and of a large number of scientific memoirs, and of nearly 3,000 articles and reviews in various languages. A list of his Arctic memoirs are contained in Chavanne, Karpf, and Le Monnier's "Die Literatur über die Polar-Regionen," 1878; and, up to 1880, in Lauridsen's "Bibliographia Groenlandica," 1890. His separate works are chiefly geographical, ethnological, and natural history. The principal of these are: "Peoples of the World," 6 vols.; "Countries of the World," 6 vols.; "Manual of Botany;" "Our Earth," 3 vols.; and "Science for All," 5 vols. He is at present, 1890, engaged in editing "Leo Africanus" for the Hakluyt Society, and has annotated "Pellow's Adventures in Morocco."

BROWN, Robert, Jun., F.S.A., born at Barton-upon-Humber, July 6, 1844, was educated at Cheltenham College, and is known as a writer on archaic religion, mythology, and astronomy. His works are

"Poseidôn; a Link between Semite, Hamite, and Aryan," 1872; "The Great Dionysiak Myth," 2 vols., 1877-8; "The Religion of Zoroaster, considered in connection with Archaic Monotheism," 1879; "The Religion and Mythology of the Aryans of Northern Europe," 1880; "Language, and Theories of its Origin," 1881; "The Unicorn," 1881; "The Law of Kosmic Order," 1882; "Eridanus: River and Constellation," 1883; "The Myth of Kirkê," 1883; "The Phaenomena or 'Heavenly Display' of Aratos: Done into English Verse," 1885; "A Trilogy of the Life to Come," and other poems, 1887; "The Etruscan Inscriptions of Lemnos," 1888; "The Etruscan Numerals," 1889; "Remarks on the Tablet of the Thirty Stars, or Babylonian Lunar Zodiac," 1890.

BROWN, Tom. See HUGHES, THOMAS.

BROWN, The Rev. William Haig, LL.D., born at Bromley, Middlesex, in 1823, was educated at Pembroke College, Cambridge, where he graduated in high honours in 1846, proceeding M.A. in 1849, and LL.D. in 1864. Having held for some time a fellowship and tutorship in his college and a temporary mastership at Harrow, he became, in 1857, Head Master of the Grammar School at Kensington, in connection with King's College, London, and was elected Head Master of Charterhouse School in 1863, on the retirement of the Rev. R. Elwyn. Under Dr. Haig Brown's mastership this famous school was moved from its old home in the heart of London to the hills above Godalming. In 1869 Dr. Brown published "*Sertum Carthusianum floribus trium seculorum contextum. Cura Gulielmi Haig Brown, Scholæ Carthusianæ Archididascali*," and in 1879 a history of Charterhouse, called "Charterhouse Past and Present."

BROWN-SÉQUARD, Professor Ch. E., M.D. Paris, F.R.S., F.R.C.P. Lond., Hon. LL.D. Cantab., a physician and physiologist, was born in the Mauritius, 1817. He has devoted his time since his graduation almost exclusively to an extended series of experimental investigations on important physiological topics, such as the conditions and functions of the different constituents of the blood, animal heat, the spinal cord in its normal and pathological states, the brain, the muscular system, the sympathetic nerves and ganglions, and the inhibitory and other influences of many parts of the body upon others. He has visited the United States (his father's country) many times, delivering short courses of lectures, and in-

structing private classes of physicians in his discoveries. Having been called in 1860, to take charge of the then newly established hospital for the paralysed and epileptic in London, he had the honour of delivering the Croonian lecture at the Royal Society, and the Gulstonian lecture at the College of Physicians. He had previously, in 1858, had the great and exceptional honour of being invited to deliver six lectures at the College of Surgeons. He lived in London till 1864, and then went to the United States, where he was appointed Professor of the Physiology and Pathology of the Nervous System at Harvard University. Returning to France in 1869, he was appointed Professor in the *École de Médecine* in Paris. In 1868 he founded, in Paris, with Drs. Charcot and Vulpian, the *Archives de Physiologie normale et pathologique*, of which he is now the sole editor. He has published a large number of lectures in the London *Lancet* on various kinds of paralysis of cerebral or spinal origin, and on other subjects, and also many essays and papers, giving the details of his discoveries, besides several works on epilepsy, on paralysis of the lower extremities, on the physiology and pathology of the central nervous system, and on functional nervous affections. He has received several prizes from the French Academy of Sciences, of which he is a member, and, in 1878, was elected to the chair of medicine at the Collège de France. In 1881, he was awarded the Baly medal by the Royal College of Physicians of London.

BROWNE, The Right Rev. Edward Harold, D.D. Cantab., Hon. D.C.L. and D.D. of Oxford, Bishop of Winchester, youngest son of the late Col. Robert Browne of Morton House, Bucks, born in 1811, was educated at Eton, and at Emmanuel College, Cambridge, where he graduated as wrangler in 1832, obtained the Crosse Theological Scholarship in 1833, the first Hebrew Scholarship in 1834, and the Norrisian Prize for a theological essay in 1835. He became fellow and tutor of his college; afterwards incumbent of St. James's; and of St. Sidwell's, Exeter, in 1841; was Vice-Principal and Professor of Hebrew at St. David's College, Lampeter, from 1843 to 1849, when he was appointed Vicar of Kenwyn, Cornwall, and Prebendary of Exeter. The vicarage of Kenwyn he resigned for that of Heavitree, Devonshire, in 1857. In 1854 he was elected Norrisian Professor of Divinity in the University of Cambridge, and in 1857 Canon Residentiary of Exeter Cathedral, when he re-

signed the living of Heavitree. He was consecrated Bishop of Ely in March, 1864. After the death of Bishop Wilberforce he was, in August, 1873, translated to the See of Winchester, and appointed prelate of the Order of the Garter. Bishop Browne has taken a warm interest in the "Old Catholic" movement in Germany, and attended the Congress of "Old Catholics" held at Cologne, in Sept., 1872, and at Bonne in 1874. He was Chairman of the Committee employed on the Revision of the Translation of the Bible, O.T. He published in 1850-53 an "Exposition of the Thirty-nine Articles," in two vols., since reprinted in one vol., 8vo (12th edit., 1882), and re-edited for the use of the American Church by Bishop William, of Middletown, Connecticut; three volumes of sermons preached before the University of Cambridge, one "On the Atonement and other Subjects," 1859; the second on "Messiah as Foretold and Expected," 1862; the third in 1872; and a volume on the "Pentateuch and Elohistie Psalms, in reply to Dr. Colenso," in 1863. Bishop Browne is the author of articles in "Aids to Faith," in "Smith's Dictionary of the Bible," and in the "Speaker's Commentary."

BROWNE, Professor, The Rev. George Forrest, B.D., son of George Browne, Proctor of the Ecclesiastical Court of York, and Anne, daughter of Rev. R. Forrest, Precentor of York Minster, was born at York, Dec. 4, 1833, and educated at St. Peter's School, York, and Catharine Hall, Cambridge; graduating in 1856. He was Mathematical Master at Glenalmond, 1857; ordained Deacon, 1858; Priest, 1859, by the Bishop of Oxford; and appointed Theological Tutor and Bell Lecturer in Ecclesiastical History in the Episcopal Church of Scotland, 1862; Fellow and Lecturer of St. Catharine's, Cambridge, 1863. He vacated his Fellowship on his marriage with Mary Louisa, eldest daughter of Sir J. Stewart Richardson, Bart., of Pitfour Castle, Perthshire, and was rector of Ashley, 1869-74; Proctor of the University, 1869-71, 1876-8, 1879-81; Secretary of the University Commission, 1877-81; is a member of the Council of the Senate (1874-90), the General Board of Studies, and various Boards and Syndicates. He has been Secretary of the Cambridge Local Examinations since 1869, and of Local Lectures since 1877, and editor of the official *University Reporter, Statuta, Ordinances, Endowments, &c.* He has been University Preacher on various occasions, is a Magistrate for the Borough of Cambridge, an Alderman

of the County Council for Cambridgeshire, and a member of the Governing body of Selwyn College. As a member of the Alpine Club, Mr. Browne published in the *Cornhill Magazine* various papers on Alpine expeditions; on "Subterranean Ice," in *Fraser, &c.*, and a book on "The Ice Caves of France and Switzerland," 1864. He published "University Sermons," in 1879, 1880, and 1888; "The Venerable Bede," 1880; and since 1881 has published a number of papers on "English Sculptured Stones of pre-Norman Type;" he has been since 1888 Disney Professor of Archæology in the University of Cambridge. Professor Browne's chief claim to public notice lies in his work as the principal organiser of the Cambridge Local Examinations.

BROWNE, Sir J. Crichton. See CRICHTON-BROWNE.

BROWNE, General Sir Samuel James, K.C.B., K.C.S.I., F.C., was born in 1824, and entered the Bengal Staff Corps as an officer in the 46th Bengal Native Infantry, Dec. 22, 1840; became Lieutenant, Oct. 26, 1844; Captain, Feb. 10, 1855; Brevet Major, July 20, 1858; Major, Feb. 18, 1861; Brevet Lieut.-Colonel, April 26, 1859; Lieut.-Colonel, Dec. 22, 1866; Brevet Colonel, Nov. 17, 1864; Major-General, Feb. 6, 1870; Lieut.-General, Oct. 1, 1877; General, Dec. 1, 1888. Sir Samuel James Browne served throughout the Punjab Campaign of 1848-49, and was present at the passage of the Chenab, the actions of Ramnuggar, Sadvolapore, Chillianwallah, and Goojerat (medal with two clasps); was in command of the Punjab Cavalry and Corps of Guides; served on the Derajat and Peshawur frontier from 1850 to 1869, including operations against Oomurzaie Wuzerees in 1851-52; the Bozdar Belooch Expedition in March 1857; the attacks on Narinjee (Eusofzai border) in July and Aug., 1857; and in various minor skirmishes (medal with clasp); was in command of the 2nd Punjab Cavalry during the Indian Mutiny Campaign of 1858, including the siege and capture of Lucknow (Brevet of Major), actions of Koorsee, Rooyah, and Allygunge, and capture of Bareilly. He commanded a field force of cavalry and infantry in the attack and defeat of the enemy in their position at Seerpoorah, and capture of their guns and camp (several times mentioned in despatches, and thanked by the Commander-in-Chief, and by Government, Brevet of Lieut.-Colonel, C.B., Victoria Cross, and medal with clasp). He received the F.C. "for having, at

Seerpoorah, in an engagement with the rebel forces under Khan Alie Khan, on Aug. 31, 1858, whilst advancing upon the enemy's position at daybreak, pushed on, with one orderly sower, upon a 9-pounder gun that was commanding one of the approaches to the enemy's position, and attacked the gunners, thereby preventing them from reloading and firing upon the infantry, who were advancing to the attack. In doing this a personal conflict ensued, in which Major Browne, Commandant of the 2nd Punjab Cavalry, received a severe sword-cut wound on the left knee, and shortly afterwards another sword-cut wound, which severed the left arm at the shoulder, not, however, before he had succeeded in cutting down one of his assailants. The gun was eventually captured by the infantry, and the gunner slain." In 1876 he was made K.C.S.I., and in the Afghan war of 1878-79 he commanded the 1st Division Peshawur Valley Field Force in the attack and capture of the Fort of Ali Musjid; the forcing of the Khyber Pass in Nov., 1878, and subsequent operations till the end of the campaign (received the thanks of the Government of India, and of both Houses of Parliament, K.C.B., medal with clasp).

BROWNE, John Hutton Balfour, Q.C., brother of Sir James Crichton-Browne, M.D., LL.D., F.R.S., was born Sept. 13, 1845, at Crichton House, Dumfries, Scotland. His father was Dr. W. A. F. Browne, F.R.S., at that time Medical Superintendent of the Crichton Royal Institution, Dumfries, but afterwards Commissioner in Lunacy for Scotland. His mother was a daughter of Dr. Andrew Balfour, of Edinburgh, a sister of J. H. Balfour, Professor of Botany in the University of Edinburgh, and also connected with Dr. Hutton, the geologist, whose work on "The Theory of the Earth" made an epoch in the history of geology. He was educated at the Dumfries Academy, and the University of Edinburgh, where he obtained high distinction in Philosophy and in Literature. He was for several years President of the Speculative Society, and at one time intended to become a Scotch advocate. In 1868 he began to read for the English Bar, and was "called" to the Bar by the Middle Temple in June, 1870. He went the Midland Circuit. In 1870 he published a work on the "Medical Jurisprudence of Insanity." In 1874, having written and published a work on the "Law of Carriers," he was appointed Registrar and Secretary to the Railway Commission, which appointment he held until 1881. He published in 1874 a work

on "The Law of Rating," and afterwards several other legal works. In 1880 he published a well-known work on the "Law of Railways." He went to the Parliamentary Bar in 1874, and was made a Queen's Counsel in 1885. He has been engaged for the promoters in all the Bills for the formation of a Ship Canal to Manchester; is, perhaps, the leading authority on Gas and Water Bills, and conducted, as leader, the case of the Traders against all the Railway Companies, in 1889-90, in England, Scotland, and Ireland, before the Board of Trade in settling the Classification of Articles, and the Schedule of Rates, under the Railway and Canal Traffic Act, 1888. He is a Justice of the Peace for the county of Dumfries. In 1870 and 1871 he wrote and published several works of fiction, which were fairly popular; one, "For Very Life," was published first in the *St. James's Magazine*, and was praised by Lord Beaconsfield, at that time Mr. Disraeli; another, "Men were Deceivers Ever," was dedicated to Carlyle, who was a countryman, almost a townsman, of the author; another, "Sir Edward's Wife," went through several editions.

BROWNE, The Venerable Robert William, M.A., Ph.D., F.G.S., the eldest son of William Browne, Esq., of Kennington, Surrey, born Nov. 12, 1809; was educated at Merchant Taylors' School, whence he was elected Scholar and Fellow of St. John's College, Oxford, and graduated B.A. in 1831, taking double first-class honours. Having been Tutor of his college, Curate of St. Michael's, and Select Preacher in the University, he was appointed, in 1835, to the Professorship of Classical Literature in King's College, London; and in 1836 to the Assistant Preachership of Lincoln's Inn. In 1843 he was made Chaplain to the Bishop of Lichfield; in 1844, Senior Chaplain to the Forces in London; in 1845, a Prebendary of St. Paul's; in 1854, Examining Chaplain to the Bishop of Bath and Wells; in 1860, Archdeacon of Bath, and Rector of Weston-super-Mare; and in 1863, Canon of Wells. He resigned the rectory of Weston-super-Mare in 1876, in which year he was elected an honorary Fellow of King's College, London. Archdeacon Browne is the author of "Histories of Greece and Rome" in Gleig's School Series, and of two elaborate "Histories of Greek and Roman Literature," for which the degree of Ph.D. was conferred upon him by the University of Heidelberg. He translated the *Ethics* of Aristotle, with an introductory essay and

notes, for Bohn's Classical Series, and is the author of several smaller works and sermons. He is married to the eldest daughter of the late Rev. Sir Charles Hardinge, Bart., niece of the late Viscount Hardinge, G.C.B.

BRUCE, Sir Charles, K.C.M.G., son of Thomas Bruce, Esq., of Arnot, Kinross, was born in 1837, and educated at Harrow. He is the author of "Die Geschichte von Nala und Damayanti," a critical revision of the Sanscrit text, published by the Imperial Academy of St. Petersburg, 1862, and of other Sanscrit and Vedic studies. He published in 1863 a translation of "Nala und Damayanti" in English verse; in 1865, "The Story of Queen Guinivere, and Other Poems." He was appointed Assistant-Librarian at the British Museum in 1863; Professor of Sanscrit, King's College, 1865; Rector of the Royal College, Mauritius, 1868; Director of Public Instruction, Ceylon, 1878; was President of the Ceylon Branch of the Royal Asiatic Society; appointed Colonial Secretary of Mauritius, 1882; Lieut.-Governor and Government Secretary of British Guiana, 1885; and has on several occasions administered the Government of Mauritius and British Guiana, and was made K.C.M.G. in 1889.

BRUCE, The Rev. John Collingwood, LL.D., D.C.L., F.S.A., born at Newcastle in 1805, was educated at his father's school, at Mill Hill Grammar School, and at the University of Glasgow. In 1826 he took the degree of M.A., and became LL.D., in 1853. In 1882 he received the degree of D.C.L. from the University of Durham. Though educated for the ministry of the Presbyterian Church, he did not enter orders, but joined his father in the management of his school. His father dying shortly afterwards, he conducted it on his own responsibility until the year 1858, when he retired into private life. During the year 1881 he held the office of "Moderator" or President of the Presbyterian Church of England. He has written "A Handbook of English History," which has gone through four editions. All the recent editions of the "Introduction to Geography and Astronomy," of which his father was the principal author, were prepared by him. In 1851 he published an historical and descriptive account of the "Roman Wall," in the North of England, a third edition of which appeared in 1866. Dr. Bruce, in 1856, published "The Bayeux Tapestry Elucidated," containing a copy, on a reduced scale, of the entire tapestry. More re-

cently he has published "A Handbook to Newcastle," and a "Handbook" for the use of pilgrims to the Roman Wall, which has gone through three editions. He has edited for the Society of Antiquaries of Newcastle-upon-Tyne the "Lapidarium Septentrionale," a work in folio, which contains an account of all the monuments of Roman rule found in the North of England. This book was undertaken at the request of the late Algernon, fourth Duke of Northumberland, and, through the liberality of that nobleman and others, has been profusely illustrated.

BRUCH, Max, musical composer, was born at Cologne, Jan. 6, 1838, and received his first musical instruction from his mother (*née* Almenröder) who was a highly-esteemed teacher of music, and who often in her young days sang at the Rhenish musical festivals. At the age of eleven Bruch attempted compositions on a large scale, and at the age of fourteen he had already brought out a Symphony at Cologne. From 1853 to 1857 he held the Mozart scholarship at Frankfurt o/M., and in that capacity he was a special pupil of Ferdinand Hiller (then Conductor of the Cologne concerts and Director of the Cologne Conservatorium) in the theory of music and composition; and of Karl Reinecke (till 1854), and of Ferdinand Brennung in playing the piano. After a short stay in Leipzig, he resided from 1858 to 1861 as musical teacher at Cologne, and was assiduous in composing. On the death of his father, in 1861, he set out on an extensive tour of study, which after brief stays at Berlin, Leipzig, Vienna, Dresden, and Munich, ended at Mannheim, where his opera "Lorelei" (after the text written by Geibel for Mendelssohn) was produced in 1863. At Mannheim also, between 1862 and 1864, he wrote the chorus-works, "Frithjof," "Römischer Triumphgesang," "Gesang der heiligen drei Könige," and "Flucht der heiligen Familie." In 1864-5 he was again on his travels, visiting Hamburg, Hanover, Dresden, Breslau, Munich, Brussels, and Paris. Then he brought out his "Frithjof" with success at Aix-la-Chapelle, Leipzig, and Vienna. From 1865 to 1867 he was musical director at Coblenz, and from 1867 to 1870 Director of the Court Orchestra at Sondershausen. At Coblenz he wrote, among other things, his well-known first concerto for the violin, and at Sondershausen two symphonies and portions of a Mass. The opera "Hermione," which was produced in 1872 in Berlin, where Bruch resided from 1871 to 1873, had only a success

d'estime. The choral work, or secular cantata, "Odysseus" likewise belongs to the period of the composer's residence at Berlin. After he had been five years (1873-78) at Bonn, devoting his time exclusively to composing "Arminius," "The Lay of the Bell," and his second concerto for the violin, and after he had paid two visits to this country for the purpose of producing some of his works, he became, in 1878, on the resignation of Stockhausen, Director of Stern's Singing Academy at Berlin; and in 1880 he was nominated to succeed Sir Julius Benedict as Director of the Philharmonic Society at Liverpool. In 1881 he married the vocalist, Miss Tuezek, of Berlin.

BRUGSCH, Professor Heinrich Karl, Ph.D., a distinguished philologist and Egyptologist, who by his researches on the subject of Hieroglyphics has attained a European celebrity. He was born in Berlin, Feb. 18, 1827, and before leaving the Gymnasium evinced his fondness for Egyptological studies by writing a Latin treatise on the Demotic writing, 1847. His early publications procured for him the patronage of King Frederick William IV., under whose auspices he studied the monuments of Egyptian antiquity in the museums of Paris, London, Turin, and Leyden. In 1853 he made his first visit to Egypt, and was present at some of the important excavations conducted under the supervision of the French archaeologist, M. Mariette. Returning to Berlin, he was appointed Keeper of the Egyptian Museum there in 1854. In 1860 he accompanied Baron Minutoli on his embassy to Persia, and after the death of the Baron he himself assumed the direction of the embassy. Subsequently he was appointed Ordinary Professor of Oriental Languages in the University of Göttingen; and in 1868 Ordinary Public Professor in the Philosophical Faculty of the same university. In Sept., 1869, Professor Brugsch returned to Egypt and succeeded M. Mariette as Keeper of the Egyptian collections at Boulak. He received the title of Bey, and afterwards that of Pacha. In Sept., 1881, he left Egypt in order to give a course of lectures upon Egyptology at the University of Berlin. The Professor has published a "History of Egypt;" a "Demotic Grammar;" a "Demotic and Hieroglyphic Dictionary;" "Materials for the Reconstruction of the Calendar of the Ancient Egyptians;" "Investigations concerning the old Egyptian Bi-lingual Monuments;" "Recueil de Monuments Egyptiens dessinés sur les lieux," 4 vols.; "Rhind's

Two Hieratic and Demotic Bi-lingual papyri translated and published;" "The Geographical Inscriptions of the Old Egyptian Monuments," 4 vols.; "Reiseberichte aus Egypten," written during a journey undertaken in 1853 and 1854; "Reiseberichte aus dem Orient;" "Journey to Asia Minor and the Peninsula of Sinai;" and numerous other learned works on the language, literature, and antiquities of Egypt. He took a leading part in the International Congress of Orientalists held in London in Sept., 1874. An English translation of his "History of Egypt under the Pharaohs, derived entirely from the Monuments," was published in London, in 1879.

BRUNLEES, Sir James, F.R.S.E., Past President of the Institution of Civil Engineers, was born at Kelso, Roxburghshire, in 1816, and received his early education there and in Edinburgh. In the latter town he had considerable practice as a surveyor under the late Mr. Alexander Adie, and in 1838 became assistant engineer to him on the Bolton and Preston Railway, one of the first lines constructed in this country. From 1844 to 1850 he carried out the extensive works of the Lancashire and Yorkshire Railway system, with Sir John Hawkshaw as chief engineer. In 1850 he was engaged on the construction of the Londonderry and Coleraine Railway, and in 1852 undertook the difficult works of the Ulverston and Lancaster Railway across Morecambe Bay. Since that date he has been actively engaged in engineering work both at home and abroad, and has also had a considerable practice as arbitrator in the settlement of disputed contracts, &c. The following are a few of the works carried out by him at home, in addition to those already mentioned:—The Solway Junction Railway, which has on it a viaduct a mile and a quarter long across the Solway Firth, the Clifton Extension Railway, the Mersey Tunnel Railway, opened in Jan., 1886, and of which he was senior engineer; the Avenmouth, King's Lynn, and Whitehaven Docks, besides several piers and jetties on different parts of the coast. He is also associated with Sir John Hawkshaw as joint engineer of the proposed Channel Tunnel Railway. He has twice visited Brazil, and carried out there the well-known San Paulo Railway, the Minas and Rio Railway, and the Porto Alegre Railway, and has received from the Emperor the decoration of the Order of the Rose. He has also constructed the Central Uruguay and Bolivar Railway, and other works of importance abroad. In May, 1886, Sir James Brunlees received

the honour of knighthood from the Queen at Windsor.

BRUNTON, Thomas Lauder, M.D., F.R.S., was born in Roxburghshire in 1844, and educated at Edinburgh University, where he graduated M.D. and D.Sc., obtaining honours and a gold medal for his thesis "On Digitalis," and the Baxter Scholarship in Natural Science. In 1867 he made some observations on the pathology of angina pectoris, which, together with the knowledge he possessed of the physiological action of nitrite of amyl, led him to the successful application of the drug to the treatment of the disease. This application affords one of the earliest and best marked instances of rational as distinguished from empirical therapeutics. After spending about three years in foreign travel and study, he was appointed Lecturer on *Materia Medica* at the Middlesex Hospital, London, in 1870, and in the following year he was appointed to St. Bartholomew's Hospital. In 1874 he was elected a Fellow of the Royal Society. In 1886 he was appointed a member of the commission to report upon the treatment of hydrophobia, and went to Paris to examine Pasteur's system. In 1889 he was deputed by the *Lancet* to represent it at the invitation of the Nizam's Government, on the second commission appointed at Hyderabad, to investigate the action of chloroform. He wrote the section on Digestion, Secretion and Animal Chemistry in Sanderson's "Handbook for the Physiological Laboratory," which was the first text-book of practical physiology published in this country. In conjunction with Sir Joseph Fayrer he investigated the action of snake poison, and discovered that life could be greatly prolonged, though not ultimately saved, by the use of artificial respiration. His work has been chiefly directed to ascertaining the action of drugs with a view to their application in disease; and he has published, alone or in conjunction with others, numerous papers on this subject, as well as the Goulstonian lectures on "Pharmacology and Therapeutics," in 1877; the Croonian lectures at the Royal College of Physicians in 1889 on "The Connection between Chemical Structure and Physiological Action;" and a text-book in which he has treated the action of drugs from a physiological point of view.

BRYCE, James, M.P., Regius Professor of Civil Law at Oxford, the son of James Bryce, LL.D., of Glasgow, and Margaret, eldest daughter of James Young, Esq., of Abbeyville, co. Antrim, was born at Belfast, May 10th, 1838, and

educated at the High School and University of Glasgow, and at Trinity College, Oxford (of which he was a scholar), graduating B.A., 1862, with a double first class. He obtained various University prizes, and proceeded to study for a time at Heidelberg. He was elected Fellow of Oriol College, Oxford, 1862, and became a barrister at Lincoln's Inn in 1867, practising for some years. In 1870 he was appointed Regius Professor of Civil Law in Oxford University, and in 1880 was elected Liberal member for the Tower Hamlets. He was Assistant-Commissioner to the Schools Inquiry Commission, 1865-6, and in 1881 served on the Royal Commission on the Medical Acts. In 1885 he was elected member for South Aberdeen, and was appointed Under Secretary of State for Foreign Affairs in Mr. Gladstone's Government. He was one of the chief supporters of the Home Rule Bill, and after the dissolution was returned unopposed for South Aberdeen in 1886. During his parliamentary career Mr. Bryce has taken a special interest in questions relating to Ireland, in the Eastern question, in the question of Preserving Common Rights, and University Reform; and he has carried acts for the Reform of City Parochial Charities and for the amendment of the Law of Guardianship (known as the "Infants Bill"), and the International and Colonial Copyright Act, 1886. Mr. Bryce's literary works are "The Holy Roman Empire" (1st edit. 1864, 9th edit. 1888; translated into German, 1873; do. into Italian, 1886; do. into French, 1889); "The Trade Marks Registration Acts, 1875 and 1876, with Introduction and Notes," 1877; "Transcaucasia and Ararat, a narrative of a Journey in Asiatic Russia in the autumn of 1876, with an account of the author's ascent of Mount Ararat" (1877, 3rd edit., 1878); numerous articles in magazines, mostly political, historical, or geographical, including descriptions of Iceland, and of the highlands of Hungary and Poland; "Two Centuries of Irish History" (1888), edited by him, with an Introductory Chapter; "The American Commonwealth" (1888, 2nd edit. 1889). He has been active on various political and social subjects, such as the Abolition of University Tests, the Protection of the Christian Subjects of the Sultan, and the Extension of the Frontiers of Greece, the Preservation of Commons and Open Spaces, the Reform of Endowments, the Revision and Consolidation of the Statute Law, the Establishment of a Universal International Copyright, and the Creation of a Teaching University in London. Professor

Bryce married, in 1889, Elizabeth Marion, daughter of Thomas Ashton, Esq., of Ford Bank, Tidsbury, near Manchester, ex-Sheriff of Lancashire.

BUCHAN, Alexander, M.A., LL.D., born at Kinnesswood, in Kinross-shire, on April 11, 1829, is the son of Alexander Buchan and Janet Hill. He was educated at the Free Church Training College, Edinburgh; and at the Edinburgh University, where he graduated as Master of Arts. He was engaged as a public teacher till Christmas, 1860, when he was appointed Secretary of the Scottish Meteorological Society. He is the author of "The Handy Book of Meteorology," 1867, 2nd edit., 1868; and "Introductory Text Book of Meteorology," 1871; the article "Meteorology" in the last edition of the "Encyclopædia Britannica;" "Report on Atmospheric Circulation," being one of the reports of the Challenger expedition; besides numerous Monographs in the Publications of the Learned Societies at Home and Abroad, including "The Mean Pressure and Prevailing Winds of the Globe;" "Weather and Health of London;" "Climatology of the British Isles," &c. He is M.A. Edinburgh University; LL.D. Glasgow University; Curator of the Library and Museum of the Royal Society, Edinburgh; Member of Meteorological Council; Foreign Member of the Royal Society of Sciences of Upsala; Honorary Member of the Philosophical Society, Manchester; Corresponding Member of the Philosophical Society, Glasgow; Corresponding Member of the Philosophical Society, Emden; Honorary Member of the Meteorological Societies of Austria, Germany, Algiers, Mauritius, &c.

BUCHANAN, Robert Williams, writer in verse and prose, born Aug. 1841, was educated at the High School and the University of Glasgow. His first work, "Undertones," appeared in 1860, and was followed by "Idyls and Legends of Inverburn" in 1865, and "London Poems" in 1866. Mr. Buchanan edited "Wayside Posies," and translated the Danish Ballads in 1866. His later works are "North Coast Poems," 1867; "Napoleon Fallen: a Lyrical Drama," 1871; "The Land of Lorne; including the Cruise of the *Tern* to the outer Hebrides," 1871; "The Drama of Kings," 1871; "The Fleshly School of Poetry," an attack on the poems of Mr. D. G. Rossetti and Mr. Swinburne, 1872; and "Master Spirits," 1873. Many years ago, his tragedy of "The Witchfinder" was brought out at Sadler's Wells

Theatre; and a comedy by him, in three acts, entitled "A Madcap Prince," was acted at the Haymarket in Aug. 1874. He has also contributed to the stage "A Nine Days' Queen," in which his sister-in-law, Miss Harriet Jay, the novelist, first appeared as an actress; and dramatic versions of "The Queen of Connaught" and "Paul Clifford." In 1869, Mr. Buchanan gave in the Hanover Square Rooms a series of "Readings" of selections from his own poetical works. A collected edition of his poems was published in 3 vols., 1874. In 1876, Mr. Buchanan published his first novel, "The Shadow of the Sword," which has been since followed by "A Child of Nature," 1879; "God and the Man," 1881; and "The Martyrdom of Madeline," a novel, 1882. A new volume of poems, entitled "Ballads of Life, Love, and Humour," and a "Selection" from his various poems, were issued simultaneously in 1882. His novel, "Love me for Ever," appeared in 1883, and his comedy, "Lady Clare," was brought out at the Globe Theatre on April 11th in the same year. "Alone in London," a drama written in conjunction with Miss Harriet Jay, was produced at the Olympic, November 2, 1885, and "Sophia," an adaptation of Fielding's "Tom Jones," at the Vaudeville on April 12, 1886. His play "Joseph's Sweetheart" was produced early in 1888; and, in the same year, he published an epic poem entitled "The City of Dreams."

BÜCHNER, Friedrich Karl Christian Ludwig, M.D., a German philosopher, born at Darmstadt, March 26, 1824, is the son of a distinguished physician in that town. After a preliminary education, he was sent in 1843 to the University of Giessen, where he studied philosophy, though he subsequently at Strasburg turned his attention to medicine, in compliance with the wishes of his family. He took his doctor's degree at Giessen in 1848, and then continued his studies in the universities of Würzburg and Vienna. After practising medicine for some time in his native place, he settled at Tübingen, as a private lecturer, being also appointed Assistant Clinical Professor. He was deprived of this position, however, by the authorities, in consequence of the philosophical doctrines propounded in his famous book on "Force and Matter," 1855. He thereupon returned to Darmstadt, and resumed practice as a physician. In the work referred to—which is entitled in German "Kraft und Stoff" (1855; 16th edit., 1888), and which has been translated into most European languages—Dr. Büchner explains the

principles of his system of philosophy, which, he contends, is in harmony with the discoveries of modern science. He insists on the eternity of matter, the immortality of force, the universal simultaneousness of light and life, and the infinity of forms of being in time and space. Dr. Büchner has further explained his system in "Nature and Spirit," 3rd edit., 1876; "Physiological Sketches," 2nd edit., 1875; and "Nature and Science," 3rd edit., 1874; "Man, and his Place in Nature," 3rd edit., 1889; "The Intellectual Life of Animals," 3rd edit., 1880; "The Theory of Darwin," 5th edit., 1890; "Light and Life," 1882; "The Future Life and Modern Science," 1889, and several other works. He has also contributed to periodical publications various treatises on physiology, pathology, and medical jurisprudence.

BUCK, Dudley, American musical composer, was born at Hartford, Connecticut, March 10, 1839. His parents intended that he should enter mercantile life, but he showed from his earliest years so decided a musical taste that the plan was abandoned, and in 1858 he left Trinity College (Hartford), where he was studying, and went to Europe for a thorough musical education. He studied three years at Leipzig and in Dresden, and one in Paris, under Hauptmann, Richter, Rietz, Moscheles, Plaidy, and Schneider. In 1862 he returned to America, and in 1864 began a series of organ concerts in the principal cities and towns of the United States, which were continued for a period of fifteen years, and which made him widely known to the American public both as a performer and as a composer. From Hartford, where, since his return from Europe, he had been organist of the North Congregational Church, he removed in 1869, to Chicago, to assume charge of the music in St. James's Church, but immediately after the great fire there in 1871, where he met with severe losses (including unpublished compositions), he went back to the East and took the musical direction of St. Paul's Church, Boston, and shortly afterwards was appointed organist of the Music Hall in the same city. These positions he retained for three years, relinquishing them in 1875 to become assistant conductor in Theodore Thomas' (N. Y.) Central Park Garden Concerts. In the following year his cantata, "The Centennial Meditation of Columbia," was performed under the direction of Mr. Thomas by a chorus of 1,000 voices and an orchestra of nearly 200 pieces at the inauguration of the

Centennial Exhibition in Philadelphia. Later in the same year (1876) he became organist of the Holy Trinity Church, Brooklyn, where he still remains. Among his numerous compositions may be mentioned two "Motett Collections," a series of "Studies in Pedal Phrasing," several groups of songs, a "Symphonic Overture" to Scott's "Marmion," the "Forty-sixth Psalm," and "The Legend of Don Munio," a romantic cantata of which the text is a metrical version of Irving's "Alhambra." The largest of his works is "The Light of Asia" (the text from Sir Edwin Arnold's poem), published in 1885. In the same year he wrote "The Voyage of Columbus" (a cantata) which was first performed by the Apollo Club, a Brooklyn Society of male voices founded and conducted by Mr. Buck. His "Golden Legend," based on Longfellow's poem of the same title, received the prize offered by the Cincinnati Music Festival Association for the best composition for solo voices, chorus and orchestra (\$1,000). Other of his works are a comic opera, "Deseret," produced in New York in 1880; "Illustrations in Choir Accompaniment" (1877); and a number of literary-musico treatises on themes connected with his profession. Mr. Buck is on the editorial staff of "The People's Cyclopedia."

BUCKLE, George Earle, the editor of *The Times*, is the eldest son of the Rev. George Buckle, Canon of Wells, and was born June 10, 1854, at Twerton Vicarage, near Bath, and educated at Honiton Grammar School, 1863-1865, and Winchester College, where he was a scholar on the Foundation, 1866-1872. He was scholar of New College, Oxford, 1872-1877, where he won the Newdigate Prize for English Verse, 1875, and gained a First Class in *Literæ Humaniores*, 1876, and a First Class in Modern History, 1877; graduating B.A. 1876, and M.A. 1879. He was Fellow of All Souls College, Oxford, 1877-1885, and was called to the Bar at Lincoln's Inn, 1880. He entered *The Times* office on the Editorial staff in 1880, and was appointed editor on Mr. Chenery's death in February, 1884. He married, in 1885, a daughter of Mr. James Payn, the novelist.

BUCKNILL, John Charles, M.D. Lond., F.R.C.P. Lond., F.R.S., was born in 1817, at Market Bosworth, and educated at Rugby school and at Bosworth school. He received his medical education at University College, London, of which College he is a Fellow, and has for some years past been a member of the Council

In 1840 he graduated in honours in the University of London, being first in surgery and third in medicine. In the College of Physicians of London he has been Censor, Councillor and Lumleian Lecturer. In 1844 he was appointed the first medical superintendent of the Devon County Lunatic Asylum, an office which he held until 1862, when he was appointed Lord Chancellor's Medical Visitor of Lunatics, which office he held until 1876. He is a Justice of the Peace of the county of Warwick and a Visitor of the County Asylum. In 1853 he originated, and for nine years afterwards edited, the *Journal of Mental Science*, and he is one of the original editors of *Brain*. He has published "Unsoundness of Mind in Relation to Criminal Acts" (Sugden Prize), 1857; "The Manual of Psychological Medicine" (last half), 1858; "The Psychology of Shakespeare," 1859; "The Medical Knowledge of Shakespeare," 1860; "Notes on American Asylums," 1876; "Habitual Drunkenness and Insane Drunkards," 1878; "Care of the Insane and their Legal Control," 1880, and also numerous pamphlets, lectures, and articles, in journals, on insanity and allied subjects. In 1852 Dr. Bucknill, through the influence of the late Earl Fortescue, obtained the permission of the Government that the 1st Devon and Exeter Volunteer Rifles should be embodied, and he was the first recruit of this the primary regiment of the then new volunteer movement.

BUFFET, Louis Joseph, a French politician, born at Mirecourt (Vosges), Oct. 26, 1818, practised as an advocate before the Revolution of 1848, when, being returned as a representative of the people by the department of the Vosges, he voted as a rule with the old dynastic Left, which became the Right of the Constituent Assembly. He accepted the republican constitution, and declared that General Cavaignac had deserved well of his country. After the election of Dec. 10, he gave in his adhesion to the Government of Louis Napoleon, who entrusted him with the portfolio of commerce and agriculture after the dismissal of M. Bixio. Both as minister and as representative he supported the party of order, but he refused to follow completely the policy of the Élysée, and accordingly he quitted the ministry with the late M. Odilon Barrot, Dec. 31, 1849. After the crisis which followed the dismissal of General Changarnier, he returned to office with M. Léon Foucher, April 10, 1851, and in that parliamentary cabinet he represented the ideas of the majority. He

resigned with his colleagues Oct. 14, 1851, when the President declared in favour of the withdrawal of the law of May 31. After the *coup d'état* of Dec. 2, 1851, M. Buffet declined to accept any public appointment for several years. In 1863, however, he came forward as an opposition candidate in the first circumscription of the Vosges, and was elected. M. Buffet quickly became one of the most prominent members of the Corps Législatif, where he was one of the leaders of a "Tiers Parti," which endeavoured to reconcile Liberal reforms with loyalty to the dynasty. He was re-elected for his department in May, 1869, and in the short session which began in the following month, he greatly contributed to the victory of the Liberal centre, and was one of the promoters of the famous demand of interpellation, signed by 116 deputies, which elicited the message and the project of the *senatus consulte*, containing the promise of a return to parliamentary government. After the prolonged negotiations in connection with which his name was so constantly mentioned respecting the formation of the first parliamentary ministry, M. Buffet became a member, as Finance Minister, of the cabinet formed by M. Emile Ollivier, on Jan. 2, 1870. His financial policy gave general satisfaction; but when M. Ollivier consented to the *plebiscite*, M. Buffet deemed it his duty to resign at the same time as his colleague, M. Daru (April 10). After the disaster of Sedan, and the revolution of Sept. 4, he retired for a short time into private life. However, at the elections of Feb. 8, 1871, he was returned by his department—again at the head of the poll—to the National Assembly. M. Thiers offered him the portfolio of Finance, but he declined it, for fear of the susceptibilities which might be wounded on account of his having held office under the Empire. On April 4, 1873, he was elected President of the National Assembly in the place of M. Grévy, resigned; and he was re-elected to that office May 13, 1874. He was again elected, and for the last time, to the same office, March 1, 1875, although at that date he was officially engaged in the formation of a new cabinet to replace the Chabaud-Latour Ministry. On March 10, 1875, M. Buffet was appointed Vice-President of the Council, and Minister of the Interior. While holding this office he made himself extremely obnoxious to the Republican party. At the elections of Jan. 1876, he did not succeed in obtaining a seat in the Assembly, his candidature failing at Mirecourt, Bourges, Castelsarrasin, and Commercy. He therefore resigned the

Vice-Presidency of the Council of Ministers. On June 16, 1876, the Senate elected him a Life Senator by 144 votes against 142.

BULLER, Major-General Sir Redvers Henry, F.C., K.C.B., K.C.M.G., is the son of the late James Wentworth Buller, M.P., of Downes, Crediton, Devonshire, and was born in 1839. He entered the 30th Rifles, May 23, 1858; lieutenant, Dec. 9, 1862; captain, May 28, 1870; major, April 1, 1874; lieutenant-colonel, Nov. 11, 1878; colonel, Sept. 27, 1879; major-general, May 21, 1884. He served with the 2nd Battalion, 60th Rifles, throughout the campaign of 1860 in China (medal with two clasps); with the 1st Battalion on the Red River expedition of 1870; accompanied Sir Garnet Wolseley to the Gold Coast in Sept., 1873; and served as D.A. Adjutant and Quartermaster-General and Head of the Intelligence Department throughout the Ashantee war of 1873-74, including the action of Essaman, battle of Amoafu, advanced guard engagement at Jarbinbah, battle of Ordahai (slightly wounded), and capture of Coomassie (several times mentioned in despatches, brevet of Major, C.B., medal with clasp). He served in the Kafir war of 1878-79, and commanded the Frontier Light Horse in the engagement of Taba ka Udoda, and in the operations at Molyneux Path and against Manyanyoba's stronghold (several times mentioned in despatches); also throughout the Zulu war of 1879, and commanded the cavalry in the engagements at Zeobane Mountain and Kam-bula; conducted the reconnaissance before Ulundi, and was present in the engagement at Ulundi (several times mentioned in despatches, thanked in General Orders, brevet of Lieut.-Colonel, Aide-de-camp to the Queen, Victoria Cross, C.M.G., medal with clasp). The F.C. was given "for his gallant conduct at the retreat at Inhloland, on March 28, 1879, in having assisted, while hotly pursued by Zulus, in rescuing Captain C. D'Arcy, of the Frontier Light Horse, who was retiring on foot; Colonel Buller carrying him on his horse until he overtook the rearguard. Also for having on the same day, and in the same circumstances, conveyed to a place of safety Lieutenant C. Everitt, of the Frontier Light Horse, whose horse had been killed under him. Later on, Colonel Buller, in the same manner, saved a trooper of the Frontier Light Horse, whose horse was completely exhausted, and who otherwise would have been killed by the Zulus, which were within

eighty yards of him." Colonel Buller served in the Boer war of 1881 as Chief of the Staff to Sir Evelyn Wood, with the local rank of Major-General; in the Egyptian war of 1882 in charge of the Intelligence Department, and was present in the action at Kassassin, Sept. 9, and at the battle of Tel-el-Kebir (mentioned in despatches, K.C.M.G., medal with clasp, 3rd Class of the Osmanieh, and Khedive's Star); served in the Soudan Expedition under Sir Gerald Graham, in 1884, in command of the 1st Infantry Brigade, and as second in command of the expedition, and was present in the engagement at El Teb and Temai (twice mentioned in despatches, promoted to Major-General for distinguished service in the field, medal and two clasps); served in the Soudan campaign in 1884-85, as Chief of the Staff to Lord Wolseley. When Sir Herbert Stewart was wounded, and Colonel Burnaby had been killed, he took command of the Desert Column, and withdrew it from Gubat to Gakdul in the face of the enemy, defeating them at Abu Klea Wells on Feb. 16 and 17 (mentioned in despatches, K.C.B., medal and clasp).

BULLER, Sir Walter Lawry, K.C.M.G., F.R.S., the descendant of an ancient Cornish family and the oldest surviving son of the late Rev. James Buller, was born at Newark in the Bay of Islands, New Zealand, on Oct. 9, 1838. He received his early education at Auckland College, and afterwards became a pupil of William Swainson, F.R.S., the celebrated zoologist, who had settled in that colony. For a continuous period of fifteen years he held various official appointments, but chiefly in connection with native affairs, as he had early acquired a thorough knowledge of the Maori language, and on eight different occasions he received the special thanks of the Colonial Government. During this time he also contributed largely to zoological literature, and was elected a Fellow of the Linnean and of various other learned societies. From 1855 to 1860 he acted as Government Interpreter and Native Commissioner. In 1861 he was appointed editor-in-chief of the "*The Maori Messenger*," an English and Maori Journal published by authority. At the age of 24 he was appointed a Resident Magistrate, and three years later a Judge of the Native Land Court. In 1865 he served as a Volunteer on Sir George Grey's staff at the taking of the Werdroa Pa, for which he received the New Zealand War Medal. On that occasion, declining the protection of a military escort, he

carried the Governor's despatches, at night, through forty miles of the enemy's country, attended only by a Maori orderly; for which gallant service he was mentioned in despatches. In 1871 he visited England, and two years later published a splendidly illustrated "History of the Birds of New Zealand." The Royal University of Tübingen bestowed upon him the honorary degree of Doctor of Science, and he received several other foreign distinctions. In 1874 he was called to the Bar at the Inner Temple. In 1875 Her Majesty, in recognition of the value of his scientific work, created him a C.M.G.; and in 1876 he was elected F.R.S. In 1882 he published a "Manual of the Birds of New Zealand" for the use of students; and in 1883 was awarded the Gold Medal of the New Zealand Exhibition, "for Science and Literature." From 1875 to 1885, inclusive, he practised his profession in the Colony with remarkable success. In 1886 he returned to England, as New Zealand Commissioner at the Colonial and Indian Exhibition; and for his services on that occasion was promoted by her Majesty to the rank of K.C.M.G. In 1887 he was awarded the Galileian Medal by the Royal University of Florence; and in 1888 he published a new and much enlarged edition of "The Birds of New Zealand" (Imperial Quarto). Besides enjoying the dignity of a British Order, Sir Walter Buller holds the rank of "Officier" in the Legion of Honour. He is also "Officier de l'Instruction Publique" (Gold Palm of the Academy), Knight first class of the Order of Francis Joseph, of Austria, Knight first class of the Order of Frederick of Württemberg, and Knight first class of the Order of Merit of Hesse-Darmstadt.

BULLOCK, The Rev. Charles, B.D., was born in 1829. He was ordained to the Parish of Rotherham, and became Rector of St. Nicholas, Worcester, in 1860. Resigning this post in 1874, he devoted himself to popular literature; and in recognition of his services in this direction the Archbishop of Canterbury conferred on him the degree of B.D. The magazines edited by him are *The Fireside* (first published in 1864), *Home Words*, which in its localized form is known throughout the country, and *The Day of Days*, for Sunday Reading. In 1876 he founded *Hand and Heart*, as a penny illustrated Church of England Social and Temperance Journal. More recently he has established "*The News: a National Journal and Review.*" Mr. Bullock has written a large number of Religious books. He is also the founder of

the "Robin Dinner" movement supported by the readers of his publications. More than 40,000 human "Robins" in London alone are thus every Christmas "made happy for an evening."

BÜLOW, Hans von, was born at Dresden, Jan. 8, 1830. He began his musical education under Frederick Wieck, the father of Madame Schumann. In 1848 he was sent to the University of Leipzig to study jurisprudence, his parents having always regarded music as a mere pastime, but he continued his studies in counterpoint under Hauptmann. In the following year he entered the University of Berlin, and took great interest in the political movements of the time, contributing to a democratic journal *Die Abend-post*. In this paper he first began to defend the musical doctrines of the new German school, led by Liszt and Wagner. After hearing a performance of "Lohengrin" at Weimar in 1850, he threw aside his law studies, went to Zürich, and placed himself under the guidance of Wagner. In June, 1851, he became a pupil of Liszt, and two years later made his first concert tour. From 1855 to 1864 he occupied the post of principal Master of pianoforte-playing at the conservatorium of Professors Stern and A. B. Marx, at Berlin. In 1864 he was called to Munich as principal conductor at the the Royal Opera, and director of the Conservatorium. He there organised performances of Wagner's "Tristan und Isolde" and "Die Meistersinger von Nürnberg." In 1869 he left Munich and has since given concerts in Italy, Germany, Russia, Poland, England, and America. In Jan., 1878, he was appointed Königlich Hofkapellmeister at Hanover. Among his most important compositions are "Nirwana, Symphonisches Stimmungsbild;" music to Shakespeare's "Julius Cæsar;" "Des Sängers Fluch;" "Vier Charakterstücke für Orchester;" "Il Carnovale di Milano." In June, 1888, he gave a series of Beethoven Recitals at St. James's Hall, London.

BULWER, Sir Henry Ernest Gascoigne, G.C.M.G., was born in 1836, and educated at Trinity College, Cambridge. After serving as private secretary to the Lieutenant-Governor of Prince Edward's Island, he became, in 1860, an official resident of the Ionian Islands; in 1866, Receiver-General and Treasurer of Trinidad; in 1867, Administrator of Dominica; and from 1871 to 1875, Governor of Labuan, and Consul-General at Borneo. He was then appointed Lieutenant-Governor of Natal, which post he held until 1880. In 1882

he was appointed Governor of Natal; in 1883 he was made G.C.M.G.; and, in 1885, Lord High Commissioner of Cyprus.

BUNSEN, Professor Robert Wilhelm Eberhard, M.D., chemist, born March 13, 1811, at Göttingen, where his father was professor of Occidental literature; studied in the university the physical and natural sciences, and completed his education at Paris, Berlin, and Vienna. Having at Göttingen in 1833 taken his degrees for teaching chemistry he succeeded Wohler three years later as Professor of this science in the Polytechnic Institution at Cassel. In 1838 he was appointed Assistant Professor in the University of Marburg; became Titular Professor in 1841, then Director of the Chemical Institute. In 1851 he passed to the University of Breslau, and in 1852 to the University of Heidelberg. Some years ago Professor Bunsen declined a call to Berlin which he received at the same time as Professor Kirchhoff, with whom he is the founder of stellar chemistry. He has made many important discoveries, and the charcoal pile which bears his name is in very extensive use. From the spectrum analysis down to the simplest manipulations of practical chemistry, his numerous discoveries have rendered the most distinguished services to science. The University of Leyden conferred on him the honorary degree of M.D. in Feb. 1875. In July, 1877, the University of Heidelberg commemorated the 25th anniversary of Professor Bunsen's election to the Chair of Experimental Chemistry. In Jan. 1883, he was appointed one of the eight Foreign Associates of the Paris Academy of Sciences.

BURBURY, Samuel Hawksley, F.R.S., born at Kenilworth on May 18, 1831, was educated at Kensington Grammar School, and afterwards at Shrewsbury School, and at St. John's College, Cambridge, where he was Craven University Scholar in 1853; fifteenth Wrangler and second in the Classical Tripos and second Chancellor's Medallist, 1854; M.A. 1857. He was called to the Bar in 1858, and elected a Fellow of the Royal Society in 1890. He is joint author (with Rev. H. W. Watson) of "The application of generalised co-ordinates to the dynamics of a material system," 1879; "The mathematical theory of electricity and magnetism," 1885 and 1889; author of a paper "On the second law of thermodynamics in connexion with the Kinetic theory of gases," *Philosophical Magazine*, 1876; "On a theorem in the dissipation of

Energy," *Philosophical Magazine*, 1882; and various other papers on mathematical and physical subjects in that magazine.

BURDETT, Henry Charles, compiler of "Burdett's Official (Stock Exchange) Intelligence," &c., is the son of the late Rev. Halford R. Burdett of Northampton, and grandson of the Rev. D. J. Burdett, rector of Gilmorton, Leicestershire, a living which had been in the Burdett family almost uninterruptedly since the time of Queen Elizabeth. Mr. Burdett was born in 1846, and began his active career in the Midland Bank, Birmingham. In 1868 he was appointed secretary to the Queen's Hospital, Birmingham, and in a very short time succeeded in uniting the two rival medical colleges of that town under one management, thus constituting the present strong and useful medical school of the Midlands. He was for a time secretary to the Society for exempting Charities from rating; and was also the first to organise the system of training nurses according to modern ideas and methods, insisting specially upon the employment of young women only. The latter idea was much criticised at the time, and many evils were predicted of its future working. As all the world knows, however, its success has been great beyond the most sanguine expectations. In 1873 Mr. Burdett became a medical student and, at Birmingham and Guy's Hospital, London, went through the whole curriculum necessary for medical examination and practice. A year later, he was appointed House Governor of the Dreadnought, Seaman's Hospital, Greenwich, and in six years raised the income of that institution from £7,000 to £13,000 a-year. In 1877 he established the well-known paying hospital for the middle and upper classes at Fitzroy House, Fitzroy Square, having succeeded in raising no less a sum than £26,000 for that purpose. Perhaps the most permanently valuable, as it is certainly the most interesting of Mr. Burdett's public services was the founding, in 1888, of the National Pension Fund for trained nurses and hospital officials. Among those who have helped in the establishment of the Fund, and without whose munificent aid indeed it would have been impossible for Mr. Burdett to realise his benevolent ideal, may be mentioned Lord Rothschild, Mr. J. S. Morgan, Mr. H. Hambro and Mr. Huchs Gibbs, each of whom gave £5,000 to form a bonus fund for the increase of pensions. Several other gentlemen contributed varying sums, and the Fund started with nearly £30,000 in hand. The Princess of Wales

occupies the position of President and the Prince of Wales that of Patron to the Fund. In every department of Hospital administration and finance, Mr. Burdett is admittedly the chief authority in the whole of the British Empire.

BURDETT-COUTTS, Angela Georgina, Baroness, is the youngest daughter of the late Sir Francis Burdett, Baronet, and grand-daughter of Mr. Thomas Coutts, the banker. In 1837 she succeeded to the great wealth of Mr. Coutts, through his widow, once the fascinating Miss Mellon, who died Duchess of St. Albans. The extensive power of benefiting her less fortunate fellow-creatures thus conferred, the Baroness Burdett-Coutts has wisely exercised, chiefly by working out her own well-considered projects. A consistently liberal churchwoman in purse and opinions, her munificence to the Establishment is historical. Besides contributing large sums towards building new churches and new schools in various poor districts throughout the country, Miss Coutts erected and endowed, at her sole cost, the handsome church of St. Stephen's, Westminster, with its three schools and parsonage; and more recently, another church at Carlisle. She endowed, at an outlay of £50,000, the three colonial bishoprics of Adelaide, Cape Town, and British Columbia; besides founding an establishment in South Australia for the improvement of the aborigines. She also supplied the funds for Sir Henry James's Topographical Survey of Jerusalem; and offered to restore the ancient aqueducts of Solomon to supply that city with water—a work, however, which the Government did not fulfil. In no direction are the Baroness's sympathies so fully expressed as in favour of the poor and unfortunate of her own sex. Her exertions in the cause of reformation, as well as in that of education, have been numerous and successful. For young women who had lapsed out of well-doing, she provided a shelter and a means of reform, in a "Home" at Shepherd's Bush. Nearly half the cases which passed through her reformatory during the seven years it existed, resulted in new and prosperous lives in the colonies. Again, when Spitalfields became a mass of destitution, Miss Coutts began a sewing-school there for adult women, not only to be taught, but to be fed and provided with work; for which object Government contracts are undertaken and successfully executed. Nurses are sent daily from this unpretending charity in Brown's Lane, Spitalfields, amongst the

sick, who are provided with medical comforts; while outfits are distributed to poor servants, and clothing to deserving women. In 1859 hundreds of destitute boys were fitted out for the Royal Navy, or placed in various industrial homes. In the terrible winter of 1861 the frozen-out tanners of Bermondsey were aided, and at the same time she suggested the formation of the East London Weavers' Aid Association, by whose assistance many of the sufferers from decaying trade were able to remove to Queensland. One of the black spots of London in that neighbourhood, once known to, and dreaded by, the police as Nova Scotia Gardens, was bought by Miss Coutts, and, upon that area of squalor and refuse, she erected the model dwellings called Columbia Square, consisting of separate tenements let at low weekly rentals to about two hundred families. Close to it is Columbia Market, one of the handsomest architectural ornaments of North-Eastern London. The Baroness takes great interest in judicious emigration. When a sharp cry of distress arose some years ago in the town of Girvan, in Scotland, she advanced a large sum to enable the starving families to seek better fortune in Australia. Again, the people of Cape Clear, Shirkin, close to Skibbereen, in Ireland, when dying of starvation, were relieved from the same source, by emigration, and by the establishment of a store of food and clothing, by efficient tackle, and by a vessel to help them in their chief means of livelihood—fishing. Miss Coutts materially assisted Sir James Brooke in improving the condition of the Dyaks of Sarawak, and a model farm is still entirely supported by her, from which the natives have learnt such valuable lessons in agriculture that the productiveness of their country has been materially improved. Taking a warm interest in the reverent preservation and ornamental improvement of our town church-yards, and having, as the possessor of the great tithes of the living of Old St. Pancras, a special connection with that parish, the Baroness, in 1877, laid out the churchyard as a garden for the enjoyment of the surrounding poor, besides erecting a memorial sun-dial to its illustrious dead. In the same year, when accounts were reaching this country of the sufferings of the Turkish peasantry flying from their homes before the Russian invasion, Lady Burdett-Coutts instituted the Turkish Compassionate Fund, a charitable organization by means of which the sum of nearly £30,000, contributed in money and stores, was entrusted to the British Ambassador for distribution, and saved thousands from

starvation and death. In recognition of her important services, the Order of the Medjidieh was conferred upon her. This is but an imperfect enumeration of the Baroness's good works as a public benefactress. The amount of her private charities it is impossible to estimate. She is a liberal patroness of artists in every department of art. In June, 1871, Miss Coutts was surprised by the prime minister with the offer from Her Majesty of a peerage, which honour was accepted. Her ladyship was admitted to the freedom of the City of London, July 11, 1872, and to the freedom of the City of Edinburgh, Jan. 15, 1874. On Nov. 1, 1880, the Haberdashers' Company publicly conferred their freedom and livery on the Baroness Burdett-Coutts in recognition of her judicious and extensive benevolence and her munificent support of educational, charitable, and religious institutions and efforts throughout the country. She has since become a member of the Turners' Company, and was received with great enthusiasm during a recent visit to Ireland, where she had previously organised a fishing fleet, having its head-quarters in Bantry Bay. The Baroness has also taken a leading part in promoting and supporting the Children's Protection Society, of which she was at once asked to become President on the death of the late Lord Shaftesbury. The Baroness was married on Feb. 12, 1881, to Mr. William Lehman Ashmead-Bartlett, who obtained the royal licence to use the surname of Burdett-Coutts.

BURFORD-HANCOCK, Sir Henry James Burford, only son of the late Henry Hancock, Esq., some time President of the Royal College of Surgeons of England, by Rachel Ann, eldest daughter of the Rev. James Burford, D.D., was born in London, Nov. 20, 1839, and educated at Eton. He served in the 45th Regiment (Sherwood Foresters), and subsequently for some years in the Kent Militia Artillery; was called to the Bar, after examination, by the Hon. Society of the Inner Temple in Jan. 1866, after which he practised on the Home Circuit and Sussex Sessions and at the Parliamentary Bar. In 1866 he was presented with a medal by H.I.M. Napoleon III., for a treatise on the International Fishery Laws. In May, 1876, he received the appointment of District Judge in Jamaica, and during his tenure of this office he was employed in the re-organisation of the District Courts, for which he received the thanks of the Government and the offer of the new ap-

pointment of second Puisne Judge of the Supreme Court of Jamaica, which, however, he was permitted to decline. In June, 1878, he was appointed Attorney-General of the Leeward Islands, and in October of the same year Chancellor of the Diocese of Antigua. In March, 1880, he was confirmed in the office of Chief Justice of the Leeward Islands in which capacity he had been acting for eleven months conjointly with his office of Attorney-General. In October, 1881, he was ordered out from leave to administer the Government of the Colony and in 1882, received the honour of knighthood, and in the same year was appointed Chief Justice of Gibraltar, the office which he now fills. During his career he has several times received the thanks of H.M. Government, and he assisted in framing the Morocco Order in Council, 1889. He is the author of many scientific and legal articles in various magazines; and is a Knight of Grace of the Order of St. John of Jerusalem.

BURGESS, James, C.I.E., LL.D., Hon. Assoc. R.I.B.A., F.R.G.S., &c., was born in the parish of Kirkmahoe, Dumfriesshire, in 1832. He studied architecture for some time, but devoted special attention also to mathematics. In 1855 he went to Calcutta as a Professor of Mathematics, and in 1858 wrote a paper "On Hypsometrical Measurements," and published editions of some English textbooks for the Calcutta University Examinations in 1859, with philological notes, &c. Early in 1861 he removed to Bombay, and was engaged in educational work till 1873. There he contributed papers on the Tides, Hypsometry, &c., to the *Philosophical Magazine*, Transactions of the Bombay Geographical Society, &c. As Secretary to the Commission on the Colaba Observatory in 1865, he prepared the report for Government on that establishment. Early in 1869 he published a large folio on "The Temples of Shatrunjaya," illustrated by 45 photographic views. This was followed by a similar volume on the antiquities at Somnâth, Gîrnâr, and Junâgarh. In 1871, besides some educational class-books, appeared a monograph on "The Rock-Temples of Elephanta or Ghârapuri," illustrated; and in 1872 he started *The Indian Antiquary*, a monthly journal of Oriental archaeology, history, literature, and folklore, which he conducted for thirteen years, and which soon acquired a European reputation. He travelled through Gujarat and Rajputana in 1872, and wrote the letterpress for a large folio of views of the architecture and scenery of

these countries. The Bombay Government nominated him, in 1873, to organize and direct the Archaeological Survey of that presidency and the neighbouring states, Gujarat, &c.; and since 1874 the results of this survey have been partly published in six quarto volumes fully illustrated, in about a dozen occasional papers, 1874-85, and in a special volume on "The Cave-Temples of India," those in Northern and Eastern India being described by the late Mr. Jas. Fergusson. Other volumes richly illustrated are in preparation. The superintendence of the Archaeological Survey of the Madras Presidency was added to that of Western India, on its initiation in 1881, the results of which are published in "The Buddhist Stūpas of Amaravati and Jaggayapeta," with numerous plates and woodcuts, and other volumes are in preparation. In 1885 he was put in charge also of the surveys in the North, and appointed Director-General of the Archaeological Survey of India. In 1888 he edited and published "The Sharqi Architecture of Jaunpur," from the reports of Dr. A. Führer and Mr. E. W. Smith, the provincial surveyors, with 74 sheets of Architectural drawings. He also started and edits for Government *The Epigraphia Indica*, issued in fasciculi and containing important Sanskrit and Pali Inscriptions translated by the most competent Oriental scholars. He retired from the Directorship of the surveys in 1889, and the office was then abolished.

BURGESS, John Bagnold, R.A., was born Oct. 21, 1830, at Chelsea, and received his artistic education at the Royal Academy, of which he was elected an Associate June 18, 1877; and made R.A., 1889. Among his pictures are "Bravo Toro;" "The Presentation: English ladies visiting a Moor's house," 1874; "The Barber's Prodigy," 1875; "Felici-ana: a Spanish Gipsy," 1876; "Licensing the Beggars: Spain," 1877; "Childhood in Eastern Life," 1878; "Zulina," "The Student in Disgrace: a Scene in the University of Salamanca," and "The Convent Garden," 1879; "Zehra," and "The Professor and his Pupil," 1880; "The Genius of the Family," "Ethel," and "Guarding the Hostages," 1881; "The Letter Writer," and "Zara," 1882; "The Meal at the Fountain," and "Spanish Mendicant Students," 1883.

BURKE, Sir John Bernard, C.B., LL.D., Ulster King at Arms, second son of the late John, and grandson of the late Peter Burke, Esq., of Elm Hall, county Tipperary, born in London in 1815, was

educated at Caen, and called to the Bar at the Middle Temple in 1839. He edited (for many years in conjunction with his father, and since his death solely) the "Peerage" which bears his name. Sir Bernard is the author of "The Commoners of Great Britain and Ireland" (afterwards published under the title of "The Landed Gentry"), a "General Armory," "Visitation of Seats," "Family Romance," "Anecdotes of the Aristocracy," "The Historic Lands of England," "Vicissitudes of Families," and "Reminiscences, Ancestral and Anecdotal." He has written many other books on heraldic, historical, and antiquarian subjects. In 1853 he was appointed to succeed the late Sir William Betham as Ulster King of Arms, and Knight Attendant of the Order of St. Patrick; in 1854 he received the honour of knighthood; in 1862 the University of Dublin conferred upon him the honorary degree of LL.D.; in 1867 he was appointed Keeper of the State Papers of Ireland; and on Dec. 7, 1868, created a Companion of the Bath. He was appointed the successor of the late Lord Chief Baron Pigott as a Governor of the National Gallery of Ireland in Oct., 1874.

BURMEISTER, Karl Hermann Konrad, naturalist, was born at Stralsund, Prussia, Jan. 15, 1807. While a student of medicine at Halle, he was encouraged by Professor Nitzsch to study zoology, and particularly entomology. Becoming a doctor in 1829, he made his first appearance as an author in the domain of natural history, with a "Treatise on Natural History," published at Halle in 1830. On the death of Professor Nitzsch, in 1842, he succeeded him in the chair of zoology in the University of Halle. He has written numerous articles on zoological subjects in the scientific journals of Germany; several monographs in a distinct form, such as "The Natural History of the Calandrina Species," published in 1837, and a "Manual of Entomology." Professor Burmeister has occupied himself in disseminating correct notions of geology among the educated classes; and with this view delivered a series of lectures, which were collected and published in two works, "The History of Creation," 1843, and "Geological Pictures of the History of the Earth and its Inhabitants," 1851. During the revolutionary fervour of 1848, Professor Burmeister was sent by the City of Halle as Deputy to the National Assembly, and subsequently by the town of Leignitz to the first Prussian Chamber. He took his place on the Left, and remained until the end of the session,

when, on account of failing health, he was obliged to request leave of absence, which he turned to account by two years' travel in the Brazils, and he published "The Animals of the Brazils," 1854-56. On his return to Europe he resumed his post in the University of Halle, but in 1861 he resigned his chair and repaired to Buenos Ayres, where he became Director of the Museum of Natural History, organized scientifically by himself, and in 1870 Curator of the newly-established University of Cordova. He has since published "Sketches of Brazil," 1853; "A Journey through the La Plata States," 1861; and "The Physical Features of the Argentine Republic." As Director of the Museum of Natural History (which until 1884 belonged to the Province of Buenos Ayres, and since that date has been called the National Museum) he has published the annals of that establishment, in which are given full descriptions of the recent and fossil animals exhibited in the Museum. He has published also "Fossil Horses of the Pampas Formation," in two volumes, and has contributed to several scientific journals various articles on Zoology and Palæontology. In June, 1890, at the age of 83 years, he undertook a journey from Buenos Ayres to Italy and Greece for archaeological purposes.

BURNAND, Francis Cowley, born in 1837, and educated at Eton and Trinity College, Cambridge, where, in his first year, he founded the Club known as the A.D.C. or Amateur Dramatic Club. Mr. Burnand took his degree in 1857-58, and was called to the Bar in 1861. He is the author of about a hundred dramatic pieces, principally burlesques. His chief work for *Punch* was the now well-known serial "Happy Thoughts." His burlesque of Douglas Jerrold's nautical drama, "Black-eyed Susan," achieved what was in those days the unprecedented run of over 400 consecutive nights at the Royalty Theatre, Dean Street, Soho; and later his comedy "The Colonel" ran for about a year and a half at the Prince's Theatre in Tottenham Court Road, which has now disappeared. In 1879 he published "The 'A.D.C.'"; being Personal reminiscences of the University Amateur Dramatic Club, Cambridge; and in July, 1880, he became editor of *Punch* on the death of Mr. Tom Taylor.

BURNE-JONES, Edward, A.R.A., was born in Birmingham, Aug., 1833, and educated at King Edward's School in that town. He entered Exeter College, Oxford, 1853, but left before taking any

degree, in order to become an artist. He came to London for that purpose in the beginning of 1856, and entered no school of art, but drew much from life, and watched Rossetti at work in his studio when that was possible. He received the honorary degree of D.C.L. at Oxford in 1881, and an Honorary Fellowship given by Exeter College; was elected President of the Royal Birmingham Society of Artists, 1885; re-elected, 1886, and elected Associate of the Royal Academy of Arts, 1885. His principal oil paintings are a triptych of "Venus' Mirror," "Chant d'Amour," "Laus Veneris," "Feast of Peleus," "Merlin and Vivien," "The Tree of Forgiveness;" four pictures of "Pygmalion and the Image," "The Golden Stair," "The Annunciation," "The Mill," "The Hours," "The Wheel of Fortune," "Cophetua and the Beggar Maid," "The Resurrection," and (his first picture shown at the R.A.), "The Depths of the Sea," "The Garden of Pan," "The Tower of Brass," and the four pictures of the Sleeping Palace (1890) which were exhibited at Agnew's; these are oil pictures. His principal water-colours are "The Wine of Circe," "St. Dorothy," "Love Among the Ruins," "Temperantia," "Spes," "Fides," "Caritas," "The Days of Creation," "Dies Domini," "Spring," "Summer," "Autumn," "Winter," "Day," "Night." Mr. Burne-Jones has also designed for stained glass, his best-known work of this nature being the St. Cecilia window of Christ Church, Oxford. He has also lately designed a fine mosaic for the apse of the American Church at Rome. His pictures have been chiefly exhibited at the Grosvenor Gallery and New Gallery.

BURNETT, Mrs. Frances, née Hodgson, was born at Manchester Nov. 24, 1849. There she passed the first fifteen years of her life, acquired her education, and gained her knowledge of the Lancashire dialect and character. At the close of the American Civil War reverses of fortune led her parents to leave England for America, where they settled at Knoxville, Tennessee, 1865. She there began to write short stories for the magazines, the first of which appeared in 1867. In 1872 her dialect story, "Surly Tim's Trouble," was published in *Scribner's Monthly* (now *The Century*), and in book form in 1877. "That Lass o' Lowrie's" was first presented, serially, in *Scribner*, and its remarkable popularity demanded its immediate separate issue, 1877. In 1878-79 some of her earlier magazine stories were reprinted, viz., "Kathleen Mavourneen," "Lindsay's

Luck," "Miss Crespigny," "Pretty Polly Pemberton," "Theo," "Dolly" (also issued under title of "Vagabondia"), "Jarl's Daughter," and "Quiet Life." "Haworth's" appeared in 1879, and was followed by "Louisiana," 1880; "A Fair Barbarian," 1881; "Through One Administration," 1883; "Little Lord Fauntleroy," 1886; "Sara Crewe," 1888; "The Pretty Sister of José," 1889; and "Little Saint Elizabeth," 1890. Of these probably "Little Lord Fauntleroy" is the most widely-known, as both in its original form of a juvenile story and in the dramatized version it has been received with very great favour in England as well as in America. Its success led to the author's writing the play entitled "Nixie," which was produced at Terry's Theatre in April of the present year, 1890. Miss Hodgson was married in 1873 to Dr. Burnett, and she has since resided at Washington, D.C., when not abroad.

BURNS, Sir George, Bart., of Wemyss Bay, Renfrewshire, was born December 10, 1795; and married June 10, 1822, Jane (who died July 1, 1877), daughter of the late James Cleland, Esq., LL.D., of Glasgow. Sir George belongs to a family which has long occupied an honourable position in the West of Scotland. His grandfather distinguished himself as a scholar, compiled an English dictionary and wrote an English grammar which were long used in all the schools and academies throughout the country. He died at the age of eighty-four, and was buried in the Cathedral of Glasgow. His son, Dr. Burns, who was an only child, was born in 1744, and was minister of the Barony parish, in Glasgow, for the long period of seventy-two years, dying in 1839, in his ninety-sixth year. He preached in the crypt of the Cathedral, which Sir Walter Scott has made famous in the pages of "Rob Roy;" and, at a time when such qualities were rare in the Church of Scotland, he was distinguished for the evangelical faithfulness of his preaching, and for his conscientious and laborious performance of pastoral work. In the prosecution of his duties he established and conducted Sabbath schools in Calton, which was included in his parish. These, as far as is known, were the first Sunday schools instituted in Scotland, and it is believed were, before the time of Mr. Raikes, who began the system in England. This venerable patriarch lived to see the reward of his own training in the highly honourable and successful career of his family. He had nine children, of whom four died in early life. The remaining

five were—John, born in 1775; Allan, born in 1781; Elizabeth, born in 1786; James, born in 1788; and the youngest, George, the subject of this sketch, born in 1795. The eldest son—Dr. John Burns, F.R.S.—was the first Professor of Surgery in the University of Glasgow. He was a man of extensive erudition and devoted piety. He wrote several standard medical works, which secured for him the high honour of being elected a member of the Institute of France, and also several most excellent religious works, one of which, entitled "Christian Philosophy," is still popular. The second son—Allan—was the intimate friend of Sir Astley Cooper, Bart., the celebrated surgeon. He went to St. Petersburg, where he became physician to the Empress of Russia, from whom he received valuable presents and honourable distinctions. Returning to Glasgow, he lectured on anatomy, and prosecuted his profession with great success. He died at the early age of thirty-two, in consequence of a wound received while dissecting. But, short as was his career, he succeeded in acquiring a European reputation by his scientific writings. James (who subsequently acquired the estates of Kilmahew and Cumbernauld) and George, both of whom possessed much of the native talent of the family, found ample scope for their abilities in mercantile pursuits. About the year 1818 George and his brother James entered into partnership and commenced business in Glasgow as general merchants, and subsequently as ship-owners. While James applied himself to the mercantile branch of the business, the direction of the shipping department devolved upon George, whose energy and sagacity rendered him well qualified for the onerous duties, and under whose able management the business gradually developed into a steam shipping concern second to none in the world, the Fleet, from first to last, representing upwards of seven millions of money. Up to the year 1838 the Lords Commissioners of the Admiralty (who, at that time, were invested with the arrangement of postal contracts) had been content to commit Her Majesty's mails for America to the uncertain mercies of sailing vessels. For, although vessels propelled by steam power had crossed the Atlantic at irregular intervals, from various European ports, within the previous 18 years or so, it was only in this year, 1838, that the practicability of establishing regular steam communication with America was demonstrated beyond a doubt; and so impressed was the Government with the

obvious superiority of steam ships over sailing vessels as a faster and more trustworthy means of transit for postal matter, that they forthwith issued circulars broadcast, inviting tenders for the future conveyance of the American mails by steam vessels. One of these circulars found its way into the hands of Samuel Cunard, a prominent merchant of Halifax (Nova Scotia), agent there for the East Indian Company, a man of penetrating intelligence, great energy, and strong determination. Being unable to raise the necessary capital in Halifax, he proceeded without delay to London, in the hope of enlisting the sympathies and financial support of merchants there, but meeting with scant encouragement, he repaired to Glasgow, and having secured the valuable co-operation of George Burns and Robert Napier, Mr. Cunard found his chief difficulty was overcome, for within a few days—entirely through the instrumentality of Mr. George Burns—the requisite capital of £270,000 had been subscribed for, and he was enabled to tender to the Admiralty a very eligible offer for the conveyance of Her Majesty's mails once a fortnight between Liverpool and Halifax and Boston. Accordingly, a contract for a period of seven years was concluded between Her Majesty's Government and the newly-formed corporation, on whose behalf it was signed by Samuel Cunard, George Burns, and David Mac Iver, three names thenceforth indissolubly connected with the success of the famous concern now known as the Cunard Line. The story of the subsequent progress of the Cunard Company might almost be said to be a matter of national history, so well known are the various transitions from "Britannias" to "Persians," "Scotias," and "Russias," to the "Umbria" and "Etruria." With respect to the ownership of the Company: the original shareholders were by degrees bought out by the founders, until the whole concern became vested exclusively in the three families of Cunard, Burns, and Mac Iver. Sir George Burns married, in 1822, the eldest daughter of the late Dr. Cleland of Glasgow, a man who may be said to have been the father of social and vital statistics in this country; for at the time he published his works, "Annals of Glasgow," and "Statistical Tables," we believe that Sweden was the only country that laid claim to the possession of regular statistics. Dr. Cleland was a member of the Institute of France, and other scientific bodies. By his wife, Sir George Burns had seven children, of

whom there survive only two sons, John Burns, and James Cleland Burns, both being connected with the Cunard Company as Directors. Sir George Burns was created a Baronet of the United Kingdom, in May, 1889; and the Editor regrets to state that, while these pages were passing through the press, Sir George Burns died, June 2, 1890, in his 95th year. He is succeeded in the title and estate of Wemyss Bay by his eldest son, Sir John Burns, of Castle Wemyss.

BURNSIDE, Sir Bruce Lockhart, Kt., was born on July 26, 1833, at Bahamas, and was educated at King's College there and privately. He was called to the Bar by Lincoln's Inn, in 1856; and during the war which shortly afterwards broke out between the North and the South in America he was conspicuous for the active part which he took as legal adviser, to what was called the Confederacy, in the many delicate questions of international law which were at that time raised in consequence of the blockade of the Southern ports, and of the fitting out of armed cruisers by the Confederate government. He successfully defended the "Alexandra," the "Orelo" and the "Florida," prosecuted in the B. A. Court for breaches of the Foreign Enlistment Act. He was Speaker of the House, Solicitor, and Attorney-General of the Bahamas, and was made one of Her Majesty's Council. He prepared a valuable "Manual for Justices of the Peace," for which he received the thanks of the Colonial Government. In 1879 he was appointed Queen's Advocate of Ceylon, and was employed at Downing Street for a considerable time in preparing a "Penal Code," and a "Criminal Procedure Code," which were afterwards passed by the Legislature and for which he was specially commended by Lord Derby, the Secretary of State. In 1883 he was appointed Chief Justice of Ceylon, there being at the time most scandalous arrears in the Supreme Court, which had attracted public attention and condemnation. Sir Bruce was knighted in 1885. As Chief Justice of Ceylon he set himself immediately to the Augean task before him, and happily has succeeded in restoring a more creditable state of things in the courts of Ceylon. Sir Bruce is about to retire.

BURROWS, Montagu, R.N., M.A., F.S.A., third son of Lieut.-General Montagu Burrows, was born at Hadley, Middlesex, Oct. 27, 1819, and educated at the Royal Naval College, Portsmouth, where he obtained the "First Medal" in 1834.

He served continuously in the Royal Navy till he obtained the rank of Commander in 1852, and became a retired Captain in 1867. He matriculated at Oxford University early in 1853, and obtained a Double First Class; took the degree of M.A. there, and received an Hon. M.A. degree at Cambridge, in 1859; was elected to the Chichele Professorship of Modern History in 1862; became a Fellow of All Souls in 1870; Chairman of the Oxford School Board in 1873; and member of the Hebdomadal Council of his University in 1876. During his service in the navy he was employed on the Coast of Africa for many years in the suppression of the slave-trade; and was engaged in several actions with Malay pirates, under Captain Chads, and he received medals from the English and Turkish Governments for the capture of St. Jean d'Acre in 1840. He was made Commander for his services on the staff of H.M.S. *Barclent*. He is the author of "Pass and Class: an Oxford Guide-Book through the courses of Literæ Humaniores, Mathematics, Natural Science, Law, and Modern History," 3rd edit., 1866; "Constitutional Progress, a series of Lectures delivered before the University of Oxford," 1869; "A Memoir of Admiral Sir H. Chads, G.C.B.," 1869; "Worthies of All Souls: Four Centuries of English History illustrated from the College Archives," 1874; "Parliament and the Church of England," 1875; "Imperial England," 1880; "Oxford during the Commonwealth" (Camden Society), 1881; "Wiclif's Place in History," 1882; "Life of Admiral Lord Hawke," 1883; "History of the Brocas Family of Beaufort and Roche Court," 1886; "History of the Cinque Ports," 1888; "Memoir of Mr. Grocyu" (in "Collectanea," Vol. II., of the Oxford Historical Society), 1890. He married, in 1819, Mary Anna, daughter of Sir James W. S. Gardiner, Bart., of Roche Court, Hants.

BURT, Thomas, M.P., was born Nov. 12, 1837, at Merton Row, near Percy Main, Northumberland, and is the son of Peter Burt, a coal-miner. While he was yet a child, seventeen months old, his parents went to Whitley, whence they had to remove about a year afterwards, when the pit was thrown out of gear by an explosion. Their next place of abode was New Row, Seghill, now styled Blake Town, where they remained five years, and at a later period they settled at the Beaton Delaval colliery. Young Burt, who had been working in the coal pits from ten years of age, here began that course of self-culture which has gone so

far to supply the deficiencies of his previous education. In 1860 he removed to Choppington, and in 1865 he was appointed Secretary to the Northumberland Miners' Mutual Association. In this capacity he rendered himself so popular among the miners that it was determined to nominate him as the working class candidate for the representation of Morpeth at the general election of Feb. 1871. He was returned by 3332 votes against 585 given for Captain Duncan, the Conservative candidate. The Northumberland miners voluntarily tax themselves to the extent of £400 a year, in order to supply him with the means of supporting the honour of a seat in the House of Commons. In June, 1880, he was elected a member of the Reform Club by the Political Committee, under the rule empowering the body to elect two candidates in each year for marked and obvious services to the Liberal cause. He is President of the Miners' National Union, and has presided over several important conferences of miners held at Manchester, Birmingham, and elsewhere. Mr. Burt has been a member of several Royal Commissions, including those inquiring into accidents in mines, loss of life at sea, and mining royalties. He was one of the British delegates to the international Labour Conference held at Berlin in March, 1890. In 1860 he married Mary, daughter of Thomas Weatherburn.

BURT, T. Seymour, F.R.S., M.R.A.S., &c. is the fourth son of the late Rev. Charles Henry Burt, and was student of Wadham College, Oxford; then Curate of Plympton St. Mary, Devon; next of Westgate House, Bridgwater, Somerset, and for upwards of twenty years Vicar of Cannington, in the same county; a chaplain-in-ordinary to H.R.H. the Duke of Sussex; an acting magistrate for Somerset; a retired chaplain to the 24th Light Dragoons. He is a Fellow of the Royal Society, and a Member of the Royal Astronomical Society; and has published the following works: "Papers on Scientific Subjects," vols. 1, 2, 3, 1837 and 1858; "Trip in search of Ancient Inscriptions," 1838; "Metrical Epitome of the History of England," 1852; "Poems by Koi Hai," 1853; "Account of a Voyage to India, via the Mediterranean," 1837; "A Translation into Blank Verse of all Virgil's Works," vols. 1, 2, 3, &c. 1883-4; "Transposition into Blank Verse of Wesley's translation of T. à Kempis," 1883-4; "Transposition into Blank Verse of Hamilton's translation of Sacred History," 1883-4; "Transposition into

Blank Verse of the Rev. Newman Hall's 'Come to Jesus,' 1833-4. He is likewise the author of numerous papers published in the journal of the Asiatic Society of Bengal,—“Description of the Mode of Extracting Salt from the damp sandbeds of the River Jumna as practised by the Inhabitants of Bundelkhund;” “Inscription found near Bhabra, three marches from Jeypore on the road from Delhi to Nusseerabad;” “Description of an Instrument for trisecting angles;” “Notice of an Inscription on a Slab discovered in February, 1838;” “Inscription taken from a Baolee at Bussuntgurb, at the foot of the Southern range of hills running parallel to Mount Aboo;” “Observations on a second Inscription taken in facsimile from the neighbourhood of Mount Aboo;” “Description with Drawings of the ancient stone pillar at Allahabad called Bhim Sen's Gadá or Club, with accompanying copies of four inscriptions engraven in different characters upon its surface.”

BURTON, Sir Frederic William, R.H.A., F.S.A., Hon. LL.D. Dublin, Director of the National Gallery, third son of Samuel Burton, of Mungret, co. Limerick, and grandson of Edward William Burton, of Clifden house, co. Clare, was born in Ireland in 1816 and educated at Dublin, where he first studied drawing under the brothers Brocas. He was elected Associate of the Royal Hibernian Academy of Arts in 1837, and R. H. Academician in 1839, in which latter year his picture (in water colours), “The Blind Girl at the Holy Well,” was chosen for publication by the Irish Art Union, and was engraved by Ryall. In the following year the picture of “The Aran Fisherman's Drowned Child,” also was engraved for the Irish Art Union. A large composition of the same year, “The Connaught Toilet,” representing peasant girls at a stream, preparing themselves to enter the market town, was, together with the former, exhibited at the Royal Academy in London in 1842. The latter picture was afterwards destroyed by fire at the Pantechnicon, where it had been temporarily deposited by its owner. From 1832 to 1851 his time was occupied in portrait painting. About 1840 he was elected member of the Royal Irish Academy of Science, Antiquities, and Belles Lettres, and for many years sat in the Council of Antiquities. In 1851 he went to Munich. There, at Nuremberg, and in various wanderings in upper Franconia, where he found ample subjects for the pencil, about seven years were passed. In 1855 he became

Associate, and in the following year full member of the (now Royal) Society of Painters in Water Colours, and continued to exhibit annually at their rooms until 1870, when he retired from the Society. In Nov. 1886 he was elected an Honorary Member. He exhibited also on various occasions at the Royal Academy and the Dudley Gallery. In 1874, Sir William Boxall having resigned the Directorship of the National Gallery, Mr. Burton was nominated to that post, which he still continues to hold. He is primarily responsible for the large and very important additions to the collection which have been made during the past fifteen years, and which include Lionardo Da Vinci's “Virgin of the Rocks,” Raphael's “Ansidei Madonna,” Vandyck's “Equestrian Portrait of Charles I.” (the last two from Blenheim); and the various purchases from the Hamilton, Barker, and other famous sales. Since 1863 Sir F. W. Burton has been a Fellow of the Society of Antiquaries. In 1884 he received the honour of knighthood; and in 1889 the Hon. degree of LL.D. of Dublin.

BURY, (Viscount), The Right Hon. William Coutts Keppell, Lord Ashford, K.C.M.G., P.C., son of the Earl of Almarle, was born in 1832, and educated at Eton; entered the Scots Fusilier Guards in 1849; and was private secretary to Lord John Russell in 1850-51. He afterwards went to India as aide-de-camp to the late Lord FitzClarence, but returned home on sick leave, and retired from the army. In Dec., 1854, he was nominated Civil Secretary and Superintendent-General of Indian Affairs for the province of Canada; was first elected M.P. for Norwich, as a Liberal, in April, 1857, and was appointed Treasurer of the Royal Household on the return of Lord Palmerston to office in 1859; but, on taking office in 1859, his re-election was declared void. In Nov., 1860, he was elected for the Wick district of burghs, which he ceased to represent at the general election of 1865, when he was a defeated candidate for Dover. He is the author of “The Exodus of the Western Nations,” “A Report on the Condition of the Indians of British North America,” and other political and historical papers. He has taken an active part in promoting the Volunteer movement, is Lieutenant-Colonel of the Civil Service regiment of Volunteers, and was sworn a Privy Councillor in 1859. In 1868 he was elected M.P. for Berwick-on-Tweed, but he was defeated at the general election of Feb., 1874. He unsuccessfully contested

Stroud on Feb., 1875. He was summoned to the House of Peers in his father's barony of Ashford in 1876, and was appointed Under-Secretary of State for War in succession to Lord Cadogan in March, 1878. He held that office until the Conservatives went out of office in 1880, and was again appointed to the same post under Lord Salisbury's first administration, 1885. Lord Bury joined the Roman Catholic Church in 1879, and is married to a daughter of Sir Alan N. McNab, Bart.

BUSCH, Moritz, German author and journalist, was born Feb. 13, 1821, at Dresden, and educated at the University of Leipzig. On the completion of his theological and philosophical studies, he became a journalist, and was employed on the staff of various newspapers. In 1851 he went to America, and on his return in 1853 published an account of his travels. Subsequently he travelled for some years in the East, then took up journalism again, and finally in 1870 settled in Berlin, where he obtained an appointment at the Foreign Office. Since then he has been the inseparable companion of Prince Bismarck; he has published several works on the German people, but he will always be best remembered by his account of the life of the great statesman, which appeared in 1880, and met with great success. This was followed by a second instalment, which was translated into English under the title of "Our Chancellor."

BUSH, The Rev. Joseph, the President of the Wesleyan Conference, 1890, was born March 8, 1826, in the quiet village of Ashby, two miles east of Spilsby, in the county of Lincoln. Both his parents were members of the Methodist Society, and took a deep interest in all good work. His father was for many years an active and devoted local preacher; his mother was noted for her knowledge of the Scriptures; and at the time of her death, in 1879, she had been a member of the Wesleyan Society over seventy years. His education was received at Spilsby; first at what was known as the Academy, and afterwards at the Grammar School, which was at that time conducted by the Rev. Isaac Russell, M.A. In Nov., 1840, he was apprenticed at Horncastle with Mr. Mark Holdsworth. In March, 1849, on the nomination of the Rev. Joseph Fowler, he was recommended for the work of the ministry by the City-road Quarterly Meeting. After passing the May District Meeting and the July Committee, he was accepted by the conference for the Home Work,

and his name was placed on the List of Reserve. In Feb. 1850, he was sent by the President, the Rev. Thomas Jackson, to the Maidstone Circuit as supply for the Rev. George Hambly Rowe, who died a few days after Mr. Bush's arrival in the circuit. He remained at Marden until the end of August, when he was received into Richmond College. At the Conference of 1853, Mr. Bush was appointed as Mr. Rattenbury's assistant in Leeds. In 1854, he went to London (Hinde Street); in 1857, to Islington; in 1860, to York; in 1863, to Bolton; in 1866, to Manchester; in 1869, to Brixton-hill; in 1872, to Newcastle-on-Tyne; in 1875, to Edinburgh; in 1878, to Bradford; in 1881, to Altrincham; and in 1884, to Highbury. At the last Conference he was appointed the General Superintendent of the North-west Essex Mission. In 1871 Mr. Bush was appointed one of the Conference official Letter-writers, and held the office fifteen years—until, in 1886, he was associated with the Secretary of the Conference in the compiling and editing of the "Minutes." In 1872 he was elected Chairman of the Newcastle District, and has since been Chairman of the Edinburgh and Aberdeen, and the Halifax and Bradford Districts, and this is his fourth year in the Chair of the First London District. In 1873, on the nomination of Dr. Gervase Smith, he was elected into the Legal Hundred, having then served twenty-one years in the ministry. From time to time Mr. Bush has used his pen in the service of Methodism, and what he writes is read not by Methodists only, but by an increasing circle of thoughtful Christians outside of his own Church. He has published the following: "The Sabbath: Whose Day is it?" "Bread from Heaven;" "The Class Meeting;" "Courtship and Marriage;" "Mary Bell Hodgson: a Memorial;" "Character; and other Sermons;" "Methodist Sunday Schools;" "What to Preach, and How;" "How to Keep our Members; Practical Counsels addressed to Class Leaders;" "The Intermediate State; or the Condition of Human Souls between the Hour of Death and the Day of Judgment." In addition, Mr. Bush has written on various subjects for the monthly periodicals and the *London Quarterly*. He has also edited "The Mission of the Spirit;" "The Pillar and Ground of the Truth;" and "The Life of the Rev. William O. Simpson." Four years ago, by direction of the Conference, Mr. Bush re-cast the "Liverpool Minutes," and also collected and classified all resolutions of the Conference on Pastoral Work

from 1811 to 1884; interweaving and embodying the whole in one homogeneous document. This pamphlet is the Methodist Manual of Pastoral Duty, and the Conference directed that it should be read in place of the "Liverpool Minutes" at the Ministers' Meeting of each circuit in September, and at each Annual District Committee in May.

BUSS, Frances Mary, is the daughter of the late Robert W. Buss, artist, and was born in London on Aug. 16th 1827. In 1850 she and her mother opened a school in Camden Street, which soon included 200 pupils. In 1870 the school was placed on a public foundation, a lower school was opened, and, upon a suggestion of the Endowed Schools Commissioners that a portion of the Platt Charity belonging to the Brewers' Company should be applied to the purposes of giving suitable buildings to the schools, the Company heartily concurred, and the scheme was signed by the Queen in council in May, 1875. The Clothworkers' Company so well-known for its interest in all matters of education, also obtained a scheme by which they were enabled to make a grant of upwards of £3,000 towards the building of a large hall for the upper school. Thus the North London Collegiate and Camden Schools as they now are came into existence, and the buildings were opened in 1879. The number of pupils in these schools is always nearly a thousand. The central work and interest of Miss Buss's life is the creation of these two schools, but she has been actively engaged in many educational movements, especially those referring to girls. Pupils from these schools have from the first taken advantage of the opening of university examinations to girls and women, and of the women's colleges at Cambridge. Miss Buss has also shared in the work of the College of Preceptors, and has been a member of the Council since 1868, and was elected a Fellow in 1873. She is one of the original members of the Council of the Teachers' Training and Registration Society and of the Training College for Women teachers at Cambridge opened in 1886. She is also on the Council of the Teachers' Guild as one of its earliest founders, and is President of the Association of Head Mistresses of Public Schools, the first conference of which was held at her house.

BUTCHER, Professor Samuel Henry, M.A., Hon. LL.D. is the eldest son of the late Samuel Butcher, Bishop of Meath, and of Mary, daughter of the

late John Leahy, Esq., of Southhill, Kilmarnock, was born in Dublin, April 16, 1850, and educated at Marlborough College, under Dr. Bradley, now Dean of Westminster. He was elected to a Minor Scholarship at Trinity College, Cambridge, in 1869; to a Foundation Scholarship in that college, and to the Bell University Scholarship, in 1870; to the Waddington University Scholarship, in 1871, and obtained the Powis Medal for Latin Hexameters, in 1871 and 1872. He was Senior Classic and Chancellor's Medallist in 1873, and held a Mastership at Eton College for a short time. He was elected to a Fellowship at Trinity College, Cambridge, in 1874, and held an Assistant Tutorship there till 1876. Having vacated his Fellowship at Cambridge by marriage he was elected to an Extraordinary Fellowship, without examination, at University College, Oxford, where he was Lecturer till 1882, when he was elected to the Chair of Greek at Edinburgh University, on the retirement of Professor Blackie. He published in 1879, in conjunction with Mr. Andrew Lang, a prose translation of the "Odyssey," now in its 6th edition; in 1881, a small volume on "Demosthenes," in Macmillan's classical series; in 1882, an Inaugural Address, delivered at Edinburgh, on "What we owe to Greece." On March 2, 1886, he was specially elected by the committee as a member of the Athenæum Club. In 1876 he married Rose Julia, youngest daughter of the late Archbishop Trench.

BUTE (Marquis of), The Most Honourable John Patrick Crichton Stuart, K.T., LL.D., is the son of the second marquis, and was born at Mount Stuart House, in the Isle of Bute, Sept. 12, 1847, succeeded to the title on the death of his father in 1848, and received his education at Harrow School, whence he proceeded to Christ Church, Oxford. He was admitted into the Roman Catholic Church by Monsignor Capel, in London, on Dec. 1, 1868. He was created a Knight of the Order of the Thistle in Feb. 1875. The honorary degree of LL.D. has been conferred upon him by the Universities of Glasgow and Edinburgh. He presented the Great Hall to the buildings of the former. Lord Bute has published "The Early Days of Sir William Wallace," a lecture delivered at Paisley in 1876; "The Burning of the Barns of Ayr," 1878; "The Roman Breviary, translated out of Latin into English," 1879; "The Coptic Morning Service for the Lord's Day, translated into English," and the "Altus of St. Columba," 1882, as well as different

articles, including a description of Patmos from a personal visit, of some Christian monuments of Athens, &c. His lordship married in 1872 the Hon. Gwendoline Mary Anne, eldest daughter of Lord Howard, of Glossop, and has issue, living, three sons and a daughter.

BUTLER, Benjamin Franklin, was born at Deerfield, New Hampshire, U.S.A., Nov. 5, 1818. He graduated at Waterville College in 1838, and in 1841 began the practice of Law at Lowell, Massachusetts. He early took a prominent part in politics on the Democratic side, and in 1853 was elected to the Massachusetts House of Representatives, and in 1859 to the State Senate. In 1860 he was a delegate to the National Democratic Convention, which met at Charleston, South Carolina, but withdrew with other Northern members on account of the stand taken by the convention on the Slave Trade Question. In that year he was the Democratic candidate for Governor of Massachusetts. He had before held a commission as Brigadier-General of Militia, and, at the outbreak of the Civil War, he entered the Union Army, and was soon placed in command at Baltimore, and subsequently at Fortress Monroe. His refusal at Fortress Monroe to return runaway slaves to their masters, on the ground that they were "contraband of war," originated the term "contrabands," by which slaves were frequently designated during the war. Gen. Butler commanded the land forces which assisted Farragut in the capture of New Orleans, May 1, 1862, and he governed there with great vigour until November, when he was recalled. Late in 1863 he was placed in command of the department of Virginia and North Carolina, and the forces there were designated the Army of the James. When General Grant was moving towards Richmond in July, 1864, Butler made an unsuccessful effort to capture Petersburg. In Dec., 1864, he made an ineffectual attempt upon Port Fisher, near Wilmington, North Carolina, and was then relieved of his command. In 1866 he was elected to Congress by the Republicans of Massachusetts, and he was repeatedly re-elected until 1878. In 1877 he left the Republican party to re-enter that of the Democrats, and was their candidate for Governor of Massachusetts in 1878 and 1879, but was not elected. In 1882 he again secured the nomination and was elected, but held the office for only one year, being defeated by the Republicans in 1883. He was the candidate for President of the Greenback-Labour Party in 1884, but his Democratic opponent, Mr.

Cleveland, was successful. Since the close of the war, when not holding any office, he has practised his profession in Boston and New York.

BUTLER, Lady Elizabeth Southerden, daughter of the late Mr. Thomas J. Thompson, by Christina, daughter of Mr. T. B. Weller, was born at Lausanne, in Switzerland. Her parents removed to Prestbury, near Cheltenham, where, at the age of five years, Miss Thompson first began to handle the pencil. After two or three years' sojourn at Prestbury, Mr. and Mrs. Thompson went to live in Italy, and the young artist continued her studies at Florence. In 1870 the family returned to England, and took up their abode at Ventnor, where they remained till the great success of Miss Thompson's picture of the "Roll Call" made a removal to London desirable. At one period she studied in the Government School of Art, Kensington. For some years she exhibited at the Dudley and other galleries. Her first picture at the Royal Academy was "Missing," 1873. It was followed in 1874 by the "Roll Call," a picture which attracted universal attention, and which was purchased by the Queen. "The 28th Regiment at Quatre Bras" was exhibited at the Academy in 1875; "Balaclava" in Bond Street in 1876; and "Inkermann" in Bond Street in 1877. More recently she has painted:—"Listed for the Connaught Rangers: recruiting in Ireland," 1879; "The Defence of Rorke's Drift," 1881; "Floreat Etona!" 1882, an incident in the attack on Laing's Nek; a picture representing the famous charge of the Scots Greys at Waterloo, 1882; and "Evicted" 1890. Miss Thompson became the wife of Major-General Sir William Francis Butler, K.C.B., June 11, 1877.

BUTLER, The Very Rev. Henry Montagu, late Dean of Gloucester, Head Master of Harrow School, and Vice-Chancellor of the University of Cambridge, is the youngest son of the late Rev. George Butler, D.D., Head Master of Harrow, and afterwards Dean of Peterborough, and was born in 1833, and educated at Harrow, under Dr. Vaughan, and at Trinity College, Cambridge. He was elected Ball University Scholar in 1852, and Battie University Scholar in 1853. In 1853 he won Sir W. Browne's medal for the Greek ode, and in 1854 the Porson Prize, the Greek ode, the Camden medal for Latin Hexameters, and the Members' Prize for a Latin essay. In 1855 he graduated B.A. as Senior Classic, and in the same year was elected Fellow of his

college. On the retirement of Dr. Vaughan, at Christmas, 1859, he was elected to the head-mastership of the school, over which his father had presided for twenty-four years, from 1805 to 1829. He held this post until 1885, when he was appointed Dean of Gloucester. In 1886 he resigned the Deanery, being nominated by the Crown, Master of Trinity College, Cambridge, in succession to the late Dr. Hepworth Thompson. He was honorary chaplain to the Queen, 1875-77; chaplain in ordinary, 1877; prebendary of St. Paul's and examining chaplain to the Archbishop of Canterbury, Dr. Tait, 1879, and to his successor, Archbishop Benson, 1883. He has been several times select preacher at the Universities of Oxford and Cambridge, and he published in 1861 and in 1866 volumes of "Sermons preached in the Chapel of Harrow School." He is brother of Canon Butler, and was married in Aug. 1888 to Miss Ramsay of Girton College, who distinguished herself by taking the first place in the Cambridge Classical Tripos in 1887.

BUTLER, Mrs. Pierce, née Frances Anne Kemble, daughter of Charles Kemble, and niece of Mrs. Siddons, was born in Newman Street, London, Nov. 27, 1809. She made her first public appearance, Oct. 5, 1829, as Juliet, at Covent Garden Theatre, then under the management of her father. "Venice Preserved" was revived Dec. 9, in that year, for the purpose of introducing her as Belvidera; and she sustained the parts of the Grecian Daughter, Mrs. Beverly, Portia, Isabella, Lady Townley, Calista, Bianca, Beatrice, Constance, Lady Teazle, Queen Catherine, Louis of Savoy in "Francis I.," Lady Macbeth, and Julia in the "Hunchback." The three years, during which she retrieved the fortunes of her family, were marked by the production of "Francis I.," a tragedy written by herself at seventeen. In 1832 she visited America, and, with her father, performed with great success at the principal theatres of the United States. An account of these wanderings is given in her "Journal of a Residence in America," 1835. At this period she became the wife of Mr. Pierce Butler, a planter of South Carolina, from whom she obtained a divorce in 1839. She resumed her maiden name, and retired to Lenox, Massachusetts, where she resided, with the exception of a year spent in Italy, for nearly twenty years. Besides translations from Schiller and others, she has also published "The Star of Seville," 1837; a volume of "Poems," 1842; "A Year of Consolation," 1847; "Residence on a Georgia Plantation," 1863; "Records of

Girlhood," 3 vols., 1878; "Records of Later Life," 2 vols., 1882; "Notes upon some of Shakespeare's Plays," 1882; and has appeared at intervals as a public reader. From 1869 to 1873 she was in Europe. She then returned to America, but now resides in London.

BUTLER, Major-General Sir William Francis, K.C.B., was born in the county of Tipperary, Ireland, in 1838, and educated at Dublin. He was appointed Ensign of the 69th Regiment, Sept. 17, 1858; Lieutenant, Nov., 1863; Captain, 1872; Major, 1874; and Deputy-Adjutant-Quarter-Master-General, Head Quarter-Staff, 1876. Major Butler served on the Red River Expedition; was sent on a special mission to the Saskatchewan Territories in 1870-71; and served on the Ashanti Expedition in 1873, in command of the West Akim native forces. He was several times mentioned in despatches of Sir Garnet Wolseley, and in the House of Lords by the Field-Marshal Commanding-in Chief. He was appointed a Companion of the Bath in 1874. In Feb., 1879, he was despatched to Natal to assume the responsible post of Staff Officer at the port of disembarkation. In the subsequent expeditions under Lord Wolseley, General Butler has generally held an important post; and especially in the Soudan Expedition. On the return of the forces, he was left behind in command of the British advanced posts. General Butler is the author of "The Great Lone Land," 1872; "The Wild North Land," 1873; "Akimfoo," 1875; and "Far out: Rovings retold," 1880. He married, June 11, 1877, at the church of the Servite Fathers, Fulham Road, London, Miss Elizabeth Thompson, the painter.

BUTT, The Hon. Sir Charles Parker, was called to the Bar at Lincoln's Inn in 1854, and joined the Northern circuit. He obtained a silk gown in 1868. He unsuccessfully contested Tamworth in Feb., 1874, and sat for Southampton, in the Liberal interest, from April, 1880, till March, 1883, when he was appointed to the judgeship in the Admiralty division of the High Court of Justice, vacant by the resignation of Sir Robert Phillimore. Since that time the Probate and Divorce divisions have been united to the Admiralty division, and the work is done by Sir Charles Butt and by the President, Sir James Hannen.

BUTTERFIELD, William, architect, was born Sept. 7, 1814. He early devoted himself to a study of the various periods of Gothic architecture, and has in his

practice introduced various colours to a large extent into ecclesiastical and domestic buildings by the help of brick, stone, marble, and mosaic combined. Amongst the buildings designed by him are, S. Augustine's College, Canterbury; the entire buildings of Keble College, Oxford; the Cathedral at Perth; Balliol College Chapel, Oxford; S. Michael's Hospital, Axbridge; the County Hospital, Winchester; the School Buildings at Winchester College; the Grammar School, Exeter; the Chapel, Quadrangle, and other buildings at Rugby School; Rugby Parish Church; Heath's Court, Ottery St. Mary; the Guards' Chapel, Caterham Barracks; All Saints', Margaret Street, London; S. Alban's, Holborn; S. Augustine's, Queen's Gate; Gordon Boys' Home Buildings, near Bagshot; together with a large number of other new churches, such as S. Mary Magdalene's Church and the Vicarage at Enfield, and old buildings and churches restored, as the Cross, Church and buildings, Winchester; S. Mary's Church in Dover Castle, and the Parish Church, Tottenham.

BYR, Robert. See BAYER, KARL EMMERICH ROBERT.

C

CABLE, George W., novelist, was born in New Orleans, in 1844, where he resided almost uninterruptedly until 1884, when he removed to New England. His present residence is in Northampton, Massachusetts. At the age of fourteen his father died, leaving his family in such reduced circumstances as to compel his son to leave school in order to aid in the support of his mother and sisters. From that time until 1863 he was usually employed as a clerk. In that year he entered the Confederate army, where he remained until the close of the civil war. Returning to New Orleans, he made such a living as he could—at first as an errand boy (though he was nearly twenty-one years of age), then in book-keeping, and finally secured a position in a prominent house of cotton factors, which he left, in 1879, to devote himself exclusively to literature. His first literary work was in the form of contributions to the *New Orleans Picayune* under the signature of Drop-Shot. His work, however, did not attract any very general attention until his Creole sketches appeared in *Scribner's Monthly*, now *The Century Magazine*. These were published in book form in 1879, under the title of "Old Creole Days." They were followed by "The

Grandissimes," 1880; "Madame Delphine," 1881; "The Creoles of Louisiana," 1884; "Dr. Sevier," 1884; "The Silent South," 1885; "Bonaventure," 1887; "Strange True Stories of Louisiana," 1889; and "The Negro Question," 1890. In these Mr. Cable has shown such a mastery of the Louisiana dialect and such an insight into the Creole character as to give him a prominent place among American writers; and the public readings from his works which he has given during the past few years in Northern cities have been very largely attended.

CADELL, Francis, the explorer of the river Murray, son of H. F. Cadell, Esq., of Cockenzie, near Preston Pans, Haddingtonshire, was born in 1822, and educated in Edinburgh and in Germany. While very young he showed a taste for adventure, and entered as a midshipman on board an East Indiaman. The vessel having been chartered by Government, the lad, as a volunteer, took part in the first Chinese war, was present at the siege of Canton, the capture of Amoy, Ningpo, &c., and received an officer's share of prize-money. At twenty-two he was in command of a vessel, and in the intervals between his voyages he spent much time in the shipbuilding yards of the Tyne and Clyde, where he gained a thorough knowledge of naval architecture and the construction of a steam-engine. A visit to the Amazons first led him to study the subject of river navigation; and when in Australia, in 1848, his attention was drawn to the practicability of navigating the Murray and its tributaries, which had served only for watering the flocks belonging to the scattered stations on their banks. Three years later, encouraged by the Governor of Australia, Sir H. F. Young, he put his project into execution. In a frail boat, with canvas sides and ribs of barrel hoops, he embarked at Swanhill on the Upper Murray, and descended the stream to Lake Victoria at its mouth, a distance of 1300 miles. Having thus proved that the Murray was navigable, he succeeded in crossing the dangerous bar at its mouth in a steamer planned and constructed under his supervision. This vessel accomplished a first voyage of 1500 miles. Other steamers were procured, and the Murrumbidgee, the Edward, and the Darling were in like manner opened to traffic. A gold candelabrum was presented to Mr. Cadell by the settlers, the value of whose property has been greatly increased by his efforts, and the Legislature directed a gold medal in his honour to be struck in England by Mr. Wyon.

CADOGAN (Earl of), The Right Hon. George Henry Cadogan, eldest son of the fourth Earl, was born at Durham in 1840. He succeeded to the title on the death of his father in 1873, having been for a few months previously M.P. for Bath. He was appointed Parliamentary Under Secretary for War in May, 1875; and Under Secretary of State for the Colonies in March, 1878, in succession to Mr. J. Lowther, who had been advanced to the post of Chief Secretary for Ireland. He went out of office with the Conservative party in April, 1880. In Lord Salisbury's second administration, 1886, he was appointed Lord Privy Seal, without a seat in the Cabinet, but he joined the Cabinet in 1887.

CAIN, Auguste, sculptor, born in Paris, Nov. 4, 1822, worked first with a carpenter, and afterwards entered the studio of M. Rude. M. Cain, who has devoted his attention to groups of animals, first exhibited at Paris in 1846, and is the publisher of his own bronzes. Amongst numerous works he has exhibited "The Dormouse and Tomtit," 1846; "The Frogs desiring a King," 1850; "The Eagle defending his Prey," 1852; "An Eagle chasing a Vulture," 1857; "Lion and Lioness quarrelling about a Wild Boar," 1875; and "A Family of Tigers," 1876. The first two of these appeared in the Great Exhibition of 1851, when M. Cain obtained the bronze medal. One of his latest works is "Rhinoceros attacked by Tigers," 1882. He has received many recognitions of merit; another medal in 1864; and a third at the Universal Exposition of 1867. M. Cain was nominated a Chevalier of the Legion of Honour in 1869.

CAINE, William Sproston, was born at Seacombe, Cheshire, March 26, 1842, and is the son of Nathaniel Caine, J.P. for Lancashire and Liverpool, a Liverpool merchant. He was educated privately by the Rev. Richard Wall, M.A. In 1873 he contested Liverpool in the Liberal interest at a bye-election, and afterwards at the general election in 1874, both times unsuccessfully. In 1880 he was returned for Scarborough, and again in 1884, on his appointment to the office of Civil Lord of the Admiralty in Mr. Gladstone's administration of 1870—5. In 1875 he consented to contest the county of Middlesex at the following general election, and on the passing of the Redistribution Act stood for the Tottenham division of that county in 1885 without success. At a bye-election in April, 1886, he was returned for Barrow-in-Furness

by a large majority, and was again returned at the general election. He is a J.P. for the North Riding of Yorkshire, and largely engaged in the iron trade of Cumberland and Staffordshire. He is Chairman of a Special Commission for the reorganisation of the Metropolitan Constituencies in the Liberal Interest. Mr. Caine separated from Mr. Gladstone on the Home Rule question, and has been one of the whips of the Liberal Unionist party. He is the author of "A Trip round the World in 1887—8;" "Hugh Stowell Brown, a Memorial Volume," 1888; and "Picturesque India," 1890.

CAIRD, The Right Hon. Sir James, P.C., K.C.B., LL.D., F.R.S., born at Stranraer, in 1816, was educated at the High School and University of Edinburgh. During the Protection controversy in 1849, Mr. Caird published a treatise on "High Farming as the best Substitute for Protection," which went rapidly through eight editions, and attracted much public attention. In the autumn of 1849, at the request of the late Sir Robert Peel, he visited the west and south of Ireland, then prostrate from the effects of the famine, and at the desire of the lord-lieutenant, Lord Clarendon, reported to the Government on the measures which he deemed requisite for encouraging the revival of agricultural enterprise in that country. This report was enlarged into a volume, published in 1850, descriptive of the agricultural resources of the country, and led to considerable landed investments being made there. During 1850 and 1851 Mr. Caird, as the commissioner of the *Times*, conducted an inquiry into the state of English agriculture, in which he visited every county in England; and his letters, after appearing in the columns of the *Times*, were published in a volume, entitled, "English Agriculture," which has been translated into the French, German, and Swedish languages, besides being republished in the United States. In 1858 Mr. Caird published an account of a visit to the prairies of the Mississippi, descriptive of their fertility and great future. Translations of this work also appeared on the continent. Invited at the general election of 1852 to offer himself to represent his native district in Parliament, he was defeated by a majority of one. At the general election of 1857 he was elected member for the borough of Dartmouth, as a supporter of Lord Palmerston, and an advocate of Liberal measures. In 1859 he was elected for Stirling without opposition. During the nine years he was in Parliament, Mr. Caird took an active part in all subjects

connected with agriculture. In 1860 he was appointed a member of the Fishery Board, and in 1863 became Chairman of the Royal Commission on the Sea Fisheries of the United Kingdom, Professor Huxley and Mr. Shaw Lefevre, M.P., being his colleagues. In 1864 Mr. Caird, after many years' perseverance, carried a resolution of the House of Commons in favour of the collection of agricultural statistics, which was followed by a vote of £10,000 for that object. The returns of 1866 for Great Britain, the result of that vote, for the first time complete the agricultural statistics of the United Kingdom, which are now published annually. In 1863 he visited Algeria, Italy and Sicily, to ascertain the possibility of extending the production of cotton in those countries in case the supplies from the Southern States of America should be seriously lessened by the War. In 1865 he was appointed to the office of Inclosure Commissioner, subsequently the Land Commission for England, of which he was senior member. In 1869 he revisited Ireland, and published a pamphlet on the Irish land question, soon after which he received the Companionship of the Bath. In 1868 and 1869 he published successive papers on the "Food of the People," read before the Statistical Society. In 1878, at the request of the President and Council of the Royal Agricultural Society of England, he prepared, for the French International Exhibition, an account of English agriculture, which was translated into French and German for continental perusal, and was afterwards separately published in this country under the title of "The Landed Interest." In the same year he was requested by Lord Salisbury, then Secretary of State for India, to serve on the Indian Famine Commission, which visited all parts of India, and reported largely on the whole subject. He published at the same time a narrative of his examination of the country, "India, The Land and People," which has had a large circulation. In 1886 he was requested by Lord Salisbury to become a member of Earl Cowper's Commission to inquire into the agricultural state of Ireland, on which he served. In 1889, on the formation of the new Board of Agriculture, he became a member of the Board, with the rank of a Privy Councillor. In 1890, at the request of the Royal Agricultural Society of England, he prepared for their Journal an account of the fifty years of the valuable work of that Society. Sir James Caird is a Deputy-Lieutenant and magistrate of his native Province of Galloway.

CAIRD, Professor, The Rev. John, D.D., LL.D., born at Greenock, Dec., 1820, graduated at the University of Glasgow, M.A., 1845, was ordained minister of Newton-on-Ayr, 1845; of Lady Yester's Parish, Edinburgh, 1847; of the Parish of Errol, Perthshire, 1849; and of Park Church, Glasgow, 1857. He was appointed Professor of Divinity, in the University of Glasgow, 1862; and Principal and Vice-Chancellor of the University of Glasgow, 1873. He was one of Her Majesty's Chaplains for Scotland, but has resigned that office. He has published a volume of Sermons, 1858; addresses on the "Unity of the Sciences, &c.," 1873-4; and "Introduction to the Philosophy of Religion," 1880; also "Spinoza," in Blackwood's Philosophical Classics for English Readers, 1888.

CAIRD, Mrs. Mona is an English authoress, who was born at Ryde, in the Isle of Wight. She is the only survivor of the two daughters born to Mr. John Alison, a Midlothian inventor, who has long been engaged in mechanical studies. Though her father and her paternal grandfather were Scotch, Mrs. Mona Caird is also of English, Irish, German, and Spanish extraction. Hence the happy blending in her of the fiery ardour of the Spaniard, and the loving impulsiveness of the Irishman, tempered by the cool, clear judgment of the Scotchman, the whole finding congenial fellowship in the heroic boldness of the Englishman, and thus forming a character of extreme sensitiveness combined with a noble devotedness to duty, which leads the possessor to feel keenly, to think accurately, and to act boldly in the defence of truth and right; and such is Mrs. Mona Caird, as is shown by her writings. From early life she has devoted herself to the study of German philosophy, literature, and poetry, as well as French and English literature, philosophy, and general scientific subjects. She used to amuse herself in writing plays and acting them with her friends, and in her early girlhood she edited an amateur magazine called *Briareus*, to which, among other writers, the author of the "First Violin," Miss Jessie Pottergill, contributed a serial story and various articles. She had written much from childhood, and published a little anonymously, before issuing her first acknowledged work, "Whom Nature Leadeth." This was followed in 1887, by "One That Wins," and, in the spring of 1889, by "The Wing of Azrael." In the *Westminster Review* for August and November, 1888, Mrs. Mona Caird wrote articles on "Marriage,"

and "Ideal Marriage," which led to a voluminous correspondence in *The Daily Telegraph*, entitled "Is Marriage a Failure?" Mrs. Mona Caird's latest contributions to literature are two articles in the *North American Review* on "The Emancipation of the Family." Her husband is a son of the Rt. Hon. Sir James Caird, P.C., K.C.B., LL.D., F.R.S.

CAIRNS, John, D.D., LL.D. (both of Edinburgh, 1858 and 1884), United Presbyterian, born near Ayton, Berwickshire, Scotland, Aug. 23, 1818; studied in the University of Edinburgh from 1834 till 1839, entered at the University of Berlin in session 1843-4, studied Theology in the United Secession Church from 1840 till licensed, and was Minister of the United Presbyterian Church, Berwick-on-Tweed, 1845 to 1876. In 1867 he became Professor of Apologetics in the United Presbyterian Church; and in 1876, leaving his congregation, when the Hall was reorganized, he removed to Edinburgh, teaching henceforth Systematic Theology also. In 1879 he succeeded Dr. Harper as Principal of the College. He has written "Life of John Brown, D.D.," 1860; "Unbelief in the Eighteenth Century" (Cunningham Lecture for 1880), 1881. He wrote the article "Schottland: Kirchliche Statistik," in the 2nd edition of Herzog's "Real-Encyclopädie;" and the article "Infidelity," in the *Schaff-Herzog*. Also in "Present Day Tracts," 1882-89, those on "Miracles; Christ the Central Evidence of Christianity," "Success of Christianity; Argument from Prophecy," "Is the Evolution of Christianity from mere Natural Sources Credible?" and "Argument for Christianity from Experience of Christians." He has also written in various reviews, and published, among other sermons, "False Christs and the True," against the theories of Renan and Strauss, 1864.

CALDERON, Philip Hermogenes, R.A., son of the Rev. Juan Calderon, was born in Poitiers in 1833, studied at Mr. Leigh's Academy and in the atelier of M. Picot (Member of the Institute) in Paris. Amongst his early pictures are "The Gaioler's Daughter," exhibited at the Royal Academy in 1858; "Man goeth forth to his Labour," 1859; "Never More," 1860; "La Demande en Mariage," and "The Return from Moscow," 1861; "After the Battle," 1862; "The British Embassy in Paris during the Massacre of St. Bartholomew," 1863; "The Burial of Hampden" and "Women of Arles," 1864. Mr. Calderon was elected A.R.A.

in 1864. In 1865 he did not exhibit. In 1866 he had in the Royal Academy Exhibition "Her most noble, high, and puissant Grace," "Women of Poitiers washing on the banks of the Clain," and "In the Pyrenees." In 1867 Mr. Calderon was elected full R.A., and received at the Paris International Exhibition the first medal awarded to English Art. He also received one of the medals awarded to English artists at the Vienna Exhibition of 1873. Since then he has exhibited in London "Home after Victory," and "Evening," "Enone," and "Whither?" (this last his diploma picture); in 1869, "Sighing his Soul into his Lady's Face"; in 1870, "The Orphans," "The Virgin's Bower," and "Spring Driving away Winter"; in 1871, "On her Way to the Throne," and "The New Pictures" (portraits of a well-known picture collector); "In a Palace-Tower"; in 1873, "The Moonlight Serenade"; in 1874, "The Queen of the Tournaments" and "Half-Hours with the Best Authors," "Toujours Fidèle," "The Nest," "Margaret," "Watchful Eyes," and "His Reverence"; "Joan of Arc," "Reduced Three per Cents. (Bank of England)," "The Nunnery at Loughborough," "La Gloire de Dijon," "Ruth and Naomi," 1886; "Deep in the Autumn Woods," 1887; "Home," 1889; and many others. In 1878 Mr. Calderon was one of the English artists selected to exhibit an extra number of works at the Paris International Exhibition, and he sent there several of the pictures mentioned above. At the close of that Exhibition he received a first-class medal, and was created a Knight of the Legion of Honour. Since that time he was long occupied in painting decorative panels in oil for the dining-room of a well-known lover of art, among which have been "The Olive," "The Vine" (representing the fruits of the earth), and "The Flowers of the Earth," exhibited at the Royal Academy in 1881. In 1887 Mr. Calderon was appointed Keeper of the Royal Academy in place of Mr. Pickersgill.

CALDERWOOD, Henry, LL.D., F.R.S.E., Professor of Moral Philosophy in the University of Edinburgh, was born at Peebles, May 10, 1830. Professor Calderwood was educated at the Edinburgh Institution and High School, and at the University, where he distinguished himself in Mental Philosophy. While a student he published, in opposition to the doctrine of Sir William Hamilton, "The Philosophy of the Infinite," in 1854 (now in the 3rd edit.). He studied for the ministry of the United Presby-

terian Church of Scotland, and was ordained minister of Greyfriars Church, Glasgow, 1856. He was appointed Examiner in Mental Philosophy to the University of Glasgow, 1861. This University conferred on him the degree of LL.D. in 1865. During the illness of Professor Fleming, at the invitation of the Senatus, he conducted the class of Moral Philosophy, session 1865-6. In 1868 he was elected Professor of Moral Philosophy in the University of Edinburgh. He was chosen F.R.S.E. in 1869; and was elected Chairman of the first School Board for the City of Edinburgh in 1874, from which office he retired in 1877. While Chairman, he published "On Teaching," 1874; 3rd edit., 1881. He published "Handbook of Moral Philosophy," 1872; 15th edit., 1890, and "The Relations of Mind and Brain," 1879; 2nd edit., 1884. He published "The Relations of Science and Religion," 1881, being the Morse Lecture for the Union Theological Seminary, New York. He has edited and enlarged "Fleming's Vocabulary of Philosophy" (4th edit., 1887). Professor Calderwood has been repeatedly invited to become a candidate for the representation of the City of Edinburgh in Parliament, but has declined to abandon academic work.

CAMBRAY-DIGNY, Guglielmo, Conte di, an Italian statesman, born at Florence in 1820, is the son of Count Louis of Cambray-Digny, a distinguished architect, Foreign Member of the Institut de France, and for a time Minister of Ferdinand III., Grand Duke of Tuscany. After completing his studies at Paris, he returned, at the age of twenty, to his native city, where he was a member of the Liberal and National Party. He always exhorted the Grand Duke, but in vain, to make concessions to the liberal requirements of the times, instead of relying on Austrian support; and in 1859, when the Grand Duke was obliged to flee from his dominions, which were thereupon annexed to Piedmont, Signor Cambray-Digny was named a Deputy to the Tuscan Assembly which approved this preliminary step towards the unification of Italy, and in 1860 was made a Senator of the new Kingdom. In 1865 he presided, in his capacity of Lord Mayor ("Gonfaloniere") of Florence, at the sixth centenary of the birth of Dante, and delivered the official speech of inauguration of the statue of the poet. His political celebrity, however, does not date farther back than the close of the year 1867, when he was appointed Finance Minister of the kingdom of

Italy, and found himself face to face with an enormous deficit, which he endeavoured to reduce by various expedients, including the unpopular grist tax, and giving to an Anonyme Society the tobacco monopoly. Count Cambray-Digny, by his perseverance and tact, succeeded in carrying this and other projects in spite of the energetic opposition of a formidable party in the Chambers. Towards the close of the year 1869 the Menabrea-Cambray-Digny Cabinet, as it was called, was succeeded by the Lanza Cabinet. Count Cambray-Digny resumed his post in the Senate, where he has been ever since a member of the Finance Committee, of which he is, in fact, President. He is, besides, Vice-President of the Italian *Catasto*, and surveyor of the artistical patrimony of the Civil List of the King of Italy.

CAMBRIDGE (Duke of), Field-Marshal H.R.H. George William Frederick Charles, K.G., K.P. C.C.M.G., G.C.H., G.C.B., G.C.S.I., P.C., son of Adolphus Frederick, the first duke, grandson of King George III., and first cousin to Her Majesty Queen Victoria, was born at Hanover, March 26, 1819, and succeeded his father July 8, 1850. He became a Colonel in the Army Nov. 3, 1837, was advanced to the rank of Major-General in 1845, to that of Lieut.-General in 1854, when he was appointed to command the two brigades of Highlanders and Guards, united to form the first division of the army sent in aid of Turkey against the Emperor of Russia; and was promoted to the rank of General in 1856. In 1861 he was appointed Colonel of the Royal Artillery and Royal Engineers, and was promoted to the rank of Field-Marshal Nov. 9, 1862. His Royal Highness has been successively Colonel of the 17th Light Dragoons, of the Scots Fusilier Guards, and, on the death of the late Prince Consort, of the Grenadier Guards. At the battle of the Alma his Royal Highness led his division into action in a manner that won the confidence of his men and the respect of the veteran officers with whom he served. At Inkermann he was actively engaged, and had a horse shot under him. Shortly after this, in consequence of impaired health, he was ordered by the medical authorities to Pera, for change of air, and after staying there some time proceeded to Malta; whence, his health still failing, he was directed to return to England. At a later period his Royal Highness gave the results of his camp experience in evidence before the Committee of the House of Commons appointed to investigate the manner in which the war had

been conducted. On the resignation of Viscount Hardinge in 1856 the Duke of Cambridge was appointed to succeed as Commander-in-Chief, and has continued to hold that post till the present time. His mother, the Duchess of Cambridge, died April 6, 1889, at the advanced age of 92.

CAMERON, Professor Sir Charles Alexander, M.D., F.R.C.S.I., M.K. & Q.C.P.I., D.P.H., and Examiner, Cambridge University, was born in Dublin on July 16, 1830. His father, Captain Ewen Cameron, was grandson of the unfortunate Archibald Cameron, younger brother of "Lochiel," who was executed for taking part in the Jacobite rising in 1745. Sir Charles's mother was Belinda Smith, a county Cavan lady. Sir Charles was educated at schools in Dublin and Guernsey. He studied medical and chemical science in Dublin and Germany, graduating as Doctor of Medicine and Doctor of Philosophy in 1856. At first he devoted much attention to Agricultural Chemistry. In 1867 he read a paper before the British Association detailing experiments which proved that urea could be assimilated by plants, and that all the nitrogen which they required could be taken from it. In 1862 he contributed a series of papers to the *Chemical News* on "The Inorganic Constituents of Plants." In 1862 he was elected Public Analyst for the city of Dublin, and was the only analyst in the United Kingdom who succeeded in applying the provisions of the first and very defective Adulteration of Food Act of 1860. He next turned his attention to sanitary science, and in 1867 was elected Professor of Hygiene or Political Medicine in the Royal College of Surgeons in Ireland. He was for some years Lecturer on Chemistry and Physics in two medical schools — Steevens Hospital Medical College, and Ledwich School of Medicine. Sir Charles's public lectures on Hygiene, open to ladies, were numerously attended. He is an Honorary Member and Professor of Chemistry, and ex-Professor of Anatomy to the Royal Hibernian Academy of the Fine Arts, &c., Lecturer on Agricultural Chemistry and Geology in the Albert (Government) Model Farm, Glasnevin, and he is Public Analyst for the greater number of Irish counties and boroughs, as well as Consultant to nearly all the Public Departments. He holds the Professorships of Chemistry and Hygiene in the College of Surgeons, and he has the entire control of the Public Health Department of the Dublin Corporation, being both Executive and Superintendent

Medical Officer of Health. Under his régime an immense improvement has taken place in the dwellings of the working classes, and the state of public health has been greatly improved. Sir Charles and the Irish Registrar-General were appointed in 1888 to inquire into the condition of the Royal Barracks in Dublin. Sir Charles served on the juries of several of the great exhibitions, including that of Paris in 1867. He was President of the Royal College of Surgeons 1885-6, President of the British Public Health Medical Society since 1888, Vice-President of the Institute of Chemistry 1884-90, and President or Vice-President of several other societies. His chief works are a voluminous "History of the Royal College of Surgeons in Ireland, and of the Irish Medical Institutions, including 300 Biographies," and a "Manual of Hygiene, and Compendium of the Sanitary Laws." His smaller works, including translations of poems from the German, are numerous. His original papers chiefly appear in the Proceedings of the Royal Society and the Royal Dublin Society, the Transactions of the Royal Irish Academy and of the Royal Academy of Medicine, the *Chemical News*, the *Dublin Journal of Medicine*. In pure Chemistry, he is best known for his numerous papers on Selenium Compounds. Sir Charles was knighted in 1886, "in recognition of his services in the improvement of Public Health, and his scientific researches." In 1862 he married Lucie, daughter of John Macnamara, solicitor of Dublin. She died in 1883 leaving seven children.

CAMERON, Commander Verney Lovett, C.B., D.C.L., son of the Rev. Jonathan Henry Lovett Cameron, is a native of Radipole, Weymouth, Dorsetshire, and was educated at Bruton, Somersetshire. He was appointed Naval Cadet in Aug., 1857; Midshipman in Jan., 1860; Sub-Lieutenant in Aug., 1863; Lieutenant in Oct., 1865; and Commander in July, 1876. Between Nov., 1872, and April, 1876, Lieutenant Cameron was engaged in that exploration of Africa which has made his name so familiar to the British public. He is the first European traveller who has crossed the whole breadth of the African continent in its central latitudes beyond the western shore of Lake Tanganyika to the Atlantic sea-coast of Lower Guinea. He left England under the auspices of the Royal Geographical Society, in charge of the East Coast Livingstone Expedition. After discovering that Dr. Livingstone's death had destroyed the original object

of his journey, Lieutenant Cameron determined to cross, if possible, the African continent. In performing this feat he traversed a distance of nearly 5,000 miles on foot between the east and the west ocean shores; but the most important part of his journeyings lay in the central interior west of the chain of lakes and rivers discovered by Dr. Livingstone, which Lieutenant Cameron found to be connected with the great river Congo issuing to the Atlantic between Loango and Angola. Since his return to England he has served in two of Her Majesty's vessels, and gone through courses in gunnery and torpedo. In Sept., 1878, he started on a tour through Asia Minor and Persia to India, with the object of demonstrating the feasibility of constructing a railroad from the Mediterranean to India without following the course of the Euphrates. In 1880 he published a work in two volumes on the Euphrates Valley, entitled "Our Future Highway." In 1882 he and the late Sir R. F. Burton undertook a journey of exploration in the country lying at the back of the Gold Coast Colony, and the Council of the Royal Geographical Society accorded them a loan of instruments to enable them to make scientific observations. The two travellers amassed large and valuable collections in all branches of natural history, and Commander Cameron also made extensive surveys. He was created a C.B. (civil division), and an hon. D.C.L. of Oxford, after his return from Africa. He has received the Founder's Medal of the Royal Geographical Society, the Grande Médaille d'Or of the French Geographical Society, the Gold Medal of the Portuguese Geographical Society, a Gold Medal from the King of Italy for his discoveries in Africa; and he is Officier d'Instruction (France), a Member of the Crown of Italy, and a Fellow of over thirty Societies, English and foreign. Commander Cameron is the author of "An Essay on Steam Tactics," 1865, and "Across Africa," 1876; "Our Future Highway," 1880; besides numerous articles and books for boys, and jointly with the late Sir R. F. Burton of "To the Gold Coast for Gold," 1883. To Commander Cameron belongs the honour of being the first to point out practical means of civilising Africa by the formation of Chartered Companies, the construction of railways, and placing steamers on the great lakes and rivers. He has recently been working vigorously for the suppression of the slave trade.

CAMPBELL, The Hon. Sir Alexander,

K.C.M.G., Q.C., was born in 1822 at Hedon, near Kingston-upon-Hull. Though born in England he is of Scotch descent, and was educated and has always resided in Canada. He was called to the Bar of Upper Canada in 1843, created a Queen's Counsel in 1856, and in the following year made a Bencher of the Law Society of Upper Canada. From 1858 until Confederation he represented the Cataraqui Division in the Legislative Council of Canada, and served until the union of the British North American Provinces in 1867 as Commissioner of Crown Lands, and Leader for the Government in the Legislative Council. He took an active part in the Quebec Conference which resulted in Confederation, and became a member of the Canadian Privy Council at the time of the union, and entered the Macdonald Government in 1867, first as Postmaster-General and afterwards as Minister of the Interior. In 1878, on the formation of the Liberal-Conservative Administration, Sir Alexander resumed the Postmaster-Generalship, and for a time held the portfolio of Minister of Militia. In 1881 he exchanged the portfolio of Minister of Militia for that of Minister of Justice, which he retained until 1885, when he again became Postmaster-General. Sir Alexander resigned his seat in the Cabinet in Jan., 1887, and in June became Lieut.-Governor of the Province of Ontario, an office which he now fills, 1890. On May 24, 1879, he was created a K.C.M.G.

CAMPBELL, Sir George, M.P., K.C.S.I., D.C.L., eldest son of the late Sir George Campbell, of Edenwood, elder brother of the first Lord Campbell, was born in 1824, and educated at Edinburgh, St. Andrews, and Haileybury. He entered the Civil Service of India in 1842, and at the age of twenty-two was already in charge of an important district in that distant dependency. From the manner in which he discharged his duties, his name was mentioned with especial praise by Lord Dalhousie, the Governor-General. Soon after this, Mr. Campbell returned home, and was called to the Bar at the Inner Temple in 1854. While here he published "Modern India," 1852, dedicated to his uncle, then Lord Chief Justice of England, and "India as it May be," 1853. He was Associate of the Court of Queen's Bench from 1851 to 1854, but in the latter year he returned to India, where he was employed for some years in the administration of the country as Commissioner of the Cis-Sutlej States, Commissioner of the Customs and Excise, and Civil Commissioner with the

troops which occupied the North-West Provinces after the Mutiny. In 1858 Mr. Campbell was appointed Judicial and Financial Commissioner in Oude. He was afterwards for some years a Judge of the High Court of Judicature of Calcutta, and was employed as head of the Commission to inquire into the famine in Orissa. In 1867 he was nominated Chief Commissioner of the Central Provinces of India, but returning to Scotland in 1868, he became a candidate for Dumbartonshire in July, in the Liberal interest, but retired from his candidature before the general election. The next year he directed attention to Irish Land tenure, by publishing a book on the subject. At this time he received the honour of Honorary D.C.L. of the University of Oxford. In Jan., 1871, he again went to India as Lieutenant-Governor of Bengal, but returned home early in 1874 to become a member of the Council of India, which again he resigned in 1875, when he was elected M.P. for the Kirkcaldy Burghs. In 1873 he had been created a Knight Commander of the Star of India. Sir George presided over the Economy and Trade Department at the Social Science Congress held at Glasgow in Oct., 1874. He took an active part in the agitation on the Eastern Question in 1876, as a supporter of the policy advocated by Mr. Gladstone, and published a "Handy Book of the Eastern Question: being a very recent View of Turkey," 1876. Subsequently he twice visited America, and published a volume called "White and Black in the United States." He has paid much attention to Foreign and Colonial subjects; and in 1889 he published a volume on "The British Empire." He was re-elected M.P. for the Kirkcaldy Burghs in 1880, 1885, and 1886, as an Independent Liberal.

CAMPBELL, The Right Rev. James Colquhoun, D.D., late Bishop of Bangor, son of the late Mr. John Campbell, of Stonefield, Argyleshire, by Wilhelmina, daughter of the late Sir James Colquhoun, Bart., of Luss, Dumbartonshire, was born at Stonefield in 1813. Having graduated in honours at Trinity College, Cambridge (B.A., 1836; M.A., 1839; D.D., 1859), he was appointed successively Vicar of Roath, Glamorganshire, 1839; Rector of Merthyr Tydvil, Glamorganshire, 1844; Honorary Canon of Llandaff, 1855; and Archdeacon of Llandaff, 1857. He was nominated by Lord Derby to the See of Bangor, on the death of Dr. Bethell, in April, 1859. Dr. Campbell resigned his bishopric in 1890. He married, in 1840, Blanche (who died 1873),

daughter of John Bruce Pryce, Esq., of Duffryn, Glamorganshire.

CAMPBELL, The Rev. Lewis, M.A., LL.D., Professor of Greek in the University of St. Andrews, son of Robert Campbell sometime Governor of Ascension Isle, and cousin of Campbell the poet, was born Sept. 3, 1830. He was educated at the Edinburgh Academy, at Glasgow University, and at Trinity and Balliol Colleges, Oxford, where he was scholar and exhibitor. He was thus brought into contact with the present Master of Balliol (Dr. Jowett), whose influence as a college tutor was already conspicuous. He took a first-class in classics in 1853, was Fellow of Queen's from 1855-8, and tutor from 1856-8. In 1857 he was ordained by the Bishop of Oxford, and in 1858 became Vicar of Milford, Hants. He remained there until 1863, when he was appointed Professor of Greek in the University of St. Andrews, a post which he still retains. Professor Campbell has published many works on classical subjects, of which the chief are: "The Theætetus of Plato," 1861 (2nd edit., 1883); "The Sophistes and Politicus of Plato," 1867; "Sophocles — The Plays and Fragments," Vol. I., 1871 (2nd edit., 1879); Vol. II., 1881; Verse translations of Sophocles, 1873-1883, and of Æschylus, 1890; "Sophocles" in Macmillan's series of Classical Writers, 1879. He has also written articles on Plato and Sophocles in the "Encyclopædia Britannica," and contributed various papers to the *Quarterly*, *National*, and *Classical Reviews*, the *American Journal of Philology*, and other home and foreign periodicals. Professor Campbell published in 1877 a volume of sermons, "The Christian Ideal," and in 1882 (in conjunction with Mr. Garnett), "The Life of James Clerk Maxwell" (2nd edit., 1884).

CAMPBELL-BANNERMAN, The Rt. Hon. Henry, M.P., is the second son of the late Sir James Campbell, of Stracathro, Forfarshire, by Janet, youngest daughter of the late Mr. Henry Bannerman, of Manchester, and was born in 1836. He was educated at the University of Glasgow, and at Trinity College, Cambridge (B.A., 1858; M.A., 1861). In 1872 he assumed the additional surname of Bannerman, under the will of his uncle, Mr. Henry Bannerman, of Hunton Court, Kent. Mr. Campbell-Bannerman, who is a magistrate for the counties of Lanark and Kent, has represented the Stirling district of boroughs in the Liberal interest since Dec., 1868; he was Financial Secretary

at the War Office from 1871 to 1874; was again appointed to that office in 1880; and in May, 1882, was nominated to succeed Mr. Trevelyan as Secretary to the Admiralty. On the resignation of Mr. Trevelyan he was appointed Chief Secretary for Ireland, 1884-5; and in Mr. Gladstone's third Cabinet, 1886, held the office of Secretary of State for War. He married, in 1860, Charlotte, daughter of the late Major-General Sir Charles Bruce, K.C.B.

CANDOLLE, Alphonse Louis Pierre Pyramus de, LL.D., the eminent botanist of Geneva, was born in Paris, Oct. 27, 1806, being the son of the celebrated Augustin Pyramus de Candolle, who died in 1841. He went through a course of study in literature and science at Geneva, and then turned his attention to law, of which faculty he was admitted a doctor in 1829. Finally, however, he made botany his exclusive study, and became first the assistant and subsequently the successor of his father. For eighteen years he was director of the Botanic Garden, and during the same period he gave lectures in the Academy of Geneva. M. de Candolle was elected a correspondent of the French Institute in 1851, and the following year was decorated with the Legion of Honour. In June, 1874, he was elected one of the eight foreign members of the French Institute, in the place of the late Professor Agassiz. His works are: "*Monographie des Campanulées*," 1830; "*Introduction à l'Étude de la Botanique*," 2 vols., 1834-5; "*Géographie Botanique raisonnée*," 2 vols., 1855; "*Lois de la Nomenclature Botanique*," 1867, and "*Nouvelles Remarques sur la Nomenclature*," 1883; "*Histoire des Sciences et des Savants depuis Deux Siècles, suivie d'autres Études sur des Sujets Scientifiques, en particulier sur la Sélection dans l'Espèce Humaine*," 1873 (2nd edit., 1884); "*La Photographie, ou l'art de décrire les Végétaux considérés sous différents points de vue*," 1880; "*Origine des Plantes cultivées*," 1883, translated into English, German, and Italian; besides more than 150 papers in Transactions or Reviews, chiefly in "*Archives des Sciences physiques et naturelles*." His father had published seven volumes of the great collection of monographies, called "*Prodromus Systematis Naturalis Regni Vegetabilis*," to which he added, conjointly with several botanists, ten volumes (viii—xviii, 1844-73). Now he is publishing, with his son Casimir, a continuation under the title of "*Monographiæ Phanerogamarum*" (i—vi, 1878-

89). Alphonse de Candolle is Doctor (honorary) of the universities of Basle, Heidelberg, Cambridge, and Oxford, and foreign member of almost all the principal scientific academies or societies. He presided at the Botanical International Congress in London, 1866, and Paris, 1867. He received, in 1889, the gold medal of the Linnean Society of London. At Geneva he had been for many years a member of Cantonal Legislatures, and for twenty-five years President of the Society of Arts. He possesses an extensive herbarium and one of the best botanical libraries, to which botanists of any country are kindly admitted.

CANDOLLE, Anne Casimir Pyramus de, Hon. Doctor of the University of Rostock, son of Alphonse, grandson of Augustin Pyramus, born at Geneva, Feb. 20, 1836; has published several papers on anatomy of plants and descriptive botany in the "*Prodromus*" and the Monographies above mentioned, as well as in "*Mémoires de la Société de Physique et d'Histoire naturelle de Genève*," a society of which he was President in the year 1882.

CANNING, Sir Samuel, C.E., upon whom the responsibility of laying the Atlantic Cables of 1865, 1866, and 1869 devolved, is the son of the late Robert Canning, Esq., of Ogbourne St. Andrew, Wiltshire, and was born in 1823. He began his career as assistant to the late Mr. Joseph Locke, C.E., F.R.S., from 1844 to 1849, and was resident engineer during the formation of the Liverpool, Ormskirk, and Preston Railway. Since then he has been engaged in the manufacture and submersion of the most important lines of Submarine Telegraph Cables, almost from their initiation in 1850. He was among the pioneers of Atlantic Cables, and achieved the submergence of the first line of 1858, and that of other Atlantic lines. To his skill and energy the success of the Atlantic Expedition of 1866 is undoubtedly due; he perfected the paying-out, and the recovering and grappling machinery for that cable, which so materially aided its submersion, and the recovery of the cable lost in the preceding year. He has also connected England with Gibraltar, Malta, and Alexandria, and laid other important lines of cable connecting various countries in the Mediterranean, North Sea, &c. He received the honour of knighthood in 1866, a Gold Medal from the Chamber of Commerce of Liverpool, March 14, 1867, and the insignia of the

Order of St. Jago d'Espada from the King of Portugal.

CANOVAS DEL CASTILLO, Antonio, a Spanish statesman, was born in 1830. He made his début in 1851, under the patronage of Señors Rios, Rosas, and Pacheco, as chief editor of the *Patria*, in which he defended Conservative ideas. In 1854 he was named deputy for Malaga, and since that year has never ceased to occupy a seat in the Cortes. In 1856 he was Chargé d'Affaires in Rome, and drew up the historical memorandum on the relations of Spain with the Holy See, which served as a basis for the Concordat. He was then named successively Governor of Cadiz in 1855, Director-General of the Administration from 1858 to 1861, and lastly, in that same year, Under Secretary of State for the Interior. In 1864 the Queen called him to the Ministry, together with Mon; O'Donnell chose him in 1865 as Minister of Finance and the Colonies; and he had the honour of drawing up the law for the abolition of the traffic in slaves. Lastly, a little before the Revolution of 1868, he was the last to defend with energy in the Cortes the Liberal principle when all the parties which had supported his doctrine had deserted the Parliament. His greatest title to fame is that of having been the first—supported by Señors Elduayem, Bugallal, and two others—to hoist the standard of legitimate and constitutional monarchy, in the full Constituent Assembly of 1868, and in face of the triumphant Revolution. His fidelity and capacity definitely obtained for him the supreme direction of the Alfonsist party; and on the proclamation of Alfonso XII. as King in Dec., 1874, Señor Cánovas del Castillo became President of the Council and chief of the new Cabinet, and he continued to hold the Premiership, with the exception of an interval of a few months, down to 1879, when on the return of Marshal Martinez Campos from Cuba, Señor Cánovas del Castillo retired from the Premiership and Marshal Campos became Prime Minister, accepting as his colleagues the principal associates of Señor Cánovas. The skilful resistance of the latter delayed and defeated the Marshal's free-trade and emancipation projects, so that on the re-assembling of the Cortes (Dec., 1879) he was compelled to resign. Señor Cánovas del Castillo then returned to power in the year 1881; however, his Conservative Cabinet was overthrown, and a coalition between Señor Sagasta and Marshal Martinez Campos came into office. At the crisis of Nov., 1885, on the question of the occu-

pation of the Caroline Islands by Germany, he was compelled to resign, and was succeeded by Señor Sagasta. Señor Cánovas del Castillo is the author of numerous works in moral and political science, and a "History of the House of Austria," which is in great repute. These publications have long since gained him admission into the Academy of Madrid. In 1875 Señor Cánovas del Castillo received the insignia of the Order of the Red Eagle from the Emperor of Germany, the Grand Cross of the Order of the Tower and Sword from the King of Portugal, and the Golden Fleece from the King of Spain.

CANROBERT, François-Certain, Marshal of France and a Senator, was born June 7, 1809, of a good family, not in Brittany, as has frequently been stated, but at St. Céré, in the department of the Lot. He entered the military school at St. Cyr in 1826, and having distinguished himself there, joined the army as a private soldier, and was soon made sub-lieutenant of the 47th regiment of the line. He became lieutenant in 1832, and in 1835 embarked for Africa, and took part in the expedition to Mascara. His services in the provinces of Oran were rewarded with a captaincy. He was in the breach at the attack on Constantine, and was wounded in the leg. He received the decoration of the Legion of Honour about this time. In 1846 he became Lieutenant-Colonel, and commanded the 64th regiment of the line, which was charged to act against the formidable Bou Maza. In 1847 he was made colonel of the 3rd regiment of light infantry, and in 1848 was intrusted with the command of the expedition against Ahmed-Sghir, who had rallied the tribes of the Bouaounin insurrection. Colonel Canrobert pushed forward as far as the pass of Djerma, defeated the Arabs there, took two sheiks prisoners, and then returned to Bathna. He left the 3rd regiment to command a regiment of Zouaves, with whom he marched against the Kabyles, was again victorious, being promoted to the rank of General of Brigade, at the beginning of 1850 he led an expedition against Narah. The Arabs here, eagle-like, had their nests among the rocks. Canrobert advanced three columns to attack the enemy in his retreat, and so skilfully combined their fire, that in seven hours the Arab stronghold was destroyed. Louis Napoleon, when President, appointed Canrobert one of his aides-de-camp; and, shortly after the wholesale proscriptions and imprisonments which followed the *coup d'état* of

Dec. 2, 1851, gave him a commission, and very extensive powers, to visit the prisons, and select objects of his clemency. Upon the formation of the Army of the East in 1854 he was appointed to the command of the first division in the Crimea. His troops took part in the battle of the Alma, and he was himself wounded by a splinter of a shell, which struck him on the breast and hand. Marshal St. Arnaud resigned six days after the first battle in the Crimea, and the command of the Army of the East was transferred to General Canrobert. Although Commander-in-chief, General Canrobert was again in the thickest of the fight at Inkerman (Nov. 5), and whilst heading the impetuous charge of Zouaves was slightly wounded, and had a horse killed under him. In May, 1855, finding that impaired health no longer permitted him to hold the chief command in the Crimea, he resigned to General Pelissier, and soon after returned to France. He was treated with great distinction by the Emperor Napoleon, and was sent on a mission to the courts of Denmark and Sweden. At the beginning of the Italian war, in 1859, General Canrobert received the command of the 3rd corps of the Army of the Alps. He exposed himself to great danger at Magenta, and at Solferino had to effect a movement which brought valuable assistance to General Niel. General Canrobert was afterwards made a Marshal of France, Grand Cross of the Legion of Honour, and an Honorary Knight Grand Cross of the Bath. In June, 1862, he commanded at the camp of Châlons, and succeeded the Marshal de Castellane in command of the 4th corps d'armée at Lyons, Oct. 14. Subsequently, he was appointed Commander-in-Chief of the Army of Paris. At the time of the declaration of war by France against Prussia, in 1870, he had the command of an army corps. Marshal Canrobert was shut up in Metz, with Marshal Bazaine, and on the capitulation of that fortress, he was sent prisoner into Germany. After the preliminaries of peace had been signed he returned to France, where he met with a favourable reception from M. Thiers, who did not, however, appoint him to any command. After having declined the offer of a candidature for the National Assembly in 1874, in the Gironde, and in 1875 in the Lot, Marshal Canrobert, after some hesitation, allowed his name to be proposed in the department of Lot, at the Senatorial elections of Jan. 30, 1876, by the party of the Appeal to the People, and on the second scrutiny he was elected by 212 votes out of 385 electors. His term of office expired in Jan., 1879, when

he again became a candidate for the department of Lot, but was defeated. Later in the same year, however, he was elected Senator for Charente, in the room of the late M. Hennessy, the distiller. He accepted this unsolicited election as "a homage paid to the army in the person of the *doyen* of its chiefs." In 1860 Marshal Canrobert married Miss Macdonald, a Scotch lady.

CANTERBURY, Archbishop of. *See* BENSON, THE MOST REV. EDWARD WHITE.

CANTU, Cesare, historian, was born at Brivio, near Milan, Dec. 1804. He is the eldest of ten brothers, to whom he very early had to be a father. He studied in Milan at the Alexander Lyceum (now Beccaria), and, when only seventeen years of age, he became Professor of Literature in the College of Sondrio, in the Valteline, whence he went to Como, and thence to Milan. He embraced the Liberal cause, and his "Reflections on the History of Lombardy in the Seventeenth Century," published at Milan, excited the hostility of the Austrian Government, and he was imprisoned for three years. This work, published in Turin, has passed through ten editions, besides pirated editions and translations; and though it brought him many laurels, it brought him likewise many thorns. In his captivity he wrote an historical romance, "Margherita Pusterla," 1835, a work which has often been compared to the "Promessi Sposi," of Manzoni. He has composed various religious hymns, and his poem "Algiso," his "Letture Giovanelli," which have passed through more than thirty editions, and the articles which he has contributed to the "Biblioteca Italiana" and the "Indicatore" of Milan, have popularized his name throughout Italy. He belongs to what has been called the Romantic School, founded by Manzoni and Silvio Pellico. He has also published "Storia Universale," which has been translated into English, French, and German; "History of Italian Literature," 1851; "History of the last Hundred Years," 1852; "History of the Italians," 1859; "Milano, Storia del Popolo e del Popolo," 1871; "Cronistoria della Indipendenza Italiana," 3 vols., 1873; "Commento Storico ai Promessi Sposi [di Alessandro Manzoni], o la Lombardia nel secolo XVII.," 1874; "Donato ed Ercole Silva, Conti di Biandrate; cenni biografici," conjointly with C. Rovida, 1876; and "Caratteri Storici," 1881.

CAPEL, The Right Reverend Monsignor Thomas John, D.D., was born Oct. 28,

1836. Having completed his education by six years' private tuition under the Rev. J. M. Glennie, B.A. Oxon., in the autumn of 1860 he was ordained priest by Cardinal Wiseman. In Jan., 1854, he became co-founder and Vice-Principal of St. Mary's Normal College at Hammer-smith. Shortly after ordination he was obliged to go to a southern climate to recruit his strength. When there, at Pau, he established the English Catholic Mission, and was formally appointed its chaplain. Subsequently, his health having improved, he returned to London, where his sermons and doctrinal lectures in various churches, and more especially at the Pro-Cathedral at Kensington, soon raised him to the foremost rank among English preachers. During several visits to Rome he also delivered courses of English sermons in that city by the express command of the Sovereign Pontiff. Monsignor Capel, while labouring at Pau in the work of "conversions," was named private chamberlain to Pope Pius IX. in 1868, and after his return to England domestic prelate in 1873. With returning health Monsignor Capel once more took to the work of education, and in Feb., 1873, established the Roman Catholic Public School at Kensington. He was appointed Rector of the College of Higher Studies at Kensington—the nucleus of the Roman Catholic English University—in 1874, by the unanimous voice of the Roman Catholic Bishops, and he held that appointment until he resigned it in 1878. Then having delivered a series of conferences on the Doctrines of the Roman Catholic Church in Florence by the wish of Leo XIII., Monsignor Capel carried out his long-proposed visit to America. There, in all the great cities, he lectured and preached to large audiences on religious, social, political, and literary subjects. In 1882, Monsignor Capel wrote "Great Britain and Rome," urging the importance of having a Papal Nuncio accredited to England, and during his tour in America he published treatises on "Confession," "The Holy Catholic Church," "The Name Catholic," "The Pope the Head of the Christian Church," besides re-editing the well-known work, "Faith of Catholics."

CAPRIVI DE CAPRERA DE MONTE-CUCULLI, General Georg Leo von, the new German Chancellor, is the eldest of the four sons of Julius Edward von Caprivi, who was a high legal functionary in the service of the Prussian State. General von Caprivi was born at Charlottenburg on Feb. 24, 1831. Entering a general regiment in his 18th year, he won rapid promotion and served with distinction in

the campaigns of 1864 and 1866. In 1870 he acted as Chief of the Staff to the 10th Corps, of which he is now the Commander, and reaped fresh laurels in all the battles on the Loire. Swiftly ascending the other steps of the military ladder, he was appointed in 1883 to the command of the 30th Division at Metz; and next year, passing at a single bound from the army to the navy, he succeeded to Herr von Stosch, on the latter's retirement from the head of the Admiralty. In a short time naval men by profession were amazed at the mastery of their art and the perception of their interests which were displayed by a mere landsman and soldier like von Caprivi, and his administration conclusively proved at least that here was a man with a rare power of adapting himself to new modes and lines of activity, a faculty which will render less strange and less dangerous his transition from soldiering to diplomacy and statesmanship. Soon after the present Emperor's accession, on the death of Count Monts, he reorganised the navy; the command of the Imperial fleet being vested in Admiral von der Goltz, while something like a ministry of marine was created under Rear-Admiral von Heusner; and it was on this occasion that General von Caprivi, sharing in the redistribution of military commands, returned to his first love, and was rewarded for his loyalty thereto, no less than for his naval services, with the 10th or Hanoverian Army Corps, which is one of the finest in the whole army. During the manœuvres of the autumn of 1889, when the Hanoverians and Westphalians met in mimic warfare, with smokeless powder and other innovations on their trial, the Emperor had opportunity enough anew to study the character of General von Caprivi, and this general's character and ability to serve him in a political capacity must have fairly convinced his Majesty, otherwise he would never have asked him to assume the enormous burden of responsibility which Prince Bismarck had laid down. It was not without grave scruples and self-distrust that General von Caprivi listened to the flattering proposals of the Emperor; but his Majesty, it is said, had finally decided to have a soldier for his new Chancellor, thinking, as he does, with Frederick the Great, that a General must be the surest conductor of a foreign policy, as knowing best how far he can go with the army behind him.

CARATHEODORY PACHA (Alexander), a native of Constantinople, belongs to one of the most distinguished families of the Greek community in the Turkish

capital, and through his wife, is connected with the noble family of the Aristarchi. He was brought up at Constantinople and was sixteen years of age when he was sent to the West of Europe to complete his studies. On his return to Turkey he was employed in the Government offices of the Sublime Porte, and soon attracted notice by his assiduity and intelligence. In several capitals of Europe he occupied the post of First Secretary of Embassy, and he was appointed, for the first time, Under Secretary of State for Foreign Affairs during the Grand-Vizieriat of the late A'ali Pacha. About this period he was nominated Minister of the Sultan at the Court of Rome, where he resided for two years. He was recalled to occupy, for the second time, the post of Under Secretary of State for Foreign Affairs, and was sent, as chief plenipotentiary of Turkey, to the Congress of the Great Powers which assembled at Berlin in 1878 to revise the provisions of the Treaty of San Stefano. He had been previously raised to the rank of *muchir*. Afterwards he became Minister of Public Works, and in Nov. 1878 he was appointed Governor-General of Crete.

CARINI, Isidore, was born at Palermo (Sicily) on January 7th, 1843, and ordained Priest in 1866, Canon of the Cathedral of Palermo in 1875, Professor of Paleography and Curator of the Archives of Palermo in 1877. In 1882 he was sent by the Government into Spain to collect and publish documents relative to the Sicilian Vespers; and recalled to Rome by His Holiness Leo XIII. as assistant archivist and first Professor of Paleography at the new Vatican school in 1884. In 1889 he was appointed Premier Préfet at the Vatican Library. Canon Carini has been a prolific writer not merely upon archaeological subjects but also on religion, literature, languages, bibliography, &c. He is member of various literary societies, and for his services during the cholera in Palermo in 1855 received a gold medal from the King of Italy.

CARLE. See SADOW, VICTORIEN.

CARLING, Hon. John, a Canadian Statesman, was born at London, Ontario, Jan. 23, 1828. He entered the Canadian Parliament in 1857, was made Receiver-General in 1862, held office as Minister of Agriculture and Public Works in Ontario from 1867 to 1871, was sworn of the Privy Council, and was Postmaster-General from 1882 to 1885, since which year he has been Minister of Agriculture of the Dominion.

CARLINGFORD (Lord), The Right Hon. Chichester Samuel Parkinson Fortescue, K.P., is the youngest son of the late Lieutenant-Colonel Chichester Fortescue, of Ravensdale Park, co. Louth, some time member for Hillsborough in the Irish Parliament, and brother of Lord Claremont, to whose Irish title Lord Carlingford stands as heir presumptive. His mother was Martha, daughter of the late Mr. Samuel Meade Hobson, of the city of Waterford. He was born Jan. 18, 1823, and educated at Eton, and at Christ Church, Oxford, (B.A., 1844; M.A., 1847). He obtained a first class in classical honours, and in 1846 gained the Chancellor's prize for an English essay on the "Effects of the Conquest of England by the Normans." He entered Parliament at the general election of 1847 as one of the members for the county of Louth, which he represented, in the Liberal interest, till Feb. 1874, when he was defeated. Mr. Chichester Fortescue held a Junior Lordship of the Treasury under Lord Aberdeen in 1854-55; the Under Secretaryship of State for the Colonies in 1857-58; and again in 1859-65. He was sworn a member of the Privy Council in 1864. In 1865 he was made Chief Secretary for Ireland, and he held that post down to June, 1866. On the formation of Mr. Gladstone's Cabinet in Dec. 1868, he resumed that office, from which he was transferred in 1870 to the Presidency of the Board of Trade. Just before retiring from office, in Feb. 1874, Mr. Gladstone recommended the Queen to bestow a peerage on Mr. Chichester Fortescue, who was accordingly created Baron Carlingford. In consequence of the introduction of Mr. Gladstone's Irish Land Bill in April, 1881, the Duke of Argyll resigned his seat in the Cabinet and his office of Lord Privy Seal. Lord Carlingford was thereupon appointed to succeed his Grace in that office, and towards the close of the Parliamentary Session he had charge of the Land Bill. In 1883 he succeeded Lord Spencer as President of the Council; but resigned office with his party in 1885. He married, in 1863, Frances Lady Waldegrave, and was left a widower in 1879.

CARLISLE, Bishop of. See GOODWIN, THE RIGHT REV. HARVEY.

CARLISLE, John Griffin, American Statesman, was born in Campbell (now Kenton) County, Kentucky, Sept. 5, 1835. He received a common school education, studied law, and began its practice in 1858. From 1859 to 1861 he was a

member of the Kentucky House of Representatives, and of the State Senate from 1866 to 1871, resigning his seat to accept the office of Lieut.-Governor, to which he was elected in Aug. 1871, and which he occupied until 1875. In 1876 he was elected a member of the lower branch of Congress, where he continued to sit until May, 1890, when he was sent to the United States Senate to fill the unexpired term of the late Senator Beck (to 1895). From 1883 to 1889 he was the (Democratic) Speaker of the House of Representatives.

CARLOS (Don), Duke of Madrid (Carlos Maria de los Dolores Juan Isidoro Josef Francisco Quirino Antonio Miguel Gabriel Rafael), who claims to be the legitimate King of Spain by the title of Charles VII., was born March 30, 1848. His father, Don Juan, was the brother of Don Carlos (Charles VI.), known as the Count de Montemolin, in support of whose claims the Carlists risings of 1848, 1855, and 1860 were organised. As Charles VI. died without children, Jan. 13, 1861, his rights devolved upon his brother, Don Juan, who had married, on Feb. 6, 1847, the Archduchess Maria Teresa of Austria, Princess of Modena. Their son, the present Don Carlos, who was educated principally in Austria, married, on Feb. 4, 1867, Margaret de Bourbon, of Bourbon, Princess of Parma, daughter of the late Duke Ferdinand Charles III., Mademoiselle de France, Duchess of Parma, and sister of the late Comte de Chambord (Henry V. of France). In Oct. 1868, Don Juan abdicated in favour of his son, whose standard was raised in the north of Spain by some of his partisans, April 21, 1872. On July 16, in that year, Don Carlos published a proclamation, addressed to the inhabitants of Catalonia, Aragon, and Valentia, calling upon them to take up arms in his cause, and promising to restore to them their ancient liberties; and in the following December Don Alfonso, the brother of Don Carlos, assumed the command of the Carlist bands in Catalonia. Don Carlos himself made his entry into Spain, July 15, 1873, announcing that he came for the purpose of saving the country. From that period the war was waged with remarkable vigour, and the various governments which came into power at Madrid strove in vain to dislodge the Carlists from their strongholds in the north of Spain. When the Republic came to an end, and the eldest son of the ex-Queen Isabella returned to Spain as Alfonso XII., Don Carlos issued a proclamation, dated at his headquarters at Vera, Jan. 6, 1875, calling upon Spain to adhere to his side.

The contest was carried on with great stubbornness and gallantry by the Carlists for more than a twelvemonth after that; but in January, 1876, Tolosa, their last stronghold, fell, and its defenders, flying in disorder, sought refuge on French territory. Don Carlos went to Paris, but on July 18, 1881, was expelled from France on the ground of his having ostentatiously allied himself with the partisans of the Comte de Chambord. Since the death of Alfonso XII., Don Carlos has not actively come forward as a pretender. Don Carlos has five children—the Infanta Blanca, born Sept. 7, 1868; the Infante Jaime, Prince of the Asturias, born June 27, 1870; the Infanta Elvira, born July 28, 1871; the Infanta Beatrix, born March 21, 1874; and the Infanta Alix, born June 29, 1876.

CARMEN, Sylva. See ELIZABETH, QUEEN OF ROUMANIA.

CARNEGIE, Andrew, the "Iron King," an American manufacturer, was born at Dunfermline, Scotland, Nov. 25, 1835. His family removed to the United States in 1845 and settled at Pittsburgh, Pa., and two years later Andrew began his business career by attending a small stationary engine. This he soon left to become a telegraph messenger, and later he became an operator. While clerk of the superintendent of the telegraph lines of the Pennsylvania R. R. Co. at Pittsburgh, he aided in the adoption by that company of the Woodruff sleeping-car, and this gave him the nucleus of his present great fortune. He was made superintendent of the Pittsburgh division of the Pennsylvania road, and soon afterwards acquired an interest in some oil wells that proved very profitable. Subsequently he became associated with others in establishing a rolling-mill, which has grown to be the largest and most complete system of iron and steel industries in the world ever controlled by one individual. Besides directing these great enterprises, he is the owner of a number of English papers which are edited in the interests of radicalism. He has spent large sums of money for educational and charitable purposes. At his native place he erected, in 1879, commodious swimming baths for the use of the people, and in the following year gave it \$40,000 for a free library. He gave \$50,000 in 1884 to the Bellevue Hospital Medical College at New York for a histological laboratory. In 1885 he gave \$500,000 for a public library at Pittsburgh, and in 1886 \$250,000

for a music hall and library at Alleghany City, Pa. A large music hall is now (1890) being built in New York through his generosity. Edinburgh has also received \$250,000 from him for a free library; and other libraries have been established by him at Braddock, Pa., and elsewhere. His latest benefaction is the gift of \$50,000 for a public library at Ayr. He has frequently contributed to periodicals on the labour question and similar economic topics, and has published in book form "An American Four-in-Hand in Britain," 1883; "Round the World," 1884; and "Triumphant Democracy," 1886.

CARNOT, Marie François Sadi, President of the French Republic, was born at Limoges, in Aug. 1837. He is a grandson of Carnot, "the organiser of victory" under the French Convention, and is a civil engineer by profession. At the age of twenty he entered as a student the École Polytechnique, and passed with distinction to a school for special instruction in the building of roads and bridges. During the siege of Paris in 1871, he was appointed Prefect of the Seine Inférieure, and as Commissary-General gave valuable assistance in organising the defences of that department. In Feb., 1871, he took his seat in the National Assembly as deputy for Côte d'Or, and subsequently for Beaune. In 1886 he took office in the Brisson Cabinet as Finance Minister. On the resignation of M. Grévy, in Dec., 1887, M. Carnot was elected President of the Republic.

CAROLUS-DURAN, Emile Auguste, French painter, was born at Lille, July 4, 1838. He received his early art education at the Municipal School in his native town, and in 1855 went to Paris. He gained the Wicar travelling scholarship and went to Italy, and at Rome painted "La Prière du Soir," exhibited at the Salon in 1863. For "L'Assassiné," 1866, he was awarded his first medal. This picture was purchased by the Government for the Museum at Lille. M. Carolus-Duran resided for a year in Spain, and the influence of Velasquez is clearly seen in his St. Francis of Assisi, exhibited at the Paris Salon in 1868. But the fame of Carolus-Duran rests principally on his portraits, which are very numerous, and executed with a power and dash which are undeniable, whatever we may think of their refinement or grace. Among them may be mentioned that of Emile Girardin, those of his daughters, and the equestrian portrait of Mlle. Croizette, the well-

known actress. He is a Commander of the Legion of Honour, and of several foreign orders.

CARPENTER, Alfred, M.D., was born at Rothwell, Northamptonshire, May 28, 1825, educated at Moulton Grammar School, Lincolnshire, then at Northampton Infirmary, and thence he went to St. Thomas's Hospital. He was the successful competitor for the first scholarship given at that school, and at the end of his course gained the Treasurer's Gold Medal. He also held in succession the posts of Resident Accoucheur and House Surgeon, and was Assistant Medical Officer during Mr. Whitfield's absence. He took the M.R.C.S. and L.S.A. diplomas in 1851, and in 1852 became associated in practice with the late Dr. Westall, of Croydon, where he has since continued to reside. He graduated M.B. at the University of London in 1855, and M.D. in 1859, and became a member of the Royal College of Physicians in 1883. In 1859 he was appointed a member of the Croydon Local Board of Health, on which he continued to serve, acting occasionally as chairman, until his election as President of the Council of the British Medical Association in 1879. In 1870 he was appointed a magistrate for Surrey. In 1878 he was Orator of the Medical Society of London, and has been a member of various medical and sanitary societies. Dr. Carpenter was Examiner in Public Health in the University of London, and has been during the past six years an Examiner in Public Health for the University of Cambridge, and was a member of the Court of Examiners at the Apothecaries' Company for the usual term of years. In 1881 he was nominated a member of the Royal Commission appointed to inquire into the condition of the London Hospitals for small-pox and fever cases, and into the means of preventing the spread of infection. Among his literary productions are: "A History of Sanitary Progress in Croydon," 1856; "Hints on House Drainage," 1866; "Physiological and Mechanical Aspect of Sewage Irrigation;" "Alcoholic Drinks as Diet, as Medicines, and as Poisons;" "Influence of Sewer Gas on Public Health;" "Causation of Epidemic Disease;" "Address on Public Medicine," delivered before the British Medical Association at Sheffield in 1876; "The First Principles of Sanitary Work;" a paper on "Fogs and London Smoke," read before the Society of Arts in Nov. 1880; "Health at School;" and a series of articles on "School Surgery" in the *Practical Teacher*.

CARPENTER, Philip Herbert, M.A., D.Sc., F.R.S., fourth son of the late W. B. Carpenter, M.D., C.B., F.R.S., was born in London on Feb. 6, 1852; educated at University College School, University College, and Trinity College, Cambridge; elected scholar of the College in 1871, and graduated as B.A. in the first-class of the Natural Science Tripos of 1874, proceeding to the further degrees of M.A. in 1878, and D.Sc. in 1884; and studied at the University of Würzburg during 1875-77, and in the latter year was appointed Assistant Master at Eton College, being especially charged with the teaching of biology, which post he now holds. He was a member of the scientific staff of the deep sea exploring expeditions of H.M.'s.s. "Lightning" (1868) and "Porcupine" (1869-70); and in 1875 was appointed Assistant Naturalist in H.M.S. "Valorous," which accompanied Sir G. Nares' Arctic expedition to Disco Island, and spent the summer sounding and dredging in Davis Strait and the North Atlantic. He has devoted himself continuously since 1875 to studying the morphology of the Echinoderms, more especially of the Crinoids, both recent and fossil; in 1883 was awarded the Lyell Fund by the Geological Society of London in recognition of the value of his work; and in 1885 was elected a Fellow of the Royal Society. His chief publications are:—"Notes on Echinoderm Morphology," I.-XI., 1878-87; "On the Genus *Actinometra*," 1877; "Report upon the Crinoidea dredged by H.M.'s.s. 'Challenger,'" Part I., "The Stalked Crinoids," 1885; Part II., "The Comatulæ," 1888; "Report upon the Comatulæ dredged by the U.S. Coast Survey in the Caribbean Sea," 1890. Also, in conjunction with Mr. R. Etheridge, jun.:—"Catalogue of the Blastoidea in the Geological Department of the British Museum," 1886; likewise numerous smaller papers published in the Proceedings or Transactions of the Royal, Linnean, and Geological Societies.

CARPENTER, The Right Rev. William Boyd, D.D., D.C.L., Bishop of Ripon, born about 1841, was educated at St. Catharine's College, Cambridge (B.A. 1864, M.A. 1867). After holding various curacies he was, in 1870, appointed Vicar of St. James's, Holloway, where he remained until, in 1879, he became Vicar of Christ Church, Lancaster Gate, W. He was Select Preacher at Cambridge in 1875 and 1877; Hulsean Lecturer at Cambridge 1878; Honorary Chaplain to the Queen, 1878; Select Preacher at Oxford in 1882; Bampton Lecturer,

1887; and received from the University of Oxford an honorary D.C.L. in 1889. In 1882 he was appointed to a vacant canonry at Windsor. On the death of the late Dr. Bickersteth he was, in 1884, consecrated Bishop of Ripon. He presided over the Church Congress held at Wakefield in 1886; and in 1887 he was selected by the House of Commons to preach the Jubilee Sermon at St. Margaret's, Westminster. He is the author of "Thoughts on Prayer," "Narcissus," "Heart Healing," "The Witness of the Heart to Christ," "Truth in Tale," and "The Permanent Elements of Religion."

CARR, Joseph William Comyns, was born in 1849. In 1870 he matriculated at the London University, and afterwards passed in the honours division of the first examination for the degree of Bachelor of Laws. He became a student of the Inner Temple in 1869, and was called to the Bar in 1872, having gained a studentship in Roman and International Law at the Inns of Court. Mr. Comyns Carr then joined the Northern Circuit, but shortly afterwards ceased to practice at the Bar, and devoted himself to literature and journalism. From 1870 to 1880 he was a constant contributor to the principal literary reviews and magazines. Writing especially upon subjects connected with art, he held for some years the post of Art Critic on the *Pall Mall Gazette*, and in 1875 he accepted the English editorship of *L'Art*. He was also associated with Sir Coutts-Lindsay in the establishment of the Grosvenor Gallery, and has since remained one of the Directors of that Institution. His works on art include "Drawings by the Old Masters," 1877; "The Abbey Church of St. Albans," 1878; "Examples of Contemporary Art," 1878; "Essays on Art," "Art in Provincial France," 1883; and "Papers on Art," 1884. In recent years Mr. Carr has also written for the stage. In 1882 he produced a dramatised version of Mr. Hardy's novel "Far from the Madding Crowd;" and in 1884 he collaborated with the late Hugh Conway in the drama of "Called Back," founded upon the popular story of that name.

CARRODUS, John Tiplady, was born January 20, 1836, at Braithwaite, near Keighley, Yorkshire. At twelve years of age he went to study the violin with Bernhard Molique in Stuttgart, having received instruction before that from his father, a musical enthusiast, in Keighley. He remained with Molique in Germany, and later in London, until the year 1854.

His first important public appearance was in the Hanover Square Rooms, at a concert given by Charles Salaman in 1849. Subsequently his friends in Bradford strongly urged his claim to appear at the first Bradford Festival in 1853, and, backed by a testimonial obtained from Spohr, he played a solo conducted by Costa, after which he was engaged at the Royal Italian Opera, Philharmonic Concerts, and Charles Hallé's Manchester orchestra. Eventually he became leader of all three of these societies, and has played concertos at the Philharmonic, Crystal Palace, and other important musical societies, including leading the orchestra and playing violin solos at the Three Choir and Leeds Festivals. He has published some violin solos and studies. He has several sons, who all hold positions of distinction in the musical world.

CARRUTHERS, William, F.R.S., F.L.S., was born at Moffat, Scotland, in 1830, and educated at the Academy there, and afterwards at the University and New College, Edinburgh. He entered the British Museum as Assistant in the Department of Botany in 1859; and succeeded Mr. J. J. Bennett, as keeper of that Department, on his retirement in 1871. Mr. Carruthers has conducted many original investigations on living and fossil plants, and has published numerous memoirs on fossil botany in the journals and transactions of learned societies. He re-edited Lindley and Hutton's "Fossil Flora," and was afterwards engaged in preparing an account of the fossil plants of Britain, supplementary to that work.

CARTWRIGHT, Sir Richard John, K.C.M.G., Canadian statesman, was born at Kingston, Dec. 4, 1835. He was educated at his native city and at Trinity College, Dublin, and entered the Canadian Parliament as a Conservative in 1863, but in 1870 left that party, and has since been one of the Liberal leaders of the Dominion. In 1873 he was made Minister of Finance in the Mackenzie Government, an office he retained until the general defeat of the Liberals in 1878. Since that time he has held no office other than his membership in Parliament. In 1879 he was created a Knight Commander of the Order of St. Michael and St. George.

CARVALHO. See MIOLAN-CARVALHO, MADAME, M. C.

CASATI, Gaetano, is the son of a doctor at Monza, where he was born in 1838.

He studied at Monza, Milan, and Pavia, devoting himself more especially to mathematics. When one-and-twenty, inspired by the youthful ardour of those days for the independence of Italy, he became a soldier in Piedmont, joining the corps of Bersagliere. He obtained advancement, and in 1867 was elevated to the rank of captain. But service in the army did not offer him sufficient scope for his energy. He set his mind on becoming an African explorer, and to this end gave in his resignation in 1879. Regarded as a man of great promise and capacity, he was commissioned by the Società d'Esplorazione Commerciale d'Africa to proceed to that country at their expense, and he sailed from Genoa on Dec. 24, 1879. He went by way of Suakin and Berber to Khartoum, where he arrived about the middle of May, 1880, his immediate object being to reach the Bahr-el-Gazelle, and there see his fellow-countryman, Gessi Pacha, then governor of that particular region. In this he succeeded, and the meeting of the two was of a touching character. Gessi soon afterwards nursed Casati through a dangerous fever, paying him the most devoted attention, and refusing to leave him until he was thoroughly restored to health. Then, however, Gessi moved on to Khartoum, intending to return to Europe, though he got no further than Suez, where he died. After Gessi's departure Casati had another severe attack of fever, this time of prolonged duration, but he was able on Oct. 14, 1880, to proceed to Rumbeek. After this nothing was heard about him by his friends until a letter reached them from Tangasi, dated Dec. 29, 1881, stating that he had been kept a prisoner by a certain chief, Azanga by name, and had only succeeded in making his escape on the 7th of that month. Getting on the march again in 1881, Casati made his way to the Niam-Niam territory, which lies immediately to the west of what was once Emin Pacha's province, and has since been visited and described by George Schweinfurth. In a letter dated April 13, 1883, Casati describes his cordial reception by Emin Pacha at Lado, where he saw also Junker, the Russian explorer. Emin Pacha, he says, treated him with "rare liberality and generosity." At that time, however, the Mahdí was assuming a very threatening attitude, and thus the three Europeans found themselves "united but shut in" in this extreme corner of the Egyptian possessions. Two expeditions were organized to effect their rescue, one conducted by Dr. Fischer, which got as far as the east of Victoria Nyanza, and

then had to return for the want of the requisite goods for barter; and the other led by Dr. Lenz, who proceeded by way of the Congo, but also was obliged to abandon his attempt, leaving, as we all know, the real honours of the rescue to be obtained by Stanley. At the request of Emin Pacha he went to live as "resident" in the territory of King Kabba Rega, son of M'tesa, of Unyoro. In this capacity part of his duty was to play the rôle of Emin's postmaster. Emin forwarded to him all his correspondence for Europe, and he had to devise the means as best he could by which it was to be sent to the coast. At first Casati was well treated by the king; but, after the lapse of about twenty months, Kabba Rega changed his humour, and condemned him to death, together with an Arab merchant named Biri, who, Casati heard, was actually killed. Casati, however, though at first tied with cords round his neck, arms, and legs, managed to escape with some of his men. Chased from place to place he got over sufficient ground during the night to reach at last the Albert Nyanza, where lay his sole hope of safety, though even there he ran the risk of being caught by a certain chief in that region who, as he heard, had received orders from the king to capture and murder him. Happily they found a boat, in which one of the men went off to tell Emin Pacha what had happened. Two days afterwards Emin Pacha arrived in his steamer, and rescued Casati from his perilous situation. It was high time. For three days Casati had not had a morsel of food to eat. "I am now in safety, it is true," wrote he from the Albert Nyanza on March 25, 1888, "but I am oppressed with grief at the loss of all my notes. The work of so many years has vanished like smoke!" But Casati had previously sent home sufficient information to show that he had already done valuable service to the cause of African exploration.

CASELLI, Giovanni, an Italian electrician, born in 1815. He received the elements of his knowledge of physics from Leopoldo Nobili, whose biography he published in 1837. In 1836 he became a deacon in the Romish Church, and subsequently an Abbé; but having been banished from Parma for participating in the political disturbances of 1848, he retired to Florence, and devoted himself to the study of electricity. In 1856 he made the important invention of autographic telegraphy. He has also made discoveries in the use of electricity as a motive power.

CASHEL, Bishop of, *See* DAY, THE RIGHT REV. MAURICE FITZGERALD.

CASSAGNAC, Granier de. *See* GRANIER DE CASSAGNAC, PAUL DE.

CASTELAR, Emilio, a Spanish statesman, and one of the most eloquent orators of the day, born in 1832, became notorious, early in his career, in consequence of his extreme democratic and socialistic opinions, which he expounded in various Liberal journals. For a time he was Professor of History and Philosophy in the University of Madrid, and in 1866 he took a leading part in the revolutionary movement, which was put down by Serrano. On this occasion he was condemned to death, but he made good his escape, and sought refuge first at Geneva and afterwards in France. When the revolution broke out in Sept. 1868, he returned to his native country, and was one of the most energetic leaders of the republican movement. He exerted himself to the utmost in order to bring about the establishment of a republic, but at the general election for the Constituent Cortes in Feb. 1869, the republicans succeeded in returning only a small proportion of their candidates, among whom, however, was Señor Castelar. In the discussions respecting the new constitution of Spain, Señor Castelar advocated, but unsuccessfully, the principle of republican institutions. In June, 1869, he vigorously opposed the project of a regency, and he was also concerned in the republican insurrections which occurred in October of that year. In the government chosen by the Cortes after the abdication of King Amadeo, Señor Castelar was Minister of Foreign Affairs. On Aug. 24, 1873, he was elected President of the Cortes by 135 votes against 73, but he vacated that post on Sept. 6, when he was nominated President of the Executive Power. His first measure was the prorogation of the Cortes and the assumption of dictatorial power. He next took energetic, but ineffectual, measures to suppress the Carlist insurrection, and despatched the Minister of War in person to Cuba to protect Spanish interests in that island. When, however, the Cortes re-assembled on Jan. 2, 1874, it refused by 120 votes against 100, to pass a vote of confidence in President Castelar, who resigned. Thereupon General Pavia, as Captain-General of Madrid, forcibly dissolved the Cortes, and appointed a provisional government with Marshal Serrano at its head. Soon after the *pronunciamiento* in favour of Alfonso XII., Señor Castelar quitted Madrid and proceeded to Geneva, Jan., 1875. While

in that city, being disgusted at the educational decree promulgated by the Spanish Government, he resigned the Chair of History in the University of Madrid, March 6, 1875. Subsequently he returned to Spain, and succeeded, though not without considerable difficulty, in obtaining a seat in the Cortes, as Deputy for Madrid, at the elections of Jan., 1876. Since that time he has spoken frequently, and always with effect; but he has been a politician without a party, too advanced for Sagasta, and too moderate for the Zorrillists. He was elected a member of the Spanish Academy in 1871, but he did not deliver his reception speech till April 25, 1880. Señor Castelar has written "Ernesto, novela original de costumbres," 1855; "Lucano, su Vida, su Genio, su Poema," 1857; "Legendas Populares," 1857; "Ideas Democráticas," 1858; "La Civilización en los cinco primeros siglos del Cristianismo. Lecciones pronunciadas en el Ateneo de Madrid," 2 vols., 1858-59; "Crónica de la Guerra de Africa," 1859; "La Redención del Esclavo," 1859; "Colección de los principales artículos políticos y literarios," 1859; "Cartas á un Obispo sobre la Libertad de la Iglesia," printed in "Biblioteca de Democracia," 1864; "Discurso pronunciado en la noche del 13 de Noviembre de 1868, con motivo de instalarse el Comité Republicano de Madrid," 1868; "Discursos Parlamentarios, en la Asamblea Constituyente," 3 vols., 1871; "Roma vieja y nueva Italia," translated into English by Mrs. Arthur Arnold, under the title of "Old Rome and New Italy," 1873; "Semblanzas contemporáneas de los personajes mas celebres del mundo en las Letras, las Ciencias y las Artes," "Vida de Lord Byron;" and "Historia de un Corazon," a romance.

CASTLETOWN, (Lord) Bernard E. B. FitzPatrick, 2nd Baron Castletown, of Upper Ossory, was born in 1848, and educated at Eton and Oxford. He went through the Franco-Prussian campaign as assistant under the Red Cross Society, and was present in Paris during the earlier days of the Commune. From 1871-75 he served in the first Life Guards, and was with the Household Cavalry in the Egyptian campaign of 1882, gaining the medal and clasp after Tel-el-Kebir. He has travelled extensively in Lapland, the little known parts of Asia Minor, the Rocky Mountains, and British North America. He sat in Parliament for three years as Conservative member for Portlinton, and took a prominent part in the discussion of Irish questions. Since his accession to the House of Lords his

political attitude has always been that of a "Moderate." In 1885 he was appointed Chairman of the Barrow Drainage Royal Commission, and he is a D.L. and J.P. for Queen's Co., Ireland. He married in 1875 the Hon. Clare St. Leger, only child of Viscount Doneraile.

CATES, Arthur, F.R.I.B.A., F.S.I., &c., architect, born in London, April 29, 1829, was educated at King's College School, and became the pupil of Sydney Smirke, R.A. In 1870 he succeeded Sir James Pennethorne as Architect to the Land Revenues of the Crown in London, under the Commissioners of Her Majesty's Woods and Forests. He is Surveyor to the Honourable Society of the Inner Temple, and holds other appointments. For some years he was Hon. Sec. to, and is now member of, the Council of the Society of Biblical Archæology. He is Hon. Sec. to the Architectural Publication Society ("The Dictionary of Architecture"), and, since 1887, he has been a Vice-President of the Royal Institute of British Architects.

CAVE, The Hon. Sir Lewis William, was born July 3, 1832, at Desborough, in Northamptonshire (where his father owned a small estate), and was educated at Rugby, under Dr. Tait. In 1851 he was elected to an Exhibition at Lincoln College, Oxford, and took his B.A. degree in 1855, having been placed in the 2nd class classics in the final examination. In 1856 he was admitted as a student at the Inner Temple, and in June 1859 was called to the Bar. In the following year he joined the Midland circuit, and subsequently left it to join the new North-Eastern circuit. Mr. Cave was appointed a revising barrister in 1865, and held the office until he obtained a silk gown in 1875. In 1873 he was appointed Recorder of Lincoln. Mr. Cave was elected a Benchler of his Inn in 1877, and in the same year was made a Commissioner of Assize for the autumn circuit. In 1880 he was appointed a Commissioner to inquire into the Parliamentary elections at Oxford. In March, 1881, Mr. Cave was appointed one of the Justices of the High Court, and in April received the honour of knighthood, together with Mr. Justice Mathew. In Dec. 1883, Mr. Justice Cave was appointed Judge in Bankruptcy, in which position he had to administer the new Bankruptcy Act which came into operation on Jan. 1, 1884. Mr. Justice Cave has edited several law books. From 1861 to 1865, in conjunction with the Hon. E. Chandos Leigh, Q.C., he edited the "Reports of

the Court for the Consideration of Crown Cases Reserved." In 1861 Mr. Cave, in conjunction with Mr. Bell, edited the seventh edition of Stone's "Practice of Petty Sessions." In 1869 he edited the sixth edition, and in 1875 the seventh edition of Addison's "Treatise of the Law of Contracts," and in 1879 he edited the fifth edition of the same author's "Law of Torts."

CAYLEY, Professor Arthur, F.R.S., Ph.D., Sc.D., D.C.L., LL.D., son of the late Henry Cayley, Russian merchant, of a Yorkshire family, was born at Richmond, Surrey, on Aug. 16, 1821, and educated at King's College, London, and Trinity College, Cambridge, where he graduated B.A., in 1842, as Senior Wrangler and first Smith's prizeman. He was elected Fellow of his College, was called to the Bar at Lincoln's Inn in 1849, and for some years practised as a conveyancer. In 1863, on the institution of the professorship, he was elected Sadlerian Professor of pure mathematics in the University of Cambridge. He was elected an Honorary Fellow of Trinity College, Cambridge, and in 1875 was re-elected to a Foundation Fellowship. He is a correspondent of the French Institute in the section of Astronomy, and is an honorary member, associate, or correspondent of the Academies of Berlin, Vienna, Rome and many others. Hereceived the degree of D.C.L., from the University of Oxford in 1864, and that of LL.D. from the University of Dublin in 1865, and from the University of Edinburgh in 1884. He has also received the degree of Ph.D. from the Universities of Göttingen, Leyden, and Bologna, and in 1888, the degree of Sc.D. was conferred upon him by his own University. He is a past President of the Royal Astronomical, the London Mathematical and the Cambridge Philosophical Societies, and was President of the British Association at the meeting at Southport in 1883. He has received the Royal and Copley medals of the Royal Society, the De Morgan medal of the London Mathematical Society, and the Huyghens medal (Leyden). His mathematical memoirs, exceeding 800 in number, which were originally published in English and Foreign mathematical journals and Transactions, are now in course of publication by the University of Cambridge in ten volumes quarto, under his own editorship. Two volumes are already issued (1890). He is also the author of a treatise on Elliptic Functions. His writings relate to every branch of pure mathematics, besides dynamics and

astronomy. He gave, in the first half of the year 1882, a course of mathematical lectures at the John Hopkins University, Baltimore. For some years he has been a member of the Council of the Senate of the University of Cambridge, and of the Press Syndicate. He is also the chairman of the Association for promoting the higher education of women (to which Newnham College belongs). In the present year (1890) the distinction of officer of the Legion of Honour has been conferred upon him by the President of the French Republic.

Cecil, Arthur, *See* BLUNT, ARTHUR
CECIL.

Cecil, Lord Eustace Brownlow Henry, second surviving son of the second Marquis of Salisbury, by his first wife, was born in London, in 1834, and educated at Harrow and Sandhurst. He entered the Army in 1851, served in the Crimea, and retired as Captain and Lieutenant-Colonel, Coldstream Guards, in 1868. He represented South Essex in the House of Commons in the Conservative interest from July, 1865, to December, 1868, and West Essex from 1868 until 1885. In February, 1875, he was appointed Surveyor-General of Ordnance, which post he retained until the resignation of his party in 1880. Lord Eustace Cecil is the author of "Impressions of Life at Home and Abroad," 1865. He is a magistrate for Middlesex, Essex, and Dorset, and a county alderman of Dorset.

CERRITO, Francesca. *See* ST. LÉON,
MDME.

CESNOLA, Count, Luigi Palma di, LL.D., was born at Rivarolo, near Turin, Italy, June 29, 1832. He received a collegiate education, after which he was placed in a seminary with a view to his entering the priesthood. Preferring, however, a more active life, he left the seminary to enter the Sardinian Army on the outbreak of the war with Austria in 1848. In Feb. 1849, he was promoted to a Lieutenantancy on the battlefield for bravery. On the close of the war, he was ordered to the Royal Military Academy at Cherasco (near Turin), from which he graduated in 1851. After serving in the army several years, he went to New York in 1860, and, in 1861, was made a Lieutenant-Colonel in the volunteer service of the U.S. army, and subsequently a Colonel. At the close of the civil war, he was appointed American Consul at Cyprus, where he remained until the consulate was abolished (1865-1877). It was while

he occupied that position that he made the discovery of antiquities with which his name is now associated. He has been made an honorary member of many scientific and literary societies, both in Europe and in America, and the kings of Italy and Bavaria have bestowed knightly orders upon him. Both Columbia and Princeton Colleges conferred on him the degree of LL.D. In 1873 the Metropolitan Museum of Art in New York secured by purchase the Cypriote antiquities collected up to that date, and Cesnola was granted an extended leave of absence to visit New York and arrange and classify them. Returning to Cyprus in 1873, he made further discoveries and collections, which also were secured to the Metropolitan Museum. In 1877 he settled permanently in New York. In 1878 he was made a Trustee of the Museum, and Secretary of the Board of Trustees. In 1879, when the museum was removed to Central Park, he was appointed Director of it. He published a narrative of the discoveries and excavations in 1878 under the title of "Cyprus: its ancient cities, tombs, and temples;" and in 1882 a description of the "Metropolitan Museum of Art." He is now, 1890, publishing the second volume of the "Atlas of the Cesnola Collection," under the auspices of the museum.

CHADWICK, David, was born at Macclesfield, Dec. 23, 1821. He was educated at Manchester, and in 1843 began business as a professional accountant. In 1844 he was appointed Treasurer to the Corporation of Salford, and retained that office till 1860. He took an active part in the establishment of the Salford Royal Free Library and Museum, Peel Park, and of the Salford Working Men's College, and was the first treasurer of both institutions. He was Honorary Secretary and afterwards President of the Manchester Statistical Society, and was the first President of the Manchester Institute of Accountants, and is now a member of the Council of the Institute of Chartered Accountants. He was elected M.P. for Macclesfield in 1868, and was re-elected in 1874. In 1880 he was again returned for the same constituency, but on petition the election was declared void. He introduced into Parliament and carried through the Commons, and through the Second Reading in the Lords a bill for the amendment of the Joint Stock Companies Acts with compulsory forms of Balance Sheet and Profit and Loss Statements. He was some time a member of the Council of the London Statistical Society, and wrote a

history of the rate of wages in Lancashire in 200 trades for twenty years. He is the author of various essays on Parliamentary Representation, Working Men's Colleges, Poor Rates and Principle of Rating, Water Meters, Financial Aspect of Sanitary Reform, the Equitable Adjustment of the Income-Tax, Profit-Sharing, and Joint Stock Companies. He is a prize essayist and Associate of the Institute of Civil Engineers. He erected the Macclesfield Free Library, and presented it to the Corporation, is a Governor, and one of the three Trustees of the Estate and Pictures of the Royal Holloway College at Egham, Surrey. He married, first, Louisa, youngest daughter of William Bow, Esq., and, second, Ursula, eldest daughter of Thomas Sopwith, Esq., M.A. C.E., F.R.S., of Newcastle-on-Tyne and Westminster.

CHAFFERS, William, was born Sept. 28, 1811, in Watling Street, London, was educated at Margate, and at Merchant Taylors' Classical School, under the old régime; Dr. Bellamy being head master. During the extensive excavations for the main Sewerage of the City, and digging the foundation of the Royal Exchange, he formed a large Collection of Roman and Mediæval Antiquities; and in 1843 he was elected a Fellow of the Royal Society of Antiquaries. In 1857 he assisted in the selection of Works of Art for the National Loan Exhibition at Manchester. In 1862 he assisted in making Selections of Antique Plate for the Loan Exhibition at the South Kensington Museum and wrote descriptive notices of these and other portions for the catalogue published by the Science and Art Department. In 1868-9 he was Superintendent of the Museum of Art at the National Exhibition held at Leeds; in 1872 Superintendent of the Exhibition of Works of Art held in Dublin, and in 1876 Manager and General Superintendent of Exhibition of Works of Art at Wrexham; and of various others subsequently. In 1890 he was General Manager of the Exhibition of Pottery, Porcelain, &c., at Hanley, Staffordshire. Mr. Chaffers is the author of the following publications:—1863, "Marks and Monograms on Pottery and Porcelain," 7th Edition, 1887; "Hall Marks on Plate," Illustrated with tables of Date letters, 6th Edition, 1886; 1865, "Hand-book of Marks and Monograms on Pottery and Porcelain." Ninth Thousand, 1889; "The Ceramic Gallery of Pottery and Porcelain" with numerous illustrations, 2 vols.; 1887, "Gilda Aurifabrorum," a History of Goldsmiths and their marks on Plate

In addition to the above Standard Works, he has published numerous papers and correspondences on Art and Antiquity in the *Archæologia*, *Art Journal*, and in the journals of the Archæological Association, and other kindred societies.

CHAILLU, Paul Du. See DU CHAILLU, PAUL.

CHALLEMEL-LACOUR, Paul Armand, a French Senator, born at Avranches (Manche), May 19, 1827, studied at Paris in the Lycée of Saint Louis, entered the Normal School in 1846, and was first in the competition for graduation in philosophy in 1849. He was sent as Professor of Philosophy to the Lycées of Pau and Limoges. Arrested and imprisoned after the *coup d'état*, and then banished from France, he withdrew to Belgium, where he delivered lectures with success, and next to Switzerland, where he was appointed Professor of French Literature in the "Polytechnicon" of Zurich. After the amnesty he returned to his native country (1859), and contributed articles on literature, art, and philosophy to the *Temps*, the *Revue Nationale*, the *Revue des Cours Scientifiques et Littéraires*, the *Revue Moderne*, of which he became manager, and the *Revue des Deux Mondes*. In 1868 he established, in conjunction with Messieurs Brisson, Allain-Targé, and Gambetta, the *Revue Politique*, of which he undertook the management, and consequently underwent a conviction for publishing the lists of subscriptions for a monument to the representative Baudin. Appointed Prefect of the Rhône after Sept. 4, 1870, he was called upon to administer the affairs of the turbulent city of Lyons in circumstances of extreme difficulty. It is true that he did not succeed in preventing excesses there, but it is urged on his behalf that his authority was counterbalanced and held in check by the Committee of Public Safety. He resigned this office Feb. 5, 1871, and on Jan. 7, 1872, he was elected Deputy in the Radical interest for the Bouches-du-Rhône. In the Chamber he distinguished himself by his eloquence and his readiness and calmness in debate. On Jan. 30, 1876, he was elected a Senator by the department of the Bouches-du-Rhône. M. Challemeil-Lacour was mixed up at about the same period in two important law-suits. One of these was brought by the Brothers of Christian Doctrine of the commune of Caluire, in the Department of the Rhône, whose establishment had been occupied by troops during the war. After prolonged arguments, and notwithstanding a ministerial decree of April 10,

1878, which declared that the Prefect had acted in the name of the State, the Court of Cassation sent back the case to the Court of Dijon, which, on Jan. 30, 1879, condemned M. Challemeil-Lacour and his associates in 97,243 francs damages. The second action was brought by M. Challemeil-Lacour against *La France Nouvelle*, a Legitimist journal, which had charged him with cheating at play in a club, and the defendants were condemned, on Jan. 6, 1879, to pay a fine of 2000 francs and 10,000 francs costs. A few days afterwards (Jan. 14) he was sent to Berne as ambassador to the Swiss Confederation. On June 11, 1880, he was nominated ambassador to the Court of St. James's, in succession to M. Léon Say. On his appointment being made known in this country, an angry debate took place in the House of Commons, got up by Mr. O'Donnell, as to M. Challemeil-Lacour's antecedents. Mr. O'Donnell was, however, defeated by 245 votes against 149. M. Challemeil-Lacour continued to be Ambassador in London till Feb. 1882, when he was recalled at his own request. In the Cabinet formed by M. Jules Ferry in Feb. 1883, M. Challemeil-Lacour held the portfolio of Foreign Affairs. M. Challemeil-Lacour was one of the founders, and is chief editor, of the *République Française*. He has published "*La Philosophie Individualiste*," an essay on Humboldt, in the "*Bibliothèque de Philosophie Contemporaine*," 1864; a translation of Ritter's "*History of Philosophy*," with an introduction, 3 vols., 1861; and he edited the works of Madame d'Épinay, 2 vols., 1869.

CHAMBERLAIN, The Rt. Hon. Joseph, M.P., P.C., eldest son of the late Mr. Joseph Chamberlain, a member of one of the City Companies, was born in London in 1836. His mother was Caroline, daughter of Mr. Henry Harben. He was educated at University College School, and afterwards became a member of a firm of wood-screw makers at Birmingham (Nettlefold & Chamberlain), which his father had joined in 1854. He retired from business in 1874, shortly after the decease of his father. Mr. Chamberlain had at this time obtained a certain local celebrity in consequence of his advanced Radical opinions and the fluency of speech with which he expressed them in one of the Birmingham debating societies. In 1868 he was appointed Chairman of the first Executive Committee of the Education League, and in November of the same year a member of the Birmingham Town Council. In 1873 he became Chairman of the Birmingham School Board, of which

he was first elected a member in 1870. Mr. Chamberlain is also an Alderman of Birmingham, and was three times successively elected Mayor of the Borough (1874-75-76). His name was first brought before the public in Feb., 1874, when he came forward at the general election to oppose Mr. Roebuck at Sheffield. He was not successful, the numbers polled being 14,193 for Roebuck, 12,858 for Mundella, and 11,053 for Chamberlain. In June, 1876, he was returned for Birmingham, to fill up the vacancy occasioned by Mr. Dixon's retirement from Parliamentary life. In the House of Commons Mr. Chamberlain chiefly attracted notice by his advocacy of the Gothenburg system of licensing places where intoxicating liquors are sold. He is in favour of disestablishment and of compulsory secular education. At the general election of April, 1880, he was returned with Mr. Muntz and Mr. Bright for Birmingham, the three Liberals gaining a large majority over the Conservative candidates, Major F. Burnaby and the Hon. A. G. C. Calthorpe. On the formation of Mr. Gladstone's Administration immediately after that election, Mr. Chamberlain was nominated President of the Board of Trade, with a seat in the Cabinet. As such he prepared and passed the Bankruptcy Act which is now in force, and attempted, but in vain, to pass a strong Merchant Shipping Bill. During this Administration Mr. Chamberlain continued to be a prominent member of the Radical party; and at the general election of Nov., 1885, he was generally regarded as the leader of the "advanced wing." But after the formation of Mr. Gladstone's Cabinet of 1886 (in which he held the post of President of the Local Government Board), he found himself obliged to resign from inability to agree with the Prime Minister's Home Rule policy. At the general election of 1886, when he was returned unopposed for West Birmingham, he stood as a strong Unionist, and withdrew from connection with the Gladstone party. In 1887 he went to the United States as Chairman of a Fisheries Commission, and signed a Treaty in 1888. He went again to the States in the autumn of that year, and married Miss Endicott on Nov. 15.

CHAMBERLAIN, General, Sir Neville Bowles, G.C.B., G.C.S.I., the second son of the late Sir Henry Chamberlain, Bart. (who was for some years Consul-General and Chargé d'Affaires in Brazil), born at Rio, Jan. 18, 1820, was appointed to the Indian Army in 1836. He served as a subaltern with much distinction in Afghanistan and

Scinde, and was wounded at Kandahar and at Ghuznee. In 1842 he was attached to the Governor-General's body-guards, and in 1843 appointed Deputy-Assistant Quarter-Master-General to the Army. In 1848 he was nominated by Lord Dalhousie one of his aides-de-camp, and commanded the 8th Irregular Cavalry, attached to the army in the Punjab. In 1855, having previously discharged some important civil duties as military secretary to the Chief Commissioner (Sir John Lawrence), he was placed in command of a force of irregular troops, which he retained until the breaking out of the Indian Mutiny. On the death of Col. Chester before Delhi, Col. Chamberlain (then brigadier-general) succeeded to the post of Adjutant-General of the Bengal Army, and was severely wounded in the sortie of July 18. He was nominated a C.B. in 1857, and in reward for his services in the Mutiny, was appointed aide-de-camp to the Queen. He afterwards gained distinction by his services against the hill-tribes, and has been wounded more frequently than any other officer of his years and standing in the service. He was advanced to the rank of Lieutenant-General in May, 1872; appointed Colonel of the Bengal Infantry in May, 1874; a member of Council of the Governor of Madras in 1875; and Commander-in-Chief of the Madras Army in Dec., 1875. In Aug., 1878, he was appointed the head of the English special mission to Cabul. This mission was abruptly stopped by the refusal of the Ameer of Afghanistan's officer at Ali Musjid to permit it to advance (Sept. 21). He was created General in 1877; and rose to be Commander-in-Chief of the Army of Madras, 1881. He retired in 1886.

CHAMBERS, Sir Thomas, Q.C., M.P., born at Hertford in 1814, was educated at Clare Hall, Cambridge, and was called to the Bar at the Middle Temple in 1840. He represented the borough of Hertford in the House of Commons from July, 1852, to July, 1857. In the latter year he was elected Common Serjeant of London, and in 1861 he was appointed one of Her Majesty's Counsel. In 1865 he was elected one of the members for Marylebone, which borough he continued to represent in the Liberal interest until 1885. In Parliament his name has been principally identified with proposals to subject convents to periodical inspection by paid officials of the State, and with a measure for legalising marriage with a deceased wife's sister. He was knighted for his judicial services in 1872, and elected Recorder of London, Feb. 5, 1878,

in the room of Mr. Russell Gurney resigned.

CHAMPNEYS, Basil, architect, son of the late Dean of Lichfield, was born in 1842, and educated at Charterhouse, being elected Foundation Scholar and Gold Medallist in 1860, and at Trinity College, Cambridge, where he graduated in classical honours in 1864. He studied architecture under the late John Pritchard, diocesan architect of Llandaff, and began practice in 1867. Amongst other works he has designed the following public buildings:—at Cambridge, the Divinity and Literary Schools, the Old Hall, Sidgwick Hall, Clough Hall, and other buildings of Newnham College, the Archæological Museum, and All Saints' Memorial; at Oxford, the Indian Institute, the new buildings at New College, Lady Margaret Hall and Mansfield College; at Bedford, the Girls' Schools and new Grammar School buildings for the Harpur Trust; at Harrow, the new school buildings and Butler Museum; and the Women's Fawcett Memorial on the Thames Embankment. He has designed the following churches:—St. Luke's, Kentish Town; St. Peter-le-Bailey, Oxford; St. Mary Star of the Sea, Hastings; Havering-atte-Bowe in Essex; Matfield in Kent; Glascote in Warwickshire; Stonefold and Laneside in Lancashire. Mr. Champneys has carried out the restoration of Tatenhill, Tamworth, Wednesbury, and Alrewas in Staffordshire; Bexley in Kent; Upholland in Lancashire; Chilcote in Derbyshire; Okewood in Surrey; St. Dunstan's, Stepney; St. Bride's, Fleet Street; and St. Alphege, Greenwich, in the London district; and is also the designer of the Palace Avenue Hotel in Kensington. Mr. Champneys is the author of a work entitled, "A Quiet Corner of England," published in 1875.

CHANDLER, Charles Frederick, M.D., Ph.D., LL.D., American Chemist, born at Lancaster, Massachusetts, Dec. 6, 1836, studied at the Lawrence Scientific School of Harvard College, and afterwards at the Universities of Göttingen and Berlin, receiving his degree of Ph.D. at Göttingen in 1856. In 1857 he was placed in charge of the chemical department of Union College, and in 1858 was appointed to the Chair of Chemistry in the New York College of Pharmacy. In 1864 he was made Professor of Analytical and Applied Chemistry in the newly instituted School of Mines connected with Columbia College, New York, and on the reorganization of the school in 1877 became Pro-

fessor of Chemistry both in the school and in the college. In 1865 he was appointed chemist to the New York Metropolitan Board of Health, of which for a number of years he was President. In 1870, in connection with his brother, he established the *American Chemist*, a monthly periodical, in which the results of his principal investigations have appeared, but which was discontinued in 1877. He became connected with the New York College of Physicians and Surgeons in 1872, as Adjunct Professor of Chemistry and Medical Jurisprudence, succeeding to the full Professorship in 1876. The degree of M.D. was conferred upon him by the University of the City of New York in 1873 and that of LL.D. by Union College in the same year. He is a member of the Chemical Societies of London, Berlin, Paris and New York, of the National Academy of Sciences and of a large number of other Scientific Associations. While a member of the Board of Health, Dr. Chandler did much to improve the sanitary condition of New York by establishing a rigid inspection of milk and food supplied, by securing the passage of the Tenement House Act, by regulating the location of Slaughterhouses and in numerous other ways. He has published "The Inaugural Dissertation," 1856; "Report on Water for Locomotives," 1865; "Examination of Various Rocks and Minerals," which appeared in the geological reports of Iowa and Wisconsin; "Investigations on Mineral Waters," and papers on the water supply of cities, on petroleum, on the purification of coal-gas; and has also contributed numerous scientific articles to Johnson's "Universal Cyclopædia," 1874-77.

CHANÉY, Henry James, F.R.A.S., born at Windsor in 1842, was educated at a private school, entered the civil service in 1859, was appointed in 1860 to the Exchequer to take charge of the technical duties arising under the Sale of Gas Act, 1859, became Secretary to the Royal Commissions on Standards, 1867-8, and, on the retirement in 1876 of the Warden of the Standards, he was appointed Superintendent, Standards Department, in the Board of Trade. He has been a member of various committees relating to units and standards of measurement; and represented Great Britain in Paris in 1889 at the General Conference of the International Committee of Weights and Measures. He is identified with improvements in the local administration of the laws relating to the weights and measures used in trade, and with recent demands for higher accuracy in weighing

and measuring instruments used for scientific and manufacturing purposes. His printed papers, issued under the direction of the Board of Trade, include "Reports on Standards of Measurement for Gas;" "Verification of Standards for the Governments of India and Russia," 1877; "Screw Gauges," 1881-3; "Apothecaries' Weights and Measures," 1881; "Calculations of Densities and Expansions," 1883; "On the Prevention of Fraud in the Sale of Coal and of Bread;" "Expansion of Palladium;" "Re-comparison of the Imperial and Metric Units," 1883; "Verification of the new Parliamentary Standards of Length and Weight," 1881-3; "Mode of Testing weighing-machines," 1886; "Note on the Gold Coinage," 1886; "Re-determination of the Scientific Unit of Volume," 1889.

CHANLER, Mrs. Amélie, née Rives, an American writer, was born at Richmond, Va. in 1863. She was educated chiefly at the home of her grandfather, William C. Rives, Castle Hill, Albemarle co., Va., and early showed a taste for literature. Her first published story was "A Brother to Dragons," and appeared in the *Atlantic* in 1886. This was followed by "Farrier Lass of Piping Pebworth," "Nurse Crumpey's Story," "Story of Arnon," and "Virginia of Virginia." In 1888 her "Quick or the Dead," was issued, and it at once attracted wide attention, and proved one of the literary sensations of the year. Two other productions by her have appeared since: a five-act Syrian tragedy entitled "Herod and Mariamne," and a novel "The Witness of the Sun." Miss Rives was married, in June, 1888, to John Armstrong Chanler of New York, a great-grandson of the late William B. Astor, and has spent the principal part of her time since then in England and on the continent of Europe.

CHANT, Mrs. Laura Ormiston (née Dibbin), was born October 9, 1848, at Chepstow, Monmouthshire. Her father was a civil engineer, and at the time of this, his second daughter's birth, was engaged in the difficult task of building a tubular railway bridge over the river Wye. When she was nearly five her parents removed to London. At fifteen Laura became a Sunday-school teacher, and carried on that work in different parts of England with little intermission till she was twenty-two. For five or six years she taught in three ladies' schools, and then entered a hospital as nurse. After a year as probationer, she became Sister in the largest hospital in Great

Britain, the London Hospital in White-chapel, where she met her future husband, and decided to abandon nursing for the study of medicine. Her lover entered heart and soul into the project; but lack of money for what was then an extremely costly and difficult undertaking, owing to the powerful opposition of the medical schools to women entering the profession, prevented her from qualifying before marriage; and afterward the need of her services as a public speaker and worker in philanthropy soon closed the door of ambition on medicine. "But the study and experience as a nurse, together with the experience gained as assistant manager of a lunatic asylum, has been of such incalculable value," writes Mrs. Chant, "both to myself, my husband as a professional man, and my household, that I am certain the serious study of the laws of health should form a prominent item in the education of every young man and woman." Mrs. Chant's first public address was on the position of "Women in the Nineteenth Century," advocating the franchise for them on the same terms as for men, as the only permanent means of redressing the wrongs that have been done them. Then the temperance platform claimed her; and then that of social purity. Perhaps the best idea of Mrs. Chant's varied channels of interest and labour may be gained from the fact that she is on the executive committee of the Women's Liberal Federation of England, of which Mrs. Gladstone is president; on that of the National Society for Promoting Woman Suffrage; is vice-president of one or two Liberal associations; one of the four vice-presidents of the Peace Society; a member of the council of the National Vigilance Association of Great Britain and Ireland; an ardent advocate of physical training and gymnasiums, on which subject she has written and lectured—Mélio's work on gymnastics having an introduction by her. She is the authoress of two beautiful sermons, "The Spiritual Life" and "Signs of the Times," and one volume of poems entitled, "Verona," and is about to bring out another. But beyond all this is her personal work for individuals. Her house is indeed a refuge for the destitute, and a place where broken lives and hearts get mended under the influence of loving care. The criminal and the outcast, the giddy and the stupid, the lonely, the poor, are seldom out of her home circle.

CHAPLEAU, The Hon. Joseph Adolphe, Q.C., LL.D., Knight Commander of the Legion of Honour, Knight Commander of

St. Gregory the Great, Secretary of State for the Dominion of Canada, was born at Ste. Thérèse de Blainville, Quebec, Nov. 9, 1840, and was called to the Bar in 1861 and created Q.C. in 1873. He entered the Provincial Legislature in 1867, being elected by acclamation for the county of Terrebonne, which he still represents in the Commons. From 1873 to 1874 he was Solicitor-General. He became Provincial Secretary in 1876, and left the Government at the *coup-d'état* of Lt.-Governor Letellier de St. Just in March, 1878. He was foremost in the struggle which ensued, as leader of the Opposition, and defeated the July Administration, which had endorsed the arbitrary action of the Lieut.-Governor, who had dismissed a ministry supported by a large majority of both houses of the Legislature. Lieut.-Governor Letellier was dismissed from office by the Federal Government, after an overwhelming vote of the Parliament of Canada against his violation of responsible government. Mr. Chapleau became Premier of Quebec in Oct. 1879, and remained in that position, filling the offices of Minister of Agriculture and Public Works and of Minister of Railways, until July, 1882, when he was called to the Privy Council of Canada, as Secretary of State, which position he has occupied ever since. He established in Canada, in 1881, the *Crédit Foncier Franco-Canadian*, a financial institution of high standing, of which he is the Vice-President in Canada, the President being in Paris. He was appointed Commander of the Legion of Honour, in 1882, by President Grévy. He had been made the previous year, a Commander of St. Gregory the Great. In 1884, he was appointed President of a Royal Commission on Chinese Immigration, and visited California and British Columbia as such. His report on the question was followed by the enactment of a law, which does not forbid but limits in a certain measure Chinese Immigration into Canada. He introduced into Canada the British system of the Stationery office for public departments and Parliament, and the American system of a National Printing Bureau. He is a Professor of International Law and LL.D. of the Laval University.

CHAPMAN, Miss Elizabeth Rachel, was born at Woodford, Essex, where her family, originally of Whitley, Yorkshire, has resided for nearly a hundred years; she is connected, both paternally and maternally, with the Gurneys of Norwich, and is lineally descended from Mrs. Elizabeth Fry. Miss Chapman has written

fiction, essays, and poetry, and is interested in the various social and philanthropic movements of the day, more particularly in those specially affecting women. The following is a list of her publications: "Master of All," 1881; "A Tourist Idyl, and other stories," 1883; "The New Godiva and other studies," 1885; "A Comtist Lover, and other studies," 1886; "The New Purgatory, and other poems," 1887; "A Companion to 'In Memoriam,'" 1888.

CHAPMAN, General Sir Frederick Edward, G.C.B., son of Richard Chapman, Esq., of Gatchell, Somersetshire, was born in British Guiana in 1816. After passing through the Royal Military Academy at Woolwich, he entered the corps of Royal Engineers in 1835, became a captain in 1846, a colonel in the army in 1855, and a lieutenant-colonel of the Royal Engineers in 1859. In the year 1854 he was sent on a special mission to Constantinople, and was employed in surveying the positions in Turkey previous to the arrival of the British army in that country. Colonel Chapman was present at the battles of the Alma and Inkerman, served throughout the siege of Sebastopol, during the early part of which he was director of the left attack, and during the latter part executive engineer to the forces. As a reward for his valuable services he received a medal with three clasps, the Sardinian and Turkish medals, the third class of the *Medjidieh*, besides being appointed a Companion of the Bath and an Officer of the Legion of Honour. He was made a Knight Commander of the Order of the Bath in 1867, and attained the rank of Major-General the same year. Sir Frederick held the post of Governor and Commander-in-Chief of Bermuda from 1867 to 1870, and that of Inspector-General of Fortifications and Director of Works from the last date to 1875. He became a Lieutenant-General in the army, and a Colonel-Commandant of the Royal Engineers in May, 1872; and was advanced to the brevet of General in Oct. 1877. In the latter year he was created a G.C.B. He was placed on the retired list in 1881.

CHARCOT, Jean Martin, M.D., born at Paris in 1825, obtained his diploma as M.D. in 1853, and in 1856 was appointed *Médecin du Bureau Central*, from which time he has continually devoted his attention to the study of the nervous system. Besides his principal works on various forms of disease, his "*Leçons Cliniques sur les Maladies du Système*"

Nerveux," and his "Leçons du Mardi à la Salpêtrière," he founded in 1880, and still edits, the "Archives de Neurologie," and takes a leading part in the direction of the *Revue de Médecine*, "Archives de Pathologie Experimentale," and the "Nouvelle Iconographie de la Salpêtrière." He is a Member of the Institute of France, of the Royal Irish Academy, of the Royal Medical and Chirurgical Society of London, and of a great number of other scientific societies in various countries.

CHARD, Major John Rouse Merriott, F.C., was born Dec. 21, 1847, being the second son of the late Mr. William Wheaton Chard, of Pathe, Somerset, and Mount Tamar, Devon. He was educated first at the Plymouth New Grammar School, and then at Woolwich, and obtained his commission in the Royal Engineers July 15, 1868. After two years at Chatham he went to Bermuda, where he was employed for three years on the fortifications near Hamilton for the defence of the dockyard and naval anchorage. Coming on leave to England on the death of his father, he was sent to Malta to complete his foreign service, remaining about two years employed on the new forts there. On his return to England he was quartered at Aldershot, and took part in the Army Manœuvres. After a short stay at Chatham he went to Exeter (Western District) for about two years. Ordered from there to Aldershot to join the 5th company of Royal Engineers on the mobilization of the Army Corps for the East, he went with the company to Chatham, and embarked with it for Natal, Dec. 2, 1878, arriving at Durban early in Jan. 1879. On Jan. 22 Lieutenant Chard was the hero of the famous defence of Rorke's Drift. He was left in charge of the Commissariat post, with eighty men of the 80th Regiment; and an attack being imminent, a barricade was hastily thrown up under his direction, the men using for this purpose a number of bags, biscuit tins, and other matters belonging to the commissariat stores, being part of the time under fire. The attack was made soon after dark by at least 3,000 Zulus, and the fight was kept up during the greater part of the night. The Zulus got inside the barricade six times, and were as often driven out at the point of the bayonet. In the meantime another body of Zulu troops passed to the rear of the military hospital and set fire to it. At dawn the attacking force withdrew, for Lord Chelmsford's column was then seen approaching, and was enthusiastically hailed by the gallant defenders. Three hundred and fifty-one

dead Zulus were counted near the entrenchment, and the number killed after that attack was estimated at 1,000. The defenders of Rorke's Drift were undoubtedly the means of saving Grey Town and Helpmakaar, and also of securing time for effecting a retreat with the main column. Lieutenant Chard left Rorke's Drift sick with fever on Feb. 17 for Ladysmith, where he was hospitably entertained at the house of Dr. Hyde Allen Park. He left Ladysmith for the front on April 27, rejoined the 5th company of the Royal Engineers at Landsman's Drift on April 29, and was present at the battle of Ulundi. On returning to St. Paul's he was presented with the Victoria Cross by Sir Garnet Wolseley. Soon afterwards he was ordered home. Arriving at Portsmouth Oct. 2, 1879, he was met by a telegram from Her Majesty, and shortly afterwards he proceeded to Balmoral, where he was graciously received by the Queen. For his services he was advanced to the rank of Major.

CHARLES I. (Charles Eitel Frederick Zephirin Louis), King of Roumania, was born April 20, 1839, being the second son of Prince Hohenzollern-Sigmaringen, head of the second of the non-reigning branches of the princely house of Hohenzollern. He was elected and proclaimed Prince Regnant of Roumania, with hereditary succession, by a plébiscite, taken April 8-20, 1866, and definitely recognised on Oct. 24 in that year by the Sublime Porte and the guaranteeing Powers. The Prince had previously been a sub-lieutenant in the 2nd regiment of Prussian dragoons, and it is believed that his candidature for the throne of Roumania, which had become vacant by the expulsion of Prince Alexander John, was proposed by Prussia, and supported by her diplomatic action. His reign has been marked throughout by internal dissensions and parliamentary crises. The unwarrantable persecution of the Jews in Moldavia elicited indignant protests from various foreign governments, who likewise complained that bands of armed men were allowed to be formed within the Roumanian territory, with the object of creating disturbances on the Lower Danube. The disputes in the Roumanian Chamber, and the incessant ministerial changes, led to a dissolution of the Chamber of Bucharest in 1869. A convention was concluded between his Government and the Czar, permitting the Russians to cross the Danube in April, 1877. The Roumanian army was then mobilised, and war declared against Turkey. In Sept. and Oct. 1877, Prince Charles

held the nominal command of the Army of the West, and he fought at Plevna, where the Roumanians behaved with great gallantry, and suffered heavy losses. He received, in acknowledgment of his services, the cross of St. George from Alexander II., to whom he sent in return, the decoration of the Order of the Star of Roumania. He had the title of "Royal Highness" from 1878 till March 26, 1881, when he was proclaimed King of Roumania by a unanimous vote of the representatives of the nation. The coronation ceremony took place on May 22. He married, Nov. 15, 1869, Pauline Elizabeth Ottilie Louise (born 1843), daughter of the late Prince Hermann of Wied. (*See* Elizabeth.)

CHARLES I. (Karl Friedrich Alexander), King of Württemberg, eldest son of the late King William I., was born March 6, 1823, and succeeded to the throne June 25, 1864. He followed the policy of his father on the Schleswig-Holstein question, and formed one of the Minor States party in the Diet. In the Austro-Prussian war of 1866 he allied himself with Austria, but on Aug. 23 signed a treaty of alliance with Prussia; and in the French war of 1870 his army fought with the Prussians. His Majesty, who is a Colonel of a Russian regiment of dragoons, married, July 13, 1846, the Grand Duchess Olga Nicolajewna, daughter of Nicholas I., late Czar of Russia.

CHARLES, Mrs. Elizabeth, the daughter of John Rundle, Esq., formerly M.P. for Tavistock, was born in 1826. She is the authoress of "The Draytons and Davenants," 1841; "The Chronicles of the Schönberg-Cotta Family," 1863; this has had a large sale; and so also has "The Diary of Mrs. Kitty Trevylyan," 1864; Mrs. Charles published, in 1866, "Winifred Bertram"; in 1870, "The Martyrs of Spain"; in 1873, "Against the Stream"; in 1876, "The Bertram Family"; in 1879, "Joan the Maid"; in 1881, "Lapsed, but not Lost," all her works being characterised by deep religious feeling. She married, in 1851, Mr. Andrew Charles.

CHARLEY, Sir William Thomas, Q.C., D.C.L., born in 1833, is the youngest son of the late Matthew Charley, Esq., of Finaghy House, near Belfast. He was educated at St. John's College, Oxford, and took his degree of B.A. in 1856, and of B.C.L. and D.C.L., by accumulation, in 1868. In 1865 he was called to the Bar at the Inner Temple, having obtained the first certificate of honour of the first-

class, and the exhibition at the final examinations of Council of Legal Education. He has been Common Serjeant of the City of London since 1878, and in 1880 was made a Q.C. From 1868 to 1880 he represented Salford in the House of Commons in the Conservative interest, but was unsuccessful at the Election of 1880, and unsuccessfully contested Ipswich in 1833 and 1885. In the latter year his opponents were unseated for bribery by their agents. Sir William Charley is a judge of the Central Criminal Court, and of the Mayor's Court of London. He is Upper Warden of the Worshipful Company of Liners, a member of the Court of Lieutenancy of the City of London, and Hon. Colonel of the 3rd Volunteer Battalion of the Royal Fusiliers (City of London Regiment). He is the author of works on the "Real Property Acts" and "Judicature Acts," which have run through three editions. When in Parliament he carried several measures of social reform, the principles of some of which have been extended by subsequent legislation. He was knighted in 1880. In the spring of 1890 he married Miss Clara Harbord, daughter of F. G. Harbord, Esq., of Kirby Park, Cheshire.

CHARLOTTE, Ex-Empress of Mexico (Marie Charlotte Amélie Auguste Victoire Clémentine Léopoldine), daughter of Leopold I., King of the Belgians, born June 7, 1840, was married July 27, 1857, to the ill-fated Maximilian, afterwards Emperor of Mexico. In the midst of his embarrassments, Maximilian sent his empress to Paris in 1866 to seek more effectual aid from the Emperor Napoleon. She failed entirely in her mission, and proceeded to Italy, where her reason gave way in consequence of the troubles she had already undergone, and of those which she foresaw her husband would experience. Her Majesty was removed to the palace of Laeken, near Brussels, and it is said that during lucid intervals she has since employed her time in writing Memoirs of the History of the Mexican Empire. Her recovery is considered hopeless.

CHARNOCK, Richard Stephen, Ph.D., F.S.A., born in London, August 11, 1820, is the son of Richard Charnock, Esq., of the Inner Temple, barrister-at-law. He was educated at King's College, London, and admitted an attorney in 1841. He has travelled through the whole of Europe, and has also visited the North of Africa and Asia Minor; and has devoted much time to the study of anthropology, archæology, and philology,

especially the Celtic and Oriental languages. Dr. Charnock is a member of many learned societies, and Doctor of Philosophy of the University of Göttingen. Among very many contributions to philology, anthropology, and science in general, Dr. Charnock is author of "Guide to the Tyrol," 1857; "Local Etymology," 1859; "Bradshaw's Guide to Spain and Portugal," 1865; "Verba Nominalia," 1866; "Ludus Patronymicus," 1868; "The Peoples of Transylvania," 1870; "Manorial Customs of Essex," 1870; "Patronymica Cornu-Britannica," 1870; "On the Physical, Mental, and Philological Characters of the Wallons," 1871; "Le Sette Commune," 1871; "A Glossary of the Essex Dialect," 1879; "Prænomina; or, the Etymology of the principal Christian names of Great Britain and Ireland," 1882; and "Noces Etymologicæ," 1889.

CHARTERIS, Professor The Rev. Archibald Hamilton, M.A., D.D., born in Wamphray, Dumfriesshire, Dec. 13, 1835, was educated at the parish school and Edinburgh University, where he took the degree of B.A. in 1852, and of M.A. in 1853. He was presented to the parish of St. Quivox, Ayrshire, in 1858, to Newabbey in 1859, and called to the Park Church, Glasgow, in 1863. He was appointed one of Her Majesty's Chaplains for Scotland in 1870, having previously received the degree of D.D. from Edinburgh University in 1868. He was appointed to the Chair of Biblical Criticism in the University of Edinburgh in 1868, which he still holds. Professor Charteris is the author of "The Life of James Robertson, D.D.," 1863; "Canonicity: a Collection of Early Testimonies to the Books of the New Testament," 1880; "The Christian Scriptures," being the Avall Lectures, 1882, and of several occasional pamphlets and lectures. In ecclesiastical work he is best known as Vice-Convenor of the General Assembly's Committee for the Abolition of Patronage, which accomplished its work in 1874, and as Convenor of the General Assembly's Committee on Christian Life and Work from its first appointment to the present time. The purpose and effect of this committee is inquiry into and reporting upon the methods of work employed in the various parishes of the Church of Scotland, so that through the influence of the General Assembly and of public opinion, those methods may be developed and improved.

CHARTRES (Duc de), Robert Philippe-Louis - Eugène - Ferdinand d'Orléans, youngest son of the late Duke of Orléans,

and grandson of the late King Louis Philippe, was born at Paris, Nov. 9, 1840. When only two years of age he lost his father, and six years later the Revolution drove him into exile. The young duke was carefully brought up in Eisenach in Germany, and afterwards joined his family in England. He served in the Italian army, 1859, and in the Federal army in the first campaign of the American Civil War in 1862. He married, June 11, 1863, Françoise-Marie-Amélie of Orleans, eldest daughter of the Prince de Joinville, and has issue two daughters, born respectively Jan. 13, 1865, and Jan. 25, 1869, and two sons, born respectively Jan. 11, 1866, and Oct. 16, 1867. After the Revolution of Sept. 4, 1870, he returned *incognito* to France, and served in General Chanzy's army under an assumed name; and in 1871, when the National Assembly had revoked the law of banishment against the Orleans family, he was appointed a Major, and served first in Algiers; he was subsequently appointed Lieut.-Colonel and Colonel. In 1883 his name was struck off the active list of the army by a decree of the Republican Government; and he was at once removed from the command of the 12th Chasseurs, and was peremptorily ordered on Feb. 25 to quit Rouen, at which city that regiment was stationed.

CHASSEPOT, Antoine Alphonse, a French inventor, born March 4, 1833, is the son of a working gunsmith, to which trade he was himself brought up. Entering the Government workshops, he was attached in 1858 to that of St. Thomas, in Paris, as Controller of the second class; attained the rank of Controller of the first class in 1861, and that of Principal in 1864. The result of his study of the mechanism of small arms, especially of the famous Prussian needle-gun, was the invention of the Chassepot rifle, which was adopted by the French army; and, according to the official accounts, "did wonders" against the Garibaldians at Mentana. M. Chassepot was afterwards officially attached to the national manufactory of arms at Châtellerault, near Poitiers. He took out patents for his invention, and the royalty he received on the rifles manufactured brought him in a large income. He was decorated with the Legion of Honour in 1866.

CHATRIAN, Alexandre. See ERCKMAN-CHATRIAN.

CHELMSFORD (Lord), General The Right Hon. Frederic Augustus Thesiger, G.C.B., is the eldest son of the first Lord Chelms-

ford (who was twice Lord Chancellor in the Government of the late Lord Derby) by his wife Anna Maria, youngest daughter of Mr. William Tinling, of Southampton. He was born May 31, 1827, and educated at Eton. In 1844 he entered the Rifle Brigade. He was transferred in 1845 to the Grenadier Guards, as ensign and became captain 1850; Brevet-Major 1855; Lieut.-Colonel 1857; Colonel 1863; Major-General 1868; Lieut.-General 1882; and General 1888. He served in the Crimean campaign as aide-de-camp to Major-General Markham, including the siege and fall of Sebastopol, and for this services he was promoted to a brevet majority. Having exchanged into the 95th Regiment as second Lieut.-Colonel, he served in the Indian Mutiny campaign. He succeeded Colonel Raines, C.B., in the command of the 95th Regiment. As Deputy Adjutant-General in the Abyssinian campaign of 1868 he was present at the capture of Magdala. For his services in this campaign he was nominated a Companion of the Bath and one of Her Majesty's aides-de-camp. He was Adjutant-General to the forces in India from 1869 till Dec., 1874, when he was appointed to command the troops at Shorncliffe, and subsequently the 1st Infantry Brigade at Aldershot. In March, 1877, he attained the rank of Major-General, and in January of the following year he was nominated to succeed General Sir Arthur Cunningham as Commander of the Forces and Lieut.-Governor of Cape Colony. He completed the subjugation of the Kaffirs, and restored Caffraria to a condition of tranquillity, and for these services was made a Knight Commander of the Order of the Bath. He had succeeded to the peerage on his father's death in 1878. Lord Chelmsford was appointed to the chief command of the British troops in the Zulu War of 1879. Colonel Glyn's column, consisting of 2,100 Englishmen and 2,000 natives, was encamped at Isandhlwina, when an attack was made on the fortified camp by the Zulus, resulting in the nearly total annihilation of the garrison. A gallant defence was made the same day at Rorke's Drift, about ten miles from Isandhlwina, by Lieutenants Chard and Bromhead, who with 80 men of the 80th Regiment held the post against the desperate assaults of 3,000 Zulus, until they were relieved by Lord Chelmsford's troops. On April 2 an attack was made by an army of 11,000 Zulus upon the fortified camp of the British troops under Lord Chelmsford at Gingholova, on the road to Ekowe, but the

Zulus were repulsed with great loss; and two days later the British troops, who had been surrounded at Ekowe by Zulus after the disaster of Isandhlwina, were relieved by the force under Lord Chelmsford's command. The decisive battle of Ulundi was fought on July 4, when the Zulu army was completely defeated. The credit of the victory admittedly belongs to Lord Chelmsford, but before this battle was fought Sir Garnet Wolseley had landed at Durban, Natal, to supersede him in the command of the British troops operating against the Zulus. Lord Chelmsford, having resigned the command, was created a Knight Grand Cross of the Order of the Bath, and arrived in England in Aug., 1879. In 1884 was appointed Lieutenant of the Tower of London, which he held until 1889. He married, in 1867, Adria Fanny, daughter of Major-General Heath, of the Bombay army.

CHERBULIEZ, Victor, son of a Professor of Greek at Geneva, was born in that city in 1829. His early education at Geneva was completed in Paris, at Bonn and in Berlin, and after a voyage to the East he published his first essay, an antiquarian trifle, entitled "À propos d'un Cheval, Causeries Athéniennes," 1860, reprinted in 1864 under the title of "Un Cheval de Phidias." After the death of his father in 1874 he settled in Paris, where he published a number of novels, all which appeared originally in the columns of the *Revue des Deux Mondes*. Among them are "Le Comte Kostia," 1863; "Le Prince Vitale," 1864; "Paule Méré," 1864; "Le Roman d'une honnête Femme," 1866; "Le Grand Œuvre," 1867; "Prosper Randoce," 1868; "L'Aventure de Ladislas Bolski," 1869; "Le Fiancé de Mademoiselle de Saint-Maur," 1876; and "L'Idée de Jean Téterol," 1878, which was translated into English under the title of "The Wish of his Life." Later books are "Noirs et Rouges," "Olivier Maugant," "La Ferme du Choquard," 1884. "La Bête," 1887; "La Vocation du Comte Ghislain," 1888; "Une Gageure," 1889. Most of M. Cherbuliez's works have been translated and published in America; and many have been translated into Danish, English, German, Italian, Polish and Spanish. M. Cherbuliez is also a political writer of influence, the numerous articles in the *Revue des Deux Mondes* signed "G. Valbert" being from his pen. M. Cherbuliez has been reinstated in his rights as a French citizen which had been lost through his ancestors having left France during the religious persecutions in the

17th century. On May 25, 1882, he was received into the French Academy as the successor of M. Dufaure.

CHÉRIF, PACHA, an Egyptian statesman, born at Constantinople of an old and noble Mussulman family. He studied in Paris as a pupil of the Egyptian Mission maintained in France by the Egyptian Government, and passed through the Military School of Saint Cyr. He returned to Egypt in 1844. On the accession of Saïd Pacha, he entered the army and was successively promoted to the rank of Pacha under the Government of Ismail Pacha, and filled the post of Minister of the Interior, Foreign Affairs, and Public Instruction. In 1867 he was raised to the post of President of the Grand Council of Justice. In 1868 he took the portfolio of the Interior with the Presidency of the Council of Ministers. In 1865, 1867, 1868, he was made Regent of Egypt by Ismail Pacha, when that Prince went abroad. Under the Government of Tewfik Pacha, Chérif Pacha became Prime Minister of Egypt, but resigned in 1884 in consequence of the abandonment of the Soudan. He is a grand officer of the Legion of Honour.

CHÉRUÉL, Pierre Adolphe, a French historian, born at Rouen, Jan. 17, 1809, was educated at the Normal School, and became Professor of History at the Royal College of Rouen. In 1840 he published "*Histoire de Rouen sous la Domination Anglaise*," and in 1842 "*Histoire de la Commune de Rouen*." In 1849 he succeeded M. Wallon as Maître de Conférences at the Normal School. He was named Inspector-General of Public Instruction and rector of the Strasbourg Academy, Jan. 23, 1866, and of Poitiers in 1874. M. Chéruel has gained a considerable reputation by his writings. Among the principal are "*De l'Administration de Louis XIV.*," 1849; "*Marie Stuart et Catherine de Médicis*," 1856; "*Mémoires sur la vie Publique et Privée de Fouquet*," 1862; "*Histoire de France sous le Ministère de Mazarin*," 1882. This last is his chief work, and is likely to remain the standard book on this period of history. As a Member of the Committee of Languages, History, and Arts of France, he edited in the series of unpublished documents "*Journal d'Olivier Lefèvre*," and "*Les lettres de Mazarin pendant son Ministère*," 5 vols. in 4to, 1860-62. He is an officer of the Legion of Honour and was nominated in 1884 member of the Institute of France (Académie des sciences morales et politiques, section d'histoire).

CHESNELONG, Pierre Charles, a French politician, was born at Orthez (Basses-Pyrénées), April, 1820, and educated at Pau. Formerly he was a dealer in hams and tissues at Bayonne, at first in partnership with his father, but he afterwards handed over the management of the business to his eldest son, though still retaining an interest in it. In 1848 M. Chesnelong declared at a public meeting that "the republican form of government must be regarded as the only possible one in the present and in the future by all men who conscientiously take account of the movement of ideas and Providential progress of facts." However, he afterwards changed his sentiments and in 1866 became an official candidate, under the Empire, for the representation of the second circonscription of the Basses-Pyrénées. His candidature was successful, and he was re-elected in 1869. At the elections of Jan. 1872 he was again returned to the National Assembly for the Basses-Pyrénées, and he took his seat among the monarchical majority. He took a very prominent part in the monarchical negotiations in Oct. 1873. As a member of the Committee of Nine, he was sent to the Comte de Chambord, at Salzburg, in order to arrange with him the conditions of a monarchical restoration. M. Chesnelong took back a satisfactory account of his interview with the Pretender, and preparations were being made for the entry of the King into Paris when the manifesto of the 27th of October cast disorder and carried desolation into the Legitimist camp. At the general elections of Feb. 20, 1876, he was again chosen as Deputy for the arrondissement of Orthez, but the Chamber invalidated the election, and when M. Chesnelong sought the suffrages of the electors a second time he was defeated by his Republican opponent, M. Vignancourt (May 21, 1876). A few months later (Nov. 24, 1876) he was elected a senator for life. M. Chesnelong has taken a leading part in all Roman Catholic movements, both in and out of Parliament. He accompanied the pilgrimage to Paray-le-Monial, in honour of the Sacred Heart, and he subscribed the address of the Roman Catholic Deputies to Pope Pius IX. He was President of the general assemblies of the Roman Catholic Committees of France, held at Paris in 1874 and 1875. He is Vice-President of the Conseil Général of the Basses-Pyrénées.

CHESNEY, Lieut.-General George Tomkyns, C.B., the author of "*The Battle of Dorking*," was educated at Woolwich, and joined the Bengal Engineers in 1848,

He was Lieutenant in 1854, and served throughout the siege of Delhi, where he was twice severely wounded; Captain in 1858; Major in 1872; Lieut.-Colonel in 1874; Colonel in 1884; and General in 1885. His "Indian Polity" was published in 1868; his brochure "The Battle of Dorking," anonymously in 1871, and created a great sensation, so realistically was it written. "The Dilemma," and "The Private Secretary," were published in 1881. In 1887 General Chesney became a member of the Council of the Governor-General of India.

CHESTER, Bishop of. *See* JAYNE, THE RT. REV. FRANCIS JOHN.

CHEYNE, Professor The Rev. Thomas Kelly, D.D., son of the late Rev. Charles Cheyne, was born in London, Sept. 18, 1811, and educated at Merchant Taylors' School and Worcester College, Oxford, where he obtained the Chancellor's prize for an English Essay and various Hebrew and Theological University Scholarships. He was elected Fellow of Balliol College in 1869, and was Rector of Tendring, Essex, from 1881-85. In 1885 he was appointed Oriel Professor of the Interpretation of Holy Scripture at Oxford and Canon of Rochester. In 1884, at the tercentenary celebration of the University of Edinburgh, he received the degree of D.D. Professor Cheyne is the Author of many works on the Old Testament, including "The Book of Isaiah Chronologically Arranged," 1869; "The Prophecies of Isaiah," 3rd ed., 1885; "The Book of Psalms, a New Version," in the Parchment Library, 1884; "Exposition of Jeremiah and Lamentations," 1883; "Job and Solomon, or, the Wisdom of the Hebrews," 1886; "The Book of Psalms, a new translation and commentary," 1888; "The Life and Times of Jeremiah," 1888. He was also a member of the Old Testament Revision Company, and has contributed divers articles on biblical subjects to the new edition of the "Encyclopædia Britannica," and has long been known as one of the representatives of Ewald's school of criticisms and exegesis in England. In 1889 he delivered the Bampton Lectures, taking for his subject, "The Historical Origin and Religious Ideas of the Psalter" (in the Press).

CHEYNE, William Watson, M.B., was educated at the University of Edinburgh, where he passed with First Class Honours in 1875. He was elected a Fellow of the Royal College of Surgeons in 1879; Boylston Medal Prizeman and Gold

Medallist, 1880; and Jacksonian Prizeman, 1881. He was Demonstrator of Surgery at King's College, and Demonstrator of Anatomy at the University of Edinburgh; Surgeon to King's College Hospital and to the Paddington Green Children's Hospital; Examiner in Surgery at Edinburgh University; and Hunterian Professor at the Royal College of Surgeons of England in 1888 and 1890. He is the author of "Antiseptic Surgery, its Principles, Practice, History, and Results;" "Manual of the Antiseptic Treatment of Wounds;" "Public Health Laboratory Work: Part I., Biological Laboratory;" Lectures on Suppuration and Septic Disease; on Intercular Diseases of Bones and Joints, and has contributed numerous papers on surgical and scientific subjects to the Medical Journals and the learned Societies.

CHICHESTER, Bishop of. *See* DURNFORD, THE RIGHT REV. RICHARD.

CHICHESTER, Dean of. *See* FIGOU, THE VERY REV. FRANCIS.

CHILDERS, The Right Hon. Hugh Culling Eardley, M.P., F.R.S., was born in Brook Street, London, June 25, 1827, and is the only son of the late Rev. Eardley Childers, of Cantley, Yorkshire, by Maria Charlotte, eldest daughter of the late Sir Culling Smith, Bart., of Bedwell Park, Hertfordshire. He was educated at Cheam School, and at Trinity College, Cambridge, where he graduated as fourteenth Senior Optime in 1850. Before that year was out, Mr. Childers set sail for Australia. Soon after his arrival there he became a member of the then recently established Government of Victoria. With that Government he was connected till the beginning of 1857, having held the office of Commissioner of Trade and Customs in the first cabinet, and having been member for Portland in the first Legislative Assembly. He returned to England in 1857 to take up the office of Agent-General for the colony, and in that year proceeded to the degree of M.A. at Cambridge. He also became a student of Lincoln's Inn, but he was never called to the Bar. In 1859 he was an unsuccessful candidate for Pontefract. On a petition, which was withdrawn and afterwards became the subject of special inquiry by a select committee, he unseated his opponent, was returned at the new election in Feb., 1860, and continued to represent that borough in the Liberal interest until Nov., 1885, when he was defeated by the Irish vote. Mr. Childers was chairman of the Select Committee on

Transportation in 1861, and a member of the Commission on Penal Servitude in 1863; his recommendations with respect to transportation having been eventually adopted by the Government. He became a Lord of the Admiralty in April, 1864, and Financial Secretary to the Treasury in Aug., 1865, retiring on the accession of Lord Derby's third administration in 1866. In 1867 he was nominated a Royal Commissioner to investigate the constitution of the Law Courts. On Mr. Gladstone's coming into power in Dec., 1868, Mr. Childers was nominated First Lord of the Admiralty, which office he was compelled by ill-health to resign in March, 1871. While at the Admiralty Mr. Childers made changes, in 1869, which tended to subordinate the members of the Board more effectually to the First Lord, constituting him, in effect, Minister of Marine; and to render departmental officers at once more individually responsible and more intimate with the controlling members of the Board. He also revised and reduced the list of officers; recast, from top to bottom, the regulations for promotion and retirement; established a fixed annual tonnage for the construction of ironclads and other ships; reformed the administration of the dockyards; and cleared the coast-guard and home ports of men unfit for service at sea. He was appointed Chancellor of the Duchy of Lancaster in Aug., 1872. His re-election for Pontefract on this occasion is memorable as being the first Parliamentary election that took place in England by ballot. He held the Chancellorship of the Duchy of Lancaster for only one year, retiring in 1873, when Mr. Gladstone's administration was remodelled. On the Liberals returning to power in April, 1880, he was appointed Secretary of State for War, in which office he established the territorial regimental system, revised the lists of officers, and applied to them rules for employment and retirement similar to those which he had introduced into the navy. He also established regimental warrant officers, and improved the position of the non-commissioned officers. He was Secretary of State during the Egyptian campaign of 1882. On Dec. 16, 1882, he became Chancellor of the Exchequer in succession to Mr. Gladstone, who had held that office jointly with the office of First Lord of the Treasury. Mr. Childers retired from this office on the defeat of the Government in June, 1885. In Jan., 1886, he was elected for South Edinburgh, and in Mr. Gladstone's short ministry held the post of Home Secretary. He was re-elected for South Edinburgh at

the generalelection of 1886. Mr. Childers, who was elected a Fellow of the Royal Society in 1868, is the author of pamphlets, on Free Trade, Railway Policy, and National Education. He has been the Chairman of the Great India Peninsula Railway Co., Chairman of the Royal Mail Steam Packet Co., and a Director of the London and North Western Railway Co., London and County Bank, the Bank of Australasia, and the Liverpool and London and Globe Insurance Co. In 1850 Mr. Childers married Emily, third daughter of George I. A. Walker, Esq., of Norton, Worcestershire. (She died in 1875.) Mr. Childers married secondly, on April 13, 1879, Katharine Ann, daughter of the late Dr. Gilbert, Bishop of Chichester, and widow of Col. the Hon. Gilbert Elliot.

CHILDS, George William, was born at Baltimore, Maryland, May 12, 1829. He entered the United States Navy at the age of thirteen, and spent fifteen months in the service. He then settled in Philadelphia, where he obtained employment as a shop-boy in a book-store. At the age of eighteen, having saved a few hundred dollars, he set up in business for himself, and when he was twenty-one he became a member of the publishing firm of R. E. Peterson and Co., afterwards Childs and Peterson. On Dec. 3, 1864, he purchased the *Philadelphia Public Ledger*, a daily paper, which, under his management, has become a very influential and widely-circulated journal. Mr. Childs is noted not only for his success as a journalist and publisher, but also for his unostentatious philanthropy. The public drinking-fountain at Stratford-upon-Avon was erected by him, 1887, as a memorial to Shakespeare, and he has placed in Westminster Abbey a window memorial to Herbert and Cowper, 1877, and one in St. Margaret's Church, Westminster, as a memorial to Milton, 1888; and has also given, 1889, to the Church of SS. Thomas and Clement, Winchester, a reredos as a memorial of Bishops Lancelot Andrewes and Ken. In 1885, he published "Some Recollections of General Grant," and in 1890 a volume of his own "Recollections" was issued.

CHINNERY-HALDANE, The Right Rev. James Robert Alexander, LL.B., D.D., Bishop of Argyll and the Isles, is the only son of the late Alexander Haldane, Barrister-at-Law, heir male of the family of Haldane of Gleneagles (*see* Burke's Landed Gentry, Vol. I., p. 808), and was born in 1842, and educated at Trinity College, Cambridge, where he took his degree of

LL.B., 1864, and D.D., 1888. He was ordained Deacon in 1866, and Priest in 1867, both by the Bishop of Salisbury; and became Assistant Curate of All Saints', Edinburgh, which curacy he held for about seven years. He was afterwards incumbent of St. Bride's, Nether Lochaber, 1876; Dean of Argyll and the Isles, 1881; Bishop of Argyll and the Isles, 1883. He married in 1864, Anna Elizabeth Frances Margareta, only child and heiress of Rev. Sir Nicholas Chinnery, Bart., of Flintville, Co. Cork, when he assumed the additional name of Chinnery.

CHITTY, The Hon. Sir Joseph William, is the second and only surviving son of the late Mr. Thomas Chitty, of the Inner Temple, and was born in London in 1828. He was educated at Eton and Balliol College, Oxford, where he graduated in 1851, taking a first-class in classics. Subsequently he was elected a Fellow of Exeter College, and proceeded M.A. in 1854. He was called to the Bar at Lincoln's Inn in 1856, and was appointed a Queen's Counsel in 1874. Mr. Chitty for some years enjoyed a very extensive practice in the Rolls Court, of which he was the leader. He was formerly a Major in the Inns of Court Volunteers. To the general public, however, Mr. Chitty's name was most familiarly known in his capacity as umpire at the Oxford and Cambridge boat-race, which post he filled for some years. He entered Parliament at the general election of 1880 as one of the Liberal members for Oxford. In Sept., 1881, he was appointed a Judge of the Chancery Division of the High Court of Justice, in place of Sir George Jessel, the Master of the Rolls, who had been transferred to the Court of Appeal. Shortly afterwards he received the customary honour of knighthood. He married in 1858 Clara Jessie, sixth daughter of the late Right Hon. Sir Frederick Pollock.

CHRISTIAN IX., King of Denmark, fourth son of the late Duke William of Schleswig-Holstein-Sonderburg-Glücksburg, was born April 8, 1818. Before his accession to the crown, he was Inspector-General and Commander-in-Chief of the Danish Cavalry. The succession was vested in him by the protocol of London, May 8, 1852, and he ascended the throne on the death of Frederic VII., Nov. 15, 1863. On his accession, the position of affairs with respect to Schleswig-Holstein was completely changed. The son of the Duke of Augustenborg immediately laid claim to the sovereignty of the duchies, although his father had for a compensa-

tion resigned all his rights in 1852. The independence of Holstein more especially, and of a portion of Schleswig, was warmly espoused by the German Diet, which forthwith ordered the advance of a Federal army to occupy the debatable territory, for the purpose of enforcing its enfranchisement from Danish rule. Before matters had proceeded far, Austria and Prussia determined to interfere, and by a combined armed occupation of the disputed territory to bring the question to an issue independently of the Diet, and in opposition to the wishes of that body. They accordingly invaded the duchies, which, after a hotly contested campaign, they succeeded in wresting from Denmark, also taking temporary possession of Jutland. Christian IX., disappointed in not obtaining assistance from some European power, after the failure of the conference convened in London in 1864,—which failure was in some measure attributable to the obstinacy of the Danish Government,—entered into negotiations for peace with Prussia and Austria, and a treaty was signed at Vienna, Oct. 30, 1864. The king of Denmark renounced all his rights to Schleswig-Holstein and Lauenburg, and in 1866 the two German powers quarrelled over the spoil. Since then his Majesty has sought to develop the interior resources and popular institutions of his country. A new constitution was inaugurated in Nov., 1866, when the King opened the first Rigsdag, the members of which were elected in accordance with the new electoral law. The army and navy have also been thoroughly reorganised, agriculture and commerce have received a great stimulus, and several railways have been constructed. In spite of this, however, the social state of the country is far from satisfactory; the hostility between the leaders of the people and the Court party is intense, and the Crown is by no means popular. Christian IX. and Queen Louise visited the Princess of Wales at Marlborough House, London, in March, 1867. The marriage of the Crown Prince of Denmark with the Princess Louisa, daughter of the King of Sweden, at Stockholm, on July 28, 1869, was hailed as a pledge of union between the two countries. His Majesty granted a new constitution to Iceland, which came into operation in August, 1874, that being the thousandth year of Iceland's existence as a nation. He went to Reikiavik on the occasion of the anniversary being celebrated, and on his return paid a flying visit to Leith and Edinburgh, Aug. 18, 1874. He visited the Emperor William II. of Germany at

Berlin in Aug., 1888, and in the autumn of 1889 was visited by the Emperor of Russia and his family. In 1842 he married a daughter of the Landgrave William of Hesse-Cassel, by whom he has had several children, and among them the King of Greece, the Princess Alexandra of Wales, and the Princess Dagmar, married to the Emperor of Russia.

CHRISTIAN (Princess), Her Royal Highness Helena Augusta Victoria, Princess of Great Britain and Ireland, and Duchess of Saxony, third daughter of Her Majesty Queen Victoria, was born May 25, 1846, and married at Windsor Castle, July 5, 1866, to His Royal Highness Frederick-Christian-Charles-Augustus, Prince of Schleswig-Holstein-Sonderburg-Augustenburg, and has four children. On Her Royal Highness's marriage a dower of £30,000 and an annuity of £6,000 was granted to her by Parliament. The Princess is a Member of the Royal Order of Victoria and Albert (1st Class), and a Lady of the Imperial Order of the Crown of India, and of the Royal Red Cross, &c.

CHRISTIAN (Prince), His Royal Highness Frederick-Christian-Charles-Augustus, Prince of Schleswig-Holstein-Sonderburg, K.G., born Jan. 22, 1831, married July 5, 1866, Helena Augusta Victoria, Princess of Great Britain and Ireland; Prince Christian received the title of Royal Highness by command of Her Majesty, and was made a Knight of the Garter in July, 1866.

CHRISTIE, William Henry Mahony, F.R.S., P.R.A.S., Astronomer Royal, was born at Woolwich in 1845, and is the son of the late Professor S. H. Christie. He was educated at King's College School, London, and Trinity College, Cambridge, and became a fellow of his college. He graduated B.A., 1868, as fourth wrangler; was appointed, in 1870, Chief Assistant at the Royal Observatory, Greenwich. On Sir G. B. Airy's retirement in 1881, Mr. Christie was appointed Astronomer Royal. He is the author of the "Manual of Elementary Astronomy," and has contributed valuable papers to the Proceedings of the Royal Society (of which he was elected Fellow in 1881), and the Royal Astronomical Society (of which he was elected Fellow in 1871).

CHRISTINA, Queen-Regent of Spain. See MARIA CHRISTINA.

CHURCH, The Rev. Alfred John, born in London, Jan. 29, 1829, son of John

Thomas Church, solicitor, was educated at King's College, London, and Lincoln College, Oxford, where he graduated in 1851 (2nd class in Lit. Hum.). He was ordained in 1853, and held the curacy of Charlton, Malmesbury, till the end of 1856. He was successively Assistant Master at the Royal Institution School, Liverpool, and at Merchant Taylors' School, London, 1857-70; and Head Master of Henley, 1870-72; and of Retford Grammar Schools, 1873-80. In 1880 he was appointed to the Chair of Latin at University College, London; this he resigned in 1889. He has published, in conjunction with the Rev. W. T. Brodribb, a translation of "Tacitus," 1862-77, and of Livy, xxi.-xxv., an edition of "Select Letters of Pliny, and Pliny the Younger," in "Blackwood's Ancient Classics for English Readers," "Tacitus," in "Macmillan's Series of Literature Primers," and editions of "Tacitus, Annals VI. and Agricola and Germania." He contributed "Ovid" to Blackwood's series above mentioned, and is conductor of "Seeley's Cheap School Books," several of which come from his pen. He also edited, in 1868, a collection of translations from Tennyson into Latin verse, under the title of "Hore Tennysonianæ." But the works by which he is best known are a series of volumes which aim at popularising some of the great Greek and Latin classics. "Stories from Homer," appeared in 1877, and were followed by "Stories from Virgil," "Stories from the Greek Tragedians," "Stories from the East," "The Story of the Persian War," "Stories from Livy," "Roman Life in the Days of Cicero," "A Traveller's True Tale, after Lucian," "The Story of Jerusalem," and "Heroes and Kings" belong to the same series. Other books for the young written by him are "The Chantry Priest of Barnet," "With the King at Oxford," "Two Thousand Years Ago; or, The Adventures of a Roman Boy," "Stories of the Magicians," and "To the Lions!" a tale of the Early Church. He has also written "Carthage," and "Early Britain," "Carthage," in Messrs. G. P. Putnam & Sons' "Series of the Story of the Nations." Mr. Church obtained, in 1884, at Oxford the Prize for a Poem on a Sacred Subject. The subject was "The Sea of Galilee."

CHURCH, Arthur Herbert, F.R.S., F.C.S., fourth and youngest son of the late John Thomas Church, solicitor, of Bedford Row, was born June 2, 1834, educated at King's College and the Royal College of Chemistry, London, and at

Lincoln College, Oxford; first-class in Natural Science School, Oxford; B.A. 1860, M.A. 1863; has been Professor of Chemistry in the Royal Academy of Arts in London since 1879; Lecturer on Organic Chemistry at Cooper's Hill College since 1888. He was formerly, 1863-1879, Professor of Chemistry in the Royal Agricultural College, Cirencester. Mr. Church is the Discoverer of Turacin, an Animal Pigment containing Copper, and of several new mineral species, including the only British Cerium mineral. He is the Author of "Precious Stones," 1883; "English Earthenware," 1884; "English Porcelain," 1886; "The Laboratory Guide for Agricultural Students," 6th edit., 1888; "Food grains of India," 1886; "Colour," 2nd edit., 1887; "Food," 2nd edit., 1889, &c. Author of researches on Vegetable Albinism, on Colein or Erythrophyll, on Aluminium in Vascular Cryptogams, &c. He was elected Fellow of the Chemical Society in 1856; Fellow of the Royal Society in 1888.

CHURCH, Frederic Edwin, an American artist, was born at Hartford, Connecticut, May 14, 1826. He early developed a fondness for art, and became a pupil of Thomas Cole. Among his first notable works were some views in the Catskill Mountains. He visited South America in 1853, and again in 1857, and on his return from his second visit finished his great picture, "The Heart of the Andes." In 1857 he completed a large painting, "View of Niagara Falls from the Canadian Shore," which at once gave him a high rank among landscape artists; this was reproduced on a larger scale in 1868, and was exhibited both in England and in the United States. He has since painted "Cotopaxi," "Morning," "On the Cordilleras," "Under Niagara," "The Icebergs," "Sunset on Mount Desert Island," and "Moonlight under the Tropics." In 1868 he visited Europe and the Holy Land. Among the paintings inspired by this visit are "Damascus," 1869; "Jerusalem," 1870; and "The Parthenon," 1871. His "Tropical Scenery," painted from sketches made during a trip in the West Indies, was exhibited in New York in 1873. He has been an Academician since 1849.

CHURCH, The Very Rev. Richard William, M.A., D.C.L., Dean of St. Paul's was born at Lisbon in 1815. After a distinguished career at the University of Oxford, he took his degree in first-class honours in 1836, and shortly afterwards became a Fellow of Oriel College. He

was rector of Whatley, near Frome-Selwood, from 1853 to 1871. In 1854 he published a volume of essays, two of which are a review of St. Anselm's life, and have since been expanded into a "Life of St. Anselm," and published as a separate volume. In 1869 Mr. Church published a volume of University Sermons on the relations between Christianity and civilisation. He was appointed Dean of St. Paul's, Sept. 6, 1871. The titles of his works are subjoined:—"The Catechetical Lectures of St. Cyril, translated with notes," in the "Library of the Fathers;" "Essays and Reviews," 1854; "The Essays of Montaigne," in "Oxford Essays," 1855; "Civilisation and Religion," a sermon, 1860; "Sermons preached before the University of Oxford," 1868; "Life of St. Anselm," in Macmillan's "Sunday Library," 1871; "Civilisation Before and After Christianity," two lectures, 1872; "On some Influences of Christianity upon National Character," three lectures, 1873; "On the Sacred Poetry of Early Religions," two lectures delivered in St. Paul's Cathedral, 1874; Introductory notice to the "Commentary on the Epistles and Gospels in the Book of Common Prayer," 1874; "The 'Pensées' of Blaise Pascal," published in the "St. James's Lectures," 1875; a lecture on "Lancelot Andrewes, Bishop of Winchester," published in "Masters in English Theology," 1877; "The Beginning of the Middle Ages," 1877, a volume which must be considered as a general introduction or preface to the "Epochs of Modern History," rather than as an integral member of the series; "Human Life and its Conditions," 1878; "Dante: an Essay," to which is added a translation of "De Monarcha," 1878; and "Spenser" and "Bacon," in "English Men of Letters, edited by John Morley," 1879. Several of these Essays are included, with others, in a collection in 5 vols., 1888-9. Dean Church is a prominent member of the High Church party, and his recent erection of the reredos in St. Paul's Cathedral has given rise to much controversy and litigation, the very summit of the reredos being an image of the Virgin Mary.

CHURCHILL, The Right Hon. Lord Randolph Henry Spencer, M.P., second son of the sixth Duke of Marlborough by his marriage with Lady Frances Anne Emily, eldest daughter of the third Marquis of Londonderry, was born Feb. 13, 1849, and educated at Merton College, Oxford. He represented Woodstock from Feb., 1874, until April, 1880, and again from that time (when he was returned with a

diminished majority) until Nov., 1885. He afterwards stood for Birmingham, but was defeated, and was then returned for South Paddington. From 1874 to 1880 he was almost silent in the House; but from 1880 onward he made himself conspicuous in the House of Commons and on public platforms by the violence of his speeches against the Liberal Party, and he was the chief member of that small section of the House known as the "Fourth Party." On the accession of Lord Salisbury's Government to office in 1885, Lord Randolph Churchill filled the post of Secretary of State for India; and his promotion to that high place was a proof of the importance that he had assumed in the ranks of the Conservative party. In the country, indeed, he was already regarded as almost, if not quite, the Tory leader; and it was commonly said that the mantle of Lord Beaconsfield had fallen upon the young, able, irrepressible, unscrupulous, but acute and hard-working chief of the Tory Democracy. Lord Randolph's short tenure of the India Office was marked by the annexation of Upper Burmah. Departmental work, however, did not prevent his taking a great part in the struggle which, at the general election of Nov., 1885, again returned the Liberals to power. He resigned office with Lord Salisbury only to return after six months, not as Secretary for India, but as Chancellor of the Exchequer, and Leader of the House of Commons; but, to the surprise of all, he resigned office in Dec. of the same year. Lord Randolph married, in 1874, Miss Jennie Jerome, of New York, who has since become a prominent member of the Primrose League.

CIALDINI, Enrico, an Italian General, born at Lombardina, a country seat in Modena, Aug. 8, 1811. He marched with Gen. Zucchi to aid the Romagna insurrection at Bologna, in 1831; and after the Austrian intervention in Central Italy he was compelled to emigrate. He went to Paris, where he studied chemistry under M. Thénard, and was preparing to study medicine, when he accepted a proposal made to go to Spain as a soldier, and took part in the war of succession. When the revolution of 1848 broke out, he was a lieutenant-colonel in the Spanish service. Mazzini recommended Colonel Cialdini to the Provincial Government of Milan, which was in want of officers, and a letter from the secretary of that government reached him in Aragon. Colonel Cialdini obeyed the call; but on arriving at Milan, he found Lombardy under the rule of Charles Albert. It was not the moment for hesitating; the king had

just been beaten, and Italy was about to become a prey to Austria. Col. Cialdini joined the corps of Gen. Durando and marched on Vicenza, where he received three dangerous wounds, which for a year reduced him to a state of helplessness. Col. Cialdini was sent, in 1855, to the Crimea by the Sardinian Government with the rank of general, and played a distinguished part in the battle of the Tchernaya. In the war in Italy, in 1859, he was the first in the allied army who fired a shot at the enemy, executing the passage of the Sesia under the fire of the Austrians, whom he drove from their position. This *corps d'armée* then went into the mountains to act in the Tyrol. The peace of Villafranca checked him in his career. In 1860 he defeated the Papal army under Gen. Lamoricière at the battle of Castelfidardo; in 1861 he took Gaeta after a bombardment of seventeen days, and captured the citadel of Messina a fortnight later. He had been made a major-general after the campaign of the Umbria, and after his capture of Messina the king nominated him general of the army, a rank equivalent to that of field-marshal. In 1861 he was appointed Viceroy of Naples, with full power to suppress brigandage, a mission which he discharged successfully. Gen. Cialdini, who has received various Orders, was made a senator in March, 1864, and took a prominent part in the campaign against Austria in 1866. In Oct., 1867, he was appointed Italian Minister to the Court of Austria, but he never proceeded to Vienna, and in the following January he formally resigned the appointment. On the resignation of M. Ratazzi, in Oct., 1867, the king intrusted Gen. Cialdini with the formation of a cabinet on the basis of the strict maintenance of the September Convention with France, in regard to the integrity of the Papal territory. In this undertaking, however, he was unsuccessful. Soon afterwards he was nominated Commander-in-Chief of the troops in Central Italy. In 1870 he was engaged in the invasion of the Papal States and their annexation to the Kingdom of Italy. He was sent as ambassador to Paris in July, 1876; but, after successfully overcoming many difficulties, retired on leave of absence owing to the strained relations between Italy and France over the Tunis question in 1881, and in 1882 was succeeded by Gen. Menabrea.

CLARENCE AND AVONDALE, Duke of, and Earl of Athlone, His Royal Highness Prince ALBERT VICTOR CHRISTIAN

EDWARD, K.G., K.P., LL.D., the eldest son of their Royal Highnesses the Prince and Princess of Wales, was born Jan. 8, 1864. Up till 1871 he was educated at home. In 1877 he entered the navy as a cadet, and on board H.M.S. *Britannia* at Dartmouth, under the care of Captain Henry Fairfax, R.N., C.B., passed the usual two years. In July, 1879, he went to sea in H.M.S. *Bacchante* and visited the West Indies. The following year the *Bacchante*, formed part of the flying squadron, then organized under the command of Rear-Admiral the Earl of Clanwilliam, and proceeded to Vigo, Madeira, St. Vincent, Bahia, Montevideo, and the Falkland Islands; thence to the Cape of Good Hope and Australia, on which two stations Prince Albert Victor spent a considerable time. From Australia he went to Fiji, Japan, China, Singapore, Colombo, and Suez, and returned to England in the summer of 1882 by way of Egypt, the Holy Land, and Athens. In Oct., 1883, he became an undergraduate at Trinity College, Cambridge, continuing his studies during the long vacations at the University of Heidelberg. After this he was transferred to Aldershot to study military science. His diary, together with that of his brother, Prince George, during their cruise in the *Bacchante*, was published in the spring of 1885, the editor being the Rev. J. N. Dalton, the Princes' Tutor. In 1887 the Prince visited Ireland; and in 1889 he visited India. He was created Hon. LL.D. of Cambridge in 1888.

CLARETIE, Jules Arnaud Arsène, a French writer, born at Limoges, Dec. 3, 1840, was educated in the Bonaparte Lyceum, at Paris. Adopting literature as a profession, he contributed a very large number of articles to various French and Belgian journals, including *La Patrie*, *La France*, *La Revue Française*, *La Figaro*, and *L'Indépendance Belge*. In 1866 he followed in Italy the campaign against Austria, in the capacity of correspondent of *L'Avenir National*. Two series of lectures, delivered by him in Paris in 1865 and 1868, were interdicted by the Imperial authorities. In 1869 he was condemned to pay a fine of 1000 francs for having described, in *La Figaro*, under the pseudonym of "Candide," the double execution of Martin, called Bidouré, by order of the Prefect Pastoureau, in the department of the Var. In the following year he succeeded M. Francisque Sarcey as dramatic critic of *L'Opinion Nationale*, and subsequently he followed the French army to Metz, and sent letters from the seat of war to

L'Opinion Nationale, *L'Illustration*, and *Le Rappel*. After the fall of the Empire he was appointed by M. Gambetta to the post of secretary of the Commission of the papers of the Tuileries; but he soon resigned that office, and he was next charged by M. Etienne Arago, Mayor of Paris, with the duty of organising a library and lecture-hall in each of the twenty arrondissements of Paris. For a very short time he commanded the second battalion of the volunteers of the National Guard, which was dissolved by General Clément Thomas when those volunteers were replaced by the mobilised National Guards. M. Jules Claretie was present at nearly all the engagements which took place under the walls of Paris; and on Jan. 20, 1871, in the capacity of an officer of the staff, he negotiated with the aide-de-camp of the Crown Prince of Prussia the truce which gave an opportunity for removing the dead from the field of battle at Buzenval. At the general elections of Feb. 8, 1871, he stood as a candidate in the department of Haute-Vienne, in the republican interest; but, being unsuccessful, he resumed his journalistic and literary pursuits. He has published thirty or forty volumes of *causeries*, history, and fiction, of which the novels "Monsieur le Ministre" and "Le Prince Zilah" are the most celebrated. Both have been produced on the stage. On the death of M. Perrin, M. Claretie was appointed Director of the Théâtre Française, 1889. M. Claretie was created Officer of the Legion of Honour in 1887, and elected into the Académie Française in 1889.

CLARK, Sir Andrew, Bart., M.D., F.R.S., LL.D., Cambridge, Edinburgh, and Aberdeen, born on Oct. 28, 1826, was educated first at Aberdeen, and afterwards at Edinburgh. In the extra-academical Medical School of that city he gained the first medals in anatomy, physiology, chemistry, botany, materia medica, surgery, pathology, and practice of physic. For two years he assisted Dr. Hughes Bennett in the pathological department of the Royal Infirmary, and was demonstrator of anatomy to Dr. Robert Knox in the final course of lectures delivered by that celebrated anatomist. For four years Dr. Clark had charge of the pathological department of the Royal Naval Hospital at Haslar, where he delivered lectures on the use of the microscope in practical medicine. In 1854 he took his degree of M.D. at the University of Aberdeen, settled in the metropolis, became a member of the Royal College of Physi-

cians of London, and was elected on the staff of the London Hospital. In 1858 Dr. Clark was made a Fellow of the Royal College of Physicians, in which he held the offices of Croonian and Lumelian Lecturer, Councillor, Examiner in Medicine, and Censor. He has been also Lettsomian Lecturer and President of the Medical Society of London. Dr. Clark originally intended to devote himself exclusively to the cultivation of pathology; but being turned by the force of circumstances from the course on which he had entered, he has been now long occupied in the work of a practical physician. He is the author of numerous essays, lectures, and reviews, the professional portion of which refers for the most part to diseases of the respiratory, renal, and digestive organs. He was created a Baronet in 1883. He is at present Consulting Physician and Lecturer on Clinical Medicine to the London Hospital; an F.R.S., an LL.D. of Cambridge, Edinburgh, and Aberdeen (*honoris causa*), an Honorary Fellow of the King and Queen's College of Physicians in Ireland, and Consulting Physician to the East London Hospital for Diseases of Children. He has held the offices of President of the Metropolitan Counties Branch of the British Medical Association, and President of the Clinical Society. In 1888 he was elected President of the Royal College of Physicians, and was re-elected in 1889 and in 1890. Among his professional writings are:—"On the Anatomy of the Lungs," in Dr. H. Davies's work on "Physical Diagnosis;" "On Tubercular Sputum;" "Evidences of the Arrestment of Phthisis;" "Mucous Disease of the Colon;" Lectures on "The Anatomy of the Lung;" "Pneumonia," and "The States of Lung comprehended under the term Phthisis Pulmonalis" (delivered at the Royal College of Physicians in 1866); "Fibroid Phthisis" (in vol. i. of the *Transactions of the Clinical Society*); "The Work of Fibrinous Pleurisy in the Evolution of Phthisis" (in the *Medical Mirror* for 1870); "Renal Inadequacy;" "The Theory of Asthma;" "Neurasthenia;" "Anæmia;" "Pneumonia;" "Constipation." The following is the speech of the Public Orator at Cambridge (Dr. Sandys) on presenting Sir Andrew Clark for an honorary degree on June 10, 1890. The reference to Mr. Gladstone is particularly happy:—*Salutamus deinceps salutis ministrum, Aesculapii e filiis unum, quem idcirco præsertim Machaona nominaverim quod sæculi nostri oratorum cum Nestore ipso totiens consociatus est;—nisi forte, Romano potius exemplo delectatus,*

mavult Asclepiadis illius disertissimi nomen mutuari, quo medico et amico utebatur Lucius Licinius Crassus, sæculi sui oratorum eloquentissimus. In re publica partium liberalium studiosus, in re privata liberalitate singulari insignis, non modo medicinae sed etiam philosophiæ et religionis penetrabilia ingressus est. Etiam antiquos meministis quondam non de corporis tantum salute sed etiam de rebus fere omnibus quæ vitam anxiam et sollicitam reddant, ab ipso Aesculapio solitos esse oracula exposcere. Viri talis igitur, velut iuriconsulti Romani, domus, est velut civitatis oraculum, unde cives eius, ut Apollo Pythius apud Ennium dicit, consilium expetunt, non salutis tantum sed etiam "summarum rerum incerti," quos incepti certos "compotesque consili dimittit." Ergo virum, quem aut litterarum aut scientiæ aut medicinae doctorem nominare potuissemus, iuris doctorem non immerito creamus. Duco ad vos medicinae professorem emeritum, Regii Medicorum Collegii Londinensis præsidem, baronetum insignem, suavem, eruditum, eloquentem, ANDREAM CLARK.

CLARK, Edwin Charles, LL.D. of Cambridge, F.S.A.; Barrister-at-Law of Lincoln's Inn; Regius Professor of Civil Law, Cambridge; Professor of Roman Law to the London Council of Legal Education; Present Fellow of St. John's and late Fellow of Trinity College, Cambridge; was born in 1835 at Ellinthorpe Hall, Boroughbridge, Yorkshire; educated at Richmond School, Yorkshire, Shrewsbury School, and Trinity College, Cambridge, and was 7th Senior Optime in Mathematical Tripos, Senior Classic, and Senior Chancellor's Medallist (Classical), 1858. His publications are:—"Early Roman Law," 1872; "An Analysis of Criminal Liability," 1880; "Practical Jurisprudence," 1883; "Cambridge Legal Studies," 1888; and various papers published by the Royal Archaeological Institute, and the Cambridge Antiquarian Society.

CLARK, Latimer, C.E., F.R.S., F.R.A.S., M.I.C.E., Past President of the Institution of Electrical Engineers, and Chevalier of the Legion d'Honneur, was born at Great Marlow, in Buckinghamshire, on March 10, 1822, and in the year 1847 he commenced railway surveying, and his brother, Mr. Edwin Clark, who had been engaged in making a number of experiments preliminary to the construction of the Britannia Tubular Bridge across the Menai Strait, having been appointed Superintending Engineer of that great

work, Mr. Latimer Clark became his Assistant Engineer, and afterwards published a small work entitled: "A Description of the Britannia and Conway Tubular Bridges," which has run through several editions. In 1850 he entered the service of the Electric Telegraph Company as Assistant Engineer, under his brother. He afterwards became their Engineer-in-Chief and Consulting Engineer, an office which he held until the General Post Office finally took over the telegraphs, in Jan., 1870. In the year 1853 he made a long series of researches on the subject of the underground telegraph wires, the results of which were afterwards fully set forth in the Government Report, issued in 1861, on Submarine Telegraph Cables. In the course of the experiments he was the first to witness the retardation of electric signals in submarine lines, and to demonstrate that currents of low tension travel as fast as those of high tension. At the request of Professor Airy, the late Astronomer Royal, some of these experiments were repeated before Professor Faraday, and formed the subject of a lecture at the Royal Institution, delivered in Jan., 1854. They are fully described in Faraday's "Experimental Researches." He also aided Professor Airy in the simultaneous announcement of time throughout the country, and assisted in magnetic research, and in 1857 was the means of affording the interesting information that during a display of Aurora Borealis the magnetic needles were strongly affected by the magnetic storm of which this northern light is a sign. He wrote to the Astronomer Royal suggesting that magnetic observatories should be furnished with wires stretching out towards the four cardinal points, to act as feelers for electric currents. This suggestion has since been acted upon with valuable results to science. During his brief intervals of leisure he amused himself with photography, and in 1853 devised a plan of obtaining stereoscopic pictures with a single camera. In 1858 he became a Member of the Institution of Civil Engineers. In the succeeding year, after the failure of the first Atlantic cable, he became for a short time Engineer to the Atlantic Cable Telegraph Company, and in 1860 he was chosen a Member of the Committee appointed jointly by the Government and that Company to inquire into the whole subject of Submarine Telegraph Cables. This investigation lasted for some time, and resulted in the publication of an elaborate and valuable report of considerable extent, embodying all that up to the period of its issue was known with relation to

submarine telegraphy. In 1861 he read a paper before the British Association, "On the Principles to be Observed in Forming Standards of Electric Measurements." In this paper he suggested the names of Ohm, Farad, and Volt, to be employed for the Electrical units, names which have since become so familiar to Electricians. Mr. Latimer Clark also for many years was Engineer to the Indian Government Cable lines in the Persian Gulf. On one occasion the expedition of which he had charge was wrecked in the "Carnatic" on the Island of Shadwan in the Red Sea, and he narrowly escaped with his life. As head of the firm of Clark, Forde, & Co., and in connection with other engineers, he has superintended the submergence of about fifty thousand miles of submarine cables in all parts of the globe. In 1868 he published a work in which he laid down with great clearness the principles of Electric measurement. It was translated into French, Italian, and Spanish, and eagerly perused by foreign *savants*, whose idea of its value may be gathered from the fact that when, some time afterwards, Mr. Latimer Clark was in Paris and entered a scientific meeting then sitting, the President rose from his seat and hailing with delight the advent of their visitor, stated that he had never fully appreciated the laws of Electricity until he had read that work. In 1871 Mr. Latimer Clark published, in conjunction with Mr. Robert Sabine, "Electrical Tables and Formula for Operators in Submarine Cables." In 1873 he read before the Royal Society a paper on "A Single Cell Battery as a Standard of Electro Motive Force," now in general use under the name of "Clark's Standard Cell." In 1875 he was elected the fourth President of the Society of Electric Telegraph Engineers, and in his inaugural address gave some highly interesting outlines of the harbingers, and even what might be called premonitions, of the electric telegraph, mentioning the idea of some old writers, that two magnetic needles would vibrate in unison at any distance apart, though unconnected with each other. He referred to the fact that a Scotchman, named Charles Marshall, or Morrison, of Paisley, had in 1758 published a full and clear description of a practicable electric telegraph, suggesting that the wires should be coated with an insulating material; and he referred to the electric telegraph erected by the late Sir Francis Ronalds, in the year 1816, in his garden at Hammersmith. He bore testimony to the remarkable foresight of Sir F. Ronalds with regard to the value of the telegraph, which, in 1833,

he had proposed that the Government should establish all over the kingdom. The Government, however, snubbed him, and his invention shared the fate of many others, being before its time. Mr. Latimer Clark has taken out about 150 patents in different countries to secure the value of his various inventions, relating not only to electrical telegraphy, but also to engineering work in general.

CLARKE, Lieut.-General Sir Andrew, G.C.M.G., C.B., C.I.E., son of Colonel Andrew Clarke, of Belmont, co. Donegal, was born at Southsea, in 1824, and educated at the Royal Military Academy, Woolwich. He entered the Royal Engineers as second lieutenant, 1844; became captain, 1854; lieutenant-colonel, 1867; colonel, 1872; major-general, 1884; lieutenant-general, 1886. He was aide-de-camp and then private secretary to Sir W. Denison, the Governor of Van Diemen's Land, subsequently a member of the Legislative Council of that colony, served in New Zealand during the years 1847-48, and became a member of the Legislative Council there in 1851. In 1853 he was appointed Surveyor-General of Victoria. He was elected to the Victorian Assembly for Melbourne, under the new constitution, and became Minister for Public Lands, but he resigned office in 1857, and returned to this country in the following year. He commanded the Royal Engineers of the Eastern and Midland districts of England till 1863, when he went on special service to the West Coast of Africa respecting the Ashantee difficulties. On his return he was appointed in Aug., 1864, Director of the Works of the Navy, which office he held till June, 1873. From the latter date till Feb., 1875, he was Governor of the Straits Settlement, and he was next appointed Minister for Public Works in India. He was commandant of the School of Military Engineering at Chatham from 1881 to 1882, when he was appointed Inspector-General of Fortifications. In Nov., 1882 he was dispatched to Cairo, charged with the duty of inquiring into the causes of the sickness and mortality which were prevailing among the British army of occupation, and was invested with full power to make any alterations which he might consider necessary in the sanitary arrangements. Sir Andrew Clarke is the author of several works on engineering.

CLARKE, Charles Baron, F.R.S., F.L.S., F.G.S., born June 17, 1832, at Andover, Hants, is the son of Turner Poulter Clarke, of Andover, J.P., and was edu-

cated, from 8 to 14, under the Rev. Lewis Tomlinson, of Salisbury, from 14 to 19 at King's College School, London, then at Trinity and Queen's Colleges, Cambridge, where he took the degree of B.A. in Jan., 1856 (bracketed third Wrangler). He was called to the Bar in 1858 at Lincoln's Inn, was elected Fellow of Queen's College, Cambridge, 1857. He was Mathematical Lecturer of Queen's College, Cambridge, from 1858-63, entered the Bengal Educational Service in 1866, was superannuated 1887. He has published "Speculations from Political Economy," 1886; and numerous other papers on Political Economy; various papers on music (as in *Nature* Jan., 1883); the "Class-Book of Geography," 1889; and other text-books; also an account of Khasi Dolmen in the Journal of the Anthropological Society. He is a Fellow of the Royal Society, of the Linnean Society, of the Geological Society of London, &c.; and has been for some years past almost exclusively devoted to the studies of Morphological Botany and English History. His principal botanic work is published in the *De Candolle Monographies*, in Sir J. D. Hooker's "Flora of British India," and in the Journals and Transactions of the Linnean Society.

CLARKE, Sir Edward, Q.C., eldest son of Mr. J. C. Clarke, of Moorgate Street, E.C., was born in 1841, and educated at College House, Edmonton, and the City Commercial School, Lombard Street, E.C. He was called to the Bar in 1864 at Lincoln's Inn, and joined the Home Circuit. In 1880 he was created a Queen's Counsel, and two years later was elected a Benchler of his Inn. He was elected member for Southwark a few weeks before the dissolution of 1880, but lost his seat at the general election. Since July, 1880, he has represented Plymouth in the Conservative interest. His first great professional success was made in the well-known "Penge Mystery," and more recently he made a great impression by his able speech in the Pimlico case. On the accession of Lord Salisbury's second Government to power in August, 1886, Sir Edward Clarke was made Solicitor-General.

CLARKE, Hyde, born in London in 1815, was engaged in the Spanish and Portuguese wars of succession. In 1836, as an engineer, he planned and surveyed the Glasgow and South Western Railway, with the Morecambe Bay Embankment, and the development of Barrow. In 1849, having been engaged in acoustic tele-

graphy, he was employed to report on the telegraph system for India, and in 1857 he exerted himself for the extension of hill settlements and railways in India. In 1836 he founded the London and County Bank, and in 1868 was engaged in founding the Council of Foreign Bondholders, which he long administered. He has taken an active part in Oriental and Colonial politics. His early writings from 1837 include works for the Useful Knowledge Society, and numerous books, memoirs, and pamphlets on philosophical subjects, political economy, banking, statistics, railways, international law, foreign loans, and public works. Mr. Clarke is also the author of "Military Life of Wellington," 1849; "English Grammar and Dictionary," 1853; and "Comparative Philology," 1858. He is well known as a philologist and a linguist, having long since acquired the knowledge of a hundred languages.

CLARKE, John Sleeper. American comedian, was born at Baltimore, Maryland, in 1835. At an early age he became a member of an amateur dramatic association in his native city, but he made his *début* as Frank Hardy in "Paul Pry," at the Howard Athenæum in Boston, 1851, and began his first regular engagement at the Old Chesnut Theatre, Philadelphia, as Soto, in "She Would and She Would Not," 1852. He afterwards acted for some years at Baltimore, Boston, New York, and other cities. In 1863 he became joint-lessee of the Winter Garden Theatre, New York, and so continued till 1867, when the establishment was destroyed by fire. In 1865 he purchased with his brother-in-law, Edwin Booth, the Walnut Street Theatre, Philadelphia, and in 1866 became joint-lessee of the Boston Theatre. In the autumn of 1867 he came out at the St. James's Theatre in London, in the character of Wellington de Boots, which he had performed more than a thousand nights in America. He played also Bob Tyke in "The School of Reform," Caleb Scudder in "The Octoroon," and, after a tour in the provinces, revived old comedies, and was very successful as Dr. Pangloss in "The Heir-at-Law." Returning to America in 1870 he remained there till 1871 when he paid another visit to England. In March, 1872, he became proprietor of the Charing Cross Theatre, and afterwards managed the Haymarket Theatre, with the late Mr. E. A. Sothorn. For many years Mr. Clarke has been one of the largest owners and managers of theatres probably in the world, controlling, in addition to his London property and his Philadelphia

Walnut Street Theatre, another theatre on Broad Street in the latter city. Besides managing these establishments he has appeared constantly on the stage both in England and in America, though his home has been chiefly in London.

CLARKE, Mrs. Mary Cowden, the eldest daughter of Mr. Vincent Novello, and sister of Madame Clara Novello, was born in June, 1809, and was married in 1828 to the late Mr. Charles Cowden Clarke, the friend of Lamb, Keats, Hazlitt, and Leigh Hunt. A year after her marriage she commenced her minute analysis of our immortal dramatist, embodying her analysis in the "Complete Concordance to Shakespeare," which, after sixteen years' assiduous labour, was brought to a successful termination, and published in 1845. In addition to this labour of love, Mrs. Cowden Clarke has written, "The Adventures of Kit Bam, Mariner," published in 1848; "The Girlhood of Shakespeare's Heroines," in 1850; a novel called "The Iron Cousin," in 1854; "The Song of a Drop o' Wather, by Harry Wandworth Shortfellow," in 1856; "World-noted Women," in 1857; an edition of "Shakespeare's Works, with a scrupulous revision of the Text;" "Trust and Remittance: Love Stories in Metred Prose," in 1873; and "A Rambling Story," 2 vols., 1874; as well as various magazine articles, chiefly relating to the great masterpieces of dramatic literature, besides a few poems and stories in verse. In conjunction with her husband, she produced "Many Happy Returns of the Day: a Birthday Book," in 1847 and 1860; an annotated edition of "Shakespeare's Plays," in 1869; "Leigh Hunt; a Descriptive Sketch" in *The Century Magazine*, 1882; "Puck's Pranks; a Juvenile Drama" in *The St. Nicholas Magazine*, 1883; "On English Cookery in Shakespeare's time" in *The Merry England Magazine*, 1883; "Verse-Waifs," 1883; "A Score of Sonnets to One Object," 1884; "Salvini's Corrado" in *The Athenæum*, 1885; "Shakespeare's Self, as revealed in his writings," *Shakespeareana*, 1885; "Uncle, Peep, and I; a Child's Novel," 1886; "Shakespeare, as the Girl's Friend" in *The Girl's Own Paper*, 1887; "A Story without a Name" in *The Girl's Own Paper*, 1887; "Centennial Biographic Sketch of Charles Cowden-Clarke," 1887; "Memorial Sonnets, &c.," 1888.

CLAUGHTON, The Right Rev. Thomas Legh, D.D., late Bishop of St. Albans, born Nov. 6, 1808, at Haydock Lodge, Lancashire, was educated at Rugby, and at Trinity College, Oxford, of which he

was successively Scholar, Fellow, and Tutor, and where he graduated B.A. in 1831, taking a first class in classical honours, having previously gained the Chancellor's prize for Latin verse, and Sir Roger Newdegate's prize for English verse. He obtained the prize for the Latin essay in 1832, was appointed Public Examiner in 1836, and was, in 1841, preferred to the vicarage of Kidderminster by the Earl of Dudley, to whose sister he is married. He was Professor of Poetry at Oxford from 1852 to 1857, and Honorary Canon of Worcester; was made Bishop of Rochester in 1867; and was translated to the newly-constituted See of St. Albans in 1877 and resigned in 1890.

CLAYDEN, Arthur William, M.A., F.G.S., &c., born Dec. 12, 1855, at Boston in Lincolnshire, is the eldest son of Mr. P. W. Clayden and his first wife Jane, and was educated at University College School and Christ's College, Cambridge. Mr. Clayden entered the University at the early age of 17, obtained a foundation scholarship in 1875 and graduated in the second class of the Natural Sciences Tripos of 1876, finishing all his examinations before his 21st birthday. In 1878 he was appointed Science Master at Bath College, a post which he held for nine years. In 1887 he resigned his post at Bath and removed to London on his appointment as a Lecturer on the University Extension Schemes of Cambridge and London. He is a Fellow or Member of the Chemical, Geological, Physical and Royal Meteorological Societies, and in 1890 was elected one of the Council of the last. Mr. Clayden is the author of several original papers. The most important are "On the Thickness of Shower Clouds" (Q. J. Royal Meteorological Society, 1886); "On a working model of the Gulf Stream" (Q. J. Royal Meteorological Society, 1889); describing an invention which is a practical demonstration of the Wind theory of Ocean Currents; "Note on some Photographs of Lightning and of 'Black' Electric sparks" (Philosophical Magazine, and Proceedings of the Physical Society, 1889). "On 'Dark' flashes of Lightning (British Association, 1889), two papers which prove that a phenomenon which had puzzled scientific men for a couple of years was nothing but a form of photographic reversal. In addition to his scientific and educational work, Mr. Clayden has had considerable journalistic experience as a leader writer on special topics. He married in 1883 Ethel, second daughter of A. S. Paterson, Esq.

CLAYDEN, Peter William, eldest son of Peter Clayden, of Wallingford and Farringdon, Berks, was born at Wallingford, Oct. 20, 1827, educated privately, for a business career, became minister of the Unitarian Congregation at Boston in 1855, Rochdale in 1859, and Nottingham in 1860. He joined the staff of *The Daily News* as a leader writer on the retirement of Miss Martineau, and on her recommendation, in 1866. In 1868, when *The Daily News* was reduced in price to one penny, Mr. Clayden removed to London, and became assistant editor. He acted as assistant editor and leader writer till August 1887, since which time he has been associated with Mr. J. R. Robinson in the editorship. Mr. Clayden was Liberal candidate for Nottingham, in conjunction with Mr. Charles Seely, now Colonel Seely, at the general election in 1868. He unsuccessfully contested the Norwood Division of Lambeth in the Liberal interest in 1885, and the Northern Division of Islington in 1886. During his residence at Boston he edited *The Boston Guardian*, and at Rochdale wrote leaders for *The Rochdale Observer*. While at Nottingham he contributed to the *Edinburgh Review*, the *Fortnightly Review*, the *Theological Review*, the *Cornhill Magazine*, and later to various other periodicals. In 1873 he established the *Reading Observer* as an organ of Liberal principles in his native county, disposing of it to its present proprietors in 1879. Mr. Clayden is the author of several political and other pamphlets, one of which, on the Redistribution Act in London, is believed to have led to the reconstruction of some of the divisions originally suggested, notably those of Southwark. He published "England under Lord Beaconsfield," 1880; "Samuel Sharpe, Egyptologist and translator of the Bible," 1884; "The Early Life of Samuel Rogers," 1887; and "Rogers and His Contemporaries," 2 vols., 1889. Mr. Clayden is a Fellow of the Institute of Journalists and took an active part in the successful effort to procure for the Institute a Royal Charter. Mr. Clayden has been twice married; first to Jane, eldest daughter of the late Mr. Charles Fowle, of Dorchester, in 1853, and second in 1887, to Ellen, eldest daughter of the late Mr. Henry Sharpe, whose recollections of Rogers have an important place in "Rogers and his Contemporaries."

CLAYTON, Sir Oscar Moore Passey, D.L. is the eldest son of the late Mr. James Clayton, of Percy-street, Bedford-square, by Caroline, daughter of Mr. Edward Kent, of Kingston, Surrey, and was born in London in 1816. He was educated

at Bruce Castle School, Tottenham, whence he proceeded to University College and Middlesex Hospital. Mr. Clayton became a member of the Royal College of Surgeons in 1838 and a Fellow in 1853. He is an Extra Surgeon-in-Ordinary to the Prince of Wales and Surgeon-in-Ordinary to the Duke of Edinburgh. He is also a Deputy Lieutenant for Middlesex and the Tower Hamlets, and a Knight of the Order of Leopold of Belgium. He received the honour of knighthood in Nov., 1882.

CLELAND, Professor John, M.D. (Edinburgh), LL.D. (St. Andrews), D.Sc. (Q.U.I.), L.R.C.S.E., F.R.S., born at Perth in 1835, is the second son of the late John Cleland, surgeon, at Perth. Dr. Cleland was appointed, in 1863, to the chair of Anatomy and Physiology in Queen's College, Galway, and in 1877 to the chair of Anatomy in Glasgow, which he still holds. He is the author of numerous Anatomical Contributions, and the following books:—"Directory for the Dissection of the Human Body," 1876; "Animal Physiology," 1877; "Evolution, Expression, and Sensation," 1881. He is also the author of "Scala Natural and other Poems," 1887; and, in conjunction with others, "Memoirs and Memoranda in Anatomy," vol. I. 1889.

CLÉMENCEAU, Georges Benjamin, M.D. a French physician and politician, born at Mouilleron-en-Pareds (Vendée), Sept. 28, 1841, began his professional studies at Nantes, and completed them in Paris where in 1869 he was created a Doctor of Medicine, and practised at Montmartre. After the revolution of Sept. 4, 1870, he was appointed Mayor of the 18th arrondissement of Paris, and a member of the Commission of Communal Education. At the election of Feb. 8, 1871, he was elected a representative of the department of the Seine in the National Assembly, where he took his place among the members of the Extreme Left, and voted against the preliminaries of peace. On the 18th of March he endeavoured to save the lives of the Generals Leconte and Clément Thomas, but in vain, for he did not arrive at the Rue des Rosiers until after their execution. On this occasion the Central Committee of the Communists, which was sitting at the Hôtel de Ville, resolved that Dr. Clémenceau should be arrested; but he was fortunate enough to elude the vigilance of the insurrectionary police. When the murderers were put upon their trial, Nov. 29, 1871, some of the witnesses accused him of not having interfered as early as he

might have done, but he was warmly defended by Colonel Langlois, whose testimony appeared to clear Dr. Clémenceau from all blame in the matter. However, the accusations led to a duel between Dr. Clémenceau and M. le commandant de Poussargues, who was wounded in the leg by a pistol-shot. Dr. Clémenceau was prosecuted for this affair a month later, the result being that he was condemned by the Seventh Chamber of Correctional Police to be imprisoned for a fortnight, and to pay a fine of twenty-five francs. In the sitting of the 20th of March he introduced in the National Assembly a Bill, signed by the Radical fraction of the Deputies of the department of the Seine, to authorize the election of a Municipal Council for the city of Paris, to consist of eighty members; and he was one of those who signed the manifesto of Deputies and Mayors fixing the municipal elections on the 26th of that month. As a candidate at those elections, he polled 752 votes, but was not elected. After having taken part in the unsuccessful attempts at conciliation between the Government and the Commune, he sent in his resignation both as Mayor and as Deputy, and retired for a short period into private life. On July 23, 1871, he was elected a member of the Municipal Council of Paris for the Clignancourt quarter, and he took a prominent part in the discussions concerning primary secular instruction and financial questions. On Nov. 29, 1874, he was re-elected a member of the Municipal Council, of which he became successively Secretary and Vice-President, and eventually President in Nov., 1875. He was elected a Deputy for the department of the Seine by the 18th arrondissement of Paris, Feb. 20, 1876, and afterwards he became Secretary of the Chamber. In the following April he resigned his place in the Municipal Council. He was again re-elected to the National Assembly by the 18th arrondissement of Paris at the general elections of Oct. 14, 1877. Since that time he has been generally regarded as the leader of the Advanced Left, and as such he has made and unmade many Governments. His opposition to the Tonquin policy decided the fall of M. Ferry, and his support kept M. de Freycinet in office. As yet M. Clémenceau has not held office himself, but no doubt his turn will come. He is editor and chief proprietor of the influential Radical journal *La Justice*. It was a resolution moved by M. Clémenceau, and insisting on a thorough investigation of the Wilson scandal, that led to the overthrow of the Rouvier Government, and the con-

sequent fall of M. Grévy. M. Clémenceau was asked by the President to form a Ministry, but declined, and told the President plainly that the crisis was not a political but a presidential one. He is regarded as one of the most expert swordsmen in France, and acted as one of the seconds to M. Floquet in his duel with General Boulanger in July, 1888.

CLEMENS, Samuel Langhorne, generally known by his pseudonym of "Mark Twain," was born at Florida, Missouri, Nov. 30, 1835. At the age of thirteen he was apprenticed to a printer, and worked at the trade in St. Louis, Cincinnati, Philadelphia, and New York. In 1855 he became for a short time pilot on the Mississippi river, and in 1861 went to Nevada as private secretary to his brother, the Secretary of the territory. He then went to the mines, and afterwards for several months acted as reporter for Californian newspapers. He spent six months in the Hawaiian Islands in 1864, and after delivering humorous lectures in California and Nevada, returned to the East in 1867, where he published "The Jumping Frog." In that year he embarked with a large number of other passengers on a pleasure excursion up the Mediterranean, to Egypt, and the Holy Land, which he describes in "The Innocents Abroad," 1869. For a time he was editor of a daily newspaper, published in Buffalo, New York, where he married a lady possessed of a large fortune. In 1872 he visited England, giving several humorous lectures; and a London publisher made a collection, in four volumes, of his humorous papers, adding, however, many which the author asserts were never written by him. In 1874 he produced in New York a comedy, "The Gilded Age," which had a remarkable success, owing mainly to the personation, by Mr. Raymond, of the leading character, "Colonel Mulberry Sellers." Mr. Clemens is a frequent contributor to the magazines, and in addition to the books mentioned above has published—"Roughing It," 1872; "Adventures of Tom Sawyer," 1876; "Punch Brothers, Punch," 1878; "A Tramp Abroad," 1880; "The Prince and the Pauper," 1882; "The Stolen White Elephant and other Tales," 1882; and "Life on the Mississippi," 1883. In 1884 he established in New York the publishing house of C. L. Webster & Co., which issued in 1885 a new story by him entitled "Adventures of Huckleberry Finn," a sequel to "Tom Sawyer," and brought out in that and the following year Gen. Grant's "Memoirs," of which Mrs. Grant's share of the profits

amounted, in Oct., 1886, to \$350,000; "A Connecticut Yankee in King Arthur's Court," 1889, is Mr. Clemens's latest work. His books have been republished in England, and translations of the principal ones in Germany.

CLEVELAND, Stephen Grover, twenty-second President of the United States, was born at Caldwell, New Jersey, March 18, 1837. When he was three years of age his father, who was a Presbyterian minister, moved to Fayetteville, Onondaga co., New York, where they lived until 1851, when the family went to Clinton, Oneida co., leaving Grover in Fayetteville, where he remained about two years as a clerk in the village store. On the death of his father in 1853 he went to New York, and for about a year was book-keeper and assistant teacher in the Institution for the Blind. Thence he removed to Buffalo in 1855, where he studied law and began its practice in 1859. In 1863 he was appointed Assistant District Attorney for Erie co., and in 1865 was the Democratic nominee for District Attorney, but failed to secure the election. From Jan. 1, 1871, to Jan. 1, 1874, he was Sheriff of that county, and in 1881 was elected Mayor of Buffalo. The reformed methods of administering the city's affairs, instituted by him while filling that office, led to his election in the following year as Governor of the State of New York, by a majority of 192,000 votes over his opponent, Judge Folger, the Republican Secretary of the U.S. treasury. This phenomenal success, as indicative of the probability of his carrying New York and of attracting the Independent vote, secured him the Democratic nomination for the Presidency in 1884, and in Nov. of that year he was elected over Mr. Blaine, the Republican candidate. Mr. Cleveland's administration, 1885-89, was marked by great prosperity to the country at large; by the admission of four new States (Washington, Montana, North Dakota and South Dakota) to the Union; by an extension of the reform in the Civil Service begun under his predecessor, Mr. Arthur; and by a freer use of the veto-power than had generally been exercised by other Presidents. On the meeting of Congress in Dec., 1887, he devoted his annual message mainly to the advocacy of a reduction in tariff duties in order to prevent the further increase of the surplus in the U.S. treasury, which was already large and which threatened to cause financial difficulties. This message occasioned a prolonged discussion of the principles of protection, and furnished

the issue in the National Political Campaign of 1888, when Mr. Cleveland was renominated by the Democrats, and Mr. Harrison was chosen as the Republican candidate. Although the former received a popular majority larger than he had had in 1884, the latter had the greater number of electoral votes and accordingly on Mar. 4, 1889, Mr. Cleveland left Washington and removed to New York, where he has since been engaged in the practice of law.

CLIFFORD, Frederick, was born in 1828, and called to the Bar of the Middle Temple in 1859. He served as Assistant Boundary Commissioner under the Reform Act of 1867. Mr. Clifford, who was for many years on the literary staff of the *Times*, and practises at the Parliamentary Bar, is the author of a treatise on "The Steamboat Powers of Railway Companies," 1865; and is joint author (with Mr. Pembroke Stephens, Q.C.) of a treatise on "The Practice of the Court of Referees on Private Bills in Parliament," 1870, a standard text-book in Private Bill Practice. He is also joint author of yearly volumes of Reports of cases as to the Locus Standi of Petitioners, decided each Session by the Court of Referees from 1867 down to the year 1884. But his chief work in this connection is a "History of Private Bill Legislation," in two volumes, 1885-6, dedicated, by permission, to Her Majesty the Queen; a work of great labour, research, and of general interest to historical students for the light it throws upon social progress in Great Britain. He published, in 1875, "The Agricultural Lock-out of 1874; with Notes upon Farming and Farm Labour in the Eastern Counties," founded on a series of letters which appeared in the *Times*; and he is the author also of a treatise on "The Agricultural Holdings Act, 1875;" of other Papers reprinted from the Journal of the Royal Agricultural Society; and of an article on "English Land Law," forming one of the treatises prepared under the direction of the Royal Agricultural Society, and translated and published by "La Société des Agriculteurs de France," for the "Congrès International de l'Agriculture," held in Paris in 1878.

CLIFFORD, John, D.D., B.Sc., LL.B., F.G.S., General Baptist Minister (new connection), was born at Sawley, near Derby, Oct. 16, 1836, educated at the Nottingham General Baptist Theological College, 1855-58, and at University College, London, 1858-60, taking the London University degrees of B.A., 1861, B.Sc., 1862,

with honours in Geology, Logic and Moral Philosophy; M.A., 1864, bracketed first; LL.B., 1866, with honours in Principles of Legislation. Since 1858 he has been Pastor of the Westbourne Park Church, Paddington, London. He was President of the General Baptist Association, 1872; and Secretary, 1876-78, of the London Baptist Association; President, 1879; and from 1870 to 1883 (inclusive), edited *The General Baptist Magazine*; and was President of the Baptist Union of Great Britain and Ireland, 1888. He is the author of "Familiar Talks on 'Starting in Life,'" London, 1872; "George Mostyn," 1874; "Is Life Worth Living? an Eightfold Answer," 1880, 6th ed., 1889; "English Baptists: Who they are, and What they have Done" (edited), 1883, 2nd ed. 1884; "Daily Strength for Daily Living, Expositions of Old Testament Themes," 2nd ed., 1886; "The Dawn of Manhood," a book for Young Men, 1886; "Baptist Theology," *Contemporary Review*, March, 1888; "The Great Forty Years," 1888; "The New City of God," 1888; "The Place of Baptists in the Evolution of British Christianity," *Times*, 1889; "Who are Christian Ministers?" *Lippincott's Magazine*, March, 1890, etc.

CLIFTON, Professor Robert Bellamy, M.A. (Cantab. et Oxon.), F.R.S., F.R.A.S., only child of the late Robert Clifton, Esq., was born at Gedney, Lincolnshire, March 13, 1836. After receiving his early education at private schools he entered University College, London, in 1852, and studied Mathematics under the late Professor De Morgan. In 1855 he proceeded to St. John's College, Cambridge, and in 1859 graduated (B.A.) as sixth Wrangler, gaining also the second Smith's Prize for proficiency in Mathematics and Natural Philosophy. In 1860 he was elected to a Fellowship in St. John's College, and also became Professor of Natural Philosophy in Owens College, Manchester, an appointment which he retained until elected Professor of Experimental Philosophy in the University of Oxford in 1865. In 1868 he was admitted a Fellow of the Royal Society. In 1869 a Fellowship in Merton College, Oxford, was conferred upon him, and he subsequently became also a Fellow of Wadham College, Oxford. Prof. Clifton is the author of some papers on subjects connected with optics and electricity, but he has principally devoted himself to the development of physics, as a branch of study, in the University of Oxford. The Clarendon Laboratory—the first laboratory erected in England specially for instruction in

practical physics—was designed and organised by him. From 1879 to 1886 he was a member of the Royal Commission on Accidents in Mines, and he took an active part in the investigations involved in the prosecution of the inquiry. Prof. Clifton has been President of the Physical Society of London, 1882-84; he is a Fellow of the Royal Astronomical Society, and of several other scientific societies in London, Cambridge, and Manchester. He is also a member of the Board of Visitors of the Royal Observatory at Greenwich.

CLOUGHER (Bishop of). See STACK, THE RT. REV. CHARLES MAURICE.

CLOUGH, Miss Anne Jemima, was born in Liverpool, and is the only daughter of James Butler Clough, of an old Welsh family in Denbighshire, and of Annie Perfect, of Pontefract, Yorkshire, and is the sister of the poet, the late Arthur Hugh Clough. When three years of age she went with her family to live in Charleston, South Carolina, U.S.A., and lived there till she was past sixteen. During her residence in America she travelled in the Northern States and Canada, and on her return to England her home was in Liverpool, where she saw a great deal of her brother, A. H. Clough, who soon after went to Balliol College, Oxford. One of Miss Clough's chief interests at this period was in visiting a large National School both on Sundays and on week days. In the year 1842 she began to keep a private day school, while still continuing her work in the National Schools. In 1844 she lost her father, which made a great change in her life; but she went on with the day school except for a brief interval. In 1852 Miss Clough and her mother left Liverpool and went to reside in Ambleside, where, after a short time, she again opened a school, this time for boys and girls belonging to the upper and middle classes in Ambleside and the neighbourhood. In the year 1860 she lost her mother, and in the following year her brother, Arthur Hugh Clough, died at Florence, whither Miss Clough had gone to join him and her sister-in-law only a few days before his death. In 1862 she gave up her school and went to the South, to be with her sister-in-law and her family. She found a home among them till 1871, and during those years she became acquainted with many women interested in education. Remembering her past experience in school-keeping, Miss Clough's mind became strongly imbued with the idea of combined education, and she expressed her views on this

subject in an article in *Macmillan's Magazine* in 1864. She went to Liverpool and Manchester to try to get up lectures, and, being well received and helped by many ladies interested in educational matters, the plan was eventually carried out. The North of England Council for Promoting the Higher Education of Women was constituted, and held its first meeting in Leeds at the house of the late Dr. Heaton. This council kept up the work for nine years, and University men were found willing to work in this new field of tuition. From that Northern Council the idea emanated of the Cambridge Higher Local Examinations. They were first instituted for women only, and then opened to men. Lectures for women were established in Cambridge in Jan., 1869, by a committee of University men and ladies acting in concert with them; and in Oct., 1871, at the invitation of Dr. Henry Sidgwick, now Professor of Moral Science, Miss Clough came into residence at Cambridge for the purpose of taking charge of a house of five students, who wished to take advantage of the lectures open to women and to go in for the examinations. Under Miss Clough's excellent management, the number of students rapidly increased, and it was soon found that there was no house in Cambridge large enough to accommodate all those who wished to profit by the educational advantages held out to them. In 1875 Newnham Hall was built, and a second building, larger than the first, was opened in 1880. But the influx of students was still not met, and a third very handsome hall was erected in 1888. Ably supported in her efforts as Miss Clough was, she nevertheless had a difficult task before her, and that it has been performed with so little friction, and been crowned with such remarkable success, is chiefly owing to her personal force of character. Unselfish devotion to the cause which she has at heart, great powers of organisation, tact, and unfailing sympathy in dealing with individuals of the most diverse dispositions, are only a few of the many qualities which have served to endear her to all who have come within the sphere of her influence.

CLUSERET, Gustave Paul, a French military adventurer and Communist general, was born at Paris June 23, 1823. His father was an *ancien officier* of the First Empire, and became colonel of a regiment of the line under the Monarchy of July. Young Cluseret studied in the military school of St. Cyr, and upon leaving, in 1845, was appointed a sub-

lieutenant of his father's regiment, the 55th. In the revolution of Feb. 1848, Cluseret was in command of a section of grenadiers told off for the protection of the Bank. When the National Guard of the *quartier* relieved the troops, Baron d'Argout hid the young officer and his soldiers for two days, and then assisted them to escape in disguise from the fury of the people. In the days of June, Cluseret was elected a chief of a battalion of National Guards, and for his bravery under fire was named Chevalier of the Legion of Honour. After the dissolution of the Garde Mobile he returned to his old regiment with the grade of lieutenant, and shortly afterwards was put on the retired list in consequence of a manifestation of politics adverse to the Prince-President. He was replaced at the intercession of Marshal Magnan, an old friend of his father's, and in 1853 was transferred to the Chasseurs-à-pied, with whom he went through the campaign in the Crimea, was made captain, and, after the peace, went to Africa, where, as his biographer, M. Jules Richards, delicately puts it, "the elasticity of his principles in the matter of the ownership of property made it necessary for him to resign." In 1860 he turned up with the army of Garibaldi, where he became lieutenant-colonel. When the war broke out in America he joined the Federals, and fought against the South with the grade of a colonel. After the close of the American war Cluseret returned to France and took up the profession of journalism. Another indication of "elasticity of principle" led to the necessity of his quitting Paris, and he came over to England, where he mixed himself up with the Fenian agitation. Returning again to France, he got into trouble by reason of the publication of a newspaper article to which his name was appended, and was condemned to two months imprisonment in St. Pélagie. There, in addition to the acquaintance of his biographer, he made that of certain agents of the International Society, the effect of which was shortly afterwards seen in his organizing the strike of the shop-assistants in Paris, in 1869. After the elections of June in that year, Cluseret was expelled from France at the instance of the Minister of War, who had reason to believe that the ex-captain was tampering with the *sous-officiers* of the garrison. Immediately upon the proclamation of the Provisional Government of Sept. 4, 1870, the exile turned up again, and his subsequent history is legibly written in the records of revolution at Marseilles, Lyons, and Paris. For a short

time he was at the head of the military operations of the Paris Commune, but, like nearly all the other agents of that body, he soon fell under suspicion, and was arrested, though he was released from custody shortly before the entrance of the Versailles troops. It was reported that he was shot between Sept. 22-26, 1871; but, notwithstanding the vigilant search made for him by the police, he remained in concealment in Paris till the end of the month of December, 1871, when he escaped to London. Soon afterwards he went to the United States. The Third Council of War, sitting at Versailles, condemned him to death, *par contumace*, Aug. 30, 1872. Cluseret and his publisher were, on Jan. 27, 1881, sentenced by default to two years' imprisonment and 3000 f. fine for an article inciting soldiers to mutiny.

COBBE, Miss Frances Power, daughter of Mr. Charles Cobbe, of Newbridge House, co. Dublin, D.L., J.P. (who fought at Assaye as Lieutenant in the 19th Light Dragoons), was born Dec. 4, 1822, and educated at Brighton. She has been a frequent contributor to the periodicals of the day, and is the author of the following works:—"An essay on Intuitive Morals" 1855 (3rd edit., 1859); "Religious Duty," 1857 (2nd edit., 1864); "Pursuits of Women," 1863; "Cities of the Past," 1863; "Broken Lights," 1864 (3rd edit., two American edits.); "Italics," 1864; "Studies Ethical and Social," 1865; "Hours of Work and Play," 1867; "Dawning Lights," 1868; "Alone, to the Alone," 1871 (3rd edit., 1881); "Darwinism in Morals," 1872; "Hopes of the Human Race," 1874, 1880; "Re-echoes," 1876; "False Beasts and True," 1875; "Duties of Women," 1880 (3rd English, 8th American edit., 1889); "The Peak in Darien," 1881; "A Faithless World," 1885; "The Scientific Spirit of the Age," 1888; "The Modern Rack," 1889; "The Friend of Man" (2nd edit.), 1890. Besides these books Miss Cobbe has issued a great number of pamphlets, among which are:—"The Workhouse as an Hospital," 1861; "Friendless Girls, and How to Help Them," 1861, containing an account of the original Preventive Mission at Bristol; "Female Education," 1862, (a plea for granting University Degrees to women), and more than a hundred pamphlets and leaflets on the vivisection question. Miss Cobbe resided for some years in Bristol with the late Mary Carpenter, for the purpose of working at her reformatory and ragged schools; and subsequently interested herself in plans for befriending young servants and

for the relief of destitute incurables. After a residence in Italy she settled in London, and was engaged, besides literary work, in promoting the Act (41 Vict. c. 19) of 1878, whereby wives whose husbands have been convicted of aggravated assaults upon them are enabled to obtain Separation Orders; and also in aiding the movement for obtaining Parliamentary suffrage for women. In 1880-81 she twice delivered to audiences of ladies a course of lectures on the Duties of Women; these have been largely circulated in America, and also translated and published in Danish, Italian and French. During the last fifteen years Miss Cobbe has been principally occupied in founding and directing as Hon. Sec. the Victoria Street Society for the Protection of Animals from Vivisection, an Association of which the late Lord Shaftesbury was President. She has now resigned her office and the editorship of the *Zoophilist*, and has become a resident in Wales; but continues to work and, occasionally, to speak at meetings on behalf of the cause of humanity to animals as opposed to the demands of biological science.

COCKLE, Sir James, Kt., (by patent July 29, 1869) F.R.S., F.R.A.S., 2nd son of the late James Cockle, formerly of Great Oakley, Essex, was born Jan. 14, 1819, and educated at Stormond House, Kensington, 1825-29; at Charterhouse, 1829-31; and afterwards under the private tuition of the late Rev. Christian Lenny, D.D. He left England on Nov. 19, 1835; and, returning after a year's sojourn in the West Indies and the United States of America, entered into Residence at Trinity College, Cambridge, Oct. 18, 1837; is a Wrangler of 1841; B.A., of 1842; and M.A., of 1845; and was entered as a student at the Middle Temple, April 12, 1838. He practised as a special pleader, 1845-6, was called to the Bar at the Middle Temple, Nov. 6, 1846, and joined the Midland Circuit at the Nottingham Spring Assizes 1848. He was formerly, 1863-79, Chief Justice of Queensland; was senior commissioner for the consolidation (effected in 1867) of the statute law of Queensland. He had in April, 1862, drafted the "Jurisdiction in Homicides Act" (Imperial). He has been, and is, 1888-9, on the Council of the Royal Astronomical Society, of which he was elected a Fellow on March 10, 1854; was elected a Fellow of the Royal Society (London) on June 1, 1865; has been, 1886-8, President, having previously been and now being Vice-President of the London Mathematical Society of which he was elected a Fellow on

June 9, 1870; was President of the Queensland Philosophical Society, 1863-1879; is an honorary member of the Royal Society of New South Wales and is a Corresponding Member of the Manchester Literary and Philosophical Society; and has been honorary treasurer, 1884-89, of the Savage Club. He married on Aug. 22, 1855, Adelaide Catherine, elder surviving daughter of the late Henry Wilkin, formerly of Walton, Suffolk.

COLCHESTER, Bishop of. See **BLOMFIELD**, THE RT. REV. ALFRED, D.D.

COLE, Vicat, R.A., landscape painter, was born at Portsmouth in 1833, and received his earliest instruction in art from his father, Mr. George Cole, a well-known member of the Society of British Artists. Afterwards he resorted wholly to nature in the open English landscape for his materials, and the study of the means by which to transfer them with effect to canvas. Both he and his father were still resident at Portsmouth in 1852, when Vicat Colesent his first exhibited pictures to London. These were two river scenes sketched in the picturesque locality of the Wye: one was entitled "Scene on the Wye, Tintern;" the other "From Symond's Yat on the Wye." They were exhibited at the Society of British Artists. Before another year arrived he had paid a visit to the Continent, from which resulted a view of "Marienburg Kloster, on the Moselle," exhibited at the Royal Academy in 1853, with another work, "Ranmoor Common, Surrey," a county whose beautiful scenery has furnished this artist with subjects for many of his finest works. In 1858 he was elected a member of the Society of British Artists, and during several succeeding years he was a regular exhibitor in Suffolk Street. In 1860 he exhibited there "A Surrey Corn-field—a view near Leith Hill, Dorking," which by its truthful realisation of Nature in her richest autumn garb, its breadth of treatment, and skilful handling, commanded universal admiration. The Society for the Encouragement of the Fine Arts bestowed their silver medal upon the artist for this performance. The picture was subsequently exhibited in the International Exhibition of 1862. In 1864, following the example of Stanfield, Roberts, Creswick, and others, who had been members and exhibitors at Suffolk Street, Mr. Cole retired from the Society of British Artists to become a candidate for honours at the Royal Academy. The most important works which he exhibited at the Academy were: "The Decline of Day," 1864; "Spring Time," 1865, the

subject being suggested by one of the songs in "Love's Labour Lost;" "Evening Rest," and "Summer's Golden Crown," 1866; A large stormy sea-piece, called "St. Bride's Bay," 1867; "Sunlight Lingering on the Autumn Woods," 1868; "A pause in the Storm at Sunset," "Summer Flowers," and "Floating Down to Camelot," 1869; "Sunshine Showers," and "Evening," 1870; "Autumn Gold," 1871; "Noon," 1872; "Hay-time" and "Summer Rain," 1873; "The Heart of Surrey" and "Misty Morning," 1874; "Richmond Hill," "Loch Scavaig, Isle of Skye," and "Summer: noon," 1875; "The Day's Decline," "Summer Showers," and "Arundel," 1877; "A Showery Day," "The Alps at Rosenlauri," and "A Surrey Pastoral," 1878; "Ripening Sunbeams," "Leith Hill, from Denbies," and "Box Hill, from Denbies," 1879; "A Thames Backwater," "The Leaves of Wasted Autumn Woods," "On Silver Thames" and "The Mist of the Morning," 1880; "Wargrave," "August Days," and "Streathley," 1881; "The Sources of the Thames," "In Sylvan Solitude," and "Abington," 1882; "Windsor" and "Autumn Morning," 1883. He was elected an Associate of the Royal Academy in Feb., 1870, and a Royal Academician, June 16, 1880. His favourite field of study and the source of most of his subjects is Surrey with its picturesque hills and dales, heaths and woodland, cornfield and pasturage.

COLENZO, The Rev. W., F.R.S., F.L.S., belongs to an old Cornish family, and was born at Penzance in 1811. He is a first cousin to the late Bishop of Natal, John William Colenso, celebrated as a mathematician and biblical critic. In his youth he learned the arts of printing and bookbinding, and worked in the office of Watts & Son, 2 Temple Bar, Crown Court, where he was for a time engaged on work for the British and Foreign Bible Society. In the year 1833, the Church Missionary Society—after many and urgent appeals from the resident missionaries—decided to send out a press and outfit to far-distant New Zealand; but had some difficulty in finding a printer to take charge. About the end of the year, Mr. Colenso was introduced to the secretaries of the mission, and was definitely engaged, in the double capacity of missionary and printer. Events justified the choice, for no better man could have been found. On Jan. 3, 1835, the press and plant were landed, and on Feb. 17, 1835, was worked off, in the presence of admiring spectators, the first

copy of the first book printed in New Zealand—the Epistles to the Ephesians and Philippians, in the Maori language. After long delay, supplies of paper arrived; and in Dec., 1837, under difficulties such as perhaps no printer ever had to surmount since the first invention of the art, Mr. Colenso completed his great work—the entire New Testament, in octavo, small-pica type. Out of the larger edition of six thousand copies, only one is now known to exist—the volume in Mr. Colenso's own possession. It is an excellent piece of work, admirably printed throughout, and strongly and neatly bound. No one looking over the pages of this interesting relic would suspect in what circumstances of difficulty it was produced. Mr. Colenso's time was thenceforward chiefly devoted to the ordinary mission-work, in the course of which he traversed nearly the whole of the North Island on foot—a tremendous undertaking in the days before roads and bridges existed. Twice he crossed the great snowy range of the Ruahine—a feat few would venture to imitate. For two years he resided with Bishop Selwyn, at St. John's College, Waimate; in 1844 he took orders, and in the same year took up his abode in Hawke's Bay, where he has since remained. Mr. Colenso is the only surviving European who was present on the important occasion of the signing of the Treaty of Waitangi, on Feb. 6, 1840; and his latest published work, issued from the Government press, is a detailed account of the proceedings, written at the time. As a man of science, Mr. Colenso has a wide reputation. There is no greater authority on Maori arts, antiquities, myths, and legendary lore, or on the natural history of the Islands. He is a Fellow of the Linnean Society, and in recognition of his distinguished contributions to botanical science was elected Fellow of the Royal Society. From the first foundation of the New Zealand Institute he has been the largest and most valued contributor to its transactions. He was the first to identify the fossil remains of the gigantic *dinornis*—the *moa* of Maori proverb—as those of a bird. He has in manuscript a voluminous lexicon of the Polynesian language, the labour of many years. Advancing age has neither quenched his old fire, nor dimmed his intellect, and as his years increase, so does his love of nature. Most of his time is now spent in his favourite woods far inland, where he still finds new ferns and lovely plants hitherto unknown. He knows of rare trees in many hidden nooks as yet untouched by

fire and steel, and watches for perfect blossoms and ripened seeds, to send as tokens to friends in distant lands. On many a quiet sabbath day he preaches from a country pulpit or the desk of a village school. He is esteemed by all, and beloved by those who know him well. In his home in Napier, he has a unique collection of natural specimens and curiosities of native art, and a large and valuable library; but of all these treasures there is none so highly prized as his copy of the sacred volume, printed amid such strange surroundings and under such extraordinary difficulties, fifty-three years ago.

COLERIDGE, Lord, The Right Hon. John Duke Coleridge, F.R.S., D.C.L., Honorary Fellow of Exeter College, Oxford, is the eldest son of the late Right Hon. Sir John Taylor Coleridge, of Heath's Court, Ottery St. Mary, by Mary, eldest daughter of the late Rev. Gilbert Buchanan, LL.D., Vicar of Woodmansterne, and Rector of Northfleet, and was born in the year 1821. His lordship was educated at Eton, and at Balliol College, Oxford, where he obtained a scholarship, and graduated B.A. in 1842, he was elected to an open Fellowship at Exeter College in 1843, and graduated M.A. in 1846, in which year he married and ceased to be a Fellow of Exeter College. He was called to the Bar at the Middle Temple, Nov. 6, 1846, and went the Western Circuit, of which he was for some years the leader. In 1855 he was appointed Recorder of Portsmouth, and was created a Queen's Counsel in 1861, being soon afterwards nominated a Bencher of the Middle Temple. He was an unsuccessful candidate for the representation of Exeter in August, 1864, but was elected for that city in July, 1865, and continued to represent it till Nov., 1873. In Dec., 1868, on the formation of Mr. Gladstone's Government, he was selected to fill the office of Solicitor-General, when he received the honour of knighthood, and in Nov., 1871, on Sir Robert Collier being appointed to a judgeship in the Judicial Department of the Privy Council, Sir John Duke Coleridge was appointed to succeed him as Attorney-General. In 1871 he was offered and declined the office of Judge of the Court of Admiralty, Probate, and Divorce, and on the retirement of Lord Romilly, in 1873, from the Mastership of the Rolls, Sir John Coleridge, as Attorney-General, though a member of the Common Law Bar, received the first offer of that appointment, but after consideration he declined the office, which was conferred

upon Sir George Jessel, the Solicitor-General, who was a member of the Equity Bar. Soon afterwards, however, the death of Sir William Bovill left the Chief Justiceship of the Court of Common Pleas at the disposal of the Government, and this high office was at once conferred upon Sir John Coleridge, who was sworn in as Lord Chief Justice, Nov. 19, 1873. In the following month he was raised to the peerage by the title of Baron Coleridge of Ottery St. Mary, in the county of Devon. He was appointed Lord Chief Justice of England on the death of Sir Alexander Cockburn in Nov., 1880. To him was granted, for the first time in English history, the patent under this title, all former holders of this office having been described in their patents as Lord Chief Justice of the Court of Queen's Bench. Lord Coleridge has been a contributor to the *Edinburgh Review* and other periodicals. His lordship married, in 1846, Jane Fortescue, third daughter of the Rev. George Turner Seymour, of Farringfordhill, in the Isle of Wight; she died in 1878. In 1885 he married again, Amy Augusta Jackson, the eldest daughter of Henry Baring Launford, Esq., of the Bengal Civil Service. His eldest son is the Hon. Bernard John Seymour Coleridge, M.P. for the Attercliffe Division of Sheffield.

COLLADON, Daniel, was born on Dec. 15, 1802, at Geneva, where he continued his studies and wrote his earliest memoirs, but in 1825 he went to Paris, where he remained ten years, subsequently returning to his birthplace. Jointly with Charles Sturm he obtained in 1827 the Grand Prix of the Institute for their paper on the compressibility of liquids and on the velocity of sound in water; the latter was based upon observations made between Rolle and Thonon at the two ends of the Lake of Geneva, the first of the kind ever made, and which gave for this velocity 1492 yards per second, a velocity more than four times that of sound in air. In 1824 he obtained first prize for a photometer, and in 1825 one for a new water supply for Châlons. In 1885 the Academy of Sciences of Paris awarded him the Fournayron prize for his discoveries made in 1852 relative to the driving of tunnels by means of compressed air. In 1872 M. Louis Favre obtained his assistance as Consulting Engineer in connection with the driving of the Great St. Gothard tunnel. It is impossible to give a complete list of his memoirs, but they deal with photometry, magnetism, atmospheric electricity, fixed and feathered floats for steamer paddle-

wheels, the propagation of light in curved lines in the interior of liquid threads (the essential principle of luminous fountains), geology, hail, waterspouts, &c. Mr. Colladon is a correspondent of the French Institute and of the Royal Academy of Sciences, Turin; Member of the Geological Society of Vienna, foreign member of the Royal Meteorological Society, and of numerous other societies, Officer of the Legion of Honour and Commander of the Order of SS. Maurice and Lazare.

COLLET, Sir Mark Wilks, Baronet, J.P., was born in London in 1816, is the second son of Mr. James Collet, a London merchant, and was educated abroad. He is a partner in the house of Brown, Shipley & Co., London; was elected a Director of the Bank of England in 1866; filled the office of Deputy Governor of the Bank from 1885 to 1887, and of Governor from 1887 to 1889. He was created a Baronet in 1888 in recognition of services rendered as Governor of the Bank in connection with the Conversion of the National Debt, effected in that year. He is a J.P. for the County of Kent, and for the County of London, and also a Commissioner of Lieutenancy for the City of London.

COLLINGS, Jesse. M.P., was born in Dec. 1831, in the parish of Littleham, Exmouth, Devon, and educated at Church House School, Stoke, near Plymouth. At the age of nineteen he lost his father, and having to make his own way in the world, entered the service of Messrs. Booth & Co., Birmingham, as junior clerk. He afterwards lived for some years at Heavitree, near Exeter, and took an active part in educational and political work, being an earnest supporter of industrial schools and free education. In 1866 he settled in Birmingham as head of the firm, which was thenceforth carried on under the name of Messrs. Collings and Wallis. When the National Education League was formed in 1868, with Mr. Chamberlain as Chairman, Mr. Jesse Collings was hon. secretary, and laboured hard to promote its doctrines. In 1873 he was elected to the Birmingham School Board, and after some years of work for the improvement of the citizens of Birmingham he was elected Mayor in 1878. In 1880 he was elected for Ipswich, and was again returned at the general election of 1885, being appointed Secretary to the Local Government Board, of which Mr. Chamberlain was President. But on the hearing of the Ipswich Election Petition, 1886, he lost his seat on account of bribery and corruption by

his agents. In 1886 he retired from the office of Alderman of Birmingham after 18 years' experience of every kind of municipal work. In politics Mr. Collings is a Radical, but is opposed to Mr. Gladstone's latest Irish policy. He is the first founder and president of the Allotments and Small Holdings Association, and has published a pamphlet on the Land Question, 1886. After the dissolution of 1886 Mr. Collings turned to Birmingham, and was elected as a Unionist-Liberal for the Bordesley division of that town.

COLLINGWOOD, Cuthbert, M.A. and B.M. Oxon., F.L.S., &c., was born at Greenwich, Dec. 25, 1826, and educated at King's College School, Christ Church, Oxford, Edinburgh University, and Guy's Hospital. He also studied in Paris and Vienna. From 1858 to 1866 he resided in Liverpool, occupying during that period the chair of Botany in the Medical School, and that of Biology in the School of Science. He was also senior physician to the Liverpool Northern Hospital. Dr. Collingwood has been a Fellow of the Linnean Society since 1853, and sat on the Council in 1868. In 1866-67 he undertook as a volunteer, under the sanction of the Admiralty, a scientific voyage for the study of marine zoology, &c., visiting China, Formosa, Borneo, and Singapore; the results being recorded in "Rambles of a Naturalist on the Shores and Waters of the China Sea," 1868, in numerous papers read before scientific societies, and in scientific journals. He is the author of "A Vision of Creation," "The Travelling Birds," and numerous scientific papers. In 1876-77 Dr. Collingwood travelled in Palestine and Egypt, and published an account of his journey.

COLOMB, Sir John Charles Ready, K.C.M.G., born May 1, 1838, is the son of General G. T. Colomb, by Mary, daughter of Sir A. B. King, Bart. He was educated privately and at the Royal Naval College, and served in the Royal Marine Artillery, 1854-69. He is the author of a series of lectures, 1869-86, delivered before the Royal United Service Institution, and subsequently published, "On the Distribution of Our War Forces;" "General Principles of Military Organization;" "Russian Development;" "Our Naval and Military Position in the North Pacific;" "The Naval and Military Resources of Our Colonies;" "Naval Intelligence and Protection of Commerce in War;" "The Use and Application of Marine Forces, Past, Present, and

Future;" "Imperial Federation, Naval and Military;" "The Protection of Our Commerce," 1867; "Imperial Strategy," 1871; "Colonial Defence and Colonial Opinion," 1876; "The Defence of Great and Greater Britain," 1879; and has received the thanks of the Colonial Governments. He has contributed to *Blackwood*, *Fraser*, *Nineteenth Century*, *Murray's Magazine*, etc. He was one of the founders of the Imperial Federation League in conjunction with the late Rt. Hon. W. E. Forster, M.P., was elected M.P. for the Bow and Bromley Division of the Tower Hamlets, 1886, and was made K.C.M.G. in 1889.

COLQUHOUN, Archibald Ross, A.M., M.I.C.E., F.R.G.S., gold medallist of the Royal Geographical Society, was born off the Cape in March, 1846, and is the son of Dr. Archibald Colquhoun, of Edinburgh, who gained renown in the H.E.I.C.S. during the first Afghan campaign. Mr. Colquhoun was educated in Scotland and on the continent; he entered the Indian Public Works Department as assistant engineer in 1871, and was first posted under Mr. Holt Hallett in the Tenasserim Division. This division forms the Eastern portion of British Burmah, and borders Siam and the Siamese Shan States. Having gained considerable experience in the railway, canal, and other divisions, in 1879, he was appointed secretary and second in command of the Government Mission dispatched to Siam and the Siamese Shan States. In 1881 he returned to England on furlough, and together with Mr. Hallett, formed the project for the connection of India and China and the opening up of Siam and Central Indo-China by railway, which led to the exploration by Messrs. Colquhoun and Wahab through Southern China and the Chinese Shan States in 1881-82, and by Mr. Holt Hallett in Siam and the Siamese Shan States in 1883-84, during which they succeeded in tracing out the best path for their proposed system of railways. On his return to England Mr. Colquhoun was awarded the gold medal of the R.G.S.; published "Across Chrysé," a book in two volumes, giving an account of his travels; he contributed many important letters to the *Times* on China and Indo-China, addressed several Chambers of Commerce, and awakened general interest in those parts of the East and in the proposed system of railways. In June, 1883, he left England for China and Tonquin as special correspondent of the *Times*; his able letters and descriptions of the people and country at once placed him in

the foremost rank of correspondents and were quickly re-published. Returning to England in Oct., he again left for the *Times* in Nov., remaining in the East until the close of the Franco-Chinese war. He came back to England in July, 1885, addressed the London Chamber of Commerce upon "English Commercial Policy in the East," proposed the annexation of Upper Burmah and the alliance of England and China so as to frustrate the aims of France and Russia in the East, and to push forward the development of our commerce with China. Whilst in China he did all in his power to increase the friendly feeling of the Chinese Government for the English, and was intrusted by Li Hung Chang with a message to the Viceroy of India proposing the early connection of India and China by telegraph, via Burmah and the Burmese Shan States. In Siam he saw the King, together with Mr. Hallett, and explained the proposed system of railways, and was subsequently informed by our Minister at Bangkok, that the Siamese would construct their portion of the railway if the British would meet them with a line to the frontier. Mr. Colquhoun left England in Dec., 1885, for Burmah, to take up his post as Deputy-Commissioner of the Sagain District in Upper Burmah, where he has gained much credit for his able administration of affairs.

COLQUHOUN, Sir Patrick (MacChombaich de), Bart., LL.D., eldest son of the late Chevalier James de Colquhoun, who was private secretary to Mr. Dundas, and afterwards chargé d'affaires of the Hanseatic republics, was born in 1815, educated at Westminster, and became scholar of St. John's College, Cambridge, where he graduated B.A. in 1837 and M.A. in 1844, and was elected subsequently an Honorary Fellow of the College, taking the degree of Juris utriusque Doctor at Heidelberg and subsequently that of LL.D. at Cambridge in 1851. He was called to the Bar in 1838, and appointed Plenipotentiary by the Hanseatic republics to conclude commercial treaties with Turkey, Persia, and Greece. On his return, in 1844, he went the Home Circuit. He was appointed Aulic Councillor to the King of Saxony in 1857, and was standing counsel to H.S.M.'s Legation till the abolition of the office by the war of 1866. He was also Councillor of Legation of the Grand Duke of Oldenburg. He was appointed Member of the Supreme Council of Justice of the Ionian Islands by Sir Edward Bulwer Lytton in 1858; became Chief Justice of the court

in 1861, and was knighted. On the cession of the Ionian Islands to Greece in 1864, Sir P. Colquhoun returned to England, and was appointed one of Her Majesty's Counsel in 1868, and a Member of the Inner Temple Bench. He is the author of various treatises on learned political and classical subjects in different languages. "A Summary of the Roman Civil Law, illustrated by Commentaries and Parallels from the Mosaic, Canon, Mohammedan, English, and Foreign Laws," published in 1849-60. Sir Patrick de Colquhoun is at present head of the family whose name he bears, having succeeded his cousin, Sir Robert de Colquhoun, Bart., N.S., on Nov. 10, 1870. Sir Patrick has received the following decorations:—1st class, in brilliants, Niskau Ifthar of the Ottoman Empire; G.C. of the Redeemer of Greece; Com. of Albertus valorous, and Knight of Merit, of the Kingdom of Saxony; Knight of Merit of the Grand Duchy of Oldenburg. Clubs: Carlton, Athenæum, Constitutional, Isthmian.

COLVIN, Sir Auckland, K.C.M.G., C.I.E., son of the late John Russell Colvin, B.C.S., Lieut.-Governor of the North West Provinces of India, by Emma Sophia, daughter of the Rev. W. Sneyd, was born in 1838. He was educated at Eton, and at Haileybury College, and entered the Indian Civil Service in 1858. He became in succession Under-Secretary to the Government of India, Home and Foreign Departments; Secretary to the North West Provinces Revenue Board, and Secretary to the Government of the North West Provinces. He was a member of the International Commission of Egyptian Liquidation in 1880, and was appointed English Controller-General in Egypt the same year. In 1881 he was created a Knight Commander of the Order of SS. Michael and George. Sir Auckland Colvin took a prominent part in assisting and advising the Khedive on the occasion of Arabi Pasha's military demonstration on Sept. 9, 1881; and in July, 1883, he received the thanks of Her Majesty's Government for his services prior and subsequent to that event. After the abolition of the Dual Control (Jan., 1883), he became Financial Adviser to the Khedive. In October, 1883, he became Financial Member of the Council of the Governor-General of India. He has received the grand cordons both of the Order of the Medjidieh and of the Osmanieh. Sir A. Colvin is now Lieutenant-Governor and Chief Commissioner of the North West Provinces and Oudh.

COLVIN, Sidney, 'M.A., was born at Norwood, Surrey, June 18, 1845. He is the youngest son of the late Mr. Bazett D. Colvin, of the firm of Crauford, Colvin, & Co., of 71, Old Broad Street, and of Bealings, Woodbridge, Suffolk, by his wife Mary Steuart, eldest daughter of the late Mr. William Butterworth Bayley, of the East India Company's Civil Service. Mr. Colvin was educated at home and at Trinity College, Cambridge, where he was Chancellor's English Medallist in 1865, and where he graduated as third in the first class of the Classical Tripos in 1867. He was elected a Fellow of Trinity College in 1869; Slade Professor of Fine Arts, 1873 (re-elected 1876, 1879, 1882, and 1885); and was appointed Director of the Fitzwilliam Museum, Cambridge, in 1876. Having been appointed Keeper of the Department of Prints and Drawings in the British Museum in Dec., 1884, Mr. Colvin resigned the direction of the Fitzwilliam Museum at that date, and the post of Slade Professor, in Jan., 1886. He is a member of the German Archæological Institute, and Corresponding member of the Historical Society of Maine, U. S. Since 1867 he has been a frequent contributor, chiefly as a critic and historian of art and literature, to the *Portfolio*, *Fortnightly Review*, *Cornhill Magazine*, *Nineteenth Century*, *Edinburgh Review*, *Macmillan's Magazine*, and other periodicals. In addition to his being a contributor to periodical literature, he is the author of the following books:—"Children in Italian and English design," 1872; "Londor" in the "English Men of Letters" series, 1882; and "Keats" in the same series, 1886. He has also edited "Selections from the Writings of Walter Savage Landor," 1884.

COMMERELL, Vice-Admiral Sir John Edmund, K.C.B., V.C., second son of Mr. John W. Commerell, of Stroud Park, Horsham, Sussex, by Sophia, daughter of Mr. William Bosanquet, of Harley Street, London, was born in London in 1829. Entering the Royal Navy in 1842, he became Lieutenant in 1848, Commander in 1855, Captain in 1859, Rear-Admiral in 1877, and Vice-Admiral in 1881. He served in China and South America, and took part in all the operations in the Parana (1845-46), especially at Punta Obligado, where he assisted in cutting the chain that defended the river. Afterwards he served in the Baltic and the Gulf of Bothnia (1854), and as Lieutenant of H.M.S. *Weser* was present at Sebastopol, and in several operations in the Sea of Azof; he was twice mentioned

in despatches, and received the Victoria Cross for hazardous service in the Putrid Sea. He commanded H.M.S. *Fury* in 1849, and in July of that year he led a division of seamen in the attack on the Taku Forts. For this service he was highly praised in despatches, and promoted to H.M.S. *Magicienne*, in which he served during the subsequent operations in China. In 1866 he was in command of H.M.S. *Terrible*, and rendered active service in laying the Atlantic cable. He commanded H.M.S. *Monarch* on particular service in 1868-69, and in 1872-73 he served as Commodore of the second class, and senior officer in command off the Cape of Good Hope and West Coast of Africa. In Aug., 1873, whilst reconnoitring up the river Prah to discover the position of the Ashantees, the boats were fired upon from the banks, and Commodore Commerell was so dangerously wounded as to necessitate his relinquishing the command of the station. After going to Cape Town for the cure of his wounds, he returned to England, when he was nominated a Knight Commander of the Order of the Bath, and appointed a Groom-in-Waiting to the Queen. Sir J. E. Commerell was second in command of the Mediterranean Fleet from July, 1877, to Oct., 1878, and was a Lord of the Admiralty from Oct., 1879, to May, 1880. He was appointed Commander-in-Chief, North American and West Indian stations, in 1882. He married, in 1853, Matilda Maria, fourth daughter of Mr. Joseph Bushby, of St. Croix, West Indies, and Halkin Street, London.

COMMON, Andrew Ainslie, F.R.S., F.R.A.S., was born August 7, 1841, at Newcastle-on-Tyne, and is the son of Thomas Common, surgeon. He was educated privately, was elected a Fellow of the Royal Astronomical Society in 1876; Fellow of the Royal Society in 1885, &c.; and Treasurer of the Royal Astronomical Society and Gold Medallist for work in Celestial Photography, carried on principally at his observatory at Ealing, near London, where he has one of the largest equatorial telescopes, and has been most successful in obtaining photographs of the heavens, including nebulae, and stars of the eleventh magnitude.

COMPTON, The Right Rev. Lord Alwyne Spencer, D.D., Bishop of Ely, is a younger son of the second Marquis of Northampton, by the eldest daughter of the late Major-General Douglas Maclean Clephane, of Torloisk, N.B. He was born in 1825, and educated at Trinity College, Cambridge, where he took the degree of M.A.,

coming out as a wrangler in 1848. He was appointed rector of Castle Ashby, Northamptonshire, in 1852, and nominated to an honorary canonry in Peterborough Cathedral in 1856. He was made rural dean of Preston Deanery in 1874, and in 1875 was appointed to the Archdeaconry of Oakham, which he held till Oct., 1879, when he was nominated by Lord Beaconsfield to the Deanery of Worcester, in succession to the late Dr. Yorke. He held this post until 1885, when he was appointed Bishop of Ely in succession to the late Dr. Woodford. Lord Alwyne Compton was for some years an active and zealous member of the Convocation of the Clergy, both as Proctor for the diocese of Peterborough and also as Archdeacon. His lordship is married to a daughter of the late Rev. Robert Anderson, of Brighton.

CONANT, Thomas Jefferson, D.D., LL.D., was born at Brandon, Vermont, Dec. 13, 1802. He graduated at Middlebury College in 1823, and after a brief tutorship in Columbian College, Washington, accepted an appointment as Professor of Languages in Waterville College (now Colby University), Maine. In 1833 he resigned his professorship and removed to the vicinity of Boston. In 1835 he became Professor of Biblical Literature and Criticism in the Baptist Theological Seminary (which afterwards became Madison, and recently Colgate, University), at Hamilton, New York, and while connected with it spent two years in the study of oriental languages and literature at the universities of Halle and Berlin, and published a translation of the Hebrew grammar of Gesenius, with the additions of Rödiger. In 1850 he accepted the professorship of Biblical Literature and Criticism in the Theological Seminary at Rochester, New York, but in 1858 resigned, and removed to Brooklyn, New York, to devote himself to the production of a revised translation of the Holy Scriptures. His work in this department consists of revised versions, with notes, of "The Book of Job" (1857); "The Gospel of Matthew" (1860); "The Book of Genesis" (1858); "The Book of Psalms" (1868); also, with some additional notes, in the American edition, of "Lange's Commentary" (1872); "The Book of Proverbs" (1872); *ΒΑΡΥΣΕΙΣ*; its Meaning and Use, philosophically and historically investigated" (1872); "The Books of Joshua, Judges, Ruth, Samuel, and Kings" (1884). He was a member of the American Committee co-operating with the Convocation of Canterbury, England, in the revision of the Authorized

English version of the Bible. In conjunction with his daughter Blandina, he published, in 1878, a "General and Analytical Index to the American Cyclopædia." He received the degree of D.D. from Waterville College, and in 1856 was made a member of the Deutsche Morganländische Gesellschaft, Halle and Leipzig.

CONGREVE, Richard, M.A., M.E.C.P. (1866), third son of Thomas and Julia Congreve, born at Leamington, Hastings, Warwickshire, Sept. 4, 1818, was educated at Rugby under Dr. Arnold, and became successively Scholar, Fellow, and Tutor of Wadham College, Oxford, where he graduated B.A. in 1840, taking first-class honours in classics. Having acted for some time as an assistant-master at Rugby, he returned to Oxford, where he resumed his tutorship at Wadham College. In 1855 he published a small volume on the history of the Roman Empire of the West, and an edition of "Aristotle's Politics," with notes (2nd edit., 1874). He resigned his fellowship, and after deeply studying the social and religious system of the late M. Comte, embraced it as the best solution of the social and religious difficulties which surrounded him. Mr. Congreve has since published "Gibraltar;" a pamphlet on Indian matters, in which he recommends England to give up its Indian Empire as indefensible; "Italy and the Western Powers;" "Elizabeth of England;" translation of "The Catechism of Positive Religion" (1858); "Essays: Political, Social, and Religious" (1874); and some sermons.

CONNAUGHT and STRATHEARN (Duchess of), Her Royal Highness the Princess Louise Margaret of Prussia, born July 25, 1860, and married at Windsor Castle, March 13, 1879, is the third daughter of the late Prince Frederick Charles, and grand niece of the late Emperor William of Germany. Her Royal Highness has three children; the Princess Margaret Victoria Charlotte Auguste Norah, born at Bagshot Park, January 16, 1882; the Prince Arthur Frederick Patrick Albert, born at Windsor Castle, January 13, 1883; and the Princess Victoria Patricia Helena Elizabeth, born March 17, 1886.

CONNAUGHT and STRATHEARN (Duke of), His Royal Highness Arthur William Patrick Albert, K.G., K.T., K.P., G.C.M.G., Prince of the United Kingdom, Duke of Saxony, Prince of Coburg and Gotha, the third son of Her Majesty Queen Victoria, was born at Buckingham Palace, May 1, 1850. He entered the Military Academy

at Woolwich as a cadet in 1866, became a lieutenant in the Royal Engineers in 1868, and a lieutenant in the Royal Artillery in Feb., 1869. He was appointed a lieutenant in the Rifle Brigade in Aug., 1869, and a captain in excess of the establishment of the regiment in 1871. On attaining his majority in the last-named year Parliament voted him a grant of £15,000 per annum; and an addition of £10,000 was voted on his marriage in 1879. Prince Arthur was created Duke of Connaught and Strathearn, and Earl of Sussex, May 26, 1874, and took his seat in the House of Lords on the 8th of the following month. At a Council held at Windsor, May 16, 1878, the Queen declared the intended marriage of the Duke of Connaught and Strathearn to Princess Louise Margaret of Prussia, third daughter of the late Prince Frederick Charles, and grand niece of the late Emperor William of Germany. The marriage was celebrated at Windsor, March 13, 1879. His Royal Highness's staff services are:—Brigade Major at Aldershot in 1873; Brigade Major to the Cavalry Brigadier at the same quarters in 1875, in the October of which year he was appointed Assistant Adjutant-General at Gibraltar, which post he held until April, 1876. In 1880 he was made a General of Brigade at Aldershot. He commanded the Guards Brigade in the First Division in the expedition to Egypt in 1882. He was appointed in Oct., 1882, honorary Colonel of the 13th Bengal Lancers serving in Egypt. In Sept., 1886, the Duke, accompanied by the Duchess, left England for India, arriving at Bombay Sept. 27th. His Royal Highness is commander of the forces in the Bengal Presidency.

CONSTANT, Benjamin, a French painter, born at Paris, June 10, 1845, studied in the École des Beaux-Arts, and then entered the *atelier* of M. Cabanel. The first picture which he sent to the salon was "Hamlet et le Roi," 1869; and he has since exhibited "Trop tard," 1870; "Samson et Delilah," 1872; "Femmes du Riff (Maroc)" and "Bouchers maures à Tanger," 1873; "Coin de Rue" and "Carrefour à Tanger," 1874; "Prisonniers Marocains," "Femmes de Harem à Maroc," and "Le Dr. Guéneau de Massy," 1875; "Mohamed II., le 29 Mai, 1453," a picture of colossal dimensions, afterwards sent to the Exposition Universelle of 1878; "M. Emmanuel Arago," 1876; "La Soif," "Le Harem," and "Hamlet au Cimetière," 1878; "Le Soir sur les Terrasses au Maroc" and "Favorite de l'Emir," 1879; "Le dernier

Rebelle," 1880; "Herodiade," 1881; "Le Lendemain d'une Victoire à l'Alhambra," 1882 "Orpheus" and "Theodora," 1887; and "La Vengeance du Chérif," 1885, a large picture, which is typical of M. Constant's latest manner; an Oriental subject, as melodramatic as possible; ample opportunities for painting the nude; and strong effects of colour. The painter has received several medals, and is one of the most successful members of the modern French school. M. Constant, who was decorated with the Legion of Honour in 1878, married one of the daughters of M. Emmanuel Arago.

CONSTANTINE, Nicolaïévitch, the second son and fourth child of the late Emperor Nicholas, Grand Duke of Russia, titular and Grand Admiral of the Imperial fleet, was born Sept. 21 (or, according to the old style which Russia retains, Sept. 9), 1827. He was educated with great care for the naval service, and had for his tutor Admiral Lütke, the circumnavigator of the globe, under whose orders the young prince subsequently served, and acquired the rank of "post-captain in the Russian navy," as he thus subscribed himself at the model-room of the Admiralty at Somerset House, during his visit to England in 1847. In his character of Admiral he had ventured to arrest his elder brother, the present Emperor of Russia, who was on board his ship, for which he was himself placed under arrest for a considerable time by his father. In addition to being Grand Admiral of Russia, the Grand Duke Constantine is Commandant of the 4th brigade of Infantry of the Guard, Colonel of the regiment of Hussars of the late Grand Duke Michael Paulowitch, a member of the Council of Military Schools, and President of the Grand Council of the Empire. He allied himself to the Muscovite national party, whose fanaticism helped to bring about the war with England and France. At the death of the Emperor Nicholas, it was feared that the Grand Duke Constantine might become the chief of the opposition represented by the old Muscovite party against the moderate party, of which the new czar, Alexander II., had been considered the centre. The late emperor, foreseeing the probability of commotion, had, however, caused the Grand Duke Constantine to take in his presence an oath of fidelity and obedience to the heir of the throne; and when Nicholas saw that his end was approaching, he called the two princes to his bedside, and before giving them his blessing, made Constantine, in presence of his mother, renew the

oath of fidelity to his elder brother. A few hours after the emperor's death, Constantine took the oath of allegiance, adding that the latter might rely upon him in every circumstance. In 1857 the Grand Duke paid visits to the courts of England and France, and inspected the naval arsenals of both countries. At the outbreak of the Polish insurrection, in 1862, he was appointed Viceroy of that principality, but he resigned that post in a few months. In Jan., 1865, he was appointed President of the Council of the Empire, and in 1871 he paid another visit to England. In Jan., 1878, he was reappointed President of the Council of State for three years; but in 1881, he was dismissed from his dignities on suspicion of intriguing with the revolutionary party. His son, the Grand Duke Nicholas, was arrested at the same time. He is the author of a "History and Description of the town of Pavlovsk," published anonymously. At the close of the great Russian army manœuvres in Oct., 1890, the Grand Duke, uncle of the Czar, was suddenly afflicted with the loss of his reason, and had to be removed. The physicians consider his condition beyond hope. This sad event is a strange commentary on what was said of him when he visited Osborne thirty-three years ago:—"Constantine was always a favourite of his father, who recognized in him some of his own energy; he is, indeed, the strong mind of his family." He married, Aug. 30, 1848, the Princess Alexandra, daughter of Joseph, Duke of Saxe-Altenburg, by whom he has two sons and two daughters.

CONYBEARE, Henry, J.P., civil engineer and architect, fourth son of the Very Rev. William Daniel Conybeare, Dean of Llandaff, the well-known geologist, was born at Brislington, in Somersetshire, Feb. 22, 1823. After leaving Rugby School, he entered the civil engineering department of King's College, London, and accompanied Professor Hall, when he with Professor Mosely assisted in the organisation of the Cornish School of Mines. On leaving King's College, Mr. Conybeare spent three years in an engine manufactory at Newcastle, and then went to India on the engineering staff of the Great Indian Peninsula Railway, and he had the civil engineering charge of the city and island of Bombay from 1849 to 1852. In consequence of the prevalence of water famines at Bombay, he was requested in 1854 by the Government of that presidency to report on the best means of affording an adequate water supply to the city and island. His recommendations being approved by the Supreme

Government of India, he was appointed to carry them into execution. During his residence in India, Mr. Conybeare practised architecture as well as civil engineering, and designed the church erected at Colaba, in memory of those who fell in the Afghan campaign, the church of St. John at Satara, and many civil buildings. As a justice of the peace, he took a prominent part in the business of the Bombay Bench; and on the breaking out of the Mahomedan riots in 1854 he was appointed to act as second Stipendiary Magistrate of Police. During the last six years which he remained in India, he was the Indian correspondent of the *Times*. Since his return to England in 1855, Mr. Conybeare has been in extensive practice as a railway engineer, and has been engineer-in-chief to a large number of railways. He was elected a member of the Institution of Civil Engineers, and has taken a large part in the discussions of that body. In 1856 he designed docks for the port of Bombay, and in the same year was appointed Lecturer on the Principles and Practice of Civil Engineering at the Royal Engineers' Establishment for Field Instruction at Chatham. In April, 1869, Mr. Conybeare was appointed by the Home Secretary to design and carry out certain works of drainage required to be executed under the authority of the Home Office and of the Local Government Act, at Southover, in Sussex. In 1878 he was engaged at Caracas, in Venezuela.

COOK, Edward Tyas, M.A., Editor of the *Pall Mall Gazette*, born at Brighton in 1857, is the fifth son of the late Mr. Silas Kemball Cook, Secretary and House Governor of the Seamen's Hospital, Greenwich. He was educated at Winchester College, 1869-76 (head of the school), and went with a Scholarship to New College, Oxford. First Class Classical Moderations, 1877; First Class Greats (Classics), 1880; President of the Union and of the Palmerston clubs; graduated B.A. 1880; M.A. 1883. He was Secretary of the London Society for the Extension of University teaching, 1882-85; joined the staff of the *Pall Mall Gazette*, 1883; was appointed editor, in succession to Mr. W. T. Stead, 1890; and is the author of "A Popular Handbook to the National Gallery," 1888; "Studies in Ruskin," 1890.

COOK, The Rev. Joseph, born at Ticonderoga, New York, Jan. 26, 1838, was educated at Yale and Harvard, graduating in 1865. He afterwards studied

four years at the Andover Theological Seminary, and then spent two years in Germany and in foreign travel. Since his return to America he has resided principally at Boston, where he has delivered a series of more than two hundred "Boston Monday Lectures," for which he is principally noted. He has repeated these lectures in other cities of the United States, and has published them in eleven volumes, 1877-88, under titles of "Biology," "Conscience," "Heredity," "Labor," "Marriage," "Orthodoxy," "Socialism," "Transcendentalism," "Occident," "Orient," and "Current Religious Perils." Numerous editions of these books have appeared in England. In 1880-83 Mr. Cook, with his wife, made the tour of the world as a lecturer on philosophical and religious topics, and spoke to great audiences in England, Scotland, Ireland, India, Japan, and Australia. In 1888 he founded *Our Day*, a monthly record and review of current reform, and is its editor, with the co-operation of Miss Frances E. Willard, ex-President Cyrus Hamlin, and other eminent specialists. Mr. Cook is known as a champion of a scholarly evangelical orthodoxy and of advanced political, social, and moral reforms.

COOLEY, Thomas McIntyre, LL.D., was born at Attica, New York, Jan. 6, 1824. In 1843 he removed to Michigan, where he was in 1845 admitted to the Bar. In 1857 he was appointed to compile and publish the laws of the State, and in 1858 he was made reporter of the decisions of the Supreme Court, a position which he held for several years, during which he published eight volumes of reports, followed by a digest of all the decisions of the State. In 1859 the law department of the University of Michigan was organized, and he was chosen one of the professors, and subsequently became Dean of the Faculty, holding the position until 1885, after which he was for three years Professor of History in the same institution. For three years he was Lecturer on governmental subjects in John Hopkins University, Baltimore. In 1864 he was appointed to fill a vacancy on the Bench of the Supreme Court of the State, a position which he held for twenty years, being a part of the time Chief Justice. At the urgent request of President Cleveland he accepted, in 1887, the appointment of Commissioner under the Interstate Commerce Law, for the regulation of railroads, and was made Chairman of the Commission, an office he still holds. He has published "The Constitutional Limitations which rest upon

the Legislative Power of the States of the American Union," 1868, which has gone through several editions; an edition of Blackstone's "Commentaries," 1870; and of Story's "Commentaries on the Constitution of the United States, with additional Chapters on the New Amendments," 1873; "Law of Taxation," 1876; "Law of Torts," 1879; "General Principles of Constitutional Law in the United States," 1880; and, for a series of State histories, "Michigan, a History of Governments," 1885. He furnished nearly all the legal articles in Appleton's "American Cyclopædia," 1873-76, and has been a voluminous writer for magazines and reviews. He received the degree of LL.D. from both Michigan University and Harvard University.

COOPER, Charles Alfred, journalist, was born at Hull, Yorkshire, in 1829. He was educated at the Hull Grammar School, and early in life entered the office of the *Hull Packet*, a weekly newspaper of good standing. There he became a reporter, and took a share in sub-editorial work. In 1861 he removed to London, and entered the gallery of the House of Commons as reporter for the *Morning Star*. Of this paper he subsequently became the sub-editor, and held the post until 1868, when he became assistant-editor of the *Scotsman*, in which capacity he served for several years. In 1880 he became editor of the *Scotsman*, and in 1881, in recognition of his services to the Liberal party, he was made a member of the Reform Club, without a ballot, on the nomination of the political committee. Earlier he had taken a great interest in the opening of the gallery of the House of Commons to the reporters of provincial newspapers, and shortly before becoming editor of the *Scotsman*, he had the gratification of seeing this object gained.

COOPER, Sir Daniel, Bart., G.C.M.G., was born at Bolton, Lancashire, July 1, 1821. When very young he sailed for New South Wales, and was educated there till he was fourteen, and then returned to England and finished his education by a course of four years at University College, London. Mr. Cooper's health at this period of his life was very uncertain, and after starting in business in Europe he sailed again for New South Wales, when he was at once connected with his uncle's firm, at that time one of the most extensive mercantile houses in Australia. In 1847 Mr. Cooper was appointed a director, and in 1855 the President, of the Bank of New South

Wales. In 1849 he was elected a member of the Legislative Council of the Colony, which was at that time the only legislative body; and again in 1853. Two years afterwards the Act was passed which gave the Colony a Constitution modelled on the English Parliament. In 1856, at the first election under the new Constitution, Mr. Cooper was again returned, and was chosen first Speaker of the Assembly. In 1857 he was knighted. He resigned his office as Speaker owing to ill-health in 1860, and immediately afterwards, on the resignation of the Forster Government, he was invited to form a Ministry, but was for the same cause compelled to decline. Sir Daniel returned to England in 1861, and was created a baronet in 1863. He has ever since his return to England taken an active part in every movement tending to promote the welfare of the Colonies. For the services rendered by him in connection with the Sydney Exhibition he was created a Knight Commander of the Order of SS. Michael and George in Oct., 1880, and in 1888 was made a G.C.M.G. of the same order.

COOPER, Thomas, born at Leicester, March 28, 1805, was taught the humble trade of a shoemaker in his youth, at Gainsborough, Lincolnshire (where he and the late Thomas Miller were companions in boyhood), and having instructed himself in the Latin, Greek, Hebrew, and French languages while at his stall, became a schoolmaster at twenty-three. He held appointments on the reporting staff of one or two country newspapers, and then became leader of the Leicester Chartists in 1841, lectured in the Potteries during the "Riots" in Aug., 1842, was sent to Stafford gaol on a charge of conspiracy and sedition, and was found guilty, and sentenced to two years' imprisonment. During that period he wrote his epic poem, "The Purgatory of Suicides," and "Wise Saws and Modern Instances," a series of stories, both published in 1845. His "Baron's Yule Feast," a short poem, appeared in Jan., 1846. During the latter half of 1846 he wrote a series of papers entitled "Condition of the People," in *Douglas Jerrold's Newspaper*, travelling through the North of England to collect material for his observations. In 1847 appeared his "Triumphs of Perseverance" and "Triumphs of Enterprise." In 1848 he became an active political and historical lecturer in London. In 1849 he edited the *Plain Speaker*, a weekly penny journal of radical politics. In 1850 he conducted *Cooper's Journal*, a sceptical

weekly penny periodical. In 1851 and 1852 he was chiefly employed as a traveling lecturer on history, poetry, and general literature. His "Alderman Ralph," a novel, appeared in 1853, and a second novel, "The Family Feud," in 1854. Towards the close of 1855 his opinions on religious questions changed; and, having returned to London, he began a course of Sunday evening lectures and discussions with the London sceptics, in Sept., 1856, and continued them until the end of May, 1858. From that time he has been continually traveling through England and Scotland, lecturing and preaching on the Evidences of Christianity. He published his autobiography in 1872; and his "Poetical Works" appeared in 1878.

COOPER, Thomas Sidney, R.A., was born at Canterbury, Sept. 26, 1803. At the age of seventeen he became painter at the Hastings Theatre, and for three years gained a moderate income by scene-painting. Then he became a drawing-master at Canterbury till the year 1827, when he set out from Dover to Calais, and literally "sketched his way" from that French port to the Belgian capital; paying tavern bills by likenesses of hosts and hostesses. At Brussels his talents secured him patrons and employment; and having settled there, he married, and enjoyed the friendship of various Flemish artists. There, too, his pencil was first directed to the study of landscape, and the branch of art (animal-painting) which secured him his present high reputation, with abundant and profitable employment. The revolution of 1830 involved him and his family in difficulties, and forced him to return to England. He first exhibited in the Suffolk Street Gallery in 1833. His picture attracted attention, and he received a commission from Mr. Vernon for a picture now in the Vernon Gallery. About ten years later his Cuyyp-like groups of cattle, "Going to Pasture," "Watering at Evening," "Reposing" in the heat of a summer afternoon, attracted general notice. Mr. Cooper was elected an Associate of the Royal Academy in 1845, and a Royal Academician in 1867. In 1882 he presented to the city of Canterbury the Gallery of Art which he had founded some ten or twelve years previous, and in which he had since given gratuitous instructions to students. A condition made by the donor was that only a nominal fee should be charged to the artizan classes for tuition; the original object for which the gallery was built having been the teaching of draw-

ing to poor boys. At the meeting at which Mr. Cooper's gift was announced it was determined to convert the gallery into a school, and to affiliate it to the Science and Art Department at South Kensington.

COPE, Professor Edward Drinker, naturalist and comparative anatomist, was born at Philadelphia, July 28, 1840, and studied in the University of Pennsylvania, and worked at anatomy in Europe in 1863-4. He was Professor of Natural Science in Haverford College, Philadelphia, from 1864 to 1867, and has been Curator and Corresponding Secretary of the Academy of Natural Sciences. He is now Professor of Geology and Palæontology in the University of Pennsylvania. In 1871 he explored the cretaceous formations of Kansas; in 1872 the eocene of Wyoming; in 1873 the tertiary beds of Colorado; in 1874 was employed by the U. S. G. G. Survey under Lieutenant (now Captain) G. M. Wheeler in New Mexico; in 1875 in Northern Montana; in 1877 in Oregon and Texas; and from 1878 to 1884 he had several parties exploring the Western regions. The result of these expeditions has been the creation of a collection of over 1,000 species of extinct vertebrate animals, of which Professor Cope has made known to science at least 600 species. The structure of many of these animals is in the highest degree remarkable, and has been described in numerous papers, read before the scientific societies of Philadelphia, or published in the reports of the Hayden U. S. Geological Survey of the Territories, to which he was palæontologist of vertebrata, or in those of Captain Wheeler, U. S. Engineers. Professor Cope has also published essays on fishes, batrachians, reptiles, and mammalia of various parts of the world, and has made observations on the anatomy of these animals, which have, in connection with his palæontological studies, resulted in new views of their systematic arrangement. He has also, since 1869, published a number of papers on the subject of evolution, which are to be found in the Proceedings of the Philadelphia Scientific Societies, and which were collected and published in "The Origin of the Fittest." He is a member of the National Academy of Science, and of various other American and European academies, and, together with Professor J. S. Kingsley, is senior editor of the *American Naturalist*. He is the author of the doctrine of "acceleration and retardation," of "repetition," of the "doctrine of the unspecialized," of a theory of "evolution by catagenesis,"

and of an adaptation of philosophy to the doctrine of "evolution" (1889). He received the Bigsby gold medal of the Geological Society of London in 1879, in recognition of his services in the field of vertebrate palæontology.

COPELAND, Ralph, Ph.D., F.R.A.S., Astronomer Royal for Scotland, and Professor of Practical Astronomy in the University of Edinburgh in the place of Professor Piazz Smyth, who resigned, was born, in 1837, at Woodplumpton, Lancashire. Having determined to devote his life to astronomy, he entered the University of Göttingen in 1864, and became assistant under the late Professor Klinkerfuss at the observatory there. He for some time assisted Earl Rosse with his observations; and since 1876 has been connected with Lord Crawford's observatory at Dun Echt. For the purpose of observing the transit of Venus across the sun's disc, Professor Copeland visited Mauritius and Jamaica; and, in 1883, he took astronomical observations in Peru and Bolivia at various heights, rising to 14,000 feet.

COPELSTON, The Right Rev. Reginald Stephen, D.D., Bishop of Colombo, son of the Rev. R. E. Copleston, formally Fellow of Exeter College, Oxford, was born at Barnes, Surrey, in 1845. From Merchant Taylors' School he proceeded to Merton College, Oxford, where he graduated B.A. (2nd class in classics) in 1869. He was then elected a Fellow of St. John's College, of which he became senior tutor; and he proceeded M.A. from that College in 1871. When Dr. Jermyn resigned the Bishopric of Colombo, in Ceylon, Mr. Copleston was selected by the Crown to fill the vacant See, and he was consecrated in Westminster Abbey, Dec. 28, 1875. He has published "*Æschylus*," in Blackwood's "Classics for English Readers;" and was one of the three writers of the "Oxford Spectator." Dr. Copleston married a daughter of the late Archbishop Trench.

COPPÉE, Françoise Edouard Joachim, a French poet, was born Jan. 12, 1842. He early gained a reputation as a poet, and published in 1866 a volume of poems entitled "*Le Reliquaire*," which was followed two years later by "*Intimités*." He then turned his attention to the theatre, and wrote "*Le Passant*," produced at the Odéon in 1869; "*L'Abandonnée*" and "*Fais ce que dois*," 1871; "*Le Bijou de la Délivrance*," 1872; "*Le Luthier de Crémone*," produced at the Théâtre Français in 1877; "*Madame*

de Maintenon," 1881. For several years M. Coppée was attached to the library of the Senate House, and in 1878 was appointed keeper of the records at the Comédie Française. He was made a member of the Académie Française in 1884.

COQUELIN, Benoît Constant ("*Coquelin Aîné*"), a French actor, born at Boulogne-sur-Mer, Jan. 23, 1841, is the son of a baker, and was destined originally to follow that trade; but evincing a great aptitude for the stage, he went to Paris and was admitted to the Conservatoire on Dec. 29, 1859, joining M. Regnier's class, of which he became the most brilliant pupil. He obtained the second prize for comedy, and made his *début* at the Théâtre Français on Dec. 7, 1860, in the character of Gros-René in the "*Dépit Amoureux*." He afterwards played with success in the "*Fourberies de Scapin*," "*Mariage de Figaro*," "*Don Juan*," and other classical pieces; Lupin in "*La Mère Confidente*," the Marquis in "*Le Joueur*," Annibal in "*L'Aventurière*," &c. He created the rôle of Anatole in "*Une Loge d'Opéra*," John in "*Trop Curieux*," Gagneux in "*Jean Baudry*," Vincent in "*L'Éillet Blanc*," Aristide in "*Le Lion Amoureux*," Gringoire in a play of that name, Beaubourg in "*Paul Forestier*," Eugrate in "*Le Coq de Mycille*," &c. M. Coquelin has obtained great success in society by reciting in private and at public meetings, and has also added to the reputation of new poets, particularly of Eugène Manuel and François Coppée. He has, to the great regret of all admirers of French comedy, announced his attention of leaving the Théâtre Français.

COQUELIN, Ernest Alexandre, better known as Coquelin Cadet, brother of the preceding, was born at Boulogne-sur-Mer, May 16, 1848. He entered the service of the Northern Railway Company, but being irresistibly drawn towards the theatrical profession, he went to Paris, and, in 1864, entered M. Regnier's class at the Conservatoire, and three years later carried off the first prize for comedy. After successfully making his *début* at the Odéon in the comic rôles of classic pieces, he entered the Comédie Française in June, 1868, and played with his brother. During the siege of Paris he gained the Military Medal for bravery at the Battle of Buzenval. Among his best creations are Ulrich in "*Le Sphinx*," of Octave Feuillet, Isidore in "*La Reprise du Testament de César Girodot*," Frédéric in "*L'Ami Fritz*" of MM. Erckmann-

Chatrian, and Basile in "Le Barbier de Séville."

CORBOULD, Edward Henry, artist, the eldest son of Henry Corbould, and grandson of Richard Corbould, historical painters, was born in Great Coram Street, London, Dec. 5, 1850. Being at an early age ambitious of distinction in art, he painted "The Fall of Phaëton from the Chariot of the Sun," for which he obtained the gold Isis medal of the Society of Arts in 1834, winning the same prize again in 1835, with an original model of "St. George and the Dragon." In 1836 he obtained the large gold medal for his model of the Chariot-race, from Homer. He exhibited at the Royal Academy, and at the Gallery of British Artists, subjects mostly from Spenser's "Faëry Queen," and eventually joined the New Society (now the Royal Institute) of Painters in Water Colours. His first large subject here was "The Assembling of the Canterbury Pilgrims at the Tabard Inn, Southwark," followed by "The Woman taken in Adultery," "The Eglinton Tournament" (from sketches made upon the spot), "Under the Rose," "Salomé Dancing before Herod," "The Plague of London," "The Baptism of Ethelbert," "William of Eynesham reciting the Victory of Towton Field" (in Westminster Hall), "Scene from the Prophète" (painted for the Queen), "Floretta de Nerac, the first love of Henry IV. of France" (purchased by her Majesty, and presented to the King of Prussia), "The entry of the Boy King into London after his coronation in Paris," and "The Destruction of the Idols at Basle" (both in the collection of The Empress Frederick of Germany and Prussia, Princess Royal of England), and various others which we cannot enumerate. In 1851 Mr. Corbould was appointed Instructor of Historical Painting to the Royal Family. His picture painted from Tennyson, "The Struggle for the Last Diamond," was perhaps the earliest purchase of a work of art by the Prince of Wales; but that from Tennyson's "Morte d'Arthur," in 1864, purchased by her Majesty and presented to the Princess Louise, is generally considered Mr. Corbould's best work.

CORFIELD, William Henry, M.A., M.D. (Oxon.), F.R.C.P., Hon. A.R.I.B.A., was born in Dec., 1843, at Shrewsbury, and was educated at the Cheltenham Grammar School, and obtained a Demyship in Natural Science at Magdalen College, Oxford, in March, 1861, at the early age of seventeen. In the subsequent October

he matriculated, and in 1863 took a first class in Mathematics at Moderations. In the same year he had the honour of being selected by Professor Daubeny, the eminent Chemist, Botanist, and Vulcanologist, to accompany him in his examination of the volcanic appearances in the Montbrison district of Auvergne. In 1864 he passed in the final Classical Schools, and took a first-class in Mathematics for the degree of Bachelor of Arts. Early in the following year Mr. Corfield obtained, in open competition, the Medical Fellowship at Pembroke College, and thus the line of his future career was decided. He next gained first-class honours in the Natural Science Schools, taking Chemistry and Geology as special subjects. Other successes followed rapidly, and the Burdett-Coutts University Scholarship in Geology and the Allied Sciences fell to him in 1866, to which, a year later, was added the Radcliffe Travelling Fellowship in Medicine. This gave him an opportunity of visiting the professional centres of the Continent, including, of course, Paris, where he studied analysis, with special reference to hygienic matters, under Berthélot, at the Collège de France, and took the opportunity then afforded of clinical study under Béhier, Sée, Hardy, and other eminent teachers, besides attending Bouchardat's lectures on Hygiene. He next proceeded to Lyons, where he worked at clinical medicine and surgery, and also made a special study of the remains of the remarkable aqueducts of ancient Lugdunum, and then passed over into Algiers, visiting afterwards some of the medical schools in Italy and Sicily. In 1868 he took his M.B. degree, and was appointed Examiner for Honours in Natural Science at the University of Oxford; and, in 1869, he received the further appointment of Professor of Hygiene and Public Health at University College, London. His Introductory Lecture was printed in the *British Medical Journal* of June 18 and 25, 1870, and was afterwards published in pamphlet form, under the title of a "Résumé of the History of Hygiene." He still directs the Hygienic Laboratory, which he started at this College, and in which many pupils, who have subsequently gained important sanitary posts, have been trained. He became a Member of the Royal College of Physicians of London, in 1869, and, in the same year, was elected a Member of the Committee appointed by the British Association for the Advancement of Science, to report on the Treatment and Utilization of Sewage. The alarming illness of the Prince of Wales at Londesborough Lodge, Scarborough, where he

was attacked by typhoid fever at the close of the year 1871, called attention very prominently to the subject of house sanitation, and Professor Corfield made, at Lord Lonsborough's request, a careful inspection of the condition of the Lodge, and described the results in a letter, which appeared in the *Times* on Jan. 22, 1872. In 1871 he was elected Medical Officer of Health for Islington, and, in 1872, obtained, and still holds, the same post for St. George's, Hanover Square. He took his M.D. degree at Oxford in 1872, and was next year appointed Lecturer on the Laws of Health at the Birmingham and Midland Institute, an office which he held for five years; afterwards he accepted a similar post at the Saltley Training College. In 1873 he delivered a course of lectures on "Water Supply, Sewerage, and Sewage Utilization" to the Royal Engineers stationed at Chatham; these lectures were at once reprinted in the United States. Dr. Corfield, in 1874, read a paper before the Epidemiological Society "On the supposed Spontaneous Origin of the Poison of Enteric Fever," in which he vigorously combated the possibility of the *de novo* origin of the disease. In 1875 Professor Corfield was elected a Fellow of the Royal College of Physicians; and he has published some "Remarks on the Study and Practice of Public Medicine," which were delivered as an Introductory Lecture to the Students of University College in that year. In 1879 he delivered a course of Cantor Lectures before the Society of Arts, taking for his subject, "Dwelling-houses, their Sanitary Construction and Arrangements." Professor Corfield's most recent publications are:—The third edition of his work on "The Treatment and Utilization of Sewage," in the preparation of which he has been assisted by his former pupil, Dr. Louis Parkes; his Anniversary Address to the Sanitary Institute on "The Water Supply of Ancient Roman Cities, with especial reference to Lugdunum (Lyons)," in which he shows that the Romans employed inverted siphons made of lead for the purpose of carrying their aqueducts across deep valleys, which is illustrated by lithographs from sketches made by himself on the spot; and his paper on "Outbreaks of Sore Throat caused by slight escapes of Coal Gas," read before the Society of Medical Officers of Health. Professor Corfield is prominently before the profession as Professor of Hygiene and Public Health at University College, London, and for some years one of the Examiners for the Sanitary Science Certificate at the University of Cambridge, and at the Royal

College of Physicians, as a Fellow of the Institute of Chemistry and of the Chemical Society, a Fellow of the Geological Society, an Honorary Associate of the Société Française d'Hygiène, and more recently, an Honorary Corresponding Member of the Royal Society of Public Health of Belgium, a Past President of the Society of Medical Officers of Health, and Chairman of the Council of the Sanitary Institute of Great Britain. He married, in 1876, Emily Madeline, youngest daughter of the late John Pike, Esq., F.S.A., and has six children.

CORK and **CLOYNE**, Bishop of. See GREGG, THE RT. REV. ROBERT SAMUEL.

■ **CORNISH**, The Rt. Rev. Robert Kestell, Bishop of Madagascar, only surviving son of the Rev. George James Cornish, of Salcombe Hill, Sidmouth, Devon, Prebendary of Exeter, was born in 1824, and educated at Winchester School, and at Corpus Christi College, Oxford (B.A. 1846; M.A. 1849). He was vicar of Coleridge, Devon, 1856-61; vicar of Revelstoke in the same county, 1861-66; and vicar of Landkey, Barnstaple, from 1866 till 1874, when he was appointed the first Bishop of Madagascar. In 1871 he assumed the additional name of Kestell, as the sole surviving representative of the ancient family of Kestell of Kestell, Cornwall.

CORNTHWAITE, The Rt. Rev. Robert, D.D., a Roman Catholic prelate, was born at Preston, May 9, 1818. In 1831 he entered St. Cuthbert's College at Ushaw, near Durham, and after having completed his studies, he remained there for two years, as Professor of Humanities. He next studied theology in the English College at Rome, and was ordained priest in 1845. In 1846 he returned to England and remained here five years. In 1851 Pope Pius IX. nominated him rector of the English College at Rome. He resigned that post in 1857, and returning again to this country, he became secretary to the late Dr. Hogarth, Bishop of Hexham. On Nov. 10, 1861, he was consecrated R.C. Bishop of Beverley, in succession to the late Dr. Briggs. The diocese of Beverley then comprised the county of York. On the division of the diocese of Beverley into the Sees of Leeds and Middlesbrough, on Dec. 20, 1878, Dr. Cornthwaite became Bishop of Leeds. On Nov. 10, 1886, he celebrated his episcopal silver jubilee. On Dec. 30, 1889, owing to his failing health, William Gordon, D.D., Rector of the Leeds Diocesan Seminary was appointed his coadjutor, with right of succession.

CORNÜ, Marie-Alfred, was born March 6, 1841, admitted into the École Polytechnique in 1860, whence he passed to the School of Mines, and was created engineer in 1866. In 1867 he was appointed Professor of Physics at the École Polytechnique, and since then he has succeeded Becquerel as member of the Académie des Sciences, has received the Rumford Medal of the Royal Society of London, has been President of the French Association for the Advancement of Science, is Chevalier de la Légion d'Honneur, &c. Professor Cornü's researches have been chiefly devoted to optical subjects, and he is one of the first living authorities upon light, he having greatly improved Fizeau's toothed wheel, and so given to measurements of the velocity of light a precision which was previously impossible. His principal experiments upon this subject are recorded in the *Annals of the Paris Observatory*; many of his other papers are in the *Comptes Rendus*, and deal with crystalline reflexion, the reversal of the lines in the spectrum of metallic vapours, the spectre of the aurora borealis, and the normal solar spectrum.

CORRIGAN, The Most Rev. Michael Augustine, D.D., American (R.C.) prelate, was born at Newark, N.J., Aug. 13, 1839. He was educated at St. Mary's College, Wilmington, Delaware; and at Mount St. Mary's, Emmetsburg, Maryland, graduating at the latter institution in 1859. He was ordained to the priesthood at Rome in 1863, and in the following year received the degree of D.D. After filling for a few years the chair of Dogmatic Theology and Sacred Scripture at Seton Hall College, Orange, N.J., he became its President in 1868. In 1873 he was appointed by Pius IX. to the See of Newark, and in 1880 was made coadjutor to Cardinal McCloskey, Archbishop of New York, under title of Archbishop of Petra; and on the death of the Cardinal in 1885 he became Metropolitan of the diocese of New York.

COSSON, Charles Alexander de, F.S.A., F.R.G.S., Baron de Cosson in France, born at Durham, Aug. 26, 1846. He is descended from an ancient French family established in Guienne at the period of the Revolution, when his grandfather emigrated, serving first in the army of the Princes, and then in the Hompesch regiment of Hussars. When that regiment was incorporated in the British Army, as the 10th Hussars, he came to England, his father having been guillotined and his estates forfeited. He returned to France in 1855, and died there in 1867,

at the age of ninety-eight, his life thus reaching from the reign of Louis XV., almost to the close of that of Napoleon III. Baron de Cosson was educated at home, and travelled much on the continent, with his family. He spent two years at Seville, where he lost his father in 1871. In December, 1868, he had written to the *Times* a long account of the insurrection at Cadiz, which the leading article described as the first exact narrative of that event received in England. In the winter of 1872 he went to Egypt, and thence proceeded to Abyssinia, in company with his brother the late Major de Cosson, who published an account of this journey in "*The Cradle of the Blue Nile*." He visited Adowa and Axum, and crossed the Lamalmon Pass to Gondar and Lake Tsana. The travellers were well received by the late King John of Abyssinia. In the summer of 1873, his brother, having to return to England, left him, and travelled via Khartoum and the desert, to Suakim. The experience thus gained led to his being appointed to the water transport of Sir Gerald Graham's Field Force in 1885, when he was mentioned in despatches, and gazetted Major. Baron de Cosson remained in Abyssinia some months longer, returning to Massowah, by Debra Tabor, Sokota, and the interior of the country. He is best known, however, for the attention he has given for the last twenty years to the study of ancient armour and weapons. In conjunction with the late William Burges, A.R.A., he organised an exhibition of helmets and mail at the Royal Archaeological Institute, in 1880, and undertook the description of the European helmets. In that work he formulated the principles which he considered ought to regulate the scientific study of ancient armour. He especially insisted that each fine piece of armour was a well considered and skilfully wrought piece of metal work, having its definite purpose, for which it was admirably adapted, and that armour should not be looked at, as was so often the case, simply as people regard the objects at Madame Tussaud's Exhibition. Since then he has contributed various papers to the *Archæological Journal*, and other antiquarian publications. He has also, at his house at Chertsey, a small but carefully formed collection of arms and armour. At present he is engaged, in conjunction with the Conde de Valencia de Don Juan at Madrid, in collecting, as far as possible, all notices and marks of ancient armourers and swordmakers. In 1876 he married Cecilia Nefesech Bonomi, second daughter of the late Joseph Bonomi, well known

for his travels in the East and his works on ancient Egypt and Assyria.

COTTESLOE (Lord), The Right Hon. Thomas Francis Fremantle, is the eldest son of the late Vice-Admiral Sir Thomas Francis Fremantle, Bart., G.C.B., of Swanbourne, Bucks, by Elizabeth, daughter and co-heiress of the late Mr. Richard Wynne, of Falkingham, Lincolnshire. He was born in London, in 1798, and educated at Eton and Oriel College, Oxford, where he took his degree with high honours in the year 1819. He entered Parliament at the General Election of 1826 as member for Buckingham, which he represented in the Conservative interest down to 1846, when he was appointed Deputy-Chairman of the Board of Customs. He was subsequently promoted to the chairmanship of this department, a post which he held down to the end of the year 1873. He was one of the Secretaries of the Treasury under Sir Robert Peel's first short-lived Ministry in 1834-5, and again under his old chief in 1841-4, and Secretary for War in 1844-5. He also held the post of Chief Secretary for Ireland during the last year of Sir Robert Peel's administration. He was raised to the peerage by the title of Baron Cottesloe in Feb., 1874. Lord Cottesloe (who is also a Baron of the Austrian Empire) married in 1824 Louisa Elizabeth, eldest daughter of the late Sir George Nugent. His eldest son, the Hon. Thomas F. Fremantle, who was born in 1830, is married to a sister of the Earl of Eldon.

COTTON, General Sir Arthur Thomas, K.C.S.I., son of the late H. C. Cotton, Esq., and a cousin of the late Lord Combermere, born at Woodcot House, Oxfordshire, in 1803, was educated at Addiscombe. He entered the Madras army in 1819, became Colonel of Engineers in 1854, and served in the Burmese war. In 1861 he received the honour of knighthood for his activity in developing the cotton growing capabilities of India, and was entertained at a public dinner before returning to the East. He was nominated a Knight Commander of the Star of India on the reorganization of that Order in 1866. In the following year he was nominated a Lieut.-General in the army, and placed on the fixed establishment of general officers. He attained the rank of General in 1876, and was placed on the retired list in the following year.

COTTON, The Right Hon. Sir Henry, D.C.L., P.C., late Lord Justice of Appeal,

the younger son of the late William Cotton, Esq., of Walwood House, near Leytonstone, Essex (formerly High Sheriff of that county and at one time Governor of the Bank of England), by his marriage with Sarah, only daughter of the late Thomas Lane, Esq. He was born at Leytonstone, May 20, 1821, and educated at Eton, where he was Newcastle scholar in 1838, and at Christ Church, Oxford, of which he was student, and where he took his bachelor's degree in Michaelmas Term, 1842, obtaining a Second Class in the School of *Literæ Humaniores*, and a First Class in Mathematical Honours. He was called to the Bar at Lincoln's Inn in Jan., 1846, and having gained a large practice as a Chancery barrister, he obtained a silk gown in December, 1866. He was made a Bencher of his Inn in Jan., 1867, and was appointed Standing Council to the University of Oxford in 1872. He was appointed in June, 1877, to succeed the late Sir George Mellish as one of the Lords Justices of Appeal of the High Court of Judicature, and he received the honour of knighthood and was sworn of the Privy Council in the following month. The University of Oxford conferred upon him the honorary degree of D.C.L. in Oct., 1877. In 1890, Sir Henry Cotton retired, and was succeeded, as Lord Justice of Appeal, by Mr. Justice Kay. Sir Henry Cotton married in 1853 Clemence, youngest daughter of the Rev. Thomas Streatfeild, of Chart's Edge, Kent.

COUCH, The Right Hon. Sir Richard, P.C., born in 1817, was called to the Bar at the Middle Temple in 1841, and practised for many years on the Norfolk circuit. He was for some years Recorder of Bedford, but in 1862 was appointed a Puisne Judge of the Bombay High Court, entering upon office in August of that year. In April, 1866, on the retirement of the late Sir Matthew Sausse, he was promoted to be Chief Justice of the High Court of Judicature at Bombay, receiving soon afterwards the honour of knighthood; and in 1870 he succeeded Sir Barnes Peacock as Chief Justice of the High Court of Calcutta. He resigned the latter post in 1875, when his name was added to the roll of the Privy Council. In the same year he was President of the Commission appointed to inquire into the charges against the Gaekwar of Baroda. He was appointed a member of the Judicial Committee of the Privy Council in January, 1881.

COUES, Elliott, M.D., was born at Portsmouth, N.H., Sept. 9, 1842, and studied

at Columbian University, Washington, where he took his B.A. degree in 1861; M.D. 1863. He served on the Medical Staff of the U. S. army from 1862 to 1881, holding official positions on the Northern Boundary Survey, 1873-76; and on the Geological Survey of the Territories, 1876-80. From 1877-87 he was Professor of Anatomy in the National Medical College at Washington; during 1883 he was Professor of Biology in the Virginia Agricultural College. He is a member of most of the scientific societies in America, and of many in Europe. His principal works are:—"Key to North American Birds," 1872, enlarged edition 1884; "Field Ornithology," 1874; "Birds of the North-west," 1874; "Fur-Bearing Animals," 1877; "Monographs of North America Rodentia," 1877; "Birds of the Colorado Valley," 1878; "Ornithological Bibliography," 1878-80; "New England Bird Life," 1881-83; "Check List and Dictionary of North American Birds," 1882; "The Biogen Series," 1882-86. He has been for many years a voluminous contributor to scientific periodicals, and is the author of the articles on general biology, zoology, and comparative anatomy in the "Century Dictionary."

COUNTRY PARSON. See BOYD, A. K. H.

COURTNEY, The Rt. Hon. Leonard Henry, M.P., P.C., eldest son of the late Mr. John Sampson Courtney, banker, of Penzance, Cornwall, by Sarah, daughter of Mr. John Mortimer, of St. Mary's, Scilly, was born at Penzance, July 6, 1832. He was educated at the Regent House Academy in that town, under Mr. Richard Baines, and afterwards privately under Mr. L. R. Willan, M.D. Mr. Courtney was for some time in the bank of Messrs. Bolitho, Sons, and Co., but went to St. John's College, Cambridge, in 1851, and graduated B.A. as Second Wrangler in 1855, being bracketed First Smith's Prizeman. In the following year he was elected a Fellow of his college. For some time he was engaged in private tuition at the university. In 1858 he was called to the Bar at Lincoln's Inn. He was appointed in 1872 to the Chair of Political Economy at University College, London, and held that professorship until a lengthened visit to India in the winter of 1875-6 necessitated his retirement. For two years he was Examiner in Constitutional History in the University of London 1873-75. In 1874 he contested Liskeard, but polled only 329 votes against 334 recorded for Mr. Horsman, but at the election which

was held after that gentleman's death, Mr. Courtney gained the seat, December 22, 1876, polling 388 votes against 281 votes given to his opponent, Lieut.-Colonel Sterling. He held the seat as long as Liskeard remained a parliamentary borough, and when it was merged in the division of South-East Cornwall he won the enlarged constituency at the general election of 1885, and was again returned in 1886. He was appointed Under-Secretary of State for the Home Department in Dec., 1880. In August, 1881, he was appointed Under-Secretary of State for the Colonies, in succession to Mr. Grant Duff, who had been nominated Governor of Madras; and in May, 1882, he succeeded the late Lord Frederick Cavendish as Financial Secretary to the Treasury, but resigned his appointment on finding that the last Reform Bill did not include the principle of proportional representation, which he and the late Mr. Fawcett had long advocated. In 1885 and again in 1886, having been returned as a Unionist Liberal, he was appointed Chairman of Committees in the House of Commons. Mr. Courtney is an advanced Liberal and in favour of a more extended system of local government in counties; and he is also in favour of an absolute security being given by legislation to agricultural tenants for compensation for their improvements. He was for some years a regular writer for the *Times*. In 1860 he published a pamphlet on "Direct Taxation;" and to the "Journal of the Statistical Society," 1868, he contributed a paper on the "Finances of the United States, 1861-67." Mr. Courtney has written various papers in the *Fortnightly Review*, the *Nineteenth Century*, and the *International Review*. He married, March 15, 1883, Catherine, eldest unmarried daughter of Mr. Richard Potter, a lady well known for her exertions in providing decent homes for the poor. He was made a Privy Councillor in 1889; and was presented with the hon. freedom of Penzance.

COWELL, Professor Edward Byles, born at Ipswich, Jan. 23, 1826, was educated at the Ipswich Grammar School and at Magdalen Hall, Oxford, where he took his B.A. degree in classics, Dec., 1854, and M.A. 1857. In 1856 he went to Calcutta as Professor of History in the newly established Presidency College, and was appointed soon afterwards Principal of the Sanskrit College also. He returned to England in 1864, and in 1867 was elected Professor of Sanskrit in the University of Cambridge. In 1874 he

was elected to a Fellowship in Corpus Christi College. Professor Cowell's chief published works are :—"The Prākṛit Grammar of Vararuci" (Sanskrit and English), 1854; "Kanshītaki Upanishad" (Sanskrit and English), 1861; "Maitrāyaṇīya Upanishad" (Sanskrit and English), 1870; "Kusumāñjali; or, Hindu Proof of the Existence of a Supreme Being" (Sanskrit and English), 1864; "Taittirīya, or Black Yajur Veda" (Sanskrit), Vols. I., II., edited with Dr. Roer, 1860-64; "Elphinstone's History of India," edited with Notes, 1866; "Colebrooke's Essays," edited with Notes, 1873; "The Aphorisms of Sāṅdilya," translated from the Sanskrit, 1873; "The Nyāya-Mālā-Vistara," a Sanskrit work on the "Pūrva-mīmāṃsā," left unfinished by the original editor, Professor Goldstücker, and completed, 1878; "The Sarva-Darsana-Samgraha, or Review of the different Schools of Hindu Philosophy," translated in conjunction with Professor A. E. Gough, 1882; "The Divyāvadāna," a collection of early Buddhist Legends in Sanskrit, edited in conjunction of R. A. Neil, Fellow of Pembroke College, Cambridge, 1886.

COWEN, Frederic Hymen, composer, born Jan. 29, 1852, at Kingston, in Jamaica, exhibited as an infant an extraordinary love of music. He was brought to England at the age of four, and from that time showed so much musical talent, both in composition and in playing, as to render it advisable to place him under the tuition of Sir Julius (then Mr.) Benedict and Sir John (then Mr.) Goss, whose pupil he remained until the winter of 1865. He then studied at the conservatoires of Leipzig and Berlin, and returned to London in 1868. His first essay in composition was a waltz, written at six years old. This was followed by numerous small pieces, including an operetta entitled "Garibaldi." On his return from Berlin he wrote a fantasie sonata, a trio, a quartet, a concerto for piano, and a symphony in C minor, the latter played firstly at the composer's own concert, and then at the Crystal Palace. Mr. Cowen's more important works comprise two cantatas, "The Rose Maiden," 1870; and "The Corsair" (written for the Birmingham Festival), 1876; an opera "Pauline," 1876; an oratorio, "The Deluge," unpublished; Symphonies No. 2 and No. 3 (Scandinavian), which latter has made his name known throughout Europe; a sacred cantata, "Saint Ursula" (produced at the Norwich Festival, 1881); Symphony No. 4 (the Welsh); cantata, "Sleeping Beauty" (written for the

Birmingham Festival), 1885; Symphony No. 5, in F; the oratorio "Ruth" (written for the Worcester Festival), 1887; "A Song of Thanksgiving" (for the opening of the Melbourne Centennial Exhibition), 1888; the cantata, "St. John's Eve," produced at the Crystal Palace, Dec., 1889; and the opera "Thorgrim" (produced at Drury Lane by the Carl Rosa Company, April, 1890), and acknowledged to be the finest work Mr. Cowen has yet written. Mr. Cowen's works also comprise several overtures, a sinfonietta, a suite de ballet ("The Language of Flowers"), pieces for the pianoforte, and more than 200 songs and ballads, many of which have attained great popularity. In 1888 Mr. Cowen was engaged by the Victorian Government to direct the series of Concerts at the Melbourne Centennial Exhibition extending over a period of six months, and returned to England in the Spring of 1889. He was elected Conductor of the Philharmonic Society in 1888, which post he still occupies.

COWEN, Joseph, late M.P. for Newcastle, eldest son of the late Sir Joseph Cowen (who represented Newcastle-on-Tyne from 1865 till his death in Dec., 1873), by Mary, daughter of Mr. Anthony Newton, of Winlaton, co. Durham, was born at Blayden Brows in that county in 1831. He received his education at the University of Edinburgh. Early in life Mr. Cowen contracted close friendship with Mazzini, Garibaldi, Kossuth, Herzen, and other political exiles. He was unceasing in his advocacy of the cause of the oppressed European nationalities. To aid their propaganda he established a private press, at which their revolutionary manifestoes were printed and then smuggled into Italy, Hungary, and Poland. He was intimately and actively identified with the different Garibaldian expeditions to establish a free and united Italy, and with Langiewicz's unsuccessful effort for Polish independence. At the death of his father Mr. Cowen was elected for Newcastle, which he represented until 1886. In home politics he is a democrat, and in foreign affairs an imperialist. He disregards conventional party ties, and in Parliament has always acted independently. He would have England to keep her empire, and assert and maintain her position as an active and efficient member of the European Areopagus. He believes this can be best done by a system of Imperial Federation, and he would carry federation the length of granting Home Rule to Ireland, which he advocates as a means of con-

solidating and strengthening the empire. Mr. Cowen is a member of most of the local representative bodies in Tyneside. He was one of the pioneers of co-operation, and has been an ardent advocate of education and social progress, on which subjects he has written several pamphlets. In Parliament Mr. Cowen has promoted Bills for the extension of County Courts, for the establishment of Licensing Boards, and for amendments in the electoral law. He is an extensive coal owner, and fire-brick and clay retort manufacturer. He is also proprietor of the *Newcastle Daily and Weekly Chronicles*, and has contributed largely to these and other periodicals. His addresses to his constituents have been collected and published in two volumes. His life, by Major Jones, and a selection of the speeches he has delivered in the House of Commons and at literary institutions also have been published. After the dissolution of 1886, Mr. Cowen did not offer himself for re-election. He has since his retirement from Parliament written extensively for his own newspapers and for other political and literary publications. He married, in 1854, Jane, daughter of Mr. John Thompson, of Fatfield.

COWIE, The Very Rev. Benjamin Morgan, D.D., Dean of Exeter, born June 8, 1816, was educated at St. John's College, Cambridge, where he graduated B.A., as Senior Wrangler, in 1839, and was elected Fellow of his college. In 1844 he was appointed Principal of the College of Civil Engineers at Putney. He was a Select Preacher in his university, and preached the Hulsean Lectures in 1853 and 1854; was elected Professor of Geometry at Gresham College in 1854, and became a Minor Canon of St. Paul's in 1858. He also held the vicarage of St. Laurence Jewry, in the City of London, from 1858 to 1873. In 1859 he was appointed a Government Inspector of Training Schools, and in 1866 Warburtonian Lecturer at Lincoln's Inn. He was nominated one of the Chaplains in Ordinary to Her Majesty, Jan. 14, 1871, and was appointed Dean of Manchester in Oct., 1872. In 1880 he was elected Prolocutor of the Lower House of Convocation of the Province of York, in succession to the late Dean of York, the Hon. A. Duncombe. In 1882 Dr. Cowie was appointed Dean of Exeter. He published in 1846 a "Catalogue of the Library of St. John's College, Cambridge;" and he is author of some theological works.

COWPER (Earl), The Right Hon. Francis

Thomas De-Grey Cowper, K.G., eldest son of the sixth Earl, was born in 1834, and educated at Christ Church, Oxford, where he took a first-class in law and modern history in 1855. He succeeded to the title on his father's death, in 1856. He was Captain of the Gentlemen-at-Arms from April, 1871, to Dec., 1873. On May 5, 1880, he was installed Lord Lieutenant of Ireland at Dublin Castle, and he held that post till April 28, 1882, when he and Mr. Forster resigned together, he being succeeded by Earl Spencer. Lord Cowper after this did not take much part in public affairs until Mr. Gladstone promulgated his Home Rule policy, when Lord Cowper declared himself opposed to it. He was Chairman of the celebrated "Opera House" meeting of Unionists, and took other measures against Mr. Gladstone's bill. After the accession of Lord Salisbury, Lord Cowper was appointed Chairman of the Commission for investigating the working of the Irish Land Act of 1881.

COX, The Rev. Sir George William, Bart., M.A., born in 1827, was educated at Rugby and at Trinity College, Oxford, of which he was scholar, and where he graduated S.C.L. in 1849, and proceeded B.A. and M.A. in 1859. He entered holy orders in 1850, and was curate of Salcombe Regis, Devon, in 1850-1, of St. Paul's, Exeter, 1854-7, held an assistant-mastership in Cheltenham College in 1860-1, was Vicar of Bekesbottle, Kent, 1881, and is now Rector of Scrayingham, York. He is the author of "Poems, Legendary and Historical," published in 1850; "Life of St. Boniface," 1853; "Tales from Greek Mythology," and "The Great Persian War," 1861; "Tales of the Gods and Heroes," 1862; "Tales of Thebes and Argos," 1863; "A Manual of Mythology in the form of Question and Answer," 1867; "Tales of Ancient Greece," collected edition, 1868; "Latin and Teutonic Christendom," 1870; "The Mythology of the Aryan Nations," 2 vols., 1870; "A History of Greece," 2 vols., 1874; "The Crusades," 1874; "The Greeks and the Persians," 1876; "The Athenian Empire," 1876; "A General History of Greece, from the earliest period to the death of Alexander the Great, with a sketch of the subsequent History to the present time," 1876; "School History of Greece," 1877; "Tales of Ancient Greece," 1877; "History of British Rule in India," 1881; "Introduction to the Science of Comparative Mythology and Folklore," 1881; "Alexander the Great," and other articles in the 9th

edition of the "Encyclopædia Britannica;" "Lives of Greek Statesmen," 2 vols., 1886. He has been a contributor to the *Edinburgh Review* since 1857. He edited (jointly with the late W. T. Brande) the "Dictionary of Science, Literature, and Art" (3 vols., 1865-67; new edit., 3 vols., 1875), and contributed to the "Glossary of Terms and Phrases," by the Rev. H. Percy Smith, 1883; "Life of Bishop Colenso," 2 vols., 1888; "The Church of England and the Teaching of Bishop Colenso," 1888. On the death of his uncle Sir Edmund Cox, which occurred in Canada in Aug., 1877, he succeeded to the baronetcy; and he is the 15th baronet in succession from Sir Richard Cox, Chancellor of Ireland. With regard to this baronetcy it is a singular circumstance that the title has never descended from father to eldest son, and only twice to a son.

COXE, The Right Rev. Arthur Cleveland, D.D., Anglican Bishop of Western New York, was born at Mendham, New Jersey, May 10, 1818. B.A., University of New York, 1838, and M.A. 1841, when he completed his course at the General Theological Seminary. Ordained to the diaconate, he became rector of St. Ann's church, Morrisania, New York, where he remained till Easter, 1842. Ordained Priest in that year, he was rector of St. John's church, Hartford, Connecticut, till 1854, when he accepted the rectorship of Grace Church, Baltimore. In 1863 he became rector of Calvary Church, New York. He was consecrated Bishop Coadjutor of Western New York, Jan. 4, 1865, and on the death of Bishop De Lancey, three months later, he succeeded to the bishopric. Dr. Coxe visited England in 1851; attended the Conferences at Lambeth Palace in 1878 and 1888, and at other times has been in England on private or public business. He became D.D. at the University of Durham, 1888, when he preached in the Cathedral by appointment of the late Bishop Lightfoot. He was one of the founders of the Anglo-Continental Society. Among his many publications are "Christian Ballads," 1840 (published in England in 1851, and subsequently in many editions); "Athanasion and other Poems," 1842; "Hallowe'en," 1844; "Saul, a Mystery," 1845; "Sermons on Doctrine and Duty," 1854; "Impressions of England," 1856; "Criterion," 1866; "Moral Reforms," 1869; "Ladye Chace," 1878; and "The Penitential," 1882. In 1885 he founded the Christian Literary Co. of New York, and edited nine vols. of their series of

"Ante-Nicene Fathers," also, subsequently, their edition of St. Augustine on the Psalms. In 1887 he was "Baldwin Lecturer" at Michigan University, and the first vol. of these lectures appeared in 1887, with the title of "Institutes of Christian History." In 1888 he preached frequently in Paris, and officiated in the "Gallican Chapel" as Bishop in charge of the "Gallicans" of France, a position which he still (1890) retains.

COXWELL, Henry Tracy, was born March 2, 1819, at the Parsonage House, Wouldham, near Rochester Castle. This celebrated aeronaut is the grandson of the Rev. Charles Coxwell, deputy-lieutenant for Gloucestershire, and son of Commander Joseph Coxwell, R.N., and was educated at the Military School, Chatham. In 1844 the young balloonist, who at that time was an enthusiastic amateur, ascended from White Conduit Gardens in North London. In 1845 he projected and edited the *Ærostatic Magazine*; after that he made numerous ascents with Mr. Hampton, Mr. Gypson, and Lieutenant Gale. He was a fellow-traveller with Albert Smith when a balloon (Gypson's) burst over London in a storm of lightning and thunder, and it was owing to Mr. Coxwell's promptitude in cutting a line which turned the balloon into a parachute that the lives of the four aerial travellers were saved. This incident was one of the means used by his friends to induce him to undertake the management of a balloon himself, which he did most successfully in the year 1848 at Chelmsford. In the same year he commenced an aeronautic campaign on the Continent: starting at Brussels, with his typical war balloon, he demonstrated a new plan of discharging aerial torpedoes. The torpedoes were dropped from a second car or battery connected by a rope ladder, 40 feet long, below the passenger car. Down this rope ladder Mr. Coxwell descended in order not to risk the gas exploding when the shells were lighted and discharged. They fell over the city and exploded in mid-air. With this balloon a succession of experiments took place at Elberfeld, Berlin, and the principal towns of Germany and Austria. In the year 1851 Mr. Coxwell returned to London, and about the time of the Crimean War he called the attention of the military authorities to his system of signalling, by using semaphore arms attached to the ring and car. Some years later he adopted other codes more in accordance with the telegraphic improvements of the present day. In 1862 Mr. Coxwell,

after making numerous ascents in Great Britain, turned his attention to meteorological ballooning. Mr. James Glaisher, F.R.S., having undertaken to make observations for the British Association, Mr. Coxwell was invited to co-operate. On Sept. 5, 1862, Messrs. Glaisher and Coxwell accomplished an exploration to the unprecedented elevation of seven miles, where Mr. Glaisher was in a state of insensibility, while Mr. Coxwell had to mount up into the ring to seize the valve cord between his teeth, as he had lost power in his hands, they being frost-bitten, and he could not effect a descent until he had opened the valve. It was here that Mr. Coxwell observed an aneroid to indicate their maximum elevation, which was confirmed by other meteorological instruments as read and verified by Mr. Glaisher before and after his temporary unconsciousness of thirteen minutes, during which time a vast dip had been made of nearly 19,000 feet. Lofty flights above our highest mountain-tops were continued for some time, but never equalled the first. About this time Mr. Coxwell ascended from Woolwich Arsenal and from Aldershot camp for purely military objects. In the year 1870 Prussia formed in Cologne two detachments of aëronauts, in order to use them during the Franco-German War, and Mr. Coxwell was engaged to instruct the officer and soldiers in this service. Some time before the Egyptian Campaign Mr. Coxwell showed at the Crystal Palace how one large balloon and two smaller ones could, by a variation in their positions while in a captive state, illustrate a system of signalling. He retired in the year 1885, when his last public ascent had been made from York, where he had ascended consecutively for twenty-eight years. He has written two volumes of his "Life and Balloon Experiences;" these were published in 1887-9.

CRAIG, Isa. See KNOX, MRS.

CRANBROOK (Viscount), The Right Hon. Gathorne Gathorne-Hardy, G.C.S.I., is the third son of the late Mr. John Hardy, of Dunstall Hall, Staffordshire (who for many years represented the town of Bradford in Parliament), and of Isabel, daughter of Mr. Richard Gathorne, of Kirkby Lonsdale. He was born at Bradford, Oct. 1, 1814, and educated at Shrewsbury School, and at Oriel College, Oxford, where he gained a second-class in classics, and took the degree of B.A. in 1836. He was called to the Bar at the Inner Temple in 1840, and practised as a

barrister for several years. Mr. Hardy unsuccessfully contested Bradford in the Conservative interest in 1847, but was returned to the House of Commons in 1856 as member for Leominster, which borough he continued to represent till the celebrated Oxford election in July, 1865, when, after an exciting contest, he defeated Mr. Gladstone by a majority of 180, this being the principal Conservative success at the general election of that year. In 1858 Mr. Hardy was appointed Under-Secretary of State for the Home Department in Lord Derby's second administration; on the formation of Lord Derby's third administration in July, 1866, he became President of the Poor-Law Board; and on the resignation of Mr. Walpole, in May, 1867, he was nominated Secretary of State for the Home Department, which office he held till the resignation of the Conservative ministry in Dec., 1868. On the formation of Mr. Disraeli's administration in Feb., 1874, Mr. Hardy was nominated Secretary of State for War. In May, 1878, he was raised to the House of Peers by the title of Viscount Cranbrook, of Hemsted, in the county of Kent; and he assumed, by royal license, the additional surname of Gathorne. In the same year he succeeded the Marquis of Salisbury as Secretary of State for India, and held that office until the Conservatives retired from office in May, 1880. In Lord Salisbury's cabinet of 1885, and again in 1886, Lord Cranbrook held the office of Lord President of the Council. He married, in 1838, Jane, daughter of Mr. James Orr, of Holywood House, co. Down. His eldest son, the Hon. J. S. Gathorne-Hardy, sits for the Medway Division of Kent, and his third son, the Hon. A. E. Gathorne-Hardy, for the East Grinstead division of Sussex.

CRANE, Walter, painter and decorative designer, second son of Thomas Crane, of Chester, miniature and portrait painter, sometime Secretary and Treasurer of the Liverpool Academy, was born at Liverpool, Aug. 15, 1845; apprenticed, 1859, to W. J. Linton (the eminent wood-engraver, poet, and chartist), for three years, to learn the craft of drawing on wood for engraving. This turned his work largely in the direction of book illustration, which he followed side by side with painting and decorative designing. He was appointed a member of the committee of the General Exhibition, known as the Dudley Gallery, of Water-Colour Drawings in 1879, and resigned that position in 1881. He was Examiner at the National Competition of Drawings,

South Kensington, 1879, and has so acted since. He was elected a member of the Institute of Painters in Water Colours in 1882, also of the Institute of Painters in Oil, but resigned membership of both in 1886. He was elected an Associate of the Royal Society of Painters in Water Colours (the old society) in March, 1888, and has since exhibited there. He became a member of the Società d'Acquarellisti of Rome in 1883. He first exhibited at the Royal Academy (a small picture, "The Lady of Shalott") in 1862; and he has exhibited at the Grosvenor Gallery every year from its foundation in 1877, on which he ceased to appeal to the Academy. His principal pictures are:—"The Renaissance of Venus," 1877; "The Fate of Persephone," 1878; "The Sirens," 1879; "Truth and the Traveller," 1880; "Europa," "The Laidley Worm," 1881; "The Roll of Fate" and "Dunstanborough Castle," 1882; "Diana and the Shepherd," 1883; "The Bridge of Life," 1884; "Freedom," 1885; "Pandora," 1885; "The Chariots of the Hours," 1887; "Sunrise," 1888; "Flora," 1889; "Pegasus," 1889. "A Diver," 1885, won a silver medal at the Paris Universal Exhibition, 1889. He has published "Walter Crane's Toy Books," 1869-75; "Picture Books," 1874-5; "The Baby's Opera," 1877, &c. "The Sirens Three," a poem written and illustrated by himself, 1886, which appeared originally in *The English Illustrated Magazine*. He was associated with the movement against the Royal Academy, 1886, and in favour of the establishment of a *National Exhibition* in which *all* the arts should be represented. Afterwards, in conjunction with other well-known decorative artists, he founded the Arts and Crafts Exhibition Society, 1888, and became its President. The society opened its first exhibition at the New Gallery in the autumn of 1888. In 1884 he became associated with the Socialist movement, and has since worked for it by means of lectures, writings, and designs. In 1889 he gave the Canton Lectures (course of three) at the Society of Arts, "On the Decoration and Illustration of Books." He was President of the Section of Applied Art at the National Art Congress at Liverpool, 1888; and designed the Seal of the London County Council, 1889.

CRAWFORD, Mrs. Emily, journalist, daughter of Andrew and Grace Johnstone, was born in Dublin on May 31, 1841. Her education was a home one until she went to Paris in 1857. Her reading was extensive, and when quite a young girl was

engaged to write a daily letter to the *Morning Star*. She married, in 1864, George Morland Crawford, Esq., of Chelsfield Court Lodge, Kent, and member of Lincoln's Inn, who was then Paris Correspondent of the *Daily News*. After her marriage she greatly aided her husband in his work, remained in France during the war of 1870, and was in Paris during the Communal Civil War. She frequently contributed leading and miscellaneous articles to the *Daily News*, and wrote for many papers, besides English and American magazines and reviews; amongst others *Truth*, the *Pall Mall Gazette*, the *New York Tribune*, the *Gentleman's Magazine*, *The Century*, and *Macmillan's*, to which she furnished, in Oct., 1877, a monograph of M. Thiers. She also wrote the biography of that statesman which appeared after his death in the *Daily News*. Her first review article was asked for by the editor of *The Museum of Edinburgh*, on the suggestion of the late Matthew Arnold, who, when he made it, was not acquainted with her, but had been struck with some observations which she had made on the weak side of the system of higher education in France, and had entered into a correspondence with her on the subject. Mrs. Crawford has also contributed to the *Contemporary and Universal Review*, and *Subjects of the Day*. She is a brilliant descriptive writer.

CRAWFORD, Francis Marion, American writer, the son of Thomas Crawford, the sculptor, was born at Bagni di Lucca, Italy, Aug. 2, 1854. He was educated partly in America (Concord, N. H.), partly in Italy, and partly in England, 1870-74, where he had a private tutor and was a member of Trinity College, Cambridge. From 1874-76 he studied at Karlsruhe, and for a short time at Heidelberg. He passed 1876-78, at the University of Rome, studying Sanskrit. In 1879 he went to India and was editor of a daily paper, the *Indian Herald*, published at Allahabad. He returned to America in 1881, remaining there till 1883, when he went to Italy, where (with the exception of a visit to Turkey in 1884) he has since resided, his home being near Sorrento. Mr. Crawford's writings have been chiefly in the line of fiction, though he has done some work in critical philosophy and philology. His books include "Mr. Isaacs," 1882; "Dr. Claudius," 1883; "To Leeward," 1883; "A Roman Singer," 1884; "An American Politician," 1884; "Zoroaster," 1885; "A Tale of a Lonely Parish," 1886; "Saracinesca," 1887; "Marzio's Cruci-

fix," 1887; "Paul Patoff," 1887; "With the Immortals," 1888; "Greifenstein," 1889; "Sant' Ilario," 1889; and "A Cigarette Maker's Romance," 1890. Mr. Marion Crawford has recently been awarded a prize of 1,000 francs by the French Academy, as an acknowledgement of the merit of his novels, and especially of two of them, "Zoroaster" and "Marzio's Crucifix," which were written in French as well as in English.

CRAWFORD, Sir Thomas, K.C.B., M.D., and LL.D. Edin.; Hon. F.R.C.S.I., and F.K.Q.C.P.G., Director-General of the Army Medical Department, entered the Service as assistant-surgeon in Feb., 1848. He was promoted to be full surgeon in Feb., 1855, surgeon-major in Feb., 1868, and was raised to the rank of deputy-inspector-general for special service in Feb., 1870. He became surgeon-general in Dec., 1876. While an assistant-surgeon with the 51st Light Infantry regiment, Dr. Crawford served in Burmah throughout the Burmese war of 1852-3, including the storming and capture of Rangoon. For this service he received the Burmah medal with the clasp for Pegu. Dr. Crawford was subsequently gazetted to the 18th Royal Irish regiment, and served in the Crimea during the Eastern campaign from Feb., 1855, to the fall of Sebastopol. He received the Crimean medal and clasp of Sebastopol, together with the Turkish medal, for this service. He was subsequently selected for the position of head of the medical branch in the director-general's office in London, and held this appointment for several years during Sir Galbraith Logan's rule of the department. At the conclusion of this service Dr. Crawford proceeded to India, where he served as deputy-surgeon-general of the Sirhind circle in Bengal. Having completed this tour of foreign service, Dr. Crawford returned to England and held the appointment of head of the Army Medical Department in Ireland, but not long afterwards left again for India, this time with the position of chief of the Army Medical Department in that empire. In April, 1882, he was appointed to succeed Sir William Muir as Director of the Army Medical Department, from which he retired in May, 1890.

CREAGH, Charles Vandeleur, was born Oct. 4, 1842, and is the second surviving son of Captain James Creagh, R.N., of Cahirbane, Co. Clare, Ireland, and grandson of the O'Moore, of Cloghan Castle, King's Co. He was educated at the Royal Naval School, New Cross, and at

Eastman's Naval Academy, Southsea; passed the examination for admission to the India Navy in 1857, and entered the Punjaub Police, as Assistant District Superintendent, in 1865. He obtained a second class certificate in Oriental languages, and in 1867 was supported by the Indian Government in raising a Sikh Police Corps, for which service he had been selected by the Governor of Hong Kong. He has held the following appointments in Hong Kong:—1868, J.P.; Acting Captain Superintendent of Police in 1869-70, and 1877-78; Sheriff, 1874; Aide de Camp, 1878; Superintendent of the Fire Brigade, 1878; 1878-80. He studied law in the Middle Temple during eight terms, and passed the examinations in Roman and Common Law. He passed with credit the six Acting Police Magistrate and Coroner examinations in Chinese prescribed by Government; and was Arbitrator for Government under the Opium Ordinance in 1879; was appointed Assistant British President and Member of the State Council, Perak, on the application of the President, Sir Hugh Low in 1882; and Judge of the Presidency Court, Perak. He acted frequently for the President during his absence. In 1888 was selected for the post of Governor and Commander in Chief and Chief Judicial Officer of the British North Borneo Company's territory, with the approval of the Secretary of State. On Jan. 1, 1890, he was appointed Governor and Commander-in-Chief of Labuan.

CREIGHTON, Professor, The Rev. Mandell, M.A. Oxford and Cambridge; hon. LL.D. Glasgow, hon. D.C.L. Durham, LL.D. of Harvard University, and Canon of Worcester, was born at Carlisle in 1843, educated at Durham Grammar School, and elected postmaster at Merton College, Oxford, in 1862. At Oxford he was placed in the first class in Classical Moderations, and in the first class in *Literæ Humaniores*, and in the second class in Law and Modern History in 1866. In the same year he was elected Fellow of Merton College, and remained at Oxford as tutor of Merton. He was ordained deacon in 1870, and priest in 1873, and in 1875 accepted the living of Embleton in Northumberland. He was appointed by Bishop Lightfoot rural dean of Alnwick in 1879, and on the formation of the diocese of Newcastle in 1882 was made honorary canon of Newcastle and examining chaplain to the Bishop. In 1883 the University of Glasgow conferred on him the honorary degree of LL.D. In 1884 he was elected

to the newly founded professorship of Ecclesiastical History in the University of Cambridge. In 1885 he received the honorary degree of D.C.L. from the University of Durham, and was appointed by the Crown canon residentiary of Worcester Cathedral. He has frequently acted as public examiner and select preacher in the Universities of Oxford and Cambridge. He is also examining chaplain to the Bishop of Worcester. He is the author of several historical works:—"Primer of Roman History, 1875; "The Age of Elizabeth," 1876; "The Life of Simon De Montfort," 1877; "Primer of English History," 1877; "Cardinal Wolsey," in the series of English Statesmen, 1888; "Carlisle," in Historic Towns, 1889. His principal work is a "History of the Papacy during the period of the Reformation," of which the first two volumes were published in 1882, and two others in 1887. He is editor of the *English Historical Review*, the first number of which appeared in January, 1886. Canon Creighton represented Emmanuel College at the 250th anniversary celebration of Harvard College, Massachusetts, in November, 1886, when he received the degree of LL.D., and was elected a corresponding member of the Historical Society of Massachusetts. In 1889 he was elected Honorary Fellow of Merton College, Oxford.

CREMER, William Randell, M.P., was born in 1829, of poor parents, at Fareham, in Hampshire, and lost his father at an early age. As soon as he was old enough he was apprenticed to the carpenter's trade, and in Brighton, as well as in London, where he afterwards worked as a joiner, he found time to associate himself in all the Radical movements of the day, and in 1859 took part in the Unionist agitation which resulted in the celebrated lock-out in the building trade. In 1860 he united the various small local Unions in the Amalgamated Society of Carpenters and Joiners. In the same year he took an active part in the demonstration arranged for the reception of Garibaldi on his visit to England, and to him also were mainly due the arrangements for the great demonstrations of the Reform League in Hyde Park and the Agricultural Hall. Since then he has been associated in all the movements on behalf of the working classes, such as the Education League (before the passing of Mr. Forster's Act), the agricultural labourers' agitation, and the Workmen's Peace Association (at the time of the Franco-German War). Mr. Cremer's

views on home politics coincide, for the most part, with those of the majority of Advanced Radicals. He accepts the new Franchise Act and the Seats Bill as instalments towards a complete system of residential and registered manhood suffrage, with triennial Parliaments, a third of the members retiring every year, so that the House of Commons may always keep touch with the constituencies. At the General Election of 1885 he was returned as a working-class member for the Haggerston division of Shoreditch, and was again elected as a Gladstonian Liberal in 1886.

CREMONA, Professor Luigi, F.R.S., F.R.S.E., LL.D., Professor of Higher Mathematics at the University of Rome, and Senator of the Kingdom of Italy, &c., was born at Pavia on Dec. 7, 1830. In 1848, leaving school and home, he fought for eighteen months for the independence of Italy, taking part in most engagements in Venetia. Subsequently he went to the University of Pavia and continued his studies, having Brioschi as a master. He very soon entered upon his career as a teacher, at first at the Gymnasium of Cremona, and at the Lyceum of Milan; then as Professor of Higher Geometry at the University of Bologna. In 1866 he passed to the Higher Technical Institute of Milan. In 1873 he was called to reorganize the School of Engineers in Rome, of which he has been director for many years. Luigi Cremona has devoted the whole of his scientific life to the study of higher geometry, and to the reform of mathematical instruction in the secondary and higher schools. The introduction of projective geometry and of graphic statics in public instruction in Italy is almost exclusively his work. He is a Senator of the Realm, and Vice-President of the Council of the Italian Parliament. No question on higher teaching is ever discussed in the Chamber without Cremona ably taking up the subject, for he does this with a perfect knowledge of it.

CRICHTON-BROWNE, Harold W. A. F., was born at Bensham in the County of Durham, on July 3, 1866, and is the only son of Sir James Crichton-Browne, M.D., LL.D., F.R.S. He was educated at University College School, at a Private Tutor's, and at Magdalene College, Cambridge. He became lieutenant in the 3rd Battalion King's Own Scottish Borderers, and F.R.G.S. In 1888 he joined Mr. Joseph Thomson's exploring expedition to the Atlas Mountains, and with that traveller traversed the interior of

southern and northern Morocco, crossed the mountains in three districts not before entered by Europeans; and reached the summit of Tizi Likumpt, 15,000 feet high. On the recall of Mr. Thomson to England to take charge of an Emin Pacha Relief expedition then contemplated, Mr. Crichton-Browne remained for three months in sole charge of the expedition. He is the author of "In the Heart of the Atlas," a lecture delivered at the Royal Institution of Great Britain; "Two African Cities," &c.

CRICHTON-BROWNE, Sir James, M.D., LL.D., F.R.S., F.R.S.E., Knt. B. 1886, born in 1840 at Edinburgh, is the son of Dr. W. A. F. Browne, H.M. Commissioner in Lunacy for Scotland who was eminent as a physician and introduced many ameliorations in the treatment of the insane. Sir James Crichton-Browne was educated at the Dumfries Academy, Trinity College, Glenalmond, the University of Edinburgh, and the Medical Schools of London and Paris, and is Honorary Member and was formerly Senior President of the Royal Medical Society of Edinburgh. He is Fellow of the Academy of Medicine of New York, and of many learned Societies; has been President of the Medico-Psychological Association and of the Neurological Society of London; is Vice-President and Treasurer of the Royal Institution of Great Britain; J. P. for Dumfries-shire; was formerly Medical Superintendent of the Newcastle-on-Tyne Borough Asylum; Lecturer on Psychological Medicine in the Newcastle College of Medicine; is Medical Superintendent of the West Riding Asylum; Lecturer on Mental Diseases in the Leeds School of Medicine; and is Lord Chancellor's Visitor in Lunacy. He has published a large number of monographs on the Physiology and Pathology of the Nervous System, and on Mental Diseases; a work on "Education and the Nervous System," 1884; and many lectures and addresses and contributions to medical journals. He founded and edited for six years the West Riding Asylum Medical Reports, the first British Journal of Neurology, also edited translations from the Danish of Kestel on "Overpressure in Schools," 1885. While at the head of the West Riding Asylum, where he had 1500 insane patients under his professional care, Sir James not only raised that institution into the first rank amongst kindred institutions, and made it famous for good management and successful results, but converted it into a great Medical School, in which important researches were

carried on, and in which young medical men were trained for asylum practice. He established a laboratory, in which original investigations were conducted, and in which Ferrier's first discoveries in the functions of the brain were made. He also established a museum and periodical, gave lectures, and brought the moral treatment of the inmates and discipline of the staff to a high pitch of perfection. His report and letters on overpressure in elementary schools led to a number of modifications in the curriculum of such schools, all tending to mitigate the severity of the pressure upon the children, and especially on such children as are dull or delicate. His writings also, by calling attention to the half-starved condition of large numbers of the children in elementary schools, led to the establishment of free breakfasts.

CRISPI, Francesco, an Italian statesman, born at Ribera, in Sicily, Oct. 4, 1819, studied law at Palermo, and became a member of the Bar at Naples, where he took part in the conspiracies which led to the overthrow of the Kingdom of the Two Sicilies in 1848. He was one of the chief promoters of the insurrection of Palermo, became a deputy and general secretary of war, and for two years was the heart and soul of the resistance offered by the Sicilian people. After the victory gained by the Swiss regiments, Signor Crispi fled to France. In 1859 and 1860 he organised the new Sicilian revolution; landed at Palermo with Garibaldi and his volunteers, and after fighting as a simple soldier, became a minister, in which capacity he paved the way for the annexation of the Two Sicilies to the Kingdom of Italy. In 1861 he was returned by the city of Palermo to the first Italian Parliament, in which he took a prominent and influential position, becoming in a short time the acknowledged leader of the constitutional opposition. It was the understanding between Signor Crispi and the old Piedmontese "third party," which led to the formation of the New Rattazzi ministry. He was chosen as a Deputy at the elections of Nov., 1876, by several electoral colleges, and "opted" for that of Bari. On the 22nd of that month he was elected President of the Chamber of Deputies by 232 votes against 115.

CRITCHETT, George Anderson, F.R.C.S.E., was born in London on Dec. 18, 1845, and is the eldest son of the late George Critchett, F.R.C.S. He was educated at Harrow, where he gained the prize in English Literature, and at

Caius College, Cambridge. He graduated B.A. in 1867, subsequently he studied for some time in Germany and France, and graduated M.A. in 1873. He became a member of the Royal College of Surgeons of England in 1872, and a Fellow of the Royal College of Surgeons of Edinburgh in 1880. He was appointed Ophthalmic Surgeon to the Royal Free Hospital in 1879, but resigned that office in 1881, when he was appointed Ophthalmic Surgeon to St. Mary's Hospital, and Lecturer on Ophthalmology at the Medical School. He was President of the Ophthalmic Section of the British Medical Association at the meeting held in Leeds in 1889; and delivered the opening address for discussion, the subject being "The Treatment of Immature Cataract." He delivered the Introductory Lectures at St. Mary's Hospital at the opening of the winter session in 1887, and has published numerous Papers and Lectures on Diseases of the Eye, the best known of these being "Eclecticism in Operations for Cataract," 1883; and "Nature's Speculum in Cataract Extraction," 1886.

CROFTON, The Right Hon. Sir Walter Frederic, C.B., P.C., a son of the late Captain Walter Crofton, of the 54th Foot (who when Brigade Major was killed at Waterloo), was educated at Woolwich Academy, entered the Royal Artillery in 1833, became Captain in 1845, and afterwards retired. He held from 1854 to 1862 the chairmanship of the Directors of Convict Prisons in Ireland, was Inspector of Reformatory Schools and Debtors' Prisons, and in reward for the great success of his management, he received the honour of knighthood in 1862, and Companionship of the Bath. He was a Commissioner of Prisons in England from 1866 to 1868, and Special Commissioner in Ireland in 1868 and 1869 for Prisons, Reformatories, and Industrial Schools; was sworn a member of the Irish Privy Council in 1869; and was Chairman of the Prisons Board in Ireland from 1877 to 1878. Sir Walter is a magistrate for Wiltshire, and instituted, and has for many years maintained, a Refuge for Female Convicts and an Industrial School for the Children of Criminals.

CROFTS, Ernest, A.R.A., was born at Leeds, Sept. 15, 1847, being the son of Mr. John Crofts, J.P., of Adel, near that town. He was educated at Rugby School, and after remaining there several years went to Berlin. Thence he removed to London, where he studied for some years as a pupil under the Mr. A. B. Clay. Afterwards he went to Düsseldorf, where

he became a pupil of Herr Emil Hünten, the well-known military painter to the late Emperor William of Germany. Mr. Crofts subsequently returned to London, and was elected an Associate of the Royal Academy, June 19, 1878. Among his pictures from time to time exhibited, chiefly at the Royal Academy, are the following:—"The Retreat: an Episode in the German-French War," 1874, now in the Public Gallery, Königsberg Prussia; "One Touch of Nature makes the Whole World Kin," which obtained the Crystal Palace Silver Medal, 1874; "Ligny," 1875, exhibited at the Academy, and afterwards at the International Exhibition, Philadelphia, 1876; "On the Morning of the Battle of Waterloo"—Napoleon seated outside a cottage consulting a map—1876, this was exhibited at the Paris International Exhibition, 1878; "Oliver Cromwell at Marston Moor," 1877; "Ironsides Returning from Sacking a Cavalier's House," 1877; "Wellington on his March from Quatre Bras to Waterloo," 1878; "On the evening of the Battle of Waterloo," 1879, bought by the Walker Art Gallery, Liverpool; "Marlborough after the Battle of Ramillies," 1880, exhibited at the Paris Exhibition, 1889, and obtained a medal; "George II. at the Battle of Dettingen," 1881; "A Pause in the Attack: Hougoumont, Waterloo," "At the Farm of Mont St. Jean, Waterloo," 1882; "At the Sign of the Blue Boar, Holborn," "Charles I. on his Way to the Scaffold," 1883; "Wallenstein," 1884; "William III. at London," 1885; "Farewell," 1886; "Napoleon Leaving Moscow," 1887; "Marston Moor," 1888; "The Knight's Farewell," 1889; and "Whitehall, Jan. 30th, 1649," 1890.

CROKE, The Most Rev. Thomas W., D.D., Roman Catholic Archbishop of Cashel, was born near the town of Mallow, co. Cork, May 19, 1824, and was educated partly at home, but principally at the Chorleville Endowed School, which he left at the age of fourteen. He then went to Paris and entered the Irish College, read there the usual course of philosophy and theology, and left in the year 1844. After spending a year in the College of Menin in Belgium, where he taught English, mathematics and rhetoric, he went in November, 1845, to the Irish College in Rome, where he remained nearly three years, attending lectures in the celebrated Roman University, and reading theology under the Jesuit Fathers Perrone and Passaglia. In 1846 he won the gold and silver medals, and in the following year took his degree as Doctor of Divinity, and was

ordained priest, afterwards returning to Ireland. In 1848 he taught rhetoric in Carlow College, and in 1849 theology in the Irish College at Paris. For the next nine years he was engaged in missionary work in the Diocese of Cloyne, co. Cork, and in 1858 was appointed President of St. Colman's College, Fermoy. In 1865 he was appointed parish priest of Doneraile and Chancellor of the Diocese of Cloyne. Five years later he accepted the Bishopric of Auckland, New Zealand, where he remained until 1874. In 1875 he was promoted to the Archiepiscopal See of Cashel. Of late years Dr. Croke's name has been conspicuous by its connection with the Land League and Irish Nationalist movements.

CROLL, James, LL.D., F.R.S., a Scottish physicist, was born at little Whitefield, in Perthshire, in 1821, and is the son of David Croll. His school training was limited to five years, and though at an early date he had been taught to read and write by his parents, most of his education was entirely derived from self-application. Apprenticed to a country millwright, he followed this trade up to the age of twenty-four, when he was compelled to abandon it, owing to the effects resulting from an accident sustained in his left elbow-joint when a boy. When about thirty-two he received an appointment as an insurance agent, and for several years worked at the duties it entailed. In 1859 he accepted the office of Keeper of the Andersonian University and Museum, in Glasgow, and here he remained until 1867, when he was invited to join the Geological Survey of Scotland. Since that date he has continued to pour out, both in separate works and in papers published in the scientific journals and Transactions, the results of a long series of researches, many of them relating to the ocean currents, and the physical aspects of the glacial period. In 1876 he received the honorary degree of LL.D. from St. Andrews, and in the same year was elected F.R.S. In 1881 he retired from the Geological Survey. Dr. Croll's chief works are:—"Climate and Time," 1875; "The Philosophy of Theism," 1857; "Discussions on Climate and Cosmology," 1886; and "Stellas Evolution," 1889. A vol. entitled "Determinism, not Force, the Foundation Stone of Evolution," will probably be published in 1891. From 1861 to 1883 may be found in the *Philosophical Magazine*, the *British Association Reports*, the *Reader*, the *Geological Magazine*, the *Quarterly Journal of Science*, and other

publications, no fewer than ninety separate memoirs and papers of his, on geological climatology, &c.

CROOKES, Professor William, F.R.S., was born in London in 1832. In 1848 he entered the Royal College of Chemistry as a pupil of the distinguished chemist Dr. Hofmann, and at the age of seventeen he gained the Ashburton Scholarship. After two years' study he became, first junior, then senior assistant to Dr. Hofmann, until 1854, when he was appointed to superintend the meteorological department of the Radcliffe Observatory at Oxford. In 1855 he became Professor of Chemistry at the Training College, Chester. In 1859 he founded the *Chemical News*, and is still its proprietor and editor; and in 1864 he became editor of the *Quarterly Journal of Science*. Mr. Crookes's earliest original researches were begun whilst at the Royal College of Chemistry, and his first paper, "On the Seleno-Cyanides," was published in the *Quarterly Journal of the Chemical Society* in 1851. Since that date he has been much engaged in original research on questions connected with chemistry and physics. In 1861 Mr. Crookes discovered, by means of spectrum observations and chemical reactions, the metal thallium, and he also determined its position among elementary bodies, and produced a series of analytical notes on the new metal. In 1863 Mr. Crookes was elected a Fellow of the Royal Society; in 1865 he discovered the sodium amalgamation process for separating gold and silver from their ores. In 1866 he was appointed by the Government to report upon the application of disinfectants in arresting the spread of the cattle plague, which in that year excited much alarm in England. In 1871 he was a member of the English expedition to Oran to report upon the total phase of the solar eclipse which occurred in December of that year. In June, 1872, he laid before the Royal Society laborious researches on the atomic weight of thallium—researches that extended over a period of eight years. In 1872 he began his experiments on "Repulsion resulting from Radiation." His first paper on this subject was read before the Royal Society Dec. 11, 1873, and between that time and 1880 Mr. Crookes sent to the Society other communications on collateral subjects, which are all published in the "Philosophical Transactions." One important result of these investigations is the Radiometer. In 1875 Mr. Crookes received from the Royal Society the award of a Royal Medal for chemical and physical researches. In

1876 he was elected a Vice-President of the Chemical Society, and the next year a member of the Council of the Royal Society. In 1877 he described the Otheoscope—a greatly modified Radiometer, susceptible of an almost endless variety of forms. In 1878 he gave before the Royal Society a “Bakerian Lecture,” containing another long series of experiments and observations on “Repulsion resulting from Radiation.” In 1879 the Royal Society published in its “Philosophical Transactions” records of Mr. Crookes’s experiments on “Molecular Physics in High Vacua.” In the same year appeared a further paper on “Repulsion resulting from Radiation;” and he was again appointed Bakerian Lecturer to the Royal Society, his subject the “Illumination of Lines of Molecular Pressure, and the Trajectory of Molecules.” In 1880 the French *Académie des Sciences* bestowed on Mr. Crookes an extraordinary prize of 3000 francs and a Gold Medal, in recognition of his discoveries in Molecular Physics and Radiant Matter. In 1881 Mr. Crookes acted as a Juror at the International Exhibition of Electricity in Paris. In this official position he was not entitled to a medal, but in the official report, his fellow jurors, after discussing the merits of four systems of incandescent lamps, declared—“None of them would have succeeded had it not been for these extreme vacua which Mr. Crookes has taught us to obtain.” Mr. Crookes is the author of “Select Methods in Chemical Analysis,”—2nd ed., revised and extended, 1886; of the “Manufacture of Beetroot-Sugar in England;” of a “Handbook of Dyeing and Calico-Printing;” and of a manual of “Dyeing and Tissue Printing,” 1882,—one of the “Technological Handbooks” prepared for the examinations of the City and Guilds of London Institute. He is also joint author of the English adaptation of Kerl’s “Treatise on Metallurgy.” He has edited the last three editions of Mitchell’s “Manual of Practical Assaying,” and has translated into English and edited Reimann’s “Aniline and its Derivatives,” Wagner’s “Chemical Technology,” Auerbach’s “Anthracen and its Derivatives,” 2nd ed. 1890, and Ville’s “Artificial Manures,” 2nd ed. 1882. Mr. Crookes is an authority on sanitary questions, especially the disposal of town-sewage, and his views have been laid before the public in two pamphlets, “A Solution of the Sewage Question” and “The Profitable Disposal of Sewage.” Since 1883 Mr. Crookes has been almost exclusively engaged with researches on the nature and constitution of

the Rare Earths as interpreted by the “Radiant Matter” test, a new method of spectroscopic examination the outcome of his earlier discoveries on “Radiant Matter,” which seems likely to throw a side light on the origin and constitution of the elements. On this subject he has communicated many papers to the Royal and other societies, some of the most important being the following:—“Radiant Matter Spectroscopy; the Detection and wide Distribution of Yttrium,” the Bakerian Lecture for 1883; “On Radiant Matter Spectroscopy, Part II., Samarium;” “Notes on the Spectra of Erbium, and the Earth Y_a;” “On some New Elements in Gadolinite and Samarskite, detected Spectroscopically;” “On the Crimson Line of Phosphorescent Alumina.” In 1882 Mr. Crookes was elected a member of the Athenæum Club, under rule 2. In 1886 Mr. Crookes was elected President of the Chemical Section of the British Association, and at their Birmingham meeting that year he delivered an address in which he propounded some novel speculations on the probable origin of the Chemical Elements, showing that the balance of evidence was in favour of the view that our so-called elements have been formed by a process of evolution from one primordial matter. In 1887 he delivered a Friday evening discourse before the members of the Royal Institution, on the “Genesis of the Elements.” In the same year he was elected President of the Chemical Society; he held office for the usual period of two years, and at the anniversary meetings he delivered two addresses, one on “Elements and Meta-Elements,” and the other on “The Spectroscopic History of the so-called Rare Earths.” In 1888 Mr. Crookes was awarded the Davy Medal of the Royal Society, for his Radiant Matter Researches.

CROSBY, Howard, D.D., LL.D., was born at New York, Feb. 27, 1826. He graduated at the University of New York in 1844, was made Professor of Greek in that institution in 1851, and was appointed to the same chair in Rutgers College, New Jersey, in 1859. From 1861 to 1862 he was also pastor of the First Presbyterian Church in New Brunswick, N.J. He resigned his professorship in 1863, when he became pastor of his present church (the Fourth Avenue Presbyterian) in New York. From 1870 to 1881, still retaining his pastorate, he was Chancellor of the University of New York. He has been prominent in philanthropic and reformatory measures, especially in the tem-

perance cause. He was Moderator of the General Assembly of the Presbyterian Church in 1873; served on the American Committee of revision of the New Testament; and is now (1890) President of the (N.Y.) Society for the Prevention of Crime. He has published "Lands of the Moslem," 1850; an edition, with notes, of the "Ædipus Tyrannus," 1851; "Notes on the New Testament," 1861; "Social Hints for Young Christians," 1868; "Bible Manual," 1869; "Life of Jesus," 1870; "The Healthy Christian," 1871; "Thoughts on the Decalogue," 1873; "Expository Notes on Joshua," 1875; "Commentary on Nehemiah," 1877; "The Christian Preacher," 1880; "True Humanity of Christ," 1881; "Commentary on the New Testament," 1884; "Bible View of the Jewish Church," 1888; "The Seven Churches of Asia," 1890; besides occasional sermons, addresses and constant contributions to periodical literature.

CROSS (Viscount), The Right Hon. Richard Assheton Cross, G.C.B., D.C.L., LL.D., P.C., was born at Red Scar, near Preston, May 30, 1823, being the third son of the late William Cross, Esq., by Ellen, daughter of the late Edward Chaffers, Esq. He was educated at Rugby School under Dr. Arnold, and at Trinity College, Cambridge, where he took the degree of B.A. in 1846. In 1849 he was called to the Bar at the Inner Temple, and for several years he went the Northern Circuit. He was elected M.P. for Preston in the Conservative interest in March, 1857, and continued to represent that borough till March, 1862. At the general election of Dec., 1868, he was elected Conservative member for South-West Lancashire. At the general election of 1874, Mr. Cross was returned without opposition. On the formation of Mr. Disraeli's administration, Mr. Cross was appointed Home Secretary, Feb. 21, 1874, on which day he was sworn of the Privy Council. He was elected a Bencher of the Inner Temple in 1876, received the hon. degree of D.C.L. from the University of Oxford in 1877, and that of LL.D. from the University of Cambridge, Oct. 24, 1878, and LL.D. St. Andrews. He resigned the seals of the Home Department when the Conservatives went out of office in April, 1880. At that period he was created a G.C.B., and was again returned for South-West Lancashire. He was appointed Home Secretary in Lord Salisbury's short administration of 1885, and at the general election of the same year was returned for the Newton Divi-

sion of South-West Lancashire. After the general election of 1886, at which he was again returned for Newton, he was made a Viscount, and became Secretary of State for India in Lord Salisbury's administration. Lord Cross was a member of the Council on Education, and an Ecclesiastical Commissioner for England; and is a magistrate for Cheshire and Lancashire, a Deputy-Lieutenant for the latter county, and was formerly Chairman of the Lancashire Quarter Sessions. He is the compiler of two legal works:—"The Acts relating to the Settlement and Removal of the Poor, with notices of cases, indices and forms," 1853; and "The General and Quarter Sessions of the Peace: their jurisdiction and practice in other than criminal matters" (written in conjunction with Mr. H. Leeming), 1858, 2nd edition, 1867. In 1852 he married Georgiana, daughter of the late Thomas Lyon, Esq., of Appleton Hall, Wallington.

CROWE, Eyre, A.R.A., an historical and a genre painter, born in London, in Oct., 1824, studied painting in the atelier of Paul Delaroche at Paris. He went with that distinguished artist and his other pupils to Rome in 1844. Acting as amanuensis to Mr. W. M. Thackeray, he visited the United States in 1852-3. He is an occasional Inspector of the Science and Art Department. Mr. Eyre Crowe was elected an Associate of the Royal Academy in April, 1876. Amongst his paintings may be mentioned "Goldsmith's Mourners," 1863; "Friends," 1871; "Blue Coat Subjects," 1872; "French Savants in Egypt," 1875; "The Rehearsal," 1876; "Sanctuary," "Prayer," and "Bridal Procession at St. Maclou, Rouen," 1877; "School Treat," 1878; "Blue Coat Boys returning from their Holiday," "Marat: 13 July, 1793," "The Blind Beggar," and "The Queen of the May," in 1879; "Queen Eleanor's Tomb" and "Forfeits," in 1880; "Sandwiches," and "Sir Roger de Coverley and the Spectator at Westminster Abbey," 1881; "How happy could I be with either!" and "The Defence of London in 1643," exhibited in 1882; "Old Porch, Evesham," in 1884; "School at the Aître, St. Maclou, Rouen;" and "A Rifle Match at Dunnottar, N.B.," 1890.

CROWE, Mrs. George, *née* Kate Josephine Bateman, was born in Baltimore, Maryland, in Oct., 1842. Both her parents were actors, and she, and her sister, two years younger than herself, appeared in public as the "Bateman

Children" as early as 1851, at the St. James's Theatre. She afterwards prepared herself assiduously for the stage, and in 1859 played successfully in the leading American theatres, her principal characters being those of Evangeline, founded on Longfellow's poem; Geraldine, in a play written for her by her mother; Julia, in the "Hunchback;" Pauline, in the "Lady of Lyons;" and Juliet and Lady Macbeth. She arrived in England in the autumn of 1863, and appeared 210 times in the character of the Jewish maiden Leah, in an adaptation of the German play "Deborah," at the Adelphi Theatre. After a provincial tour, she re-appeared at the Adelphi, playing Julia in the "Hunchback," and other characters. She took a farewell of the English public at Her Majesty's Theatre, in the character of Juliet, in "Romeo and Juliet" Dec. 22, 1865, and was married to Mr. George Crowe, in Oct., 1866. Mrs. Crowe returned to the stage in 1868, retaining her stage name of Kate Bateman. In 1868 she played the part of Mary Warner, in the play of that name written for her by the late Tom Taylor, at the Haymarket Theatre. In 1872, and subsequently, she appeared with great success in London as Medea, in the play of that name. In 1875, on a revival of "Macbeth" at the Lyceum (Mr. Irving as Macbeth), she played the part of Lady Macbeth. She also sustained the title rôle in Mr. Tennyson's "Queen Mary," which was produced at the same house in April, 1876.

CROWE, Joseph Archer, C.B., K.C.M.G., brother of Mr. Eyre Crowe, A.R.A., was born in London on Oct. 25, 1825. He was foreign editor of the *Daily News*, a contributor to the *Globe*, and correspondent for the *Illustrated London News* in the Crimean war, and for the *Times* during the Indian Mutiny, and during the Franco-Austrian war, and was at Solferino. He was appointed British Consul-General for Saxony, at Leipzig, in 1860, and Consul-General at Düsseldorf in 1878. From Düsseldorf he went to Berlin as Commercial Attaché to the Embassies in Berlin and Vienna; and whilst at that post was made a Royal Commissioner for the negotiation of a Treaty of Commerce with Russia, May 25, 1881. On the 1st of July, 1882, he was made Commercial Attaché for Europe to reside in Paris; was Secretary and Protocolist to the Danube Conference in London from Feb. 8 to March, 1883; was appointed an Assistant to Sir E. Malet at the West African (Congo) Conference of Berlin, Oct. 24, 1884; and was made a C.B. in

1885. He was appointed British Plenipotentiary to the Samoan Conference in Berlin, April 20, 1889; and was made a K.C.M.G. May 25, 1890; and delegate to the Electric Telegraph Congress of Paris in June, 1890. He is the author, conjointly with Mr. G. Cavalcaselle, of several art works, viz., "Early Flemish Painters," 1857 and 1872; "History of Painting in Italy," 1864; "History of Painting in North Italy," 1871; "Life of Titian," 1877; and "Life of Raphael." He has also revised and edited "Burckardt's Cicerone," and "Waagen's Handbook of Italian Painting."

CROWFIELD, Christopher. See STOWE, Mr. H. E.

CROWTHER, The Right Rev. Samuel Adjai, D.D., Bishop of Niger Territory, is a native of Africa. His history, extending over seventy years or more, from a state of abject servitude to the episcopate, is a very romantic one. His original name was Adjai, and his family lived at Ochugu, in the Yoruba country, 100 miles inland from the Bight of Benin. In 1821 he was carried off by the Eyo Mahometans, was exchanged for a horse, was again exchanged at Dahdah and cruelly treated, was then again sold as a slave for some tobacco, was captured by an English ship of war, and landed at Sierra Leone 1822. He was baptised in 1825, taking the names of the Evangelical vicar of Christ Church, Newgate Street, Samuel Crowther. In 1829 he married Asano, a native girl, who had been taught in the same school with him. He was then for some years schoolmaster of Regent's Town, and subsequently accompanied the first Niger expedition. Arrived in England, he was sent to the Church Missionary College, Islington, and was ordained by the Bishop of London. In 1854 he accompanied the second Niger expedition, of which he wrote a very able account. He was afterwards an active clergyman at Akessa, translated the Bible into Yoruba, and undertook various other literary works of a religious character for the benefit of his African brethren. He was consecrated first Bishop of Niger Territory, West Africa, June 29, 1864. In May, 1880, the council of the Royal Geographical Society awarded a gold watch to Bishop Crowther "in recognition of the services he has rendered to geography."

CUBITT, The Right Hon. George, P.C., is the eldest son of the late Mr. Thomas Cubitt. He was born in the year 1828, and graduated M.A. at Trinity College,

Cambridge, in 1854. He was elected M.P. for West Surrey in 1860, and continued to represent it until 1885, when he was elected for the Mid or Epsom division. He filled the unpaid post of Second Church Estates Commissioner from 1874 to 1879, and has served on other Royal Commissions. In 1880 he was sworn a member of the Privy Council. Mr. Cubitt, who has taken special interest in church and educational questions, is a member of the "House of Laymen," a Vice-President of the Church Schools Company, and was one of the founders of the large middle-class school at Cranleigh, Surrey. He is one of the Peabody trustees and a Governor of Guy's Hospital, &c. He passed the Act 41 & 42 Vict., c. 42, enabling all clerical improPRIATORS to redeem tithe-rentcharge, and a speech delivered by him in 1872 on "Nonconformist Endowments," is among the publications of the Church Defence Institution.

CUDLIP, Mrs. Annie Hall, was born at Aldborough, in Suffolk, where her father, Lieutenant George Thomas, was in charge of the coast-guard station. Her first novel, "The Cross of Honour," appeared in 1863, and has been followed by "Sir Victor's Choice," and "Denis Donne," 1864; "Theo Leigh," and "Barry O'Byrne," 1865; "Played Out," and "High Stakes," 1866; "Called to Account," 1867; "A Noble Aim," 1868: "Only Herself," "Mrs. Cardigan," "On Guard," "The Dower House," and "False Colours," 1869; "The Dream and the Waking," 1870; "A Passion in Tatters," 1872; "He cometh not, she said," 1873; "No Alternative," 1874; "A Narrow Escape," 1875; "Blotted Out," 1876; "A Laggard in Love," 1877; "A London Season," and "Stray Sheep," 1879; "Fashion's Gay Mart," and "Society's Verdict," 1880; "Eyre of Blendon," 1881; "Allerton Towers," and various other novels. Miss Annie Thomas was married in 1867 to the Rev. Pender Hodge Cudlip.

CULLUM, George Washington, was born in New York, Feb. 25, 1809, graduated from the Military Academy at West Point in 1833, and was engaged for the next twenty-eight years in engineering labours and in instructing at West Point on practical military engineering. During the civil war he was Chief of Staff to the General-in-Chief from Nov., 1861, to Sept., 1864, and Superintendent of the Military Academy, West Point, from Sept., 1864, to Aug., 1866. From that time he was a

member of the Board of Engineers for Fortifications, until he was placed on the retired list in 1874. At the time of his retirement he was Colonel of Engineers and brevet Major-General in the regular army. Besides numerous military memoirs and reports and miscellaneous papers, he has published "Military Bridges with India-rubber Pontons," 1849; "Register of Officers and Graduates of the U.S. Military Academy from 1802 to 1850," 1850; a translation of Duparcq's "Elements of Military Art and History with Notes, &c.," 1863; "Systems of Military Bridges," 1863; a "Biographical Register of the Officers and Graduates of the U.S. Military Academy," 1868 (revised edition, 1879); "Campaigns of the War of 1812 criticised," 1880; and contributed a number of articles to Johnson's "Universal Cyclopædia," 1874-77. Since 1874 he has been Vice-President of the American Geographical Society.

CUMMINGS, William Hayman, F.S.A., Hon. R.A.M., was born at Sidbury, Devon, in 1835. He is Professor of Music at the Royal Academy of Music, at the Royal Normal College, and at the Guildhall School of Music; Hon. Treasurer of the Royal Society of Musicians; Director of the Philharmonic Society; Vice-President of the Musical Association; Member of the Council of the National Society of Professional Musicians; and Vice-President of the Cremona Society. When Mr. Cummings was five his father moved to London, and the boy entered the choir of St. Paul's Cathedral at 6½ years of age. Goss was organist, and the sight-singing test, which he successfully read off, was from an anthem by Jeremiah Clarke. Afterwards the boy was moved to the Temple Church, where he remained till his voice broke, studying the organ meanwhile under Mr. Hopkins, so that he was able when still in his teens to take an appointment as organist at Waltham Abbey. From there he returned to London, and the gradual development of a fine tenor voice fixed his musical path. He studied under Hobbs, a tenor singer and composer well-known in his day, and according to the custom of the times was articulated to him for three years, during which he had to deputise for him, both in teaching and singing. Soon he was appointed as tenor singer in the choirs of the Temple, Westminster Abbey, and the Chapels Royal. It was, however, impossible that he should rest satisfied with laurels of this kind. The routine was too quiet, and the public soon found out the purity and ease of his voice, the refinement of his phrasing, and the

delicacy of his pronunciation. Mr. Cummings stepped into the front rank of our native singers, and for a long period was in constant demand at oratorios and concerts. As a boy Mr. Cummings sang in the first performance in London of "Elijah." The alto part was too high for the men, and women altos at that time were few. So some of the Temple boys, who were good readers, were put on to the alto part. When the performance was over Mendelssohn in passing the boy patted him on the head and said, "What is your name?" took the programme from the little hand and wrote his own name upon it in pencil as a memento. This power of singing at sight often stood Mr. Cummings in good stead. Once at the Birmingham Festival Mario was unexpectedly absent, and, at half-an-hour's notice, Mr. Cummings sang the tenor part in Sullivan's cantata "Kenilworth," which Mario should have taken. Twice he fulfilled engagements in America, where he was enthusiastically received. Sir Sterndale Bennett composed for him the air "His salvation is nigh them that fear Him," in "The Woman of Samaria," and Mr. Cummings possesses the autograph, which shows how readily the composer consented to some "cuts" which the singer suggested. Mr. Cummings has also done a good deal of useful work as a lecturer on musical subjects, and is rich in a knowledge of antiquarian music. He has composed a good deal of music, a large number of songs, a cantata ("The Fairy Ring"), and some glees. His first glee prize was won as long ago as 1847. Mr. Cummings' primer "The Rudiments of Music," in Novello's series, is well-known. The 81st thousand has recently been issued; also a Spanish edition, for Spain and South America.

CUNLIFFE-OWEN, Sir Philip, K.C.B., K.C.M.G., C.I.E., &c., was born June 8, 1828, and is the third son of the late Captain Charles Cunliffe-Owen, of the Royal Navy, who married, in 1819, the daughter of Sir Henry Blosset, late Chief Justice of Bengal. Sir Philip Cunliffe-Owen entered the Royal Navy at the age of twelve. He served in the Mediterranean and West Indies; but retired, after five years' service, on account of ill-health. In the year 1854 he was appointed to the Science and Art Department at Marlborough House. In 1855 he was appointed one of the Superintendents of the Paris Exhibition, held during that year. In 1857 he was appointed Deputy General Superintendent of the South Kensington Museum, under the immediate orders of

Sir Henry Cole, and in 1860 Assistant Director. During the Exhibition held in London in 1862 Sir Philip Cunliffe-Owen undertook the duties of Director of the Foreign Sections, a post which his knowledge of foreign languages rendered him especially suited for; and from that period he devoted himself to the many changes and alterations at South Kensington. At the Paris Exhibition of 1867, Sir Philip was appointed Assistant Executive Commissioner. At the Vienna Exhibition, in 1873, he was appointed Secretary of the Royal British Commission, under the immediate commands of H.R.H. the Prince of Wales, President of the Commission. That Exhibition, for size and grandeur, was to surpass any of its predecessors, necessarily the duties of the British Commission were increased; but such was the efficient manner in which Sir Philip Cunliffe-Owen discharged them, that he was in consequence recommended by His Royal Highness the Prince of Wales for the honour of Companion of the Bath. At the retirement of Sir Henry Cole, Sir Philip Cunliffe-Owen was appointed Director of the South Kensington and Bethnal Green Museums, which position he now holds. In 1875 he went to the United States as Executive Commissioner to the Centennial Exhibition held at Philadelphia, and organised the British Section there, resigning the post before the close of the year. Such was the appreciation by the American nation of his valuable services, that Sir Philip was awarded one of the four Silver Medals presented by the Centennial Commission. In 1877 he was appointed, by His Royal Highness the Prince of Wales, Secretary to the Royal British Commission for the Paris Exhibition of 1878, at the close of which, upon the recommendation of the Prince of Wales, he was created a Knight Commander of the Order of St. Michael and St. George, and for special services rendered to India, a Companion of the Order of the Indian Empire. Sir Philip Cunliffe-Owen acted as Secretary to the Royal Commission for the Colonial and Indian Exhibition in 1886, for which services he was made a K.C.B. For various services Sir Philip Cunliffe-Owen has received in addition the following Orders:—Grand Cross of the Order of Vasa, Sweden; Grand Officer of the Legion of Honour, France; Commander of the Iron Crown of Austria; Commander of the Order of Francis Joseph of Austria; Commander of the St. Michael Order of Merit, Bavaria; Commander of the Royal Order of Charles III., Spain; Commander of the Order of

St. Maurice and St. Lazare, Italy; Commander of the Order of Christ, Portugal; Knight of the Order of Leopold, Belgium; Knight of the Order of St. Olaf, Norway; Knight of the Order of Frederick, Wurtemberg; Osmanieh of Turkey, Second Class; and has received the Emperor of Germany's Gold Medal for Science and Art. In the year 1854 he married the daughter of the late Baron Fritz von Reitzenstein, commanding the Royal Prussian Horse Guards, by whom he has a numerous family.

CUNNINGHAM, Major-General Alexander, C.S.I., of the Bengal Engineers, second son of Allan Cunningham, and brother to the late Captain J. D. Cunningham, author of the "History of the Sikhs," was born in John Street, Westminster, Jan. 23, 1814, and educated at Christ's Hospital, and at the Military College, Addiscombe. He was appointed 2nd Lieutenant of Engineers in 1831; Aide-de-camp to the Governor-General of India in 1834; sent specially to Cashmere in 1839; Engineer to the King of Oudh in 1840; head of a mission to Thibet, &c., in 1846; chief Engineer of the North Western Provinces in 1855; Archaeological Surveyor-General of India in 1870; and Companion of the Star of India in 1871. General Cunningham is the author of many articles on antiquarian subjects in the Journal of the Bengal Asiatic Society, and other periodicals; "The Bhilsa Topes, or Buddhist Monuments of Central India," 1854; "An Essay on the Arian Order of Architecture," 1846; "Ladak, Physical, Statistical, and Historical," 1854; and voluminous official reports on the Antiquities of Northern Hindostan, which have been reprinted by order of the Government of India.

CUNNINGHAM, The Rev. John, D.D., LL.D., was born at Paisley in 1819. He was educated first at a private school, and afterwards at the grammar school there. In 1836 he went to the University of Glasgow, and studied there during four sessions, carrying high honours in most of his classes. Attracted by the great reputation of Sir William Hamilton as a teacher of metaphysics, and of Professor Wilson (Christopher North) as a teacher of moral philosophy, he repaired to Edinburgh in 1840, and gained the first honours in both classes, together with Professor Wilson's prize for the best English Poem. In the session 1841-2, he continued his studies at Edinburgh under Dr. Chalmers and Dr. Walsh, having now entered the Divinity Hall. As the current was then flowing very

strongly towards secession from the Established Church, more especially in Edinburgh, and as Mr. Cunningham had no sympathy with the movement, he returned to Glasgow and completed his studies there. At that time he held a Classical Mastership in the Glasgow Collegiate School. In March, 1845, he was licensed as a Preacher of the Gospel, and in August of the same year he was ordained Minister of the parish of Crieff, where he has remained and ministered ever since. In 1859, he published his first important work, "The Church History of Scotland," which is now the recognised standard book on the subject. In 1868, "The Quakers" appeared, and in 1874 "A new Theory of Knowing and Known." In 1885-6 he was the Croale Lecturer, and his Lectures are now published under the title of "The Growth of the Church in its Organisation and Institutions." Besides these works Dr. Cunningham wrote articles for the *Edinburgh Review*, on Napier's Life of Claverhouse, Mill's Examination of Hamilton's Philosophy, Guizot's Life of Calvin, and Kampschulte's Johann Calvin; for the *Westminster Review*, on Hamilton's Doctrines of Perception and Judgment; for the *North British Review*, on Chambers's Domestic Annals of Scotland; and many other articles for *Macmillan's Magazine*, and other magazines and reviews. He is the author of two of the sermons in the well-known volume of "Scotch Sermons," which made a great noise on account of their broad theology; and of three lectures in the St. Giles's series. In 1860 the University of Edinburgh conferred upon him the degree of Doctor of Divinity, and in 1886 the University of Glasgow conferred on him the degree of Doctor of Laws. In the same year he was chosen Moderator of the General Assembly, the highest honour the Church of Scotland has to bestow. In June, 1886, he was appointed by the Crown to be Principal and Primarius Professor of Divinity in St. Mary's College, St. Andrews, in succession to the late Principal Tulloch.

CURCI, Carlo Maria, an Italian ecclesiastic, born about 1800, entered the Society of Jesus, of which he soon became a distinguished ornament. Both as a pulpit orator and as a writer on theological subjects he acquired a high reputation throughout Italy. His name drew crowds to hear him when he preached, and he delivered discourses in nearly every city of the peninsula. Three times he was the Lent preacher before the Chapter of San Pietro in Vaticano, where His Holiness, Pope Pius IX., was wont occasionally to

be present, privately, at his sermon. Father Curci also founded, and mainly set forward, the *Civiltà Cattolica*. So highly did the late Pope esteem this periodical, that he provided for its permanent continuance, in Rome and elsewhere, under the management of the Jesuits. Father Curci was a contributor to the *Civiltà Cattolica* during a period of sixteen years. In 1871 he was in high repute as the famous preacher in the great church of the Gesù, in Rome, where crowds flocked to listen to his fervent discourses. After that he retired to Florence, and set himself, entirely of his own accord, to preach and publish his lectures on "The Four Gospels." At the same time he likewise published a small volume of "The Four Gospels," with a few short notes. Father Curci gave utterance to opinions which were quite contrary to those generally entertained by his colleagues of the Society of Jesus respecting the temporal power of the Sovereign Pontiff, and the result was that, in 1877, he was expelled from the Order. His peculiar views are given in a work published at Florence in Dec., 1877, under the title of "Il moderno Dissidio tra la Chiesa e lo Stato, considerato per occasione di un fatto particolare." ("The Modern Dissension between Church and State, examined on the occurrence of a personal matter.") In March, 1878, Father Curci wrote a letter from Florence to His Holiness, Pope Leo XIII., describing the unhappy position in which he was placed by his recent conduct, and expressing a desire to offer a retraction of his errors. This was followed by a second letter, making the largest offers of submission, declaring himself ready to make public reparation if necessary, and expressing a desire, as private affairs called him to Rome, to make his atonement in person. He went to Rome, and had interviews with Cardinal Franchi, and Father Pecci, the Pope's brother. The result of the interview with Father Pecci was a letter of retraction which appeared in all the journals; but so many persons regarded this retraction as incomplete, and liable to misinterpretations, that the Holy Father was dissatisfied with it, and refused a private audience to Father Curci until he had written a fresh recantation, in which he declared his sincere intention to submit his opinions and his writings to the judgment of the Pope. Father Curci has for some years been engaged on a translation of the Old Testament, with notes. It has proceeded as far as the Psalms, which were published at Rome in 1883, with an introductory letter by Mgr. Scapaticci, reviser to the Vatican, and

with the formal approval of the ecclesiastical authorities.

CURRIE, Sir Donald, K.C.M.G., M.P., is the son of the late Mr. James Currie, and was born in 1825. He is at the head of the firm of Donald Currie & Co., owners of the Castle Line of steamships between London and South Africa. Sir Donald takes an active interest in all questions connected with South Africa, and he has rendered great services to the country and to the Government. For his services in the settlement of the Diamond Fields dispute and the Orange Free State Boundary he was made a C.M.G. in 1877, and in 1881 a K.C.M.G. for further assistance during the Zulu War and especially in connection with the relief of Ekowe. He entered Parliament in 1880 as Liberal Member for Perthshire, and in 1885 and again in 1886 was returned for the new division of West Perthshire. At the last General Election he stood as a Unionist Liberal. Sir Donald Currie, it will be remembered, has on three occasions taken the Rt. Hon. W. E. Gladstone long trips in his ocean steamers when he was in need of a voyage to restore him to health.

CURRIE, Sir Edmund Hay, was born in 1834, and educated at Harrow. He is the grandson of the late Sir James Hay, K.C.B., and has for many years been associated with various philanthropic movements for promoting the education and improving the social condition of the poor in the east end of London. He took an active part in promoting the success of the People's Palace, and is chairman of the trustees of that institution. Sir Edmund was formerly a member of the School Board for London and the Metropolitan Asylums Board. He was knighted in 1876.

CURRIE, Sir Philip Henry Wodehouse, K.C.B., son of the late Raikes Currie, Esq., was born in 1834. He entered the Foreign Office in 1854, and became senior clerk in 1874. In 1876 he accompanied the Marquis of Salisbury as secretary on his Special Embassy to Constantinople, and in 1878 was appointed (jointly with Mr. M. Corry, now Lord Rowton) secretary to the Special Embassy during the Congress at Berlin, and was made a C.B. He was in charge of the correspondence respecting the affairs of Cyprus from August, 1878, to April, 1880, and in 1882 was appointed Assistant Under Secretary for Foreign Affairs. He was Joint Protocolist to the Conference in London on Egyptian Finance, from June 28 to August 2, 1884, was made a K.C.B.,

December 1, 1885. He was appointed Permanent Under Secretary of State for Foreign Affairs, April 2, 1889.

CURTIS, George Ticknor, was born at Watertown, Massachusetts, Nov. 28, 1812. He graduated at Harvard College in 1832, was admitted to the Bar in 1836, practised law in Boston till 1862, when he removed to New York. During his residence in Boston he served for several terms in the Massachusetts Legislature. He also held the office of United States Commissioner, and in this capacity, in 1851, returned to his master a fugitive slave, named Thomas Sims, for which he was sharply censured by the abolitionists. He twice delivered the annual Fourth of July oration before the municipal authorities of the city of Boston, the last time in 1862. He has made valuable contributions to legal, historical and biographical literature; among which are:—"Rights and Duties of American Seamen," 1844; "The Law of Copyright," 1847; "The Law of Patents," 1849 (4th edition, 1873); "Commentaries on the Jurisprudence, Practice, and Peculiar Jurisdiction of the Courts of the United States," 2 vols., 1854-58; "Equity Precedents," 1859; a "Life of Daniel Webster," 2 vols., 1855-58; "History of the Origin, Formation, and Adoption of the Constitution of the United States," 2 vols., 1855-58; "Last Years of Daniel Webster," 1878; a Memoir of his brother, Judge B. R. Curtis, 1879; "Life of James Buchanan," 2 vols., 1883; "Implied Powers of the Constitution," 1885; and "McClellan's Last Service to the Republic," 1886. He is the author of a novel entitled "John Charáxes: a tale of the Civil War in America," 1889. His enlarged work, "Constitutional History" of the United States from their Declaration of Independence to the Close of their Civil War," 2 vols., 8vo., is now in the press (1890). Although so large a part of his life has been devoted to literary pursuits, he has been constantly engaged in the practice of his profession.

CURTIS, George William, LL.D., was born at Providence, Rhode Island, Feb. 24, 1824. After leaving school, he was for a year a clerk in a mercantile house in New York, and in 1842 went, together with an elder brother, to the Brook Farm Socialistic Institution in Roxbury, Massachusetts, where they remained about eighteen months, when they removed to a farm in Concord, and remained there another eighteen months. In 1846 he went to Europe, residing mainly in

Berlin, Rome and Paris, subsequently visiting Egypt and Syria. Returning to America in 1850, he published "Nile Notes of a Howadji," being sketches of his observations in Egypt. This was followed in 1852 by "The Howadji in Syria." In the meantime he had connected himself with the *New York Tribune* newspaper, and had become one of the editors of *Putnam's Monthly*. The failure of this magazine (in the ownership of which he was a special partner), in 1857, involved Mr. Curtis in financial difficulties from which he was fifteen years in clearing himself. He lectured on social and æsthetic topics throughout the country, and became a regular contributor to *Harper's Magazine*, to which, besides many occasional articles, he has, since 1858, furnished a monthly paper under the general title of the "Editor's Easy Chair." In 1857 *Harper's Weekly*, an illustrated journal, was established, and Mr. Curtis soon became its principal editor. When the Civil War broke out this journal took a decided political tone, and became an influential organ of the Republican party. He was in 1867 elected a delegate to the Convention for revising the Constitution of the State of New York; and in the same year was appointed one of the Regents of the University of that State—a body which has the general supervision of the higher grades of institutions for public instruction. In the canvass of 1868 he was made a presidential elector on the Republican ticket, and warmly supported the election of President Grant, who in 1871 appointed him a member of the Commission to frame rules for the regulation of the civil service. He, however, opposed the candidature of President Grant for a third term, both in 1876 and in 1880, and has been a prominent leader of that wing of the Republican party which secured the nomination of Mr. Hayes and of Mr. Garfield. President Hayes offered him the missions to England and Germany, which he declined. During the recent agitation for a reform in the civil service, Mr. Curtis vigorously supported the movement, and has been President of the National Reform League since its organization. In 1884 he opposed the nomination of Mr. Blaine as the Republican candidate for the Presidency, and was a supporter of the Democratic nominee, Mr. Cleveland. In 1890 he was elected Chancellor of the University. Besides the Howadji volumes of travel, he has published the following works, all made up of previous contributions to various periodicals:

"Lotus Eating," a series of newspaper letters from watering-places, 1852; "The Potiphar Papers," 1853; "Prue and I," 1856; and "Trumps," 1862; besides a number of addresses and orations.

CURTIUS, Ernst, LL.D., a German Hellenist, was born at Lübeck, Sept. 2, 1814, and after a preliminary training in the college of his native town, pursued his studies at the universities of Bonn, Göttingen, and Berlin, and in 1837 visited Athens in company with Professor Brandis in order to begin at headquarters his researches into Greek antiquities. Subsequently he accompanied Ottfried Müller in his archæological expedition to the Peloponnesus; and on the decease of that eminent scholar in 1840, he returned to his native country; was created Doctor by the University of Halle; taught for some time in the colleges of Berlin; became Professor Extraordinary there; and was appointed tutor to Prince Frederick William, the father of the present Emperor of Germany; and Secretary of the Royal Academy of Sciences. In 1856 he succeeded Hermann as Professor at Göttingen. He went to Athens to undertake excavations at Olympia in April, 1864. Since 1870 he has been director of the Antiquarian Department in the Royal Museum. Professor Curtius's works all relate to Greek antiquities; the best known is his "History of Greece," which has been ably translated into English by A. W. Ward, M.A., 5 vols., 1868-74. Amongst his other works are "Peloponnesos," "Naxos," "Olympia," and "Greek Sculpture by Springs and Streams;" "Attic Studies," 1862, 1865; "Ancient and Present Times," 3 vols.; "Materials for the History and Topography of Asia Minor," 1872; "Atlas of Athens," 1878; and "Maps of Attica."

CUST, The Very Rev. Arthur Percival Purey, D.D., Dean of York, is the only surviving son of the late Hon. William Cust, by Sophia, daughter of the late Mr. Thomas Newnham, of Southborough, Kent, and grandson of the first Lord Brownlow. He was born in Feb., 1828, and was educated at Brasenose College, Oxford, where he took his bachelor's degree in Easter Term, 1850, and was afterwards Fellow of All Souls, where he graduated M.A. in 1854. He was ordained deacon by the Bishop of Oxford (Dr. Wilberforce) in 1851, and was admitted into priest's orders by the Bishop of Rochester (Dr. Murray) in the following year. He was successively curate of Northchurch, Hertfordshire, and rector

of Cheddington, Buckinghamshire, from 1853 to 1862, when he was appointed vicar of St. Mary's, Reading. He was subsequently appointed Rural Dean of Reading, and succeeded the Ven. Edward Bickersteth in the Vicarage of Aylesbury, in 1875, but resigned that living in the following year, on being made Archdeacon of Buckingham. He was also appointed an Honorary Canon of Christ Church, Oxford, in 1874. In Feb., 1880, he was nominated by the Crown, on the recommendation of Lord Beaconsfield, to the Deanery of York, vacant by the death of the Hon. Augustus Duncombe. He married in 1854 Lady Emma Bess Bligh, younger daughter of the late, and sister of the present, Earl of Darnley.

CUST, Robert Needham, LL.D. Edinburgh, son of the Hon. and Rev. Henry Cockayne Cust, and Lady Anna Maria Needham, daughter of the Earl Kilmorey, was born in 1821 at Cockayne Hatley, Bedfordshire, and educated at Eton. He entered Her Majesty's Indian Civil Service and took honours in four oriental languages in the College of Fort William, Calcutta. He held the highest judicial and revenue posts in Northern India, and served many years with Lord Lawrence in the Panjáub, being present at the battles of Múdkí and Sohraon, and at the taking of Lahore, 1845-46. He took part in the Panjáub War, 1848-49, and in the pacification of the country after the Mutinies in 1858. He was a Member of the Legislative Council of the Viceroy, 1864-65, and is Barister-at-Law, J.P. for the counties of London and Middlesex, Honorary Secretary of the Royal Asiatic Society, and Member of the Council of the Royal Geographical Society. He has published "Modern Languages of East Indies," 1878; "Modern Languages of Africa," 1882; "Modern Languages of Oceania;" "Linguistic and Oriental Essays" (Series I. and II.); "Sketches of Anglo-Indian Life;" "The Shrines of Lourdes, Zaragossa, and Loretto;" "Notes on Missionary Subjects;" "Poems of many Years and Places;" and is a constant contributor to oriental, literary, and religious publications, and an earnest supporter of all Protestant Missionary Societies. Mr. Cust is a Member of Committees of the British and Foreign Bible Society, the Society for Promoting Christian Knowledge, and the Church Missionary Society, a Member of the German and French Oriental Societies, and Honorary Member of the Geographical Society of Holland and the American Board of Foreign Missions, Boston, United States.

D.

DAGONET. See SIMS, G. R.

DAHN, Professor Geheimrath Felix, German historian, a writer on German law, a novelist, and poet, son of the celebrated actors Friedrich and Constance Dahn of Munich, was born at Hamburg, Feb. 9, 1834, and educated at the Gymnasium and University of Munich. In 1862 he was appointed Professor of Jurisprudence at Würzburg, and in 1872 proceeded to Königsberg where he still resides. He distinguished himself as a volunteer in the war of 1870-71. Amongst his historical works the chief are "The Germanic Kings" (*Die Könige der Germanen*), 6 vols., 1861-72; "Procopius of Cesarea," 1865; "West Gothic Studies," 1874; "Lombard Studies," 1876; "Reason in Law," 1879; "The Early History of the Germanic and Romance Peoples," I.—IV., 1881-90; "German History," I., 1883, II., 1889. As a poet, Professor Dahn has written a number of ballads which take high rank; "Twelve Ballads," 1875; "Ballads and Songs," 1878, and others. As a novelist he ranks still higher. "Der Kampf um Rom," which appeared in 1876 made a great impression throughout Germany; it was followed in 1878 by "Kämpfende Herzen," and "Odhins Trost," which reached a 6th ed. in 1883. He has written also "Kleine Romane aus der Völkerwanderung," I.—VII., 6 editions; "Bis zum Tode getreu," 6th ed. 1887; "Weltuntergang," 6th ed. 1889, and several novels on subjects from Northern and Scandinavian history. In 1888 he accepted a vocation to the University of Breslau.

DALE, Robert William, M.A., D.D., LL.D., an independent minister, born in London, Dec. 1, 1829, was educated at Spring Hill College, Birmingham, and graduated M.A. at the University of London in 1853. He began his ministry at Carr's Lane (Congregational) Church, Birmingham, in June, 1853, as co-pastor with the late John Angell James, on whose death he succeeded to the full charge of the church. Dr. Dale was Chairman of the Congregational Union of England and Wales, 1868-9. For seven years he edited the *Congregationalist*, and he is the author of "Discourses on Special Occasions;" "Week-day Sermons;" a "Life of the Rev. J. A. James;" "Discourses on the Epistles to the Hebrews;" "The Ten Command-

ments;" "The Ultimate Principle of Protestantism;" "The Atonement: a series of lectures prepared at the request of the Congregational Union of England and Wales," which has been translated into French and German; "The Evangelical Revival;" "Lectures on the Epistle to the Ephesians;" "A Manual of Congregational Principles;" "Laws of Christ for Common Life;" "Impressions of Australia;" and articles in the *British Quarterly*, *Nineteenth Century*, *Fortnightly*, and *Contemporary Review*. He has also edited a translation of "Reuss on the Theology of the Apostolic Age." In 1877 he delivered, at Yale College, Connecticut, a series of lectures on Preaching, being the first Englishman appointed to the Lyman Beecher Lecture-ship; and in the same year he received from Yale the degree of D.D. The lectures have since been published both in England and in America. In 1883 he received from Glasgow the degree of LL.D. Dr. Dale has taken an active part in Nonconformist controversies, and liberal political movements. He was formerly Vice-Chairman of the Birmingham School Board, and has been appointed by the Senate of the University of London Governor of King Edward VI.'s School, Birmingham. In 1886 he was appointed a member of the Royal Commission on the Elementary Education Acts, and he signed the Minority Report.

DALLINGER, The Rev. W. H., LL.D., F.R.S., F.L.S., son of Joseph S. Dallinger, artist, etcher, and line engraver, was born at Devonport in 1841, and educated privately. He entered the Wesleyan ministry in 1861, and was appointed successively to Faversham, Cardiff, Bristol, and Liverpool, remaining in the last place twelve years. From there he was appointed to the Governorship of Wesley College, Sheffield, which he resigned, in 1888, in order to devote himself wholly to the pursuit of minute biological research; and for that purpose has constructed a microscopical laboratory near London, where the work he is engaged in is still progressing. Fond of nature and science, from early school-days he made himself master of the use of the best and most powerful microscopical lenses; and, being deeply interested in the discussion then rife amongst biologists as to the origin of life, he, without leaning either to biogenesis or abiogenesis, gave himself to the working out, by microscopical research, of the *life-histories* of the minute forms of life the mode of whose

origin was in dispute. The best lenses and appliances obtainable were employed; but under the influence of this work the defects and deficiencies of lenses of enormous power were disclosed, and all the years since have been employed by opticians and mathematicians in bringing them nearer perfection. The result has been that the life-histories of these minutest organisms have been worked out successfully by Dr. Dallinger; and it has been shown that, so far from their having origin in not-living matter, they actually arise in spores or germs, fertilized by a genetic process like all the higher and more complex forms above them. Dr. Dallinger's latest work (1885-90) has been, by the aid of still more nearly perfect lenses, to demonstrate that the cell-nucleus in the minute organisms (and probably in all simple cells) undergoes profound changes prior to the several changes of the body. Dr. Dallinger's earliest work was rewarded by an unsought grant of £100 from the Royal Society for further research. He was elected a Fellow of the Royal Society in 1880; gave a series of discourses on his researches at the Royal Institution, London, and was appointed Rede Lecturer to the University of Cambridge. He also discoursed on his researches before the University of Oxford. He was appointed President of the Royal Microscopical Society in 1883; and, at the request of the committee of the British Association, went to Montreal to give the principal results of his work to the British Association assembled there, in 1884, receiving on that occasion the honorary degree of LL.D. from the Victoria University. The work done is recorded in the Proceedings of the Royal and the Royal Microscopical societies, and has been, in connection with other more general biological work, communicated to several of the leading journals. He has also been a lecturer on the Gilchrist staff. As a minister he has ever sought to inculcate the wisdom of a fearless acceptance of scientific truth, and has endeavoured to show that this may comport with a firm hold on the fundamental truths of Christianity.

DALMOCAND. See MACDONALD, GEORGE.

DAMALA, Madame, née Rosine Bernhardt, called Sarah, a French actress, was born at Paris, Oct. 22, 1844. She is a Jewess of French and Dutch parentage. She spent the greater part of her early life in Holland, visiting at the house of her grandfather, an Amsterdam optician.

In 1858 she entered the Paris Conservatoire, became a pupil of M.M. Provost and Samson, professors of elocution, gained a second prize for tragedy in 1861, and a second prize for comedy in 1862. She made her first public appearance on the stage at the Théâtre Français in Racine's "Iphigénie" and the "Valérie" of Scribe. She attracted hardly any notice, and after a brief withdrawal from the stage she reappeared at the Gymnase and the Porte Saint-Martin, in burlesque parts. In Jan., 1867, she returned to high art at the Odéon, playing several minor parts with much applause till she achieved a notable success in that of Marie de Neuborg in "Ruy Blas." She was thereupon recalled, to the Théâtre Français, and first showed her higher power in *Andromaque* and *Junie*; but it was as *Berthe de Savigne* in the play of "Le Sphinx," performed in March, 1874, that she won the greatest applause. In 1879 she visited London with the other members of the Comédie Française, who on June 2 in that year began a series of brilliant performances at the Gaiety Theatre, under the direction of Mr. John Hollingshead. In the following year Mdlle. Bernhardt returned alone to the Gaiety, M. Coquelin, who was expected to accompany her, being prevented from doing so by his tenure at the Théâtre Français. About this time Mdlle. Bernhardt severed her connection with the Comédie Française, and was condemned to pay £4000 costs and damages for the breach of her engagement. In June, 1881, she again appeared in London at the Gaiety Theatre in "La Dame aux Camélias" for a short series of performances, and she afterwards made a successful tour, from a pecuniary point of view, in the United States. She revisited London in 1885 and played "Fédora" for the first time in England, at the Gaiety Theatre. Some of her latest appearances at the Porte Saint-Martin Theatre have been as Shakespearean heroines. She is now (Nov., 1890) playing there "Cleopatra," in the play so called. She is the authoress of a one-act play, "L'Aveu," produced in 1888; and has recently had the Order of the French Academy conferred on her. In April, 1882, she was married, in the Church of St. Andrew, Wells Street, London, to M. Damala, a Greek gentleman, from whom she was divorced shortly afterwards. He died in Aug., 1889.

DANA, Charles Anderson, born at Hinsdale, New Hampshire, Aug. 8, 1819, entered Harvard College in 1839, but remained there only two years. In 1842 he became a member of the Brook Farm

community, in Roxbury, Massachusetts, and remained there till 1844. He edited, in connection with George Ripley, Parke Godwin, and John S. Dwight, *The Harbinger*, a weekly journal, devoted to social reform and general literature, 1844-47. In 1847 he became connected with the *New York Tribune*, and was for four or five years managing editor, until the spring of 1862. In 1855 he projected Appleton's "American Cyclopædia," in 16 vols., and, in conjunction with Mr. George Ripley, was its responsible editor to its completion in 1863, as also of the revised edition, 1873-77. "The Household Book of Poetry" was compiled and published by him in 1858; and revised and enlarged in 1882. From 1862 to 1865 he was in Government service, during the last two years as Assistant-Secretary of War. About the beginning 1866 he became editor of the *Chicago Republican*, a daily paper, published in Chicago, Illinois; but in 1868 became editor and chief proprietor of the *Sun*, a daily political and literary journal of New York.

DANA, Professor James Dwight, LL.D., F.R.S., was born at Utica, New York, Feb. 12, 1813. He graduated at Yale College in 1833, and was a teacher of mathematics in the United States navy from 1833 to 1835. In 1836-37 he was assistant to Professor Silliman in chemistry, geology, &c., at Yale College. In Dec., 1836, he was appointed mineralogist and geologist to the U.S. exploring expedition, under Commodore Wilks, and accompanied it during its whole tour, returning home in 1842. In 1837 he published his work on "Mineralogy," which has since passed through many editions, and to which three appendices in separate volumes have been added, bringing the work down to 1882. Since 1846 he has been one of the editors of the *American Journal of Science*. He prepared three voluminous reports of his observation of the expedition, with their accompanying atlases of figures, describing many new species, and the geological formations which he had observed. These reports were "On the Zoophytes," 1846; "On the Geology of the Pacific," 1849; "On Crustacea," 1852-54. In 1845 he became Professor of Natural History and Geology in Yale College, a position which he still holds. He is a Fellow of the Royal Society, London, Member of the French Academy, Paris, and other learned societies in Europe. In 1872 he received the Wollaston gold medal of the Geological Society of London; and in 1877, the Copley medal

of the Royal Society. Among his more popular works are: "Manual of Geology," 1862 (3rd edition 1880, 4th edition 1883); "Text Book of Geology," 1864; "Corals and Coral Islands," 1872 (2nd edition 1890); "Geological Story Briefly Told," 1875; "Characteristics of Volcanoes, with facts from the Hawaiian Islands," 1890.

DARLING, (Lord) Moir Tod Stormonth, M.A. Edinburgh, Senator of the College of Justice, was born in Edinburgh, Nov. 3, 1844, and is the youngest son of the late James Stormonth Darling, of Lednathie, Writer to the Signet, and Elizabeth Moir, daughter of James Tod of Deanstoun. He was educated at Kelso Grammar School, under the late Dr. Fergusson, and at the University of Edinburgh, where he graduated 1864, and was called to the Scottish Bar 1867, and made a Q.C. 1888. He unsuccessfully contested the county of Banff at the general election of 1885. He was appointed Lord Rector's Assessor in the University of Edinburgh 1887, and Solicitor-General for Scotland Nov., 1888, whereupon he was elected without opposition member of Parliament for the Universities of Edinburgh and St. Andrews. This he resigned, of course, on being, in Oct. 1890, raised to the dignity of Senator of the College of Justice, into which office he was installed with the usual ceremonies. He took the title of Lord Stormonth Darling, and was succeeded by Sir Charles Pearson, as Solicitor-General for Scotland.

DARMESTETER, Professor James, of the College of France, was born March 28, 1849, at Château Salins, Meurthe, opted for French nationality in 1871, is of Jewish extraction, and son of Cerf Darmesteter, bookbinder. He was educated at Paris, in the Lycée Bonaparte, received the prix d'honneur au Concours Général in 1866; Licencié en droit, 1870; left the law for Oriental studies in 1872; received the degree of Docteur à Lettres 1877. Has been Assistant Professor for Zend at the École des Hautes Études since 1877. He succeeded Ernest Renan as Secretary to the Société Asiatique de Paris in 1881, and became Professeur des Langues et Littératures de l'Iran, at the Collège de France, 1885; was sent on a philological mission to India, 1886, and elected Fellow of Bombay University, 1887. He is the author of the following and other works:—"Haurvatât et Amertât, Essai sur la Mythologie de l'Avesta," 1875; "Ormazd et Ahriman, leurs Origines et leur Histoire," 1877;

"The Zend Avesta," translated (in the series of the "Sacred Books of the East"), 2 vols., 1880, 1883; "Etudes iraniennes," 2 vols., 1883; "Essais orientaux," 1883; "Chants Populaires des Afghans," 1883-1890; "Reports on the Progress of Oriental Studies to the Société Asiatique de Paris from 1881." Mr. James Darmesteter married, in 1888, Miss Mary Robinson, the author of "An Italian Garden," "A Book of Songs," &c., and is the brother of Arsène Darmesteter, Professor of the History of the French Language at the Sorbonne (born 1846, died 1888).

DARMESTETER, Madame, née A. Mary F. Robinson, the elder daughter of Mr. G. F. Robinson, F.S.A., was born at Leamington, Feb. 27, 1857. For seven years she studied at University College, giving especial attention to Greek literature. She has published a volume of verses, "A Handful of Honey-suckles," 1878; "The Crowned Hippolytus," a translation of Euripides, 1880; "Arden," a novel, and "Emily Brontë," and "Marguerite Queen of Navarre" in the "Eminent Women Series," 1883; "The New Arcadia, and other poems," 1884, and "An Italian Garden," 1886. Her younger sister, Frances Mabel Robinson, has lately won praise as a writer. Madame Darmesteter is busily engaged in working up documentary material for her forthcoming history of the Italian campaigns of the French King Charles V., which, until quite recently, have been strangely neglected by historians.

DARWIN, Francis, M.A., M.B., F.R.S., son of the late Charles Robert Darwin, was born at Down, in Kent, Aug. 16, 1848, and was educated at Trinity College, Cambridge, and afterwards at St. George's Hospital, London. At College he took the Degrees of M.A., 1874, M.B., 1874, and was elected a Fellow of the Royal Society, 1882. He was University Lecturer in Botany, 1884; University Reader in Botany, 1888; and became Fellow of Christ's College, 1888. He acted as his father's assistant from 1874 to 1882; and is the joint author of "The Power of Movement in Plants," 1880, and author of various papers on Physiological Botany, and is editor of "Life and Letters of Charles Darwin," 1887.

DARWIN, Professor, George Howard, M.A., F.R.S., LL.D., Glasgow, is the second son of the late Charles R. Darwin. He was born in 1845, and in Oct., 1864, entered Trinity College, Cambridge, and was later elected a scholar. He graduated in 1868

as Second Wrangler, and was awarded the Second Smith's prize. He was elected to a Fellowship at Trinity College in Oct., 1868, and afterwards studied for the Bar, and was called at Lincoln's Inn, April 30, 1872, but never pursued the profession of the law, and in 1873 he returned to Cambridge. In 1879 he was elected a Fellow of the Royal Society; in 1885 the honorary degree of LL.D. was conferred on him by the University of Glasgow; and in the same year "a royal medal" was awarded to him by the Royal Society, in recognition of his scientific work. In 1875 he presented two papers to the Statistical Society, on consanguineous marriages, and in 1876 he contributed to the Transactions of the Royal Society a paper "On the Influence of Geological Changes on the Earth's Axis of Rotation." This was followed by several other contributions, many of them attracting great notice in the scientific world, especially one read in Dec., 1878, "On the Remote History of the Earth." Since 1875 Mr. Darwin has been principally occupied with mathematical and physical investigations connected with the study of astronomy. He has also been engaged in experimental investigations on the pressure of loose sand (Inst. C.E.), and jointly with his brother, Mr. Horace Darwin, on small changes of level in the earth's surface, and minute earthquakes (Brit. Assoc. Reports). In 1882 he assisted Sir William Thomson in the preparation of the second part of the new edition of "Thomson and Tait's Natural Philosophy." Since 1882, he has been principally occupied with the theory and prediction of the tides, especially with reference to the operations of the tidal department of the survey of India. An account of his work in this branch will be found in Reports to the British Association for 1883-4-5. On Jan. 16, 1883, he was elected to the Plumian Professorship of Astronomy and Experimental Philosophy at Cambridge, vacant by the death of the Rev. James Challis, M.A., F.R.S. In 1885 he was appointed a member of the Council of the Meteorological Office. In addition to the works above enumerated, Professor Darwin is a frequent contributor to *Nature* and other scientific periodicals.

DASENT, Sir George Webbe, D.C.L., is the third but eldest surviving son of the late Mr. John Roche Dasent (Attorney-General of the Island of St. Vincent, West Indies, who died in 1832), by Charlotte Martha, daughter of Mr. Alexander Burrows Irwin, of the Union Estate, St. Vincent, and the Kills, near

Templemore, co. Tipperary. He was born at St. Vincent about the year 1820, and educated at Westminster School, King's College, London, and Magdalen Hall Oxford, where he entered in 1836 and graduated B.A. in 1840, and D.C.L. 1852. He was called to the Bar at the Middle Temple in 1852. His translation of "The Prose or Younger Edda," from the Norse, dedicated to Thomas Carlyle, appeared in 1842; that of "Theophilus Eutychianus," from the original Greek, "in Icelandic, Low German, and other tongues," in 1845. His essay "The Norsemen in Iceland," appeared in 1858; "Popular Tales from the Norse, with an Introductory Essay on the origin and diffusion of popular Tales," in 1859; the second edition, enlarged, appeared in 1859, a third in 1888, and "Tales from the Fjeld," from the Norse of Asbjørnsen, in 1874. In 1861 he published the Saga of "Burnt Njal;" and in 1866, "The Story of Gisli, the Outlaw," from the Icelandic; and he has translated much from the German, the Norse, and the Icelandic languages. He has written also "Annals of an Eventful Life," a novel, 3 vols., 1870; "Three to One; or, some Passages in the Life of Amicia Lady Sweetapple," 3 vols., 1872. "Half a Life," 3 vols., 1874; the "Vikings of the Baltic," a tale of the North in the Tenth Century, 3 volumes, 1875. In 1874 his name was associated with "An Icelandic-English Dictionary," printed by the Oxford University Press, based on the MS. collections of the late Richard Cleasby, enlarged and completed by Gudbrand Vigfússon, with an Introduction and Life of Richard Cleasby, by Sir G. W. Dasent. Sir George W. Dasent acted for twenty-five years as one of the assistant editors of *The Times* (1845-1870). He has frequently been employed as an examiner in English and modern foreign languages, in connection with the Civil Service appointments, and has been a frequent contributor to *The Quarterly* and *Edinburgh Reviews*, and the principal Magazines. On Feb. 5, 1870, he was appointed by the Government to the post of Civil Service Commissioner. Sir George W. Dasent received the honour of knighthood "for public services," at Windsor Castle, on June 27, 1876, and he is an original member of the Royal Commission on Historical Manuscripts. He is married to a daughter of the late W. F. A. Delane, Esq., editor of *The Times*.

DAUBRÉE, Professor Gabriel Auguste, was born at Metz (Moselle), on June 25, 1815, after passing the Ecole Polytechnique he was admitted into the Corps des Mines in

1834, and in 1838 was appointed Ingénieur des Mines in le Bas-Rhin, and Professor of Geology and Mineralogy at the Faculty of Sciences at Strasbourg, of which he became Dean in 1852. In 1861 he was (almost unanimously) elected Member of the Academy of Sciences, in succession to Professor Cordier, whom he also succeeded as Professor of Geology at the Natural History Museum, Paris; he was nominated Inspecteur-Général des Mines in 1867, and Director of the School of Mines in 1872. Professor Daubrée has written more than 300 memoirs, chiefly on Geological and Mineralogical subjects, but including investigations allied thereto, such as the permeability of rocks to water, and the effects of such infiltration in producing volcanic phenomena, the relation between thermal waters and the rocks whence they flow, the composition of meteoric masses and their classification in accordance therewith. Professor Daubrée is also distinguished for the long continued and sometimes dangerous experiments which he has conducted in order to ascertain to what extent it is possible artificially to imitate the natural production of rocks. Professor Daubrée is President of the National Agricultural Society of France, Honorary President of the French Alpine Club, Past President of the Academy of Sciences, of the Geological, the Geographical, and the Mineralogical Societies of Paris, Honorary D.Phil. of Bologna and of Halle, Foreign Member of the Royal Society of London, of the Geological Society, and of the Mineralogical Society, of the Academy dei Lincei, of the Academies of Bologna, Boston, Brussels, Copenhagen, Göttingen, Munich, Philadelphia, St. Petersburg, and Turin, of the Scientific Society of Batavia, and of the American Institute of Mining Engineers. Professor Daubrée is Grand Officer of the Legion of Honour, Grand Cross, Grand Officer and Commander of numerous foreign orders.

DAUDET, Alphonse, a French novelist, was born at Nîmes, of poor parents, May 13, 1840. After studying in the lyceum at Lyons, he became an usher in a school at Alais, and did the drudgery of that humble calling for two years. In 1857 he went to Paris with his brother Ernest, in order to try to gain a livelihood by literary pursuits. He first brought out a volume of poetry, entitled "Les Amoureuses," 1858, which immediately gained for him a reputation, and led to his employment on several newspapers. The *Figaro* opened its columns to a description of "Les Gueux de Province," in which he depicted with

extreme earnestness and fidelity the miseries and sufferings of the ushers in provincialschools. He next published "La Double Conversion," a poem, 1861, which was followed in 1863 by "Le Roman du Chaperon Rouge," a collection of articles which had appeared originally in the *Figaro*. He also wrote for the stage with success, composing, in conjunction with M. Ernest Lépine, two little pieces "La Dernière Idole" (Odéon theatre, 1862), and "L'Œillet blanc" (Comédie Française, 1865). Since then he has written for the theatre three pieces which were decided failures, viz., "Le Sacrifice" (Vaudeville); "L'Arlésienne" (same theatre), 1872; and "Lise Tavernier" (Ambigu), 1872. For five years he was private secretary to the Duc de Morny, President of the Corps Législatif (1861-65). M. Alphonse Daudet has contributed extensively to a large number of newspapers, particularly to the *Monde Illustré* and to the *Figaro*, in which his rhymed chronicles, signed "Jean Froissart," and his "Lettres de mon Moulin," signed "Gaston-Marie," deserve special mention. Subsequently he became one of the regular contributors to the *Moniteur Universel*, and he has published under the pseudonym of "Baptistet," or under his real name, a number of novels, tales, and collections of articles contributed originally to newspapers. Among these publications are:—"Le Petit Chose," "Tartarin de Tarascon," "Tartarin sur les Alpes," "L'Évangéliste," "Les Rois in Exil," "Robert Helmont," "Lettres de mon Moulin," "Lettres à un Absent," "Contes du Lundi," "Les Femmes d'Artistes," "Jack, Histoire d'un Ouvrier," 1873; "Fromont jeune et Risler aîné," 1874, his best work, to which the French Academy awarded the Jouy prize in June, 1875, and which was successfully dramatised by M. Alphonse Belot in 1876; "Les Contes Choisis," 1877; "Le Nabab Mœurs Parisiennes," 1878, a work in which the private life of the Duc de Morny is minutely described; "Les Rois en Exil," 1879; a dramatic version of "Jack," brought out at the Odéon, Jan. 11, 1881; "L'Évangéliste," 1882; and "Sappho," 1884. M. Alphonse Daudet has been long connected with the *Journal Officiel*, being entrusted with the theatrical department of that paper.

DAVENPORT Sir Samuel, K.C.M.G., LL.D., fourth son of the late George Davenport, Esq., of Oxford, and of Great Wigston, Leicestershire, was born in 1818, and settled in South Australia in 1842. He became a successful sheep-farmer, and

also occupied himself with the cultivation of the olive and the manufacture of olive-oil as well as vineyards and wine. He was Crown Nominee of Legislative Council in 1846-7, and Member from 1857-66. He has taken a prominent part in the organisation of the various exhibitions that have been held in different parts of the world, being Executive Commissioner at London, 1851, Philadelphia, 1876, Sydney, 1879, Melbourne, 1880, and London, 1886. He was also for many years President of the Royal Agricultural and Horticultural Society and of the Chamber of Manufactures of South Australia. In 1885 he was appointed President of the South Australian Branch of the Geographical Society of Australasia. He was Knighted in 1884; and in June, 1886, he was created a K.C.M.G., and in July, 1886, received the hon. degree of LL.D. from the University of Cambridge.

DAVEY, Sir Horace, Q.C., of Lincoln's-inn and of Blackdown-house, near Haslemere, is the son of Mr. Peter Davey, of Torquay, and formerly of Horton, Buckinghamshire, by marriage with Caroline Emma, daughter of the late Rev. William Pace, rector of Rampisham and Wraxall, Dorsetshire. He was born in the year 1833, and was educated at Rugby, from which school he was elected to a Scholarship at University College, Oxford. He obtained a double first-class on taking his degree, and was subsequently chosen a Fellow of his college. He was also Senior Mathematical Scholar and Eldon Law Scholar. He was called to the Bar at Lincoln's-inn in January, 1861, and soon rose to eminence as an equity lawyer. He obtained a silk gown in 1875. He sat for Christchurch, Hants, from 1880 down to 1885, when he was defeated. He was Solicitor-General for a few months in 1886 under Mr. Gladstone's last Administration, and was elected member for Stockton-on-Tees, Dec. 21, 1888. He is married to Louisa, daughter of the late Mr. John Donkin.

DAVIDS, St., Bishop of. See JONES, the RIGHT REV. WILLIAM BASIL.

DAVIDS, Professor Thomas William Rhys, Ph.D., LL.D., was born at Colchester, May 12, 1843, and educated at the Brighton School, and in the University of Breslau. He was appointed a writer in the Ceylon Civil Service in Feb. 1866, and filled various judicial appointments in that island, where he also acted as Archæological Commissioner to the Government of Ceylon. He was called to the Bar by the Middle Temple in May,

1877. Professor Rhys Davids is the author of "Buddhism: a sketch of the life and teachings of Gautama, the Buddha," 1877; of "Buddhist Suttas," Oxford University Press, 1881; of "Vinaya Texts," Oxford University Press, 1882-85; of "Buddhist Birth Stories: being tales of the anterior births of Gautama Buddha," and of "The Questions of King Milinda," Oxford University Press, 1890, and has edited in the original Pāli various books of the Buddhist Scriptures for the Pāli Text Society (1882-1890). He was the Hibbert Lecturer for the year 1881; is an Honorary Ph.D. of the University of Breslau, an honorary LL.D. of the University of Edinburgh, Professor of Pāli and Buddhist literature at University College, London; Chairman of the "Pāli Text Society," and Secretary of the "Royal Asiatic Society."

DAVIDSON, Professor George, A.M., Ph.D., Sc.D., for many years at the head of the field assistants of the United States Coast and Geodetic Survey, is of Scottish descent, and English birth. His father was Thomas Davidson, of Arbroath, his mother Janet Drummond, of Montrose. He was born at Nottingham, May 9, 1825; and his parents came to Philadelphia in 1832. He received the rudiments of his education from his mother, then attended the public schools of Philadelphia, and graduated from the Central High School at twenty years of age. Between 1845 and 1850 he served in field duty as surveyor from Maine to Texas. Before he was 25 years of age he was chosen for special duty on the Pacific Coast. For five years he was there engaged in determining geographical positions, surveying harbours, selecting sites for light-houses, measuring base lines; and inaugurated the triangulation of Southern California and of Washington Territory. When General Lee's army invaded Pennsylvania (1863) he was appointed assistant engineer of fortifications for the defence of Philadelphia. Under direction of Prof. Peirce, the successor of Prof. Bache, and by arrangement between the Hon. Secretaries of State and the Treasury Department, he undertook in May, 1867, a geographical reconnaissance of the Coasts of Alaska, for the purchase of which the government was then negotiating with Russia. In 1869 he took charge of the astronomical expedition to Alaska to observe the total solar eclipse of August, 1869, and was the first American who went up the Chilkah River. In 1873 and 1874 he largely influenced Mr. James Lick in the establishment of the Lick Observatory, and in the first-named year he was

authorized to announce that "the greatest telescope in the world" would be installed on the Sierra Nevada at an elevation of 10,000 feet. In 1874, in charge of the American Transit of Venus Expedition to Japan, he observed the phenomena and took about sixty photographs at Nagasaki; and determined the telegraphic difference of longitude between that place and Vladivostok and Tokia, the latter at his own cost. In 1874 he computed a field catalogue of 983 transit stars, and in 1883 he finished the computation of a second and enlarged edition of 1278 time and circumpolar stars. In 1874 he had finished the computation of a table of 57,500 transit star factors to three places of decimals; and has in part computed another equally extensive. In 1878 he was sent to the Paris Exposition to examine the instruments of precision applicable to geodesy and astronomy; and was there elected by the French and foreign jurors the president of the important jury of the moving powers of machinery, wherein the jury examined 3,800 pieces of machinery and awarded 850 prizes. For this service he received the large medal and diploma of the French Government. He has written four editions of the "Coast Pilot of California, Oregon and Washington," 1858, '62, '69, '88. The last edition (entirely rewritten) embraces 721 quarto pages and contains 464 illustrations of landfalls, headlands, islands, rocks, &c. He also wrote (1869) the "Coast Pilot of Alaska," Part I. In 1880 he carried his equatorial telescope to the summit of Santa Lucia, 6,000 feet above and overlooking the ocean, and observed the total solar eclipse of January 11. He has devised new forms of instruments, notably the New Meridian instrument for Latitude and Time named after him; break circuit chronometer; new vertical clamp for transit instruments, &c., and the spirit level horizon to sextant; and has shown the obscure mechanical defects of micrometers, &c. In 1874 he was elected a member of the National Academy of Sciences. From the inception of the Geographical Society of the Pacific in 1881, he has yearly been elected President, and has published papers upon the ascent of Makushin Volcano, the eruptions of Bogoslov and other volcanoes of the Aleutian Islands. At his own expense he has maintained the first astronomical observatory on the Pacific Coast of the United States. Professor Davidson has held the position of Honorary Professor of Geodesy and Astronomy in the University of California since 1873, and was a Regent of the same institution from 1877 to 1884.

During his 45 years of active field service on the Survey his itinerary shows over 382,000 miles travelled—and always with instruments, note-book and sketch-block in hand. In answer to recent inquiries from the Geographical Society of France he has shown that he has written over 2,500 octavo pages of geographical matter, illustrated by 530 views, maps, &c. In Oct., 1858, he married Ellinor, the youngest daughter of Mr. Robert Henry Fauntleroy, of Virginia, and is the father of two sons and one daughter.

DAVIDSON, The Right Rev. Randall Thomas, D.D., Bishop of Rochester, was born in 1848, and educated at Harrow and at Trinity College, Oxford, where he graduated B.A. in 1871, and M.A. in 1875. Ordained in 1874, to the curacy of Dartford, in Kent, he was appointed in 1877 chaplain and private secretary to Dr. Tait, Archbishop of Canterbury. This position he held until the Archbishop's death in Dec., 1882. On him devolved, in large measure, many of the arrangements connected with the great Lambeth Conference of 100 Bishops in 1878. He has also contributed articles on various historical and ecclesiastical subjects to the *Contemporary Review*, *Macmillan's Magazine*, and other periodicals. Bishop Lightfoot, of Durham appointed him Examining Chaplain in 1880, and in 1882 he became Sub-almoner and honorary Chaplain to the Queen. and one of the six preachers of Canterbury Cathedral. Archbishop Benson, on succeeding to the Primacy, retained Mr. Davidson's services as Resident Chaplain and Private Secretary, and after holding that office for six months he was, in June, 1883, appointed by the Queen to the deanery of Windsor, and also Resident Chaplain in Ordinary to the Queen. In the same year he received from the University of St. Andrews the honorary degree of D.D. In 1884 he became a trustee of the British Museum, in the management of which he takes an active part. In 1887 he was elected by the Masters of Eton College as their representative on the Governing Body of the School. He is also a Member of the Governing Body of Wellington College. In 1888 Dr. Davidson acted as Hon. Secretary to the third Lambeth Conference, attended by 145 Bishops from all parts of the world, and a few months after the conclusion of its Sessions he published, through the Society for Promoting Christian Knowledge, a volume containing an exhaustive History of these Conferences from their commencement, together with all the official and other documents connected with them. He has been for many

years engaged, in conjunction with Canon Benham, in writing the Biography of his father-in-law, Archbishop Tait, whose daughter, Miss Edith Tait, he married in 1878. In 1890 Dr. Davidson was appointed Bishop of Rochester.

DAVIDSON, The Rev. Samuel, D.D., LL.D., was born in 1807, near Ballymena, Ireland. In 1825 he entered the Royal College of Belfast, where he eventually distinguished himself in the various branches of philosophy, philology, and Biblical literature. He was appointed to the Presbyterian ministry, and in 1835 was called to the Chair of Biblical Criticism and Literature in his own College. After a few years of successful labour in that capacity, his opinions respecting ecclesiastical government underwent a change in favour of Congregationalism, and he was shortly afterwards (1842) invited to the Professorship of Biblical Literature and Oriental Languages in the newly erected College of the Congregationalists at Manchester, called the Lancashire Independent College. Here Dr. Davidson rapidly rose in reputation as a Biblical scholar. In addition to an important work he had already published on "Biblical Criticism," he produced in 1843 "Sacred Hermeneutics;" in 1846 a translation of Gieseler's Ecclesiastical History (Clark's Library); in 1848 "The Ecclesiastical Polity of the New Testament;" in 1848-51, "An Introduction to the New Testament," 3 vols.; in 1852, a new edit., which was also almost a new work, of his "Biblical Criticism," 2 vols.; in 1855, "The Hebrew Text of the Old Testament revised;" in 1856, a new work on the "Text of the Old Testament, and the Interpretation of the Bible," to replace the second volume in a new edition of "Horne's Introduction to the Sacred Scriptures;" He has since that time written an "Introduction to the Old Testament," 3 vols.; a translation of Fürst's Hebrew Lexicon, with a new preface; above all "An Introduction to the New Testament, Critical, Exegetical, and Theological," 2 vols., 1868, in place of the former Introduction in 3 vols. In 1873 he issued "On a fresh revision of the English Old Testament;" and in 1875, "The New Testament translated from the critical text of von Tischendorf." In 1877 he published "The Canon of the Bible," which is the expansion of an article contributed to the new edition of the "Encyclopædia Britannica." His contributions to the "Cyclopædia of Biblical Literature," first issued by Dr. Kitto, and since by other editors, have been numerous and marked by varied

and mature learning. Years ago the university of Halle conferred upon him the honorary degree of doctor in theology, a distinction which he alone, among Englishmen, possesses at the present time. On account of his liberal views, and his acquaintance with the works of German theologians, the committee of his college became dissatisfied, and in the end the professor was obliged to resign his post. Dr. Davidson has for several years resided in London, pursuing his favourite studies. His latest work, published in 1883, is on "The Doctrine of Last Things contained in the New Testament."

DAVIES, The Rev. John Llewelyn, M.A. born at Chichester, Feb. 26, 1826, was educated at Repton School and Trinity College, Cambridge, and was elected a fellow of that society in 1850. He was appointed Incumbent of St. Mark's, Whitechapel, in 1852, and Rector of Christ Church, St. Marylebone, in 1856. He was appointed, in Feb., 1881, a Chaplain in Ordinary to the Queen; and in Oct., 1882, Rural Dean of the deanery of St. Marylebone. In 1889 he became Vicar of Kirkby Lonsdale, and in 1890 Hulsean Lecturer at Cambridge. Mr. Davies has translated (jointly with D. J. Vaughan) "Plato's Republic;" and published several volumes of sermons; an edition of Ephesians, Colossians, and Philemon; contributions to "Peaks, Passes, and Glaciers," and to periodical literature; also "Theology and Morality, Belief and Practice," 1873; "The Christian Calling," 1875; and "Social Questions," 1885. He was a contributor to Dr. William Smith's "Dictionary of the Bible," and "Dictionary of Christian Biography." For some years he was a member of the London School Board for the Marylebone Division, and Principal of Queen's College in Harley Street. He is a theologian of the school of the Rev. F. D. Maurice.

DAVIES, Mrs. Mary, born in London, of Welsh parents, Feb. 27, 1855, was Welsh scholar at the Royal Academy of Music for three years, studying principally under Signor Randegger, and winning successively bronze and silver medals, as well as the Parepa-Rosa gold medal, and the Christine Nilsson prize. After remaining at the Royal Academy five years, she was elected an associate, and was in 1882 elected a member of the Academy; acted as Honorary Examiner for the vocal competitions of the Academy in 1889; has sung at various festivals in the provinces, including

those of Worcester, Gloucester, and Norwich, and in London at the Concerts of the Sacred Harmonic Society, the Philharmonic Society, and at the Richter Concerts, whilst she has been associated with Mr. Boosey's London Ballad Concerts since 1878. Mrs. Mary Davies, in 1880, created the part of Margaret in the English version of Berlioz's "Faust," produced by Sir Charles Hallé, the other artists associated with the work being Mr. Charles Santley and Mr. Edward Lloyd. She was married to Mr. W. Cadwaladr Davies, of the Inner Temple, March 22, 1888.

DAVIES, The Hon. Sir Matthew Henry, K.C.B., M.P., Speaker of the Legislative Assembly of Victoria, was born at Geelong, 1850, and is the son of Ebenezer Davies, Esq., and Ruth, daughter of Mark Bartlett, Esq., Berkshire, and grandson of the Rev. John Davies, of Trevecca College, South Wales. He was educated at Geelong College, matriculated at Melbourne University in 1869, and was admitted as a Solicitor of the Supreme Court in 1875. For five years he was Honorary Secretary to the Council of the Law Institute of Victoria. He is a J.P. for the Central Bailiwick, and was Mayor of the City of Prahran, 1881-82, and represented the electoral district of St. Kilda in Parliament from 1883 to 1888. He was member of Royal Commission on the Transfer of Land and Titles to Land in 1885; was sworn an ex-Councillor, Feb., 1886; and joined the Gillies-Deakin Government as Minister without responsible office. He visited England in connection with the Indian and Colonial Exhibition, 1886-87; was Chairman of the Royal Commission on Banking, 1887; elected Speaker of the Legislative Assembly, Oct., 1887; Chairman of the Royal Commission on the Electric Lighting and Ventilation of the Parliament Houses, 1888; Executive Commissioner and a Vice-President of the Centennial International Exhibition, Melbourne, 1888; returned unopposed for the electoral district of Toorak, 1889; and was unanimously re-elected Speaker, 1889. Sir Matthew Davies was created a K.B. in 1890. He married Elizabeth Locke, eldest daughter of the Rev. Dr. Mercer, Presbyterian minister, of Melbourne.

DAVIS, Henry William Banks, R.A., was born at Finchley, Aug. 26, 1833, and educated at home. When a student at the Royal Academy, in 1854, he obtained two silver medals—one for perspective, the other for a model in the Life School. He matriculated at Oxford in 1856, but

after residing a few terms at the university, he resumed his art pursuits, and was elected an associate of the Royal Academy in Jan., 1873. In 1861 Mr. Davis painted "Rough Pasturage," exhibited at the Royal Academy; in 1865, "The Strayed Herd;" in 1866, "Spring Ploughing" (engraved); in 1870, "Dewy Eve;" in 1871, "Moonrise," and "The Prætorium at Neufchatel;" in 1872, "A Panic" (engraved), and "Trotting Bull," in bronze, which obtained a medal for sculpture at the Vienna Exhibition; in 1873, "A Summer Afternoon;" in 1874, "A French Lane," "The End of the Day," and "In Picardy;" in 1876, "Early Summer," "A Spring Morning," "The Rustling Leaves," and "Mares and Foals: Picardy;" in 1877, "After Sundown," "Reconnoitring," "Contentment," and "The Approach of Night;" in 1878, "Mid-day Shelter," "Afternoon on the Cliffs," "Evening Light," and "The Lowing Herd winds slowly o'er the Lea;" in 1879, "Cutting Forage on the French Coast," "A Midsummer Night," "Wanderers," "Picardy Sheep," and "Cloud and Sunshine;" in 1880, "Family Affection," and "Returning to the Fold," which was purchased by the president and council of the Royal Academy under the terms of the Chantrey bequest; in 1881, "Mother and Son," "Noon," and "The Evening Star;" in 1882, "In Rosshire," "Sea and Land Waves," "Broken Weather in the Highlands," and "Showers in June;" in 1883, "Gathering the Flock," "Ben Eay," "At Killochewe;" in 1890, "A Placid Morning on the Wye," "The Picardy Dunes," and "A Ford on the Wye." All the above-mentioned pictures, as well as similar Highland scenes painted during the last three years, were exhibited at the Royal Academy. Mr. Davis was elected a full member of the Academy June 18, 1877.

DAVISON, Mrs., *née* Arabella Goddard, pianist, daughter of Mr. T. Goddard, of Welbeck Street, born at St. Servan, near St. Malo, in Brittany, in Jan., 1836, almost from infancy showed an extraordinary taste for music, which was fostered by her parents. On her first appearance in public, at a concert given for some charitable purpose in her native village of St. Servan, when she played a fantasia on themes from Mozart's "Don Juan," she was little more than four years of age. At this time the promise of future celebrity in the child was so great that her parents removed with her to Paris, where she received lessons from Kalkbrenner. Returning to London soon after the revolution of Feb., 1848, Mr.

and Mrs. Goddard confided the cultivation of their daughter's musical talents to Mrs. Anderson, her Majesty's *pianiste*. She was only eight years of age when she was called upon to perform at Buckingham Palace before her Majesty and the late Prince Albert, who highly complimented her on her playing. The completion of her musical education was intrusted to Thalberg, under whose able tuition she rapidly progressed, and in a short time she could play the most difficult passages at sight; in addition to which her musical memory was surprising. She first appeared in public, at a *matinée* at her father's residence, March 30, 1850: and in Oct. made her *début* at the Grand National Concerts, when she played the "Elisire" fantasia, and the "Tarantella" of Thalberg, with marked success. From that time she appeared frequently in public, and established her fame by her performance of various fantasias by Thalberg, Prudent, &c. The first performances of Miss Goddard at the concerts given at Her Majesty's Theatre were confined principally to works of the modern romantic school. She has since become equally distinguished as a *pianiste* in more classical compositions. Miss Goddard afterwards became the pupil of Mr. G. A. Macfarren, under whom she studied harmony; and left England for a tour on the Continent in 1854, visiting Paris, Leipzig, Berlin, Vienna, Florence, and nearly all the principal cities of France, Germany, and Italy; giving concerts, and meeting with great success. She returned to England in May, 1856, and in 1860 was married to Mr. Davison, a musical critic, though she, in public and private concerts, has retained her maiden name. Miss Goddard took her farewell of the British public at St. James's Hall, Feb. 11, 1873, and soon afterwards went on a professional tour through Australia, the Sandwich Islands, and the United States. She returned to England in April, 1876.

DAVITT, Michael, one of the best known of the Irish leaders, was born in 1846 in the village of Straide, co. Mayo. His parents were of the poorer class of western Irish peasantry, and when Michael was five years old, his father was evicted from the small holding on which the family subsisted. This early experience of landlord power has doubtless largely tended to influence his action in the fierce crusade which he has waged of recent years against Irish landlordism. The family then emigrated to Lancashire, where he was employed in a cotton factory, and at the age of eleven lost his

right arm through a machinery accident. He was then sent to the Wesleyan School at Haslingden, and at fifteen obtained work in a printing office, where he remained for seven years. In 1866 he joined the Irish Revolutionary movement initiated by James Stephens, and in 1870 was arrested in London, tried on an indictment of "treason-felony," and sentenced to fifteen years' penal servitude. After undergoing seven years and a half of imprisonment, chiefly in Dartmoor Convict Prison, Mr. Davitt was released on ticket-of-leave. In conjunction with other amnestied Fenian prisoners he was tendered a public reception by the people of Dublin, and after making a tour of the West of Ireland and paying a hurried visit to America, he started the Land Agitation in his native county of Mayo early in 1879. In October of that year he, in conjunction with Mr. Parnell and others, founded the Land League Organization, and became its guiding spirit. He was arrested and prosecuted in November of that year for a seditious speech, but after a week's imprisonment and an abortive trial the prosecution was abandoned. During the partial famine of 1879-80, he had the chief direction of the Land League relief funds. In May, 1880, he proceeded to America to superintend the organization of the American branch of the Land League, and made an organizing tour of the Northern States from New York to San Francisco and back. Recalled to Ireland by the State prosecution of the executive of the Land League, he was again arrested on Feb. 3, 1881, by order of the Government, and consigned to Portland Convict Prison on a revocation of his original ticket-of-leave. After an incarceration of fifteen months, during which, on his own admission, he was exempt from ordinary convict labour, he was again released on ticket-of-leave, Mr. Parnell and other Irish members going down to Portland to receive him on his discharge. On the very day of this release, May 6, 1882, Lord Frederick Cavendish and Mr. Burke were assassinated in the Phoenix Park. In conjunction with Messrs. Parnell and Dillon, he issued a manifesto to the Irish race condemnatory of the murder. After again visiting America and submitting to a meeting of Irish American representatives in New York a plan for the amalgamation of existing national organizations in the United States, he returned to Ireland and succeeded in persuading Mr. Parnell to summon a National Convention in Dublin to effect the revival of the Land League movement. The National League organization was the outcome of this

convention—with the restoration of Irish legislative independence as the first plank in its platform. In Feb., 1883, Mr. Davitt was again prosecuted for a violent speech against rent and landlordism, and, refusing to enter into bail to keep the peace, he underwent four months imprisonment in Richmond Bridewell, Dublin. Since then he has been an incessant propagandist of Land League principles and Nationalist aspirations in Ireland and Great Britain. While imprisoned in Portland in 1882 he was elected M.P. for Meath, but was disqualified by a vote of the House of Commons. When legally eligible on the expiration of his ticket-of-leave in 1885, he was solicited to become a candidate by several Irish constituencies, but refused to enter the Imperial Parliament from an objection to take the oath of allegiance. He at the same time refused to accept a national testimonial for his services to the Irish people. In Dec., 1884, Mr. Davitt published "Leaves from a Prison Diary," a work which was written during his imprisonment in Portland, and which has had a very large circulation. Occupied with literary work as a means of livelihood, Mr. Davitt is a constant contributor to American and Colonial newspapers, and an occasional writer in Irish and English journals and reviews. He has a decided leaning towards socialistic doctrines in his writings and speeches, and is far from being in union with the other Irish leaders; his theories of land being more in accordance with those of Mr. Henry George than with those of Mr. Parnell. He has been recently elected a member of the Dublin corporation, and is a delegate from that body to the Port and Docks Board of the city. He is a director of the Dublin North City Milling Co., and a member of the Executive Council of the Irish National League. He has undergone altogether over nine years' imprisonment for his connection with Irish political movements. He was one of those who were implicated in the charges made in the articles on "Parnellism and Crime," and conducted his own case with an ability which called forth commendations even from the presiding Judge.

DAWKINS, Professor William Boyd, M.A., F.R.S., F.G.S., F.S.A., Assoc. Inst. C.E., geologist and osteologist, was born Dec. 26, 1838, at Buttington Vicarage, Welshpool, Montgomeryshire. He received his education at Rossall school and at the University of Oxford, where he became a scholar of Jesus College, and first Burdett-Coutts geological scholar

He was appointed assistant geologist in Her Majesty's Geological Survey of Great Britain in 1862; geologist in 1867; Curator of the Manchester Museum, 1869; lecturer on geology in Owen's College, Manchester, in 1870; Professor there in 1874; and President of the Manchester Geological Society in 1874. Professor Dawkins is the author of numerous essays in the "Proceedings" of the Geological, Anthropological, and Royal Societies, relating principally to fossil mammalia; "British Pleistocene Mammalia" in the "Proceedings" of the Palaeontological Society, 1866-78; and "Cave-Hunting: Researches on the Evidences of Caves respecting the Early Inhabitants of Europe," 1874. In 1875 he went round the world, by way of Australia and New Zealand. In 1880 he published a work on "Early Man in Britain, and his place in the Tertiary Period;" and gave a series of lectures before the Lowell Institute, Boston, Massachusetts. He was appointed, in 1882, a member of the scientific committee of the Channel Tunnel, and entrusted with the geological survey of the English and French coasts for that enterprise. He presided over the Anthropological section of the British Association at Southampton, in Aug., 1882; and on Oct. 17 in the same year he was elected an honorary Fellow of Jesus College, Oxford. In 1883-4 he was engaged in laying down the line for a tunnel under the Humber, and in 1885 made a preliminary survey of the antiquities of the Isle of Man, in the same year being elected examiner in the University in London. In 1886 he began the search for coal at Dover, which has recently resulted in the discovery of a coal-field in South-Eastern England. He was appointed President of the Geological Section of the British Association in 1888; and, in 1889, Lyell Medallist, and Examiner in the University of Oxford. During the last 15 years he has advised on various engineering works—the water-supply of the metropolis, of Croydon, Cardiff, Bristol and Liverpool, the salt of Northwich, the Manchester ship Canal, and the Kerosene Shales of New South Wales.

DAWSON, George M., LL.D., A.R.S.M., F.G.S., F.R.S.C., son of Vice-Chancellor Sir John William Dawson, was born at Pictou on Aug. 2, 1849. He is Assistant Director Geological Survey of Canada; Murchison and Edward Forbes Medallist, Royal School of Mines, and was appointed Geologist and Naturalist to H.M. North American Boundary Commission in 1873, and in 1875 he published a detailed report on the country traversed

from the Lake of the Woods to the Rocky Mountains, entitled "Geology and Resources of the 49th Parallel." He was appointed to the Geological Survey of Canada in 1875, and has since been principally engaged in the survey and exploration of the North-West Territory and British Columbia, and was placed in charge of the Yukon Expedition, undertaken by the Canadian government in 1887. His geological work includes the first detailed account of the surface geology and glacial phenomena of the northern part of the Continent of America west of the Great Lakes, as well as the investigation of the great coal and lignite deposits of the North-West Territory and of large portions of British Columbia and the Queen Charlotte Islands. He is the author of numerous original scientific papers, principally geological, but including geographical, ethnological and other observations made in the course of his explorations, published in the Quarterly Journal of the Geological Society, Transactions of the Royal Society of Canada, *Canadian Naturalist*, *Canadian Record of Science*, and elsewhere. Amongst these are:—"On the Superficial Geology of the Central Region of North America" (*Quart. Journ. Geol. Soc.*, Vol. XXXI.); "On the Superficial Geology of British Columbia" (*Ibid.*, Vol. XXXIV.); "Additional Observations on the Superficial Geology of British Columbia and Adjacent Regions" (*Ibid.*, Vol. XXXVII.); "On a New Species of *Loftusia*" (*Ibid.*, Vol. XXXV.); "Foraminifera from the Gulf and River of St. Lawrence" (*Can. Nat.*, 1870, and *Ann. and Mag. of Nat. Hist.*); "On the Occurrence of Foraminifera, Coccoliths, &c., in the Crutaceous Rocks of Manitoba" (*Can. Nat.*, 1875.); "On the Microscopic Structure of certain Boulder-Clays and the Organisms contained in them" (*Bull. Chicago Acad. Sci.*, Vol. I.); "Sketch of the Geology of British Columbia" (*Geol. Mag.*, Dec. 2, Vol. VIII.); "On certain Borings in Manitoba and the North-West Territory" (*Trans. Royal Soc. Can.*, Vol. IV.); "On the Kwokiool People of Vancouver Island" (*Ibid.*, Vol. V.); and is the author of fifteen reports published by the Geological Survey of Canada, of which the following may be mentioned:—"On the Queen Charlotte Islands, including as an appendix a Monograph on the Haida Indians," 1878; "On an Exploration from Port Simpson on the Pacific Coast to Edmonton on the Saskatchewan," 1879; "On the Region in the Vicinity of the Bow and Belly Rivers," 1882-4; "On the Physical and Geological Features of part of the Rocky Mountains," 1885;

"Notes to accompany a Geological Map of the Northern Portion of the Dominion of Canada," 1886. He is joint author (with Dr. Selwyn) of "Descriptive Sketch of the Physical Geography and Geology of Canada," 1884; and (with Dr. W. F. Tolmie) of "Comparative Vocabularies of the Indian Tribes of British Columbia, with an Ethnological Map," 1884. Since 1884 he has been occupied with the Geological Survey of British Columbia, on which he has published several reports, the most important of which is that on the Yukon District, on the confines of British Columbia and Alaska, 1888. He is President for 1890 of the Natural Science Section of the Royal Society of Canada; in which capacity he delivered an address on the "Later Physiological Geology of the Rocky Mountains of Canada." (Trans. R.S.C. 1890.)

DAWSON. Vice-Chancellor Sir John William, C.M.G., LL.D., F.R.S., F.G.S., a geologist and naturalist, was born at Pictou, Nova Scotia, in Oct., 1820. He studied in the University of Edinburgh, and returning home devoted himself to the study of the natural history and geology of Nova Scotia and New Brunswick. The results of these investigations are embodied in his "Acadian Geology," 3rd edit., 1878. In 1842, and again in 1852, he accompanied Sir Charles Lyell in his explorations in Nova Scotia, aiding him materially in his investigations. Since 1843, he has contributed largely to the "Proceedings" of the London Geological Society, and to scientific periodicals. He has also published numerous monographs on special subjects connected with geology, more especially on the Land Animals and Plants of the Palæozoic Period. His two volumes on the "Devonian and Carboniferous Flora of Eastern North America," published by the Geological Survey of Canada, are among the most important contributions yet made to the palæozoic botany of North America; and he is the discoverer of the Eozoön Canadense, of the Laurentian limestones, the oldest known form of animal life. In 1850 he was appointed Superintendent of Education for Nova Scotia, and in 1855 became Principal of the McGill University at Montreal, of which he is now Vice-Chancellor. He is a member of many learned societies in Europe and America. Among his works not already mentioned are:—"Archæia, or Studies on the Cosmogony and Natural History of the Hebrew Scriptures," 1858; and "The Story of the Earth and Man," 1872; in which he combats the Darwinian theory of the origin of species. In 1875 he published

"The Dawn of Life,"—an account of the oldest known fossil remains, and of their relations to geological time and the development of the animal kingdom. In 1877 appeared "The Origin of the World," and in 1878 "Fossil Men and their Modern Representatives." In 1880 appeared "The Chain of Life in Geological Time,"—a sketch of the origin and succession of animals and plants. He has also contributed largely to the *Canadian Naturalist*, and *Canadian Record of Science*, and to many educational, scientific, and religious publications in Great Britain, the United States, and Canada. In 1882 he received the Lyell medal of the Geological Society of London for eminent geological discoveries, was created a Companion of the Order of St. Michael and St. George, was selected by the Governor-General, the Marquis of Lorne, to take the (first) Presidency of the Royal Society of Canada, and was President of the American Association for the Advancement of Science. In the following year he attended the meeting of the British Association at Southport, and travelled in Egypt and Syria, on the geography and geology of which he has published several papers and a little popular work, "Egypt and Syria, their Geology and Physical Geography in relation to Bible History." He received the degree of LL.D. from the University of Edinburgh, and was knighted by Her Majesty in 1884, and in 1885 was elected President of the British Association for the Advancement of Science for the meeting at Birmingham in 1886, and at that meeting he delivered a remarkable address, taking for his subject the geological history of the Atlantic Ocean. He has been elected an honorary Fellow of the Geological Society of Edinburgh and honorary member of the philosophical societies of Liverpool, Glasgow, Manchester and Leeds. Sir W. Dawson's more recent works are:—"Modern Science in Bible Lands," London, 1888; "The Geological History of Plants," International Scientific Series, 1888; "Modern Ideas of Evolution," London, 1890.

DAY, The Hon. Sir John Charles, son of Captain John Day, of the 49th Regiment, by Emily, daughter of Jan Caspar Hartsinck, was born at the Hague, June 20, 1826. He was educated at Fribourg, and at the Benedictine College of St. Gregory, at Downside, near Bath, and graduated B.A. at the University of London. He entered the Middle Temple in 1845; was called to the Bar in Jan., 1849; joined the Home (now the South-Eastern) circuit was made a Queen's Counsel in 1872

and elected a Bencher of his inn in 1873. For many years he enjoyed a very extensive practice both in London and on circuit. In June, 1882, he was appointed a judge in the Queen's Bench Division of the High Court of Justice, in succession to Mr. Justice Bowen, who had been elevated to the Court of Appeal; and he received the usual honour of knighthood. Mr. Justice Day is the editor of the "Common Law Procedure Acts," and "Roscoe's Nisi Prius." In 1886 he was made President of the special Commission sent to inquire into the origin and circumstances of the Belfast riots. In 1889 he was one of the Judges on the Royal Commission in the Parnell inquiry.

DAY, The Right Rev. Maurice Fitzgerald, D.D., Protestant Bishop of Cashel, is the youngest son of the late Rev. John Day, rector of Kiltallagh, co. Kerry, by Arabella, daughter of Sir William Godfrey, of Bushfield, in the same county. He was born at Kiltallagh in 1816, and received his academical education at Trinity College, Dublin (B.A. 1838; M.A. 1858). For several years he was chaplain to St. Matthias, Dublin; was appointed Dean of Limerick, and vicar of St. Mary's, Limerick in 1868; and was chosen to succeed the late Dr. Daly in the united Sees of Cashel, Emly, Waterford, and Lismore, in March, 1872, the consecration ceremony being performed in St. Patrick's Cathedral, Dublin, on April 13.

DEACON, George Frederick, M.I.C.E., the eldest son of Mr. Frederick Deacon, of Maidenhead, was born at Bridgewater in the county of Somerset on July 26, 1843, and was educated at Heversham and Glasgow University. Having given proof of a strong taste for physical science and mathematics he was apprenticed, in 1859, to Messrs. Robert Napier & Sons, the eminent mechanical engineers of the Clyde. Glasgow University had then taken the lead in the establishment of a curriculum of engineering science, and in 1863 Mr. Deacon changed from the workshop to the University, where Macquorn Rankine held the Chair of Civil Engineering and Mechanics, and William Thomson (now Sir William) that of natural philosophy. In the first term, Mr. Deacon took several prizes and his work in the physical laboratories, especially in connection with submarine telegraphy, was of so valuable a kind that Sir William, then scientific referee to the Atlantic Telegraph Company, recommended him at the age of twenty-one to fill a remunerative office in that company. This change prevented the completion of his Uni-

sity course; but Professor Rankine has recorded the fact that he highly distinguished himself. Mr. Deacon now inspected the manufacture, in the contractors' works at Greenwich, of the first successful Atlantic cable, and in the expedition of 1865 accompanied the Great Eastern to lay it. The temporary loss of this cable, its remarkable recovery, repeated loss, its abandonment until the following summer, the subsequent lifting of the broken end, and its completion and success, are now matters of history. In the autumn of 1865 Mr. Deacon's services were again sought for Atlantic work; but a business engagement previously made prevented his further connection with the company, and he commenced practice in Liverpool as a consulting Civil and Mechanical Engineer. His practice related chiefly to hydraulic engineering, to drainage, and to combustion, and he was consulted upon matters connected with the Mersey Estuary of which he subsequently made a special study. In 1869-70 he was lecturer on Civil Engineering and Mechanics at Queen's College, Liverpool. In 1871 Mr. James Newlands, the Borough Engineer, and Mr. Thomas Duncan, the Waterworks Engineer of Liverpool, having died, their offices were amalgamated, and out of a large number of candidates, Mr. Deacon, at the age of twenty-eight, was unanimously appointed to the joint office. Under him the reconstruction of the sewers, of the pavements, and of the tramways of Liverpool was rapidly undertaken. The supply of water, though good in quality, had become insufficient in quantity, and from the year 1865 only an intermittent supply could be afforded. Mr. Deacon's invention, now widely known as the differentiating waste-water meter, and applied to about six millions of persons, showed conclusively that the whole difficulty arose from leakage. By its aid the waste was automatically recorded, its localities separately detected, and, without any additional water, the Liverpool people were, before the end of 1875, in possession of a constant supply under higher pressure than before. Between 1873 when this work was begun and 1890, the population supplied has increased by 218,000 persons, and the value of the water saved from leakage and supplied to this additional population is estimated at considerably over £50,000 per annum. During Mr. Deacon's tenure of the office of Borough Engineer, which he resigned in 1881, the zymotic death-rate of Liverpool decreased about 34 per cent., a result which is still substantially maintained. The rapid growth of population had made it neces-

sary to seek for an additional supply of water, and after investigating, at the instance of the Liverpool Corporation, the lake district of Cumberland and Westmoreland, North Lancashire, and Wales, Mr. Deacon, in the beginning of 1877, projected his great scheme of water supply, involving the restoration of an ancient lake—now known as Lake Vyrnwy—in Montgomeryshire, and the construction of an aqueduct 76 miles in length therefrom to Liverpool. The project received the support of Mr. Bateman and Mr. Hawksley, and from the autumn of 1879 until 1885 Mr. Hawksley was associated with Mr. Deacon in the undertaking, now, 1890, nearly completed under Mr. Deacon. He has been a successful inventor:—apparatus for smoke prevention, mechanical stoking, and grain drying; tramways, air vessels, differentiating meters, mechanical integrators, recording tide gauges, sewage meters, reducing valves and heat engines, have in turn been the subjects of his patents. He has received, among others, the Telford and the Watt medals of the Institution of Civil Engineers; he is the author of many scientific and engineering papers, and is a member of the Institution of Civil Engineers, of the Institution of Mechanical Engineers, of the Iron and Steel Institute and of other scientific societies, and past President of the Association of Municipal and Sanitary Engineers.

DEAKIN, Alfred, was born in Melbourne, 1856, and is the son of William Deakin, a well known coach proprietor in the early days of the colony, and of Sarah Deakin, daughter of a Monmouthshire farmer. He was educated at the Church of England Grammar School, Melbourne, and at Melbourne University; became a barrister-at-law in 1877; journalist also till 1883; was elected for West Bourke in Feb., 1879, but owing to an informality at one polling place, which occasioned much ill-feeling, resigned and was defeated by 15 votes on a heavy poll in August, 1879; and was again defeated early in 1880; but was returned at the head of the poll six months later and continued to represent that constituency until it was divided in 1889, when he was returned for Essendon and Flemington, a portion of the same district. He joined the Service-Berry Ministry in March, 1883, as Minister of Public Works and Water Supply. In 1884 he exchanged the latter office for that of Solicitor-General. In 1886 was elected leader of the Liberal party, and joined Mr. Duncan Gillies in forming a Government, in which he still holds office as Chief Secretary, Minister

of Water Supply and Minister of Health. In 1885 he was appointed President of a Royal Commission on Water Supply, and in that capacity visited the United States, presenting upon his return an elaborate report upon irrigation as practised in the States, upon which Victorian legislation, introduced by himself, has since been largely founded. In 1887 he was the senior representative of the Colony at the Imperial Conference in London, when he was offered and declined the title of K.C.M.G. On the way thither he visited Egypt and Italy, and published a second report upon Irrigation as practised in those countries. He was the second Victorian delegate to the Australian Conference at Sydney on the Chinese question in 1888. In 1889 he was appointed a member of the Federal Council of Australasia, and took an active part in its session at Hobart in the same year. In 1890 he was one of the two representatives of Victoria at the Federation Conference held in Melbourne; and, later in the same year, was appointed one of the seven representatives of the Colony at the forthcoming Convention in the early part of 1891, which is entrusted with the task of framing a constitution for a Federal Australasian State for submission to the several Colonies.

DE AMICIS, Edmondo, a popular Italian writer, born at Oneglia, Oct. 21, 1846, of a Genoese family. He began his studies at Cuneo, and after a preliminary training in the Istituto Candallero at Turin, he entered the military school of Modena, which he quitted in 1865 as sub-lieutenant in the 3rd Regiment of the line. In 1866 he took part in the battle of Custoza. The following year he was established at Florence as Director of the *Italia Militare*. After the seizure of Rome by the troops of King Victor Emmanuel, it appeared to him that his career as a volunteer in the army of Italian independence had naturally come to an end. Weary of the monotony of garrison life, he then abandoned the profession of arms, took up his abode at Turin, and devoted his energies exclusively to literature, in which he had already made a mark by his sketches of military life—"La Vita militare: bozzetti" (Milan, 1868). After composing his "Ricordo del 1870-71," he wrote a volume of "Novelle," comprising "Gli Amici di Collegio," "Camilla Furio," "Un gran Giorno," "Alberto," "Fortezza," and "La Casa paterna" (Florence, 1872; 2nd edit. Milan, 1879). A series of tours through Spain, Holland, and Morocco, with visits to London, Paris, and Constantinople, afforded him the

material for several works which, written in a lively and attractive style, increased the author's fame, had a wide circulation, and were translated into several European languages. Their titles are:—"La Spagna" (Florence, 1873); "Ricordi di Londra," 1874; "Olanda" (Florence, 1874); "Costantinopoli" 6th edit., 2 vols., Milan, 1877-8); "Marocco" (Milan, 1879); "Ricordi di Parigi" (3rd edit., Milan, 1879). Of these the following have appeared at London in English versions by Caroline Tilton:—"Constantinople," 1878; "Morocco, its people and places," 1879; and "Holland," 1880. Signor De Amicis has also published "Ritratti letterari" (Milan, 1881), and "Poesie" (2nd edit., Milan, 1881).

DE CASSAGNAC, Paul Granier, son of Adolphe Granier de Cassagnac, born about 1840, became at an early age a contributor to the minor Parisian journals, and soon acquired notoriety by the fierceness of his personal attacks on his contemporaries and the numerous duels to which they gave rise. In 1866, under the auspices of his father, he joined the staff of *Le Pays*, of which soon afterwards he became the principal editor. Since then he has been perpetually embroiled in quarrels with his brother journalists and anti-Bonapartist politicians. It would be difficult to enumerate all the "affairs of honour" in which he has been engaged, but his duel with the late M. Gustave Flourens in 1863, may be mentioned as being one of the most desperate fought in recent times. M. Paul de Cassagnac was decorated with the Legion of Honour on the Emperor's fête-day in 1868, and in July, 1869, was elected a member of the Conseil Général for the department of Gers. On the declaration of war against Prussia in Aug., 1870, M. Paul de Cassagnac, who was still suffering from a recent wound in the chest, and who had just been appointed a Major of the Garde Mobile of the department of Gers, preferred to enrol himself as a volunteer in the first regiment Zouaves. Taken prisoner at Sedan, he was imprisoned eight months at Kösel in Silesia. On recovering his liberty he went to Venice for the benefit of his health; and afterwards established in the department of Gers, *L'Appel au Peuple*, a political journal which met with considerable success. Returning to Paris in Jan., 1872, he resumed the editorship of *Le Pays*. In July of that year he was condemned to a week's imprisonment, and to pay a fine of 100 francs in consequence of his duel with M. Lockroy. On July 7, 1873, he fought a duel on the Luxemburg frontier with M. Ranc, a Paris journalist, both

combatants being wounded, and M. Ranc disabled. He was tried in Paris, July 2, 1874, for the publication in *Le Pays* of articles calculated to disturb the public peace, and to stir up hatred and contempt between citizens. M. Paul de Cassagnac undertook his own defence and obtained a verdict of "Not Guilty," a result which was regarded by the Bonapartists as a signal triumph. In 1874 he published in his journal a series of violent articles in reference to the capitulation of Sedan, the whole responsibility of which was thrown on to General Wimpffen's shoulders. The General accordingly instituted a prosecution for libel in the Assize Court of the Seine, but M. Paul de Cassagnac was acquitted by the jury (Feb., 1875). On Nov. 24, 1875, he delivered, at a meeting at Belleville, a speech in which he contended that the restoration of the Empire was the essential condition of the welfare of the people. The *Pays* and other newspapers were prosecuted for printing a report of this discourse, but they were all acquitted. M. Paul de Cassagnac was returned to the National Assembly by the arrondissement of Condom in the department of Gers, at the general elections of Feb., 1876, and Oct., 1877. The latter election was annulled by the Chamber, Nov. 11, 1878, but in the following Feb. M. de Cassagnac was elected, as he has been at subsequent general elections. Of late years his fiery zeal has somewhat abated, chiefly on account of the unfortunate dissensions in the Bonaparte family.

DÉFREGGER, Franz, an Austrian painter, born at Stronach, in the Tyrol, April 30, 1835, showed from his infancy a strong inclination for artistic pursuits, and received his first lessons from a sculptor at Innsbrück in 1860. Then he went to Munich, entered the School of Arts there, and continued his artistic studies under the direction of Piloty. In 1863 he proceeded to Paris, where he stayed two years, and then returned to Munich, where he painted a series of genre pictures, representing the life of the people in his native country. Among his works may be mentioned "The Last Return of the Forester;" "The Poachers;" "Joseph Speckbacher and his Son;" and the "Zither Player." In 1882 the King of Bavaria raised this celebrated painter to noble rank, by bestowing on him the Bavarian Order of the Crown.

DE FREYCINET, Charles Louis de Saulces, French senator and engineer, was born at Foix, Nov. 14, 1828. He received his professional training in the

Polytechnic School, was fourth in the examination for the Corps des Mines in 1848, and was employed by the Government in the same year on several important public works. Appointed engineer of the mines at Mont-de-Marsan, he was, in the regular course of promotion, transferred to Chartres in 1854, and to Bordeaux in 1855. In the latter year he was appointed chief engineer to the Compagnie du Chemin de Fer du Midi; and during the five years of his tenure of this important post, he gave to the "Compagnie du Midi" a typical organization which the other French railway companies did not fail to imitate. M. de Freycinet was next employed by the Government in various scientific or industrial missions in France and in foreign countries. In 1861 he was nominated ordinary engineer of the first class, and he was likewise a member of the Conseil Général of the department of Tarn-et-Garonne, when the war of 1870 broke out. After the revolution of Sept. 4, he was appointed Prefect of Tarn-et-Garonne. On the 10th of Oct. following, M. Gambetta having taken possession, in the provinces, of the office of Minister of War, chose M. de Freycinet as his delegate, and entrusted him with the supreme control of that department. On the conclusion of peace M. de Freycinet retired for a time from public life. He was elected a senator by the department of the Seine, Jan. 30, 1876, being placed first on the list of successful candidates; his term of office expired in 1882. When the Dufaure Ministry was formed in Dec., 1877, he accepted the portfolio of Public Works. On May 8, 1878, he was elected a member of the Academy of Sciences as successor to M. de Bussy. His former studies on water supply, sewage, and engineering won for him this distinction. M. de Freycinet continued in his office of Minister of Public Works in the Cabinet presided over by M. Waddington (Feb. 4, 1879), after M. Grévy had succeeded Marshal MacMahon as president of the Republic. At the close of that year (Dec. 27), he was appointed President of the Council in place of M. Waddington, and he took the portfolio of Foreign Affairs. He resigned Sept. 19, 1880, in consequence of the difficulties relative to the execution of the decrees against the unauthorized religious Orders; and M. Jules Ferry was then entrusted with the formation of a new Cabinet. In Jan., 1882, M. Gambetta's Ministry was overthrown on the *Scrutin de Liste* proposal, by a majority in the Chamber of 305 to 110. M. de Freycinet was then recalled to power, and again held, with the Presi-

dency of the Council, the portfolio of Foreign Affairs. His proposals for safeguarding the Suez Canal were rejected by a majority of 416 to 75 (July 29). The Ministry at once resigned, and, as the Chamber had declared in the plainest possible terms against intervention in Egypt, France became a passive spectator of England's action. After M. de Freycinet's resignation, President Grévy, after many difficulties, succeeded in forming a "Ministry of Affairs" under M. Duclerc. Then followed the second Government of M. Ferry, who in his turn was succeeded by M. Brisson; and he, after a short and feeble tenure of office, gave place to M. de Freycinet, who took the Presidency of the Council and the Ministry of Foreign Affairs. He went out of office in Dec., 1886, and was succeeded by M. Goblet. He became Premier in March, 1890. M. de Freycinet is the author of "*Traité de Mécanique rationnelle*," 2 vols., 1858; "*De l'Analyse infinitésimale*," 1860; "*Des Pentes économiques en Chemin de Fer*," 1861; "*Emploi des Eaux d'Egout en Agriculture*," 1869; "*Principes de l'Assainissement industriel*," 1870; and "*La Guerre en Province pendant la Siège de Paris*," 1871.

DE GIERS, Nicholas Carlovitch, a Russian statesman of Swedish origin, was born May 9 (O.S.), 1820. After passing through the course of science at the Imperial Lyceum of Czarskoe Selo, he entered the Asiatic Department of the Ministry of Foreign Affairs, being then 18 years of age. In 1841 he was attached to the Russian Consulate in Moldavia, and in Sept., 1848, he was sent by Imperial order to the head-quarters of the Russian troops in Transylvania during the Hungarian campaign, as a diplomatic official under the Commander-in-Chief, General Lueders. For his untiring industry and the zealous fulfilment of his duties in this capacity, he was made a Court Councillor, and received the Order of St. Stanislas of the fourth class. On his return from Transylvania in 1850, he was sent as First Secretary of Embassy to Constantinople; and thence, in 1853, he was transferred to Roumania as Director of the Chancery of the Commissary-Plenipotentiary in the then Principalities of Wallachia and Moldavia, where he remained 12 months. On war breaking out with Turkey, he was attached to the Ministry of Foreign Affairs, and despatched in 1855, with important instructions, to the Governors-General of New Russia and Bessarabia. In 1856 he was created a Councillor of State and

appointed Consul-General to Egypt; and after two years, in the same capacity to Wallachia and Moldavia, receiving the title of Actual Councillor of State. For his many important services at the latter post, during a period of five years, the Emperor decorated him with the Order of St. Anne of the first class. On Aug. 1, 1863, he was made Ambassador Extraordinary and Minister Plenipotentiary at Teheran, where he remained till 1869. His residence at the Persian Court is said to have greatly contributed towards the consolidation of its friendly relations with Russia. He was then made Privy Councillor, and decorated with the insignia of St. Vladimir of the second class. M. de Giers was appointed in 1869 Minister at Berne, where he remained three years (being succeeded by the son of Prince Gortchakoff); and was then transferred in the same capacity to Stockholm in the room of M. Daschakoff. While acting as Ambassador in Sweden he received the high Russian Orders of the White Eagle and St. Alexander Nevsky. When the Swedish King went to Russia in 1875, Privy Councillor de Giers was called to St. Petersburg and remained near his Majesty throughout his stay. Soon afterwards, in Dec. 1875, he was appointed Adjunct to the Minister of Foreign Affairs and Director of the Asiatic Department, with a seat in the Senate. In this capacity he had to direct his attention to the controversies which periodically arise in Central Asia between Russia and England; and he generally contrived to terminate any negotiations on such subjects to the advantage of the former Power. In 1876 the direction of foreign affairs was altogether confided to him during the absence of Prince Gortchakoff; and again, in 1877, for seven months, during the war with Turkey. The late Emperor, on returning from Bulgaria, expressed his thanks to M. de Giers for his able direction of the Ministry; and created him an Actual Privy Councillor. While Prince Gortchakoff was attending the Berlin Congress, M. de Giers for the third time took his place; and as the Imperial Chancellor was never afterwards able to transact business for any long period, and was almost constantly abroad for the sake of his health, it may be said that from the conclusion of the Treaty of Berlin, M. de Giers was, to all intents and purposes, the sole guardian of the foreign affairs of Russia. In April, 1882, on the retirement of Prince Gortchakoff, he was advanced to the post of Minister for Foreign Affairs. As such he has paid frequent visits to Prince Bismarck, and has attended the Czar at his interviews

with the German and Austrian Emperors. M. de Giers is married to the Princess Kantakuzene, who is the niece of Prince Gortchakoff.

DE HAAS, Maurits F. H., marine painter, was born at Rotterdam, Dec. 12, 1832. He studied at the Academy of Fine Arts, and was a pupil of Louis Meyer, and of other eminent artists. In 1857 he was made artist to the Dutch navy, and in 1859 he went to New York, where he has since lived. The subjects of his earlier pictures are chiefly from the English Channel and French Coast; and among them are "Storm off the Isle of Jersey," "After the Wreck," "Seashore near Hastings," "Calm off Newport," "Wreck off St. Heliers," "Yacht Henrietta," "Clearing Up," "British Channel," "The Rescue," "The Old Wreck," and "Moonrise at Sunset." His best known American work is "Farragut passing the Forts." He was elected an Associate of the National Academy in 1863, and an Academician in 1867, and was one of the original members of the American Society of Painters in Water-Colours.

DELAND, Margaretta Wade, *née* Campbell, an American writer, was born at Alleghany, Pennsylvania, Feb. 23, 1857. She was educated at Pelham Priory, New Rochelle, N.Y., then studied at Cooper Union (N.Y. City) and in 1878-79 taught industrial design in the girls' Normal College, at New York. In 1880 she was married to Lorin F. Deland, of Boston, Massachusetts. She has published "The Old Garden and other Poems," 1886; "John Ward, Preacher," 1888; a novel which has attracted very much attention, and "Florida Days," 1889. Another story by her entitled "Sidney," is now (1890) running in the *Atlantic Monthly*.

DENISON, The Ven. George Anthony, Archdeacon of Taunton, fourth son of the late John Denison, Esq., M.P., (brother of the late Viscount Ossington, Speaker of the House of Commons, 1857-72, of the Bishop of Salisbury, 1837-54, and of the late Sir William Denison, K.C.B., Governor of Tasmania, Sydney, and Madras), was born in 1805. He was educated at Eton and Christ Church, Oxford, where he graduated B.A. in 1826, taking a first class in classical honours; in 1828 was elected Fellow of Oriel College; in the same year was University prizeman, gaining the Latin Essay, and the English Essay in 1829. He was curate of Cuddesdon, Oxfordshire, from 1832 to 1838; married in 1838, Georgiana, eldest daughter of

the Right Hon. J. W. Henley, M.P. for Oxon; and became vicar of Broadwindsor, Dorset, whence he was transferred, in 1845, to the vicarage of East Brent, Somerset, and became Examining Chaplain to the Bishop of Bath and Wells, who advanced him in 1851 to the Archdeaconry of Taunton. He has been an active member of the London and Bristol "Church Unions," and a strong opponent of all schemes of Government education. In 1853, in consequence of a charge of unsound doctrine publicly made against him by Bishop Spencer, who was at that time discharging the functions of the Bishop of Bath and Wells, the Archdeacon resigned his Examining Chaplaincy, and preached in the Cathedral at Wells three sermons on "The Real Presence," which he published as his defence. Proceedings were taken against him on account of matter contained in those sermons, in Jan., 1854. In 1856 the Archdeacon was sentenced to deprivation of all his preferments by judgment of a court held at Bath, and presided over by the then Archbishop of Canterbury. This sentence was set aside, upon appeal to the Court of Arches, on a point of law; and the judgment of the Court of Arches was confirmed, on further appeal, by the Judicial Committee of the Privy Council, Feb. 6, 1858. The Archdeacon was editor of the *Church and State Review*, from its establishment in 1862 till Aug., 1865; and, as a member of the Lower House of Convocation in 1861 and 1864, was Chairman of the Committees, the Reports of which issued in the condemnation of "Essays and Reviews," and of Dr. Colenso's published writings. Archdeacon Denison published his autobiography under the title of "Notes of my Life," 1878. After the election of 1885, the Archdeacon published in December a pamphlet, "Mr. Gladstone;" in its seventh thousand, March, 1886.

DENMAN, The Hon. George, is the fourth son of Thomas, first Lord Denman (who was many years Chief Justice of the Court of Queen's Bench), by Theodosia Anne, eldest daughter of the late Rev. Richard Ververs, rector of Kettering, Northamptonshire. He was born at No. 50, Russell Square, London, Dec. 23, 1819, and was educated at Repton Grammar School, whence he proceeded to Trinity College, Cambridge, of which he was successively Scholar and Fellow. He took his B.A. degree in 1842 as "Captain of the Poll." He was also Senior Classic. As the son of a peer he was exempted from the general rule then in force, which made a place in the mathematical

tripos a necessary qualification for competing for classical honours. He proceeded M.A. in 1845, was called to the Bar at Lincoln's Inn in 1846, and went the Home circuit. He held for some years the office of auditor of his former college. In 1857 he was appointed one of the University counsel. Mr. Denman unsuccessfully contested the University of Cambridge in 1856 and the borough of Tiverton in 1865. He was first elected member for Tiverton as Lord Palmerston's colleague in the Liberal interest in May, 1859, and represented the borough from that time until 1872, with the exception of a very brief interval in 1865-66, when he was out of Parliament. He promoted and carried a Bill in 1864 for assimilating the law on criminal trials to that on civil trials in certain matters of evidence and practice; and in 1869 a Bill for further amending the law of evidence by abolishing the disqualification of witnesses for want of religious belief and on other grounds. Mr. Denman was appointed one of the new governing body of the Charterhouse School in 1872. In Oct., 1872, he was chosen to succeed to the vacancy caused in the Court of Common Pleas by the death of Mr. Justice Willes. Being the son of a peer he did not receive the customary honour of knighthood, according to the precedents in such cases. In Nov., 1875, by the operation of the Judicature Act, he became a Judge of the High Court of Justice. He published in 1871 a translation of "Gray's Elegy" into Greek elegiac verse; and in 1873 "The First Book of Pope's Homer's Iliad, translated into Latin elegiacs." He married in 1852 Charlotte, daughter of the late Mr. Samuel Hope, banker of Liverpool, by whom he has a numerous family. His eldest son, George Lewis, born in 1854, was appointed one of the Police Magistrates of the Metropolis in 1890, and sits at the Wandsworth Police Court.

DENMARK, King of. See CHRISTIAN IX.

DENNING, William Frederic, F.R.A.S., was born at Braysdown, near Bath, Somerset, on Nov. 25, 1848. His father was Isaac Poyntz Denning (born in the East Indies in Dec., 1819), then manager of the Braysdown Collieries; but who in Jan., 1850, removed to Bristol, and became a public accountant. The son attended several private schools, and early evinced a love for natural history. In Oct., 1865, when acting as clerk to a manufacturing firm at Bristol, he was drawn to the study of astronomy not by any special

incident, or by the interest awakened by any celestial event, but by the mere bent of his inclination. He had probably inherited this taste from his mother, who had long been led to "consider the heavens," and had first aroused in him that love for science which developed itself in his after life. Procuring some lenses he soon constructed a small telescope, and commenced that observational work which he pursued with so much diligence in later years. His father encouraged these initiatory efforts by presenting him with a three-inch refracting telescope, and afterwards with one of $4\frac{1}{2}$ inches. The latter was superseded by a 10-inch reflector by With and Browning in 1871, and this has since formed the chief working instrument of Mr. Denning. He has effected many planetary observations, and obtained some interesting facts with regard to the varieties and motions of the spots on Jupiter. On the morning of Oct. 4, 1881, he discovered a periodical comet of $8\frac{1}{2}$ years, which is now called by his name. Mr. Chambers in the new edition, 1890, of his large work on "Descriptive Astronomy," states that this is the first comet of short period discovered by an Englishman. Another comet was discovered by Mr. Denning on July 23, 1890. Mr. Denning's chief work has, however, been effected in the field of meteoric astronomy. For many years he watched the fall of meteors and recorded their numbers and directions. A large quantity of materials was accumulated in this way, and in May 1890, a paper by Mr. Denning was published by the Royal Astronomical Society in which he gave the positions of 918 radiant points of meteor showers. No other observer has obtained so extensive results in this branch of astronomy. In 1877 he discovered that the August meteors (called "Perseids") present a radiant which changes its position, from night to night, amongst the fixed stars, and he subsequently detected many showers of long duration. Mr. Denning has written about sixty papers which have been printed in the Monthly Notices of the Royal Astronomical Society, and he has been a very frequent contributor to English and foreign scientific journals. He acted as President of the Liverpool Astronomical Society in 1887-8, and is the author of a work now in the press entitled "Telescopic Work for Starlight-Evenings." He became a Fellow of the Royal Astronomical Society in June, 1877, and was elected an honorary member of the Liverpool Astronomical Society in 1882.

DEPEW, Chauncey Mitchell, LL.D., American lawyer, was born at Peekskill, New York, April 23, 1831. He graduated at Yale College in 1856; studied law, and was admitted to the Bar. In 1861-62 he was a member of the New York Assembly, and from 1863-65 was New York Secretary of State, an office to which he declined a re-election. He was also a tax-commissioner for New York city, and for a brief time Minister to Japan. In 1866 he became attorney for the New York and Harlem Raised Railway Co., and on its consolidation, in 1869, with the New York Central Raised Railway Co. he was appointed the general counsel of the united companies. He was the candidate of the Liberal Republican Party in 1872 for the Lieut.-Governorship of the State, but was not elected. The Legislature, in 1874, chose him a Regent of the State University, and he was also placed on the Commission for building the Capitol at Albany. He was a prominent candidate in 1877 for election to the United States Senate, but after a prolonged contest withdrew in favour of Mr. Warner Miller. In 1882 he became Second Vice-President of the New York Central Raised Railway, and since 1885 has been its President. He is also President of the West Shore Raised Railway, and of the Union League Club of New York. Mr. Depew is distinguished not only as an eminently successful railway manager, and as a prominent leader of his political party, but also as one of the most popular speakers of his country, his orations on public occasions and his after-dinner addresses being in great demand. In 1887 the degree of LL.D. was conferred upon him by Yale College. A volume of his "Orations and After-dinner Speeches" was published in 1890.

DERBY, Bishop of. See WERE, THE RT. REV. EDWARD ASH.

DERBY (Earl of), The Right Hon. Edward Henry Stanley, eldest son of the fourteenth earl of Derby, born at Knowsley, July 21, 1826, was educated at Rugby and at Trinity College, Cambridge, where he took a First Class in Classics in 1848. His lordship, who was an unsuccessful candidate for Lancaster in March, 1848, was during his absence in America elected Lord G. Bentinck's successor for Lynn Regis, which he continued to represent as Lord Stanley until he succeeded to the peerage. He paid a visit to the East, and, when in India, was nominated, in March, 1852, Under Secretary of State for Foreign Affairs in his father's first administration. The death

of Sir W. Molesworth, in 1855, having created a vacancy in the Colonial Office, Lord Palmerston offered him the seals of that department; but the latter remained true to his party, and declined the tempting proposal. He became Secretary of State for India, with a seat in the Cabinet, under his father's second administration, in 1858-9, and it was under his superintendence that the management of our Indian empire was transferred from the Board of Directors of the East India Company to the responsible advisers of her Majesty. His lordship was appointed Secretary of State for Foreign Affairs in his father's third administration, in July, 1866. He held the seals of the Foreign Office until the accession of Mr. Gladstone to power in Dec. 1868. His lordship was installed Lord Rector of the University of Glasgow, April, 1, 1869. The death of his father on Oct. 23, 1869, transferred him to the House of Peers, and he has since taken a prominent part in the discussions of that assembly. In Feb. 1874, when Mr. Disraeli formed his cabinet, Lord Derby was again entrusted with the seals of the Foreign Office, which he held until March 28, 1878, when he resigned the office of Secretary of State for Foreign Affairs. In April, 1879, Lord Derby withdrew from the Lancashire Union of Conservative Associations in consequence of his disapproval of the foreign policy of the Government and his desire to remain aloof for a time from all party obligations; and in Oct. 1879, it became known that he had detached himself definitively from the Conservative organisation. In a letter addressed to the Earl of Sefton, March 12, 1880, Lord Derby wrote:—"I have long been unwilling to separate from the political connection in which I was brought up, and with which, notwithstanding occasional differences on non-political questions, I have in the main acted for many years. But the present situation of parties and the avowed policy of the Conservative leader in reference to foreign relations leave me no choice. I cannot support the present Government, and as neutrality, however much I might from personal feelings prefer it, is at a political crisis an evasion of public duty, I have no choice except to declare myself, though reluctantly, ranked among their opponents." He was sworn in as Secretary of State for the Colonies, in Mr. Gladstone's administration, Dec. 16, 1882, and held that office until July, 1885. In 1886, however, he took the Unionist side in the Irish Question. The

Earl of Derby was elected Lord Rector of the University of Edinburgh in Nov. 1874. Before his succession to the peerage his lordship served as a member of the Royal Commission on Army Purchase in 1856-7; of the Cambridge University Commission in 1856-60; of the Commission on the Organization of the Indian Army in 1858-9; Chairman of the Commission on the Sanitary State of the Indian Army in 1859-61; of the Commission on Patents in 1863-4; of the Commission on City Guilds in 1881-2; and of the Commission on Market Rights and Tolls, 1888-90.

DERRY and RAPHOE (Bishop of). See ALEXANDER, The Right Rev. WILLIAM.

DERVISH PACHA, a Turkish General and diplomatist, was born in the year 1223 of the Hegira (1817), at Eyoub, a suburb of Constantinople, where his father exercised the functions of an Imam and primary school teacher. At the age of twelve he entered the Preparatory School of Engineering which had been recently founded by the Sultan Mahmoud. He was one of the Turkish youths sent to Europe by that monarch to make special studies, in 1837. After spending several years in England, he proceeded to Paris, where he attended from 1839 to 1842 the lectures in the School of Mines. On his return to his native country he was nominated Engineer-in-Chief of the mines of Keban and Argana, in Asia Minor, and afterwards Professor of Chemistry and Physics in the Military School of Constantinople. At a somewhat later date he became Director of the same school, with the rank of General of Brigade. He was advanced to the grade of General of Division in 1849, and was appointed Ottoman Commissioner for settling the frontier line between Turkey and Persia. On his return from this mission, which lasted nearly four years, Dervish was sent to the Danubian Principalities (1854) in the capacity of Plenipotentiary, in order to reinstate the Hospodars, Hirbey and Ghika. The following year he was appointed Chief Commander of all the military schools of the Turkish Empire; and at the beginning of the year 1856 he was delegated by the Porte to attend the great council of war which had been summoned to assemble in Paris. After the treaty of March 30, he was nominated Commissioner of the Porte for the rectification of the frontiers of Bessarabia. When the new Sultan Abd-ul-Aziz created in Turkey a Special Administration of Mines and Forests, he entrusted the

direction of it to Dervish Pacha, Aug., 1861. The following year Dervish Pacha was engaged in the military operations which took place in Montenegro, and in concert with Hussein Pacha, he compelled, by a series of successful encounters in the field, the Prince Nicholas and his father Miako to sign the peace of Scutari in Aug., 1862. In Feb., 1866, he was sent to Syria as special commissioner charged with the pacification of the Lebanon. In the Russian war of 1878 Dervish Pacha was engaged in the military defence of Batoum, then besieged by the Russians, under Prince Mirsky. The siege was effectually repulsed; but it was finally stipulated by the treaty of peace concluded at Constantinople that Batoum should be ceded to Russia. The civil governor of Batoum, however, incited by the Lazis, 10,000 of whom were in arms, to defend the place, refused to surrender it to the enemy; and it became the task of Dervish Pacha to put down the Lazis, and to deliver Batoum over to the Russians. Two years later, in 1880, he was called upon to perform a very similar act in the case of Dulcigno. The Albanian League were in arms to prevent the delivery of that Adriatic seaport to Montenegro in accordance with the decision of the European Conference. The repugnance of Turkey to execute this promise was at last overcome either by the naval demonstration in the Adriatic, or by a menace of the seizure of the Customs' revenues at Smyrna; and Dervish Pacha was then sent with a large Turkish force to put down the Albanian League. On April 20, 1881, the opposition of the Albanians was completely crushed by the decisive victory he gained over 10,000 troops of the League; and the rebellious Beys of Albania were mulcted in heavy sums of money, with which the Porte was content. At the beginning of June, 1882, a week before the deplorable riot and massacre at Alexandria, the Sultan of Turkey sent Dervish Pacha as special commissioner to Egypt to settle the dispute between the Khedive, Tewfik Pacha, and Arabi Pacha, leader of the military party, who had again forced himself on the Khedive as Minister of War.

DESCHANEL, Émile Martin, was born at Paris, Nov. 14, 1819, and, after a brilliant course of study at the Collège Louis-le-Grand, was appointed Professor of Rhetoric at the Collège of Bourges; shortly afterwards he returned in the same capacity to Paris. He wrote successively for the *Revue Indépendante*,

the *Revue des Deux Mondes*, and the *National*, and several articles on literary criticism for *La Liberté de Penser*. To this last-named journal he contributed also a series of essays on politics and social philosophy, entitled "Catholicisme et Socialisme," and in consequence was cited to appear before the Council of Public Instruction, and, in spite of an eloquent appeal, was suspended from all his offices. He then gave his entire energies to the republican press. On Dec. 2, 1851, he was arrested, imprisoned for some time, and subsequently banished. Until 1859 he resided in Brussels, when he returned to France and became one of the editors of the *Journal des Débats*. In 1869 he joined the staff of the *National*. At the general elections of Feb., 1876, M. Deschanel was returned for the Seine, and after the Act of May 16, 1877, he was one of the 363 deputies who refused a vote of confidence in the Broglie Ministry. He is the author of "Les Courtisanes de la Grèce," 1854; "Histoire de la Conversation," 1858; "La Vie des Comédiens," 1860; "Physiologie des Ecrivains et des Artistes," 1864; "Etudes sur Aristophane," 1867; "A Bâtons Rompus," 1868; "Les Conférences à Paris et en France," 1870; "La Question des Femmes et la Morale laïque," 1876; "Le Peuple et la Bourgeoisie," 1881; "Le Romantisme des Classiques," 1883. He contributes to the *Indépendance Belge* under the signature of **ΔΕΖ**. In June, 1881, he was elected a Life Senator and Honorary Professor of French Literature at the Collège de France.

DE STAAL, Georges, entered the diplomatic service as Secretary of Embassy at Constantinople. He subsequently became Minister to the Court of Würtemberg, and was thence transferred to London as Russian Ambassador in July, 1884. He, with M. Lessar as special coadjutor, had the management of the delicate diplomatic negotiations that attended the despatch of the Afghan Frontier Commission, the "unfortunate incident" of Penjdeh, &c.; and those also which followed the various crises in Bulgarian Affairs, 1885-6.

DE VERE, Aubrey Thomas, a poet and political writer, third son of the late Sir Aubrey de Vere, Bart., of Curragh Chase, co. Limerick, was born in 1814, and educated at Trinity College, Dublin. He has published "The Waldenses; or the Fall of Rora; a lyrical tale," 1842; "The Search after Proserpine, and other Poems," 1843; "Poems, Miscellaneous and Sacred," 1853; "May Carols," 1857

and 1881; "The Sisters; Inisfail; and other Poems," 1861; "The Infant Bridal, and other Poems," a selection from his poetry, 1864; "Irish Odes and other Poems," 1869; "The Legends of St. Patrick," 1872; "Alexander the Great, a Dramatic Poem," 1874; "St. Thomas of Canterbury, a Dramatic Poem," 1876; "Legends of the Saxon Saints," 1879; "The Foray of Queen Meane, and other Legends of Ireland's Heroic Age," 1882; "Legends and Records of the Church and the Empire," 1887; "St. Peter's Chains," 1888. His prose works are: "English Misrule and Irish Misdeeds," 1848; "Picturesque Sketches of Greece and Turkey," 2 vols., 1850; "Ireland's Church Property and the right use of it," 1867; "Pleas for Secularization," 1867; "The Church Establishment of Ireland," 1867; "The Church Settlement of Ireland, or Hibernia Pacanda," 1868; "Constitutional and Unconstitutional Political Action," 1881; "Essays chiefly on Poetry," 2 vols., 1887; "Essays chiefly Literary and Ethical," 1889. He edited in 1878 a correspondence on religious and philosophical subjects, under the title of "Proteus and Amadeus."

DEVONSHIRE (Duke of), William Cavendish, K.G., F.R.S., D.C.L., grandson of the late Earl of Burlington, was born April 27, 1808, and educated at Trinity College, Cambridge, where he graduated M.A. as second wrangler and Smith's prizeman in 1829, in which year he was returned as one of the members for the University of Cambridge. Rejected by this constituency in 1830, Lord Cavendish was returned for Maldon, and represented North Derbyshire from 1832 till he succeeded to the title of Earl of Burlington in May, 1834. Lord Burlington, who was Chancellor of the University of London from 1836 to 1856, succeeded his cousin in the dukedom, Jan. 17, 1858. His grace was appointed Lord-Lieutenant of Derbyshire in 1858, and succeeded the late Prince Albert as Chancellor of the University of Cambridge in 1862. The duke has done much to improve and develop his property at Eastbourne and Barrow-in-Furness; and, like his predecessor, he is a great patron of the fine arts and of literature. He has taken little part in politics, but he recently accepted the position of chairman of the Irish Loyal and Patriotic Union. His eldest son is the Marquis of Hartington.

DEWAR, Professor James, M.A., F.R.S., F.R.S.E., was born in 1842 at Kincardine-on-Forth, Scotland, and was educated at Dollar Academy and the University of

Edinburgh. He was assistant to Sir Lyon Playfair, when Professor of Chemistry in the University of Edinburgh, from whom he received his chemical training. Subsequently he studied at Ghent, under the celebrated Professor Auguste Kekulé. He was Lecturer on Chemistry at the Dick Veterinary College, Chemist to the Highland and Agricultural Society, and Examiner in the Universities of London and Edinburgh. At present he is Jacksonian Professor of "Natural Experimental Philosophy" in the University of Cambridge, and Fullerian Professor of Chemistry in the Royal Institution of Great Britain. He is M.A., and Fellow of St. Peter's College, Cambridge, and F.R.S. of London and Edinburgh, Vice-President of the Chemical Society, &c. Professor Dewar is the author of papers on organic and physical chemistry, viz., on "The Oxidation Products of Picoline," "Transformation of Chinoline into Aniline," "Physical Constants of Hydrogenium," "Specific Heat of Carbon at High Temperatures," "The Physiological Action of Light," "Spectroscopic Investigations," &c. The Professor has taken an active part in the conduct of the recent Exhibitions, having occupied the respective positions of Chairman of the Heating and Lighting Jury of the Health Exhibition, and a member of the Executive Council of the Inventions Exhibition. During 1886 and 1887 he gave demonstrations at the Royal Institution to the Prince and Princess of Wales on the formation of Liquid Oxygen and Air and the production of temperatures approaching that of the absolute zero. He is a member of the Government Committee on Explosives, and, in association with Sir Frederick Abel, has made inventions with regard to Smokeless Powders, and their application to Military Purposes.

DHULEEP SINGH, The Maharajah, G.C.S.I., son of the famous Runjeet Singh, the Rajah of the Punjab, was born in 1838. Dhuleep was an infant when his father died, and the demoralized state of the regency and army induced the British ministry to annex the principality under certain conditions; one being that the young Maharajah should receive four lacs of rupees, equivalent to £40,000 sterling, per annum. Afterwards the Maharajah became a Christian, took up his abode in England, and was naturalized. His mother, the notorious Ranee, also resided in this country until her death in 1863, but resisted steadfastly all persuasion to become a convert to Christianity. It was at one time sup-

posed that the Maharajah would take for a wife the Princess Victoria of Coorg; but in 1864 he was married at the British Consulate at Alexandria, to a young Protestant lady, a British subject. She died in Sept. 1887; and in May, 1889, he married in Paris, Miss Ada Douglas Wetherill. The Maharajah purchased an estate near Thetford, where he resided for some years. In 1885 he presented to the British government a claim for increase of pension, payment of personal debts, and other things to which he considered himself entitled. This claim being disallowed, he left England for India, but was not permitted to land. The Maharajah Dhuleep Singh, having recently expressed deep regret for the course of hostility which he has pursued towards this country since 1886, her Majesty, by the advice of her Ministers, has been graciously pleased to accord her pardon to him. The Maharajah, who is recovering from a paralytic attack, will, it is believed, shortly return to England.

DIAZ, General Porfirio, Mexican soldier and statesman, was born at Oaxaca, Sept. 15, 1830. He was educated in his native city and began the study of law but abandoned it to enter the National Guards when the Americans invaded Mexico in 1847. In 1854 he joined in the insurrection against Santa Anna, and from that time until his election to the Presidency in 1876 was actively engaged in the many attempts against the various Governments, which in rapid succession tried to rule Mexico. During this period he displayed great abilities as a leader and military commander; and as early as 1861, at the request of Gen. Ortega, his superior officer, was made a General. Twice (1863 and 1865) he was taken prisoner, but each time effected his escape. His first administration as President was a stormy one, and much of his time was occupied in quelling revolts. At the end of his term (1880) he secured the election of Gen. Gonzalez (his Secretary of War) as his successor; and he himself took charge of one of the departments of the Government, and was also appointed Chief Justice of the Supreme Court, but never took his seat. When Gonzalez's term expired in 1884, Diaz was elected for a second term; and in 1888 was re-elected for a third term, which he is now (1890) filling. His administration on the whole has been a successful one. The country has become pacified, its trade increased, its resources developed, its education advanced, and its railroads and telegraphs extended.

DICEY, Edward, C.B., second son of the late T. E. Dicey, Esq., of Claybrook Hall, Leicestershire, was educated at Trinity College, Cambridge, where he took honours both in the mathematical and in the classical tripos. He has frequently contributed to the *Nineteenth Century*, *Fortnightly Review*, *St. Paul's*, and *Macmillan's Magazine*, and other periodicals, and was for some years a leader writer on the staff of the *Daily Telegraph*, for which he has acted as special correspondent in different parts of the continent. While travelling in the East, Mr. Dicey was asked to undertake the editorship of the *Daily News*. He held this post for about three months in 1870. Immediately on quitting the *Daily News*, Mr. Dicey was offered and accepted, the editorship of the *Observer*, a position which he held up to 1889. He is the author of "A memoir of Cavour;" "Rome in 1860;" "The Schleswig-Holstein War," 1864; "The Battlefields of 1866," published in 1866: "A Month in Russia during the Marriage of the Czarewicz," 1867; "The Morning Land," an account of three months' tour in the East, 1870; and "Victor Emmanuel" in the "New Plutarch Series," 1882. Mr. Dicey is an authority on Egypt, and has been a strong advocate of a British annexation of that country. He was made a C.B. in 1885. Of late he has taken much interest in South African affairs, and has recently paid a long visit to the Transvaal. His brother, Mr. Albert Dicey, is Vinerian Professor of English Law at Oxford, and is the author of a remarkable book on the British Constitution (1886).

DICKINSON, William Howship, M.D., was born June 9, 1832, at Brighton, and educated at Caius College, Cambridge, and St. George's Hospital, London. He is an Honorary Fellow of Caius College. After holding the offices of medical registrar and curator of the museum he became assistant physician to St. George's, then physician and lecturer on medicine. He was also in succession assistant physician, physician, and consulting physician to the Hospital for Sick Children. Dr. Dickinson held at different times the offices of Examiner in medicine to the Universities of Cambridge, London, and Durham, and the Colleges of Physicians and Surgeons. He was appointed in 1869 Secretary to the Pathological Society, and in 1889, President. In 1885, he became Censor to the College of Physicians. He has made researches in connection with pathology and other branches of medicine, of which the following are the more important:—On the Action of Digitalis upon the Uterus, describing for the first time

its contractile effect upon that organ (1855); on the Pathology of the Kidney, distinguishing disease of the intertubular structures from that of the tubes, and asserting the intertubular origin of granular degeneration (1859, 1860, 1861); on the Function of the Cerebellum, assigning to that organ an especial effect upon the lower limbs (1865); on the Nature of the so-called Amyloid or Lardaceous Degeneration, pointing out its connection with Suppuration (1867); on the Nature of the enlargement of the Viscera, which occurs in rickets, showing the affection of those organs to be analogous to that of the bones (1869); on the Futility of Counter-irritation as a Method of Treatment; on the Changes produced in the Nervous System by the Amputation of Limbs; on Chronic Hydrocephalus, pointing out the frequent origin of the disease in cranial relaxation; on Diabetes, showing the general presence of structural changes in the nervous system, and referring the symptoms to organic change, instead of, as hitherto, to functional derangement; on the Pathology of Tetanus and of Chorea, with reference to structural alterations in the nervous centres; on the Pathological Results of Alcohol; and on the Presystolic murmur falsely so-called. Most of the preceding papers are published in the Transactions of the Medico-Chirurgical Society. Dr. Dickinson is also the author of works on Albuminuria, Diabetes, and Renal and Urinary Affections, and of a course of Lumsden Lectures on "The Tongue as an indication in disease."

DICKSEE, Frank, A.R.A., son of Thomas Francis Dicksee, was born Nov. 27, 1853, and received his first artistic instructions from his father. In 1870 he became a student of the Royal Academy, and in 1872 obtained a silver medal for a drawing from the antique. In 1875 he gained the gold medal for an historical painting, "Elijah confronting Ahab and Jezebel in Naboth's Vineyard," and in the following year exhibited the picture. At that time he worked also at drawings for book illustrations and made some designs for stained glass. In 1877 he exhibited "Harmony," which was purchased by the trustees of the Chantry Bequest Fund; this was followed in 1879 by "Evangeline." He has since exhibited "The House Builders," 1880; "Portraits of Sir William and the Hon. Lady Welby-Gregory," "The Symbol," 1881; "The Love Story," 1881; "The Foolish Virgins," 1883; "Romeo and Juliet," 1884; "Chivalry," 1885, and "Memories," 1886. In

1887 "Hesperia;" in 1888 "Within the shadow of the Church;" in 1889 "The Passing of Arthur," and in 1890 "The Redemption of Tannhäuser." In 1881 he was elected an Associate of the Royal Academy.

DICKSON, General Sir Collingwood, R.A., F.C., G.C.B., entered the army, and became Second Lieutenant, Dec. 18, 1835; First Lieutenant, Nov. 29, 1837; Captain, April 1, 1846; Brevet Major, May 22, 1846; Brevet Lieut.-Colonel, June 20, 1854; Lieut.-Colonel, Feb. 23, 1856; Brevet Colonel, June 29, 1855; Colonel, April 5, 1866; Colonel-Commander, Nov. 17, 1875; Major-General, Aug. 24, 1866; Lieut.-General, June 8, 1876; General, Oct. 1, 1877. Sir Collingwood Dickson served on the staff of Lord Raglan during the Eastern Campaign, 1854-55, and was present at the affairs of Bulganac and M'Kenzie's Farm, the battles of Alma and Inkerman, the charge at Balaklava, the Expedition to Kertch, and the siege of Sebastopol (wounded Feb. 4, 1855). He commanded the right siege train, and was present at the bombardments of Oct. 17, April 9, and June 17 (medal with four clasps, C.B., Aide-de-Camp to the Queen, and Colonel, Victoria Cross, Officer of the Legion of Honour, 2nd Class of the Medjidieh, and Turkish Medal). He was awarded the F.C., "for having, on Oct. 17, 1854, when the batteries of the Right Attack had run short of powder, displayed the greatest coolness and contempt of danger in directing the unloading of several wagons of the field battery which were brought up from the trenches to supply the want, and having personally assisted in carrying the powder barrels under a severe fire from the enemy." Sir Collingwood is also a Knight of Charles the Third; 1st class St. Fernando; and Knight of Isabella the Catholic.

DILKE, The Right Hon. Sir Charles Wentworth, Bart., was born at Chelsea, Sept. 4, 1843, being the son of the late Sir Charles Wentworth Dilke, and grandson of Charles Wentworth Dilke, the critic, who both were noticed in previous editions of this work. He received his academical education at Trinity Hall, Cambridge, where he graduated as senior legalist in Jan. 1866. In the same year he was called to the Bar at the Middle Temple, and soon afterwards he proceeded to Canada and the United States, where he travelled alone for some months. At the end of Aug. 1866, he met at St. Louis Mr. Hepworth Dixon, with whom he crossed the Great Plains

and Rocky Mountains, and visited the Mormon cities. Parting at Salt Lake City from Mr. Dixon, who returned to England, and shortly afterwards dedicated to him "New America," Mr. Dilke passed on to Nevada and California, and after a considerable stay at San Francisco, sailed for Panama, and thence to New Zealand, Tasmania, and Australia, where he visited all the colonies, and gathered much information as to their political present and their prospects of a great commercial future. Visiting Ceylon on his way, Mr. Dilke passed from West Australia to Madras and Calcutta, whence he crossed Upper India to Lahore, and returned to England by the Indus, Kurrachee, Bombay, and Egypt; thus completing the circuit of the globe. The result of these journeyings was the publication of "Greater Britain: a Record of Travel in English-speaking Countries during 1866-67," 2 vols., 1868—a work which, treating the new subject of the influence of race on government and of climatic conditions upon race, had perhaps the greatest success that ever attended the publication of an author's first work. It passed through four editions in a single year in England, and, having been republished by two firms in America, has also passed through a still larger number of editions there. One of its results was the election, in 1868, of its author, who is in politics a Radical, to represent the new borough of Chelsea. He was returned at the head of the poll, and by a majority of nearly two to one over Dr. W. H. Russell, and was at that time the youngest man who ever represented a metropolitan constituency. In Parliament he chiefly spoke upon foreign, Indian, and colonial affairs. Sir Charles Dilke has succeeded his father and grandfather in the proprietorship of the *Athenæum*, and is understood to have at one time followed his grandfather's example in assuming the editorship himself. He is also the proprietor of *Notes and Queries*, and one of the proprietors of the *Gardeners' Chronicle*. Having in 1871 been attacked for holding Republican opinions, he admitted publicly that he had always preferred a Republican form of Government to a Constitutional Monarchy. His re-election at Chelsea was in consequence violently opposed in Feb. 1874, but he was again returned at the head of the poll. Also in 1874 he published an anonymous satire, the authorship of which remained a secret for four months. It was called "The Fall of Prince Florestan of Monaco," and passed through three editions, and was translated into French. In 1875 he published the works

of his grandfather, with a memoir, under the title of "Papers of a Critic." In the same year he again went round the world, and wrote on China and Japan in the monthly magazines. His chief legislative achievements before 1880 were the creation of School Boards, directly elected by the ratepayers (in place of committees of boards of guardians, as proposed by Mr. W. E. Forster), by an amendment of the Education Bill; the conferring of the municipal franchise on women; the abolition of the barbarous penalty of drawing and quartering; and, in 1878, the extension of the hours of polling at parliamentary elections in the metropolis by the measure known as "Dilke's Act." On the formation of Mr. Gladstone's administration in May, 1880, Sir Charles Dilke was appointed Under-Secretary of State for Foreign Affairs. In 1881-82 he was chairman of the Royal Commission for the Negotiation of a Commercial Treaty with France, which sat for many months in conference with the French Government High Commissioners both in London and in Paris. In Dec. 1882, he was made President of the Local Government Board (with a seat in the Cabinet), in succession to Mr. Dodson, who had been transferred to the Chancellorship of the Duchy of Lancaster. In 1883 Sir Charles Dilke had charge of the unreformed Corporation Bill, which he carried. In 1884 he was appointed chairman of the Royal Commission on the Housing of the Working Classes, of which the Prince of Wales, Lord Salisbury, and Cardinal Manning were other members. In 1885 he had charge of the Bill for the Redistribution of Seats. In the same year he carried the Diseases Prevention Metropolis Act. At the general election of 1885, he was again returned for Chelsea (reduced borough), but in 1886 was defeated by Mr. Whitmore, the Conservative candidate. In 1885 Sir Charles Dilke married Mrs. Mark Pattison, widow of the late rector of Lincoln College, Oxford. In 1887 he published, through Chapman & Hall, "The Present Position of European Politics," which was translated into French under the title of "L'Europe en 1887," and published by Quantin of Paris. In 1888 he published, through Chapman & Hall, "The British Army;" and at the beginning of 1890, through Macmillan & Co., "Problems of Greater Britain," which has passed through several editions in England, the United States, and the colonies.

DILKE, Lady Emilia Frances, daughter of the late Colonel Strong, of the Madras army, married 1st, in 1862, the Rev.

Mark Pattison (who died on July 30, 1884), Rector of Lincoln College, Oxford; and 2nd, in 1885, the Right Hon. Sir Charles Wentworth Dilke, Bart. Lady Dilke was long a writer in the *Saturday and Westminster Reviews*, and afterwards became, for some time, fine-art critic of the *Academy*. In 1879 Lady Dilke published, through Kegan, Paul, Trench & Co., a work in two volumes, illustrated by herself, and entitled "The Renaissance of Art in France." In 1884 she published, in French, through the Librairie de l'Art, a monograph on Claude. In 1886 she published, through Routledge & Sons, "The Shrine of Death," a volume of stories. In 1888 she published, through Chapman & Hall, "Art in the Modern State." In 1888, '89, '90 she contributed several archaic stories to the *Universal Review*, and wrote in the *Fortnightly Review* and the *New Review* on Trades Unions for women, in which she takes a deep interest. For many years Lady Dilke wrote the articles on Italy and France in the *Annual Register*.

DILKE, Mrs. Margaret Mary, born in 1857, is the eldest daughter of Mr. T. Eustace Smith, late M.P. for Tynemouth. She lived, when a child, at Gosforth House, Newcastle-on-Tyne, was educated at Orleans, and passed the public examination for French school-mistresses. In 1878 Mrs. Ashton Dilke became an active member of the Women's Suffrage Society; and has delivered speeches and lectures on the subject all over England. She wrote, in 1885, a book on the subject as part of the "Imperial Parliament Series," edited by Mr. Sydney Buxton, M.P. Mrs. Dilke became, in 1883, trustee for the *Weekly Dispatch* newspaper, over the policy and arrangements of which she has since then kept a general control. She has been active in the promotion of many schemes for the improvement of the position of women; and has served on the councils of many Working Men's and Radical Clubs. She was elected in November, 1888, member of the London School Board for the West Lambeth division, and as such is a strong advocate of Free Education and a progressive educational policy. She married, in 1876, Ashton W. Dilke (second son of the late Sir C. Wentworth Dilke), who became M.P. for Newcastle in 1880, and died in 1883 at Algiers.

DILLMANN, Christian Friedrich August, Ph.D., D.D., was born April 25, 1823, at Illingen, in the district of Maulbronn, in Württemberg, and educated in the gymnasium at Stuttgart, and the Lower

Evangelical Theological Seminary at Schöndal. From 1840 to 1841, he studied philosophy, Oriental philology, and theology, in the University and in the Higher Theological Seminary at Tübingen. In the autumn of 1844 he passed the first theological official examination, and then devoted another year to the study of the Oriental languages. In 1845 he became a parish vicar in Tersheim, in the district of Vaihingen in Württemberg. From 1846 to 1848 he made a scientific tour, visiting the libraries in Paris, in London, and at Oxford, where he received from the authorities of the libraries the proposal that he should draw up catalogues of their Æthiopic MSS. In April, 1848, having returned to Württemberg he became Repetent in the Theological Seminary at Tübingen, and discharged at the same time as such the professorate of Old Testament Exegesis in the university for the four years, during which, through the departure of Ewald, the office was vacant. In 1852 he became Private Docent in the Theological Faculty of the University of Tübingen; and in 1853 was nominated by the King a Professor Extraordinary in the same Faculty. After filling various posts at Kiel and Giessen, he became Professor in Ordinary of Old Testament Exegesis, in the Theological Faculty of the Metropolitan University of Berlin, which office he still holds. In May, 1846, he graduated as M.A. and Ph.D. in the University of Tübingen. In Oct. 1862, Professor Dillmann received the honorary degree of D.D. from the University of Leipsic. The learned Professor has written or edited: "Catalogus Codicum MSS. Orientalium qui in Museo Britannico asservantur. Pars III. Codices Æthiopicos continens," 1847; "Catalogus Codicum MSS. Bibliothecæ Bodleianæ Oxoniensis, Pars VII., Codices Æthiopici," 1848; "The Book of Enoch translated and explained," 1853; "The Book of the Jubilees or the little Genesis translated from the Æthiopic and elucidated by Observations," and "The Christian Adam-book of the Orient translated from the Æthiopic," both in Ewald's *Jahrbuch der biblischen Wissenschaft*. Dr. Dillmann has also undertaken to edit the Old Testament in Æthiopic. Of this splendid work several portions have already been issued. In 1859 Professor Dillmann edited the Book of Jubilees in Æthiopic. Already in 1857 this indefatigable Orientalist had published his "Grammar of the Æthiopic Language"; and in 1865 followed his great work, the "Lexicon Linguae Æthiopice cum Indice Latino" (Leipsic), in large quarto size with 1522 columns of

letterpress. In 1866 came his "Chrestomathia Æthiopica edita et glossario explanata," and in 1869 his commentary on the Book of Job, or "Job newly Explained," for the third edition of the "Brief Exegetical Handbook." He is a corresponding member of the Royal Society of Sciences in Göttingen, and a Chevalier of the first class of the Order of Merit of Philip the Magnanimous of Hesse.

DILLON, John, M.P., second son of the late Mr. John Blake Dillon (M.P. for Tipperary, and one of the rebels of '48), was born in 1851, and educated at the Roman Catholic University of Dublin, where he was distinguished for his proficiency in mathematics. He afterwards studied medicine, and became licentiate of the Royal College of Surgeons of Ireland. In 1880 he was returned as member for Tipperary, but in March, 1883, was obliged to resign his seat on account of ill-health. During his parliamentary career he was one of Mr. Parnell's most active supporters, and on Feb. 2, 1881, was the first member "suspended" on the occasion of the suspension of the whole Parnellite party. He was twice imprisoned as a "suspect" under Mr. Forster. In 1885 he was returned unopposed for East Mayo; and in 1886 was re-elected. Mr. Dillon is an eloquent enthusiast, whose sincerity has never been questioned. Mr. Dillon, in company with Mr. W. O'Brien, having been liberated on bail, pending a political trial in Nov., 1890, forfeited the bail and escaped to the United States to fulfil a lecturing engagement there.

DITTMAR, Professor William, LL.D., F.R.S. and F.R.S.E., an eminent chemist, born April 14, 1833, at Umstadt, near Darmstadt, was educated at the Polytechnic School of Darmstadt. He passed his examination there as apothecary (pharmaceutist) in 1856. Subsequently he studied at Heidelberg under Bunsen, who appointed him to an assistantship in his laboratory. Afterwards he became assistant to Dr. H. E. Roscoe in Owens College, Manchester. From 1861 to 1869 he was Chief Assistant in the chemical laboratory of the University of Edinburgh. In March, 1873, he was appointed Assistant Lecturer in Owens College; and in Sept. 1874, Professor in Anderson's University, Glasgow, which institution was, in 1887, incorporated with the Glasgow and West of Scotland Technical College. Professor Dittmar has published numerous chemical papers on original researches. He is also the author of articles in Watt's Dictionary,

and in Liebig's "Handwörterbuch," and of part of *Jahresbericht über die Fortschritte der Chemie* for 1870. On the return home of the "Challenger" Expedition he was appointed Analyst to the Expedition, and in that capacity carried out an extensive investigation on the Composition of Ocean Water; the results of which are embodied in a memoir forming part of the volume "Physics and Chemistry" in the series of the "Challenger Memoirs." Professor Dittmar is the author also of two handbooks of Chemical Analysis and of one on "Chemical Arithmetic." He is a fellow of the Royal Societies of London and of Edinburgh, and an hon. Doctor of Laws of the Edinburgh University.

DIXON, Professor Harold Baily, F.R.S., second son of the late William Hepworth Dixon, was born in London Aug. 11, 1852. He was educated at Westminster School, where he was elected on the Foundation in 1867. In 1871 he obtained a junior studentship at Christ Church, Oxford. At Oxford he studied Chemistry under Mr. A. G. Vernon Harcourt in the Christ Church Laboratory. In 1874 he accompanied his father through the United States and Canada, visiting the mines of Nevada and California. At the end of 1875 he took a first class in the Natural Science School, and became assistant to Mr. Vernon Harcourt. In 1876 he began the researches on the reactions of pure gases to which he has since devoted himself. In 1879 he was appointed Millard Lecturer at Trinity College, and in 1881 Bedford Lecturer at Balliol College, Oxford, of which College he was afterwards elected Fellow. In 1880-81, Mr. Dixon experimented for the Board of Trade on Standards of Light to be used in Photometry, and in 1884-85 he made photometric determinations of various illuminants at the experimental light-houses erected at the South Foreland by the Elder Brethren of the Trinity House. In 1886 he was elected Fellow of the Royal Society, and in the same year was chosen to succeed Sir Henry Roscoe as Professor of Chemistry and Director of the Chemical Laboratories of the Owens College, Manchester. At the meeting of the British Association at Manchester in 1887 Professor Dixon gave, in a lecture in the Free Trade Hall, a popular account of his researches on the explosions of gases. His chief papers are "The Conditions of Chemical Change in Gases," *Philos. Trans. of Royal Society*, 1884: "On the Combustion of Cyanogen," "On the Decomposition of Carbonic Acid by the Electric Spark," and "On the

Combustion of Carbonic Oxide and Hydrogen," in the *Journal of the Chemical Society*; "On the Oxidation of Sulphurous Acid," and "On the Rate of Explosions in Gases."

DIXON, The Rev. Canon Richard Watson, was born in London, 1833, and educated at King Edward's School, and at Pembroke College, Oxford. After being ordained he became Curate of St. Mary-the-Less, Lambeth, in 1858, and Second Master of the High School, Carlisle, 1863; he was made hon. Canon of Carlisle in 1874, accepted the Vicarage of Hayton 1875, and the Vicarage of Warkworth in 1883. While at Oxford he started the *Oxford and Cambridge Magazine* in conjunction with Mr. Burne-Jones and Mr. William Morris, advocating pre-Raphaelite principles. In 1861 he published "Christ's Company and other Poems," followed in 1863 by "Historical Odes." In 1873 he gained the second Peek Prize for an essay on the "Maintenance of the Church of England as an Established Church." In 1875 he published the "Life of James Dixon, D.D.," his father. He has since been occupied in writing a "History of the Church of England," vol. i., 1877, vol. ii., 1880, vol. iii., 1885, vol. iv., 1890. In 1883 he published "Mano, a Poetical History," in 1884 "Odes and Eclogues," in 1886 "Lyrical Poems," and in 1888 "The Story of Eudocia and her Brothers," the latter being printed at the private press of the Rev. Henry Daniel, of Oxford. In 1885 Canon Dixon was invited to stand for the Poetry Professorship at Oxford, but withdrew his candidature before the election.

DOBSON, George Edward, F.R.S., born 4th Sept. 1844, at Edgeworthstown, Co. Longford, Ireland, is the son of Dr. Parke Dobson, and was educated at the Royal School of Enniskillen, and at Trinity College, Dublin, where he graduated B.A. 1866, and was First Senior Moderator, and First Gold Medallist in Experimental and Natural Science; Gold Medallist Pathological Society, M.B., M.Ch. 1867; M.A. and member of the Senate of the University of Dublin, 1875; F.R.S., 1883; Corresponding Member of the Academy of Natural Sciences of Philadelphia and of the Biological Society of Washington, 1884, etc. He entered the Army Medical Department in 1868, and retired in 1888; and is the author of the following original works: "Monograph of the Asiatic Chiroptera," 1876; "Catalogue of the Chiroptera in the Collection of the British Museum," 1878 (a complete natural history of the order,

the first published work of the kind on any of the orders of Mammalia); "Monograph of the Insectivora, Systematic and Anatomical," 1883. (In this work the systematic zoology and anatomical structure of the species are, for the first time, concurrently investigated.) He is also the author of sections "Insectivora," "Chiroptera," and "Rodentia," in art. "Mammalia," and of the articles "Mole," "Shrew," and "Vampire," in the 9th edition of the "Encyclopædia Britannica;" "On the Respiration of Indian Fresh Water Fishes," 1874; "On the Digestive Muscle, its Modifications and Functions," 1882; "On the Homologies of the Long Flexor Muscles of the Feet of Mammalia," 1883; and of numerous other papers on Zoology and Comparative Anatomy contributed to various British and foreign scientific journals.

DOBSON, Henry Austin, son of Mr. George Clarisse Dobson, civil engineer, was born at Plymouth, Jan. 18, 1840. At the age of eight or nine he was taken by his parents to Holyhead, in the island of Anglesea; he was educated at Beaumaris, at Coventry, and finally at Strasburg, whence he returned, at the age of sixteen, with the intention of becoming a civil engineer. It was decided, however, that he should enter the Civil Service, and accordingly, in Dec. 1856, he was appointed to a clerkship in the Board of Trade, where he has remained ever since. When Mr. Anthony Trollope first started his magazine, *St. Paul's*, in 1868, Mr. Dobson was one of the authors whom he first introduced to the public. In 1873 Mr. Dobson first collected his scattered lyrics into a volume dedicated to Mr. Trollope, and entitled "Vignettes in Rhyme, and Vers de Société." It was followed by "Proverbs in Porcelain" in 1877. A selection from these two volumes was published at New York in 1880, and dedicated to Dr. Oliver Wendell Holmes. This was reprinted in England in 1883, under the title of "Old-World Idylls," which has since been succeeded by a companion volume, "At the Sign of the Lyre," 1885. Mr. Dobson is also the author of a "Life of Hogarth," in the "Biographies of Great Artists," 1879; and of a chapter on "Illustrated Books," in the "Library" by Andrew Lang ("Art at Home Series"), 1881. For the "Parchment Library," he has edited "Eighteenth Century Essays," 1882; "Gay's Fables," 1882; and "The Vicar of Wakefield," 1883; for the Clarendon Press he has edited Beaumarchais' "Le Barbier de Séville," 1884; and "Selections from Steele," 1885. He was also

one of the contributors to Ward's "English Poets," 1880; to which he supplied the critical sketches of Prior, Praed, Gay, and Hood. Mr. Dobson has also contributed to the *Cornhill*, *Blackwood*, *Century*, *Gentleman's*, *Good Words*, and other magazines. He was one of the first to introduce the French forms of verse now so popular in England and America—i.e., *rondeau*, *ballade*, *villanelle*, and so forth, and he contributed a chapter on these forms to Mr. Davenport Adams' "Latter Day Lyrics." Mr. Dobson also wrote the "Life of Fielding" for Macmillan's "English Men of Letters," the series edited by Mr. John Morley; and he has written a long study of Bewick, the artist and wood-engraver, for the *Century Magazine* which has since been republished under the title of "Thomas Bewick and his Pupils," 1884. He has written also the "Life of Steele," 1886, and a "Life of Goldsmith," 1888.

DOBSON, William Charles Thomas, R.A., was born at Hamburg in 1817, where his father was an English merchant. He soon showed a great taste for drawing, and began his studies from the antique in the British Museum about 1831, and was admitted a student of the Royal Academy in 1836. In 1843 he was appointed head master of the Government School of Design at Birmingham. In 1845 he resigned this office and paid a visit to Italy and Germany. He was elected an Associate of the Royal Academy in 1860, and became an Academician in Jan., 1872. In 1870 he was elected an Associate of the Society of Painters in Water Colours, and in 1875 a member of the same society. His principal pictures are:—"Tobias, with Raphael, his guardian angel; on their journey to Media," 1883; "The Charity of Dorcas," 1854; "The Alms Deeds of Dorcas," 1855, painted by command of the Queen; "The Parable of the Children in the Market-place" and "The Prosperous Days of Job," 1856; "Reading the Psalms" and "The Child Jesus going down with his parents to Nazareth," 1857, both in the possession of the Baroness Burdett-Coutts; "Fair Tales," "The Holy Innocents," and "Hagar and Ishmael sent away," 1858; "Die Heimkehr," "The Plough," "Bethlehem," and "Emilie aus Górwitz," 1860; "Drinking Fountain," "Flower-Girl," and "Bauer Mädchen," 1861; "Mamma's Birthday," "The Picture-Book," and "A Fancy Portrait," 1862; "Frühling," "At the Well," and "The Holy Family returned from Egypt," 1863; "Girl with Ferns" and "Morning," 1864; "The Good Shepherd," 1865; "In Memoriam,"

and "The Child Jesus in the Temple," 1866; "Stragglers," 1867; "Happy Thoughts," "Trespassing," and "Too Tired," 1868; "Autumn's Wreck supplies the winter store," "A Picture-Book," and "Summer," 1869; "Nunc Dimittis," "The Cottage Garden," 1870; "Alms," and "Schwesterliebe," 1871; "The Crown to the Husband," and "Faith," 1872; "St. Paul at Philippi," deposited in the Academy on his election as an Academician, "Pyrrha," and "Kate Kearney," 1873; "Father's Welcome Home," 1874; and "The Young Bathor," 1875; "The Offering," and "At the Well," 1876; "The Fern-Gatherer," "Una Fascina di Olive," and "Waiting," 1877; "At the Masquerade," "Mother and Child," and "Ligeia," 1878; "A Venetian Girl," 1879; "Mignon" and "Ione," 1880; "Ada with the Golden Hair" and "Kezia," 1881; "The Golden Age" and "Christmas Carols," 1882; "Morning," and "Bianca Capella," 1883. Many of the above have been engraved. Amongst his water-colour drawings may be mentioned "The Young Nurse"; "The Camellia," 1873; and "Nursery Tales," 1874.

DODGE, Mary, *née* Mapes, American authoress, was born at New York in 1838. Early in life she married Mr. William Dodge, a lawyer in New York, and on his death was left a widow with two sons to support. She took up literature, and for a number of years was one of the editors of *Hearth and Home*. When in 1873 *St. Nicholas*, an illustrated monthly for children, was started by the owners of *The Century Magazine*, it was placed in charge of Mrs. Dodge, and under her able direction it has met with very great success. In addition to her editorial labours she has contributed to a number of English and American periodicals, and has published: "Irvington Stories," 1864; "Hans Brinker, or the Silver Skates," 1865; which has been translated into French, German, Dutch and other European languages; "A Few Friends and How They Amused Themselves," 1869; "Rhymes and Jingles," 1874; "Theophilus and Others," 1876; "Along the Way," 1879, poems; and "Donald and Dorothy," 1883. An amusing sketch by her called "Miss Malony on the Chinese Question," which appeared in "Scribner's Monthly" (now *The Century*) in 1870, attracted many readers at the time and is included in "Theophilus and Others."

DODGE, Mary Abigail, (known by her pseudonym of "Gail Hamilton,") was born at Hamilton, Massachusetts, about

1830. In 1851, and for two or three years thereafter, she was a teacher of physical science in the public High School of Hartford, Connecticut. She was at that time a contributor to several periodicals, and became a frequent writer for the *Atlantic Monthly* soon after its establishment, and has continued to write for that and other magazines and papers to the present time. She has published: "Country Living and Country Thinking," 1862; "Gala Days," 1863; "Stumbling Blocks," 1864; "A New Atmosphere," 1865; "Skirmishes and Sketches," 1865; "Red-Letter Days in Applethorpe," 1866; "Summer Rest," 1866; "Wool Gathering," 1867; "Woman's Wrongs," 1868; "Battle of the Books," 1870; "Little Folk Life," 1872; "Woman's Worth and Worthlessness," 1872; "Child World," (2 vols.) 1872-73; "Twelve Miles from a Lemon," 1874; "Nursery Noonings," 1874; "Sermons to the Clergy," 1875; "What think ye of Christ?" 1877; "First Love is Best," 1877; "Our Common School System," 1880; "Divine Guidance, Memorial of Allen W. Dodge," 1881; and "The Insuperable Book," 1885.

DODS, Professor The Rev. Marcus, D.D., was born in 1834 at Belford, Northumberland, and is the youngest son of the Rev. Marcus Dods of the Scotch Church, Belford. He was educated at the Edinburgh Academy and University, where he took his M.A. degree in 1854. He entered the Theological Training College of the Free Church in Edinburgh (New College), and after four years curriculum was licensed in 1858. He was ordained in 1864 as minister of Renfield Free Church, Glasgow, where he remained until appointed Professor of New Testament Exegesis in New College, Edinburgh, in 1889. He received the honorary degree of D.D. from Edinburgh University in 1871. The following is a list of his published works: "The Prayer that Teaches to Pray," 1st edit. 1863, 6th edit. 1889; "The Epistles to the Seven Churches," 1865; "Israel's Iron Age," "Mohammed, Buddha, and Christ," "The Parables of Our Lord," 2 vols., "The Book of Genesis," in the Expositors' Bible, "The First Epistle to Corinthians," Expositors' Bible, 1889; and 2 vols. in Clark's handbooks for Bible classes, as well as articles in the 9th edition of the "Encyclopædia Britannica," and in the "Expositor," &c.

DOLGOROUKOW, Prince Vladimir Andreievitch, was born in 1810, and entered the Guards in 1829. He served in the Polish war, and distinguished

himself at the assault of Warsaw. He also served in the Hungarian campaign and in the Crimea. In 1865 he was nominated Governor of Moscow, which post he has held ever since. His family ranks among the first in Russia. His ancestor, Prince Michael Vsevolodovitch, of Tchernigow, was executed by the Golden Horde in 1246, and is regarded as a martyr. Another ancestor, Prince Gregory Borissovitch Rostcha Dolgoroukoff, fought the False Demetrius under the walls of Kursk, and defended, in 1609, Troitsky Sergiuevo for six months against the Poles. Prince Vladimir Dolgoroukoff was father-in-law of the Czar Michael Romanow. Prince Youry Alexievitch defeated the Poles, put down the revolt of Steuka Razine, and was slain by the Stultsi. Prince Basil conquered the Taurus for the Empress Catherine II., and was Governor of Moscow.

DOM CARLOS, King of Portugal and the Algarves, was born in Lisbon on Sept. 28, 1863, married in Lisbon, May 22, 1886, Amélie, Princess of Orléans-Bourbon, and has two children. He succeeded to the throne on Oct. 19, 1889.

DOM PEDRO II., De Alcantara, Ex-Emperor of Brazil, born at Rio de Janeiro, Dec. 2, 1825, is the son of Dom Pedro I., of Braganza and Bourbon, and of Leopoldina, arch-duchess of Austria and is the legitimate descendant of the three great royal houses in Europe—Braganza, Bourbon, and Hapsburg—and was proclaimed Emperor upon the abdication of his father, in April, 1831, at the age of five years and some months. The government was at first administered by a Council of Regency, and afterwards by one regent. In July, 1840, he was declared of age by the Chambers, and assumed the Sovereign power when not quite fifteen. He was crowned in July, 1841, and in 1843 was married to the Princess Theresa Christina Maria, sister of Francis I., late King of Naples; from which union were born two princes, who died young, and two princesses. Dom Pedro is very courteous in his manners, and writes and speaks fluently English, French, German, Spanish, and Italian. In 1868 he was elected a Corresponding Member of the French Geographical Society, and since 1877, has been a member of the French Academy of Sciences. He is also a member of many other European Societies. He is strongly attached to literature, and liberally patronized industrial enterprises by encouraging public works and perfecting the navigation of rivers. He succeeded

in substituting free labour for slaves, by encouraging European colonization. The aid which he afforded to General Urquiza, contributed greatly to the overthrow of Rosas, and the fruits of that intervention were an aggrandisement of territory, and the free navigation of the Plate River, which have contributed greatly to the prosperity of the Brazils. The firm and judicious attitude he assumed in 1862, in the quarrel which broke out between his Government and that of Great Britain, which was settled in his favour by the arbitration of the King of the Belgians tended greatly to consolidate his power. In 1865 Dom Pedro entered into an alliance with Uruguay and the Argentine Republic against the Paraguayans under Lopez. The war began in 1866, and raged with varying fortunes down to March 1, 1870, when it was brought to a close by the death of Lopez. In 1871 Dom Pedro made the tour of Europe, visiting London, Paris, Florence, Rome, Brussels, and other capitals, and in 1876 he visited the United States, visiting also Europe again and the East before he returned to Brazil. The most important event in his reign was undoubtedly the freeing of the slaves. As early as 1850 he issued a decree stopping the slave trade, and in 1871 he issued another decree for the gradual but total abolition of slavery throughout Brazil, and this was finally accomplished in 1889. This excited considerable dissatisfaction among the planters and was probably one of the causes of his overthrow. In 1886 he once more came to Europe for medical treatment, his health being much broken, and he remained here for some time. During his absence the government was in the hands of his daughter Isabel (heir-apparent), the Countess d'Eu, who was personally unpopular. Shortly after his return to his own country he was deposed by the military commanders around Rio Janeiro, and a Republic proclaimed. The Emperor with his wife, daughter and her husband and children sailed (Nov. 19, 1889) for Portugal, where the Empress soon after died. Since her death Dom Pedro has lived in retirement in France.

DONALDSON. Professor James, M.A., LL.D., F.R.S.E., born April 26, 1831, at Aberdeen, was educated at the Grammar School and Marischal College and University in Aberdeen, New College in London, and the University of Berlin. He was appointed Greek Tutor in Edinburgh University in 1852, Rector of the High School of Stirling in 1854, Classical Master in the High School of Edinburgh in 1856, Rector of the same school in

1866, and Professor of Humanity in the University of Aberdeen in 1881, and Principal of the United College of St. Salvator and St. Leonard in St. Andrews University in 1886, and in 1890 by the Universities (Scotland) Act, he became Principal of the University of St. Andrews. He has published a "Modern Greek Grammar for the use of Classical Students," 1853; "Lyra Græca: Specimens of the Greek Lyric Poets from Callinus to Soutsos," with Critical Notes and a Biographical Introduction, 1854; "Critical History of Christian Literature and Doctrine from the death of the Apostles to the Nicene Council," 3 vols., 1864-66; "The Ante-Nicene Christian Library," edited by him in conjunction with the Rev. Alexander Roberts, D.D., 24 vols., 1867-72; the article "Greek Language" in Kitto's "Cyclopædia," 3rd edit.; "Lectures on the History of Education in Prussia and England, and on kindred topics," 1874; the article "Education" in Chambers' "Information for the People," 1874; a paper "On the Expiatory and Substitutionary Sacrifices of the Greeks," read before the Royal Society of Edinburgh, May 17, 1875; and articles on the Characters of Plautus, on the Position of Women in Ancient Greece, Rome, and early Christianity, and, in the *Contemporary Review*, on University Reform. Besides these, he edited the *Museum, or English Journal of Education*, for several years; and he has contributed to the "Encyclopædia Britannica," and *Edinburgh Review, Scottish Review*, and other periodicals.

D'ORSEY, Professor The Rev. Alexander J. D., B.D. Camb., Chancellor's English Medallist, Knight Commander of the Order of Christ in Portugal, was born at Haunchwood House, Nuneaton, Warwickshire, on March 28, 1812; his father being an American, and his mother a Scotch lady, the daughter of Alexander Donald. He was educated at Kennington School, Cambuslang School, and under private tutors, including Sheridan Knowles; and entered the University of Glasgow in 1830, where he gained a first place in Latin, and prizes for English prose. He was originally intended for the law, but family circumstances induced him to turn to the profession of schoolmaster; and, in 1834, he was elected to the newly-founded English Mastership in the High School of Glasgow. In 1842 he was one of those who founded Queen's College, Glasgow. In 1846 Mr. D'Orsey was ordained by the Bishop of Glasgow. His health failing in 1850 he was ordered to

Madeira, where he remained, with intervals, until 1859. On his recovery he established at Funchal the English Collegiate School, with the Rt. Hon. Lord Lyttelton as patron, and as vice-patron, Lord John Manners. During Mr. D'Orsey's stay in Madeira he founded the Mission to Seamen in Funchal (one of the earliest of such missions), preaching on board the ships, and distributing Bibles and Prayer-books in various languages, also lecturing to the natives. In 1856, whilst absent a short time from Madeira, he raised a subscription in London, amounting in money and Government grants to over £12,000, for the islanders, suffering greatly at the time from cholera and famine, for which excellent service he was made Knight Commander of the Order of Christ, by the King of Portugal. In 1860 he took his degree of B.D., and obtained the Chancellor's Medal for English Poetry, a distinction gained by Macaulay, Bulwer, and Tennyson, and was appointed Chaplain to his College of Corpus Christi, and soon afterwards was made Lecturer in English History there, holding thus the first office of the kind ever instituted in the University of Cambridge. In 1861, on the nomination of Lord Ashburton, Mr. D'Orsey delivered a series of lectures at the Royal Institution, London, on the Study of the English Language. He has lectured also at Oxford, Cambridge, Harrow, Rugby, Uppingham, &c. In 1864 Mr. D'Orsey was appointed Lecturer, and in 1887 Professor, in Public Reading at King's College, London, which office he resigned in 1890. As an author he has published various educational works, a Cambridge prize poem, and a poem on Calderon, for which he received a Commemoration Medal from the Spanish Royal Academy. He is well-known as a Linguist, and was elected a Member of the Philological Society in 1860.

DOUCET, Camille, Perpetual Secretary of the French Academy, was born in Paris, May 16, 1812, studied law, and, for some time, practised as a notary. His earlier dramas were produced at the Odéon with considerable success. "Un Jeune Homme," 1841; "L'Avocat de sa Cause," 1842; "Le Dernier Banquet," 1847. "Ennemis de la Maison," 1850, was reproduced at the Théâtre Français in 1854, "Le Fruit Défendu," 1857. These were, in 1858, published under the title of "Comédies en Vers." In 1853 M. Doucet was named Divisional Chief of Theatres, and in this capacity was charged with supreme direction of the

Imperial Theatres of Paris and the Departments. He was elected a member of the French Academy, April 7, 1865, in the place of Alfred de Vigny, and on March 30, 1876, succeeded M. Patin as perpetual secretary. He has been several times elected Member of the Council-General of Yonne for the district of Villeneuve-l'Archevêque, and he is a commander of the Legion of Honour.

DOUDNEY, David Alfred, D.D., son of John Doudney, was born on March 8, 1811, at Mile End, Portsmouth, where his father had for many years carried on business as a manufacturer. At 13 years of age he was articled to a printer at Southampton, and towards the completion of his term, joined the staff of the *Hampshire Advertiser*. In 1832 he went to London and was engaged by the printing firm of Jowett and Mills, Bolt Court, Fleet Street, until 1835, when he commenced business for himself, first at Holloway, and then in Long Lane, Aldersgate Street, where he originated the *City Press*, upon the site now occupied as the station of the Metropolitan Railway. In 1840 he became editor of the *Gospel Magazine*, and, in 1846, relinquished business in favour of Mr. W. H. Collingridge, in Aldersgate Street. After editing the aforementioned magazine for seven years, Mr. Doudney was ordained in Waterford Cathedral as a literate, by Dr. Robert Daly, Bishop of Cashel, and was appointed to the sole charge of Monstead, Bonmahon, on the sea-coast of Waterford. Here he established printing, agricultural, and other industrial schools for the Irish boys and girls. In the former he reprinted Dr. Gill's voluminous Commentary, consisting of six thick 8vo. volumes, containing nearly 1000 pages each, as well as various other works. For seven years the *Gospel Magazine* was issued from these industrial schools. Here he originated the *Old Jonathan* a monthly illustrated publication, which he still edits, now in its thirty-fifth year, as well as the *Gospel Magazine*, which he has conducted for upwards of half-a-century. Upon the completion of Dr. Gill's Commentary, Mr. Doudney was presented with a complimentary certificate by the principals of Trinity College, Dublin, and the late Earl of Carlisle, (then Lord Lieutenant of Ireland) appointed him to the sinecure of Kilcash, near Clonmel. In 1858 Mr. Doudney left Ireland, and, upon his return to England, was soon after appointed to St. Luke's, an off-out from the original parish of Bedminster, a suburb of Bristol. Here he commenced his labours by building a

wooden church, which was at once filled to overflowing by nearly a thousand persons. Then followed the permanent building, a beautiful structure, accommodating nearly thirteen hundred persons. The schools were then erected for twelve hundred children, to which were attached industrial, printing, and binding offices; a suitable Mission Hall, Ragged School, and Soup-Kitchen, have since been erected, and, finally a beautifully-situated Vicarage. In recognition of his varied services on behalf of the Church, Mr. Doudney was presented with a Foreign Diploma of Doctor of Divinity. He is now far advanced in his eightieth year. His eldest son was ordained by the late Dr. Waldegrave, and soon after appointed to the new church of St. James, Carlisle; he was appointed likewise private chaplain to the Bishop, and Rural Dean; for some ten years he has been Rector of the parish of Ore, Hastings. Dr. Doudney, in addition to his editorship of the two publications aforementioned, has written many works; among them may be mentioned: "Sympathy," first and second series; "Bible Lives and Bible Lessons;" "Try and Try Again;" "Retracings and Renewings;" "Credentials;" "Call and Charms of the Christian Ministry;" "Led and Fed, an Old Pastor's Testimony for God and Truth;" "Walks and Talks with Jesus;" "Mornings and Evenings with Jesus;" "For Ever with Jesus;" "Walks and Talks with Fellow Travellers;" "Jet;" "Talks with the Troubled;" "Kept;" "Looking to and from Jesus;" and about forty different booklets. A testimonial, consisting of an address and a purse containing upwards of £800, was presented to the Rev. David A. Doudney, D.D., Vicar of St. Luke's, Westminster, Bristol, on the completion of his jubilee as editor of the *Gospel Magazine*. Alderman Sir Andrew Lusk made the presentation, which, as was stated by Mr. W. H. Collingridge (hon. secretary of the fund) had been subscribed by 1,050 friends at Portsmouth, Southampton, Waterford, London, and other places.

DOUDNEY, Sarah, was born in a suburb of Portsmouth, Hants, in 1842. A great portion of her childhood, and nearly the whole of her girlhood were spent in a remote village in a little frequented part of Hampshire, far removed from any town. She studied with Mrs. Kendall, of Southsea; and also at Madame Dowell's College at Southsea, a small establishment, chiefly for French girls, which was broken up many years ago. Sarah Doudney began to write

verses and stories at an early age, while living alone with her parents in her country home. At eighteen she wrote two poems, which Charles Dickens commended, and published in *All the Year Round*. Some of her earliest verses, which attracted notice, appeared in *The Churchman's Family Magazine*, conducted by the Rev. F. Arnold. For this serial she wrote a story in verse, entitled, "Sister Margaret," and in 1864 "The Lesson of the Water-Mill," which has since become one of the National songs of America. But it is as a writer of tales for girls that she is most widely known. Speaking of her in a paper in *The Nineteenth Century*, 1888, Mr. Edward Salmon has said: "She seems to occupy, as a writer for girls, a position in some respects analogous to that of Miss Austen among novelists." Her latest book, "Where the Dew Falls in London," is a story connected with the Chapel Royal, Savoy, and was written in conjunction with the late Rev. Henry White, Chaplain of the Savoy, and Chaplain to the House of Commons. The following is a list of her publications:—"Under Grey Walls," 1871; "Monksbury College," 1872; "Faith Harrowby," 1872; "Wave upon Wave," 1873; "The Pilot's Daughters," 1874; "Miss Irving's Bible;" "Marion's Three Crowns;" "Loser and Gainer;" "Oliver's Oath," 1877; "Archie's Old Desk," 1877; "The Great Saltens;" "Old Anthony's Secret;" "Janet Darney's Story;" "Strangers Yet," 1880; "Stepping Stones," 1880; "Thy Heart's Desire," 1880; "When We Two Parted," 1880; "Michaelmas Daisy," 1882; "Stories of Girlhood," 1882; "Nothing but Leaves," 1882; "Anna Cavaye," 1882; "Nelly Channell," 1883; "What's in a Name?" 1883; "A Woman's Glory," 1883; "When We Were Girls Together," 1884; "A Long Lane with a Turning," 1884; "The Strength of Her Youth," 1884; "Prudence Winterburn," 1886; "A Son of the Morning," 1887; "The Missing Rubies," 1888; "Miss Willowburn's Offer," 1888; "Under False Colours," 1889; "Where the Dew Falls in London," 1889; and "Gatty Fenning," 1890; also the following volumes of verses:—"Psalms of Life," 1871; "Drifting Leaves," 1889; "Thistle Down," 1890.

DOUGLAS, The Hon. and Right Rev. Arthur Gascoigne, Bishop of Aberdeen and Orkney, is the youngest son of George Sholto, late Earl of Morton, by Frances Theodora, eldest daughter of the late Right Hon. Sir George Henry Rose, G.C.B., of Sandhills, Hants. He

was born in January, 1827, and graduated at University College, Durham, taking his B.A. degree in 1849, and proceeding M.A. in 1850, in which year he was ordained deacon by Dr. Maltby, Bishop of Durham. He was admitted into priest's orders by the Bishop of Worcester in 1851. Having held for a short time the curacy of Kidderminster, Mr. Douglas was appointed in 1855 to the rectory of St. Olave, Southwark, and in the following year was collated to the Rectory of Scaldwell, Northamptonshire, which living he held till 1872, when he accepted the vicarage of Shapwick, in the diocese of Salisbury. On May 1, 1883, he was consecrated, in the church of St. Andrew, Aberdeen, to the Scottish Bishopric of Aberdeen and Orkney, in succession to the late Bishop Suther. He married, in 1855, Anna Maria Harriett, youngest daughter of the late Richard Richards, Esq., of Caerynweh, M.P. for Merionethshire.

DOUGLAS, Robert Kennaway, was born Aug. 23, 1838, at Larkbear House, near Ottery St. Mary, Devon, and educated at a private school at Bath, and at the Blandford Grammar School. He was appointed, by the Foreign Office, Student Interpreter in the China Consular Service in 1858; in 1860 he became Secretary to the Allied Commission for the Government of the City of Canton; was temporarily attached to Her Britannic Majesty's Legation at Peking in 1861; was the same year appointed Interpreter on the staff of General Sir Charles Staveley, K.C.B.; and was appointed Acting Vice-Consul at Taku in 1862, which post he held until his return to England on leave in 1864. In the following year he resigned his appointment in the Consular Service in order to take up the post of Assistant of the Upper Section of the 1st class in the Library of the British Museum, with special charge of the Chinese and Japanese Libraries; he was promoted to the office of Assistant Keeper in 1880, with the additional charge of the Sub-Department of Maps; and was appointed Professor of Chinese at King's College, London, in 1873. Professor Douglas is the author of "Two Lectures on the Language and Literature of China," 1875; "The Life of Jenghiz Khan," 1877; "Confucianism and Taoism," 1879; "China," 1882. He was honorary Secretary to the International Congress of Orientalists during the session in London in 1874, and edited the "Proceedings;" he also represented England at the session held at St. Petersburg in 1876. He compiled and

edited a catalogue of the Chinese books and manuscripts in the British Museum, which was printed by order of the Trustees in 1876; and he further edited a catalogue of the Printed Maps, Plans, and Charts in the British Museum, which was published in 1885. He is the author of several articles on China and the Far East, in the 9th edition of the "Encyclopædia Britannica;" he has also contributed linguistic and other articles relating to the same subjects in the periodicals of the day. Professor Douglas is a governor of Dulwich College.

DOUGLAS, Sir William Fettes, P.R.S.A., son of Mr. James Douglas, banker, of Edinburgh, by Martha Brook, grand-niece of Sir William Fettes, Bart. (founder of the Fettes College), was born in Edinburgh, March 29, 1822. He received his education at the University of Edinburgh. At the age of twenty-one he first exhibited at the Royal Scottish Academy, and since that period he has continued regularly to send his works to the annual exhibitions. In 1877 he was appointed principal Curator of the National Gallery of Scotland, which post he resigned on being elected President of the Royal Scottish Academy, Jan. 30, 1882. He was knighted by the Queen at Windsor, May 17, 1882.

DOUGLASS, Frederick, American orator, was born a slave (of a white father) at Tuckahoe, Maryland, in Feb., 1817. He learned to read and write through the kindness of a relative of his owner, and when about fifteen years of age began to hire his own time from his master, paying the latter three dollars a week and retaining for himself the balance of his earnings. After working in this way for some years, he made his escape in Sept., 1838, and reached New Bedford, Massachusetts. Encouraged by William Lloyd Garrison in his efforts at self-education, he soon developed such power as an orator, that he was employed, 1841, by the American Anti-Slavery Society as one of their lecturers, and soon drew crowds to hear his portraiture of slavery. In 1845 he came to England, where his eloquence attracted great attention. His friends here raised, in 1846, £150, which was sent to his former master, and his legal emancipation thereby secured. He returned to America in 1847 and began the publication at Rochester, N.Y., of *Frederick Douglass's Paper*, afterwards *The North Star*, a weekly journal which he continued for some years. During the Civil War he was often consulted by President Lincoln

on questions affecting the coloured race, and at its close he resumed his place on the lecture platform. In 1870 he started, at Washington, a journal entitled *The New National Era*, the publication of which was continued by his sons. In 1871 he was appointed Secretary of the Commission to San Domingo, and upon his return was made a member of the Territorial Council of the District of Columbia. In 1872 he was chosen a Presidential Elector for the State of New York; and from 1877 to 1881 was U.S. Marshal for the District of Columbia. He then became Commissioner of Deeds for the District of Columbia, and on his retirement from that office in 1886, paid a third visit to England. In June, 1889, he was made U.S. Minister to Hayti, and he at present, 1890, fills that position. His published works are "Narrative of my Experience in Slavery," 1844; "My Bondage and my Freedom," 1855; and "Life and Times of Frederick Douglass," 1881.

DOUGLASS, Sir James Nicholas, Civil Engineer, F.R.S., was born at Bow, Middlesex, Oct. 16, 1826. After a regular training in Civil and Mechanical Engineering, his first important employment was in 1847, as assistant engineer to his father, who was superintending engineer to the Hon. Corporation of the Trinity House, and then engaged in the erection of the Lighthouse on the Bishop (the westernmost of the rocks of Scilly), probably the most exposed of these sea structures. On the completion of this work he was appointed resident engineer in sole charge at the erection of the lighthouse on the chief rock of the dangerous group of the Smalls, situated about eighteen and a half miles off Milford Haven. This work he completed at a cost of £50,125, being about £15,800 under the lowest amount at which it had been ascertained that it could be executed by contract. In 1862, on the death of the late Engineer-in-Chief to the Trinity House, Mr. James Walker, F.R.S., he was appointed to that office, and has since carried out many important engineering works, both at home and abroad; such as the Wolf, Longships, Great and Little Basses, Eddystone, and Muricoy Lighthouses, &c., and has effected numerous improvements in the construction of lanterns, optical apparatus, electrical apparatus, oil and gas illuminating apparatus, and the machinery in general connected with lighthouses, also iron and steel buoys, beacons, &c. On the completion of the present lighthouse on the Eddystone, he

received the honour of knighthood. This work was executed at a cost of £59,255, being £24,000 below that at which it had been ascertained that it could be executed by contract. He is a Member of the Institutions of Civil Engineers, Mechanical Engineers, and Electrical Engineers, and in 1887 was elected a Fellow of the Royal Society.

DOVER, Bishop of. See EDEN, THE RT. REV. G. R.

DOW, Neal, an ardent advocate of total abstinence and prohibition, was born at Portland, Maine, March 20, 1804, of Quaker parentage. While Mayor of Portland in 1851 he drafted a bill to prohibit the liquor traffic, known the world over as the Maine Law, and on his personal application to the legislature of that year it was passed through all its stages in one day, without change even of a word, and took effect upon its approval by the governor. Under this law, liquors intended for unlawful sale are confiscated and destroyed, and those who sell or keep them for sale are fined and imprisoned; and the places where they are sold or kept are declared to be nuisances. In 1884 prohibition was put into the Constitution of the State by a majority of 47,075, the affirmative vote being three times larger than the negative. By special invitation of the United Kingdom Alliance he made three visits to England in aid of the agitation for prohibition in this country, and spent nearly four years here and on the Continent in gratuitous labour in that movement. Mr. Dow has been twice Mayor of his native city, and twice a member of the Maine Legislature. He served in the Civil War as Brigadier-General, commanding in the department of the Gulf, holding at different times three separate commands. He was twice wounded and once taken prisoner, when he was confined for eight months before an exchange could be effected.

DOWDEN, Professor Edward, LL.D., was born in Cork in 1843. He was educated by private teachers, and at Queen's College, Cork, and Trinity College, Dublin. He obtained in Trinity College the Vice-Chancellor's prizes in English Verse and English Prose; was elected President of the Philosophical Society; and gained the first Senior Moderatorship in Logic and Ethics, 1863. In 1867 he was elected to the Professorship of English Literature. He has published the following works:—"Shakspeare: a Study of his Mind and Art," which has been translated into German and

Russian; "Poems;" "Shakspeare's Primer;" "Studies in Literature;" "Transcripts and Studies;" "Southey" (in "English Men of Letters"); "Southey's Correspondence with Caroline Bowles;" "The Correspondence of Sir Henry Taylor;" an edition of "Shakspeare's Sonnets," with notes; an edition of "The Passionate Pilgrim;" an edition of "Lyrical Ballads, 1798;" "The Life of Percy Bysshe Shelley," 2 vols., founded on the papers in the possession of the Shelley family, &c.; this last, his most important work, will probably remain the standard Life of Shelley. He has also written articles in *The Contemporary Review*, *The Fortnightly Review*, *The Nineteenth Century*, and other periodicals. He has received the Cunningham Gold Medal of the Royal Irish Academy, and is an honorary LL.D. of the University of Edinburgh. He was elected President of the English Goethe Society in 1888, in succession to Professor Müller. In 1889 he was appointed the first "Taylorian Lecturer," in the Taylor Institution, University of Oxford. He is Secretary to the Liberal Union of Ireland, and has taken an active part in opposing Home Rule.

DOWDEN, The Right Rev. John, D.D., Bishop of Edinburgh, was born in Cork, June 29, 1840 (elder brother of Professor Edward Dowden), and was educated at Queen's College, Cork, and Trinity College, Dublin. He graduated as B.A. (obtaining a Senior Moderatorship and Gold Medal in Logic and Ethics) in 1861. After studying for two years in the Divinity School of the University of Dublin, and taking a First Class at the final examination, he was ordained deacon in 1864 and priest in 1868 by the Bishop of Kilmore. He served as curate at St. John's, Sligo, till 1867, when he became perpetual curate of Calvy, in the same town. In 1870 he was appointed one of the chaplains to the Lord Lieutenant of Ireland (Earl Spencer), and the following year became assistant at St. Stephen's Chapel of Ease, Dublin. In 1874 he accepted an invitation of the Scottish Bishops to become Pantonian Professor of Theology and Bell Lecturer at the Theological College of the Scottish Church, then situated at Trinity College, Glenalmond, in Perthshire. After two years the theological department of Trinity College was removed to Edinburgh, and there he served as Head of the Theological College and Canon of St. Mary's Cathedral, till he was elected in 1886, to the Bishopric of Edinburgh. Dr. Dowden was Donellan Lecturer in

the University of Dublin in 1885, and Select Preacher in the University of Cambridge, 1888. Besides several separate sermons and articles in magazines, Dr. Dowden published, in 1884, "The Annotated Scottish Communion Office," a copious historical and liturgical account of the Scottish and American liturgies.

DOWIE, Miss Mémie Muriel, is the granddaughter of the celebrated Robert Chambers, of Edinburgh, from whom she doubtless inherits her enterprising disposition. Her father was the late Mr. Muir Dowie, a well-known and much respected merchant of Liverpool. It was there that his daughter was born; but, a year or two later, the family migrated into Cheshire, where Mr. Dowie had bought a place near the mouth of the Dee. There the children lived together until school-days came. Miss Mémie Dowie went to school first in Liverpool, then spent three years in Stuttgart, and another year in France. Upon her return from abroad, the house in Cheshire was abandoned in favour of various shootings in the Highlands. For a time Miss Dowie continued her education by means of correspondence and other teaching, but, not finding herself adapted for a student's life, gave it up. She preferred the free life of the open air, and delighted in the "struggle for existence" as it presents itself in the Highland fastnesses. She thus qualified herself for her late adventures. She had a great fancy to be a surgeon, but that department of the medical profession being closed against women, she was obliged to turn her attention elsewhere. She elected to become a reciter, and at eighteen years of age left her home to seek fame and fortune on the platform. She was fairly successful in both quests, for she had studied the necessary technique of the art, and had plenty of natural aptitude for it. Her youth, her charming manner, and her musical voice, all promised success; and in Scarborough, where she lived until recently, as well as in other places, she used to delight large audiences. Miss Dowie then took up her pen, and for several years past her occupations have been chiefly literary. She has been a frequent contributor to magazines and newspapers. But, however busy she may be, Miss Dowie never lets the hunting season go by without contriving to get a few days with the hounds. Visits to friends in the country and trips to Paris serve further to diversify an existence which is never in danger of being dull. For the rest, she makes her home in South Kensington, finding that London must necessarily be the headquarters of a jour-

nalist. Miss Dowie is an admirable traveller; for she is extremely observant both of the political and of the social condition of the people whom she meets. She takes mishaps with serenity, and, judging by her lighthearted accounts of her perils by mountain and river, almost with enjoyment. Many nights, when in the Carpathian Mountains, she slept in the open air protected only by a peasant attendant; and her twenty-third birthday, she tells us, found her engaged in revolver practice, for she was in a land where wild cats, bears and wolves might be encountered at any moment. She conformed to the simple habits of the people, eating no meat and drinking neither wine nor beer. Her costume was at once novel and practical, consisting of knickerbockers and leggings worn beneath a lady's ordinary skirt. The latter was so contrived as to be easily detached to permit of Miss Dowie riding *en cavalier* when it was necessary to go long distances. A full account of the journey with all its picturesque and entertaining adventures has appeared in the *Fortnightly Review* under the title of "In Ruthenia." Miss Dowie is now engaged in writing a book, to be ready in the spring of 1891.

DOWN and **CONNOR**, Bishop of. See **REEVES**, THE RIGHT REV. WILLIAM.

DOWNER, Sir John William, K.C.M.G., Q.C., was born in Adelaide, South Australia, July 6, 1844, and educated at St. Peter's College, Adelaide, and was a Scholar and Prize Essayist there. In 1862 he obtained the First Prize at the Government Public Competition examinations, open to all the Colony of South Australia, and, at the same examination, special prizes for Greek, political economy, physiology, and zoology. He became Practitioner of the Supreme Court of South Australia in 1867; was made Queen's Counsel in 1878; and in the same year was elected member of the House of Assembly. From 1881 till 1884 he was Attorney-General, during which time he caused some important law reforms to be effected; amongst others, persons accused of criminal offences were made competent witnesses on their own behalf. In 1883 he was one of the members of the Federal Convention held in Sydney, New South Wales. From 1885 till 1887 he was Premier and Attorney-General of South Australia. In 1887 he was a member of the Colonial Conference in London, and was made a K.C.M.G. Since then he has introduced a bill for the amendment of the law of divorce, on lines similar to the bill since

carried in Victoria. In 1890 he was elected by the Parliament of South Australia to be a member of the Federal Convention to be held in 1891.

DOWNING, Arthur Matthew Weld, born April 13, 1850, at Bagnalstown, co. Carlow, Ireland, is the younger son of Arthur Matthew Downing, of The Lodge, Bagnalstown, and 22, Waterloo Road, Dublin. He was educated at Nutgrove School, Rothfarnham, co. Dublin, and Trinity College, Dublin, where he won a Mathematical Scholarship in 1871, B.A., 1871, M.A., 1881. He was appointed Second-Class Assistant at the Royal Observatory, Greenwich, in Jan., 1873; promoted to be First-Class Assistant in August, 1881. He is the author of 30 papers contributed to the "Monthly Notices" of the Royal Astronomical Society from May, 1877, to June, 1890; and was elected a member of the Council of the Royal Astronomical Society in Feb., 1882; Honorary Secretary of the Royal Astronomical Society in Feb., 1889; and a member of the "Astronomische Gesellschaft," of Leipzig, in 1884.

DOYLE, Henry Edward, C.B., is the third son of the late Mr. John Doyle (author of the "H.B." political sketches), by Marianne, daughter of Mr. James Conan, of Dublin. He was born in 1827, and educated as an artist. On the recommendation of Cardinal Wiseman he was appointed Commissioner for Rome at the International Exhibition of 1862 in London, and for his services in that capacity was created a Knight of the Order of Pius IX. He was Art Superintendent of the International Exhibition of 1865, in Dublin; and honorary secretary of the National Portrait Gallery in connection with that of 1872, in the same city. He was elected, by the Board of Governors, Director of the National Gallery of Ireland, in 1869, on the death of Mr. George Mulvany, R.H.A., the first holder of that office, and, with a small endowment, has raised the collection to a very important place among the minor galleries of Europe. He was also a member of the Committee of Advice for the three special exhibitions of national portraits from 1866 to 1868, and he is a member of the Royal Hibernian Academy. In 1880 he was nominated a Companion of the Order of the Bath; and in 1884 was appointed a Magistrate for the County Wicklow. He married, in 1866, Jane, daughter of the Right Hon. Nicholas Ball, one of the Judges of the Court of Common Pleas in Ireland.

DRAGOMIROU, General, one of the most distinguished generals in the Russian Army during the Russo-Turkish war, and the author of a well-known manual on the preparation of troops for battle. He commanded the advance guard at the passage of the Danube in 1877.

DREYER, John Louis Emil, M.A. and Ph.D., Copenhagen University, born Feb. 13, 1852, at Copenhagen, is the third son of Lieut.-General Dreyer, late Inspector-General, Royal Danish Engineers. He was Astronomer at the Earl of Rosse's Observatory, Birr Castle, 1874; Assistant Astronomer at the Observatory of Trinity College, Dublin, 1878; Director of Armagh Observatory, 1882; and was Joint Editor of *Copernicus: an International Journal of Astronomy*, Vols. I.-III., 1881-84. He is the author of "Second Armagh Catalogue of 3300 Stars for 1875, from Observations made in the Years 1859-83 under the Direction of T. R. Robinson," Svo., 1886; "A new General Catalogue of Nebulæ and Clusters of Stars," 4to., 1888 (Mem. R. Astr. Soc.); "Tycho Brahe: a Picture of Scientific Life and Work in the Sixteenth Century," Svo., 1890; and various papers in *Proc. R. Irish Acad.*, *Monthly Notices R. Astr. Soc.*, *Copernicus*, and in the *Encyclopædia Britannica*, 9th edit.

DRIVER, Professor, The Rev. Samuel Rolles, D.D., born in 1846, was educated at Winchester College and New College, Oxford, of which he was elected Scholar in 1865, and graduated with First Class honours in *Literæ Humaniores* in 1869, was Fellow of New College from 1870 to 1882, and Tutor from 1875 to 1882. He applied himself early to the study of Hebrew and of other Semitic languages, and obtained the two University Hebrew Scholarships in 1866 and 1870 respectively, and was appointed, in 1875, member of the Old Testament Revision Company. In 1882 he was appointed to the Regius Professorship of Hebrew at Oxford (with a Canonry of Christchurch attached), a position which he still holds. Since 1884 he has also been Examining Chaplain to the Bishop of Southwell. He is the author of "A Treatise on the Use of the Tenses in Hebrew, and some other syntactical questions," 1874, 2nd edit., 1880; of "Isaiah: his Life and Times, and the Writings which Bear his Name," 1888 (in the series known as "Men of the Bible"); of "Notes on the Hebrew Text of the Books of Samuel, with an Introduction on Hebrew Paleography, &c.," 1890; and of various articles relating to

the Old Testament and Hebrew Philology, in the *Philological Journal*, the *Expositor*, the *Contemporary Review*, &c. He is also the joint editor (with Professors Cheyne and Sanday) of "The Holy Bible (authorised version), with Various Renderings and Readings from the best Authorities," published by the Queen's Printers, 3rd edit., 1889; and joint translator (with Dr. A. Neubauer) of a catena of Jewish commentaries on the 53rd chapter of Isaiah called "The 53rd Chapter of Isaiah according to the Jewish Interpreters." As a Hebraist and student of the Old Testament, he enjoys a reputation upon the Continent and in America.

DROYSEN, Johann Gustav, Professor of History at Berlin, was born July 6, 1808, at Treptow, in Pomerania, and in 1835 became Professor in the University of Berlin, in 1840 in Kiel, in 1848 was intrusted with a commission from the provisional government of the Elbe Duchies to Frankfort, and became at a later date member of the Parliament at Frankfort, and Secretary of the Constitutional Committee. In 1851, Dr. Droysen was nominated a Professor in the University of Jena, and in 1859 returned to Berlin, where he still remains. He is a Chevalier of the Order of Leopold of Belgium, and of the Order of the House of Ernest of Saxony. He has written a "History of Alexander the Great," 1837; "History of Hellenism," 2 vols., 1836-43; "Lectures on the Wars of Freedom," 2 vols., 1846; "Life of Field-Marshal York of Wartenburg," 2 vols., 4th edit., 1863; "History of Danish Politics from Acts and Documents," conjointly with Samwer, 1850; and a "History of Prussian Politics," vols. i.-x., 1855-70; "Characteristics of History," 1875; "Essays on Modern History," 1876. Dr. Droysen has published also "A Translation of Æschylus," 3rd edit., 1868; and a "Translation of Aristophanes," 2nd edit., 1869.

DROZ, Antoine Gustave, son of a well-known French sculptor, was born in Paris in 1832. A series of brilliant sketches which had previously appeared in *La Vie Parisienne*, published in 1868 under the title of "Monsieur, Madame et Bébé," secured for him a literary reputation which was well sustained in "Entre Nous," 1867; "Le Cahier bleu de Mademoiselle Cibot," 1868; "Autour d'une Source," 1869; "Un Paquet de Lettres," 1870 (the two last mentioned first appeared in the *Revue des Deux Mondes*); "Babolein," 1872; "Les

Etangs," 1875; "Tristesses et Sourires," 1884.

DRUMMOND, Professor Henry, the son of Mr. Henry Drummond, J.P., of Stirling, was born at Stirling in 1851, and educated at the Universities of Edinburgh, and Tübingen in Germany. He subsequently passed through the Free Church Divinity Hall, and, after his ordination, was appointed to a Mission Station at Malta. On his return to Scotland, he was appointed a Lecturer in Science at the Free Church College, Glasgow, 1877, and Professor in 1884. He also took charge of a Working Men's Mission in that city. He subsequently travelled with Professor Geikie in the Rocky Mountains and South Africa. He is the author of "Natural Law in the Spiritual World," 1883, a work of original thought, which has elicited much criticism, and is now in the 29th edition, and has been translated into French, German, Dutch and Norwegian. Professor Drummond has also written some interesting accounts of his travels, one of the most noticeable of which is "Tropical Africa," 1888, 3rd edit., 20th thousand, 1890. He is at present, 1890, in Australia. One of his most recent works is "The Greatest Thing in the World—Love;" a sermon based on the text "The greatest of these is Charity." This is now (1890) in the 15th edit., 220th thousand. His latest work is "Pax Vobiscum"—(Peace be with you)—the second of the series, of which "The Greatest Thing in the World" is the first.

DRUMMOND, Professor James, M.A., LL.D., was born in Dublin on May 14, 1835, and was the son of the Rev. William Hamilton Drummond, D.D., M.R.I.A. He went to school at the Rev. D. Flynn's, Dublin, and entered Trinity College, Dublin, in 1851, passing the examination for the degree of B.A. in 1855, and obtaining the first gold medal in classics. Subsequently, in 1882, the University conferred on him the degree of LL.D., and in 1889 he incorporated at Oxford University, and became an M.A. In 1856 he went to Manchester New College, London, where he studied under the Rev. J. J. Tayler and the Rev. James Martineau, and in 1859 he settled at Cross Street Chapel, Manchester, as colleague to the late Rev. William Gaskell. In 1869 he was appointed Professor of Theology at Manchester New College, London, and in 1885 succeeded Dr. Martineau as Principal; a position which he retained on the removal of the College to Oxford in 1889. His principal works are "Spiritual Religion: Sermons on

Christian Faith and Life," 1870; "The Jewish Messiah: a Critical History of the Messianic Idea among the Jews from the Rise of the Maccabees to the Closing of the Talmud," 1877; "Introduction to the Study of Theology," 1884; and "Philo Judæus; or, the Jewish-Alexandrian Philosophy in its Development and Completion," in 2 vols., 1888.

DUBLIN, Archbishop of. See PLUNKET, THE HON. AND MOST REV. LORD WILLIAM CONYNNGHAM.

DU BOISGOBEY, Fortuné, born at Granville (Manche) in 1824, was paymaster to the Army of Africa, and in that capacity made several campaigns from 1844 onwards. His first literary work was a novel entitled "Deux Comédiens," which appeared in the *Petit Journal* in 1868, and was very successful. His reputation was increased by the publication of "L'Homme sans Nom," and "Le Forçat Colonel," 1872, both published in the *Petit Moniteur*. He produced successively, in the journals under the management of M. Paul Dalloz, "Les Gredins," 1873; "La Tresse Blonde," and "Les Collets Noirs," 1874; "L'As de Cœur," and "Le Coup de Pouce," 1875; "Les Mystères du Nouveau Paris," 1876; "Le Demi-monde sous la Terreur," 1877; "La Peau d'un Autre," 1878; "Du Rhin au Nil," "La Main Coupée," "Le Crime de l'Opéra," 1880; "Le Crime de l'Omnibus," "La Revanche de Fernande," "Les Suites d'un Duel," 1882; "Méridol," 1883; "Le Mari de la Diva," "Le Secret de Berthe," 1884; "Le Pouce Crochu," 1885. M. du Boisgobey is the chief of the followers of Gaboriau, and the principal living writer of French "police novels." M. du Boisgobey has for some years been a prolific author—having written nearly 100 volumes, chiefly novels, dealing with Parisian life. In 1885 and 1886 M. du Boisgobey was President of the Committee of the Society of Gens de Lettres.

DUBOIS-PIGALLE, Paul, one of the greatest of living sculptors, was born at Nogent-sur-Seine, July 18, 1829. He was destined by his father for the legal profession, but his artistic tastes constrained him to devote himself to sculpture, and he went to Paris to become the pupil of the sculptor Toussaint, with whom he remained three years. In 1859 he went to Italy, and in 1860 executed at Florence the model for "St. John a Child," which was finished at Rome, exhibited at the Salon of 1863, and is now at the Luxembourg, together with "A Florentine Singer of the Fifteenth

Century." This last is in silvered bronze, and through its many reproductions in smaller size has become very popular. M. Dubois has also studied painting, and has executed fine portraits and beautiful copies of old masters, but has been a very irregular contributor to the Salon exhibitions. In 1873 he was appointed keeper of the Luxembourg Museum, and director of the École des Beaux-Arts, May 30, 1878. Elected a member of the Académie des Beaux-Arts in 1876, he was one of the Jury of Admission for the selection of sculpture at the Exposition of 1878. He is an officer of the Legion of Honour.

DU BOIS-REYMOND, Professor Emil Heinrich, M.D., F.R.S., Member and Perpetual Secretary of the Royal Academy of Sciences of Berlin, Professor in Ordinary of Physiology in the University of Berlin, and Director of the Physiological Institute, was born in Berlin, Nov. 7, 1818. In 1851 Dr. du Bois-Reymond, who by his researches in the department of Animal Electricity has rendered the most important services to science, was elected a member of the Academy. In 1858, after John Müller's death, he was nominated Professor of Physiology in the University, and in 1867 was made a Perpetual Secretary of the Academy. He has written "Investigations on Animal Electricity" (vol. I., 1848, vol. II., Pt. I., 1849, Pt. II., 1860-84). Most of his scientific papers are collected under the title "Gesammelte Abhandlungen zur allgemeinen Muskel und Nervenphysik" (2 vols., Leipsic, 1875 and 1877), and his discourses and speeches on several subjects under the title "Reden" (2 vols., Leipsic, 1886 and 1887).

DU CAMP, Maxime, son of a distinguished French surgeon, Théodore Joseph Du Camp (who died in 1824), was born at Paris, Feb. 8, 1822. On leaving college he travelled extensively in the East in 1844-45, and again in 1849-51. During his last journey, he made a large collection of photographic negatives of scenes in Egypt, Nubia, Palestine, and Asia Minor, which he has since published, in connection with descriptive texts, in several volumes. In 1851 he was one of the five founders of the *Revue de Paris*, and he contributed to it, both in prose and verse, until its suspension in 1858. Besides his works of travel in the East, he has published "Les Chants modernes," poems, 1855; "Mes Convictions," poems, 1858; "En Hollande, lettres à un ami," 1859; "Expédition des Deux Siciles," 1861; "Paris, ses organes, ses fonctions

et sa vie," 6 vols., 1869-75, his most important work, and "L'Attentat Fieschi," 1877, being an account of the attempt, which as a school-boy of twelve he chanced to witness, that was made by Fieschi in the Boulevard du Temple on the life of Louis Philippe, July 28, 1835. "Histoire et Critique.—Études sur la Révolution Française," 1877; "Les Convulsions de Paris," 1878-80; "Souvenirs littéraires," 1882; "La Charité privée à Paris," 1885. M. Du Camp has been an officer of the Legion of Honour since 1853. He was elected a member of the French Academy Feb. 26, 1880, in the room of M. St. René Taillandier, partly as a mark of gratitude on the part of the Conservatives for his crushing history of the Commune, called "Les Convulsions de Paris."

DUCANE, Major-General Sir Edmund Frederick, K.C.B., son of Major Richard Du Cane, by Eliza, daughter of Thomas Ware, Esq., of Woodfort, near Mallow, co. Cork, was born at Colchester, in 1830. He was educated at the Military Academy, Woolwich, and obtained his commission as second Lieutenant in the Royal Engineers Dec. 19, 1848. In 1850 he was appointed to assist in preparing for the Great Exhibition of 1851, and he appears in the list of the Staff as assistant secretary to the jurors and assistant superintendent of the foreign side. At that time Lord Grey was forming a convict establishment in Western Australia to carry out a system embodying all the improvements which nearly a century of experience had suggested, and a company of sappers, to which Lieutenant Du Cane was appointed, was sent out to assist in the operation. He was made a magistrate of the colony and a visiting magistrate of convict dépôts, and directed the labour of the convicts, who were employed in developing the communications of the colony. In July, 1856, he was attached to the War Department for special service, and after being engaged for some time in connexion with the design and sanitary arrangement of barracks, was employed on the design of the large works of defence undertaken under the auspices of Lord Palmerston. Among other works, the fortification of the western heights at Dover and the long line of works miles in extent which protect the dockyard at Plymouth on the land side between the Tamar and the east side of Plymouth Sound have been carried out on plans submitted by him to the Defence Committee. In Feb., 1854, he had been promoted to be first lieutenant, and on April 16, 1858, he became second captain. In July, 1863, he

was appointed by Sir George Grey a director of Convict Prisons when the Board was reconstructed after the death of Sir Joshua Jebb, and when the report of the Royal Commission on Penal Servitude suggested considerable modifications in the convict system. He was at the same time appointed by Lord Ripon to be Inspector of Military Prisons. In 1869, Captain Du Cane was made Chairman of Directors of Convict Prisons, Surveyor-General of Prisons, and Inspector-General of Military Prisons. In July, 1872, he was promoted to be Major, and on Dec. 11, 1873, to be Lieutenant-Colonel, having also in the same year been made a Companion of the Bath. The Emperor of Brazil has conferred on him the Order of the Rose. In Dec., 1878, he was promoted to be Colonel. In July, 1877, he was created a K.C.B., and made Chairman of the Prison Commissioners, appointed by Royal Warrant under the Prisons Act, 1877, to undertake the difficult task of reorganising and administering the county and borough prisons, which from April 1, 1878, came under the control of the Government. In pursuance of this object the number of prisons has been reduced from 113 to 58, the rules have been made uniform, many important improvements introduced and the cost has been very largely diminished. In Dec., 1886, Colonel Du Cane retired from the effective list and was made a Major-General. He is the author of various articles in magazines, and also of a book on the "Punishment and Prevention of Crime." In July, 1855, he married Mary Dorothea, daughter of Lt.-Col. J. Molloy, formerly of the Rifle Brigade. She died in 1881, and in 1883 he married Florence Victoria, daughter of Col. and Lady Marie Saunderson and widow of M. J. Grimston, Esq., of Kilnwick and Grimston Gaeltor, Yorkshire.

DU CHAILLU, Paul Belloni, was born in Paris, July 31, 1835. His father was a trader on the west coast of Africa, whither Paul went at an early age, and where he acquired a knowledge of the languages and modes of life of the neighbouring tribes, also devoting much attention to natural history. In 1852 he went to the United States with a cargo of ebony, and published a series of papers on the Gaboon country. In 1855 he returned to Africa, and spent about four years exploring the then unknown region lying two degrees on each side of the equator, penetrating to about longitude 14° 15' E. During this time he shot and stuffed a great number of birds and quadrupeds, among which were several gorillas, a species probably never

before seen by any European. He returned to New York in 1859, taking with him a large collection of native arms and implements, and numerous specimens in natural history, which were publicly exhibited, and many of which were afterwards purchased by the British Museum. The history of this expedition was published under the title "Explorations and Adventures in Equatorial Africa," 1861; revised edition, 1871. A sharp controversy arose concerning the truthfulness of this book, and to vindicate himself Du Chaillu again visited Africa in 1863, where he remained until 1865. He published an account of this expedition under the title "A Journey to Ashango Land," 1867. He then spent several years in the United States, where he lectured frequently, publishing in the meanwhile a series of books for the young, comprising:—"Stories of the Gorilla Country," 1868; "Wild Life under the Equator," 1869; "Lost in the Jungle," 1869; "My Apingi Kingdom," 1870; and "The Country of the Dwarfs," 1871. More recently he has made an extended visit to Sweden, Norway, Lapland, and Finland, which he described in "The Land of the Midnight Sun," 1881, and "The Viking Age," 2 vols., 1889. Two of his earlier works he has lately, 1890, reissued in a condensed form under the title of "Adventures in the Great Forest of Equatorial Africa and the Country of the Dwarfs."

DUCKETT, Sir George Floyd, Bart., F.S.A., son of the late Sir George Duckett, Bart., F.R.S. (the translator from the German of Michaelis's "Burial and Resurrection of our Saviour," of Herder on the "Revelation of St. John," of "Luther's Preface to St. Paul's Epistle to the Romans," &c.); born March 27, 1811, was educated at Harrow, and Christ Church, Oxford, and succeeded to the title on his father's death, June 15, 1856. He is the author of a "Technological Military Dictionary in German, English, and French," for which he has received the "Great Gold Medal of Science" from the Emperor of Austria; the gold medal of literary merit from the Emperor of the French; and another, "The Great Gold Medal of Science and Art," from the late King of Prussia. Sir George is the author of a genealogical work entitled "Duchetiana," which forms a valuable and important addition to the county histories of Westmorland, Wiltshire, and Cambridgeshire. He has also edited the "Test Act and Penal Law Returns in 1687-8" for the entire counties of England and Wales; the "Monasticon

Cluniacense Anglicanum; Visitations of English Cluniac Foundations in 1262, 1275, 1279, 1298, 1390, 1405;," "Naval Commissioners from the Restoration to Geo. III;," "Charters relating to John, King of France, and the Treaty of Brétigny in 1360;," besides numerous contributions to the Antiquarian Societies of Westmorland, Yorkshire, Sussex, and Wilts. Sir Floyd Duckett obtained the highest literary honour which the French Government has to bestow, the *Palme d'or*, as an officer of Public Instruction in France. He is also a corresponding member of the *Société d'Antiquaires de Normandie*; and received a grant of £200 in 1890 from the Royal Bounty Fund for special literary services. Sir George Floyd Duckett has (1890) just been made a Knight of the Gold Cross of Merit of Saxe Coburg-Gotha.

DUCKHAM, Thomas, was born Sept. 26, 1816, at Shirehampton, near Bristol, and was educated at the village school, and afterwards at Hereford and Bristol. He began his agricultural career at Warham in 1849, when, on the severe depression following the Repeal of the Corn Laws, he agreed for his farm upon a corn-rent regulated by the corn averages under the Tithe Commutation Act. Five years later he removed to Baysham Court, near Ross. Here he took an active interest in the game question, and frequently drew attention to the evils arising from excessive preservation. In 1857 he purchased the copyright of the "Hereford Herd Book," and was its editor for 20 years, at the end of which time he gave it up on account of ill-health. In 1866 he presided at the first two meetings in London for the formation of the Central and Associated Chambers of Agriculture; has been a member of Council since their formation, and was President in 1884, and devoted so much time and labour to the interests of the agricultural classes that he was invited to stand for Herefordshire in 1880, when he was elected without any canvassing expenses, and again returned for North Herefordshire in 1885. Many of the reforms for which Mr. Duckham had long agitated became law in the parliament of 1880, such as a better system for obtaining Corn Returns, the Ground Game Act, the Repeal of the Malt Tax, the amending of the Agricultural Holdings Act, the Law of Distress, the Contagious Diseases (Animals) Act, and Relief of Local Taxation. Mr. Duckham has been a member of the Council of the Bath and West of England Association since 1863, is a member of the Council of the Smithfield Club, and of the Council of the Royal Agri-

cultural Benevolent Institution. At the general election of 1886 he was defeated by Mr. Biddulph, Unionist-Liberal. He long agitated for a County Government Act, and repeatedly pressed upon the late Government his views thereon. Upon the Act coming into operation he was elected a senior Alderman. He is a J.P. for the county.

DUCKWORTH, Sir Dyce, M.D., brother of the Rev. Canon Duckworth, D.D., and youngest son of the late Robinson Duckworth, Esq., of Liverpool. He was born in that city in 1840, and educated at the Royal Institution School there, and at the University of Edinburgh, where he graduated M.D. (Gold Medallist) in 1863, also at St. Bartholomew's Hospital. He served as Assistant-Surgeon in the Royal Navy 1864-65; was elected Medical Tutor at St. Bartholomew's Hospital, London, subsequently Assistant-Physician there in 1869, and full Physician and Lecturer on Clinical Medicine in 1883. He was made a Fellow of the Royal College of Physicians in 1870; is hon. M.D. of the Medical College of Ohio, U.S.A., and M.D., *honoris causa*, of the Royal University of Ireland. He was elected hon. Fellow of the King and Queen's College of Physicians in Ireland in 1887; and was the Representative of the Royal College of Physicians of London in the General Medical Council of the United Kingdom, and at the International Colonial Medical Congress at Amsterdam, 1883. He has been an Examiner in the Universities of Edinburgh and Durham, and on the Conjoint Board for England; and is Examiner in Medicine in the Victoria University. He is the author of a "Treatise on Gout," 8vo., 1889, and editor of Warburton Begbie's Works, and is the author also of numerous contributions to clinical medicine. He received the honour of Knighthood in 1886; was appointed treasurer of the Royal College of Physicians in 1884; and made an hon. member of the Royal Medical Society of Edinburgh in 1887; and is in practice as a Consulting Physician in London.

DUCKWORTH, The Rev. Canon Robinson, D.D., second son of the late Robinson Duckworth, Esq., of Liverpool. He was born in 1834, elected to an open scholarship at University College, Oxford, in 1853, and graduated B.A. in first-class classical honours in 1857; he was afterwards elected a Fellow of Trinity, and was Assistant-Master at Marlborough College from 1858 to 1860, and Tutor of Trinity College from 1860 to 1866. In 1864 he was appointed Examining Chaplain to the late Bishop of Peterborough

and in 1866 was selected by her Majesty as instructor to his Royal Highness the late Prince Leopold. In 1867 he was appointed Governor to his Royal Highness, and held that post for three years. On his retirement in 1870 he was appointed Chaplain in Ordinary to the Queen, and presented to the crown living of St. Mark's, Hamilton Terrace, N.W. He was appointed a Canon of Westminster in succession to the late Rev. Charles Kingsley in March, 1875. In the same year he was appointed Honorary Chaplain to the Prince of Wales, and in that capacity accompanied his Royal Highness on his visit to India.

DUFF, The Right Hon. Sir Mountstuart Elphinstone Grant, G.C.S.I., F.R.S., P.R.G.S., son of the late James Cuninghame Grant Duff, Esq., of Eden, Aberdeenshire (formerly Resident at Sattara, and author of "The History of the Mah-rattas"), by Jane Catherine, only child of the late Sir Whitelaw Ainslie, M.D. Mr. M. E. Grant Duff was born in 1829, and educated at Edinburgh, and at Balliol College, Oxford, where he graduated B.A. in 1850, and proceeded M.A. in 1853. He was called to the Bar at the Inner Temple in 1854, having obtained a certificate of honour and a studentship in the preceding year. He entered the House of Commons in Dec., 1857, as member for the Elgin district of burghs, and he continued to represent that constituency in the Liberal interest till July, 1881. He was appointed Under-Secretary of State for India in Dec., 1868, and he held that office till the downfall of Mr. Gladstone's administration in Feb., 1874. On the formation of Mr. Gladstone's second administration in May, 1880, he was appointed Under-Secretary of State for the Colonies. This office he resigned, together with his seat in Parliament, in July, 1881, on being appointed Governor of Madras in the place of the late Mr. William Patrick Adam. During his successful administration of this great province, Sir M. E. Grant Duff made several tours from end to end of the Presidency in order to see with his own eyes what required to be done. In 1886 he resigned the Governorship, and was succeeded by Mr. Bourke. Sir M. E. Grant Duff was Lord Rector of the University of Aberdeen from 1866 to 1872. He is the author of "Studies in European Politics;" "Elgin Speeches;" "A Political Survey;" and other works. He married, in 1859, Anna Julia, only child of Mr. Edward Webster, of Ealing, Middlesex.

DUFFERIN and AVA (Marquis of), The Right Hon. Frederick Temple Black-

wood, K.P., G.C.B., G.C.M.G., G.C.S.I., G.C.I.E., British Ambassador at Rome, is the only son of Price, fourth Baron Dufferin, by Helen Selina, eldest daughter of the late Thomas Sheridan, Esq. (she re-married in 1862 the Earl of Gifford, and died in 1867). From Eton School his lordship was sent to Christ Church, Oxford, where he took his degree. He succeeded to his father's title, July 21, 1841, while still in his minority; and for some years he was a lord-in-waiting on the Queen under Lord John Russell's first administration, and again in 1854-58. Accompanied by a friend he went from Oxford to Ireland at the time of the famine in 1846-47, and on his return published an account of his experiences under the title of "Narrative of a Journey from Oxford to Skibbereen, during the year of the Irish Famine." In Feb., 1855, he was specially attached to the mission undertaken by Lord John Russell to Vienna. In 1859 he made a yacht voyage to Iceland, a well-known narrative of which expedition he published in the following year under the title of "Letters from High Latitudes." He was sent to the East by Lord Palmerston in 1860, as British Commissioner in Syria, for the purpose of prosecuting inquiries into the massacre of the Christians there. For his services on that occasion he was nominated on his return a K.C.B. (civil division). He was Under-Secretary of State for India from 1864 to the early part of 1866, and Under-Secretary for War from the latter date to the following June. On the advent of Mr. Gladstone to power in Dec., 1878, he was nominated Chancellor of the Duchy of Lancaster and Paymaster-General, and he held that office till April, 1872, when he was appointed Governor-General of the Dominion of Canada. In the summer of 1876 his lordship, who was accompanied by Lady Dufferin, made a very successful tour through British Columbia, where much discontent had prevailed in consequence of a belief that the conditions had been broken on which that remote province had joined the Dominion of Canada. He held the post of Governor-General of Canada till Oct., 1878, when he was succeeded by the Marquis of Lorne. In May, 1878, he was elected President of the Royal Geographical Society, and in the following month he attended the Harvard University Commemoration, when the honorary degree of LL.D. was conferred upon him. The honorary degree of LL.D. was conferred upon him by the University of Dublin also, Jan. 22, 1879, and that of D.C.L. by the University of Oxford in the following June. In Feb., 1879, he

was appointed ambassador at St. Petersburg in succession to Lord Augustus Loftus. He was transferred to Constantinople as ambassador to the Ottoman Porte in May, 1881. On Oct. 30, 1882, he was directed by Her Majesty's Government to proceed from Constantinople to Cairo, there to assume the control of the whole body of our relations with Egypt, and the settlement of all questions growing out of Arabi's rebellion. He left Egypt in April, 1883, and in Nov., 1884, proceeded to India as Viceroy. In 1888 he was appointed British Ambassador at Rome. His lordship was created an English baron in 1850; nominated a Knight of St. Patrick in 1863; appointed Lord Lieutenant of the county of Down in 1864; sworn a Privy Councillor Dec. 12, 1868; was made an Earl of the United Kingdom in Nov., 1871; and created a G.C.B. in 1883. In the same year he became Vice-Admiral of Ulster, and G.C.S.I. and G.C.I.E. in 1884. In 1888 he was created Marquis of Dufferin and Ava. In addition to the works already mentioned, the Earl of Dufferin is the author of "Irish Emigration and the Tenure of Land in Ireland;" "Mr. Mill's Plan for the Pacification of Ireland examined;" and "Contributions to an Inquiry into the State of Ireland." A collection of his "Speeches and Addresses" was published in 1882 under the editorship of Mr. Henry Milton, and his "Speeches in India," edited by Sir Donald Wallace, in 1890. The marquis married, in 1862, Harriet, eldest daughter of the late Captain Archibald Rowan Hamilton, of Killyleagh Castle, county Down.

DUFFY, The Hon. Sir Charles Gavan, K.C.M.G., was born in Monaghan in 1816, descended of a native family which produced eminent scholars and ecclesiastics. In his twentieth year Mr. Duffy became sub-editor of the *Dublin Morning Register*, and a little later editor of an influential journal in Belfast. He returned to Dublin in 1842, and established the *Nation* in conjunction with Thomas Davis and John Dillon. A remarkable literature sprang up in connection with the *Nation*, one of Mr. Duffy's contributions to which, the "Ballad Poetry of Ireland," has run through forty editions. In 1844 Mr. Duffy was tried and convicted of sedition along with O'Connell; the conviction, however, was set aside, on appeal, by the House of Lords. In 1846 O'Connell quarrelled with the Young Ireland Party, and they established the Irish Confederation, of which Mr. Duffy was one of the founders. He was tried with the other

leaders of that body for treason-felony in 1848, but after four indictments it was found impossible to procure a conviction. He then revived the *Nation*, which had been suppressed, and opposed Sir Thomas Redington, Under-Secretary for Ireland in the Government which had prosecuted him, and defeated that gentleman at New Ross, for which borough Mr. Duffy was elected member in July, 1852. It should be mentioned that Mr. Duffy had been called to the Bar in 1846; but he practised for only a short period. He was one of the founders of the Tenant League; and, in connection with Frederick Lucas and George Henry Moore, founder of the Independent Irish Party in the House of Commons, which sprang out of the League. The defection of a large section of that party induced him to resign his seat in Parliament in 1856, when he emigrated to Australia. He practised for some time at the Bar in Melbourne, but was finally drawn back to politics, and in 1857 became Minister of Public Works in the first administration under responsible government in Victoria. In the same year he was Chairman of a Select Committee in the Legislature to procure the federation of the Australian Colonies, and at a later period Chairman of a Royal Commission for the same purpose, and author of the Reports of these bodies, on which the plan of federation has since been advocated. In 1858 he became Minister of Lands, which office he again accepted in a third administration in 1862. After a visit of two years to Europe, he re-entered Parliament in Victoria, and became Prime Minister in 1871. While he held this office he was Chairman of a Conference of all the Australian Governments to procure certain enlargement of their powers, which has since been conceded by the Imperial Parliament. In the following year he resigned office, and in 1873 was knighted. On his return to the colony in 1876, after two years' absence in Europe, he was chosen a member of the Legislative Assembly on the first vacancy occurring; and on the meeting of a new Parliament in May, 1877, he was unanimously elected Speaker of the Legislative Assembly. In the same year he was created a Knight Commander of the Order of St. Michael and George. Sir Gavan Duffy was Chairman of the Trustees of the National Gallery of Victoria, and has taken an active share in projects for encouraging art, literature, and industrial enterprise in that new country. He returned to Europe in 1880, and has since published "Young Ireland; a Fragment of Irish

History, 1840-50," London, 1880; and "Four Years of Irish History, 1845-49," published in 1883, being a sequel to "Young Ireland;" and written on Colonial and Irish questions in the *Contemporary Review*, *Nineteenth Century*, and *National Review*.

DUMAS, Alexandre, the younger, son of the late M. Alexandre Davy Dumas, novelist and dramatic writer, was born in Paris, July 28, 1824, and received his education in the Collège Bourbon. At the age of seventeen he published a collection of poems, "*Les Péchés de Jeunesse*," a work of small literary merit. He travelled with his father in Spain and in Africa, and on his return wrote "*Les Aventures de Quatre Femmes et d'un Perroquet*," published in 1846-7. He may be said to belong to the sensuous school of French literature. His principal work of fiction, "*La Dame aux Camélias*," became one of the best-known productions of the day. A dramatic version was played in 1852, after having been interdicted by M. Léon Faucher, and, reproduced in Verdi's opera, "*La Traviata*," created a still greater sensation. M. Dumas, who has written many dramatic pieces, is considered by the public the greatest living dramatist of the *Demi-monde*. A comedy from his pen, entitled "*Les Idées de Madame Aubray*," was produced at Paris early in 1867. His "*Visite de Noces*" and "*La Princesse Georges*" were brought out at the Gymnase Dramatique in 1871. In 1872 he published a pamphlet entitled "*L'Homme-Femme*." It repeated the thesis of his novel "*L'Affaire Clémenceau*," and a dramatic version of it was produced at the Gymnase, in 1873, under the title of "*La Femme de Claude*." M. Dumas was installed as a member of the French Academy, Feb. 11, 1875. His drama, "*Joseph Balsamo*," based on his father's romance of "*Cagliostro*," was represented for the first time at the Odéon, March 18, 1878. He published in 1880, "*Les Femmes qui tuent et les Femmes qui votent*;" in 1881, "*La Princesse de Bagdad*;" in 1885, "*Denise*;" and in 1887, "*Francillon*."

DU MAURIER, George Louis Palmella Busson, artist, was born March 6, 1834, and educated in Paris, but is a British subject. His grandparents on his father's side were émigrés from France during the Reign of Terror. He came over to England at the age of seventeen, and studied chemistry under Dr. Williamson at University College, London. Afterwards he studied painting in Paris under

the famous M. Gleyre, also in Antwerp and Düsseldorf. He first began to draw on wood in England for *Once a Week*, afterwards for *Punch* and the *Cornhill Magazine*, and subsequently he joined the *Punch* staff. Since that time his weekly drawings have made him one of the best known and most admired of contemporary artists. Mr. Du Maurier has illustrated "Esmond," "The Story of a Feather," Thackeray's "Ballads," and many other books. He is also an Associate of the Royal Society of Painters in Water Colours. A special exhibition of his works was held at the rooms of the Fine Art Society in 1885.

DÜMICHEN, Johannes, Egyptologist, born Oct. 15, 1833, at Wissholz, near Grossglogau, in Silesia, is the son of a clergyman. Having studied the Egyptian language and antiquities under Professor Lepsius, in Oct., 1862, he went upon an archaeological expedition to Egypt, under the auspices of the Prussian Government. When there, he extended his travels to Nubia and the Soudan, and spent several years altogether in the Nile Valley. In 1868 he went to Egypt a second time at the command of the King of Prussia, and added considerably to the number of his photographs of the monuments. The results of these travels appeared in a splendid work, published at Berlin, in 2 vols., 1869-70. The opening of the Suez Canal afforded him a third opportunity of visiting the Nile countries at the special invitation of the Khedive. On this occasion he acted as the *cicerone* of the Prussian Crown Prince on his travels through Egypt. Besides the work already referred to should be mentioned his "*Baukunde der Tempelanlagen von Dendera*," 1865; "*Geographische Inschriften*," 2 vols., 1865-66, and a volume of text; "*Altägypt. Kalendarschriften*," 120 plates, 1866; "*Altägypt. Tempelinschriften*," 2 vols., 1867; "*Die Flotte einer ägypt. Königin*," 33 plates, with text, 1868; and simultaneously in English, having been translated by the author's wife, who is an Englishwoman, "*Historische Inschriften altägypt. Denkmäler*," 2 vols., folio, 1867-69; "*Eine altägypt. Getreiderechnung*," 1870; besides numerous contributions to Lepsius and Brugsch's "*Journal for the Egyptian Language and Antiquities*," and his epitome of Egyptian history, "*Geschichte des alten Ägyptens*," 1879. Herr Dümichen is now Professor of Egyptology at Strasburg.

DUMMLER, Ernst Ludwig, a German historian, was born at Berlin, Jan. 2,

1830, studied at Bonn and Berlin, and settled in 1855 at Halle, where he was appointed Extraordinary Professor of History in 1858, and ordinary Professor in 1866. He is a member of the Academy of Munich, and since 1871 he has been an ordinary member of the Historical Commission of Munich. He was elected a corresponding member of the French Academy of Sciences, March 30, 1882. Among his works we may mention: "The Pilgrim of Passau, and the Archbishopric of Lorch," 1854; "On the Early History of the Slavs in Dalmatia," 1856; "The Formulary of Bishop Salomo III. of Constance," 1857; "History of the Kingdom of the Eastern Franks," 2 vols., 1862-65, his principal work, which was "crowned" with two prizes; "Auxilius and Bulgarius," 1866; "Anselm the Peripatetic," 1872; and "The Emperor Otho the Great," 1876.

DUNCKLEY, Henry, M.A., LL.D., J.P., was born at Warwick, Dec. 24, 1823, and educated at the Baptist College, Accrington, and the University of Glasgow, where he graduated M.A. in 1848. In the same year he became minister of the Baptist Church, Great George Street, Salford, retiring from that position in 1855, to undertake the editorship of the *Manchester Examiner and Times*, of which he became a co-proprietor a few years later. In 1850 a First Prize, offered by the Religious Tract Society, was awarded to his essay on the condition of the working classes, entitled, "The Glory and the Shame of Britain." In 1853 a First Prize, offered by the Council of the Anti-Corn Law League for the best work, "showing the results of the repeal of the Corn-Laws, and the Free Trade Policy, on the moral, the social, the commercial, and the political interests of the United Kingdom," was awarded to his essay, entitled, "The Charter of the Nations." In 1877 he began, in the *Manchester Weekly Times*, the publication of a series of weekly letters on current topics of the day, with the signature of "Verax," a pseudonym but slightly veiling the authorship. Five of these letters, suggested by the third volume of Sir Theodore Martin's "Life of the Prince Consort," and entitled, "The Crown and the Cabinet," were published separately, and reached a very wide circulation. A volume of "Letters" was published in 1878; and smaller selections have been published from time to time. In 1878 Mr. Dunckley was elected a member of the Reform Club, as a recognition of services rendered to the Liberal party. He has recently been a contributor to some

of the leading periodicals. In 1883 the University of Glasgow conferred on Mr. Dunckley the honorary degree of LL.D. In 1886 he was put on the Commission of the Peace for the city of Manchester. His connexion with the *Examiner and Times* ceased on the 25th of January, 1889, when the paper was transferred to new proprietors.

DUNKIN, Edwin, F.R.S., F.R.A.S., is the third son of the late Mr. William Dunkin, of the "Nautical Almanac" office, by his wife, Mary Elizabeth, youngest daughter of Mr. David Wise, surgeon, of Redruth, Cornwall. He was born at Truro on Aug. 19, 1821, and educated at private schools, first at Truro, and afterwards in London and at Guines, near Calais. In Aug., 1838, he joined the staff at the Royal Observatory, Greenwich. In July, 1856, he was appointed a First-class Assistant, and in Aug., 1881, Chief Assistant, from which post he retired in Aug., 1884, after forty-six years' service. During this period he was the representative of the Astronomer-Royal in several important astronomical expeditions, including the observations at Christiana, of the total solar eclipse of July 23, 1851; the determination of the telegraphic difference of longitude between the Royal Observatory and the observatory at Brussels in 1853, of Paris in 1854, and of the island of Valencia, Ireland, in 1862. In the autumn of 1854, Mr. Dunkin had the sole charge of the Astronomer-Royal's elaborate series of pendulum experiments in the Harton coal-pit, near South Shields, undertaken to determine the mean density of the earth, a work of considerable responsibility and delicacy. Besides taking a prominent part in the duties belonging to his official position, Mr. Dunkin is the author of several memoirs and papers on astronomical questions, published in the "Memoirs" and "Monthly Notices" of the Royal Astronomical Society, the *Journal of the Royal Institution of Cornwall*, the "Companion to the British Almanac," and in various periodicals. In 1860 he re-arranged and re-wrote a large portion of Dr. Lardner's "Handbook of Astronomy" for a second edition, which rendered the work of more practical use to students. Some of his most popular articles, originally published in the *Leisure Hour*, were in 1869 collected into a volume under the title of "The Midnight Sky," and in 1879 appeared a series of short biographical sketches entitled "Obituary Notices of Astronomers." Mr. Dunkin was elected a Fellow of the Royal Astronomical Society on March 13, 1845. From 1871

to 1877 he served as Honorary Secretary, and subsequently as Vice-President on several occasions. On Feb. 8, 1884, he was elected President of the Society, and has since delivered special addresses on the presentation of the Gold Medal to Dr. Huggins in 1885, and to Profs. Pickering and Pritchard in 1886. On June 1, 1876, he was elected a Fellow of the Royal Society, and in 1879-81 had a seat in the Council. In Nov., 1889, Mr. Dunkin was elected President of the Royal Institution of Cornwall for two years, and has delivered the Annual Address at its spring meetings.

DUNRAVEN, Wyndham Thomas Wyndham-Quin, fourth Earl of, K.P., the only son of the third earl by his first wife, Augusta, daughter of Thomas Goold, Esq., was born at Adare Abbey, Feb. 12, 1841. He was educated at Christ Church, Oxford, and entered the 1st Life Guards in 1865. Whilst an officer in the Household Brigade he won popularity as a steeple-chase rider. He left the army in 1867, and went to Abyssinia as correspondent of the *Daily Telegraph*. He followed the Franco-German war again as a special correspondent for the same journal, and in 1871 succeeded to the title and estates. In 1875 he was appointed lord-lieutenant and sheriff principal of the county of Stirling. He was under-secretary for the Colonies in Lord Salisbury's two administrations, but resigned in Feb., 1887. Lord Dunraven is an authority on hunting. In economical matters he is a believer in the doctrine of what is called "Fair Trade." He is the author of "The Great Divide," "Notes on Irish Architecture," "The Soudan, its History, Geography, and Characteristics," and various papers on hunting which have appeared in the *Nineteenth Century*.

DUPRÉ, August, Ph.D., F.R.S., F.I.C., &c., born at Mainz (Mayence), on Sept. 6, 1835, where his father, although a citizen of the then free city of Frankfort, at that time resided. Both father and mother were descendants of Huguenot families who, after the revocation of the Edict of Nantes, had immigrated into the Bavarian Palatinate. After passing through the polytechnic schools of Gießen and Darmstadt, he studied for three years at the Universities of Gießen and Heidelberg, under Bunsen, taking his degrees of M.A. and Ph.D. in 1855 at the latter university. Soon afterwards he came to London, where he has remained ever since. In 1863 he was elected Lecturer on Chemistry to the Westminster Hospital Medical School (a

post which he still occupies). He has since that time been actively engaged as a scientific and consulting chemist. He has published many original papers on subjects connected with Chemistry, Physiology, Toxicology, Food Analysis, and Water, in the "Philosophical Transactions," "Proceedings of the Royal Society," "Journal of the Chemical Society," *Analyst*, and in the Annual Reports of the Medical Officer to the Local Government Board, &c. In 1871 he was appointed Chemical Referee to the Medical Department of the Local Government Board; in 1872, Chemical Adviser to the Explosives Department of the Home Office; in 1873, Public Analyst for the Westminster District; and in 1888 he was appointed a member of the War Office Committee on Explosives, under the presidency of Sir F. Abel, C.B. (which post he now holds). In his connexion with the Home Office, his name came prominently before the public in relation to the various dynamite outrages. He has frequently been consulted by various Government Departments, viz., the Treasury, the Board of Trade, the Wreck Commissioners Court, &c.; and also by the late Metropolitan Board of Works, especially with regard to the treatment and disposal of the metropolitan sewage. He has, in conjunction with Dr. Thudicum, published a book on "The Nature, Origin, and Use of Wine," 1872; and, in conjunction with Dr. H. Wilson Hake, "A Short Manual of Chemistry," 1886. He was elected a Fellow of the Royal Society in 1875, and was President of the Society of Public Analysts in the years 1877-78; was one of the chief scientific witnesses on behalf of the Crown in the famous Dr. Lamson's poisoning case; was President of Section III. of the British Sanitary Congress held at Bolton in 1887. In 1870 he was for some time attached to a field-hospital, established by the English Red Cross Society, for the treatment of both German and French wounded in the late Franco-Prussian War. He married, in 1876, Florence M. Robberds, daughter of H. T. Robberds, of Manchester, by whom he has a family of four sons and one daughter.

DURAN, CAROLUS. See CAROLUS-DURAN.

DURAND, Alice Marie Céleste, French authoress (who writes under the name of Henry Gréville), was born in Paris. She was carefully educated at home, and when, at the age of fourteen, she accompanied her father, Prof. Fleury, to St.

Petersburg, she was familiar with several modern languages. She soon began to publish novels and stories on Russian life and character, and continued writing after her marriage with M. Durand, a French professor of law. In 1872 she returned to France, and began to write for the *Revue des Deux Mondes*, *Figaro*, *Le Temps*, and other periodicals and papers. Under the name of Henry Gréville she has published a large number of novels, amongst which may be mentioned, "Doria," "L'Expiation de Savéli," 1876; "Nouvelles Russes," "Sonia," "La Maison de Maurèze," "Autour d'un Phare," 1877; "Bonne Marie," "L'Amie," "Un Violon Russe," "Lucie Rodey," 1879; "Croquis," "Cité Menard," 1880; "Mme. de Dreux," "Perdue," 1881; "Le Fiancé de Sylve," "Rose Rozier," 1882; "Une Trahison," "Le Vœu de Nadier," "Louis Breuil," 1883; "Le Mors aux Dents," 1885.

DURNFORD, The Right Rev. Richard, D.D., Bishop of Chichester, eldest son of the Rev. Richard Durnford, rector of Goodworth Clatford, Hampshire, by Louisa, daughter of Mr. William Mount, of Wasing Place, Berkshire, was born at Sandleford, Berkshire, in 1802. He received his education at Eton, where he was a contributor to the celebrated *Etonian*, of which the late Mr. Winthrop Mackworth Praed was editor; and many of his Latin verses appear in the *Musæ Etonenses*. He passed in due course from Eton to Oxford, and was elected successively a Demy and a Fellow of Magdalen College, where he took his B.A. degree in 1826, obtaining a first class in classical honours, and proceeded M.A. in 1829. In 1835 he was appointed rector of Middleton, Lancashire. He was preferred to the archdeaconry of Manchester in 1867, and made a Canon of Manchester Cathedral in 1868. He was chosen to be one of the Proctors in Convocation. In 1870, on the recommendation of Mr. Gladstone, he was nominated by the Crown to the bishopric of Chichester, being consecrated at Whitehall on May 8. Bishop Durnford has devoted himself earnestly to the prominent movements of the time within the Established Church, especially temperance, middle-class education, and the organized work of women. He has published some sermons and charges. He married in 1830, Emma, daughter of the late Rev. John Keate, D.D., head-master of Eton and Canon of Windsor.

DURUY, Professor Jean Victor, born in Paris in 1811, began his classical studies

in 1823 at the Collège Rollin, then called Collège Sainte-Barbe; was admitted into the Normal School in 1830, was appointed to the class of history at the Collège of Rheims in 1833, and in the same year to a similar position in the Collège of Henry IV., in Paris, afterwards called the Collège Napoléon. About this time he published anonymously various elementary historical works. In 1853 he took the degree of Doctor "ès lettres," afterwards became Inspector of the Academy of Paris, Master of the Conferences at the École Normale, Professor of History at the École Polytechnique, and by decree, June 23, 1863, was appointed Minister of Public Instruction, in which Department he introduced many changes, chiefly in the direction of secularizing instruction, and rendering it gratuitous. On resigning the office of Minister of Public Instruction in July, 1869, he was appointed a Senator, and remained a member of the Senate until the revolution of Sept. 4, 1870. His principal works are: "Géographie Politique de la République Romaine et de l'Empire," 1838; "Géographie Historique du Moyen Age," 1839; "Géographie de la France," 1840; "Atlas de Géographie Historique," 1841; "Histoire de la République Romaine," 1843-4; "Histoire de France," 1852; "Histoire de la Grèce Ancienne," 1852—a work "crowned" by the French Academy; "Histoire Moderne," 1863; "Histoire Populaire de la France," 1863; "Introduction Générale à l'Histoire de France," 1865; "Histoire des Romains depuis les temps les plus reculés jusqu'à la mort de Théodose," 7 vols. grand in 8vo., illustrés de 3,000 gravures d'après l'antique, 1879-88; "Histoire de la Grèce," 3 vols. grand in 8vo., illustrés de 2,000 gravures d'après l'antique, 1887-89. Professor Duruy is Grand Officer of the Legion of Honour, Member of the Institute, and has received decorations from Greece, Italy, Portugal and Turkey.

DVORAK, Pan Antonin, Bohemian musician, was born in 1841 at the village of Nelahozeves, near Prague, where his father was a butcher and innkeeper. As a child he showed great aptitude for the violin; but for a long time he was ignorant of the most elementary rules of music. After leaving school he earned his living by playing in a band of wandering village minstrels, and his first attempt at composition was a dance which the members of this band tried to play; but as the young composer was unaware that the music should have been written in different clefs for the different instruments, the result was terrible discord and utter failure. He then gave up compos-

ing, and went to Prague, where for the first time he heard the names of the great composers, and was present at the performance of an opera; here he was able to hire a piano and give lessons, and in 1874, a year after his marriage, he gained a competition scholarship at Vienna. In 1875 he gained £50, and in 1876 £60, but it was not until 1878 that his name became at all well known; at that time he published his "Moravian Duets" at Berlin, which were at once favourably received, and opened the way for further compositions. His dances, songs, and symphonies have all found favour with the best critics; but the "Stabat Mater" (performed at the Birmingham Festival) and "König und Köhler" are perhaps his most popular works. His latest work is the oratorio "St. Ludmila," founded on the poem of the young Bohemian poet, Yaroslav Vrchlicky, the subject being the introduction of Christianity into Bohemia. This was performed with great success at the Leeds Musical Festival, Oct. 1886, under the personal direction of Herr Dvorák.

DWIGHT, Timothy, D.D., LL.D., was born at Norwich, Connecticut, Nov. 16, 1828. He graduated from Yale College in 1849, continued his studies at New Haven for two years, and then entered the Theological Seminary connected with Yale College, 1851-53, filling meanwhile a tutorship at the College, 1851-55. He was licensed to preach in 1855; spent 1856-58 in Europe; and on his return was appointed, 1858, Professor of Sacred Literature at Yale. On May 20, 1886, he was elected President of the College, to succeed Dr. Noah Porter, resigned. Professor Dwight was an associate editor of *The New Englander*, and was an active member of the American Committee for the Revision of the English Version of the Bible from 1872 to 1885.

DYER, William Turner Thiselton. See **THISELTON-DYER, W. T.**

DYKE, The Right Hon. Sir William Hart, Bart., M.P., son of the late Sir Percyvall Hart Dyke, was born at East Hall, St. Mary Cray, Kent, Aug. 7, 1837, and educated at Harrow, and Christ Church, Oxford, where he took his degree in 1861. He represented West Kent in the Conservative interest from 1865 to 1867, and the Mid-Division of the same county until 1885, when he was returned for the N. W. Division. He was Whip of the Conservative party from 1863 to 1880; Patronage Secretary to the Treasury from 1874-80, and Chief

Secretary for Ireland in Lord Salisbury's Government from June, 1885, to Jan., 1886. At the General Election in 1886 he was again returned for North-West Kent, and is now, 1890, Vice-President of the Council.

E.

EARLE, Professor, The Rev. J., of Swanswick Rectory, Bath, was born Jan. 29, 1821, at Elston, in the parish of Churchstow, near Kingsbridge, South Devon. He became a private pupil in the house of the Rev. Orlando Manley, then incumbent of Plymstock; and from Mr. Manley's he went to the Plymouth New Grammar School, where he stayed, until the ancient Grammar School at Kingsbridge having been reconstituted, he was entered there for the last year before he went to Oxford. He matriculated in 1842. In 1845 he was in the First-class of *Litteræ Humaniores*, and took his B.A. In 1848 he was elected Fellow of Oriel on a Devonshire foundation. In 1849 he took the degree of M.A., and was elected Professor of Anglo-Saxon, an office at that time tenable for only five years. In 1852 he became College Tutor in succession to Mr. Buckle, now Canon of Wells. In 1857 he was presented by Oriel College to the rectory of Swanswick, near Bath. He was appointed by the Bishop of Bath and Wells (Lord Arthur Harvey) in 1871 to the Prebend of Wanstow in Wells Cathedral; and in 1873 to be Rural Dean of Bath, an office which he discharged until 1877. In 1876 he was selected Professor of Anglo-Saxon in the University of Oxford, the tenure of this professorship having in the meantime been made permanent. The following is a list of his chief publications: "Gloucester Fragments (St. Swithun, &c.)," 1861; "Bath, Ancient and Modern," 1864; "Two of the Saxon Chronicles Parallel," 1865; "The Philosophy of the English Tongue," 1871; Fourth Edition, 1887; "A Book for the Beginner in Anglo-Saxon," 1877; Third Edition, 1884; "English Plant Names from the Tenth to the Fifteenth Century," 1880; "Anglo-Saxon Literature," 1884; "A Hand Book of the Land Charters and other Saxon Documents," 1888; and "English Prose: its Elements, History, and Usage," 1890.

EARLY, General Jubal A., was born in Virginia, Nov. 3, 1816. He graduated in 1837 at the Military Academy at West Point, and was appointed a Lieutenant of Artillery. After serving a campaign in Florida against the Seminole Indians he resigned in the summer of 1838 and

studied law. During the war with Mexico he was a Major in a Virginia volunteer regiment. Upon the breaking out of the Civil War he entered the Confederate service, and was present in several actions during the early part of the war. In May, 1863, he held the lines at Fredericksburg, while Lee was engaged with Hooker at Chancellorsville; and in July he commanded a division at Gettysburg. In 1864 he commanded in the Valley of the Shenandoah, where he was at first successful, but was finally checked by Sheridan. On the close of the war he went to Mexico, and after remaining there a few months returned to Havana, and thence went to Canada, where he remained a little over two years. He returned to the United States in the spring of 1869 and settled at Lynchburg, Virginia, where he still resides. In 1867 he published "Memoirs of the Last Year of the War," and in 1883 an address which he delivered in Baltimore on Jackson's Campaign against Pope, 1862, was printed by the Society before which it was delivered.

EASTLAKE, Lady, widow of Sir Charles Lock Eastlake (who died Dec. 24, 1865), to whom she was married in 1849, is a daughter of the late Edward Rigby, Esq., M.D., of Norwich. She was born about 1816, and, as Miss Elizabeth Rigby, gained considerable literary reputation by a work published in 1841, entitled "Letters from the Shores of the Baltic," a pleasant and vivid record of a lengthened visit to a sister who was married to an Esthonian baron, and had settled on the shores of that sea. "Livonian Tales," comprising the three graphic stories of "The Disponent," "The Wolves," and "The Jewess," appeared in 1846. She is also author of a "History of Our Lord," and the "Life of John Gibson, R.A." Lady Eastlake has been an occasional contributor to the *Quarterly* and *Edinburgh Reviews*; and her last book, "Five Great Painters," is an expanded reprint of articles which first appeared there. Two of her contributions on "Dress" and "Music" have been reprinted in "Murray's Home and Colonial Library."

EBERS, Georg, orientalist and novelist, was born at Berlin, March 1, 1837. His father, a banker, having died before the birth of his son, the latter received his early instruction from his mother, and subsequently studied in Fröbel's school at Keilhau. At the Universities of Göttingen and Berlin he made Egyptology his central study, and at the termination of his academical career he

visited the principal museums of Egyptian antiquities in Europe. In 1865 he established himself at Jena as a private tutor for the Egyptian language and antiquities, and in 1870 he was called to Leipzig as Professor, where he has since remained. Apart from his scientific services, his thesis on obtaining the degree of Doctor "On the Twenty-sixth Egyptian Dynasty," and his larger work on "Egypt and the Books of Moses," and his "Scientific Journey to Egypt," 1869-70, were the cause of his promotion to that Chair. In his second journey to Egypt in 1872-73, he succeeded in discovering the Papyrus B, which was subsequently named after him. This Papyrus, although its contents primarily relate to medical subjects, is very important on account of the insight it gives into the language and culture of the ancient Egyptians. Ebers also discovered the important biographical inscription of the "Amen em Neb." In 1876 he had a severe attack of paralysis, which still prevents him from walking. To this illness the further development of his literary activity is mainly attributable, for since the state of his health incapacitated him from pursuing more serious studies, he sought and obtained a means of recreation and agreeable occupation in imaginative composition. This was the origin of "Uarda, a Romance of Ancient Egypt," 1877, which like several of Ebers' other works, has been translated into English by Clara Bell. This was the second of his works of fiction based upon facts in the history of Egypt, for he had previously, in 1864, published "An Egyptian Princess," which has been translated into English by E. Grove, and which gives in the attractive form of a romance, a description of popular life in Egypt about the time of the Persian war of conquest. The extraordinary success achieved by "Uarda," induced the author to turn his Egyptian studies still further to account for literary purposes. He composed in succession "Homo Sum," a novel, 1878; "The Sisters," a romance, 1880; and "The Emperor," 1881, the scene of all these works being laid in Egypt. Meanwhile Ebers did not neglect the acquisition of solid learning. It is true that his splendid work on "Egypt—Descriptive, Historical, and Picturesque," 1878, English translation, by Clara Bell, with introduction and notes by Dr. Birch, 1880, is of a popular character, as are also his previous publications "Through Goschen to Sinai," 1872, and his work, written in collaboration with Guthe, on "Palestine—Descriptive, Historical, and

Picturesque," 1881. On the other hand, his numerous articles in periodicals on the Egyptian language and antiquities, his remarkable treatise on "Papyrus E, a Hieratic Manual of Egyptian Medicine," 2 vols., 1872, afford ample proof of the most profound scientific study. His later works of fiction are "The Burgomaster's Wife: a Tale of the Siege of Leyden," of which a translation, by Clara Bell, appeared in London, in 1882; and "Serapis, a Romance," 1885.

EDEN, The Right Rev. G. R., Suffragan Bishop of Dover, in succession to the late Bishop Parry. He was formerly Archdeacon and Canon of Canterbury.

EDEN, The Rev. Robert, M.A., son of the late Rev. Thomas Eden, born at Whitehall, near Bristol, was educated at a private school near that city. Having first entered at St. John's College, Oxford, as Bible Clerk, he became Scholar, and afterwards Fellow of Corpus Christi College, where he graduated B.A. in 1825, and M.A. in 1827. He was appointed an Examiner at Oxford in 1828-9, was successively Head Master of Hackney and Camberwell Collegiate Schools between 1829 and 1838; and held the post of Examiner for the East India Civil Service from 1839 to 1856; was Chaplain to the Bishop of Norwich in 1849; Vicar of North Walsham in 1851; Honorary Canon of Norwich in 1852; and Vicar of Wymondham in 1854. Canon Eden is the author of the "Churchman's Theological Dictionary"; "The Examination and Writings of Archdeacon Philpot, with Biography," for the Parker Society, and "Some Thoughts on the Inspiration of the Holy Scriptures," 1864. He has also edited theological works for the Clarendon Press, and has published a volume of sermons.

EDHEM PACHA, a Turkish statesman, was born in 1823. He studied in Paris, where for three years he attended the lectures in the School of Mines. On returning to Turkey he was attached to the staff of the army with the rank of captain, rapidly attained to that of colonel, and was appointed a member of the Council of Mines at the time of its formation. Having been appointed aide-de-camp to the Sultan in 1849, he soon was placed at the head of His Majesty's household troops. Meanwhile he had been promoted General of Brigade, and then General of Division. In 1856 he resigned the functions which he had fulfilled at the palace, and was appointed a member of the council of the Tanzimat

and afterwards Minister of Foreign Affairs, with the rank of Muchir. He held that post for only one year. Subsequently he played an important part in the affairs of his country, where he was nominated President of the Council of State. He was also for some time ambassador at Berlin. At the Conference of Constantinople, 1876-7, he acted as the second Turkish plenipotentiary, and he was appointed to succeed Midhat Pacha as Grand Vizier, Feb. 5, 1877, and in 1885 became Turkish Ambassador in Paris.

EDINBURGH (Duke of), H.R.H. Prince Alfred Ernest Albert, K.G., K.P., G.C.B., the second son of Her most gracious Majesty the Queen and His Royal Highness the late Prince Albert, was born at Windsor Castle, Aug. 6, 1844. His early education was entrusted to the Rev. H. M. Birch; from 1852 to F. W. Gibbs, Esq., C.B.; and in 1856 the Prince was placed under the special care of Major Cowell, R.E., and spent the winter of 1856-7 at Geneva, studying modern languages. Having decided upon joining the naval service, Prince Alfred was placed under the Rev. W. R. Jolly, at Alverbank, near Gosport, where he pursued the preparatory studies for his profession during the summer of 1858. He entered the service, after a strict and searching examination, Aug. 31, 1858, was appointed a Naval Cadet, and joined Her Majesty's screw steam-frigate *Euryalus*, 51 guns, Captain John Walter Tarleton, C.B. After a leave of absence for a few weeks, Prince Alfred joined his ship for active sea-service, Oct. 27, 1858, and served in the *St. George* on various foreign stations, visited many of the countries on the shores of the Mediterranean, and extended his travels to America and the West Indies. In Dec., 1862, Prince Alfred declined the offer made to him of the throne of Greece. In Feb., 1866, Parliament granted him £15,000 a year, payable from the day on which he attained his majority, with an additional £10,000 on his marriage. He was created Duke of Edinburgh, Earl of Kent, and Earl of Ulster in the peerage of the United Kingdom, May 24, 1866, and took his seat in the House of Lords, June 8. His Royal Highness was sworn in Master of the Trinity House, March 21, 1866, and received the freedom of the City of London, June 8. Early in 1867 the Duke was appointed to the command of the frigate *Galatea*, which sailed from Plymouth Sound Feb. 26. Since then he has visited nearly every country in the world, proceeding first to Australia, where he met with an enthusiastic re-

ception on the part of the inhabitants; and great indignation was felt at the dastardly attempt of an Irishman, named O'Farrell, to assassinate the Prince at a picnic held at Clontarf, near Port Jackson, New South Wales, on March 12, 1868. The Prince, however, was only slightly wounded in the back by a pistol-shot. O'Farrell was tried on March 31, found guilty, and executed on April 21. His Royal Highness subsequently visited Japan (where he was received both publicly and privately by the Mikado), China, and India. In 1873 he went to Italy, and on April 20 had an audience with the Pope in Rome. On Jan. 23, 1874, his marriage with the Grand Duchess Marie Alexandrovna, only daughter of Alexander II., Emperor of Russia, was celebrated with great pomp at St. Petersburg; and on March 12, the Duke and Duchess, accompanied by Her Majesty the Queen, made a public entry into London amid much popular enthusiasm. His Royal Highness is Duke of Saxony and Prince of Saxe-Coburg-Gotha. In Nov., 1882, he was promoted to the rank of Vice-Admiral in Her Majesty's fleet; and since that time he has held various important commands. In 1888 His Royal Highness, in command of the Mediterranean Squadron, visited some of the chief continental capitals, and on the occasion of his visit to Madrid he was invested with the Order of the Golden Fleece by the Queen-Regent of Spain.

EDINBURGH (Duchess of), Her Royal Highness Marie Alexandrovna, Grand Duchess of Russia, only daughter of the late Emperor of Russia, and sister of the present Emperor, was born at St. Petersburg, Oct. 17, 1853, and married at St. Petersburg to his Royal Highness Prince Alfred, Duke of Edinburgh. On Oct. 15, 1874, the Duchess gave birth at Buckingham Palace to a son, who, on the 23rd of the following month, was baptised by the names of Alfred Alexander William Ernest Albert, the sponsors being Queen Victoria, the Emperor of Russia, the Emperor of Germany, the Prince of Wales, the Crown-Princess of Germany, and the Duke of Saxe-Coburg-Gotha. The Duchess of Edinburgh's other children are the Princess Marie Alexandra Victoria, born Oct. 29, 1875; the Princess Victoria Melita, born at Malta, Nov. 25, 1876; the Princess Alexandra Louis Olga Victoria, born at Cobourg, Sept. 1, 1878; and the Princess Beatrice Leopoldine Victoria, born April 20, 1884.

EDINBURGH, Bishop of. See DOWDEN, THE RIGHT. REV. JOHN, D.D.

EDIS, Robert William, F.S.A., Lieutenant-Colonel of Volunteers, born at Huntingdon in 1839, was educated at the Local Grammar School, and afterwards at the Brewers' Company School at Aldenham. He became a member of the Architectural Association early in his professional life, and was elected President for two successive years; Associate of the Royal Institute of British Architects in 1862, a Fellow in 1867, a member of Council in 1888, and Fellow of the Society of Antiquaries in 1870. He has travelled much in many countries, and in the early part of his career made a series of architectural sketches in France, Italy, and Germany, some of which were published in the *Building News* and other professional journals. He has written and lectured on domestic art and sanitation, and published various books on those subjects. He is one of the leaders of the modern revival of red brick and so-called "Queen Anne" architecture. In 1882 he went to America to advise as to the laying out of a new city in Kansas State. In 1880 he was invited by the Society of Arts to give a series of Cantor Lectures on the "Decoration and Furniture of Town Houses," since illustrated and published in book-form. He wrote the article on "Internal Decoration from a Sanitary Point of View," in *Our Homes*; and the hand-book on "Healthy Furniture," for the Council of the International Health Exhibition. Amongst his principal and latest works are the additions to the Inner Temple Library, the Constitutional Club in Northumberland Avenue, and ball-room and additions at Sandringham, for H.R.H. the Prince of Wales, &c. Mr. Edis joined the "Artists' Corps at its formation in 1859, and is now Colonel of the regiment. He was Aide-de-Camp to Lord Bury in the French and German war under the General Convention; and was in Paris during the last days of the Commune, when he wrote, as the result of his observations, a paper on "Fireproof Materials," which was read before the Royal Institute of British Architects. Colonel Edis was elected a member of the London County Council for South St. Pancras.

EDISON, Thomas Alva, was born at Milan, Erie Co., Ohio, Feb. 11, 1847, being of Dutch descent on his father's side, and Scotch on his mother's. His early education was derived chiefly from his mother's lessons and from his omnivorous reading, his entire school attendance not exceeding two months. When about twelve he became a railway newsboy, conducting at the same time

(with the help of boy associates), three small stores at Port Huron, Michigan. Later he established an amateur paper which he printed and sold on the train, and also improvised a laboratory in a baggage-car for chemical experiments. Having at great peril saved the life of the little son of a stationmaster, the father, out of gratitude, assisted him to learn telegraphy; and in a short time he acquired so much skill as an operator that he was successively employed at Port Huron, Stratford (Canada), Indianapolis (Indiana), Cincinnati (Ohio), Memphis (Tennessee), Boston, and at many other places. During the years he was thus engaged he was constantly experimenting in every direction. At Indianapolis he made his first essay towards an automatic telegraphic repeater, which he completed while at Memphis. His first patent was for a chemical vote-recording apparatus (for use in legislative bodies), and was taken out while he was at Boston. It was at Boston also that he began work upon duplex telegraphy, but it was not until 1872 that it was perfected. He went to New York in 1871, and shortly afterwards was appointed Superintendent of the Law Gold Indicator Co., which supplied gold and stock quotations to brokers' offices. From this point his career has been an uninterrupted success. He invented the gold and stock printing telegraph; the system for quadruplex and sextuplex telegraphic transmission; the carbon telephone transmitter; the microtasmeter for detection of small variations in temperature; the aerophone and megaphone for amplifying and magnifying sound; the electric pen; the electric railway, &c. The total number of patents issued to him already exceeds 400, and is constantly increasing; one fourth of them refer to telegraphy. But it is with the phonograph and electric lighting that his name is the most closely associated, and by which he is best known. He resigned his superintendency in 1876, to devote himself entirely to invention and research, and has a large laboratory at Orange, New Jersey, the most ample in the world for electrical experiment. See *Science*, Vol. VI., Aug. 21, 1885.

EDMUNDS, The Hon. George Franklin, LL.D., American lawyer and statesman, was born at Richmond, Vermont, Feb. 1, 1828. He was educated at the common schools and by a private tutor, studied law at an early age, and began the practice in 1849. In 1851 he removed to Burlington, Vermont. From 1854 to 1859 he was a member of the lower branch of the State Legislature, serving

as Speaker for three of those years. In 1861-62 he was a State Senator acting as President *pro tem*. On the death of Mr. Foote in 1866 he was appointed to the vacancy in the U.S. Senate, which position he has continued to fill by successive re-elections. He is one of the prominent Republican leaders of that body, has been a member and chairman of some of its most important committees, and has twice been elected President *pro tem*. He was a member of the Electoral Commission in 1876, which decided the Presidential controversy between Mr. Hayes and Mr. Tilden. At the Republican National Conventions in 1880 and 1884 he received some votes for the nomination to the Presidency. The degree of LL.D. was conferred upon him in 1887 by Trinity College, Hartford.

EDWARDS, The Right Rev. Alfred George, M.A., Bishop of St. Asaph, is the youngest son of the late Rev. William Edwards, vicar of Llangollen, and a brother to the late Dean of Bangor, was born in 1850, and educated at Llandovery School and at Jesus College, Oxford. He obtained a second-class in Classical Moderations in 1872, and a third in the Final Classical School in 1874, taking his degree in the same year. He was ordained deacon in 1874, and priest in 1875, by the present Bishop of St. David's at his first ordination, and in the latter year was appointed warden and Head Master of Llandovery School, and after ten years' work at Llandovery was appointed vicar and rural dean of Carmarthen, and private secretary and chaplain to the Bishop of St. David's. The importance of a knowledge of Welsh for a Welsh bishopric is undeniable; and it is satisfactory that the choice fell on a Welsh-speaking clergyman whose work in the past has been characterized by such marked energy, ability, and judgment, that there is good ground for trusting that the diocese of St. Asaph will have in Mr. Edwards a strong as well as acceptable bishop. Mr. Edwards will be the youngest bishop on the bench, which in the present difficult position of the Church in Wales is no disadvantage. Mr. Edwards has been twice married, his present wife being the youngest daughter of Mr. Watts John Garland, of Lisbon.

EDWARDS, Miss Amelia Blandford, is the daughter of a Peninsula officer, and is maternally descended from the family of Walpole. Her taste for art and literature was evidenced from an early age, and in 1853, while yet very young, she became

known to the public as a contributor to periodical literature. Since that time, though best known as a novelist and traveller, she has written many juvenile and educational works, besides contributing art and dramatic criticisms, literary reviews, and political leaders to certain of our foremost weekly and daily papers. The following are among Miss A. B. Edwards's best-known novels: "Hand and Glove," 1859; "Barbara's History," 1864; "Half a Million of Money," which first appeared as a serial in *All the Year Round*, 1865; "Debenham's Vow," first passed through the columns of *Good Words*, 1870; "In the Days of My Youth," 1873; "Monsieur Maurice," a novelette, 1873; and "Lord Brackenbury," 1880, first brought out in the *Graphic*. This last novel has gone through three English editions, besides the serial form; has been translated into French and Russian, and twice into German, besides being reproduced in numerous forms and sizes in Australia, New Zealand, and the United States of America. "Miss Carew," 1865, consists chiefly of short tales. Besides the foregoing, Miss Amelia B. Edwards is the author of "An Abridgment of French History," published in Messrs. Routledge's *Useful Library*; of the biographical letterpress to Messrs. Colnaghi's *Photographic Historical Portrait Gallery*; of a volume of "Ballads," 1865; and of a record of travel in the then little-known Dolomite region, entitled "Untrodden Peaks and Unfrequented Valleys," 1873, with illustrations by the author. This was followed at the beginning of 1877 by "A Thousand Miles up the Nile," illustrated with upwards of eighty wood engravings from drawings by the author, made and finished on the spot, in Egypt and Nubia. Since the publication of "Lord Brackenbury," Miss Edwards has chiefly devoted her pen to Egyptological subjects. She is an active promoter of "The Egypt Exploration Fund," and is the Honorary Secretary, as well as a Vice-President, of that society. The bulk of Miss Edwards's Egyptological work is published in the *Academy*. She also writes on these subjects for several leading journals and periodicals at home and abroad. Miss Edwards is a contributor of Egyptological articles to the ninth edition of the "Encyclopædia Britannica," and has written a comprehensive account of "Recent Archæological Discoveries in Egypt" for the American supplement to that work. Miss Edwards is a contributing member of the various Oriental Congresses which are periodically held in various European

capitals; a member of the Biblical Archæological Society; a member of the Society for the Promotion of Hellenic Studies, and a Vice-President of the Bristol and West of England National Society for Women's Suffrage. In 1887, at the Centenary Festival of Columbia College, New York, Miss Edwards received, *in absentia*, the honorary degree of L.H.D.; Professor Tyndall and the Provost of Queen's College, Oxford, being the only other British subjects selected for honours on that occasion. More recently Miss Edwards has turned her attention to the lecture platform, and in the winter of 1889-90 she paid a visit of five months to the United States of America, where she lectured on Egyptological subjects in the Eastern and Central States. It was calculated that during this brief tour Miss Edwards addressed over 100,000 persons.

EDWARDS, Henri Milne, M.D., naturalist, of Belgian origin, member of the Institute and of the Academy of Medicine, born at Bruges, Oct. 23, 1800, studied medicine in Paris, and obtained his degree of Doctor in July, 1823. In 1838 he was admitted a member of the Academy of Sciences (section of Anatomy and Zoology) as successor to M. Cuvier. After holding the Professorship of Natural History at the Lycée Henri IV., he was appointed in 1841 to a similar position at the Museum of the Faculty of Sciences, of which he became Dean, and was made Professor of Zoology to the Museum, in place of M. Isidore Geoffroy Saint-Hilaire, May 28, 1862. He was elected an associate of the Academy of Medicine in 1854; created an officer of the Legion of Honour in April, 1847, and was promoted to the rank of Commander, Aug. 13, 1861. He is the author of "Recherches Anatomiques sur les Crustacés," 1828, "crowned" by the Academy of Sciences; "Manuel de Matière Médicale," 1832; "Nouveau Formulaire Pratique des Hôpitaux," 1840; "Histoire Naturelle des Crustacés," 1837-41; "Leçons sur la Physiologie et l'Anatomie comparée de l'Homme et des Animaux," 1855-60; and other works. M. Edwards superintended the publication of a new edition of Lamarck's "L'Histoire Naturelle des non-Vertébrés," 1838-45; and has contributed to various scientific reviews, dictionaries, and periodicals. The honorary degree of M.D. was conferred upon him by the University of Leyden in Feb., 1875. In 1878 the King of Portugal conferred on him the Grand Cross of the Order of Christ.

EDWARDS, Henry Sutherland, born

1828, was educated at one of the branch schools of King's College, London, and in France, where he lived many years. In 1856 he visited Russia, on the occasion of the coronation of Alexander II., and, remaining some months in Moscow, studied the Russian language. He published, in 1858, a collection of "Sketches and Studies" (contributed originally to a magazine), under the title of the "Russians at Home." This was followed, in 1862, by a "History of the Opera." In that year Mr. Edwards went to Poland, where an insurrection seemed to be preparing, and to Russia, where measures were being taken for the emancipation of the serfs, as special correspondent to the *Times*; and, on his return to England, published "The Polish Captivity." In 1863, immediately after the rising in Poland, he was again sent out by the *Times*. He took part in and described some of the principal expeditions from Galicia into the kingdom of Poland; went, at the crisis of the insurrection, to Warsaw, and, soon after his arrival, was ordered to quit the city within twenty-four hours. Allowed to choose his route, he proceeded to St. Petersburg, and thence to Moscow, and the South of Russia, returning to Galicia through Kieff and Volhynia. In 1864 he published the "Private History of a Polish Insurrection;" was special correspondent of the *Times* at Luxemburg, when, in 1867, the "Luxemburg Question" threatened to produce war; and in July, 1870, when war between France and Prussia actually broke out, was appointed one of the special correspondents of the *Times* on the German side. In that capacity he followed the King's headquarters from Saarbrück to the neighbourhood of Beaumont; went through the battle of Beaumont with a Bavarian Infantry Regiment; after Beaumont and Sedan, joined General von Werder before Strasburg, and on the fall of Strasburg, traversed the occupied country from Alsace to Normandy, remaining at Rouen and Amiens, with the Army of the North, until the end of the war. He has written a few novels, and many pieces for the stage. He published "Malvina," 3 vols., 1871, and subsequently a translation of the "Statistics of all Countries," compiled by Dr. Otto Hübner, the Director of the Prussian Statistical Archives, 1872; and "The Germans in France," 1874.

EDWARDS, Miss Matilda Barbara Betham. See BETHAM-EDWARDS.

EGGLESTON, Edward, D.D., was born at Vevay, Indiana, Dec. 10, 1837. After

holding several posts as a Methodist minister, he removed, in 1870, to Brooklyn, New York, and became literary editor of the *New York Independent*, a religious weekly, of which he had previously been the western correspondent. A few months later he was made superintending editor, which position he resigned in July, 1871, to take charge of *The Hearth and Home*. His first two novels, contributed as serials to this latter paper, having opened a new and tempting path to him, he resigned the editorship of *The Hearth and Home* about the end of 1872, and has not since acted as editor to any periodical. In 1874 he carried out a long-cherished plan of establishing an Independent Church without a creed. To do this he accepted the call of the Lee Avenue Congregational Church, in the Eastern District of Brooklyn. He was obliged in 1879 to resign this pastorate on account of the complete breaking down of his health; and since his recovery he has wholly given up preaching and all public speaking, and has devoted himself entirely to literature. He has published "The Hoosier Schoolmaster," 1871; "The End of the World," 1872; "Mystery of Metropolisville," 1873; "The Circuit Rider," 1874; "Schoolmaster's Stories for Boys and Girls," 1874; "Roxy," 1878; "The Hoosier Schoolboy," 1883; "Queer Stories for Boys and Girls," 1884; "The Graysons," 1888; and "A History of the United States and its People," 1888, in two editions, one for schools and a larger one, under the title of "The Household History of the United States." In 1889 he published "A First Book in American History." In connection with others he published, 1878-80, a series of "Famous American Indians," comprising "Brandt and Red Jacket," "Pocahontas," "Tecumseh and the Shawnee Prophet," "Montezuma and the Conquest of Mexico," and "Red Eagle and the Wars with the Creek Indians." Mr. Eggleston has been a contributor to the *Century Magazine* since the issue of its first number in 1870. To its pages he has contributed, besides works of fiction and essays of various sorts, a series of papers, published at intervals, 1882-90, on early American life and manners. These are the result of careful research, and are to form part of a "History of Life in the United States."

EGYPT (Khedive and Viceroy of). See TWEFIK PACHA.

EIFFEL, Gustave, Engineer of the Eiffel Tower, Paris, was born at Dijon, in the

Côte d'Or in 1843, and educated at the Central School of Arts and Manufactures, Paris. His professional reputation was established by his construction of the Bordeaux Bridge, the Garabit Viaduct, and other important works. He has introduced many improvements in the art of bridge building upon arches. An elaborate description of the famous tower, from a popular point of view, was given in the *Times* of April 30, 1889, when it was asserted that it was a M. Nouguié, a young engineer in M. Eiffel's employment, who first conceived the idea, and worked it out with the aid of an architectural friend.

EISENLOHR, Professor August, Ph.D., Egyptologist, was born Oct. 6, 1832, at Mannheim, in the Grand Duchy of Baden, where his father was a physician. After a preliminary training in the lyceum of his native town he entered the University of Heidelberg in 1850, applying himself to the study of Protestant theology, which he continued at Göttingen till 1853, when he returned to Heidelberg, and entered the theological seminary. Illness compelled him to avoid serious study for several years, and on his recovery he abandoned theology, and devoted his attention to the natural sciences, especially chemistry, under the instruction of Professors R. Bunsen and Erlenmeyer. He graduated Ph.D. in 1859, and afterwards established a chemical manufactory. By commercial intercourse with China he became acquainted with the Chinese language, and was thus led to the study of hieroglyphics, which he has prosecuted with great zeal since 1864, aided by the advice of MM. Chabas and Brugsch. On giving up commercial pursuits, he entered, after some years, the academical career as Privatdocent of the Egyptian language and Archaeology by a dissertation "*Die analytische Erklärung des demotischen Theils der Rosettana*," Theil i., Leipzig, 1869. In the same year, generously aided by the Grand Duke of Baden, he undertook a scientific exploration of Egypt. Having been present at the inauguration of the Suez Canal, he sailed up the Nile to the second cataract of Wadi Halfa, studying, copying, and photographing the inscriptions. On this occasion he had the good fortune to be allowed to study the celebrated Harris Papyrus in the house of the late Consul Harris, at Alexandria. In March, 1870, he left Egypt and returned home. Coming to this country in 1872, he assisted Miss Harris in selling to the British Museum for £3,300 her valuable collection of Greek and Egyptian papyri.

Of this collection, and especially of the great Harris Papyrus, he gave a description, translation, and commentary in a pamphlet "*Der grosse Papyrus Harris. Ein wichtiger Beitrag zur Aegyptischen Geschichte, ein 3000 Jahr altes Zeugniß für die Mosaische Religion stiftung enthaltend*," Leipzig, 1872. In Dec., 1872, he was nominated a Professor Extraordinary in the University of Heidelberg, and was elected an honorary member of the Society of Biblical Archaeology at London, and of the Society "*El Chark*" at Constantinople. In 1885 he became Honorary Professor at the University of Heidelberg.

ELIOT, Charles William, LL.D., President of Harvard University, was born at Boston, Massachusetts, March 20, 1834. He was prepared for college at the Boston Public Latin School, and graduated (A.B.) at Harvard in 1853. He was Tutor in Mathematics at Harvard, 1854-58; Assistant Professor of Mathematics and Chemistry, 1858-61; of Chemistry, 1861-63; Professor of Chemistry in the Massachusetts Institute of Technology, 1865-69; and was chosen President of Harvard, May, 1869. Since his appointment to this post, President Eliot has exercised very great influence over the course of education in the United States. Prior to his accession to the Presidency, he wrote, in conjunction with F. H. Storer, a "*Manual of Inorganic Chemistry*," 1866, and a "*Manual of Qualitative Chemical Analysis*," 1869, besides various contributions to scientific journals. Since 1869 his principal publications have been his successive Annual Reports as President of Harvard.

ELIOT, Samuel, LL.D., was born in Boston, Dec. 22, 1821. He graduated at Harvard College in 1839; was for two years engaged in mercantile pursuits in Boston, and subsequently travelled in Europe. In 1847 he published some "*Passages from the History of Liberty*," that were intended to form a part of a "*History of Liberty*," which he had meditated for several years. The first instalment appeared in 1849, under the title of "*The Liberty of Rome*," altered to that of "*History of Liberty, Part I., the Ancient Romans*;" followed in 1853 by Part II., "*The Early Christians*." In 1856 he published "*A History of the United States from 1492 to 1850*" (revised edition, to 1872); and in 1880 a selection of "*Poetry for Children*." He was Professor of History and Political Science in Trinity College, Hartford, from 1856 to 1864, and President of the College from 1860 to 1864. In 1871-73 he was

Lecturer at Harvard; from 1872-76 Head Master of the Girls' High School in Boston; and from 1878 to 1880 Superintendent of the Boston Public Schools. He is at the head of several literary and charitable institutions in Boston.

ELIOT, The Rev. Canon Philip F., M.A., Dean of Windsor, was born in 1835; educated at King Edward's School, Bath, and Trinity College, Oxford, ordained deacon by the late Bishop of Winchester, and priest by the Archbishop of Canterbury, and became successively curate of St. Michael's, Winchester, private chaplain at Collygatehouse, North Britain, and curate of Walcot, Bath. In 1867 he was appointed first vicar of the new parish of Holy Trinity, Bournemouth. In 1881 he was appointed honorary canon of Winchester; in 1886 was nominated by the Crown to a canonry at Windsor; and in 1890 was made Dean of Windsor. In August, 1883, he married as his second wife, the Hon. Mary Pitt, daughter of the late Lord Rivers, and until her marriage maid of honour to her Majesty.

ELIZABETH, Queen of Roumania (Pauline Elizabeth Ottilie Louise), daughter of the late Prince Hermann of Wied, by his marriage with the Princess Maria of Nassau, was born at Neuwied, Germany, Dec. 29, 1843. In her parents' home she became acquainted with the chief writers, poets, scholars, and artists of the day, and early showed a great gift for poetical composition, writing verses with facility before the age of ten. As she grew older she showed remarkable intelligence in all branches of study, and became especially proficient in languages, both ancient and modern. The years 1863 to 1868 were spent chiefly in travel. In 1869 she married Prince Charles of Roumania, second son of Prince Anthony of Hohenzollern; and her great popularity in the land of her adoption dates from her first appearance among her people when, as a bride, she accompanied her husband to his capital. She began at once to enter with her characteristic energy into the life of the Roumanian people, to study their customs and to endeavour to understand their thoughts and aspirations. In 1870, on the day after receiving from her brother the news of the battle of Sedan, in which he had fought with honour, her daughter was born, whose life, alas, was to be but of brief duration, and whose death from diphtheria, in 1874, was a crushing blow to the Prince and Princess, a terrible sorrow which "can never be lightened, and will end only with their last breath." The little Marie was their only child.

During the anxious days of the war of 1877, in which Prince Charles and his brave Roumanians so greatly distinguished themselves, the Princess worked day and night in the hospitals, sustaining, by her presence, the courage of the victims of battle, and setting an example which was followed by the Roumanian women in the most unselfish manner. "She helped to bind up the wounds herself, and did not even recoil from those at sight of which even men could not help shuddering. How many of the dying received the last words of comfort from her lips! Many of them would take chloroform only from her hands, and she alone could persuade many of the wounded to undergo the necessary amputations." When the victorious Roumanian army, headed by the Prince, entered Bucharest on their return from the campaign, the war-song which they sang, and which had inspired them in many battles, was composed by their own Princess, "the mother of her people." She has from the first taken the keenest interest in the welfare of her Roumanian subjects, and her remarkable talents, her great personal beauty, and her rare powers of sympathy have endeared her to all with whom she comes into contact. In March, 1881, Roumania was declared a kingdom, and on May 22 of the same year the Princess was crowned Queen. Under the name of "Carmen Sylva," she has published several volumes of stories and poems, with translations of Roumanian poetry into German; some of her most beautiful and touching poems are those written on the death of her only child in 1874. Her life has been written by the Baroness Stachelberg.

ELLICOTT, The Right Rev. Charles John, D.D., Bishop of Gloucester and Bristol, was born April 25, 1819, at Whitwell, near Stamford, of which parish his father, the Rev. Charles Spencer Ellicott, was rector. He received his early education at Oakham and Stamford schools, and then proceeded to Cambridge, where he graduated B.A. with honours in 1841, and was elected a Fellow of St. John's College. In 1842 he carried off the first Member's prize, and in the following year the Hulsean prize on "The History and Obligation of the Sabbath." In 1848 he was collated to the rectory of Pilton, in Rutlandshire, but he resigned this small living ten years later on being chosen to succeed Dr. Trench, the late Archbishop of Dublin, as Professor of Divinity in King's College, London. In 1859 he was appointed Hulsean Lecturer, and in the following year was elected

Hulsean Professor of Divinity in the University of Cambridge. The Hulsean Lectures for 1860, "On the Life of Our Lord Jesus Christ," displayed profound theological erudition, and showed that their author possessed a critical knowledge of the Greek language. They attracted much attention even beyond the limits of the university, and it became obvious that Dr. Ellicott would be selected for high preferment in the church. He was nominated by the Crown to the Deanery of Exeter in 1861, and in 1863 to the united sees of Gloucester and Bristol, which had been vacated by the translation of Bishop Thomson to York. A principal feature of Bishop Ellicott's episcopate is said to be his hearty sympathy with the clergy of different theological "schools of thought." To him the diocese of Gloucester and Bristol owes its Theological College, and the city of Bristol its "Church Aid Society," and its "Church Extension Fund" for supplying spiritual help of a missionary kind to its overgrown parishes. He has also instituted a plan of issuing every year a Pastoral Letter, in which he comments on passing ecclesiastical events, without waiting to deal with them for the first time in a Triennial Charge. His lordship takes an active part in the deliberations of the Upper House of the Convocation of the Province of Canterbury. Besides his Hulsean Lectures, already referred to, which have reached a 5th edition (1869), Bishop Ellicott has published a "Treatise on Analytical Statics," 1851; "Critical and Grammatical Commentaries" on the Epistles to the Galatians (1854), and Ephesians (1855), Philippians, Colossians, Thessalonians, Philemon, and on the "Pastoral Epistles" (1858); an essay on the "Apocryphal Gospels" in *Cambridge Essays*, 1856; "The Destiny of the Creature, and other sermons, preached before the University of Cambridge," 1858; an article on "Scripture, and its Interpretation" in Archbishop Thomson's "Aids to Faith," 1861; "The Broad Way and the Narrow Way," two sermons, 1863; "Considerations on the Revision of the English Version of the New Testament," 1870; "Six Addresses on Modern Scepticism," published by the Society for Promoting Christian Knowledge, 1877; "Six Addresses on The Being of God," published by the same society, 1879; "Present Dangers to the Church of England," 1881; "Are we to modify Fundamental Doctrines?" 1885; papers in the publications of the Christian Evidence Society; and annual addresses to the clergy of his diocese, published under the title of

"Diocesan Progress" (1879—1886). The bishop was for eleven years the Chairman of the company of the Revisers of the Authorized Version of the New Testament, published in 1881. He is also the editor of "A New Testament Commentary for English readers, by various Writers," in 3 volumes; and of a "Commentary on the Old Testament," on a similar plan, in 4 volumes (1884).

ELLIOT, The Very Rev. Gilbert, D.D., Dean of Bristol, son of the late Right Hon. Hugh Elliot, and brother of Sir C. Elliot, K.C.B., was born in 1800, educated at St. John's College, Cambridge (B.A. 1822; M.A. 1824). After holding various livings, including the incumbency of Trinity Church, Marylebone, he was nominated in 1850 to the Deanery of Bristol. Dr. Elliot, who is well known as a leader of the Low Church party, took an active part as prolocutor in the Lower House of Convocation from 1857 till 1864, when he resigned. He is the author of one or two volumes of sermons.

ELLIOT, The Right Hon. Sir Henry George, G.C.B., P.C., second surviving son of the second Earl of Minto, by Mary, eldest daughter of Patrick Brydone, Esq., was born in 1817. He was educated at Eton, and held the post of secretary and aide-de-camp to Sir John Franklin in Tasmania from 1836 to 1839. He was appointed a *précis* writer in the Foreign Office in 1840; an *attaché* to the embassy at St. Petersburg in 1841; Secretary of Legation at the Hague in 1848; transferred to Vienna in 1853; and nominated Envoy to Denmark, March 31, 1858. In 1859 he was sent on a special mission to the king of the Two Sicilies, and in 1862 to the king of Greece; was appointed Envoy to the king of Italy, Sept. 12, 1863, in succession to Sir James Hudson; and Ambassador to the Sublime Ottoman Porte in 1867. Shortly afterwards he was sworn of the Privy Council, and on Nov. 22, 1869, he was created a Knight Grand Cross of the Order of the Bath. He was associated with the Marquis of Salisbury as joint-plenipotentiary at the Conference of the representatives of the great Powers held at Constantinople in 1876-77 for the purpose of considering the critical position of affairs in the East. At the close of that conference the plenipotentiaries returned to England, and Sir Henry Elliot, who happened to be extremely unpopular among the section of the Liberal party who sympathised with Russia, was not sent back to the Sublime Porte as Ambassador, that post being conferred on Mr. Layard. On Dec. 31,

1877, however, he was appointed Ambassador at Vienna. In 1883 he resigned, and was succeeded by Sir Augustus Paget.

ELLIS, George Edward, D.D., LL.D., was born in Boston, Aug. 8, 1814. He graduated at Harvard College in 1833, studied theology at the Cambridge Divinity School, and after travelling for a year in Europe, was in 1838 ordained pastor of the Harvard Church (Unitarian), Charlestown, Massachusetts, a position which he resigned in 1869. In the meanwhile, from 1857 to 1864, he was Professor of Systematic Theology in the Cambridge Divinity School. For some time he edited the *Christian Register*, the organ of the Unitarians of Massachusetts, and in conjunction with the Rev. George Putnam, D.D., the *Christian Examiner*. He is President of the Massachusetts Historical Society. He has published many sermons and addresses, has contributed largely to periodicals, and has delivered three courses of Lowell Lectures. He wrote the lives of John Mason, Ann Hutchinson, and William Penn, in Sparks's "American Biography," and has published "The Half Century of the Unitarian Controversy," 1857; "The Aims and Purposes of the Founders of Massachusetts," 1869; "History of the Battle of Bunker's Hill," 1875; "The Red Man and the White Man," 1882; "The Puritan Age and Spirit in the Colony of Massachusetts Bay," 1888; and *Memoirs of Jared Sparks*, Sir Benjamin Thompson (Count Rumford), Dr. Luther V. Bell, Hon. Charles W. Upham, Dr. Jacob Bigelow, and Nathaniel Thayer.

ELLIS, Professor Robinson, LL.D., son of James Ellis, Esq., born Sept. 5, 1834, at Baring, near Maidstone, was educated at Elizabeth College, Guernsey, and Rugby School, then at Balliol College, Oxford. He was elected a Fellow of Trinity College, Oxford, in 1858, and appointed Professor of Latin in University College, London, Jan. 8, 1870. In 1876 he returned to Oxford, where in 1883 he was appointed University Reader in Latin Literature. Professor Ellis published in 1867 a large and elaborate edition of the text of Catullus (2nd edition 1878); and an English commentary on the poet in 1876 (2nd edition 1889). In 1881 appeared his edition of the Ovidian or Pseudo-Ovidian poem "Ibis"; in 1885 a contribution to the series known as "Anecdota Oxoniensia," containing various unedited materials drawn from MSS. in the Bodleian or other libraries; in 1887 "The Fables of Arianus," edited with prolegomena, critical apparatus, and

commentary. Besides these works, he translated Catullus into English, retaining the metres of the original, in 1871. He is a contributor to the *Cambridge Journal of Philology*, the *American Journal of Philology*, *Hermathena*, the *Academy*, the *Philologische Rundschau*, the *Berlin Hermes*, the *Göttingen Philologue*, the *Rheinisches Museum*, the *Archiv für Lateinische Lexicographie*, the *American Nation*, and the *Classical Review*. The University of Dublin conferred on him the honorary degree of LL.D. in July, 1882.

ELVEY, Sir George Job, Mus. Doc., son of the late Mr. John Elvey, of Canterbury, was born in that city, March 27, 1816. He began his musical education as a chorister of Canterbury Cathedral, under Mr. Highmore Skeats, the organist. In 1834, he gained the Gresham prize medal for his anthem, "Bow down thine ear." In the following year he was appointed to succeed Mr. Skeats as organist of St. George's Chapel, Windsor; and in 1837 he was appointed organist to the Queen. Mr. Elvey entered New College, Oxford, and graduated Bachelor of Music in 1838, his exercise being a short oratorio, "The Resurrection and Ascension," which was afterwards produced in London by the Sacred Harmonic Society, on Dec. 2, 1840, and which has also been rendered at Boston, in the United States, and at Glasgow. He proceeded to the degree of Doctor of Music at Oxford in 1840, having obtained a dispensation from the late Duke of Wellington, by which he was enabled to take his degree two years earlier than the statutes of the University would permit. His exercise on this occasion was an anthem, "The ways of Zion do mourn." He composed an anthem for voices and orchestra, "The Lord is King," for the Gloucester Musical Festival of 1853, and a similar one, "Sing, O Heavens," for the Worcester Festival of 1857. Sir G. Elvey's compositions are mostly of an ecclesiastical character, many of his anthems are published and are in constant use, as well as numerous chants and hymn tunes, especially his Harvest hymn tune, "St. George." Besides this, he has written several part songs and two marches, the "Festal March," composed for the wedding of H.R.H. Princess Louise, which is well known, and the "Albert Edward" March, which was performed at the wedding of H.R.H. the Duke of Connaught. In 1871 he received, from the hands of the Queen, the honour of knighthood. In June, 1882, he resigned the post of organist to the Chapel Royal of St. George, Windsor,

ELWIN, The Rev. Whitwell, M.A., a member of a good family in Norfolk, born Feb. 25, 1816, was educated at Caius College, Cambridge, where he graduated B.A. in 1839. He held for some years the curacy of Hemington-with-Hardington, Somerset, and was appointed, in 1849, rector of Booton, Norfolk, a living in the patronage of his family. He became in July, 1853, editor of the *Quarterly Review* in succession to Mr. Lockhart, and resigned the post in July, 1860. He then began to prepare a new edition of "The Works of Alexander Pope," the eighth volume of which appeared in 1872. This work, however, he afterwards resigned.

ELWYN, The Rev. Richard, son of the Rev. William Elwyn, was born at Sandwich, Kent, Sept. 14, 1827, and educated at Charterhouse and at Trinity College, Cambridge, of which he was Scholar and Fellow; he was Senior Classic and B.A. 1849, M.A. 1852. In 1855 he became Second Master of Charterhouse School, and in 1858 Head Master. In 1864 he was appointed Head Master of St. Peter's School, York, and non-residentary Canon of York. In 1872 he accepted the living of St. George's, Ramsgate, and was made Rural Dean of Westbere and Hon. Canon of Canterbury in 1879. He became Vicar of East Farleigh in 1880 and Rural Dean of North Malling in 1883. In 1884 he was appointed one of the Examining Chaplains of the Archbishop of Canterbury. In 1885 he was elected Master of the Charterhouse, in succession to the late Dr. Currey, and in 1886 was appointed to the Principalship of Queen's College, London.

ELY, Bishop of. See COMPTON, THE RIGHT REV. LORD ALWYNE SPENCER.

EMIN, Pacha. See SCHNITZER, EDWARD.

EMLY (Lord), The Right Hon. William Monsell, eldest son of the late William Monsell, Esq., of Tervoe, co. Limerick, was born in 1812, and educated at Winchester and Oriel College, Oxford. He is a Magistrate and Lord Lieutenant of the county and city of Limerick (*custos rotulorum*), for which he served as High Sheriff in 1835. He sat as one of the members, in the Liberal interest, for the county of Limerick from Aug., 1847, until his elevation to the peerage. Mr. Monsell joined the Roman Catholic Church in 1850. He was Clerk of the Ordnance from Dec., 1852, till Feb., 1857, when he was transferred to the Presidentship of the Board of Health, which he held till Sept.; was sworn a Privy Councillor in

1855; was Vice-President of the Board of Trade from Feb. till July, 1866; Under Secretary of State for the Colonies from Dec., 1868, till 1870; and Postmaster-General from the latter date till 1873, when he was created a peer.

EMMA, Queen Regent of the Netherlands (Adelaide Emma Wilhelmina Thérèse), is the second daughter of the Duke of Waldeck Pyrmont, and consequently the sister of our Duchess of Albany. One frail life, that of the young Queen Wilhelmina, now alone represents the Orange dynasty, which has brought forth so many heroes. The princess is ten years of age. Until she reaches her majority, when, in her own right she will be crowned first Queen of Holland, her mother will reign as Regent. Queen Emma was born Aug. 2, 1858, at Arolsen, the capital of her father's miniature state, Waldeck. Four daughters and one son formed the family circle; they were carefully, simply, and religiously educated, and their kindly ways endeared them to the handful of subjects who owned their father's sway. In her girlhood Queen Emma had a winsome expression, soft eyes, and an abundance of fair hair. But few suitors had made their way to Arolsen to seek the hand of that dowerless princess, when one day there arrived at the castle the elderly, widowed, and next to childless King of Holland to ask the gentle girl in marriage. The offer of a crown was dazzling, but there was much in the conditions attending it to repel a young girl. The king was nearly three times her age; and the unhappiness of his first marriage was an open secret. When the Princess Emma plighted her troth to the late William III., she accepted a life without gaiety, and she knew that, as a German, she would be unpopular with her future subjects. She was married to the king on Jan. 7, 1879, and faced the situation bravely, resolving to win her husband's and her new people's love. In the heyday of her young womanhood she led a life of seclusion. Her husband was hypochondriacal and irritable; she devoted herself to enlivening and soothing his mind. Her gentleness, her tact, won their reward in gaining his affection and trust. Her influence over him grew every day, and her subjects learnt to esteem and admire her. She had acquired the knowledge of Dutch, and soon she expressed herself correctly, and even fluently. Before two years had elapsed she had given birth to a daughter. A cry of joy welcomed the child, who would doubtless have been yet more welcome had it belonged to the other sex, but whose coming had saved

the Orange dynasty from extinction. The Queen watches with unceasing vigilance over the bringing up of her child, and her maternal zeal has deepened the esteem felt for her by her subjects. As years went on, and the king's malady increased, she shut herself up in the sick room, and it was with difficulty the physicians prevailed upon her to take air and exercise. She tended the irritable invalid with marvellous patience, and her influence over him was one of benignant calm. With her alone would the Sovereign, whose brain was clouding, take counsel—to her alone would he express his wishes. When last March twelvemonth (1889) Ministers proposed to convoke the States General, and, with the consent of physicians, to declare the king incapable of reigning, and Queen Emma Regent until the Princess Wilhelmina had attained her majority, the devoted wife earnestly opposed the scheme. She consented to become Regent after the king's death, but she could not do so, she said, as long as her husband's life lasted, and without his consent. It became at last evident, even to herself, that the sceptre had dropped from the stricken man's hand, and that the Dutch nation had virtually no king. At the last moment she unwillingly accepted the offered Regency; and, in a few days afterwards, the king died. On taking the reins of government she issued a proclamation in which her Majesty declared that she was fully sensible of the magnitude of the task which had devolved upon her, but that she accepted it for love of the people, at the unanimous wish of their representatives, seeking strength and wisdom from God, and counting upon the support of her faithful subjects.

ENDICOTT, William Croninshield, United States Secretary of War, born at Salem, Massachusetts, in 1827. A.B. (Harvard) 1847. He was admitted to the Bar in 1850, and practised law until raised to the bench of the Massachusetts Supreme Court in 1873. This position he resigned in 1882, to travel in Europe on account of his health. In 1884 he was the Democratic candidate for Governorship of Massachusetts, but was not elected. He was appointed Secretary of War by President Cleveland, in March, 1885.

ERCKMANN-CHATRIAN, the compound name of two French novelists, who have always written in collaboration with each other, and whose names were thought to be as indissolubly united as those of our own Beaumont and Fletcher. Unfortunately there was a quarrel (1889) be-

tween M. Erckmann and M. Chatrian's secretary, resulting in a law-suit, in which the secretary, M. Georget, and M. Pigeonnat, the manager of the *Figaro*, were jointly and severally condemned to pay M. Erckmann 10,000 francs damages. M. Chatrian died Sept. 4, 1890.

ERCKMANN, Emile, was born at Phalsbourg, in the department of the Meurthe, May 20, 1822. He is the son of a bookseller, and after studying by fits and starts in the college of his native town, he proceeded to Paris to study law, but never practised that profession. He resolved to earn a living with his pen, and accordingly began a series of works of fiction in conjunction with M. Alexandre Chatrian, who was born in the hamlet of Soldatenenthal, in the commune of Abreschwiller, in the department of the Meurthe, Dec. 18, 1826, and who was an usher in the college at Phalsbourg when M. Erckmann made his acquaintance in 1847. From that time the two friends composed numerous tales, all signed "Erckmann-Chatrian," and characterised by such unity of composition, that no one doubted they were the production of a single individual. At first they contributed feuilletons, which attracted little attention, to provincial journals, and wrote some dramatic pieces, which were failures. They at length despaired of being able to gain a subsistence by their literary efforts, and accordingly M. Erckmann returned to his law books, while M. Chatrian obtained a situation in the offices of the Eastern Railway Company. It was not until 1859 that the publication of "L'Illustre Docteur Mathéus" gave a certain amount of popularity to the name of Erckmann-Chatrian. Since then their reputation as writers of romances has been constantly and steadily increasing, in consequence of a series of works containing faithful and graphic narratives of the manners and customs of Germany, and of the glories and military reverses of the Revolution and the First Empire. The titles of these works are—"Contes Fantastiques," 1860; "Contes de la Montagne," 1860; "Maitre Daniel Rock," 1861; "Contes des Bords du Rhin," 1862; "Le Fou Yégof," 1862; "Le Joueur de Clarinette," 1863; "La Taverne du Jambon de Mayence," 1863; "Madame Thérèse, ou les Volontaires de '92," 1863, originally published in the *Journal des Débats*; "L'Ami Fritz," 1864; "Histoire d'un Conscrip de 1813," 1864, translated into English under the title of "The Conscrip: a Tale of the French War of 1813;" "L'Invasion—Waterloo," 1865, translated under the title of "Waterloo;

a Story of the Hundred Days;," *"Histoire d'un Homme du Peuple,"* 1865; *"La Maison Forestière,"* 1866; *"La Guerre,"* 1866; *"Le Blocus,"* 1867, translated under the title of *"The Blockade of Phalsburg: an Episode of the Fall of the First French Empire;"* *"Histoire d'un Paysan,"* 1868, an historical romance, which has also been translated into English; and *"Le Juif Polonais,"* a play brought out successfully at the Théâtre de Cluny in 1869. Among their more recent productions are—*"The Story of the Plébisците, related by one of the 7,500,000 who voted 'Yes'"* (translated into English, 1872); *"Brigadier Frederic: A Story of an Alsatian Exile"* (translated into English, 1875); *"Maitre Gaspard Fix; suivi de l'Educaton d'un Féodal;"* *"Histoire d'un Conservateur;"* *"L'Isthme de Suez;"* and *"Souvenirs d'un ancien Chef de Chantier: suivi de l'Exilé,"* 1876. Their three-act comedy *"L'Ami Fritz,"* was brought out successfully at the Théâtre Français, Dec. 4, 1876, notwithstanding the discredit which the Bonapartists had endeavoured to cast beforehand on the piece by accusing the authors of want of patriotism, and sympathy with Germany. Their novel, *"Les Vieux de la Ville,"* was published in 1882; and *"Les Rantzau"* in 1884. M. Chatrian died Sept. 4, 1890.

ERICHSEN, John Eric, F.R.S., LL.D. (Edinburgh), Hon. M.Ch. (Dublin), and Hon. F.R.C.S. (Ireland), was born July 19, 1818, and educated at the Mansion House, Hammersmith, and at University College, London. He is a Fellow and ex-President of the Royal College of Surgeons, a Fellow of the Royal Society, of the Royal Academy of Medicine of Belgium, the Imperial Society of Physicians of Vienna, the Accademia di Guereti (Rome), the University of New York, and the American Surgical Association, and a member of various other learned and scientific institutions, home and foreign. He was appointed Professor of Surgery and of Clinical Surgery at University College, and surgeon to the hospital in 1850. Mr. Erichsen is now Emeritus Professor of Surgery and consulting surgeon to the hospital, and to many other medical charities. He has been President of the Royal College of Surgeons of England, of the Royal Medical and Chirurgical Society, and of the Surgical Section of the Great International Medical Congress of 1881. He was appointed Secretary to the Physiological Section of the British Association for the Advancement of Science in 1844; was member of the Royal Commission on Vivisection in 1875, is Surgeon-Extra-

ordinary to the Queen, and has been President of University College, London, since 1887. Mr. Erichsen is the author of many works and essays on physiology and surgery—more especially of an *"Experimental Inquiry into the Nature and Treatment of Asphyxia,"* to which the Royal Humane Society awarded the Fothergillian Gold Medal (value £50) in 1845, and of the *"Science and Art of Surgery,"* which has gone through nine large editions in this country, and many editions in America, besides being translated into German, Spanish, and Italian, and in part into Chinese. This work, from its extensive circulation, has probably exercised more influence on the progress of surgery in all English-speaking countries than any other publication of the day; also of a Treatise on *"Concussion of the Spine."* Mr. Erichsen has for many years been largely engaged as a consulting and operating surgeon, and has devoted much attention to surgery in its medico-legal and hygienic aspects. In compliance with an influential requisition, he contested, but unsuccessfully, the representation of the Universities of Edinburgh and St. Andrews at the General Election of 1885.

ERNEST II. (Duke of Saxe-Coburg and Gotha), Augustus-Ernest Charles John Leopold Alexander Edward, who reigns as Ernest II., was born June 21, 1818, succeeded his father Jan. 29, 1844, and married the Princess Alexandrina, daughter of the late Grand Duke Leopold of Baden, brother of the late Prince Consort, May 3, 1842. In 1863 his name was put forward as a candidate for the vacant crown of Greece, but for state reasons he declined it. Duke Ernest, who has laboured to promote German unity, gave the stimulus to those liberal movements which induced the Emperor of Austria to make concessions to his subjects. He is an accomplished musician, and has composed several operas which have been produced in Germany with success.

ESCOSURA, Don Patricio de la, politician and author, born at Madrid, Nov. 5, 1807, passed his early years in Portugal, his father serving in the army of Castaños. Having studied at Valladolid, he returned in 1820 to Madrid, and studied under Lista. In 1824, in consequence of his connection with the secret society of the *"Numantinos,"* he retired to Paris; there he studied mathematics under Lacroix, and afterwards repaired to London. On his return to Spain in 1826, he entered a regiment of artillery, and was promoted in 1829 to the rank of officer. During

this period he devoted himself to literary pursuits and politics. In 1834 he was exiled as a Carlist to Olivera; in 1835 he was appointed aide-de-camp and secretary to Gen. Cordova, upon whose retirement, in 1836, he obtained his discharge. Upon the accession of Gen. Espartero to power, Escosura was again exiled, and retired to France. Returning to Madrid in 1843, he was appointed a Secretary of State, and held office under the Narvaez ministry, retiring temporarily from public affairs in 1846. After having been for some time Under-Secretary of State in the Sotomayor ministry in 1847, he accepted the post of Envoy Extraordinary to Portugal in 1855, and became in the following year Minister of the Interior in the Espartero Cabinet, which was soon succeeded by that of O'Donnell. He was Ambassador to the German Empire from 1872 to 1874. He has obtained reputation as a poet, dramatist, and novelist, and is the author of the following poems: "El Bulto vestido de Negro Capuz," and "Herman Cortés en Cholula;" dramas: "Corte del Buen retiro," played in 1837; "Barbara Blomberg," "Don Jaime el Conquistador," "La Aurora del Colon," "El Higuamota," in 1838; "Las Mocedades de Hernán Cortés," "Roger de Flor," &c., in 1844-6; has written two historical romances, viz., "El Conde de Candespina," published in 1832; and "Ni Rey, ni Roque," in 1835; a political romance, entitled "El Patriarca del Valle," in 1846; and "Historia Constitucional de Inglaterra," in 1859.

ESCOTT, Thomas Hay Sweet, was born at Taunton, April 26, 1844, being the eldest son of the Rev. Hay S. Escott, and member of a very old West Somerset family, whose seat is Hartrow Manor, near Taunton. He was educated at Oxford, where he graduated second class in the final examination in *Litteræ Humanioribus* in June, 1865. Mr. Escott was lecturer in logic at King's College, London, from 1868 till 1872, and during the year 1870 he acted as Professor Lonsdale's deputy as Professor of Classics. He adopted journalism as a profession immediately after he came up to London, in 1865, from Oxford, and he has been closely and actively connected with the London daily and weekly press ever since. He has also written much for the chief monthly magazines, for the most part anonymously. He edited the "Satires of Juvenal and Persius," in 1866, and "The Comedies of Plautus," in 1867. In 1879 he published "England, its People, Polity, and Pursuits," since translated into most European languages, and ac-

cepted as a standard work. Mr. Escott was appointed editor of the *Fortnightly Review* in Oct., 1882, on the resignation of Mr. John Morley, but was obliged to resign in 1886 on account of ill-health.

ESHER, Lord, The Right Hon. William Bialiol Brett, Master of the Rolls, eldest surviving son of the Rev. Joseph George Brett, of Ranelagh, Chelsea, by Dora, daughter of the late George Best, Esq., of Chilston Park, Kent, was born in 1817. From Westminster School he was sent to Caius College, Cambridge (B.A. 1840; M.A. 1845). In 1846 he was called to the Bar at Lincoln's Inn. In March, 1860, he obtained his silk gown, and at the same time he was made a Benchler of his Inn. His political career began in 1866, when, in view of a general election, he went down to Rochdale to oppose Mr. Cobden, and in this advanced Liberal borough declared himself to be, not merely a Conservative, but a Tory. Nevertheless he made so much progress among the constituents, that Mr. Cobden deemed it prudent to visit Rochdale personally, in order to defend his seat. Mr. Brett did not succeed in his bold attempt, and he failed in the contest against Mr. T. B. Potter. In July, 1866, he stood for Helston in Cornwall. This election became famous from the circumstance of there being a tie, and the Mayor assuming to give after four o'clock a casting vote. For doing this the Mayor was summoned before the House of Commons, and Mr. Brett was seated on petition. Mr. Brett represented Helston till 1868, being in Feb. of that year appointed Solicitor-General, on which occasion he received the honour of knighthood. During the short period he remained in office he took a prominent part in passing, in 1868, the Registration Act, which enabled the general election to be taken in that year, and the Corrupt Practices Act, which is now in force. In Aug., 1868, when it was known that the Conservative party had failed to gain the support of the country, he was appointed a Justice of the Court of Common Pleas, and by the operation of the Judicature Act, he became a Judge of the High Court of Justice in 1875. In Oct., 1876, he was made a Judge of the intermediate Court of Appeal, and added to the Privy Council. In April, 1883, he was appointed Master of the Rolls, on the recommendation of Mr. Gladstone, in the place of the late Sir George Jessel. In 1886 he was raised to the peerage in recognition of his long and eminent services as a judge. He married, in 1850, Eugenie, daughter of Louis Mayer, Esq., and step-daughter of the late Captain

Gurwood, C.B. (editor of the Duke of Wellington's Despatches).

EU (Comte d'), Prince Louis Philippe Marie Ferdinand Gaston d'Orléans, born at the château de Neuilly, in the department of the Seine, April 28, 1842, is the eldest son of the Duc de Nemours, and one of the grandsons of King Louis Philippe. Brought up in exile, he was educated in England, and entered the military service of Spain in 1859, serving in Morocco. Later he joined the Artillery College at Segovia, from which he graduated in 1863. In 1864 he married Isabella, the eldest daughter of Dom Pedro II. of Brazil. He was made a Field Marshal in the Brazilian army in 1865, and in 1869 was appointed Commander-in-Chief of all the forces on land and sea, a position he retained until the war with Paraguay (begun in 1864) was ended in 1870 by the death of Lopez, Dictator of Paraguay. From 1865 to 1889 he held the post of Commander-General of the Brazilian Artillery, and was President of various Commissions. In the many absences of Dom Pedro from the Empire during this period, the Comte d'Eu had the virtual direction of all Brazilian affairs. When the revolution of Nov., 1889, occurred, establishing the Republic of Brazil and deposing the Emperor, the Comte d'Eu with his wife accompanied Dom Pedro to Portugal, and he has since resided in Europe.

EUGÉNIE, ex-Empress of the French. Eugénie-Marie de Guzman, Countess of Téba, born May 5, 1826, is the daughter of Doña Maria Manuela Kirkpatrick, of Closeburn, Dumfriesshire, Countess - dowager de Montijos, whose father was English consul at Malaga at the period of her marriage with the Count de Montijos, an officer in the Spanish army, connected, more or less closely, with the houses of the Duke de Frias, representative of the ancient admirals of Castile, of the Duke of Fyars, and others of the highest rank, including the descendants of the Kings of Aragon. On the death of the Count de Montijos, his widow was left with a fortune adequate to the maintenance of her position, and two daughters, one of whom married the Duke of Alba and Berwick, lineally descended from James II. and Miss Churchill. For Eugénie, the second, a still higher destiny was reserved. In 1851, the Countess Téba, accompanied by her mother, paid a lengthened visit to Paris, and was distinguished at the various entertainments given at the Tuileries by the dignity and elegance of her demeanour, and by great personal

beauty,—of the aristocratic English rather than the Spanish style. Her mental gifts were not less attractive; for her education, partly conducted in England, was very superior to that generally bestowed upon Spanish women, who seldom quit their native country. Shortly after the opposition of the higher Northern Powers had put an end to the idea of a union between the Emperor Napoleon III. and the Princess Carola Wasa of Sweden, he apprised the council of ministers of his intended marriage with the daughter of the Countess Montijos; a measure which excited some disapproval among them, and even led to their temporary withdrawal from office. During the short time which intervened between the public announcement of the approaching event and its realization, the Countess Téba and her mother took up their abode in the palace of the Elysée. The marriage was celebrated with much magnificence on Jan. 29, 1853, at Nôtre Dame. The life of the Empress Eugénie after her marriage was comparatively uneventful, being passed chiefly in the ordinary routine of state etiquette; in visits to the various royal *maisons de plaisance*, varied by an extended progress through France in company with her husband; by an annual sojourn for the benefit of her health at Biarritz, her favourite summer resort in the days of her girlhood; by a journey in England and Scotland in the autumn of 1861, and in 1864 to some of the German baths. The Empress Eugénie, who became the mother of an heir to the house of Bonaparte, March 16, 1856, was a devoted supporter of the claims of the Holy See, and to her influence much of the policy of the Emperor towards Italy has been attributed. Accompanied by the Emperor, she visited the cholera hospitals in Paris, in Oct., 1865, and her conduct on this occasion was very highly commended. In July, 1866, she made, with the Prince Imperial, an official tour in Lorraine, and was present at the *fête* held at Nancy in commemoration of the reunion of that province with France. On the occasion of the centenary of Napoleon I., in Aug., 1869, she proceeded with the Prince Imperial to Corsica. In Oct. of the same year, Her Majesty made a voyage to the East on board the steam yacht *l'Aigle*. She went first to Venice, thence to Constantinople, next to Port Saïd, where she was present at the formal opening of the Suez Canal (Nov. 17), visited the most interesting places in Turkey and Egypt, and returned to France at the end of November. On the outbreak of the war between France and Germany she was

appointed Regent (July 27, 1870) during the absence of the Emperor. Immediately after the revolution in Paris, on Sept. 4, she hurriedly left the Tuilleries, and escaped from France. She landed at Ryde, in the Isle of Wight, Sept. 9, 1870, and shortly afterwards proceeded to join the Prince Imperial at Hastings. Camden House, Chislehurst, was subsequently selected as a residence by the Imperial exiles. In Oct., 1871, the Empress went to Spain on a visit to her mother. The Emperor died at Chislehurst, Jan. 9, 1873; and in 1879 the Prince Imperial, who had accompanied the English army in the Zulu war, was killed. His body was brought to England and buried at Chislehurst, and the following year the Empress went to Zululand to visit the fatal spot on the anniversary of her son's death. At the beginning of the year 1881 the Empress removed from Camden House to the Farnborough estate in Hampshire, close to the borders of the county of Surrey. The estate, which was purchased for £50,000, consists of about 237 acres, with a picturesque mansion.

EVANS, Arthur John, M.A., F.S.A., eldest son of John Evans, D.C.L., F.R.S., &c.; born in 1851, at Nash Mills, Hemel Hempsted, Herts; was educated at Harrow School and Brasenose College, Oxford, taking a first class (in History) 1874, continuing his historical studies awhile at Göttingen University, under Dr. Pauli. At an early period he undertook a series of journeys having for their object antiquarian and ethnological researches through some of the least-known European regions. In the course of these he twice explored the Finnish and Lapp countries between the Arctic and Baltic Seas, in company with Mr. F. M. Balfour (afterwards Professor), and obtained interesting materials regarding the survival of heathen rites in those regions. In 1875 he travelled through the Slavonic parts of South-Eastern Europe, and, after the insurrection broke out, took up his residence at Ragusa, in Dalmatia, and, while continuing to explore the antiquities and study the languages and ethnology of the Peninsula, followed the revolutionary movement with warm interest, and described the course of events from the camps of the insurgents. His correspondence, mostly communicated to the *Manchester Guardian*, and partly re-published as "Illyrian Letters," afforded Parliamentary weapons to the enemies of Turkish dominion in Europe. He was also instrumental in calling attention to the

state of the Bosnian refugees, and he gave active assistance to Miss Irby's Relief Fund. During the Austrian occupation of Bosnia in 1878 Mr. Evans accompanied General Philippovich's division, and narrowly escaped being cut to pieces with the unfortunate hussars in the ambush of Maglai. During the comparatively tranquil period that succeeded he was able to continue his explorations of the interior, the archaeological results of which have appeared in "Archæologia," under the title of "Antiquarian Researches in Illyricum," and in accounts of new discoveries of Illyrian coins in the *Numismatic Chronicle*, &c. In 1882 a revolt broke out in the Crivoscian Highlands of South Dalmatia, consequent on the attempt of the Austrian Government (in violation of their agreement) to introduce military service into the country. The Austrian Government, highly irritated with Mr. Evans, had him arrested on a charge of complicity with the insurgents, and confined him in the prison at Ragusa. After seven weeks' solitary confinement he was released by Imperial orders, but expelled from the Austrian dominions. He then settled in Oxford, and continued his archaeological studies. In 1883 he was chosen as University Lecturer on the Ilchester Foundation, and delivered a course of lectures "On the Slavonic Conquest of Illyricum." In 1884, on the death of Mr. J. H. Parker, he was made Keeper of the Ashmolean Museum, Oxford, with the re-organization of which he has since been occupied. He has also been engaged in archaeological researches in Sicily and Great Greece, and in 1889 published "The Horsemen of Tarentum," a monograph on the coinage of that city.

EVANS, John, Honorary D.C.L. Oxford, and LL.D. Dublin, Treas. and V.P.R.S., Pres. S.A., F.G.S., &c., is son of the late Rev. A. B. Evans, D.D., who was head master of Market Bosworth Grammar School, Leicestershire. He was born in 1823, and educated by his father. He has devoted much attention not only to archæology, but to geology and numismatics, as well as to other branches of science. For many years he was engaged in business as a paper manufacturer, and is the President of the Paper Makers' Association. In 1864 he published "The Coins of the Ancient Britons," for which he received the Allier d'Ilantersche Prize from the French Academy, and in 1872, "The Ancient Stone Implements, Weapons, and Ornaments of Great Britain," which

was translated into French and published in Paris in 1875. "The Ancient Bronze Implements, Weapons, and Ornaments of Great Britain and Ireland," appeared in 1881, and a French translation of it in the following year. He has also written on the "Flint Implements in the Drift," in the "Archæologia," vols. 38 and 39; and a variety of papers in the "Archæologia," and in the *Numismatic Chronicle*, of which he is one of the editors. He was President of the Geological Society in 1875-76, and of the Anthropological Institute in 1878-79, and has been President of the Numismatic Society since 1875, and of the Society of Antiquaries since April, 1885, and is, in consequence, an *ex officio* Trustee of the British Museum. He is a correspondent of the French Institute (*Académie des Inscriptions*), and an honorary member of a large number of foreign learned societies; and his antiquarian and numismatic collections rank among the first in this country. He is a J.P. and D.L. for Hertfordshire, of which county he was High Sheriff in 1881-2. He is Chairman of Quarter Sessions for the St. Albans Division of Herts, and also Vice-Chairman of the Hertfordshire County Council.

EVANS, Sebastian, LL.D., youngest son of the late Rev. Arthur Benoni Evans, D.D., born at Market Bosworth, Leicestershire, March 2, 1830, was educated at Emmanuel College, Cambridge, graduating B.A. in 1853, M.A. in 1857, and LL.D. in 1868. He became manager of the artistic department in Messrs. Chance Brothers & Co.'s glass works in 1857, in which capacity he designed the "Robin Hood" window exhibited in the International Exhibition of 1862, and lithographed by Mr. Waring in his "Masterpieces of Industrial Art." In 1865 he published a volume entitled "Brother Fabian's MS. and other Poems," and in 1875, a second, "In the Studio, a decade of Poems." In 1867 he became editor of the *Birmingham Daily Gazette*, and in 1868 unsuccessfully contested the borough of Birmingham in the Conservative interest. He resigned the editorship in Oct., 1870, and was called to the Bar in 1873, when he joined the Oxford Circuit. After practising for some years in Birmingham, he removed to London in 1878, and took an active part in the organization of the Conservative party in connection with the National Union of Conservative Associations. In Oct., 1881, he undertook the editorship of a new Conservative Sunday newspaper, the *People*, which, under his management,

has become an important organ of the party. Dr. Evans is author of a number of essays and poems, which have appeared in various periodicals. Several of his lectures have also been separately published.

EVARTS, William Maxwell, LL.D., was born in Boston, Feb. 6, 1818. He graduated at Yale College in 1837, studied at the Harvard Law School, and in 1841 was admitted to the New York Bar, where he soon took a high position. From 1849 to 1853 he was Deputy U.S. District Attorney. In the Impeachment Trial of President Andrew Johnson, in the spring of 1868, Mr. Everts was the leading counsel for the defendant, and from July, 1868, to the close of Mr. Johnson's administration, he was Attorney-General of the United States. In 1872 he was counsel for the United States in the tribunal of arbitration on the Alabama claims at Geneva; and in the celebrated Tilton-Beecher case, in 1875, he was at the head of Mr. Beecher's counsel. He also argued the Republican side of the case before the Electoral Commission in 1877. Upon the accession, in March, 1877, of Mr. Hayes, to the Presidency, he was made Secretary of State, a position which he retained until the close of Mr. Hayes' term, 1881. He is at present U.S. Senator from New York, his term expiring in 1891. Although an accomplished scholar and able speaker, he has published only a few occasional discourses and addresses. Among these are the "Centennial Oration before the Linonian Society of Yale College," 1853; an "Address before the New England Society," 1854; a Eulogy on Chief Justice Chase; the Centennial Oration at Philadelphia, and at unveiling the statues of Webster and Seward in New York.

EVERETT, Professor Joseph David, F.R.S., was born at Rushmere, near Ipswich, Sept. 11, 1831. In 1854 he entered the University of Glasgow, where he took the degrees of B.A. and M.A., with honours in all the subjects of the curriculum. After successively occupying the posts of Secretary to the Meteorological Society of Scotland, Professor of Mathematics at King's College, Nova Scotia, and Assistant Professor of Mathematics in the University of Glasgow, he was appointed, in 1867, Professor of Natural Philosophy in Queen's College, Belfast. He was Secretary to the Units Committee of the British Association, and published in 1875 a volume of "Illustrations," since enlarged into a work ex-

titled "Units and Physical Constants," which has largely contributed to the general adoption of the system of units recommended. He was made Secretary to the Underground Temperature Committee at its appointment in 1867, and has directed the observations which have since been taken in various places for determining the rate at which temperature increases downwards in the earth. He has contributed to the Greenwich Observations and to the Royal Societies of Edinburgh and London, papers on Underground Temperature, on Atmospheric Electricity, and on Rigidity. His papers on Mirage in the *Philosophical Magazine* for 1873, cleared up several points which had previously been obscure. Professor Everett published in 1870-72 a version of Deschanel's "Traité de Physique," partly translated and partly rewritten; in 1877 an "Elementary Text Book of Physics;" in 1885, "Outlines of Natural Philosophy for Schools;" and in 1882 a work on Vibratory Motion and Sound. He is a skilled shorthand writer on a system invented by himself, which was published in 1877, and has attracted much attention.

EWART, James Cossar, M.D., was born at Penicuik, Midlothian, Nov. 26, 1851. He was educated at Penicuik and at the University of Edinburgh, where, in 1874, he was appointed Demonstrator of Anatomy. In 1875 he was elected Conservator of the Museums of University College, London. While at University College, he completely reorganised the Museums and investigated the life history of the Bacillus of Splenic Fever and of other minute organisms. In 1878 he was appointed by the Crown to the Chair of Natural History in the University of Aberdeen, and in 1882 he was transferred to the corresponding chair in the University of Edinburgh—the most desirable post a naturalist can hold in this country. In the same year he was elected a member of the Fishery Board for Scotland. While in Aberdeen, Professor Ewart introduced classes for the practical study of zoology, and organized a small marine laboratory. At this, the first marine laboratory started in Britain, Professor Ewart and Mr. Romanes made their investigations for their memoir on the Echinoderms, which the Royal Society constituted the Croonian lecture for 1881. Since returning to Edinburgh, Professor Ewart has devoted himself to developing the Natural History Department, and to creating a scientific department in connection with the Fishery Board; considerable progress has already been made in working out the natural

history and development of the herring and other food fishes. In this work Professor Ewart has the use of three marine stations, and is assisted by a staff of three naturalists and several fishery officers, and the government, in addition to voting grants for carrying on the scientific work, has provided boats for trawling and other operations. Recently he has been endeavouring to discover improved methods for preserving fish, and to introduce the famous Loch Fyne herring to the Antarctic ocean. In addition to the laborious work of his chair, Professor Ewart has found time to have two lectureships instituted in the University—one on "Embryology," and one on the "Philosophy of Natural History," and he has done much to obtain for the students a much-wanted Union such as exists at Oxford and at Cambridge.

EWING, Professor James Alfred, B.Sc., F.R.S., F.R.S.E., Professor of Engineering in University College, Dundee (St. Andrews University), son of the Rev. James Ewing, of Dundee, was born March 27, 1855, and was educated at the High School of Dundee, and at Edinburgh University, where he graduated in Science. He assisted Sir William Thomson, and the late Professor Fleeming Jenkin for four years in their work as engineers. In 1878 he was appointed by the Japanese Government Professor of Mechanical Engineering in the University of Tokio, which office he held till 1883, when he resigned his chair in Japan to become Professor of Engineering in University College, Dundee, a post which he now holds. He has been also Examiner in Engineering in Victoria University, Manchester, 1888-90. While in Japan he gave special attention to the study of earthquakes, and devised seismographs by which a complete analysis of the motion of the ground was obtained. His apparatus for earthquake measurement is now used in many observatories. He is the author of a treatise on "Earthquake Measurement," published by the University of Tokio, 1883, and of many papers on the same subject in the Transactions of the Seismological Society of Japan. Has given much attention to electricity and its applications, and especially to the study of Magnetism; is the author of a treatise on "Magnetism in Iron," 1890, and of many papers on this and kindred subjects, published in the Philosophical Transactions of the Royal Society and elsewhere, of which the chief are:—"Experimental Researches in Magnetism," Phil. Trans., 1885; "Effects of Stress and Magnetisation on the Thermoelectric Quality of Iron," Phil. Trans.,

1886; "Magnetic Qualities of Nickel," Phil. Trans., 1888; "Magnetism of Iron in Strong Fields," Phil. Trans., 1889; "Time-Lag in the Magnetisation of Iron," Proc. Roy. Soc., 1889; "Contributions to the Molecular Theory of Magnetism," Proc. Roy. Soc., 1890. Professor Ewing is the author of several of the longer articles on engineering subjects in the ninth edition of the "Encyclopædia Britannica," "Steam Engine," "Strength of Materials," "Sewerage," and others, and is also a contributor to Chambers's Encyclopædia (articles, "Dynamo," "Electric Light," &c.). He is one of the assessors representing the Senatus upon the University Court of St. Andrews University, and is a member of the Council of the Royal Society of Edinburgh. He was elected F.R.S. in 1888.

EXETER, Bishop of. See RICKERSTETH, THE RT. REV. EDWARD HENRY.

EYRE, The Most Rev. Charles, a Roman Catholic prelate, son of the late John Lewis Eyre, Esq. (Count Eyre, in the Papal dominions), and brother of the late Very Rev. Monsignor Eyre, of Hampstead, was born 1817, at Askam Bryan Hall, York, and educated at Ushaw College, Durham, and in Rome. He was appointed assistant priest at St. Andrew's church, Newcastle-on-Tyne, in 1843; removed to St. Mary's, Newcastle, in 1844; became senior priest at St. Mary's Cathedral, Newcastle, in 1847, and remained there, with a short interval, till Christmas, 1868. He was for many years canon of the diocese of Hexham and Newcastle, and for some time was Vicar-General; was appointed R.C. Archbishop for the Western district, and Delegate-Apostolic for Scotland in Dec., 1868; and was consecrated in the church of St. Andrea della Valle, Rome, Jan. 13, 1869, by the title of Archbishop of Anazarba, in *partibus infidelium*. When the ancient hierarchy was restored in Scotland by Pope Leo XIII., on March 4, 1878, Mgr. Eyre was appointed R.C. Archbishop of Glasgow. Archbishop Eyre is the author of a "History of St. Cuthbert," 1849 (3rd edit. 1889). He is a "Grand Cross" of the Order of Isabella the Catholic, a chaplain of the Order of Malta, and a Knight of the Holy Sepulchre.

EYRE, Edward John, some time Governor of Jamaica, was born in Aug., 1810, son of the late Rev. Anthony Eyre, vicar of Hornsea and Long Riston, in the Eas Riding of Yorkshire, and a lecturer at the Louth and Sedburgh Grammar Schools. Finding he would have to wait nearly a year to obtain a commission in the army

(for which the purchase-money was £1,500) he elected, when only seventeen years of age, to accept the purchase-money (£450) and go out to Australia at once to try his fortune. He arrived in New South Wales early in 1833 with £400, engaged in sheep farming, and then in transporting stock overland from New South Wales to South Australia. In the latter colony he purchased property on the Lower Murray River, where he remained several years, having been appointed resident magistrate of his district, and protector of the Aborigines. In a work entitled "Discoveries in Central Australia," published in 1845, he earnestly pleads the cause of the wandering native tribes. In the meantime he distinguished himself as an Australian explorer of the then unknown shore, extending from 118 deg. to 134 deg. of east longitude between King George's Sound, in West Australia, and Port Lincoln, in South Australia. In 1845 Mr. Eyre returned to England, and in 1846 received from Earl Grey, then Secretary of State for the Colonies, the appointment of Lieut.-Governor of New Zealand, as second to the Governor, Sir George Grey. Having served his full term as a colonial governor he returned to England in 1853, and about a twelvemonth afterwards was appointed Lieut.-Governor of the island of St. Vincent. This post he held for six years; and in the year 1859 and 1860 he was in the island of Antigua, filling the place of the Governor of the Leeward Islands, who was on leave of absence. In 1860, upon the termination of his Governorship of Antigua, Mr. Eyre returned to England to recruit his health; and in 1862 he was chosen by the late Duke of Newcastle, Secretary of State for the Colonies, to administer the Government-in-Chief of Jamaica and its dependencies during the absence of Governor Darling, who had returned to England on account of ill-health. In consequence of the non-return of Governor Darling, Mr. Eyre was appointed Captain-General and Governor, General-in-Chief and Vice-Admiral of the Island of Jamaica, July 15, 1864; and an insurrection having broken out in Oct., 1865, he proclaimed martial law, and used very vigorous measures for its suppression. As a result, what was believed to be a dangerous insurrection was crushed. But his measures, more especially in the trial by court-martial, and condemnation to death of George William Gordon, a mulatto of property, excited much resentment among certain sections at home, and a commission of inquiry was despatched to Jamaica, Governor Eyre being superseded and Sir Henry Storks temporarily ap-

pointed in his place. The report of the committee published in June, 1866, exonerated Governor Eyre from the heavy charges brought against him, but he was recalled, and Sir P. Grant appointed his successor. Mr. Eyre's health having suffered from long service in the tropics, he retired from the Public Service in 1874 upon pension as a retired Colonial Governor.

F.

FAED, John, R.S.A., artist, born in 1820, at Burley Mill, in the stewartry of Kirkcudbright, where his father was an engineer and millwright, showed an early taste for art, and, encouraged by a successful painting, which he finished at the age of twelve, began to paint miniatures in his own neighbourhood. He repaired, in 1841, to Edinburgh, where he exhibited, in 1850, some pictures of humble life, which met with a ready sale. His principal works are—"Shakespeare and his Contemporaries;" and two series of drawings, illustrating "The Cotter's Saturday Night," and "The Soldier's Return." Since coming to London, in 1864, Mr. Faed has painted "The Wappenschaw; or Shooting Match;" "Catherine Sefton;" "The Old Style;" "Tam O'Shanter;" "Haddon Hall of Old;" "The Ballad;" "Old Age;" "The Stirrup Cup;" "The Old Crockery Man;" "John Anderson, my Jo;" "Parting of Evangeline and Gabriel;" "The Old Brocade;" "Auld Mare Maggie;" "Game-keeper's Daughter;" and "The Hiring Fair."

FAED, Thomas, R.A. (brother of Mr. John Faed), born at Burley Mill, in the stewartry of Kirkcudbright, in 1826, lost his father in his boyhood, but, aided by his brother, who was working his way to reputation as an artist in Edinburgh, resolved to follow the bent of his genius. While a student at the School of Design in Edinburgh, where for a short period he was under the tuition of Sir W. Allan, he was annually successful at the competition for prizes in various departments. The earliest work of art he exhibited in public was a drawing in water colours from the "Old English Baron." He soon after took to oil painting, exercising his brush on such subjects as draught-players and shepherd boys. Mr. Faed became an Associate of the Royal Scottish Academy in 1849, settled permanently in London in 1852, and began to exhibit at the Royal Academy, generally choosing domestic and pathetic subjects, or subjects appealing to Scotch

religious sentiment. In 1855 his "Mithersless Bairn" elicited very high praise. Other works by Mr. Faed are—"Home and the Homeless;" "The First Break in the Family;" "Sunday in the Backwoods;" and "The Last o' the Clan;" "Hush! Let him Sleep;" "The Anxious Look Out;" "Highland Tramp crossing a Headland;" and "The Shepherd's Wife." Mr. Faed was made A.R.A. in 1859, and R.A. in 1864. He was elected an honorary member of the Vienna Royal Academy in Jan., 1875.

FAIRBAIRN, Sir Andrew, born at Glasgow on March 5, 1828, is the only son of Peter Fairbairn, afterwards Mayor of Leeds, and knighted by the Queen. He was educated at Leeds, Geneva, and Glasgow, and in 1846 became a pensioner at Christ's College, Cambridge, but migrated to Peterhouse in January of the following year. He graduated B.A. in Jan., 1850, and took his M.A. degree in 1853. He was called to the Bar at the Inner Temple on April 30, 1852, and attended the West Riding Sessions and Northern Circuit until 1856. He then relinquished practice, and in 1860 became a partner in the firm of his father, on whose death in 1861 he succeeded to the business. In 1866 he was elected Mayor of Leeds, and was re-elected to the same office in 1867. During the latter year he was a Commissioner of the Leeds Exhibition of Fine Arts, and was knighted (by patent) in 1868, during the Ministry of Mr. Disraeli. He resigned his mayoralty in September, 1868, in order to stand as Liberal candidate for Leeds. He was unsuccessful, as also in 1874, when he contested Knaresborough. He became a director of the Great Northern Railway in 1878, and the same year he was appointed Royal Commissioner to the Paris Exhibition. In 1880 he was elected Member for the Eastern Division of the West Riding, and when the Division was split up into six sub-divisions in 1885 he was chosen as the first representative of the Otley Division. The same year he was appointed Vice-President of the Railway Congress at Brussels, and was made a Knight Commander of the Order of Leopold by the King of the Belgians.

FAIRBAIRN, Andrew Martin, M.A., D.D., Principal of Mansfield College, Oxford, born near Edinburgh, Nov. 4, 1838; was educated there, and studied in the Universities of Edinburgh and Berlin, and became Minister of the Independent Church, Bathgate, West Lothian, in 1860. He was transferred to

Aberdeen in 1872; appointed Principal of Airedale Independent College in 1877; became first Principal of Mansfield College, Oxford, in 1886. Is D.D. of the University of Edinburgh, 1878, and of Yale, 1889; is M.A. (honorary) of the University of Oxford, 1887; was Muir Lecturer on the Philosophy and History of Religion in the University of Edinburgh, 1878-83; and Chairman of the Congregational Union of England and Wales, 1883. Mr. Fairbairn is the author of "Studies in the Philosophy of Religion and History," 1876; "Studies in the Life of Christ," 1880; "The City of God," 1882; "Religion in History and in the Life of To-day," 1884; and has been a frequent contributor to the *Contemporary* and other reviews.

FAIRBAIRN, Sir Thomas, Bart., eldest surviving son of the late Sir William Fairbairn, Bart., LL.D., F.R.S., was born in Manchester in 1823, and received a private education. A long residence in Italy afforded him opportunities for the study and appreciation of art, and induced him to make efforts for its encouragement in this country, especially in connection with education. Under the signature of "Amicus" he has contributed, during many years, letters to the *Times* newspaper, on the relations between employers and employed, the social progress of England, Trade Unionism, and other subjects. He was Chairman of the Exhibition of the Art Treasures of the United Kingdom at Manchester in 1857, and on Her Majesty's visit in June was offered the honour of knighthood, which he declined. He was one of Her Majesty's Commissioners for the Exhibition of 1851, and took an active part in the organization of the Great Exhibition of 1862, in the same capacity. He succeeded to the baronetcy on the death of his father, Aug. 18, 1874. Sir Thomas Fairbairn is a Magistrate and Deputy-Lieutenant for Lancashire and Hampshire, and was High Sheriff of the latter county in 1870.

FAITHFULL, Miss Emily, daughter of the late Rev. Ferdinand Faithfull, was born at Headley Rectory, Surrey, in 1835, and educated in a school at Kensington. She was presented at Court in her twenty-first year. On becoming interested in the condition of women, she devoted herself to the extension of their remunerative spheres of labour. In 1860 she collected a band of female compositors, and, in spite of great difficulties, founded a typographical establishment in Great Coram Street, W.C., in which

women (as compositors) were employed, and for which she obtained the approval of Her Majesty. Among many other specimens of first-rate workmanship produced at the Victoria Press is the "Victoria Regia," dedicated by special permission to the Queen, who signified her approbation by giving a warrant appointing Miss Faithfull, Printer and Publisher in Ordinary to Her Majesty. In May, 1863, Miss Faithfull started a monthly publication called *The Victoria Magazine*, in which for eighteen years the claims of women to remunerative employment were earnestly set forth. In the spring of 1868 Miss Faithfull published a novel, entitled "Change upon Change," which ran into a second edition within a month. Shortly after this, Miss Faithfull made her *début* as a lecturer, and achieved a marked success in this capacity, and has since frequently lectured in our leading literary and philosophical institutions. In 1872-73 Miss Faithfull visited the United States. After a third tour in America, in 1882-83, she published a book entitled "Three Visits to America," containing vivid descriptions of various feminine industries, and life as she found it among the Mormons in Salt Lake City, Colorado, California, &c. Miss Faithfull is a member of the staff of the *Lady's Pictorial*, to which she contributes two articles every week; and articles on the subject which she has made specially her own are frequently to be found in our leading papers and magazines. In commemoration of thirty years dedicated to the interests of her sex, Miss Faithfull received, in 1888, an engraving of Her Majesty, which was sent to her by the Queen, bearing an inscription in Her Majesty's own handwriting, and followed by a Civil Service Pension. In Sept., 1890, she visited, by request, the Queen of Roumania, who was then in England, and detailed to Her Majesty the various movements of woman's work in England.

FALGUIÈRE, Jean Alexandre Joseph, a French painter and sculptor, was born at Toulouse, Sept. 7, 1831. He was a pupil of Jouffroy, and at the *École des Beaux Arts* gained the *Prix de Rome* in 1859. In 1857 he sent to the Salon a plaster statue of the Infant Theseus, which was reproduced in marble and exhibited in 1865. Since then he has executed "A Christian Martyr," now in the Gallery of the Luxembourg, 1867; "Ophelia," 1869; "Vainqueur au Combat de Coq," 1870; "Pierre Corneille," 1872 (purchased by the Government); "Danseuse Egyptienne," 1873, for the Théâtre Français; "La Suisse accueillant

l'armée Française," 1874, presented to the town of Toulouse by the Federal Council; and a bust of Lamartine, 1876, which was solemnly unveiled at Mâcon in August, 1878. M. Falguière is also well-known as a painter. His first picture, "*Près du Château*," 1873, attracted much attention; "*Les Lutteurs*," 1875, was warmly praised, as were also "*Cain and Abel*," 1876, and "*The Beheading of John the Baptist*," 1877. At the Paris Exposition of 1888 he was awarded a medal of the first-class. He is a Chevalier of the Legion of Honour.

FALK, Dr. Paul Ludwig Adalbert, a German statesman, born at Metschkau, in Silesia, in 1827, is the son of a Lutheran minister, who was a "liberal theologian." He studied first in the "*Realschule*" of Landeshut, then at the Gymnasium in Breslau, and finally at the University of the latter city. In 1847 he began his legal career; in 1850 he became an assistant of the Public Prosecutor in Breslau; in 1853 chief of this office at Lyck; in 1861 he assumed the same functions before the *Kammergericht* or Superior Court, with duties in the Ministry of Justice; in 1862 he became Judge of the Court of Appeals at Glogau; and in 1868 he was permanently assigned as Privy Councillor, or *Geheimrath*, to the Ministry of Justice. He sat in the Prussian House of Deputies from 1859 to 1861; he was elected to the Constituent North German Reichstag in 1867; and he has been a member of the Imperial Parliament ever since its establishment. When Prince Bismarck resolved to weaken the influence of the Roman Catholic Church in Prussia, he caused Dr. Falk to be nominated Minister of Public Worship (Jan. 22, 1872), in succession to Dr. von Mühler. During his tenure of office, Dr. Falk succeeded in passing various repressive laws directed against the hierarchy and the clergy, and his name has thus become known beyond the limits of the German Empire. He resigned the post of Minister of Public Worship July 14, 1879, and was succeeded by Herr von Puttkamer.

FARLEY, James Lewis, only son of the late Mr. Thomas Farley, of Meiltran, co. Cavan, was born at Dublin, Sept. 9, 1823. After the Crimean war and the peace of Paris in 1856, the attention of English capitalists was directed to Turkey, and the Ottoman Bank was formed. Mr. Farley accepted the Post of Chief Accountant of the branch at Beyrout, which he assisted in successfully establishing. In 1860 he was appointed Accountant-

General of the State Bank of Turkey at Constantinople, which subsequently became merged in the Imperial Ottoman Bank. He has been a frequent contributor to the newspaper press on questions relative to the trade and finances of Turkey, and was special correspondent for the *Daily News* during the Sultan's visit to Egypt in 1863, and during the Imperial and Royal visits to Constantinople in 1869. He is also the author of "*Two Years in Syria*," 1858; "*The Druses and Maronites*," 1861; "*The Resources of Turkey*," 1862; "*Banking in Turkey*," 1863; and "*Turkey*," 1866. In recognition of his literary services to the Turkish empire, he was, in March, 1870, appointed Consul at Bristol for his Imperial Majesty the Sultan. He is a Fellow of the Statistical Society of London, and a Corresponding Member of the Institut Égyptien, founded by the First Napoleon in Alexandria.

FARRAR, The Ven. Frederic William, D.D., F.R.S., Archdeacon of Westminster, son of the Rev. C. R. Farrar, Rector of Sidcup, Kent, was born in Bombay, Aug. 7, 1831. He received his education at King William's College, in the Isle of Man, and at King's College, London. He became a classical exhibitor of the University of London in 1850, graduated B.A. there, and was appointed a University scholar in 1852. Mr. Farrar was successively a Scholar and Fellow of Trinity College, Cambridge, and in 1854 he took his Bachelor's degree in that University as fourth in the first class of the Classical Tripos, and a Junior Optime in mathematics. He had already obtained the Chancellor's Prize for English Verse by his poem on "*The Arctic Regions*," and he subsequently gained the Le Bas Classical Prize, and became also Norrisian Prizeman. In 1854 he was ordained deacon by the Bishop of Salisbury, and in 1857 he was admitted into priest's orders by the Bishop of Ely. For many years he was one of the Assistant Masters at Harrow under Dr. Vaughan, and under his successor Dr. Butler; and he held, with great distinction, the Head Mastership of Marlborough College from Jan., 1871, till April, 1876. Dr. Farrar was a select preacher before the University of Cambridge in 1868, and again in 1874-75, and he preached the Hulsean Lectures in 1870. He was an Honorary Chaplain to the Queen from 1869 to 1873, when he was nominated one of her Majesty's Chaplains in Ordinary. In April, 1876, he was appointed to a canonry in Westminster Abbey and the rectory of St. Margaret's, vacant by the death of

Canon Conway. He was appointed Archdeacon of Westminster, April 24, 1883. In 1890 Archdeacon Farrar was offered by the Speaker, and accepted, the Chaplaincy of the House of Commons, rendered vacant by the death of the Rev. Henry White. Dr. Farrar is the author of the following works of fiction:—"Eric, or Little by Little," 1858; "Julian Home," 1859; and "St. Winifred's, or the World of School," 1863. His philological works are—"The Origin of Language," 1860; "Chapters on Language," 1865; "Greek Grammar Rules," 6th edit., 1865; "Greek Syntax," 3rd edit., 1867; "Families of Speech," 1870; and "Language and Languages," being a revised edition of "Chapters on Language" and "Families of Speech," comprised in one volume, 1878. He has also published "A Lecture (before the Royal Institution) on Public School Education," with notes, 1867; and edited "Essays on a Liberal Education," 2nd edit., 1868. His theological works are—"Seekers after God" (Sunday Library), 1869; "The Witness of History to Christ; being the Hulsean Lectures for 1870," 1871; "In the Days of thy Youth," sermons preached in the chapel of Marlborough College, 1877; "The Life of Christ," 2 vols., 1874, which reached its twelfth edition in a single year; "Life of St. Paul," 1879; and "The Early Days of Christianity," 2 vols., 1882; besides several volumes of sermons; and notably that bold work, "Eternal Hope," 1880, in which Canon Farrar combats the doctrine of eternal torture in hell. All Dr. Farrar's works have passed through many editions, and many of them have been translated into French, Dutch, Russian, Swedish, and Italian. Besides these works, Dr. Farrar has been a contributor to the Speaker's Commentary (Book of Wisdom) and Bishop Ellicott's Commentary (Book of Judges); to the Cambridge Bible for schools he has contributed commentaries on St. Luke and the Epistle to the Hebrews, both in the Greek and in the English editions. He also furnished articles to Smith's "Dictionary of the Bible," Kitto's "Biblical Cyclopædia," the "Encyclopædia Britannica," &c. In 1883 he was appointed Rural Dean by the late Bishop of London, and was re-elected by the clergy to the same office in 1885. Archdeacon Farrar is Honorary Chaplain of the 2nd Volunteer Battalion Royal Fusiliers. In 1885 he was appointed Bampton Lecturer before the University of Oxford, and delivered a course (since published) on "The History of Interpretation." In 1885 he visited America, where he received a hearty welcome from all classes, and especially from the

members of all religious denominations. He has taken a prominent part in temperance reform, in the Diocesan Council for the Welfare of Young Men, in the Westminster Sanitary Aid Associations, in the Westminster Sunday School Association (of which he was the founder), in the formation of a Sea-side Camp for London Youths, in the Support of Brotherhoods, and in many other philanthropic works.

FAUCIT, Helen. See MARTIN, LADY.

FAURE, Jean-Baptiste, a famous baritone singer, born at Moulins, Jan. 15, 1830, was educated at the Conservatoire, from 1843 to 1852, and made his *début* at the Opéra Comique in the latter year. M. Faure performed at the Opera House in Paris, in "Pierre de Medicis," Oct. 14, 1861. In 1857 he was appointed Professor of Singing to the Conservatoire, in succession to M. Frédéric Pouchard, and appeared during several seasons at the Royal Italian Opera, Covent Garden. For many years M. Faure was acknowledged head of the French lyric stage. He was nominated a Chevalier of the Legion of Honour in Dec., 1881. He is the possessor of a fine collection of works of art.

FAWCETT, Edgar, an American man of letters, was born at New York, May 26, 1847, and graduated at Columbia College in 1867. He has published "Short Poems for Short People," 1871; "Purple and Fine Linen," 1874; "Ellen Story," 1876; "Fantasy and Passion," poems, 1877; "A Hopeless Case," 1880; "A Gentleman of Leisure," 1881; "An Ambitious Woman," 1883; "Tinkling Cymbals;" "Adventures of a Widow;" "Song and Story, later Poems;" "Rutherford Park;" and "The Bunting Ball," 1884; "Social Silhouettes," 1885; "Romance and Revery," 1886; "The Confessions of Claud;" "The House at High Bridge;" "Douglas Duane;" and "The New King Arthur," 1887; "A Man's Will;" "Olivia Delaplaine;" and "Divided Lives," 1888; "A Demoralising Marriage;" "Agnosticism and other Essays;" "Miriam Balestier;" and "Solarion," 1889; "The Evil that Men Do;" "Fabian Dimitry;" and "A Daughter of Silence," 1890.

FAWCETT, Sir John Henry, K.C.M.G., created 1887, was born on Dec. 11, 1831, being the eldest son of John Fawcett, Esq., of Great Petherin Bank, Cumberland, J.P., D.L. for that county, by his wife, Sarah, daughter of J. Hodgson, Esq., Clerk of the Peace for the county. He was educated at Rugby School under Dr. (after-

wards Archbishop) Tait, and at Cambridge. He was elected a scholar of Trinity Hall in that university in 1851, and took his degree as first-class in the law tripos in 1853. He was called to the Bar at the Middle Temple in Jan., 1857, and joined the northern circuit. He was appointed a revising barrister in 1868; and unsuccessfully contested the borough of Cockermouth in Feb., 1874, in the Conservative interest. He was appointed Assistant-Judge and Vice-Consul at Constantinople in June, 1875; and was Acting-Judge and Consul-General from the August, 1876, to Feb. 14, 1877, when he was appointed Judge of the Supreme Consular Court of the Levant, and her Britannic Majesty's Consul-General for Turkey. After the raid of General Gourko across the Balkans in July, 1877, and his subsequent retreat, Mr. Fawcett was requested by her Majesty's ambassador to proceed to the valley of the Tundja to carry relief to the starving populations. He visited Rodosti, Adrianople, Philopoli, Tartar Baszajick, Sofia, Korlova, Kalmar, Kesanlick, Shipka, and the whole valley of the Tundja, and for some weeks remained in the country distributing relief to the suffering populations. Mr. Fawcett's despatches to her Majesty's ambassador were the means of a large amount of money being subscribed by the British public to the Compassionate Fund. In May, 1878, he was requested by the Marquis of Salisbury to proceed to Volo, in Thessaly, to investigate, in concert with his Excellency, Redjib Pasha, the circumstances concerning the death of Mr. Ogle, correspondent of the *Times* newspaper. He remained there some time, and made a report which was the subject of a debate in Parliament on the last day but one of the Session in Aug., 1878. Mr. Fawcett was selected by her Majesty's Government to be the English member of the International Commission of the Rhodope; he thereon proceeded to Philopoli, and thence to Enos, Fuerti, Gurvulgera, and during a month traversed the Rhodope mountains, taking evidence of the state of the refugees and the sufferings of the Mahometan population.

FAWCETT, Mrs. Millicent Garrett, born at Aldeburgh, in Suffolk, June 11, 1847, is sister to Mrs. Garrett Anderson, M.D. In 1867 she married the late Professor Fawcett, and soon after her marriage she became a prominent leader of the Women's Suffrage movement. She is also an urgent pleader on the subject of girls' education. In 1870 she published "Political Economy for Beginners;" "Tales in Political Economy," 1874; "Janet Doncaster," a novel, 1875; "Some

Eminent Women of our Time," a series of twenty-four short biographical sketches in 1889. In conjunction with her husband, Mrs. Fawcett wrote a volume of "Essays and Lectures," 1872; the article on "Communism" in the ninth edition of the "Encyclopædia Britannica" is by her as is also the article on Henry Fawcett in the 1888 edition of Chambers' Encyclopædia. Mrs. Fawcett is the mother of the Miss Fawcett who, in the Mathematical Tripos at Cambridge in 1890 was declared "Above the Senior Wrangler."

FAWCETT, Philippa Garrett, daughter of the late Professor Henry Fawcett, and Millicent Fawcett (*née* Garrett) was born in London, in 1868, but has spent a part of nearly every year of her life in Cambridge. Miss Fawcett was educated at Clapham High School, Bedford College, University College, where her mathematical lecturer was Mr. Karl Pearson, and at Newnham College, Cambridge, where she profited much by the teaching of Miss J. McLeod Smith, and had the advantage of reading with Dr. Routh during her first term. But, during the last two-and-a-half years, Miss Fawcett was entirely under the able tuition of Mr. E. W. Hobson, Fellow of Christ's College, and Senior Wrangler in 1878. In 1886 she passed the Higher Local Exams. with brilliant success, taking a first-class in the language group, with distinction in two languages, and a first-class in the group for logic and political economy, with distinction in the latter subject. Upon the strength of this achievement, Miss Fawcett was awarded the Gilchrist Scholarship. She subsequently added another laurel to her wreath by coming out at the head of the list in the mathematical group of the Higher Locals. But her great triumph was when, in the Cambridge Senate House, were heard the words—"Above the Senior Wrangler, Miss Fawcett." The strife of Wranglers is a grapple of intellectual thew and sinew; and the Tripos List registers sheer mental strength; and now, a woman stands proudly in the inmost shrine of the Athene Promachos of Cambridge. Miss Fawcett had rivals of no mean mettle. Mr. Bennett, of St. John's College, is so distinguished a mathematician, that a former Senior Wrangler, on learning the result, was heard to declare "If she is senior to Bennett she would have been senior in any year." It is an open secret, however, that she outstripped even this formidable opponent by a considerable number of marks. In the matter of work, Miss Fawcett is not one of those foolish virgins who sit up into the small hours of the

morning with wet towels round their heads, until brain and nerves give way. About six hours a day is her usual allowance for study, but during those six hours it is real hard work, as we may imagine. She goes freely into general and into college society, and takes plenty of exercise, enjoying more particularly lawn tennis and hockey. She is also a proficient fencer, having taken lessons in the science of arms at an early age. Altogether, a more happily and healthily constituted method of existence could not have been desired. She is a worthy daughter of a worthy parentage.

FAYE, Professor Hervé Auguste Etienne Albans, astronomer, was born at Saint Benoit du Sault (Indre), Oct. 1, 1814, and finished his studies at the École Polytechnique. He afterwards went to Holland, and on returning to France became, on the recommendation of M. Arago, a pupil in the Observatory. He discovered, Nov. 22, 1843, a new comet, to which his name was assigned, and received the Lalande prize from the Academy of Sciences, to which learned association he submitted, in 1846, a paper, entitled "La Parallaxe d'une Étoile Anonyme de la Grande Ourse." This was followed by a work entitled "Sur un Nouveau Collimateur Zénithal et sur une Lunette Zénithale Nouvelle." He was elected a member of the section of Astronomy in place of Baron de Damoiseau, Jan. 18, 1847; a member of the Bureau of Longitudes, March 26, 1862; and was decorated with the Cross of the Legion of Honour in 1843. In 1864 he was appointed a member of the Imperial Council of Public Instruction, and was promoted to the rank of officer of the Legion of Honour. M. Faye was Professor of Geodesy at the École Polytechnique from 1848 to 1854, and in the latter year he was appointed Rector of the University Academy of Nancy. He succeeded M. Delaunay as Professor of Astronomy in the Polytechnic School in 1873. In addition to the works already mentioned, M. Faye is the author of "Sur l'Anneau de Saturne," published in 1848; "Sur les Déclinaisons Absolues," in 1850; "Des Leçons de Cosmographie," in 1852; "Cours d'Astronomie Nautique," 1880; "Cours d'Astronomie de l'École Polytechnique," 1881; and "Sur l'Origine du Monde," 1889. M. Faye was appointed Minister of Public Instruction in Nov. 1877; and promoted to the rank of great officer of the Legion of Honour in 1889.

FAYRER, Sir Joseph, K.C.S.I., LL.D., M.D., F.R.S., F.R.S.E., second son of the late R. J. Fayer, Esq., Commander

R.N., by Agnes, daughter of W. Wilkinson, Esq., of Westmorland, was born at Plymouth, Dec. 6, 1824. He was brought up under private tuition in Scotland, and afterwards continued his studies in London, in Edinburgh, and on the Continent. He took the degree of M.D. in the University of Edinburgh, and became a Fellow of the Royal College of Physicians of London, a Fellow of the Royal College of Surgeons of London and Edinburgh, and a fellow of the Royal Societies of London and Edinburgh; entered the medical service of the Navy and served in the military hospital of Palermo during the siege of that city (1847-48); and he was also present at the siege of Rome (1848). In 1849 he entered the medical service of the army. In 1850 he entered the Bengal Medical Service, from which he retired in 1874. He served throughout the Burmese war of 1852, and the Indian Mutiny of 1857; also at the defence of Lucknow, where he was Political Assistant and Residency Surgeon. For these services he received medals and clasps and the brevet rank of Surgeon. He was Professor of Surgery in the Medical College of Bengal from 1859-74; was Fellow, Member of Senate, and during two years President of the Medical Faculty of the Calcutta University; and was successively Vice-President and President of the Asiatic Society of Bengal. He was created C.S.I. Dec. 22, 1868; and advanced to K.C.S.I. in March, 1876, at an investiture of the Order held at Allahabad by the Prince of Wales, whom during his travels in India he accompanied as physician. In acknowledgment of this service he received a letter from the Queen. He had previously accompanied the Duke of Edinburgh in his visit to India in 1870. He was appointed Surgeon-General and President of the Medical Board of the India Office in Dec., 1874. He is honorary physician to the Queen, the Prince of Wales, and physician to the Duke of Edinburgh. Sir J. Fayer has written "Clinical Surgery in India;" a work on the poisonous snakes of India which he presented to the Indian Government, from whom he received thanks, and by whom it was published in 1872; "Clinical and Pathological Observations in India;" "Lettsomian Lectures on Dysentery;" "Croonian Lectures on Climate and Fevers of India;" and many contributions to European and Indian journals, including papers on "Disease in India;" "European Child Life in Bengal;" "Malarial Splenic Cachexia of Tropical Climates;" "Bronchocele in India;" "Liver Abscess;" "Physiological Action of the Poison of Naja Tripudians"

(in conjunction with Dr. Brunton); "Some of the Physical Conditions of the Country that affect Life in India;" "Health in India;" "Rainfall and Climate of India;" "The Claws of Felidae;" and "Anatomy of the Rattlesnake." He has received the second-class of the Order of the Conception from the King of Portugal, the third class of the Redeemer of Greece from the King of Greece, and the third class of the Medjidieh from the Viceroy of Egypt. In Aug., 1878, the hon. degree of LL.D. was conferred on him by the University of Edinburgh, and in April, 1890, by the University of St. Andrews. He is Vice-President of the Zoological Society of London.

FEARON, Daniel Robert, M.A. Oxon. 1862, Barrister-at-Law, eldest son of the late Rev. Daniel Rose Fearon, successively Vicar of Assington, Suffolk, and St. Mary Church, Devon, by Frances Jane, daughter of the late Rev. Charles Andrewes, Rector of Flempton, Suffolk, was born at Assington, Dec. 1, 1835, and educated at Marlborough College and Balliol College, Oxford, where he took a First Class in Moderations and in the Final Schools. He entered as a Student at Lincoln's Inn, Nov. 10, 1859, and was called to the Bar at Lincoln's Inn, Nov. 17, 1874. He was appointed, in 1860, one of H.M. Inspectors of Schools; and in 1865 an Assistant Commissioner to the Schools Inquiry Commission, and in that capacity reported on Secondary Education in London and the neighbourhood, and on the system of education in the Burgh Schools of Scotland. In 1869 he was appointed a Commissioner to enquire into the condition of elementary education in Manchester and Liverpool, in preparation for Mr. Forster's Elementary Education Act, of 1870. In 1870 he was appointed an Assistant Commissioner to the endowed Schools Commission, of which the late Lord Lyttelton was chairman. In 1873 he was commissioned by the Treasury, together with Mr. W. H. Gladstone, M.P., Sir Robert Hamilton, K.C.B., and Mr. Murray, to enquire into the Administration of the Irish Education Department. In 1875 he was appointed an Assistant Commissioner to the Charity Commission for England and Wales, on the transfer to that Commission of the administration of the Endowed Schools Acts. In 1883 he was appointed Acting Secretary to that Commission; and by Royal Warrant dated June 16, 1886, was appointed to be Secretary to the Commission. Mr. Fearon is the author of a work on "School Inspection;" and married, July 2, 1861, Margaret Arnold, second daughter of

Bonamy Price, Esq., hon. Fellow of Worcester College, and Professor of Political Economy in the University of Oxford.

FEARON, The Rev. William Andrewes, D.D. Head Master of Winchester College, is the third son of the Rev. D. R. Fearon, Vicar of Assington, Suffolk, afterwards of St. Mary Church, Devon. He was born at Assington, Feb. 4, 1841. His mother was Frances Jane, daughter of the Rev. Charles Andrewes, Rector of Flempton, Suffolk, a member of the same family as the celebrated Bishop Andrewes. He was educated at home till he entered Winchester College as a scholar in 1852. During his school career he twice obtained the Queen's Gold Medal, also the Goddard Scholarship for Classics, and the Duncan Mathematical Scholarship. In 1859 he gained a Scholarship at New College, Oxford. He took a double first-class in the Final Schools of Classics and Mathematics. In 1863 he again took a double first-class in the final Schools of Classics and Mathematics. In 1864 he was elected Fellow of New College, and also became Tutor of that College, retaining this post until 1867, when he was asked by Dr. Ridding to open a tutor's house at Winchester College, and to undertake the Junior Sixth Form. He was ordained deacon in 1867, priest in 1868. In 1882 he was elected Head Master of Durham School, and was appointed Examining Chaplain to the Bishop of Newcastle, which offices he held till 1884, when he was elected to the Head Mastership of Winchester College. In the same year he took his D.D. degree, and in 1889 became Honorary Canon of Winchester Cathedral.

FELLOWS, James J., F.R.C.I., F.R.G.S., F.R.S.S. Agent-General for New Brunswick, is the only son of Mr. J. Fellows of Annapolis, Nova Scotia (d. 1864), by the daughter of Mr. James Hall, J.P., of Annapolis, and was born in 1828, and educated at Acadia College, Nova Scotia. He married, 1st, 1851, Elizabeth, eldest daughter of Thomas Allan, J.P., of Portland, New Brunswick; 2nd, 1871, Jane Hamlin, only daughter of James R. Crane, of St. John, New Brunswick, J.P. for the city and county of St. John, New Brunswick, of which province he has been Agent-General in London from 1887.

FENN, George Manville, was born at Pimlico in 1830, and received a slight education at private schools. At twenty-one he entered one of the training colleges of the National Society, and, after the usual time of probation, obtained the mastership of a country school. His next

step was to the post of private tutor; but the responsibilities of married life soon induced him to enter into business, printing offering itself as the most congenial. This led to small literary ventures—the production of a magazine in 1862, and a participation in one of the popular local newspapers in 1864. Then followed the writing and offering of short sketches to the various magazines and periodicals. One of these, after endless disappointments, was sent to the late Charles Dickens for *All The Year Round*, and immediately accepted, others appearing subsequently in the same periodical. A busy pen soon produced sketches which were readily accepted by Mr. James Payn for *Chamber's Journal*, and by Mr. Edward Walford for *Once a Week*. About the same time—1866—Mr. Justin McCarthy, then editing the *Star*, was running a series of short papers through the evening edition, and willingly enlisted the services of the young writer, and about thirty or forty working-life sketches appeared in the *Readings by Starlight*. These papers, and others of a similar class, were published in four volumes in 1867, the same year witnessing the production of Mr. Fenn's first boy's story, "Hollowdell Grange," and a natural history tale for children, "Featherland." From that period, in rapid succession, novel after novel appeared, the principal breaks to this production occurring when Mr. Fenn succeeded Mr. Haweis as editor of *Cassell's Magazine* in 1870, and when he afterwards became the purchaser of *Once a Week*, from Mr. Besant's partner, Mr. James Rice, in 1873. In this venture, however, no better success attended him than had befallen the previous owners. Mr. Fenn's principal three-volume novels are "Bent, Not Broken," and "Webs in the Way," 1867; "Mad," 1868; "The Sapphire Cross," and "By Birth a Lady," 1871; "That Little Frenchman," 1874; "Thereby hangs a Tale," 1876; "A Little World," 1877; "Pretty Polly," 1878; "The Parson o' Dumford," 1879; "The Clerk of Portwick," 1880; "The Vicar's People," 1881; "Eli's Children," 1882; "The New Mistress," 1883; "The Rosery Folk," and "Sweet Mace," 1884; "Stained Pages," 1885; "Double Cunning," and "The Master of the Ceremonies," 1886; "One Maid's Mischief," and "This Man's Wife," 1887; "The Man with a Shadow," 1888; "The Lass that Loved a Soldier," and "Of High Descent," 1889. Mr. Fenn's boy's stories have been mainly written during the past few years:—"Off to the Wilds," 1881; "In the King's Name," "Middy and Ensign," and "Nat the Naturalist," 1883; "The Silver

Cañon," and "The Golden Magnet," 1884; "Bunyip Land," and "Menhardoc," 1885; "Patience Wins," and "Brown-smith's Boy," 1886; "Yussuf the Guide," and "Devon Boys," 1887; "Mother Carey's Chicken," "Dick of the Fens," and "Commodore Junk," 1888; "Quick-silver," "Crown and Sceptre," and "Three Boys," 1889; "Mass' George," "Cutlass and Cudgel," and "The Boy who would not go to Sea," 1890. In addition to hundreds of short tales and sketches, Mr. Fenn is also the author of several Christmas Stories, notably "Ship Ahoy," and, wholly or in part, of several dramas and three-act farces, two of which, "The Barrister," and "The Balloon," were written in collaboration, and produced in 1888 and 1889. Mr. Fenn has been a member of the Savage Club since 1868, and of the Reform Club since 1875.

FERDINAND IV. (Salvator-Marie-Joseph-Jean-Baptiste-François-Louis-Gonzague-Raphael-Renier-Janvier), ex-Grand Duke of Tuscany, eldest son of Leopold II., grandson of Ferdinand III., and of Marie Antoinette Anne, daughter of Francis I., king of the Two Sicilies, the late grand duke's second wife, was born June 10, 1835, succeeded to the grand duchy on the abdication, of his father, July 21, 1859, and reigned as Ferdinand IV.; but his career as a sovereign prince was brief, he having been obliged to quit his dominions on the consolidation of the kingdom of Italy under Victor Emmanuel in 1861. He married the Archduchess Anne Marie, daughter of the King of Saxony, Nov. 24, 1859. The grand duke is an archduke of Austria, Prince-Royal of Hungary and Bohemia, and a Colonel of Austrian Dragoons.

FERDINAND, Prince of Bulgaria, was born in Vienna in 1861, and is the youngest son of Prince Augustus of Saxe-Coburg and the Princess Clémentin of Bourbon-Orleans, a daughter of King Louis Philippe. The Prince served as an officer in the Austrian army, and possesses large estates in Hungary. After the deposition of Prince Alexander in 1886, followed by a Regency, Prince Ferdinand received a deputation from the Sobranje, offering him the vacant throne. He accepted the offer, and, on the 14th of Aug., 1887, took the oath to the Bulgarian constitution at Tirmova. His sovereignty, however, has not been recognized by the Powers, and his tenure is believed to be very precarious, as Russia is firmly opposed to his continuance on the throne. On the other hand, his reception by the Bulgarian nation has been most enthusiastic.

FERGUSON, Richard S., the eldest son of the late Mr. Joseph Ferguson, J.P., and D.L., was born at Carlisle, July 28, 1837, and was educated at Shrewsbury, and St. John's College, Cambridge. He graduated B.A. as 27th wrangler in 1860, M.A. in 1863, and subsequently LL.M. Mr. Ferguson was called to the Bar at Lincoln's Inn in 1862, and practised there as an equity draftsman and conveyancer, until his health failed in 1871. After travelling abroad for two years, he settled at Carlisle. He is a J.P. for Carlisle and Cumberland; has been Chairman of Quarter Sessions for that county since 1886, and Chancellor of the diocese of Carlisle since 1887. He is also an alderman for Carlisle (Mayor 1881-2, 1882-3) and for Cumberland; President, since 1886, of the Cumberland and Westmorland Antiquarian and Archæological Society; a Fellow of the Societies of Antiquaries of London and Scotland, and Vice-president of the Royal Archæological Institute and Surtees Society, and a member of several other learned societies. He is the author of "Cumberland and Westmorland M.P.s, from the Restoration to the Reform Bill," 1871; "Early Cumberland and Westmorland Friends," 1871; "Moss Gathered by a Rolling Stone," 1873. He is the editor of "Old Church Plate in the Diocese of Carlisle," 1882; of "Bishop Nicolson's Miscellany Accounts of the Diocese of Carlisle in 1703," and "Some Municipal Records of Carlisle," 1887; "A History of the Diocese of Carlisle," 1889; and "A Popular History of Cumberland," 1890. He is also editor of the "Transactions of the Cumberland and Westmorland Antiquarian and Archæological Society"; and author of several papers in transactions in various societies, including one "On an Astrolabe of Early English Make," in the *Archæologia*.

FERRERS, Norman Macleod, D.D., F.R.S., Vice-Chancellor of the University of Cambridge, was born at Prinknash Park, Gloucestershire, Aug. 11, 1829, and educated at Eton. He entered as a student at Gonville and Caius College, Cambridge, in 1847, and graduated in the Mathematical Tripos of 1851, when he attained the distinguished position of Senior Wrangler and first Smith's Prizeman. Mr. Ferrers was elected to a Fellowship, and, after filling various college offices, was appointed Tutor in 1865. For 30 years he has been constantly occupied in collegiate and university work. As a lecturer in mathematics he obtained considerable distinction. He examined for the Mathematical Tripos

no fewer than eleven times, and he was especially prominent as an advocate for the various important changes which were effected in the scheme of the Mathematical Tripos examinations. For a considerable period he has been a member of the Council of the Senate, and he is also a member of various syndicates and boards in the University. He was elected Master of Gonville and Caius College, in succession to Dr. Guest, Oct. 27, 1880. He is the author of an "Elementary Treatise on Trilinear Co-ordinates," 1861; and "Elementary Treatise on Spherical Harmonics," 1877. In 1871 he edited and published the mathematical writings of the late George Green. From 1855 he was, with Professor Sylvester, joint editor of the *Quarterly Journal of Mathematics*, and he has been a frequent contributor to its pages. In 1876 he was elected a governor of St. Paul's School, in 1885 of Eton College, and in 1877 a Fellow of the Royal Society. For the years 1884 and 1885 he filled the office of Vice-Chancellor of the University of Cambridge.

FERRIER, Professor David, M.D., LL.D., F.R.S., F.R.C.P., born at Aberdeen in 1843, was educated at the University of Aberdeen, where he graduated in Arts, with First Class Honours, in 1863. In the same year he gained the Fergusson Scholarship in Classics and Philosophy, open to competition by graduates of the four Scotch Universities. He studied Philosophy in Germany, and Medicine in the University of Edinburgh, where he graduated as M.D. in 1870, with First Class Honours, and Gold Medal for his Thesis. He was appointed Professor of Forensic Medicine in King's College, London, in 1872. In 1889 he vacated this chair for that of Neuro-Pathology, specially founded for him by the authorities of King's College. He is Physician to King's College Hospital, and to the National Hospital for the Paralysed and Epileptic. Dr. Ferrier practises as a physician, and is the author of a work on the "Functions of the Brain," besides numerous papers relating to the functions and diseases of the brain and nervous system. He has incurred the special hostility of the extreme anti-vivisectionists by reason of the number, and the extraordinary success, of his experiments on animals. It may be said that Dr. Ferrier's researches have increased our knowledge of brain disease, epilepsy, &c., almost more than those of any other living man.

FERRY, Jules François Camille, a

French statesman, born at Saint Dié (Vosges), April 5, 1832, studied law at Paris, where he was admitted to the Bar in 1854. He joined the group of young lawyers who aided the Deputies in maintaining constant opposition to the Empire, and he was one of those condemned in the famous trial of the "thirteen" (1864). He also became connected with journalism, and he published, in 1863, a pamphlet entitled "*La Lutte Electorale*," in which he exposed the method so persistently practised under the Empire, of electing official candidates. He joined the staff of the *Temps* in 1865, and won new renown for himself by contributing to that journal a series of articles on current politics, as well as by the terrible analysis which he bestowed upon the accounts of Baron Haussmann, Prefect of the Seine, who was then occupied in rebuilding Paris, and who consequently handled very large sums of money. These latter articles were republished in book form, under the title of "*Comptes Fantastiques d'Haussmann*." He had previously made, in 1863, an unsuccessful attempt to secure his election to the Corps Législatif; but in 1869 he was better known, and he was elected, on a second scrutiny, by 15,729 votes, from the sixth conscription of the Seine, and he took his seat among the members of the Left. He was a member of several important commissions, including that which was appointed to consider the extraordinary budget of the city of Paris. He was one of the deputies of the Left who demanded the dissolution of the Corps Législatif, on the ground that it no longer represented the majority in the country. Foreseeing that the war with Prussia would be disastrous, he, with his colleagues of the Left, voted against the fatal declaration. At the Revolution of Sept. 4, 1870, he and the other Paris Deputies were proclaimed members of the Government of the National Defence, located at the Hôtel de Ville. On the 5th he was appointed Secretary to the Government, and on the 6th he was charged with the administration of the Department of the Seine. When the Communal insurrection of Oct. 31, 1870, occurred, he risked his life to suppress it. Subsequently he was delegated to the central mayoralty of Paris, after the resignation of M. Arago (Nov. 15, 1870). In this capacity he presided over the assembly of mayors, which, on Jan. 18, 1871, decided on the distribution of rations of bread, and two days later he issued a decree authorizing a search to be made for articles of food in the houses of absent

persons. On Jan. 22 he was a second time called upon to resist a body of insurgents, who, enraged at the defeat of the French armies in the sortie on Montretout and Buzenval, attacked the Hôtel de Ville, with the intention of overthrowing the Government of the National Defence. This was the closing episode of the siege, for Paris capitulated four days later. At the election of Feb. 8, 1871, he was elected one of the representatives of the department of the Vosges, and thereupon he resigned his functions as a member of the Government of the Defence and administrator of the department of the Seine, although he retained the latter office provisionally until the 18th of March. After the second siege and the entry of the troops into Paris, M. Thiers nominated him Prefect of the Seine (May 24); but the appointment gave rise to so much hostile criticism, that M. Ferry resigned after ten days, and was succeeded by M. Léon Say. Subsequently it was understood that M. Ferry would be sent as ambassador to Washington, but the proposed appointment was so unpopular that it was never officially announced. He was, however, sent as Minister to Athens (May, 1872). After holding that appointment for a year he resigned it, and resumed his place in the ranks of the Republican Left, of which he became President. He was elected a member of the Council-General of the Vosges in 1878, and for some time he was vice-president of that body. He was re-elected for the arrondissement of Saint Dié at the general elections of Feb., 1876, and Oct., 1877. He was chosen one of the vice-presidents of the Budget Committee in May, 1878. After the resignation of Marshal MacMahon (Jan. 30, 1879), M. Ferry was appointed by the new President of the Republic, M. Grévy, to a seat in his Cabinet as Minister of Public Instruction and Fine Arts. Differences arose when M. Ferry brought forward his Education Bill, the seventh clause of which prohibited members of "unauthorised religious communities" (meaning especially the Jesuits) from teaching or managing schools. The measure was carried by a large majority of the Chamber of Deputies, but in the Senate a strong party, including many moderate Republicans, and led by M. Jules Simon, resisted the seventh clause. Owing to this determined opposition the Bill was postponed. In the following year (1880) M. de Freycinet, who had become Prime Minister, authorised the insertion in M. Ferry's Government Education Bill of the clause

levelled at the unauthorized religious Orders. As before, the Chamber of Deputies passed the Bill by a large majority, but the Senate, led by M. Jules Simon, threw out the clause in question by a majority of 19 (March 6). The Ministry proceeded, however, to effect its purpose by decrees founded on laws that had fallen into disuse, and the proscription of the Order was proclaimed. The expulsion of the Jesuits was carried out, but three Cabinet Ministers resigned because the decrees were not being enforced against the other unauthorized congregations. These secessions upset the Ministry (Sept. 19, 1880). After some delay, M. Ferry formed a Cabinet, consisting of M. de Freycinet's more advanced colleagues, with M. Barthélemy St. Hilaire at the Foreign Office, and the decrees against the Orders were then carried out with much harshness. On Nov. 10, 1881, M. Ferry's Ministry resigned on account of the attacks made upon their policy in regard to the Expedition to Tunis. In Feb., 1883, however, after the fall of the Fallières administration, M. Ferry was sent for by the President of the Republic to form a new Ministry. This he did, he himself becoming Premier and Minister of Public Instruction. As such, leaving the religious question to settle itself, M. Ferry started upon a policy of "colonial expansion," and undertook the invasion of Tonquin. The vast cost and the unsatisfactory issue of this invasion were in due time fatal to him; he was charged with having fallen into a trap laid by Bismarck, and with weakening France. He was suddenly overthrown by a vote of the Chamber (1884). Violent attacks were made on him in Nov., 1887, when he was a candidate for the Presidency of the Republic; and, in the following month, he narrowly escaped assassination by a madman named Aubertin. At the general election, Sept., 1889, he was rejected by his old constituents; but, in Dec., 1890, he was returned by an overwhelming majority, and was made a Senator.

FESTING, The Rt. Rev. John Wogan, M.A., Bishop of St. Albans, is the elder son of the late Richard Grindall Festing, and brother of Major-General Festing, late of the Royal Engineers, and was educated at Wells Theological College and Trinity College, Cambridge, where he took his B.A. degree in 1860, and M.A. in 1863. In 1860 he was ordained deacon, and in 1861 priest. He was curate of Christ Church, Westminster, from 1860 to 1873; was appointed vicar of St. Luke's, Berwick Street, in 1873, and

vicar of Christ Church, Albany Street, 1878. The Bishop is Treasurer of the Universities' Mission to Central Africa. He was made rural dean of St. Pancras in 1887, Prebendary of St. Paul's in the following year, and Bishop of St. Albans in 1890.

FESTING, Edward Robert, F.R.S., Maj.-Gen. Royal Engineers, son of Richard Grindall Festing and Eliza Mammatt, was born at Frome, Aug. 10, 1839, and was educated at King's School, Bruton, at Carshalton, and Woolwich. He received his commission in the Royal Engineers April 20, 1855; went to India in 1857, and was twice mentioned in despatches. He was appointed Assistant-Director of the South Kensington Museum, July, 1864, and made Fellow of the Royal Society in 1887.

FEUILLET, Octave, a French novelist and dramatist, born at Saint-Lô (Manche), Aug. 11, 1822, was sent to the College of Louis-le-Grand, at Paris, where he greatly distinguished himself. Under the name of Désiré Hazard, he began to write in 1844, contributing, in conjunction with Paul Bocage and Albert Aubert, to a romance called the "Grand Vieillard," which appeared in the *National*. Since that time he has been a constant contributor to newspapers and reviews, and, for the various theatres, has written comedies, dramas, and farces, nearly all of which have been received with favour by the public. He was elected in 1862 to fill the chair in the French Academy left vacant by the death of M. Eugène Scribe, and in the following year was made an officer of the Legion of Honour. Afterwards he was appointed Librarian of the Imperial Residences, which position he held until the revolution of Sept. 4, 1870. His most remarkable dramatic productions are—"La Nuit Terrible," "Le Bourgeois de Rome," "La Crise," "Le Pour et le Contre," "Péril en la Demeure," "La Fée," "Le Village," "Dalila," "La Tentation," "La Rédemption," "Montjoye," "La Belle au Bois dormant," "Le Cas de Conscience," and "Julie," "La Clé d'Or," a comic opera, and "L'Acrobate," "Chamillac" (comedy), "Le Sphinx" (drama). Among his novels are "Polichinelle," 1846; "Onesta," 1848; "Rédemption," 1849; "Bellah," 1850; "Le Cheveu Blanc," 1853; "La Petite Comtesse," 1856; "Le Roman d'un Jeune Homme pauvre," 1858, which has been translated into many languages; "Histoire de Sibylle," 1862, scarcely less popular than the preceding; "Monsieur

de Camors," 1867; "Julia de Trécœur," 1872 (the two masterpieces of the author); "Un Mariage dans le Monde," 1875; "Le Journal d'une Femme," 1878; "L'Histoire d'une Parisienne," "La Veuve," and "La Morte" (1886), the last-named has made an astonishing success; "Le Divorce de Juliette," 1889; "Honneur d'Artiste," 1890. M. Feuillet has also written, jointly with Paul Bocage, a number of other dramas, and he has published several poems.

FIELD, Cyrus West, was born at Stockbridge, Massachusetts, Nov. 30, 1819. After an education in his native town, he entered a counting-house in New York, and became in a few years the proprietor of a large mercantile establishment. Retiring from business in 1853, he travelled for a while in South America, and on his return in 1854 he began to turn his attention to the subject of Ocean telegraphs, and was instrumental in procuring a charter from the legislature of Newfoundland to establish a telegraph from the continent of America to that colony, and thence to Europe. For the next thirteen years he devoted himself exclusively to the execution of this undertaking. He was actively engaged in the construction of the land line of telegraph in Newfoundland, and in the two attempts to lay the sub-marine cable between Cape Ray and Cape Breton. He accompanied the expeditions of 1857 and 1858 fitted out to lay the cable under the Atlantic, between Ireland and Newfoundland. He took a prominent part in the expeditions of 1865 and 1866; the complete success in the last-mentioned year being, in a great measure, due to his exertions, in the course of which he crossed the Atlantic more than fifty times. He received the unanimous thanks of Congress, with a gold medal, in commemoration of the successful enterprise, and at the Paris Exhibition he received the grand medal. Since 1877 he has been prominently connected with the elevated railways in New York City, and has been President of one of the companies.

FIELD, Henry Martyn, D.D., brother of Cyrus West Field, was born at Stockbridge, Massachusetts, April 3, 1822. He graduated at Williams College in 1838, studied theology, and in 1842 became pastor of a Presbyterian church in St. Louis, Missouri. In 1847 he resigned his charge, and visited Europe, where he remained over a year. Returning to America he published "The Good and the Bad in the Roman Catholic Church" in 1848; and "The Irish Confederates, a

History of the Rebellion of 1798" in 1851. The same year he became pastor of a church at West Springfield, Mass. In 1854 he removed to New York, and became one of the proprietors and editors of *The Evangelist*, a religious weekly newspaper of which he has now been for twenty years the sole proprietor. In 1858 he made another European tour, which he has described in "Summer Pictures from Copenhagen to Venice." In 1866 he published the "History of the Atlantic Telegraph." In 1867 he again came to Europe, to visit the Paris Exhibition, and as Delegate to the Free Church of Scotland and the Presbyterian Church of Ireland. In 1875-76 he made a tour round the world, which he described in two volumes, "From the Lakes of Killarney to the Golden Horn," and "From Egypt to Japan" which have passed through seventeen editions. In 1881-82 he made a second visit to the East, the result of which was three volumes in the three years following, viz., "On the Desert, a visit to Mount Sinai;" "Among the Holy Hills;" and "The Greek Islands and Turkey after the War." A still more recent visit to Southern Europe has been followed by "Old Spain and New Spain" and "Gibraltar." His latest book is on the Southern States of America, discussing the race problem, describing some of the battles of the late civil war, and giving word-portraits of the Confederate leaders, Lee and Jackson.

FIELD, The Rev. John, M.A., was born at Wallingford, Berkshire, in 1812, and educated at Magdalen Hall, Oxford, where he graduated B.A. in 1834, and M.A. in 1837. He was appointed to the Curacy of St. Clement's, Worcester, in 1835; to the Curacy of Chipping Norton, in 1839; to the Chaplaincy of the Berkshire Gaol in 1840; and to the Rectory of West Rounton, Yorkshire, in 1857. Mr. Field is a Justice of the Peace for the North Riding (1859), and Chairman of the Visiting Justices of the North Riding prisons. He was one of the earliest and most earnest advocates for establishing Reformatory schools, and the separate system of imprisonment. To promote these objects he gave much evidence before committees of both Houses of Parliament, and his published works have been numerous. He is the author of "Prison Discipline," 2 vols., 1848; "The Life of John Howard," 1850; "University and other Sermons," 1853; "Convict Discipline," 1855; "Correspondence of John Howard," 1856; "Remarks on the Lord's Prayer," 1857; several pamphlets and sermons; some publica-

tions issued by the Society for Promoting Christian Knowledge; and papers in the Transactions of the Social Science Association.

FIELD, Hon. Stephen Johnson, LL.D., brother of Cyrus West Field and of Dr. Henry Martyn Field, was born at Haddam, Connecticut, Nov. 4, 1816, and graduated at Williams College, 1837. He studied law, with his brother, David Dudley Field, at New York, and on his admission to the Bar entered into a partnership with him which lasted until 1848 when Stephen went to Europe. In 1849 he settled in California, where he resumed the practice of his profession. After holding various legislative positions, he was, in 1837, chosen a Judge of the Supreme Court of the State, of which, in 1859, he became Chief Justice. In 1863 he was appointed by President Lincoln a Justice of the Supreme Court of the United States, a position which he still holds. In 1873 he was nominated by the Governor of California one of a commission to examine the code of laws of the State, and to prepare amendments to it for the action of the legislature, and in 1877 he was chosen a member of the Electoral Commission to decide the disputed presidential contest between Mr. Hayes and Mr. Tilden. He received the degree of LL.D. from Williams College in 1864, and in 1869 was appointed Professor of Law in the University of California. In 1889 an attempt was made to assassinate him while on circuit duty in California by a disappointed litigant, Judge Terry (his predecessor in the chief Justiceship of California), but his life was saved by the prompt interposition of a accompanying court officer.

FIELD, The Hon. Sir William Ventris, See VENTRIS, THE RIGHT HON. LORD.

FIFE, Duke of, Alexander William George Duff, Marquis of Macduff, K.T., P.C., was born on Nov. 10, 1849, created Earl of Fife in 1885, and Duke of Fife in 1889, on his marriage with H.R.H. the Princess Louise Victoria Alexandra Dagmar, the eldest daughter of H.R.H. the Prince of Wales. The Duke was educated at Eton; is Lord Lieutenant of Elginshire; a Deputy Lieutenant of the counties of Aberdeen and Banff; Hon. Colonel of the Banffshire Artillery Volunteers; a member of the Council of the Duchy of Lancaster; and a partner in the metropolitan banking firm of Sir Samuel Scott and Co. The Duke sat as M.P. for Elgin and Nairn, in the liberal interest, in 1874-79; was

Captain and Gold Stick of the Corps of Gentlemen at Arms 1880-85; went on a special mission to the King of Saxony in 1882; and received the first Order of Saxony.

FIFE, Her Royal Highness the Duchess of (Princess Louise Victoria Alexandra Dagmar), eldest daughter of Their Royal Highnesses the Prince and Princess of Wales, was born at Marlborough House on Feb. 20, 1867, and married at Buckingham Palace on July 27, 1889, to Alexander William George Duff, First Duke of Fife. The Duchess of Fife has accepted the office of President of the Edinburgh School of Medicine for Women, which is the first school where a medical education has been afforded to women in Scotland.

FINLAY, Robert Bannatyne, Q.C., M.P., son of Dr. William Finlay, of Edinburgh, was born in 1842, and educated at the Edinburgh Academy and at Edinburgh University, where he studied medicine and took his doctor's degree in 1863. Two years later he gave up medical practice and began to study for the English Bar. He was called, in 1867, at the Middle Temple. He joined the South-Eastern Circuit, and was made a Queen's Counsel in 1882. In the following year Mr. Finlay contested Haddingtonshire against Lord Elcho at a by-election, but was unsuccessful. At the General Election of 1885 he succeeded in gaining a seat for Inverness Burghs, and in 1886 he was again returned for the same constituency as a Unionist Liberal, defeating Sir Robert Peel (Gladstonian) by 273 votes. Up to the election of 1885 and the rise of the Home Rule question, Mr. Finlay had made no great mark in the House, but during the debates on Mr. Gladstone's Government of Ireland Bill he rose into a very important position. Since that time Mr. Finlay has been before the public in several capacities, especially as Counsel for Lord Colin Campbell in the celebrated lawsuit brought by him for the dissolution of his marriage.

FISCHER, Professor Kuno, was born July 23, 1824, at Sandewald in Silesia, and educated at the Universities of Leipzig and Halle, where he devoted himself to the study of philosophy, theology, and philology. In 1850 he began to lecture at Heidelberg, and in 1856 was appointed Professor of Philosophy at the University of Jena, where he remained until called to fill a similar Chair at Heidelberg in 1872. His chief works are:—"Diotima, the Idea of the Beautiful," 1849; "History of

Modern Philosophy," 1852-72; "Logic and Metaphysics," 1865; "Life of Kant and the Principles of his Teaching;" "Life and Character of Spinoza;" "The Confessions of Schiller;" "Lord Bacon;" "Goethe's Faust;" and "Lessing as the Reformer of German Literature" (1881).

FISH, Hamilton, LL.D., was born in New York, Aug. 3, 1808. He was educated at Columbia College, where he graduated in 1827; studied law, and was admitted to the New York Bar in 1830. He was elected to Congress in 1842, and served until 1845. He was Lieutenant-Governor of New York from 1847 to 1849, and Governor 1849-51. In 1851 he was elected United States Senator. On the expiration of his term, in 1857, he spent several years in Europe, studying carefully the institutions and governments of the different nations. In 1869, on the resignation of Mr. E. B. Washburne, who was appointed Ambassador to France, President Grant called Mr. Fish to the position of Secretary of State, which he retained during the two terms of President Grant, ending March 4, 1877. To Mr. Fish belongs the credit of suggesting the Joint High Commission with Great Britain, which met in 1871, for the purpose of settling the various difficulties between the two nations.

FITCH, J. G., LL.D. her Majesty's Inspector of Training Colleges, born in 1824; was educated at University College, London, and is M.A. of the University of London. He was from 1852 to 1856 Vice-Principal, and from 1856 to 1863 Principal, of the Normal College of the British and Foreign School Society. In 1863, on the recommendation of Earl Granville, then Lord President of the Council, he was appointed one of her Majesty's Inspectors of Schools, with charge of the Yorkshire district. In 1877 he was appointed one of the Chief Inspectors of Schools, with the oversight of the eastern counties. He was Examiner in the English Language, Literature, and History in the University of London from 1860 to 1865, and subsequently for a second period of five years, from 1869 to 1874. Soon after the conclusion of his term of office, he was appointed a Fellow of the University by the Crown, on the nomination of Convocation, and has since continued a member of the Senate. He has acted during many years as one of the special Examiners employed by the Civil Service Commission, for the Indian and other higher branches of the Civil Service, and is also one of the Examiners for the

Society of Arts. He has written numerous articles on literary and educational topics in reviews and periodicals, is joint author of a work on "The Science of Arithmetic," and is the writer of the article *Education* in Chambers' Cyclopædia. The University of St. Andrew's in 1885 conferred on him the honorary degree of LL.D., and he has since received from the French Government the Cross of a Chevalier of the Legion of Honour in recognition of services he has rendered to the Professors of French Normal Colleges who have visited England to study educational Institutions and methods. In 1888 he visited America and wrote for the English Education Department "Notes on American Schools and Colleges," which were published in the Blue book for the following year, and have since been reprinted with additions, in England and in the United States. He is a member of the Governing bodies of St. Paul's School, Girtton College, Cambridge, and Cheltenham Ladies' College.

FITZGERALD, George Fras., was born on Aug. 3, 1851, in Lower Mount Street, Dublin. His father was William Fitzgerald, sometime Bishop of Cork, and afterwards Bishop of Killaloe. Mr. G. F. Fitzgerald was educated at home by private tutor, Charles J. Hooper, and at Trinity College, Dublin, where he took the degrees of B.A., in 1871; and M.A., in 1874. He was elected a Fellow of Trinity College in 1877; Erasmus Smith Professor of Natural and Experimental Philosophy in the University of Dublin, Hon. Secretary of the Royal Dublin Society 1881 till 1889; Fellow of the Royal Society, 1883; President of Section A British Association Bath, 1888; and Examiner for London University in Experimental Science, 1888. The following is a list of his principal works:—"On the Rotation of the Plane of Polarisation of Light by Reflection from the Pole of a Magnet," Proc. R. S. No. 176, 1876; "On the Electromagnetic Theory of the Reflection and Refraction of Light," Trans. R. S. Part II. 1880; "On the possibility of originating Wave Disturbances in the Ether by means of Electric Forces," Trans. R. D. S. Vol. I.; "On Electromagnetic Effects due to the motion of the Earth," Trans. R. D. S. Vol. I. "On the superficial tension of fluids and its possible relation to Muscular Contractions," Trans. R. D. S. Vol. I.; "On the Mechanical Theory of Crookes' Force," Trans. R. D. S. Vol. I.; "On the Energy transferred to the Ether by a variable Current," Trans. R. D. S. Vol. III.; "On an analogy between

Electric and Thermal Phenomena," Proc. R. D. S. 1884; "On a Model illustrating some Properties of the Ether," Proc. R. D. S. 1885; "On the Structure of Mechanical Models illustrating some of the Properties of the Ether," Phys. Soc. Proc. and Phil. Mag. 1885; "Note on the specific heat of the Ether," Proc. R. D. S. 1885; "On the Limits to the Velocity of Motion of the working parts of Engines," Proc. R. D. S. 1886; and "On the Thermodynamic Properties of a Substance whose Intrinsic Equation is a Linear Function of the Pressure and Temperature," Proc. R. S. 1887.

FITZGERALD, Sir Gerald, K.C.M.G., youngest son of the late Francis FitzGerald, of Galway, was born 1st Jan., 1833, at Galway, and educated at St. Mary's College, Galway, and in France. He was appointed Junior Clerk, War Office, 1856; was Estimate Clerk, 1861-63; selected in 1863 to proceed to India as assistant to the Commission for the Reorganisation of Indian Accounts; Deputy-Comptroller-General of Military Accounts, 1864-66; Accountant-General of Madras, 1871; of British Burmah, 1872; and was Deputy-Comptroller-General of India, 1872-4. He was allowed to accept temporary service under the Egyptian Government in 1876; and was Director-General of Accounts in Egypt, 1879-85; and was appointed Accountant-General of the Navy, 1st June, 1885. Sir G. FitzGerald was created C.M.G., 1880; K.C.M.G., 1885; and has received First-Class of the Medjidieh; Third-Class of the Osmanieh; and Egyptian War Medal and Bronze Star. He married the eldest daughter of the late Lord Houghton.

FITZGERALD, Percy Hethrington, M.A., F.S.A., son of the late Thomas FitzGerald, M.P., born in 1834, at Fane Valley, co. Louth, Ireland; was educated at Stoneyhurst College, Lancashire, and at Trinity College, Dublin, after which he was called to the Irish Bar, and appointed a Crown Prosecutor on the North-Eastern Circuit. He is the author of many works of fiction, most of which originally appeared in *All the Year Round* and *Once a Week*:—"Never Forgotten," "Bella Donna," "Second Mrs. Tillotson," "Dear Girl," "Diana Gay," Novels of "Young Cœlebs," "The Lady of Brantome," "The Night Mail," and many others. Also the following biographies, &c.:—"Croker's Boswell," "The Life of Wilkes," "Lives of the Sheridans," "Lives of Dukes and Princesses," "Life of Mrs. Clive," "King Theodore of Corsica," "Life of William IV." 2 vols.; "Life of George

IV." 2 vols.; "The Life of Sterne," 2 vols.; "Life of Garrick," 2 vols.; "Charles Townshend," "A Famous Forgery," being the life of Dr. Dodd; "Charles Lamb"; "Principles of Comedy"; "The Romance of the English Stage"; an edition of "Boswell's Life of Johnson," in 3 vols.; an edition of Charles Lamb's Works, in 6 vols. "Recreations of a Literary Man," 2 vols.; "The World behind the Scenes," 1 vol.; "A New History of the English Stage," 2 vols., 1882; and "Kings and Queens of an Hour: Records of Love, Romance, Oddity, and Adventure," 2 vols., 1883; and other works, together with several light pieces performed at the London theatres. He was also the joint author, with Mr. W. G. Wills, of "Vanderdecken," produced by Mr. Irving at the Lyceum.

FITZGIBBON, The Right Hon. Gerald, A.B. Ex-Sch. Trinity College, Dublin, is the elder son of the late Gerald FitzGibbon, Master in Chancery; and was born 28 Aug., 1837; called to the Bar, Ireland, 1860; England (Lincoln's Inn), 1861. Appointed Q.C., 1872, Law Adviser, Dublin Castle, 1876, Solicitor-General, 1877; Lord Justice of Appeal, Ireland, 1878; Privy Councillor, Ireland, 1879; Commissioner of National Education, 1884; Judicial Commissioner Educational Endowments, 1885. He married in 1864, Margaret Ann, second daughter of the Hon. Baron FitzGerald.

FITZMAURICE, Lord Edmund George Petty, second son of the fourth Marquis of Lansdowne, by his second wife, Emily, eldest daughter of the Comte de Flahault, was born in London in 1846, and educated at Eton and at Trinity College, Cambridge, where he gained a scholarship and a prize for an English Essay, and graduated, as a first-class in classics, in 1868. In December of the last-named year he entered the House of Commons as member for Calne, which he continued to represent in the Liberal interest until 1885. He was Private Secretary to the Right Hon. R. Lowe at the Home Office in 1872-3; appointed 1881, H. M. Commissioner for reorganizing the European Provinces of Turkey under Art. XXIII. of the Treaty of Berlin; and second Plenipotentiary at the London Conference on the Navigation of the Danube in 1883; and was appointed Under-Secretary for Foreign Affairs in Dec. 1882, in succession to Sir Charles Dilke, who had been advanced to the Presidency of the Local Government Board. At the General Election of 1885, Lord Edmund was

prevented by ill-health from offering himself as a candidate. In 1886 he was appointed one of the Boundary Commissioners under the Local Government Act 1887; is Vice-Chairman of the Court of Quarter Sessions and the County Council of Wiltshire; and is a Trustee of the National Portrait Gallery, and one of the Commissioners on Historical MSS. He is the author of a "Life of Lord Shelburne," the Prime Minister, and has been a frequent contributor to periodical literature and the press, on questions of foreign policy and local government.

FITZ-PATRICK, William John, F.S.A., son of John Fitz-Patrick, Esq., of Dublin and Griffinrath, co. Kildare, was born Aug. 31, 1830, and was educated first at a Protestant school, and afterwards at the Roman Catholic College of Clongowes Wood. He is a Magistrate and Grand Juror for the counties of Longford and Dublin, is the author of "The Life, Times, and Correspondence of Bishop Doyle," 2 vols., lately reprinted with much additional correspondence; "The Life, Times, and Contemporaries of Lord Cloncurry" (long out of print); "The Friends, Foes, and Adventures of Lady Morgan"; "Lady Morgan, her Career, Literary and Personal"; "Anecdotal Memoirs of Archbishop Whately" (2 vols.); "Lord Edward Fitzgerald and his Betrayers, or Notes on the Cornwallis Papers"; "The Sham Squire and the Informers of 1798" (of which 16,000 copies are known to have been sold and is now out of print), "Ireland before the Union, with the unpublished Diary of Lord Chief Justice Clonmel, 1774-1798" (6 editions); "Irish Wits and Worthies, with Dr. Lanigan, his Life and Times" (out of print); "Charles Lever—a Biography," "The Life of Father Tom Burke," 1884; "The Correspondence of Daniel O'Connell, with Notices of his Life and Times," 1888. This book has been made the subject of several public Speeches by Mr. Gladstone; and of a remarkable paper from his pen in the *Nineteenth Century* wherein cordial praise is bestowed alike on author and Tribune. Mr. Fitz-Patrick has also produced several pamphlets, historical and critical. He is a member of the Royal Irish Academy, an Honorary Member of the Royal Hibernian Academy of Arts, and one of the executive of the Royal Dublin Society. In 1876 he was elected by the Royal Hibernian Academy of Arts, its Professor of History, an office formerly held by Petrie. In 1883, Mr. Fitz-Patrick was appointed by the Viceroy for the second time High Sheriff of the county of Longford. Leo XIII. when

Papal Nuncio, had known Daniel O'Connell; and to mark the satisfaction with which he read Mr. Fitz-Patrick's book, he conferred upon him in 1889 the "Knight Grand Cross of St. Gregory the Great."

FLAMMARION, Camille, a French astronomer, born at Montigny-le-Roi (Haute Marne), Feb. 25th, 1842, received his education in the ecclesiastical seminary of Langres and in Paris, was a student in the Imperial Observatory from 1858 till 1862, when he became editor of the *Cosmos*, and was appointed scientific editor of the *Siècle* in 1865. At that period he obtained, by a series of lectures on astronomy, a certain reputation, which was subsequently increased by his giving in his adhesion to "spiritualism." In 1868 he made several balloon ascents, in order to study the condition of the atmosphere at great altitudes. M. Flammarion is the author of "*La Pluralité des Mondes Habités*," 1862, 15th edit. 1869; "*Les Mondes Imaginaires et les Mondes Réels*," 1864; "*Les Merveilles Célestes*," 1865; "*Dieu dans la Nature*," 1866; "*Histoire du Ciel*," 1867; "*Contemplations Scientifiques*," 1868; "*Voyages Aériens*," 1868; "*L'Atmosphère*," 1872; "*Histoire d'un Planète*," 1873; and "*Les Terres du Ciel*," 1876. In June, 1880, the French Academy awarded the Monthyon prize to M. Flammarion, for his work "*L'Astronomie Populaire*."

FLEMING, Sandford, C.E., LL.D., C.M.G., Canadian engineer, was born at Kirkcaldy, Fifeshire, Scotland, Jan. 7, 1827. He removed to Canada in 1845, and in 1852 was employed on the engineering staff of the Northern Railway, and was afterwards one of the chief promoters of the railway from the Atlantic to the Pacific. The first link in this chain was formed by the Inter-Colonial Railway, undertaken by Mr. Fleming at the request of the Governments of Canada, Nova Scotia, and New Brunswick, in conjunction with the Imperial authorities. The 1st of July, 1876, saw the completion of this great work, an historical account of which Mr. Fleming published in the same year. While the "Inter-Colonial" was being constructed Mr. Fleming was ordered to survey and locate the line for the Pacific Railway, a task which he partly accomplished in 1872. For the next seven years he actively prosecuted that enterprise, and for his services was rewarded (1877) by being made a Companion of the Order of St. Michael and George. In 1880, owing to some difficulty with the government of the day, he resigned his

office. The same year he was elected Chancellor of Queen's University, Kingston, Ontario, a position to which he has thrice been re-elected since, and which he still holds. In 1881 he represented the Canadian Institute at the International Geographical Congress at Venice, and in 1884 the Dominion at the International Prime Meridian Conference at Washington. The degree of LL.D. was conferred upon him by St. Andrew's University in 1884, and by Columbia College and the University of N. Y. in 1887. In addition to engineering reports and contributions to periodicals and to the transactions of learned societies he has published "England and Canada," 1884.

FLETCHER, Lazarus, F.R.S., &c., born March 3, 1854, in Salford, Lancashire, is the son of Stewart and Elizabeth Fletcher. He was educated at the Manchester Grammar School and Balliol College, Oxford, Master of Arts (Oxon.). In 1871 he was elected Natural Science Scholar, Balliol College, Oxford; First Class in Mathematical Moderations, 1873; "Highly Distinguished" for the University Junior Mathematical Scholarship, 1874; First Class in Mathematical Finals, 1875; elected to the Senior University Mathematical Scholarship, and First Class in Natural Science Finals, 1876; and in the same year was appointed Junior Demonstrator, Clarendon Laboratory, Oxford, and Millard Lecturer, Trinity College, Oxford. In 1877, he was elected Fellow of University College, Oxford; and was First Class Assistant, Mineral Department, British Museum, 1878; appointed Keeper of Minerals, British Museum, and Public Examiner at Oxford, 1880; and in 1883, Public Examiner at Cambridge. In 1888 he was elected to the Fellowship of the Royal Society. He is likewise Fellow of the Geological Society; Fellow of the Chemical Society; Past President of the Mineralogical Society, and Member of the Physical Society, and is the author of various papers relative to crystals and meteorites.

FLOQUET, Charles Thomas, a French politician, born at Saint Jean-de-Luz, Oct. 5, 1828, studied at the Collège St. Louis. Called to the Bar in 1851, he was engaged in a great number of political cases. When Prince Pierre Bonaparte was tried at Tours for the murder of Victor Noir, M. Floquet pleaded successfully for damages on behalf of the family of the victim; and he was also successful in obtaining the acquittal of M. Courmet, who was tried at Blois in 1870 for participation in a plot against the Government. In Feb. 1871,

M. Floquet was elected representative of the Seine in the National Assembly, but soon resigned his seat, the reactionary press accusing him of having relations with the Commune, and of being its agent in the provinces during the second siege, a charge which was formally contradicted by him in the *Gaulois*. The Government, however, arrested him at Biarritz, and he was confined at Pau until the end of June, 1871. In April of the following year he was elected to the Municipal Council, and again in 1874. In the senatorial elections of Jan., 1876, he was an unsuccessful candidate, but obtained a seat in the second chamber in Feb. After the Act of the 16th of May, 1877, he was one of the 363 deputies who refused a vote of confidence in the ministry of M. de Broglie; and re-elected in the Oct. following, M. Floquet, who possesses great talent as an orator, took an important part in the debates of the new session. At a public meeting held in Havre in 1880, M. Floquet made an energetic speech in favour of the separation of Church and State, as also for the suppression of the Senate. In 1881 he was elected Vice-President of the Chamber. On his nomination as Prefect of the Seine in 1872, he was obliged to resign his seat, but shortly re-entered the Chamber as member for Perpignan, having, on account of grave differences between him and the Government, sent in his resignation as Prefect. He was the principal author of the proposition for expulsion of all the members belonging to the royal families which had reigned in France, and for depriving them of all political rights. In Jan., 1883, urgency for this proposition was carried in the Chamber by a large majority, but the matter went no farther at the time. On the fall of M. Ferry from power, and the accession of M. Brisson, M. Floquet was chosen to succeed the latter as President of the Chamber, a post which he still holds. At one time he was one of the editors of the *Temps* and the *Siccle*. He being supposed to have cried to the Emperor of Russia, Alexander II., when a guest of the Emperor Napoleon III., "Vive la Pologne, Monsieur!" was in the "black books" of Russia till 1888, when a formal reconciliation took place. In July of that year he fought a duel with General Boulanger, severely wounding him in the throat with his sword, greatly to the General's disgust; who, being an officer, ought to have been a more expert swordsman than a civilian could be expected to be.

FLOWER, Cyril, M.P., son of the late Mr. P. W. Flower, of Streatham, was

born in 1843, and educated at Harrow and at Trinity College, Cambridge. He was called to the Bar at the Inner Temple in 1870. In the Parliament of 1880-5 he sat as a Liberal for Brecknock, and in 1885 and '86 was returned for the Luton division of Bedfordshire. In Mr. Gladstone's short Government of 1886, Mr. Cyril Flower was one of the Junior Lords of the Treasury, or "whips" of the Party. He married the daughter of the late Sir Anthony Rothschild, and both he and his wife are much interested in the welfare of the lower classes in London, and are active supporters of the People's Entertainment Society.

FLOWER, Professor William Henry, C.B., LL.D., D.C.L., F.R.S., F.L.S., second son of E. F. Flower, Esq., of Stratford-on-Avon, born at that place Nov. 30, 1831, was educated for the medical profession at University College, London, and the Middlesex Hospital. He entered the army as assistant-surgeon in April, 1854, served in the Crimean war, and settling afterwards in London was appointed Assistant-Surgeon and Demonstrator of Anatomy at the Middlesex Hospital. In 1861 he was elected Conservator of the Museum of the Royal College of Surgeons, and in 1869 Hunterian Professor of Comparative Anatomy and Physiology, which offices he resigned in 1884 on being appointed Director of the Natural History Departments of the British Museum, now removed to the new building erected for them in the Cromwell Road, South Kensington. He was President of the section of Biology at the meeting of the British Association in Dublin, in Aug., 1878, and President of the section of Anatomy at the International Medical Congress, held in London in 1881. In 1879 he succeeded the late Marquis of Tweeddale as President of the Zoological Society of London, which office he still holds, and from 1883 to 1885 was President of the Anthropological Institute. The Royal Society awarded to him in Nov., 1882, one of its royal medals for his valuable contributions to the morphology and classification of the mammalia, and to anthropology, and he has received the honorary degrees of LL.D. from the Universities of Edinburgh and Dublin and D.C.L. from that of Durham. He was made a C.B. in 1887, and in 1889 was President of the British Association at the meeting held at Newcastle-on-Tyne. Professor Flower is the author of numerous memoirs on subjects connected with anatomy and zoology in the Transactions of the Royal, Zoological, and other learned Societies; also of "An Introduction to the

Osteology of the Mammalia," 3rd edit., 1885; "Diagrams of the Nerves of the Human Body," 2nd edit., 1872; and various Catalogues of the Museum of the Royal College of Surgeons, and articles on scientific subjects in the 9th edit. of the Encyclopædia Britannica. He married, in 1858, the youngest daughter of Admiral W. H. Smyth, D.C.L., F.R.S.

FOERSTER, Professor Dr. Wilhelm, Director of the Royal Observatory, and Professor at the University, of Berlin, was born Dec. 16, 1832, at Grünberg, Silesia. Studied at Berlin and Bonn from 1850 to 1854; was promoted as Doctor Philosophiæ at Bonn in August, 1854; appointed as second assistant of the Royal Observatory of Berlin, Oct. 1, 1855; first assistant, April 1, 1860; began to give astronomical lectures as "Privat-Dozent" at the University of Berlin in the spring of the year 1857. Oct. 31, 1863, he became Professor Extraordinarius, and April 10, 1875, Professor Ordinarius at the University of Berlin. March 11, 1865, he was appointed as Director of the Royal Observatory. From 1869 to 1886 he was Director of the Weights and Measures Department of the German Empire, without leaving his position at the Observatory. Dr. Foerster has published his astronomical investigations in the "Berliner Astronomisches Jahrbuch," and in the "Astronomische Nachrichten," besides, in a separate volume, "Studien zur Astrometrie." He has published a considerable number of popular and historical essays and speeches, collected in three volumes of a "Sammlung von Vorträgen und Abhandlungen," Berlin, 1876, 1887, and 1890.

FONSECA, Marshal Manuel Deodoro da, Brazilian soldier and statesman, was born of Portuguese parentage about 1834. He was educated at the Polytechnic School in Rio Janeiro, and on graduation entered the army. In the war between Brazil, Uruguay and the Argentine Confederation on the one side, and Paraguay on the other, which broke out in 1865, he distinguished himself and rose from the rank of lieutenant to that of major. At the close of the war the Order of the Rose was bestowed upon him and he was given command of the army in the province of Matto-Grasso. Subsequently he was made a general and placed in charge of the cartridge factory and magazine at Rio Janeiro, where he organized a military club, in which he became very popular. The influence he gained here over his brother officers was used by him, it is said, to

ferment discontent in the army, and for the spread of republican ideas with which he had become imbued, and the imperial authorities, therefore, transferred him to Matto-Grasso, of which he subsequently became Governor. His removal from the Brazilian capital did not, however, stifle the military discontent, on the contrary, it steadily increased, until it culminated in Nov., 1889, in an uprising of the army, the expulsion of Emperor Pedro and the Imperial family, and the proclamation of a republic, of which Gen. Fonseca was made the first President. The revolution was a peaceful one, and though no popular election has yet (May, 1890) been held to confirm the change of government, it has generally been acquiesced in, and the youngest American republic has already been officially recognized by a number of the powers. The new Brazilian Minister, M. de Piza, was officially recognised on Oct. 21, 1889, by M. Carnot, the President of the French Republic, this being the first occasion on which a representative of the new form of government in Brazil was presented to a European Court.

FONVIELLE, Wilfrid de, a French aeronaut and popular writer on scientific subjects, born in Paris, July 26, 1826, was educated at Ste. Barbe, and was originally a teacher of mathematics, but first became known to the public as a journalist, and as a popular exponent of scientific knowledge. His family is from Toulouse; his grandfather was Chevalier de Fonvielle, and his great uncle was Barras, the President of the Directoire Executif of the French Republic. He was a student in Paris when the 1848 revolution broke out, and was one of the leaders of the insurrection in the Quartier Latin and of the column which caused the flight of the Duchess of Orleans and her son. M. de Fonvielle was arrested with others on June 13, 1849, but released then for want of proof. However, he was in 1851, transported to Algiers, and afterwards banished. He subsequently resided for several years in England; but returned to Algiers in 1859 for the purpose of editing *Algérie Nouvelle* with his brother Arthur and Clement Duvernois, who ultimately seceded from republicanism and turned Cabinet Minister under Napoleon III. The paper was suppressed by imperial decree after a duel fought by Arthur de Fonvielle and Youssef; and Wilfrid became the scientific editor of *La Liberté* under Girardin. Besides advocating rational republicanism, M. de Fonvielle has devoted much of his time to science, particularly to physics, and

has invented several electrical instruments, and discovered "rotatory magnetic fields;" the Schallenger measurer of energy, and others similar, are applications of this principle. During the siege of Paris, he escaped from the city in a balloon and, proceeding to London, gave a series of conferences, in which he expatiated on the benefits of a republican form of government. Of late years he has made numerous balloon ascents, in order to carry on scientific experiments at great altitudes. His principal scientific works are "L'Homme Fossil," 1865; "Les Merveilles du Monde Invisible," 1866; "Eclairs et Tonnerres," 1867, translated into English by T. L. Phipson, under the title of "Thunder and Lightning;" and "L'Astronomie Moderne," 1868, &c. An account of the balloon ascents made by M. de Fonvielle, Mr. Glaisher, and others, appeared in French in 1870, and an English translation was published in 1871 under the title of "Travels in the Air." In addition to the above M. de Fonvielle has written several political pamphlets; his latest being "How Republics Perish;" an attack on Radicalism and Boulangerism. In 1879 he published "Comment se font les Miracles en dehors de l'Eglise," a work in which he refutes, from a common-sense stand-point, the pretensions of spiritualist mediums. He is one of the editors of *La Nature*, *Petit Journal*, and *Lumière Electrique*. His younger brother, Uric, an artist, was fired at by Prince Pierre Bonaparte when the Prince murdered Uric's companion, Victor Noir. Uric de Fonvielle was the only witness for the unwilling prosecution in the celebrated process called "Drame d'Auteuil."

FORBES, Archibald, journalist, born in 1838, is a native of Morayshire, Scotland. After studying at the University of Aberdeen he served for several years in the Royal Dragoons, and his knowledge of the practical details of military affairs stood him in good stead when, accepting a journalistic career as special correspondent for the *Daily News*, he accompanied the German Army from the beginning to the end of the Franco-German war. Later, in the same capacity, he witnessed the close of the Commune, visited India during the famine of 1874, saw fighting in Spain, at one time with Carlists, at another with Republicans, at a third with Alfonsists. In the capacity of representative of the *Daily News*, he accompanied the Prince of Wales in the tour of his Royal Highness through India in 1875-6. In the summer and autumn of 1876, he was in Servia, and

was present at all the important fights of that campaign. He followed the Russo-Turkish campaign in the summer and autumn of 1877, attached to the Russian army, and was present at the crossing of the Danube, the capture of Bjela, the advance of the CesaREWITCH's army towards Kustchuk, the disastrous battle of Plevna on July 3rd, the severest fighting in the Shipka Pass, and the five days' attack by the Russians on Plevna, in September, remaining continuously in the field until attacked by fever in the middle of September. In 1878 he proceeded to Cyprus as special correspondent of the *Daily News*. Afterwards Mr. Forbes lectured on his experiences to large audiences in Great Britain, America, and Australia. The severe strain of his work as a correspondent began to tell upon his health, and he was not able to be present during the Egyptian and Soudan campaigns. Among his works are "Drawn from Life," a military novel; "My Experiences of the War between France and Germany;" "Glimpses through the Cannon Smoke," 1880; "Soldiering and Scribbling: a Series of Sketches," 1882; "Life of Chinese Gordon," 1884; "Life of the Emperor William of Germany," 1889; and "Havelock," 1890.

FORBES-ROBERTSON, John, art critic and journalist, is lineally descended from the Forbuses of Tolquhon, Thanes of Formartin. He is the son of the late John Robertson, merchant in Aberdeen, and was born there, Jan. 30, 1822. He was educated at the Grammar School, and at the Marischal College and University of his native city, and became sub-editor of one of the local papers (under the late Joseph Robertson, the eminent historian and antiquary) and contributor to the "poet's corner" of another, while still a student, making dramatic and musical criticism his special care. Early in 1844 he came to London; the year afterwards he visited France, and subsequently the United States of America. On his return he aided materially in opening up the Salmon resources of Norway, and carried on a correspondence with the French authorities on the artificial propagation of the fish, long before any practical results of the knowledge obtained became visible in England. Mr. Forbes-Robertson has, since then, written much art-criticism; he was editor for several years of *Art*, *Pictorial and Industrial*, art editor of the *Pictorial World*, and has been on the staff of most of those London journals which make art a feature. For ten years he was chief art-critic on the *Art Journal*,

and contributed reviews of continental exhibitions to the *Illustrated London News*, the *Magazine of Art*, &c. He is the author of several brochures of special art-criticism, and in 1877 he published a large quarto volume entitled "The Great Painters of Christendom," which was most favourably reviewed both in this country and in America. He is the author, also, of a Life of George Jameson, the Scottish painter, and, in conjunction with Wm. May Phelps, of a Life of Samuel Phelps, Player. Mr. Forbes-Robertson is well known in London and elsewhere as a successful lecturer on the history of art. His eldest son, Johnston Forbes-Robertson, has won for himself a recognised position both as a painter and an actor.

FORD, E. Onslow, A.R.A., sculptor, was born in London, July 27, 1852, and as a boy had a great desire to become an artist. In 1870 he went to Antwerp and entered the School, working his way up to the Antique School, where he studied under M. Buffeau. In 1871 he went to Munich and joined the Academy, still studying painting, but shortly before leaving he gave up painting, and took to sculpture. In 1874 he returned to England, where he has since resided. His principal statues are "Sir Rowland Hill, K.C.B.," 1882; "The Right Hon. W. E. Gladstone, M.P.," 1883; "Henry Irving, Esq., as Hamlet," 1883; and "Linus," 1884. Besides these he has executed a number of busts, amongst which may be mentioned, "Sir John Brown," 1881; "Sir Charles Reid," and "Rev. John Rodgers," 1882; "The Archbishop of York," 1884; and "Lieut.-Gen. Sir Andrew Clarke," 1886. In 1885 he exhibited a relief "In Memoriam," and his statuette "Folly" was purchased by the Royal Academy under the terms of the Chantry Bequest.

FORD, The Right Hon. Sir Francis Clare, G.C.B., G.C.M.G., P.C., joined the 4th Light Dragoons in 1846, and retired as Lieutenant in 1851. The following year he entered the diplomatic service, and was appointed Attaché at Naples. In 1862 he became Second Secretary, and was resident Chargé d'Affaires at Carlsruhe from Oct., 1862, till Sept., 1863, when he was transferred to Vienna, and promoted to be Secretary of Legation in Japan, in June, 1865, but did not proceed thither, going instead to Buenos Ayres, where he was in charge of the Mission until Oct., 1866. In 1871 he proceeded to St. Petersburg as Secretary of Embassy. In 1875 he was appointed Her Majesty's

Agent to attend the Commission at Halifax; was made a C.B. and a C.M.G. in Jan., 1878, and promoted to be Envoy Extraordinary and Minister Plenipotentiary to the Argentine Republic, Feb. 9, 1878. He conducted the negotiations at Monte Video which resulted in a renewal of diplomatic relations with Uruguay, and was appointed Envoy to that Republic, Feb. 24, 1879. In June of the same year he proceeded to Brazil, and to Greece in 1881. In Dec., 1883, Sir F. Ford was appointed British Commissioner in Paris for the settlement of the Newfoundland Fisheries question. Since 1884 he has been British Minister in Madrid, and in June, 1885, was made a K.C.M.G.; conducted the negotiations in Madrid which resulted in the signature of the Anglo-Spanish Commercial Convention of April 26, 1886; was made a G.C.M.G., May 29, 1886; was appointed Ambassador Extraordinary and Plenipotentiary to the King of Spain, Dec. 8, 1887; was sworn a Privy Councillor, Aug. 10, 1888; and was made a G.C.B., April 29, 1889.

FORMAN, Harry Baxton, born in London, July 11, 1842, was educated at Teignmouth, and was appointed in 1860 to a Junior Clerkship in the Secretary's Department of the General Post Office, where he is now Principal Clerk for Foreign and Colonial Business. He is the author of "Our Living Poets; an Essay in Criticism," 1871; "The Shelley Library; an Essay in Bibliography," 1886, and several Essays on Shelley, published by the Shelley Society; also editor of the Library Edition of "The Poetical Works of Percy Bysshe Shelley," 4 vols., 1876-77, reprinted 1882; "The Prose Works of Percy Bysshe Shelley," 4 vols., 1880; an unannotated edition of Shelley's poetry, in 2 vols., 1882, reprinted 1886; separate editions of Shelley's tragedy, "The Cenci," 1886; and his eclogue, "Rosalind and Helen," 1888; Charles Wells's "Joseph and his Brethren," 1876; "Letters of John Keats to Fanny Brawne," 1878, reissued 1889; the Library Edition of "The Works of John Keats in Verse and Prose," 4 vols., 1882, reissued with additions, 1889; an unannotated edition of Keats's poetry, 1884, reprinted 1885 and 1889; and "Poetry and Prose by John Keats," 1890. Mr Forman, who has been for some time engaged upon a large edition of Byron's poetry, to be published by Mr. Murray, has been a contributor of critical articles, mainly of a serious kind, to the *Fortnightly Review*, the *Fine Arts Quarterly Review*, the *Athenæum*, the *Contemporary Review*, *Macmillan's Magazine*,

the *Gentleman's Magazine*, the *Manhattan*, and the *London Quarterly Review*; and is one of the authors who assisted in the production of Mr. Lloyd Sanders's Biographical and Critical Dictionary, "Celebrities of the Century."

FORREST, John, C.M.G., F.R.G.S., F.G.S., F.L.S., Honorary Fellow of the Royal Geographical Societies of Italy, Vienna, and St. Petersburg, Knight of the Italian Crown, entered the Survey Department of Western Australia, 1865, and in 1869 commanded an exploring expedition into the interior in search of Dr. Leichhart and party. In 1870 he commanded an exploring expedition from Perth to Adelaide along the South Coast, and proved the practicability of the country for a telegraph line, which was erected in 1876. In 1874 he commanded an exploring expedition from Champion Bay on the West Coast of Australia to the overland telegraph line between Adelaide and Port Darwin without the aid of camels, with horses only, a journey of nearly 2000 miles. For these services he received the thanks of the Governor and the Legislative Council, and was awarded the gold medal of the Royal Geographical Society of London, May 22, 1876, and was also presented by the Imperial Government with a grant in fee of 5000 acres of land. In 1876 he was appointed Deputy Surveyor-General of Western Australia. In 1878 and 1882 he conducted the Trigonometrical Surveys of the Nickol Bay District and the Gascoyne and Lyons District in North-Western Australia. From Sept., 1878, to Jan., 1879, he acted as Commissioner of Crown Lands and Surveyor-General, with a seat in the Executive Council of the Colony. In 1880-81 he acted as Comptroller of the Imperial Establishments and Expenditure in Western Australia. He is a Justice of the Peace for the Colony. In 1882 he was made a Companion of the order of St. Michael and St. George. In 1883 he was appointed Commissioner of Crown Lands and Surveyor General, and in the same year, and again in 1886, proceeded to Kimberley District, North-West Australia, to report on it to the Government. He is a member of the Executive and Legislative Councils of the Colony; represented Western Australia at the Colonial Conference in London, 1887. He has published "Explorations in Australia," 1876; "Notes on Western Australia," 1883, 1884, and 1885.

FORSTER, Sir Charles, M.P., is the only son of the late Mr. Charles Smith Forster,

of Lysways Hall, Rugeley, first member for Walsall, by Elizabeth, daughter of the late Mr. Richard Emery, of Barcott House, Salop. He was born in 1815, and educated at Worcester College, Oxford; was called to the Bar at the Inner Temple in 1843, and joined the Oxford Circuit. In 1852 he was first elected for Walsall, and has continued to represent that constituency in the Liberal interest up to the present time. He has long been responsible for the conduct of private business in the House of Commons, and in 1874 was created a Baronet in recognition of his services. He married Miss Frances Catherine Surtees, niece of the first Earl of Eldon.

FÖRSTER, Dr. Ernest Joachim, a celebrated German art-critic and painter, brother of Frederick Förster, a distinguished historian and poet, who died in 1868, was born at Münchengrosserstadt, April 8, 1800. At first he applied himself to the study of theology and philosophy, but soon determined to devote himself to art, and accordingly entered the studio of Peter Cornelius at Munich. He was employed in painting the frescoes in the Aula at Bonn, and those of the Glyptothek and the Arcades at Munich, but his reputation rests chiefly on his discovery of several ancient pictures, and on his works in elucidation of the history of art. His greatest "find" was the frescoes of Avanzo, which date as far back as 1376, in the chapel of San Giorgio at Padua. Of his works, which are all written in German, we may mention three excellent guide-books to Munich, Italy, and Germany; "Studies relating to the History of Modern Art" 1835; "Letters on Painting," 1838; "History of German Art;" "Monuments of German Architecture, Sculpture, and Painting," 1855; "Life of Raphael," 1867; and a "History of Italian Art," 1869; "Life of Cornelius," 1874; and "Monuments of Italian Painting," 1870. He has likewise written a life of Jean Paul Richter, and edited several of his works.

FORSYTH, Professor Andrew Russell, M.A., F.R.S., son of John Forsyth, was born in Glasgow on June 18, 1858. He was educated at the Liverpool College under Dr. (now Canon) George Butler, and at Trinity College, Cambridge. He graduated in 1881 as Senior Wrangler and First Smith's Prizeman, and was elected a Fellow of his College in the same year. He was appointed Professor of Mathematics at the new University College, Liverpool, in 1882, a post which he resigned in 1884 on his appointment

as lecturer in mathematics at Trinity College, Cambridge; and he was elected a Fellow of the Royal Society in 1886. He is the author of a "Treatise on Differential Equations," and of mathematical papers (relating chiefly to differential equations, theory of functions and theory of invariantive forms) published in the Transactions of the Royal Society, and of the Cambridge Philosophical Society and in various mathematical journals.

FORSYTH, William, Q.C., LL.D., son of the late Thomas Forsyth, Esq., of Liverpool, was born at Greenock in 1812, and educated at Trinity College, Cambridge, where he graduated B.A. in 1834. He was third in the first class of the classical tripos, and second Senior Optime, was Chancellor's Medallist, and Fellow of Trinity, and proceeded M.A. in 1837. He was called to the Bar at the Inner Temple in 1839, went the Northern Circuit, became a Queen's Counsel in 1857, and a Bencher of the Inner Temple. He was standing counsel to the Secretary of State in Council of India, and is Commissary of the University of Cambridge. He is the author of "On the Law of Composition with Creditors," published in 1841; "Hortensius; or, the Duty and Office of an Advocate," in 1849; "On the Law relating to the Custody of Infants," in 1850; "The History of Trial by Jury," in 1852; "Napoleon at St. Helena and Sir Hudson Lowe," in 1853; "The Life of Cicero," in 1864; "Cases and Opinions in Constitutional Law," in 1869; "The Novels and Novelists of the Eighteenth Century, in illustration of the Manners and Morals of the Age," in 1871; "Hannibal in Italy: an Historical Drama," in 1872; "Essays Critical and Narrative," in 1874; "The Slavonic Provinces South of the Danube," in 1876; and has contributed to the *Quarterly* and *Edinburgh Reviews* and *Blackwood's Magazine*. Having been elected member for the borough of Cambridge in the Conservative interest in July, 1865, he was unseated, on petition, on the ground that the office he held of standing counsel to the Secretary of State for India was one of profit under the Crown, and disqualified him from sitting in Parliament. He was an unsuccessful candidate for the representation of Bath in Oct., 1873, but was returned to the House of Commons by the borough of Marylebone at the general election of Feb., 1874, and he continued to represent that constituency till 1880.

FORTESCUE (Earl), The Right Hon. Hugh Fortescue, the eldest son of the late

Earl (who was Lord-Lieutenant of Ireland in 1839-41), was born April 4, 1818, and educated at Harrow, and Trinity College, Cambridge. In 1841, whilst Viscount Ebrington, he entered Parliament as member for Plymouth, which he represented in the Liberal interest until 1852, when he unsuccessfully contested Barnstaple. In Dec., 1854, he was elected for Marylebone, for which he resigned his seat, and was called to the Upper House in his father's Barony of Fortescue, Dec. 5, 1859, and succeeded as third Earl, Sept. 14, 1861. His lordship was a Lord of the Treasury from 1846 to 1847, and Secretary of the Poor-Law Board from 1847 to 1851. In May, 1856, while visiting a military hospital with a view to the motion which he carried afterwards in 1858, in favour of sanitary reform in the army, he caught ophthalmia, which deprived him of one eye, permanently impaired the other, and so much injured his health as to compel him after a while to retire from the House of Commons. His lordship is the author of pamphlets upon, "The Health of Towns," 1844; "Official Salaries," 1852; "Representative Self-Government for the Metropolis," 1854; "Parliamentary Reform," 1859 and in 1884; and a work on "Public Schools for the Middle Classes," 1864. He married, March 11, 1847, the eldest daughter of the late Right Hon. Col. G. Dawson Damer. She died in 1866, leaving him a large family.

FORTNUM, Dr. Charles Drury Edward, J.P., D.L., D.C.L., born March, 1820, in the then rural neighbourhood of Hornsey, Middlesex, is the only surviving son (one brother died in infancy) of Charles Fortnum, gentleman, and his wife Lætitia (*née* Stevens). He was educated privately by reason of delicate health; and emigrated to Adelaide, South Australia, in 1840, where his then favourite studies of Chemistry, Mineralogy, and Entomology were brought to bear in the discovery of two of the earliest found veins of copper ore, and in forming a considerable collection of insects, birds, and reptiles, some of which he presented to the British Museum, and others are in the Hope collection at Oxford. He returned to England in 1845, and afterwards travelled on the Continent studying and forming his collection of works of art and antiquity, and was elected a Fellow of the Society of Antiquaries in 1858. At the request of the Lords of the Council on Education, he wrote the Descriptive Catalogue of Majolica, &c., in the South Kensington Museum (published 1873), and the Descriptive Catalogue of Bronzes in

that Museum (published 1876), and is the author of various papers in *Archæologia* on the Royal Collection of Gems; on the Diamond Signet of Henrietta Maria, &c., and on early Christian gems and rings, in the *Archæological Journal*. In 1887 he presented to Her Majesty the Queen, the diamond signet engraved by order of Charles I. for his Queen, Henrietta Maria, and was honoured by a private audience. Early in 1888 he made a free gift of the larger portion of his collection of objects of classical and renaissance Art to the University of Oxford. He was elected to the degree of D.C.L. at the *Eucemia* in June 1889. In that year he was also elected a Trustee of the British Museum. Dr. Fortnum is a Justice of the Peace and Deputy Lieutenant for the County of Middlesex, and an Alderman of the Council of that County. In 1848 he married Fanny Matilda, daughter of Mr. Thomas Keats, of Surrey, but has no family.

FORWOOD, Arthur Bower, M.P., eldest son of the late Thomas B. Forwood, J.P., of Thornton Manor, Neston, was born June 23, 1836, at Liverpool, was educated at the High School, Liverpool College, the late Dean Howson being Principal, and is a merchant and Shipowner of Liverpool and London. He was Mayor of Liverpool in 1877-78, and is an Alderman of that City, the Council having unanimously refused to accept his resignation. For several years he was Chairman of the Health Committee, and the Finance and Estate Committee, also of the Artisans' Dwellings Committee. He is President of the Liverpool Constitutional Association, and in this capacity he took an active part in the settlement of the differences amongst the Conservative party leaders that occurred in 1884. He has written papers on the Housing of the Poor, Tory Democracy and One Member Constituencies, which were printed in the magazines of the day. Mr. Forwood was chairman of the committee under which the Bishopric of Liverpool was founded, and was also chairman of the first committee that instituted the Liverpool University College. He is a progressive Conservative, and early adopted the phrase "Tory democracy." He contested Liverpool in 1882 against Mr. Samuel Smith, but was defeated by a small majority. At the General Election in 1885 Mr. Forwood was elected by a majority of 2,800 for the Ormskirk Division of the County of Lancaster, and was again returned, this time without opposition, after the dissolution of 1886. On Lord Salisbury's accession to power in

1886, Mr. Forwood was appointed Parliamentary Secretary to the Admiralty, and in that position has taken an active part in promoting the many important changes effected in the Administrative departments, both at the Admiralty, and in H. M. Dockyards.

FOSTER, Birket, born at North Shields, Northumberland, in 1825, educated at Hitchin, Herts; at the age of sixteen was placed with Mr. Landells, the wood-engraver, by whose advice, after he had practised engraving for a short time, he became a draughtsman. At the age of twenty-one he started on his own account, illustrated several children's books, and drew a great deal for the *Illustrated London News*. He illustrated Longfellow's "Evangeline," Beattie's "Minstrel," "Goldsmith's Poetical Works," and several other works of a similar kind; and has since been employed on many of the better class of illustrated books that have issued from the press, especially a handsome volume devoted to English landscape, with descriptions from the pen of Mr. Tom Taylor, published in 1863. He then resolved to follow a different branch of art, and began water-colour painting; and in 1860 he was elected a member of the Water-Colour Society. He is the most widely known, and perhaps the most popular of English landscape artists in water-colour. A collection of "Summer Scenes" by Mr. Foster, consisting of a series of photographs from some of his choicest water-colour drawings, was published in 1867.

FOSTER, Professor George Carey, F.R.S., born 20th October, 1835, at Sabden, Lancashire; is the only son of George Foster, of Sabden, a Justice of the Peace for the County of Lancaster, and West Riding of Yorkshire. He was educated at private schools, and at University College, London, and graduated as B.A. of the University of London in 1855; afterwards, from 1859-1861, he studied chemistry at Ghent, Paris and Heidelberg, under Kekulé, Wurtz, and Bunsen. He was appointed in 1862 Professor of Natural Philosophy in Anderson's College (then called Anderson's University), Glasgow. In 1865, on the resignation by Professor Potter, of the Chair of Natural Philosophy and Astronomy in University College, London, which he had held with two years interval since 1840, Mr. Foster was appointed to succeed him as Professor of Physics, which appointment he still holds. He has contributed to the great "Dictionary of Chemistry and the Allied Branches of other Sciences," edited by

the late Henry Watts, many articles on points of general chemical theory as well as on some parts of Physics, those on "Heat" and on "Thermodynamics" being among the most considerable of his writings. Since his appointment at University College, his thought and attention have been chiefly devoted to the teaching of Physics. The Physical Laboratory of University College, opened at his instigation in 1867 was the first in London in which practical instruction in Physics was offered to students. He has devised some useful new methods, or modifications of methods of physical measurement, some of which, especially a method of comparing electrical resistances, has been frequently adopted. He was elected a Fellow of the Chemical Society in 1856, Fellow of University College, London 1867, Fellow of the Royal Society, 1869, and has three times served on the Council. He was President of the Physical Society of London, 1877-79, President of the Mathematical and Physical Section of the British Association 1877, (Plymouth Meeting), President of the Society of Telegraph Engineers (now Institute of Electrical Engineers), 1881, and was appointed, on the nomination of the Convocation of the University, a Member of the Senate of the University of London, 1885, and elected (without ballot) a member of the Athenæum Club, 1888.

FOSTER, Joseph, Antiquary, was born in Sunderland, co. Durham, March 9, 1844, (son of another of the same names, a woollen draper of that town and an elder brother of Birket Foster), and is a cadet of a family belonging to the Quaker-ocracy of the North since the early days of its founder, George Fox, and originally seated at Cold Hesledon and Hawthorne on the east coast of the Palatinate. Mr. Joseph Foster, who was educated in ordinary private schools in the neighbouring towns of North Shields, Sunderland, and Newcastle-upon-Tyne, inherited his genealogical faculty from his grandfather, Myles Birket Foster, and completed, as early as his eighteenth year, his first genealogical brochure, entitled "The Pedigree of the Forsters of Cold Hesledon in the county palatine of Durham," (see also "Virtue's Art Annual," 1890). Henceforth his life was spent among books, and all his leisure was devoted to increasing and arranging his genealogical collections. Having issued a larger edition of his family narrative, he was accidentally led by the omission of the pedigrees from the 1870 edition of "Baines' History of Lancashire" (Routledge), to commence his series of Pedigrees

of county families with those of that county (see "Herald and Genealogist," viii. 55, 169), and this volume, was followed by three others for Yorkshire, which Mr. John Gough Nichols, described as "marvels of elaborate, and of accurate work," ("Herald and Genealogist," viii. 501). Mr. Foster, following Sir William Dugdale, transcribed the admission register of the four Inns of Court, a herculean task extending over several years; that of Lincoln's Inn is probably the oldest perfect register extant; it commences 1 Hen. VI. 1422. In addition to this, only he has the list of calls to the Bar culled from these legal registers. Later on, a copy of Col. Chester's transcript of the Oxford Matriculation register, together with his collection of "marriage licences," appeared in the auction room, when Mr. Foster determined to possess them for publication; this he accomplished, and though he relinquished the "marriage licences," he had the satisfaction of editing them for Mr. Quaritch, (see "Genealogist," 1887, p. 169.) The acquisition of the register of our oldest and proudest university, coupled with those of the Inns of Court with which they dovetail, illustrating and annotating each other, materially strengthened Mr. Foster's already unique position, but still before he could hope to grapple effectually with so arduous a task as the annotation of the earlier "Alumni Oxonienses," it was necessary that all the Bishops' certificates of institutions to livings (since the Reformation) now deposited in the Public Record Office, should be laid under contribution, with the result, that we shall some day have these 150,000 institutions, &c., alphabetically arranged as a Clergy List, and have Mr. Foster's greatest work comprised in 8 volumes, that which enrols his name for all time, not only among the highest authorities on the personnel of Oxford, but also, on matters genealogical. His best known critical work was undoubtedly "Chaos," under which category he classed, for the first time, all known "soi-disant baronets." Chaos formed a minor portion of the "Peerage, Baronetage and Knightage," compiled and edited by Mr. Foster, 1880-4, this masterly compilation of over 1700 pages was heraldically illustrated by the late Fr. Anselm of Mount St. Bernard Abbey (See "Dict. Nat. Biog.," article, "Anselm-Baker,") and by Mr. Forbes-Nixon, with a wealth of ornamentation unequalled in any other similar publication, and for the pedigrees, the precious records of the Heralds' College were unreservedly placed at his service. This prolific worker has

also issued at his own expense the majority of the Heralds' Visitations of the North, viz.; Northumberland, Cumberland, Westmorland, Durham and Yorkshire, and also of Middlesex in the South, whilst from his study have emanated such useful works as "Men at the Bar," "Scottish Members of Parliament," 1357-1882; "Gray's Inn Admission Register," 1521-1889; "Our Noble and Gentle Families of Royal Descent," and several minor family histories, e.g., those of Fox, Harris, Wilson, Pease, and Pennington, "which last will serve as a model of skilful arrangement for all time."—*Genealogist*, 1879, p. 334. His elder son, Mr. Sandys Birket Foster, has edited a second edition of the Wilson family history, 1890.

FOSTER, Professor, Sir (Balthazar) Walter, M.D., J.P., son of the late B. Foster of Drogheda and of Marian Green of Cambridge, was born near Cambridge in 1840. He was educated at the Grammar School, Drogheda, and received his medical education at the Royal College of Surgeons, Dublin, at which school he was made Pro-sector of Anatomy in 1859. He became a Licentiate of the Royal College of Surgeons, and of the King and Queen's College of Physicians in 1860, and in the same year was appointed Professor of Practical Anatomy in Queen's College, Birmingham. In 1864, while in Germany, he received the degree of M.D. at Erlangen, and was elected a Fellow of the College of Physicians, London, in 1872. From 1860 to 1868, he was one of the Physicians to the Queen's Hospital, Birmingham, and in the latter year was elected Physician to the General Hospital. In 1864, he left Queen's College, and became Professor in *Materia Medica* in Sydenham College, but on the amalgamation of the two Colleges in 1868, he was appointed Professor of Medicine, an office which he still holds in the Queen's College. Sir Walter Foster is the author of many contributions to Medical and Sanitary science of which the chief are:—"The use of the Sphygmograph," 1866; "Method and Medicine," 1870;—"Clinical Medicine," 1874; "How we die in large Towns," 1875; "Political powerlessness of the Medical Profession," 1883. He is also the author of the articles on "Diseases of the Heart" in Quain's "Dictionary of Medicine." For many years Sir Walter Foster took an active part in the politics of his profession in connection with the British Medical Association. He has served on the Council of that body since 1874, and in 1884, he was elected President of the Council, which had previously

to a great extent through him been given a representative constitution. As early as 1866, Sir Walter Foster had taken a share of public work in Birmingham, in connection with the late J. S. Wright, M.P., for the purpose of reforming the Grammar School, but did not enter the Town Council until 1883. He became a J.P. for Warwickshire in 1885, and in the same year successfully contested the City of Chester. He stood as an advanced Liberal, advocating Home Rule for Ireland. In Parliament, while sitting for Chester, he had charge of the allotments and Small Holdings Bill, and took an active part in the passage of the Medical Act Amendment Bill, obtaining increased representation for the profession on the Medical Council, and other modifications. During the Home Rule crisis, Sir Walter Foster took an energetic part in favour of the Irish policy of the Government, and became Chairman of the Committee of the National Liberal Federation. On the dissolution in 1886, Sir Walter Foster again contested Chester, but was beaten by a small majority. When Mr. Gladstone retired from office in 1886, he recommended Sir Walter Foster for the honour of Knighthood, on account of his professional position, his political principles and service, and for his work in the town of Birmingham. At the first election of Medical men to represent the profession in the Medical Council of Education, held in November 1886, Sir Walter Foster was returned by a large majority; and in March 1887 he was again returned to Parliament to fill a vacancy in the Ilkeston Division of Derbyshire. Since 1885, Sir Walter Foster has been chairman of the Allotments and Small Holdings Association, and has been a constant advocate, both in the House and in the country, of measures calculated to promote the social elevation of agricultural labourers. He has also as Chairman of the National Liberal Federation, taken an active part in the organization of the Liberal party throughout the country, and in constructing the Liberal programme. He was the host of Mr. Gladstone when he visited Birmingham for the Federation meeting in 1888. In addition to his public work, Sir Walter Foster still retains the Senior Professorship of Medicine in Queen's College, and continues in active practice as a consulting Physician. Sir Walter Foster married in 1864, the second daughter of the late William Lucas Sargant.

FOSTER, Vere Henry Louis, was born at Copenhagen in 1819, his father Sir Augustus Foster, Bart., being at that time

British Minister in Denmark. He was educated at Eton and at Christ Church, Oxford, and was afterwards attached for some years to the diplomatic missions of Sir Henry Ellis at Rio de Janeiro, and of Sir William Ouseley at Monte Video. On his return from South America in 1847, he paid a visit to Ireland in the company of his eldest brother, Sir Frederick Foster. The famine consequent upon the failure of the potato crop was raging at the time, and the two brothers set to work at once to relieve the starving poor. Mr. Foster himself made three voyages to America as a steerage passenger in emigrant ships, and was so impressed by the badness of the accommodation, that he attracted the attention of Parliament to the matter, and soon had the satisfaction of seeing the Emigration laws in force which rendered the miseries he had witnessed and endured thenceforth impossible in a British emigrant vessel. The outbreak of the Civil War in America (1861) checked for a time the stream of emigration, and Mr. Foster turned his attention to the improvement of education in Ireland—by the substitution of boarded floors for damp earthen floors in upwards of a thousand National schools, and by grants in aid of building several hundred new school-houses. On the recurrence of exceptional distress in Ireland in the year 1879, Mr. Foster resumed his scheme of assisted female emigration to the United States and the British Colonies, with the cordial co-operation of all the clergy of every denomination in the West of Ireland with but one single exception. The number of young women thus assisted during the last forty-two years, partly by means of subscriptions but chiefly at Mr. Foster's own cost, has been nearly 23,000.

FOWLER, The Right Hon. Henry Hartley, M.P., P.C., son of the Rev. Joseph Fowler, Wesleyan minister, Secretary of the Wesleyan Conference, 1848, was born at Sunderland in 1830, educated at Woodhouse Grove School, and St. Saviour's School, Southwark. He was Mayor of Wolverhampton in 1863 and first chairman of the Wolverhampton School Board. From 1880 to 1885 he sat as a Liberal for the undivided Borough of Wolverhampton, and after the Redistribution Act was returned for the East Division. In Dec. 1884 he was appointed Under-Secretary for the Home Department, and in Mr. Gladstone's ministry of 1886, he held the post of Financial Secretary to the Treasury. He was a member of the Royal Commission to inquire into the Civil Service, and is one of

the Royal Commissioners of the Exhibition of 1851. He was created a Privy Councillor in June, 1886. It is regarded as certain that he will be a prominent member of the next Liberal Cabinet. He married in 1857, Ellen, the youngest daughter of the late G. B. Thorneycroft, Esq., of Wolverhampton and Hadley Park, Salop.

FOWLER, Sir John, Bart., LL.D., K.C.M.G., civil engineer, is the eldest son of the late Mr. Fowler, of Wadsley Hall, in the parish of Ecclesfield, Sheffield, and was born in 1817. After completing his school course, he became a pupil of Mr. J. Towlerston Leather, the eminent hydraulic engineer, and obtained his first practical knowledge under the guidance of that gentleman in the construction of the Sheffield waterworks. On the completion of his professional education he became an assistant to Mr. Rastrick in the construction of several lines of railway then in progress, and amongst others the London and Brighton Railway. He was then appointed resident engineer of the Stockton and Hartlepool Railway, and of other lines in the same district. At the age of twenty-seven he was selected as engineer for constructing the large group of railways known as the Manchester, Sheffield, and Lincolnshire line, which includes tunnels, viaducts, and bridges of considerable magnitude, in addition to a dock, a floating pier, large hydraulic works, and a steam ferry, of all which large and multifarious work he had the sole engineering charge. From this time the name of John Fowler was established in the first rank of practical engineers, and he became after settling in London, continuously employed at home and abroad in the laying out and construction of railways, docks, and other large works requiring a high class of engineering ability; and, in 1866, he was elected President of the Institution of Civil Engineers. Amongst the principal works executed by Sir John Fowler are to be found the original "underground" or Metropolitan Railway, the District Railway, the St. John's Wood Railway, the Victoria Station and Pimlico Railway on which occurred the first railway bridge built over the river Thames at London; the Edgware, Highgate, and London Railway; the Manchester, Sheffield, and Lincolnshire Railways; the Oxford, Worcester and Wolverhampton Railway; the Severn Valley Railway; the Mid-Kent Railways; the London, Tilbury, and Southend Railway; the Great Northern and Western of Ireland system of railways; the Much Wenlock Railway, and its extension east

and west; the Great Eastern Railway Extension in Cambridgeshire and Essex; the Isle of Wight Railway; the Launceston and South Devon Railway; the Moreton Hampstead Railway; the Weymouth and Portland Railway; the Wellington and Cheshire Railway; the Millwall Docks; and works for the improvement of rivers and estuaries, and the reclamation of lands from the sea. Sir John Fowler is consulting engineer to the Great Western, the Great Northern, the Brighton and Highland Railways, and other companies, and until the recent change of government in Egypt, and the suspension of all further present expenditure on works, he acted in a similar capacity with respect to the important Government works in that country. In 1870 he took part in a Commission sent to Norway by the Indian Government to examine the railways there. He has just completed the great bridge across the Firth of Forth, the best known of all the works with which Sir John Fowler has been associated, and one which at the present time, 1890, is engaging the attention both of the general public, and of engineering experts in all parts of the world. On its completion, Sir John was created a Baronet of the United Kingdom. In 1885 he was made a Knight Commander of the Order of SS. Michael and George, in recognition of important services rendered in connection with the Soudan campaign. Sir John Fowler married, in 1850, Elizabeth, daughter of the late James Broadbent, Esq., of Manchester.

FOWLER, Sir Robert Nicholas, Bart., M.P., was born at Tottenham, Sept. 12, 1828, and is the son of Thomas Fowler of Tottenham and of Gastard, Wiltshire, a banker in London, by Lucy, daughter of Nicholas Waterhouse of Liverpool. Sir Robert was educated at Tottenham, and at University College, London; B.A., London, 1848, 2nd in Mathematical, and 5th in Classical Honours; M.A., 1850, by examination in mathematics; Fellow of University College, 1856; Member of the Senate of the University of London, 1864. Sir R. N. Fowler was Member for Penryn 1868 till 1874; and has been Member for the City of London since 1880; Alderman for London in 1878; Sheriff in 1880; and Lord Mayor 1883-84; and again during part of 1885. He became J.P. for Middlesex in 1860; for Wiltshire 1878; and was created a Baronet in 1885. He published "Japan, China and India" in 1876; and visited New Zealand and Australia in 1886; but did not publish any account of his travels. He became a banker in London in 1850, and a member

of the Committee of Bankers in 1889, and President of the Bankers' Institute.

FOWLER, The Rev. Thomas, D.D., LL.D., F.S.A., was born at Burton-Stather, Lincolnshire, Sept. 1, 1832, and educated at King William's College, Isle of Man, and at Merton College, Oxford, where he graduated as a double-first classman in 1854. He was elected to a fellowship at Lincoln College in 1855, and appointed to a tutorship in the same year. He was Junior Proctor of the University in 1862-3, Select Preacher in 1872-4, Professor of Logic from 1873-89, and has frequently acted as Public Examiner in the Schools of Literæ Humaniores. Dr. Fowler is now a member of the Hebdomadal Council, to which he was first elected in 1869, and is President of Corpus Christi College, to which he was elected Dec. 23, 1881. He has received the honorary degree of LL.D. from the University of Edinburgh. He is the author of the "Elements of Deductive Logic," 1867, (9th ed. 1887); the "Elements of Inductive Logic," 1870 (5th ed. 1889); both which works were published by the Clarendon Press, which has also published an elaborate edition of Bacon's "Novum Organum," by Dr. Fowler, with an Introduction and notes, 1878 (2nd ed. 1889) as well as an edition by him of Locke's "Conduct of the Understanding," 1881 (3rd ed. 1890). In addition to these works, Dr. Fowler is the author of "Locke" in the series of "English Men of Letters," and of "Bacon," and "Shaftesbury and Hutcheson," in the series of "English Philosophers." Besides the last-named work, he has written also the following ethical treatises: "Progressive Morality: an Essay in Ethics," 1884; "The Principles of Morals" (introductory chapters), 1886; "The Principles of Morals" (Part II., being the body of the work), 1887. Part I. of the last-mentioned work was written in conjunction with his predecessor in the Professorship of Corpus, Professor J. M. Wilson; Part II., though it also contains some contributions by Professor Wilson, was mainly written by Dr. Fowler, and has been published under his name only, as he is solely responsible for it in its final form.

FRANÇAIS, François Louis, a French artist, was born at Plombières in the Vosges, Nov. 17, 1814, and is the grandson of a priest, who, being a conscientious man, and feeling himself unfitted for the calling, gave up the clerical profession, and became a tutor, and, as such, accompanied a young Englishman

to India. After four years' absence, he came back to France, and found his little patrimony squandered by inconsiderate relatives. He entered the service of the Princesse de Lamballe as reader, and subsequently a small office of some kind was made for him. The battle of life was continued by his son, the father of three children, whom, however, he was unable to educate as their grandfather had been educated. A kind-hearted watchmaker, seeing that the elder boy had a talent for drawing, tried to give him some instruction in art; but in the end it was decided that François Louis should go to Paris, first of all to earn his living, then, if possible, to pursue his studies in art. He obtained a situation with a publisher named Paulin, where he was boarded and lodged, and in addition received a small salary. His master, Paulin, thinking to promote his interests, introduced him to Thibaudan, son of the Conventionnel, who owned and personally managed some glass-works at Choisy-le-Roy. François went there to paint on glass, and, by force of many privations, he saved in two years five hundred francs. Unfortunately, he put his money into the concern, and, the latter failing, he lost it all. Shipwrecked and thrown penniless on the world, he doubtless thought it a piece of good fortune to be engaged as clerk by M. Buloz, who had just founded the *Revue des Deux Mondes*, and he threw himself with such zeal into his work that M. Buloz promised to give him two thousand francs a year and to promote his interests. But, like many other clever men of business, the publisher of the *Revue des Deux Mondes* was mistaken in supposing that the energy which François displayed originated in the hope of making a good position in the world. When, therefore, his new clerk replied that his one desire was to be a painter, M. Buloz determined to discharge so singular a person, and fill his place with a man of the ordinary way of thinking. François' energetic mind seized another opening which promised support while he rose to higher things. He entered the studio of M. Gigoux to learn the art of drawing on wood and of lithography. Here he worked for the *Magasin Pittoresque* and the *Musée des Familles*, French periodicals which bore a striking resemblance to the noble old *Penny Magazine* and its respectable imitator, the *Saturday Magazine*. François became an able draughtsman on wood, and with Tony Johannot, Meissonier, Charles Jaque, &c., was associated in the illustration of a magnificent edition of "Paul and

Virginia." He also made vignettes for several other works, his illustrations being always distinguished for sincerity, and a certain masterly simplicity of effect and drawing. His ability as a book and magazine illustrator brought François into association with all the eminent painters of the epoch. In 1837, after many hesitations, François ventured, in association with his friend Baron, to send a picture to the Salon, entitled "A Song under the Willows." It was a landscape, with figures in Lombard costume of 1550. In 1841 he exhibited a picture called "An Antique Garden," and obtained a medal. Henceforth he regularly exhibited his landscapes. In 1846 he exhibited the "Grand Jet et St. Cloud," painted in association with Meissonier. It was a great success. Seventeen years of hard, incessant struggle, and the fruit just beginning to appear, how many painters would have had the courage to refuse to gather the harvest because it would interfere with their making further advances in their art? "If," said François, "I remain in Paris, I shall perhaps be lost. I shall let myself be drawn into dissipation, and my style will not improve. Let me go to Italy, the source of art, and try to fathom the methods of the old masters, and give myself up to study without distraction." He accordingly divided all he possessed into two portions, sent one half to his family, and reserved the other half for the expenses of his travels. He remained three years in Italy, making endless studies and sketches. In 1848 he sent two pictures to the Salon and received the Gold Medal. After his return the effect of his sojourn in Italy was apparent, and in 1853 his picture called "The End of the Winter," a view taken at Montoire, was bought for the Luxembourg; and again, in 1855, his picture, "A Path through the Corn," was bought by the State, and he received at the Salon a medal of the first class. In 1857 he painted the picture which in his own opinion is the very best of his works, "A Fine Winter's Day;" and in 1861, "The View taken at Bas Meudon." In 1867, on the occasion of the Exposition Universelle, he exhibited several pictures, and was awarded for the second time the first medal, and made an officer in the Legion of Honour.

FRANCE, President of the Republic of. See CARNOT, MARIE FRANÇOIS SADI.

FRANCILLON, Robert Edward, eldest son of James Francillon, County Court

Judge, was born at Gloucester in 1841, and educated at the Cheltenham College, and at Trinity Hall Cambridge. He was a scholar of that Hall, and graduated in the first class of the Law Tripos of 1862; was called to the Bar at Gray's Inn in 1864, joined the Oxford circuit, and was, during 1867, editor of the *Law Magazine*. His first work of fiction was "Grace Owen's Engagement," which appeared in *Blackwood's Magazine* in 1868. As a novelist he is the author of "Earl's Dene," 1870; "Pearl and Emerald," 1872; "Zelda's Fortune," 1873; "Olympia," 1874; "A Dog and His Shadow," 1876; and "Strange Waters," 1878. He has also contributed several novelettes, shorter tales, and articles to *Blackwood*, the *Gentleman's Magazine*, *All the Year Round*, and other magazines. He was for some time on the staff of the *Globe* newspaper, and in 1872 he re-published, under the title of "National Characteristics: and Flora and Fauna of London," a series of sketches which had originally appeared in that journal. He has written also many well-known songs for music, and is author of the libretti of Mr. F. H. Cowen's cantatas, "The Rose Maiden" and "The Corsair."

FRANCIS FERDINAND of AUSTRIA (Archduke), heir to the Austrian throne, is the son of the Archduke Charles Louis by his second wife, the Princess Maria Annonciata, daughter of Ferdinand II., King of the Two Sicilies, and was born at Gratz in 1863. A few years ago he inherited the large fortune of his relative, the Grand Duke of Modena, and in so doing took the name of Este. On the suicide of the Emperor's son, the Crown Prince Rudolph, on Jan. 28, 1889, the Emperor's brother, the Archduke Charles Louis, became heir to the throne; but he renounced his rights of succession in favour of his son, the Archduke Francis Ferdinand; and he, on becoming heir to the throne, renounced his fortune and name of Este to his brother, the Archduke Otho, who was born in 1865, and married, in 1886, Maria Josepha, daughter of Prince George of Saxony.

FRANCIS II., ex-King of Naples, was born Jan. 31, 1836, and succeeded his father, Ferdinand II., better known by his sobriquet of "Bomba" in 1858. His first act was to liberate Poerio, Settembrini, and other Neapolitans who had been incarcerated for ten years on account of their political opinions. Hopes, at first entertained, that the young king would endeavour to correct the abuses of his father's government,

were not fulfilled. In 1860 an insurrection broke out in Sicily, and Palermo and Messina were bombarded. An expedition, headed by Garibaldi, landed in Sicily, and defeated the Neapolitan army in every encounter; Naples was soon after occupied, and the king, with his queen and family, were compelled to take refuge in the fortress of Gaeta, which, after an obstinate siege of six months, capitulated to the Sardinian troops, Feb. 14, 1861. Francis II. retired to Rome, where he was engaged for some time in organizing fruitless expeditions against the government of the new kingdom of Italy. He married, in 1858, Caroline, daughter of Maximilian-Joseph of Bavaria, and sister to the empress of Austria. The courage displayed by her at the siege of Gaeta was the theme of general admiration in Europe.

FRANCIS-JOSEPH I. (Francis-Joseph-Charles), Emperor of Austria, King of Hungary and Bohemia, &c., was born Aug. 18, 1830, and ascended the throne of Austria, Dec. 2, 1849, on the abdication of his uncle, Ferdinand I. He is the eldest son of the late Archduke Francis-Charles (who stood next to the late Emperor in the legal order of succession, and who died March 8, 1878) and of the Princess Sophia. On ascending the throne he found the empire shaken by internal dissensions; and his first step was to promise a free and constitutional government to the country. The course of events compelled him to close the National Assembly, and to assume absolute power. At the same time he abrogated the Constitution of Hungary, the people being in rebellion against him, and only brought to subjection by the armed intervention of Russia, while he owed his hold on Italy to the skill of his veteran General Radetsky. Having at last obtained internal peace and freedom for governmental and legislative action, he promulgated the edict of Schönbrunn, Sept. 26, 1851, in which he declared the Government "responsible to no political authority other than the throne." Assisted by Prince Schwarzenberg, and after his death by Count Buol and Baron Bach, he centralised the government of his heterogeneous nationalities at Vienna, and, aided by Herr von Brück, inaugurated a series of fiscal and commercial reforms favourable to the interests of the middle classes. In 1853-4 the Emperor endeavoured, though in vain, to induce the Czar Nicholas to abandon his ambitious designs against Turkey, and further excited that auto-

crat's displeasure by refusing to assist Russia against the Western Powers, whose rulers also felt aggrieved because he resolved to remain neutral, and not to throw the weight of his name into their scale. The policy of Austria on this occasion will, however, be more fairly estimated by posterity. Her unwillingness to make common cause with the Western Powers has been severely punished, for had she joined the alliance against Russia in 1854, in all probability Louis Napoleon would not have crossed the Alps and dictated the peace of Villafranca. It is, therefore, more than probable that her reluctance to act against Russia in that war was the cause of her losing Lombardy three years later. The Emperor Francis-Joseph is tall and handsome. At Solferino he gave proof of bravery amounting almost to rashness. The Reichsrath was enlarged by imperial patent March 5, 1860, and the Emperor sanctioned the principle of the responsibility of ministers May 1, 1862. The Convention of Gastein, signed Aug. 14, 1865, which transferred the government of Schleswig to Prussia, and that of Holstein to Austria, was a few days afterwards confirmed by the Emperor and the King of Prussia at Salzburg. The Emperor issued an important manifesto to his people, Sept. 20, in which he expressed very conciliatory intentions towards the people of Hungary and Croatia. In March, 1866, the armaments against Prussia began, and councils of war were established in the circles of Prague, Pisek, Tabor, and Pilsen. An imperial order was issued May 6, placing the whole army on a war footing, and concentrating the Army of the North on the frontiers of Bohemia and Silesia. The Emperor published a manifesto relating to the impending contest, June 17, the Prussian minister having received his passports June 12. The Emperor showed much devotion in the struggle which ensued, and the fortunes of war having been adverse, at once made peace and applied his energies to the difficult task of reconstructing the empire. In this work he was powerfully aided by Count Beust, the late Prime Minister of Saxony, whom he summoned to his councils in Oct., 1866, and who remained in office as his principal minister until Nov., 1870, when he resigned, and was succeeded by Count Andrassy. One of the principal results of the policy pursued by Count Beust was the coronation of the Emperor in Pesth, as King of Hungary, June 8, 1867. In 1878 the Congress of Berlin sanctioned the occupation by Austria of the provinces

of Bosnia and Herzegovina, which had formerly belonged to Turkey. In April, 1854, he married the Princess Elizabeth Amalie Eugénie, daughter of the Duke Maximilian-Joseph, and cousin on her mother's side, to the King of Bavaria, a lady who of recent years has often visited England and Ireland for hunting. In 1857 the Emperor and Empress paid a visit to their Italian and Hungarian dominions, and granted an amnesty to political offenders. In July, 1890, their daughter, the Archduchess Valérie, was married to the Archduke Francis Salvator. The Emperor's only son, the Crown Prince Rudolph, having committed suicide on Jan. 28, 1889, the Emperor's brother, the Archduke Charles Louis, became heir, but he relinquished his rights of succession in favour of his son, the Archduke Francis Ferdinand, who therefore is Heir Apparent.

FRANKLAND, Edward, M.D., D.C.L., LL.D., Ph.D., F.R.S., J.P., born at Churchtown, near Lancaster, Jan. 18, 1825, received his education at the Grammar School, Lancaster; the Museum of Practical Geology, London, and the Universities of Marburg and Giessen. He was appointed Professor of Chemistry in Owens College, Manchester, in 1851; in St. Bartholomew's Hospital in 1857; in the Royal Institution of Great Britain in 1863; in the Royal College of Chemistry (Royal School of Mines), in 1865; and in the Normal School of Science, South Kensington Museum, in 1881. He resigned this Professorship in 1885. Dr. Frankland was elected in 1853 a Fellow of the Royal Society; in 1866 a corresponding Member of the French Academy of Sciences; in 1869 a Foreign Member of the Royal Academy of Sciences in Bavaria, and subsequently of the Academies of Sciences of Berlin, St. Petersburg, Upsala, America, and Bohemia. In 1884 he was made corresponding Member of the Vienna Academy of Sciences. He was nominated one of Her Majesty's Commissioners for inquiring into the pollution of rivers in 1868, elected President of the Chemical Society in 1871, and President of the Institute of Chemistry in 1877. He received the honorary degree of LL.D. of Edinburgh in 1884. He is also Honorary Fellow of the Royal Medico-Chirurgical Society of London. He is the author of "Researches on the Isolation of the Radicals of Organic Compounds, and other Researches in Organic Chemistry," for which he received, in 1857, a gold medal from the Royal Society; also of "Researches on the Manufacture and Puri-

fication of Coal-Gas," on the "Influence of Atmospheric Pressure on the Light of Gas, Candle, and other Flames," on "Winter Sanitariums in the Alps and elsewhere," on "The Purification of Town Drainage and other Polluting Liquids," and on the "Composition and Qualities of Water used for Drinking and other Purposes." He is also the joint author, with Mr. J. Norman Lockyer, of "Researches connected with the Atmosphere of the Sun." In Feb., 1882, he delivered a Friday evening discourse "On Climate in Town and Country," at the Royal Institution of Great Britain, in which he suggested means for artificially producing a genial out-door climate in England. In 1883, and again in 1889, he published in the Proceedings of the Royal Society, "The Chemistry of Electrical Storage Batteries;" and in 1885, in the Journal of the Chemical Society, "On Chemical Changes in their relation to Micro-Organisms." For a period of twenty-five years he has made monthly analyses of the water supplied to London by the various water companies, and has reported thereon to the Local Government Board and the Registrar-General. A check has thus been brought to bear upon the operations of the London water companies, beneficial alike to the companies and the public, the result being that the purity of the water has very materially improved. In 1887 he reported to the International Congress of Hygiene at Vienna on the present state, in England, of the purification of sewage, with special reference to the prevention of river pollution. In the same year he was appointed a Justice of the Peace for the county of Surrey, and, in 1889, for the county of London. His various investigations have been collected in one volume, entitled "Researches in Pure, Applied, and Physical Chemistry." He has published also "Lecture Notes for Chemical Students," 2 vols., and "Water Analysis for Sanitary Purposes."

FRANKS, Augustus Wollaston, F.R.S., F.S.A., born in 1826, was educated at Eton and at Trinity College, Cambridge, where he graduated B.A. in 1849, and proceeded to M.A. in 1852. He is the author of a work on "Ornamental Glazing Quarries," of a treatise on "Vitreoous Art in the Art Treasures of the Manchester Exhibition," and editor of Kemble's "Horae Ferales." He has contributed to the Transactions of various archaeological societies, was elected Director of the Society of Antiquaries in

1858, and is keeper of the department of British and Mediæval Antiquities and Ethnography in the British Museum. Mr. Franks, who is one of the greatest living authorities on many departments of art, especially the arts of the Renaissance, and Oriental Ceramics, has behaved with extraordinary generosity in presenting his magnificent collection of Chinese and Japanese porcelain and pottery, as well as many noble examples of Italian majolica and other wares, to the nation. For some years his Oriental Collection was exhibited at the Bethnal Green Museum. The catalogue of it is, perhaps, the most valuable extant, giving an account of the history of the manufacture. He has, for many years, been Vice-President of the Society of Antiquaries.

FRANZ, Robert, composer, born at Halle, June 28, 1815, the son of a respectable citizen, was for two years a pupil of Schneider, at Dessau. In 1843 he published his first set of twelve songs, which gained for him the notice of Schumann, Mendelssohn, Liszt, and other eminent masters. He was then appointed organist at the Ulrichskirche, and conductor of the Sing-Academie at Halle, and lectured to the students at the university on musical subjects, and the degree of doctor of music was conferred upon him. A series of nervous disorders compelled him, in 1868, to relinquish his appointments and to give up writing altogether. The pecuniary difficulties which arose in consequence were overcome by the exertions of Liszt, Senfft v. Pilsach, Dresel, and others, who in 1872 organised concerts for his benefit, and realized £5,000. Of late years he has devoted much time to editing and arranging the works of Bach and Händel. He has written "Mittheilungen über J. S. Bach's Magnificat," and "Offener Brief an Eduard Hanslick über Bearbeitungen älterer Tonwerke, namentlich Bach'scher und Händel'scher Vocalmusik," and has published various compositions and arrangements, which include two hundred and eighty-six songs for a single voice with pianoforte accompaniment, in forty-five sets.

FRANZOS, Karl Emil, a German author, son of a Jewish doctor, was born Oct. 25, 1848, on the Russo-Austrian frontier. He was brought up in the Polish-Jewish town of Czortkow, and received his early education in the school of the Dominican monastery there. Then he proceeded to the German Gymnasium at Czernowicz, where, from the year 1862, he was wholly

dependent on his own exertions for a livelihood. A proof of the ardour and success with which he devoted himself to the study of the classical languages is his translation of the Eclogues of Virgil into the Doric of Theocritus. Being a Jew, and therefore having no hope of obtaining an appointment, he abandoned philology for jurisprudence. In 1868 he represented, as deputy, the students of Vienna at the Berlin "Kartellkongress of the German Burschenschaften," and he established, in 1869, the German annual in Bukowina "Buchenblätter," a sort of almanac. In 1871 he was concerned in a trial in consequence of an appeal to the students of Graz, being indicted as a rebel. After this affair he passed with distinction his examination for the Government Juridical Service, and practised for a time at the Bar with success, but ultimately he resolved to adopt the career of a professional author. At the outset he took to journalism, first at Vienna and afterwards (1872-73) at Pesth; then he performed long journeys, mostly in the east of Europe, until he was enabled, in 1876, to find his means of subsistence by writing books. His chief power as a writer is found in ethnographical description, especially in the form of romance. Among his works are—"Semi-Asiatic Life: Pictures of Civilisation in Galicia, the Bukowina, South Russia, and Roumania," 3rd ed., 2 vols., 1889; "From the Don to the Danube: New Pictures of Semi-Asiatic Life," 2 vols., 2nd ed., 1889; "From the Great Plain," New Scenes from Western Asia, 2 vols., 1888; "Young Love," three stories, 4th ed., 1884; "The Jews of Barnow," tales, 4th ed., 1886; "Moschko of Parma," the story of a Jewish soldier, 2nd ed., 1885; "Quiet Stories," 3rd ed., 1886; "A Fight for the Right," a novel, 2 vols., 3rd ed., 1884; "My Francis," a novel, in verse, 1882; "The Journey after Fate," a story, 2nd ed., 1885; "Tragic Novels," 1886; "The Shadows," a story, 2nd ed., 1889. Franzos resided at Vienna until 1883; passed the winter, 1883-84, at Berlin; was recalled to Vienna, and conducted the *Neue Illustrierte Zeitung*, 1884-86; since 1887 he resides at Berlin, as editor of the periodical *Deutsche Dichtung*. His works have been translated into almost every European language. The translation of "The Jews of Barnow" and "A Fight for the Right" have attracted special attention in England.

FRASER, Alexander, R.S.A., was born in 1827, at Woodcockdale, near Linlithgow. He got his education in a scrambling

manner in Dunoon, Greenock, Glasgow, Hamilton, and Lanark, in the Grammar School of which latter place he got the bulk of it; where, too, he made his first step in art, stippling the background in the works of an itinerant portrait painter in water colours. But early showing a taste for art, he received his first instruction from his father, who was an able amateur, both with the pencil and the brush, and in oil and water colours. On leaving school he was sent to Edinburgh to draw in the Gallery of Arts. Shortly afterwards he was admitted to the School of Designs, where he learned to draw. At the same time he learned to paint by copying pictures in the National Gallery. His first appearance in the Academy Exhibition was with a figure picture, "A Gipsy Girl in Prison." But he soon abandoned the figure for landscape. He has made many sketches, and painted many pictures. Generally his works are painted in the open air, though to this there are important exceptions. Mr. Fraser was elected R.S.A. in 1862.

FRASER, Alexander Campbell, D.C.L., LL.D., Professor of logic and metaphysics in the University of Edinburgh, was born in Sept., 1819, at Ardhattachan, co. Argyll, of which parish his father was minister, his mother being a sister of Sir Duncan Campbell, of Barcaldine, in the same county. He was educated at the Universities of Glasgow and Edinburgh, and in 1842 obtained the Edinburgh University prize for an essay on "Toleration." He early devoted himself to philosophy and literature. In 1850 he became editor of the *North British Review*, which he conducted till 1857. In the previous year he entered on the duties of his present chair, as successor to Sir William Hamilton. Since 1859 he has also held the office of Dean of the Faculty of Arts, and taken an active part in matters of University reform. In 1871 he was one of the examiners in the Moral Science Tripos of the University of Cambridge. In the same year he received the honorary degree of Doctor of Laws from the University of Glasgow. Since 1872 he has often acted as Examiner in Moral Science and Logic at the India Civil Service Examinations. In 1877 he was chosen to represent the *Senatus Academicus* in the Edinburgh University Court, an office which he still holds. In 1882 he was elected a member of the Athenæum Club without ballot, for eminence in literature and philosophy. At Commemoration in June, 1883, he was created an honorary D.C.L. of the Uni-

versity of Oxford. In the course of the last thirty years Professor Campbell Fraser has contributed numerous articles, chiefly philosophical, educational, and biographical, to the *Encyclopædia Britannica*, the *North British Review*, *Macmillan's Magazine*, *Mind*, and other periodicals and encyclopædias. In 1856 he published "Essays in Philosophy," and in 1858 "Rational Philosophy." In 1871 he produced a "Collected Edition of the Works of Bishop Berkeley, with Dissertations and Annotations," in 3 vols.; and in the same year a "Life of Bishop Berkeley, with an Account of his Philosophy." These were followed in 1874 by "Selections from Berkeley, with a Historical Introduction," and in 1881 by a monograph on "Berkeley," in Blackwood's *Philosophical Classics*, both of which have passed through several editions. In 1886 he prefixed a Preface to Russell's "Reminiscences of Yarrow." His latest contribution to philosophical literature is a volume on "Locke," in 1890, introductory to the philosophy of Europe as affected by the "Essay on the Human Understanding."

FRASER, Lieut.-Gen. Charles Craufurd, F.C., C.B., M.P., born in Dublin, Aug. 31, 1829, is a son of the late Lieut.-Col. Sir J. J. Fraser, Bart. He was educated at Eton, and in 1847 joined the 7th Hussars, becoming Captain, 1854, and Major-General, 1877, after having commanded the 11th (Prince Albert's Own) Hussars for eleven years. He served with great distinction during the Indian Mutiny, and was severely wounded in one action. On Dec. 31, 1853, he rescued an officer and men from drowning in the River Raptée by swimming to them under a sharp fire. For this he was mentioned in despatches as having shown "conspicuous gallantry," and received, in addition to the Victoria Cross, the Royal Humane Society's first-class medal. In 1868 he served throughout the Abyssinian Campaign as Commandant at Head-quarters, and in charge of the outposts, and obtained a C.B. He has since been A.D.C. to H.R.H. the Commander-in-Chief, Inspector-General of Cavalry in Ireland and in Great Britain, and for four years Commander of the Curragh. He now represents North Lambeth in Parliament in the Conservative interest.

FRASER, The Rev. Donald, M.A., D.D., was born at Inverness, Jan. 15, 1826. His father was Provost of the Burgh. His mother was of the Frasers of Kirkhill. He was educated for the most part by private tutors, till he entered the University of

Aberdeen. After five years' study he took the degree of Master of Arts at an unusually early age. He afterwards studied Divinity at Knox College, Toronto, and the New College, Edinburgh. In 1872 he received the degree of Doctor in Divinity from the University of Aberdeen; and was ordained in 1851, and inducted into the charge of a congregation at Montreal. In 1859 he was transferred to the Free High Church in his native town of Inverness. In 1870 he accepted a call to the Marylebone Presbyterian Church, in Upper George Street, Bryanston Square. For the past twenty years he has taken a leading part in the Presbyterian Church of England, and has twice been Moderator of the Synod. He is a Vice-President of the British and Foreign Bible Society, and prominently connected with many missions and charities. Within the last fifteen years he has published "Synoptical Lectures on the Books of Holy Scripture," 4th ed., 2 vols.; "Metaphors in the Gospels;" "Seven Promises Expounded;" "Speeches of the Holy Apostles," 2nd ed.; "The Church of God and the Apostasy." Also, in biography, "Thomas Chalmers, D.D.," and "Mary Jane, Lady Kinnaird." He has likewise contributed to the *Pulpit Commentary*, and to various Reviews.

FRASER, Professor Thomas Richard, M.D., F.R.S., was born at Calcutta, on February 5, 1841, and was educated at Public Schools in Scotland and in the University of Edinburgh, where he graduated as M.D. in 1862. In the following year, he was appointed Assistant to the Professor of Materia Medica in the University of Edinburgh. In 1869, he became Assistant-Physician to the Royal Infirmary, and in 1870, extra-academical Lecturer on Materia Medica in Edinburgh, and Examiner in this subject in the University of London. Four years subsequently, he resigned his Edinburgh appointments on being elected Medical Officer of Health for Mid-Cheshire. While holding this office, he was appointed Examiner in Materia Medica in the University of Edinburgh, and on the invitation of the Senate of the University of London, Examiner in Public Health in that University. In 1877, he returned to Edinburgh to assume the duties of Professor of Materia Medica, to which office he was promoted on the resignation of Sir Robert Christison. In the following year, he became also a Professor of Clinical Medicine, and in 1880 Dean of the Faculty of Medicine. Along with these University appointments, he holds that of Chief Medical Adviser of the Standard Life Assurance Company.

He is a Fellow of the Royal Society, a Fellow of the Royal College of Physicians of Edinburgh; an Honorary member of the Pharmaceutical Society of Great Britain; a Corresponding member of the Therapeutical Society of Paris, and of the Academy of Natural Sciences of Philadelphia; and a member of many other learned societies. In 1877, he was appointed one of the two Medical members of the Admiralty Committee to report on the causes of Scurvy in Sir George Nares's Arctic Expedition; and he was President of the Section of Materia Medica and Pharmacology at the International Medical Congress held in London in 1881, and President of the Section of Materia Medica and Therapeutics at the meeting of the British Medical Association in 1885. Dr. Fraser is the author of "Characters, Actions, and Therapeutic Uses of Physostigma Venenosum" (awarded a Thesis Gold Medal by the University of Edinburgh, and the Barbier Prize of the Academy of Sciences of Paris), *Edinburgh Medical Journal*, 1863; "The Physiological Action of Physostigma Venenosum," *Trans. Roy. Soc. Edin.*, 1866-67; "On the Connection between Chemical Constitution and Physiological Action" (conjointly with Professor Crum Brown), *Trans. Roy. Soc. Edin.*, 1868-69 (awarded the Macdougall-Brisbane prize of the Royal Society of Edinburgh); "An Investigation into some previously undescribed Tetanic Symptoms produced in Cold-blooded Animals by Atropia," *Trans. Roy. Soc. Edin.*, 1868-69; "An Experimental Research on the Antagonism between the Actions of Physostigma and Atropia," *Trans. Roy. Soc. Edin.*, 1870-71; "The Dyspnoea of Asthma and Bronchitis; its Causation, and the Influence of Nitrites upon it," *American Journ. of the Med. Sciences*, 1887; "Strophanthus hispidus; its Natural History, Chemistry, and Pharmacology," *Trans. Roy. Soc. Edin.*, 1889; and of many papers on Clinical Medicine, Therapeutics and the physiological action of medicinal substances. His work has been chiefly in the direction of determining the physiological effects of medicinal substances, with the view of establishing an accurate and rational basis for the treatment of disease.

FRECHETTE, Louis, LL.D., a French Canadian *littérateur* and journalist, was born at Levis, opposite Quebec, Nov. 16, 1839. He received his education at the Quebec Seminary and at the College of Nicolet. He studied law, and was called to the Bar of Lower Canada in 1864. He became a voluminous contributor to the newspaper press of the French province,

and edited successively *Le Journal de Quebec* and *Le Journal de Levis*. In 1862 he published a collection of poems, under the title of "Mes Loirs." In 1866 he settled in Chicago, where he published a French paper called *L'Amérique*, and was foreign correspondent in the land department of the Illinois Central R. R. Co. He returned to Quebec in 1871, and entered political life, representing his native county of Levis in the Dominion Parliament from 1874 to 1878. Since then he has published five additional collections of poems, entitled respectively "Pêle-Mêle," "Les Fleurs Boréales," "Les Oiseaux de Neige," "La Légende d'un Peuple," and "Les Feuilles Volantes," and also a poem on "J. B. de La Salle." While at Chicago he had also published another poem, called "La Voix d'un Exilé." "Les Oiseaux de Neige" and "Les Fleurs Boréales" were crowned by the French Academy at Paris in Aug., 1880. For a few years he was chief editor of *La Patrie*, Montreal, and now (1890) occupies the clerkship of the Legislative Council, Province of Quebec. He has received the degree of LL.D. from three different Universities, and is known as the "national poet" of French Canada.

FREDERICK, The Empress (Victoria Adelaide Mary Louisa, the Princess Royal of England), was born Nov. 21, 1840, and was married to the late Emperor Frederick III. of Germany on January 25, 1858, and has seven children, of whom the eldest is the present Emperor, William II.

FREDERICK WILLIAM LOUIS, Grand Duke of Baden, born Sept. 9, 1826, succeeded his father, the Grand Duke Leopold, as Regent, April 24, 1852, to the exclusion of his elder brother Louis, who was mentally incapable of governing. Since 1853 he has been continually engaged in struggles with the ecclesiastical power, and at the end of 1855 banished the Jesuits from the duchy. In Sept., 1856, he had a narrow escape from assassination. He assumed the title of Grand Duke Sept. 5, 1856, and married the daughter of the Emperor William I. of Germany, Sept. 20. An ardent advocate of German unity, he became an ally of Prussia in the Franco-German war (1870-71), and the Badense soldiers contributed in no small degree to the triumph of the German arms. In 1886 he presided at the great quinqucentenary festival of the University of Heidelberg.

FREEMAN, Professor Edward Augustus, D.C.L., LL.D., of Somerleaze, Wells,

Somerset, son of the late John Freeman, Esq., of Pedmore Hall, Worcestershire, was born at Harborne, Staffordshire, in 1823. He was elected Scholar of Trinity College, Oxford, in 1841; Fellow in 1845; Honorary Fellow, 1880; filled the office of Examiner in the School of Law and Modern History in 1857-8 and in 1863-4; and in the School of Modern History in 1873; became Regius Professor of Modern History and Fellow of Oriel, 1884. He was created honorary D.C.L. by the University of Oxford at the installation of the Marquis of Salisbury in 1870; and honorary LL.D. by the University of Cambridge in 1874; honorary member of the Imperial University of St. Petersburg, 1877; honorary LL.D. of the University of Edinburgh, 1884. He is also a Knight Commander of the Order of the Redeemer of Greece (1875), of the Order of Danilo of Montenegro, and of the Order of Takova of Serbia; and Knight of the Second Class of the Order of St. Saba; Corresponding Member of the Imperial Academy of Sciences of St. Petersburg, of the Royal Academies of Lincei of Rome, of Munich, Copenhagen, and Belgrade, of the Royal Societies of Massachusetts, Maryland, Pennsylvania, &c., of the Greek Historical and Ethnological Society, and of the Genevise Institute of Sciences, Letters and Fine Arts. He was an unsuccessful candidate for Mid-Somerset in 1868. On May 24, 1872, he delivered the Rede lecture at Cambridge, the subject being "The Unity of History." He has written much on historical, political, and architectural subjects, and is the author of "A History of Architecture," 1849; an "Essay on Window Tracery," 1850; "The Architecture of Llandaff Cathedral," 1851; "The History and Conquests of the Saracens," 1856; "The History and Antiquities of St. David's,"—the latter conjointly with Dr. Basil Jones, the present Bishop of St. David's; "History of Federal Government," of which the first volume appeared in 1863; "History of the Norman Conquest," of which the five volumes appeared in 1867-76; "Old English History," 1869; "History of the Cathedral Church of Wells," 1870; "Growth of the English Constitution," 1872; "General Sketch of European History," 1872; "Historical Essays," 3 series, 1872-9; "Comparative Politics," 1873; "Disestablishment and Disendowment, what are they?" 1874; "Historical and Architectural Sketches, chiefly Italian," 1876; and "The Ottoman Power in Europe, its Nature, its Growth, and its Decline," 1877; followed by "Sketches from the Subject and Neigh-

bouring Lands of Venice," "The Historical Geography of Europe," 2 vols., 1881; "The Reign of William Rufus, and the Accession of Henry I.," 2 vols., Oxford, 1882; "Some Impressions of the United States," "English Towns and Districts," and "Lectures to American Audiences," 1883; "Methods of Historical Study," 1885; "Chief Periods of European History," 1886; "Greater Greece and Greater Britain," and "George Washington," 1888.

FREMANTLE, The Hon. Sir Charles William, K.C.B., was born at Swanbourne, Bucks, on Aug. 12, 1834, and is the third son of the late 1st Lord Cottesloe (who was M.P. for Buckingham, 1827-46, and held the offices of Secretary of the Treasury, Secretary of War, and Chief Secretary for Ireland, and was subsequently, 1846-74, Chairman of the Board of Customs. He died while these pages were passing through the press, Dec. 3. 1890), and his wife Louisa Elizabeth, daughter of Field Marshal Sir George Nugent, G.C.B. She died in 1875. Sir Charles William Fremantle was educated at Eton; appointed a Clerk in the Treasury, April, 1853, and was Private Secretary successively to Sir William Hayter, Sir William Hylton Jolliffe, and the Hon. Henry Brand (afterwards Speaker of the House of Commons and Viscount Hampden), Parliamentary Secretary of the Treasury. He was appointed, in 1866, Private Secretary to Mr. Disraeli, who was then Chancellor of the Exchequer and subsequently, in 1868, First Lord of the Treasury. In 1867-68 he was Secretary to the Boundary Commission appointed by the Representation of the People Act, 1867, of which Viscount Eversley was the Chairman. In 1868 he was appointed Deputy-Master and Comptroller of the Royal Mint; and in 1870 was constituted principal executive officer of that department, the Mastership of the Mint having by the Coinage Act of that year been vested in the Chancellor of the Exchequer for the time being. He was appointed, in 1876, a Member of the Playfair Commission, to inquire into the constitution and management of Public Departments, and in 1886 a Member of the Royal Commission on Gold and Silver, which has recently reported on the question of bimetallicism. Since Sir Charles Fremantle has been in charge of the Mint, annual reports have been issued by that department, giving full information, not only as to the coinage of the United Kingdom, but also as to the coinage and currency of other nations.

FREMANTLE, The Hon. and Rev. William Henry, M.A., is the second son of the late Lord Cottesloe, and was born in 1831. He was educated at Eton and at Balliol College, Oxford; obtained a first-class in classics in 1853, gained the prize for the English Essay in the following year, and was Fellow of All Souls' from 1855 to 1863. He was Curate of Middle Claydon, Bucks, from 1855 to 1857, and Vicar of Lewknor, Oxfordshire, from the latter date till 1865, when he was appointed by Earl Russell to the rectory of St. Mary's, Bryanston Square, Marylebone. From 1878 to 1880 he was Select Preacher at Oxford. In 1882 he was chosen Bampton Lecturer at Oxford, and later in the same year he was appointed by Dr. Tait, Archbishop of Canterbury—one of whose Chaplains he had been since 1861—to the canonry residentiary in Canterbury Cathedral. Latterly Canon Fremantle has accepted the position of Fellow and Theological Tutor of Balliol College. He has written or edited "Ecclesiastical Judgments of the Privy Council," 1865; articles in the *Contemporary Review*, 1866-82; and "The Doctrine of Reconciliation to God through Jesus Christ;" "The Gospel of the Secular Life" (University Sermons); "The World as the Subject of Redemption" (Bampton Lectures); "A Pleading against War from the Pulpit of Canterbury Cathedral;" "Church Reform," in the Imperial Parliamentary Series; and Articles on St. Jerome, &c., in the Dictionary of Ecclesiastical Biography.

FRENCH, The Right Rev. Thomas Valpy, D.D., Bishop of Lahore, born about 1825, was educated at University College, Oxford, where he graduated B.A. as a first-class in classics (1846), and was elected to a Fellowship. He was Principal of the Church Missionary Divinity School at Lahore, in the Punjab, 1850-74; Vicar of St. Paul's, Cheltenham, 1865-69; Vicar of Erieth, 1874-75; and Rector of St. Ebbe, Oxford, 1875-77. On the creation of the bishopric of Lahore he was appointed by the Crown to be first occupant of that See, and was consecrated thereto in Westminster Abbey, Dec. 21, 1877.

FREPPPEL, Monseigneur Charles Émile, Bishop of Angers, was born at Obernai (Bas Rhin), June 1, 1827, and after being admitted to holy orders was appointed Professor of Sacred Eloquence in the theological faculty in Paris, where he soon became noted as a teacher, writer, and preacher. He was for some years an honorary canon of Notre Dame; preached the Lent "conferences" in the chapel of

the Tuileries in 1862; was appointed Dean of the Church of St. Geneviève in 1867; and was summoned to Rome in Aug., 1869, to assist in making the preliminary arrangements for the Vatican Council. By an imperial decree dated Dec. 27 in that year he was appointed Bishop of Angers; and he was preconised in the consistory of March 21 following, and consecrated at Rome, March 18, 1870. He was returned as Deputy for Brest, in the Legitimist interest, at the general election of Aug., 1881, and again in 1885. Monseigneur Freppel, who is decorated with the Legion of Honour, has published—"Les Pères Apostoliques et leur Époque," 1850; "Les Apologistes Chrétiens au deuxième Siècle," two series, 1860; "Saint Irénée et l'Eloquence Chrétienne dans la Gaule aux deux premiers Siècles," 1861; "Examen Critique de la ' Vie de Jésus ' de M. Renan," 1863, an admirable work, which has passed through numerous editions; "Conférences sur la Divinité de Jésus Christ," 1863; "L'Oraison Funèbre du Cardinal Morlot, Archevêque de Paris," 1863; "Tertullien," 2 vols., 1864; "Saint Cyprien et l'Eglise d'Afrique au troisième Siècle," 1865; "Clément d'Alexandrie," 1865; "Examen Critique des 'Apôtres' de M. Renan," 1866; "Panégyrique de Jeanne d'Arc, prononcé dans la Cathédrale d'Orléans à la fête du 8 Mai, 1867," 1867; "Origène," 1868; and "Discours et Panégyriques," 1869. He has contributed extensively to the *Monde* newspaper.

FRÈRE-ORBAN, Hubert Joseph Walther, a Belgian statesman, born at Liège, April 24, 1812, was called to the Bar of his native city, and soon acquired a high reputation among the Liberal party there, who returned him to the Belgian Chamber as their representative in 1847. He was Minister of Public Works and then Minister of Finance in that year; and began the reform of the Corn Laws in Belgium, before Sir Robert Peel reformed the Corn Laws in England. He was again Finance Minister from 1848 to 1852, being in the interval between the two administrations Minister of Public Works. He again became Finance Minister in 1861, was soon afterwards appointed President of the Council, and once more received the portfolio of Finance when the new Government was formed in Jan., 1868. The principal event during that administration was the attempt of France to obtain for a French company the management of the Luxemburg lines. The difference was amicably settled in 1869. M. Frère-Orban resigned his portfolio in 1870,

when the Catholic Ministry came into office. On the return of the Liberals into power in June, 1878, he was appointed head of the Cabinet with the portfolio of Foreign affairs, but was displaced after the General Elections of 1884, when a Catholic majority was returned. Thus M. Frère-Orban has been a Cabinet Minister (with but short intervals) for nearly half-a-century; he was the founder of the Banque Nationale, and of the Caisse d'Épargne, and, during his various administrations, much has been done to advance the country; octrois have been abolished; education has been extended; the salt tax repealed; the great camp on the Escaut, which ensures a free landing to Belgium's ally, has been established; and many laws passed for the regulation of labour, and for promoting the welfare both of capitalists and of workmen. The Emperor of Austria conferred on him, in May, 1881, the Grand Cross of the Order of St. Stephen.

FREYCINET, Charles Louis de Saulces de. See DE FREYCINET.

FREYTAG, Gustav, German author, born at Kreuzburg, in Prussian Silesia, July 13, 1816, was educated at the College of Oels, and the universities of Breslau and Berlin, obtaining the degree of Doctor of Philosophy in 1838. In 1847 he married, gave up his academical appointment and went to Dresden, and afterwards to Leipzig, where, in conjunction with Julian Schmidt, he established a journal called *The Messenger of the Frontier* ("Grenzboten"), of which he became the principal editor (1848-70). Previous to this he had made his first essay as an author by publishing a volume of poems entitled "In Breslau," 1845, which was followed by "Die Brautfahrt, oder Kuntz von der Rosen," an historical comedy, 1845; two dramas, "Valentine," 1847; "Count Waldemar," 1848; "The Journalists," a comedy, 1854; "Die Fabier," a tragedy, 1859. His novel, entitled "Soll und Haben," the 35th edition of which was published in 1889, at once obtained for him a prominent position among German writers of fiction. His more recent works are "Bilder aus dem Leben des Deutschen Volkes," 8vo, Leipzig, 5 vols., 1862-69, 15th edit., 1889, "Die Verlorene Handschrift," 8vo, Leipzig, 1864, 19th edit., 1889; "Die Ahnen," a series of stories illustrating German history from the earliest times; "Die Technik des Dramas," the "Life of Karl Mathy," "Doctor Luther," 1883. Some of these works have been translated into English by Mrs. Malcolm.

FRIEDLÄNDER, Dr. Michael, was born on April 29, 1833, at Introschin, a small town in Prussia, province of Posen, where he remained during his childhood and youth. He left the place (after the great events of 1848) in 1851, to continue his studies in the capital of Prussia. He first studied under Beller-mann, until 1856, when he finished his training, and matriculated a student at the Berlin University. He there attended the lectures of Professors Trendelenburg, Boekh, Hengstenberg, Benary, &c., and also studied Hebrew theology under the Rabbis, I. Oettinger and E. Rosenstein. Dr. Friedländer graduated at Halle in 1862, his dissertation being "De Persarum Regibus veteribus." He subsequently obeyed a summons to Berlin to become the Director of the Institute for the teaching of the Talmud of the Talmud Association of that city. In 1865 he left Berlin to become Principal of the Jews' College, a post which he still holds. Dr. Friedländer is a member of the Committee of the Society of Hebrew Literature. Under its auspices he has published: "The Commentary of Ibn Esra on Jesaiah, edited from MSS. and translated with Notes, Introductions, and Glossary" (1873-77); "The Book of Jesaiah, the Anglican Version, emended according to the Commentary of Ibn Esra," "The Hebrew Text of Ibn Esra's Commentary on Jesaiah, edited according to MSS., and accompanied by a Glossary, with Short Dissertations on Subjects connected with the Commentary" (1874); "Essays on the Writings of Abraham Ibn Esra" (1877); "The Guide of the Perplexed of Maionides, translated from the Original Text, and Annotated" (1881); "The Jewish Family Bible, containing the Pentateuch, the Prophets, and the Hagiographa, Hebrew and English" (1882); "Spinoza, His Life and Philosophy" (two papers read before the Jews' College Literary Society), 1888; "The Design and the Contexts of Ecclesiastes," in the *Jewish Quarterly Review*, 1888, vol. i., No. 1; "The Age and the Authorship of Ecclesiastes," in the *Jewish Quarterly Review*, 1888, vol. i., No. 4; "Test-Book of Jewish Religion," and "The Jewish Religion," 1890.

FRITH, William Powell, retired R.A., born in 1891, at Studley, near Ripon; lost his father while young. In 1835 he entered the Art Academy, conducted by Mr. Sass, where he continued for three years, studying drawing and composition; in 1839 he exhibited, at the British Institution, a portrait of one of the children of his preceptor. This was followed in 1840 by

"Othello and Desdemona," and "Malvolio before the Countess Olivia," exhibited at the Academy the same year; and in 1841 by his "Parting Interview between Leicester and Amy Robsart." In 1842 he exhibited at the British Institution a sketch from Sterne's "Sentimental Journey," and contributed to the Exhibition a scene from the "Vicar of Wakefield," representing Olivia and the Squire trying to ascertain which was the taller. Three years later he contributed the well-known picture of the "Village Pastor," which was the means of placing him on the roll of Associates of the Royal Academy. After becoming A.R.A., Mr. Frith almost entirely discontinued his contributions to the British Institution, except in 1852, when he sent a small female portrait, entitled "Wicked Eyes." In 1847 he produced his large picture of "English Merrymaking a Hundred Years Ago." His picture of 1849, entitled "Coming of Age," was in the same vein, and was a great popular success. Mr. Frith continued to exhibit, and in 1852 he was elected R.A. A number of Shakespearian and other pictures followed, and in 1854 his "Life at the Sea-side" was bought by the Queen. The famous picture "The Derby Day" (now in the National Gallery) was exhibited at the Academy in 1858. For the next four years Mr. Frith did not exhibit much, being occupied in painting the large picture of the "Railway Station." He exhibited at the Academy in 1865, "The Marriage of their Royal Highnesses The Prince of Wales and the Princess Alexandra of Denmark, in St. George's Chapel, Windsor, March 10, 1863" (painted for the Queen); and in 1868, "Before Dinner at Boswell's Lodgings in Bond Street," 1769, which work was sold in 1875 for £4,567, which, up to that date, was the highest price ever given at auction for any picture during the artist's lifetime. Since that time Mr. Frith has constantly exhibited both illustrations of literature and pictures after the manner of his old successes, "The Railway Station," &c. Of these, "The Private View of the Royal Academy" (1881), has been the most ambitious. His Hogarthian series "The Road to Ruin" (1878), is also well known. Mr. Frith published his "Autobiography" in 1887, and "Further Reminiscences" in 1888. He is a member of the Academies of Vienna, Belgium, and Sweden. By his own desire, he was placed on the list of retired Royal Academicians, in 1890.

FROST, Percival, D.Sc., F.R.S., the son of Charles Frost, F.S.A., Solicitor, Hull, was born Sept. 1, 1817, and was edu-

cated at Beverley, Oakham, and at Cambridge, where he was Second Wrangler and First Smith's Prizeman, 1839; Fellow of St. John's College, 1839-41; Mathematical Lecturer at Jesus College from 1847 to 1859; Mathematical Lecturer at King's College, Cambridge, from 1859 to 1889; Fellow of King's, 1882; and was elected Fellow of the Royal Society in the same year. He is the author of treatises "On Curve Tracing," "On Solid Geometry," and "On the First Three Sections of 'Newton's Principles,'" also of numerous papers in *Cambridge Mathematical Journal*, *Oxford and Cambridge Journal of Mathematics*, and the *Quarterly Journal of Mathematics*.

FROST, Thomas, born in 1821, at Croydon, was formerly in business there as a printer, but retired in 1848, and adopted the literary profession. He participated actively in the Chartist agitation, and was one of the delegates to the Reform Conference at St. Martin's Hall in 1852. He was a contributor to Chambers's "Papers for the People," and in 1854 editor of the *Magazine of Art*. He was a leader-writer for the *Birmingham Journal* for several years from 1855, and subsequently for the *Liverpool Albion* and the *Shrewsbury Chronicle*, down to 1872. He was editor of the *Gentleman's Journal*, in that and the preceding year. Mr. Frost is the author of "Half-Hours with Early Explorers," 1873; "The Old Showmen and the Old London Fairs," 1874; "Circus Life and Circus Celebrities," 1875; "Lives of the Conjurors," "Life of Thomas Lord Lyttelton," and "Secret Societies of the European Revolution," 2 vols., 1876; "Forty Years' Recollections," and "In Kent with Charles Dickens," 1880; "Modern Explorers," 1882; and several stories of adventure for boys. He became editor in 1881 of the *Sheffield Evening Post*, in 1882 of the *Barnsley Times*, and in the following year of the *Barnsley Independent*.

FROTHINGHAM, Octavius Brooks, was born at Boston, Massachusetts, Nov. 26, 1822, and graduated at Harvard, 1843. He studied theology at the Cambridge Divinity School, and in 1847 was ordained and settled as pastor over a Unitarian church in Salem, Massachusetts. In 1855 he removed to Jersey City in New Jersey. In 1859 he went to New York, where he was the minister of an independent religious society until 1879, when he went to Europe. On his return, in 1881, the society was dissolved; and he formally withdrew from any specific church connection, went to Boston, and has since de-

voted himself exclusively to literary work. He has written largely for journals and reviews, has published more than 150 sermons and discourses, and is the author of "Stories from the Lips of the Teacher," 1863; "Stories from the Old Testament," 1864; "Renan's Critical Essay's" (translated, 1864); "The Child's Book of Religion," 1871, "The Religion of Humanity," 1872; "Life of Theodore Parker," 1874; "The Safest Creed," 1874; "Beliefs of the Unbelievers," "Knowledge and Faith," "Transcendentalism in New England," 1876; "The Cradle of Christ," "The Spirit of the New Faith," and "Creed and Conduct," 1877; "Life of Gerrit Smith," and "The Rising and Setting Faith," 1878; "Visions of the Future," and "The Assailants of Christianity," 1879; "George Ripley," 1882; "W. H. Channing," 1885; and "Boston Unitarianism from 1820 till 1850," now in the press (1890). He was for a time art critic of the *New York Tribune*, was a frequent contributor to the *Index*, the organ of free religion, and wrote a large number of the articles in Johnson's "Universal Cyclopædia," 1874-77.

FROUDE, James Anthony, LL.D., youngest son of the late Venerable R. H. Froude, archdeacon of Totnes, born at Dartington, Devonshire, April 23, 1818, was educated at Westminster and at Oriel College, Oxford, where he graduated in 1840, taking a second-class in classics, and he proceeded M.A. in due course. In 1842 he carried off the Chancellor's Prize for an English Essay on "The Influence of the Science of Political Economy on the Moral and Social Welfare of the Nation;" and in the same year he became a Fellow of Exeter College. He was ordained a deacon in the Church of England in 1844. For some time he was connected with the High Church party under Rev. J. H. Newman, and wrote "The Lives of the English Saints." Under the pseudonym of "Zeta" he published, in 1847, a volume entitled "Shadows of the Clouds," which comprised two stories—"The Spirit's Trials," and "The Lieutenant's Daughter." His "Nemesis of Faith" appeared in 1848, and reached a second edition in the following year. It marked his defection from the teaching of the Church of England, against whose reference for what he called the "Hebrew Mythology," it is, *inter alia*, a protest. Both these works were severely condemned by the University authorities. About this time Mr. Froude resigned his Fellowship, and he was obliged to give up an appointment which he had received to a teachership in Tasmania. For two or

three years he wrote almost constantly for his *Westminster Review*. One of his articles on the Book of Job has been reprinted in a separate form, 1854. In 1856 he published the first two volumes of his "History of England from the Fall of Wolsey to the Defeat of the Spanish Armada," which has been continued from time to time, vols. 11 and 12 having been published in 1870, concluding the work. The materials for this history are mainly derived from the public documents of the time; and the boldness and originality of the author's views have attracted much attention. One of the most marked features of the work is an elaborate attempt to vindicate the reputation of Henry VII. His "Short Studies on Great Subjects" appeared in 1867, being reprints of essays which had appeared in various periodicals. Mr. Froude was installed Rector of the University of St. Andrews, March 23, 1869, on which occasion the degree of LL.D. was conferred upon him. For a short time he was editor of *Fraser's Magazine*, but he resigned that position in Aug., 1871. On Sept. 21, 1872, taking advantage of the Clerical Disabilities Act, he executed a deed of relinquishment of the office of deacon. In the autumn of 1872 Mr. Froude went to the United States, where he delivered a series of lectures on the relations between England and Ireland. The burden of his addresses was that Irishmen had themselves, to a large extent, caused their country's prostration by their own intestine jealousies and want of patriotism. An animated controversy ensued between him and Father Thomas Burke, the Dominican orator. At the close of the year 1874, Mr. Froude was sent by the Earl of Carnarvon, Secretary of State for the Colonies, to the Cape of Good Hope, to make inquiries respecting the late Caffre insurrection, and he returned to London in March, 1875. His later works are "The English in Ireland in the Eighteenth Century," 3 vols., 1871-74; "Cæsar: a sketch," 1879; and "Reminiscences of the High Church Revival," a series of papers in *Good Words* (1881). Having been appointed executor to Thomas Carlyle, he published his "Reminiscences," 2 vols., 1881; the first part of his biography, "Thomas Carlyle: a history of the first forty years of his life," 1882; "Reminiscences of his Irish Journey in 1849," 1882; and "Oceana" (1886), an account of a voyage to Australia and elsewhere. In 1888 he published "The English in the West Indies; or, The Bow of Ulysses;" in 1889 "The Two Chiefs of Dunboy," an Irish romance of the last century; and, in 1890, a "Life of Lord Beaconsfield."

FRY, The Right Hon. Sir Edward, P.C., F.R.S., second son of the late Mr. Joseph Fry, of Bristol, by Mary Anne, daughter of the late Mr. Edward Swaine, of Reading, was born at Bristol, Nov. 4, 1827, and educated at the College, Bristol, and at University College, London, of which he is a Fellow. He graduated B.A. at the University of London in 1851, taking honours in classics and animal physiology. In 1855 he was appointed by the Crown a Member of the Senate of the University of London. He was called to the Bar at Lincoln's Inn in 1854; in 1869 he received a silk gown; and in April, 1877, he was appointed a Judge of the High Court of Justice. On the latter occasion he received the honour of knighthood. In April, 1883, he was appointed by Mr. Gladstone to the vacant Lord Justiceship of Appeal, caused by the elevation of Lord Justice Brett as the Master of the Rolls. He is a Privy Councillor, and a Bench of Lincoln's Inn, and has been an Examiner in Law to the University of London and the Council of Legal Education. He is a F.R.S., F.S.A., and F.L.S. He is the author of "A Treatise on the Specific Performance of Contracts, including those of Public Companies," 1858; and of some theological works, including "The Doctrine of Election," 1864; "Essays on the Accordance of Christianity with the Nature of Man," Edinburgh, 1867; and "Darwinism and Theology," 1872, a reprint of letters in the *Spectator*. He married, in 1859, Mariabella, daughter of the late Mr. John Hodgkin, barrister-at-law, of Lewes.

FULLER, Melville Weston, LL.D., American jurist, was born at Augusta, Maine, Feb. 11, 1833. He graduated from Bowdoin College in 1853, studied law and began its practice in Augusta in 1855. For a short time he was one of the editors of the *Age*, and President of the Common Council. He became City Attorney in 1856, but resigned that office on his removal to Chicago in June of the same year. There he rose to the highest rank in his profession, and was connected with many important cases. He was a Member of the Illinois Constitutional Convention in 1862; of the lower branch of the State Legislature from 1863 to 1865; and was a Delegate to the Democratic National Conventions of 1864, 1872, 1876, and 1880. In 1888 President Cleveland nominated him Chief Justice of the United States (the highest judicial position in America), and on Oct. 8 of that year he entered upon the duties of that office. Both the North-western University and Bowdoin College con-

ferred the degree of LL.D. upon him in 1888.

FURNISS, Harry, a caricature artist, was born March, 1854, at Wexford, Ireland, of English parents. His father was an engineer, his mother, the daughter of the well-known Newcastle-on-Tyne author, publisher, and politician, Eneas MacKenzie, the founder of the Joseph Cowen political school of that place. He was educated in Dublin, and began drawing for periodicals and magazines at a very early age. Mr. Furniss came to London at the age of 19, and has ever since been constantly engaged in illustrating. For many years he was a regular contributor to the *Illustrated London News*, mostly depicting the lighter side of every-day life, but occasionally acting as a serious "special" for that paper. In the latter capacity he made a sketching tour of the distressed parts of England in the winter of 1878, and has followed political campaigns through the country, &c. His first drawing in *Punch* appeared in 1880, and he joined the regular staff four years after; at this time his *Punch* Parliamentary Views were collected and published in an *édition de luxe*. His principal works in *Punch* are Parliamentary Scenes and Sketches of Members, with few exceptions drawn direct in the Houses and finished in the studio. Besides his work in *Punch*, he has illustrated the following work published from the same office:—F. C. Burnand's "Happy Thoughts;" A. Beckett's "Comic Blackstone" coloured plates, and Burnand's "Incomplete Angler." He has contributed drawings to nearly all the chief magazines in London, Harper's in America, and others, and to numerous papers, the *World* and *Vanity Fair* among them. He has also brought out books for children, 1885-6, with coloured pictures, entitled "Romps." In 1890 he was elected a Fellow of the Institute of Journalists.

FURNIVALL, Frederick James, M.A., Ph.D., born Feb. 4, 1825, at Egham, in Surrey, received his education at private schools at Englefield Green, Turnham Green, and Hanwell, at University College, London (1841-2), and Trinity Hall, Cambridge, B.A. 1846, M.A. 1849. He was called to the Bar in 1849, but has devoted his life mainly to the study of Early and Middle English Literature, and has established numerous societies of which he is Director for promoting the study of special works: the Early English Text, 1864; the Chaucer, 1868; the Ballad, 1868; the New Shakspeare, 1873; the Wyclif, 1882; the Browning, 1881;

and the Shelley, 1885. Through his societies Dr. Furnivall has raised and expended over £40,000 in printing early MSS. and rare books. He was also one of the founders of the Working Men's College, and taught there for many years besides being a Captain in its Volunteer Corps and President of its Boat Club. He was one of the first builders of narrow wayer-boats (1845), and introduced sculls instead of oars into fours and eights. Dr. Furnivall has edited a large number of early English and other works, amongst which may be mentioned Walter Map's "Queste del Saint Graal;" "Percy's Folio MS. of Ballads and Romances;" "The Babies Book;" Harrison's "England;" 1577-87; "Caxton's Book of Curtesye;" a Six-Text print of Chaucer's "Canterbury Tales"—a very valuable aid to the study of Chaucer—and Parallel-Text editions of the poet's "Minor Poems," and "Troilus and Cressida," &c. To these may be added several of the Shakspeare quartos in facsimile, and the Introduction to a one-volume edition of the works, called "The Leopold Shakspeare."

G.

"GAIL, Hamilton." See DODGE, MARY ABIGAIL.

GAIRDNER, James, son of the late John Gairdner, M.D., F.R.C.S.E., was born at Edinburgh, March 22, 1828, and was educated there. In 1846 his father obtained for him an appointment in the Public Record Office, and in 1859 he became Assistant Keeper of the Public Records. Mr. Gairdner has edited "Memorials of Henry VII." (in "Rolls Series"), 1858; "Letters and Papers illustrative of the Reigns of Richard III. and Henry VII." (in the same series), 2 vols., 1861-3; "Historical Collections of a London Citizen" (for the Camden Society), 1876; and "Three Fifteenth Century Chronicles," 1880. He has also edited eight volumes (vols. v. to xii., 1880-90) of the "Letters and Papers of Henry VIII." (one of the Calendars of State Papers published under the direction of the Master of the Rolls), a work begun by the late Professor Brewer, and still in progress. He edited in Mr. Arber's Series a new edition of the Paston Letters (3 vols., 1872-5); and he is the author of "The Houses of Lancaster and York" (1874), in Messrs. Longman's "Epochs" Series; "Life and Reign of Richard III.," 1878; of the volume "England," in the Christian Knowledge

Society's Series, entitled "Early Chroniclers of Europe," 1879; and of "Henry VII." in "Twelve English Statesmen," 1889.

GALE, James, Ph.D., F.G.S., an inventor, born at Crabbtree, near Plymouth, Devonshire, in July, 1833, was educated at Tavistock. While still a youth he was afflicted with the total loss of sight, but was able to become for a time a partner in a manufacturing business, and subsequently practised as a medical electrician at Plymouth. In 1865 he announced that he had discovered "a means of rendering gunpowder non-explosive and explosive at will, the process for effecting the same being simple, effectual, and cheap, the quality and bulk of the gunpowder remaining uninjured." Arrangements were made for a trial of the process at the Government House, Mount Wise, Plymouth, June 27, 1865, and the experiments, carried on in the presence of a number of military and naval officers, were attended, at the time, with satisfactory results. The invention consists of mixing powdered glass with the gunpowder, which is thereby rendered unexplosive. The glass can, by a simple process, be again separated from the gunpowder, which, of course, then resumes its explosive character. Mr. Gale is likewise the inventor of the ammunition slide-gun, the fog-shell, the balloon-shell, &c. He was elected a Fellow of the Chemical Society in 1866; a Fellow of the Geological Society the same year; and received the degree of Doctor of Philosophy from the University of Rostock in 1867.

GALLENGA, Professor Antonio Carlo Napoleone, was born at Parma, but of an old Piedmontese family, Nov. 4, 1810, and educated at the University of Parma. He left Parma and Italy in consequence of the political events of 1831; lived for a few years in France, Corsica, Malta, Tangiers, Gibraltar; crossed over to the United States in 1836; lived for two years in Boston; came to England in 1839; and became a naturalized British subject in 1846. He was *Chargé d'Affaires* for Piedmont at Frankfurt in 1848-9, and a member of the Piedmontese and Italian Parliament from 1854 to 1864. Signor Gallenga was connected with the *Times* from 1859 to 1883. He is the author of "Italy, Past and Present," 2 vols., 1841-9 (2nd edit., with an additional volume, 1843); "Italy in 1848," 1851; "The Blackgown Papers," 2 vols., 1845; "Scenes from Italian Life," 1850; "Fra Dolcino and his Times," 1853; "Castella-

monte, an Autobiography," 2 vols., 1854; "Mariotti's Italian Grammar, edited by A. Gallenga, Professor of Italian in University College," which passed through twelve editions between 1858 and 1881. All the above-mentioned works, with the exception of "Castellamonte," which was anonymous, were published under the assumed name of L. Mariotti. Signor Gallenga has published under his own name—"History of Piedmont," 3 vols., 1855-6; "Country Life in Piedmont," 1858; "The Invasion of Denmark," 2 vols., 1864; "The Pearl of the Antilles," 1873; "Italy Revisited," 2 vols., 1875; "Two Years of the Eastern Question," 2 vols., 1877; "The Pope and the King," 2 vols., 1879; "South America," 1881; "A Summer Tour in Russia," 1882; "Iberian Reminiscences," 2 vols., 1883; and "My Second Life," 1884. "Italy, Present and Future," 2 vols., 1887. Signor Gallenga is also the author of "Oltremonte ed Oltremare;" "La nostra Prima Caravona;" "Manuale dell' Elettore;" "A che ne siamo;" and other Italian publications.

GALLIFFET, Gaston Alexandre Auguste, Marquis de, a French general, born at Paris, Jan. 23, 1831, joined the army in April, 1848, and became colonel in Dec., 1867. He commanded the 3rd Regiment of Chasseurs d'Afrique, took part with the Army of the Rhine, during the Franco-German War, and was promoted to the rank of General of Brigade, Aug. 30, 1870. During the second siege of Paris, he commanded a brigade of the Army of Versailles, and was unenviably distinguished for his frightful severity to the Communard prisoners. In 1871, he was sent into Africa, and placed at the head of the subdivision of Batna, and had a considerable share in the pacification of the unsubdued tribes. He took charge of the expedition on El-Goliah, which presented numerous difficulties for the transport of troops; but he overcame all obstacles, and executed a rapid march through a desert country and severely punished the revolted tribes (Dec., 1872—March, 1873). On the general re-organization of the army, the Marquis de Galliffet (who had become very intimate with M. Gambetta), was named to the command of the 3rd Brigade of Infantry of the 8th Army Corps, and of the subdivision of the Department of the Cher. Promoted to the rank of General of Division, May 3, 1875, he obtained the command of the 5th Division of Infantry, and in February, 1879, that of the 9th corps d'armée. He was decorated with the Legion of Honour in June, 1855; made officer,

April, 1863; commander, April, 1873; Grand Officer of the Legion of Honour, July, 1880; and Grand Cross of the Legion of Honour, July, 1887. He ranks very high as a cavalry officer. He is a Member of the Superior Council of War; Inspector General of many corps d'armée; and, in case of war, Commander-in-Chief.

GALT, Sir Alexander Tilloch, G.C.M.G., LL.D., Canadian statesman, son of John Galt, the author, was born at Chelsea, Sept. 6, 1817, and educated in this country and in Canada. He was in the service of the British and American Land Company from 1833 to 1856, and Commissioner and Manager of their entire estates from 1844 to 1856. He was first elected to the Canadian Parliament in 1849, and in 1858 was requested by the Governor-General to form an Administration. This task he declined, though he joined Mr. Cartier's Administration as Finance Minister, and held that office until the Ministry was defeated on the Militia Bill, in May, 1862. Sir Alexander Galt resumed his post as Finance Minister in March, 1864, and retired in Aug., 1866, on the failure of a proposed measure to secure certain educational privileges to the Protestant minority of Lower Canada. He was appointed one of the Delegates for Lower Canada, to confer with the Imperial Government on the subject of Confederation, and in that capacity secured protection for his co-religionists. On the Confederation being effected, he was appointed Minister of Finance in the new Dominion Government, and he held that office from July 1 till Nov. 4, 1867, when for private reasons he resigned. In 1875 he was appointed a Commissioner for Great Britain under the Treaty of Washington of 1871, and more recently he acted as a member of the Halifax Fisheries Commission. From 1880 to 1883 he was High Commissioner for Canada in England; in 1881 was Delegate for Canada at the Paris International Monetary Conference, and in 1883 was a member of the Executive and General Committees of the International Fisheries Exhibition. He declined the honour of C.B. (Civil) in 1867, but in 1869 was created a K.C.M.G., and in 1878 was made a G.C.M.G. The degree of LL.D., was conferred upon him by Edinburgh University. He is the author of "Canada from 1849 to 1859," and of several pamphlets.

GALTON, Francis, F.R.S., F.G.S., third and youngest son of S. T. Galton, of Duddeston, near Birmingham, grandson of Dr. Erasmus Darwin, author of "Zoonomia," and cousin of Charles

Darwin the naturalist, was born in 1822, and educated at King Edward's School, Birmingham, which he left to study medicine, first at the Birmingham Hospital, and subsequently at King's College, London. He graduated at Trinity College, Cambridge, in 1844; travelled, in 1846, to the White Nile, then rarely visited; and in 1850, accompanied by Mr. Anderson, made an exploration of the then unknown Damara and Ovampo lands in South Africa, starting from Walfisch Bay. For this journey, of which he published an account, he received a gold medal from the Royal Geographical Society, in whose proceedings he has ever since taken an active share. Mr. Galton is author of the "Art of Travel, or Shifts and Contrivances in Wild Countries," a work which went through five editions between 1855 and 1872; also of "Meteorographica," 1863, which was the first attempt to chart the progress of the elements of the weather, on a large scale, and through which the existence and theory of anti-cyclones was first established by him. In later years he has published the following works, bearing more or less directly on Heredity and on the measurement of the various Faculties:—"Hereditary Genius, its Laws and Consequences," 1869; "English Men of Science: their Nature and Nurture," 1874; "Inquiries into Human Faculty and its Development," 1883; "Natural Inheritance," 1889; also several memoirs on anthropometric subjects and on new statistical processes applicable to anthropometry, including that of composite portraiture. He received one of the gold medals of the Royal Society in 1886. He was general secretary of the British Association from 1863 to 1868, President of its Geographical section in 1862 and in 1872, and of the Anthropological sections in 1877 and 1885, President of the Anthropological Institute 1885-88, and has been Vice-President of the Royal and the Royal Geographical Societies. He has been a member of the Meteorological Council of the Royal Society ever since its first institution, and is chairman of the Committee to whom the management of the Kew Observatory is entrusted.

GARDINER, Samuel Rawson, LL.D., was born March 4, 1829, at Ropley, Hants, and educated at Winchester and at Christchurch, Oxford. He became an Honorary Student of Christchurch, and in 1884 Fellow of All Souls; and for some time held the Professorship of Modern History at King's College, London. The honorary degree of LL.D. was conferred upon him by the University of

Edinburgh. Dr. Gardiner has written "The History of England from the Accession of James I. to the Disgrace of Chief-Justice Coke," 1863; "Prince Charles and the Spanish Marriage," 1869; "England under the Duke of Buckingham and Charles I.," 1875; "The Personal Government of Charles I.," 1877; "The Fall of the Monarchy of Charles I.," vols. i. and ii., all which were republished in 1883-4 as a collected history of England, 1603-1642; "Introduction to the Study of English History," conjointly with Mr. J. Bass Mullinger, 1881; "The First Two Stuarts and the Puritan Revolution," 1875; and "The Thirty Years' War," 1874. On Aug. 16, 1882, a Civil List pension of £150 was granted to him "in recognition of his valuable contributions to the History of England." His latest work is "History of the Great Civil War," vol. i., 1886, vol. ii., 1889.

GARDNER, Professor Percy, M.A. Oxford, Litt.D. Cambridge, was born in London, Nov. 24, 1846, and educated at the City of London School and Christ's College, Cambridge. In 1871 he was appointed Assistant in the Department of Antiquities, British Museum; was elected Fellow of Christ's College, 1872; was appointed Disney Professor of Archæology, Cambridge, 1880; and Lincoln and Meriton Professor of Classical Archæology, Oxford, 1887. He has been editor of the *Journal of Hellenic Studies* since its first issue in 1880; and is the author of "The Types of Greek Coins," 1883; several volumes of the British Museum Catalogue of Greek Coins; and numerous papers in learned journals. Professor Gardner is Vice-President of the Society of Hellenic Studies, and of the Numismatic Society; Ordinary Member of the Imperial German Archæological Institute; F.S.A., &c.

GARLAND, The Hon. Augustus H., American statesman, was born at Covington, Tennessee, June 11, 1832. His parents removed to Arkansas when he was a year old, and that State has since been his home. He began the practice of law in 1853, and had attained considerable prominence by the time the Civil War began. He was an elector on the Bell and Everett ticket in the Presidential contest of 1860, and was a delegate to the State convention that voted (May, 1861) to secede from the Union. Though he was personally opposed to secession he followed what seemed to be the sentiment of the South and of his State, and became a member both of the provisional and of the permanent Confederate Congress, serving in the

Lower House from 1861 to 1864. On the dissolution of that body he resumed his profession at Little Rock. In 1867 he was elected to the United States Senate, but was not allowed to take his seat, as Congress had not then restored their full privileges to the Southern States. He was elected Governor of Arkansas in 1874, and in 1877 entered the United States Senate, where he remained until he became a member of President Cleveland's Cabinet as Attorney-General in March, 1885. Since the change of administration in March, 1889, Mr. Garland has been engaged in the practice of law in Washington.

GARNETT, Richard, LL.D., Keeper of Printed Books in the British Museum, is the eldest son of the late Rev. Richard Garnett, Assistant-Keeper, and was born at Lichfield, Feb. 27, 1835. He was appointed Assistant in the Printed Book Department of the British Museum in 1851, and Assistant-Keeper of Printed Books; was Superintendent of the Reading Room from 1875 to 1884, and became Keeper of Printed Books in 1890. In April, 1883, the honorary degree of LL.D. was conferred upon him by the University of Edinburgh. Mr. Garnett is the author of "Io in Egypt, and other Poems," 1859; "Poems from the German," 1862; "Idylls and Epigrams, chiefly from the Greek Anthology," 1869; "The Twilight of the Gods, and other tales," 1889; "Iphigenia in Delphi, a dramatic Poem," 1890; and of biographies of Carlyle, Emerson, and Milton, in the "Great Writers" series. He has edited his father's "Philological Essays," 1859; "Relics of Shelley," a collection of poetical fragments discovered by himself among the poet's MSS., 1862; selections from Shelley's poems and his letters, in 1880 and 1882, and De Quincey's "English Opium Eater," in 1885. He has contributed extensively to periodical literature, and written numerous articles in the *Encyclopædia Britannica* and *Dictionary of National Biography*. Dr. Garnett has taken an active part in the improvements effected of late years in the library of the British Museum, and from the first, superintended the publication of the general catalogue of printed books commenced in 1881. He is a Vice-President of the Library Association of the United Kingdom.

GARNIER, Jean Louis Charles, architect, born at Paris, Nov. 6, 1825, studied sculpture and high-relief at the École Spéciale de Dessin, obtaining several prizes. In 1842 he entered the École des Beaux-Arts, and remained there six years, studying under MM. Lévêil and Hip-

polYTE Lebas, and gaining the great prize in architecture in 1848, for his design for a "Conservatoire pour les arts et métiers." Afterwards he travelled in Greece, measured the temple of Jupiter, in the island of Egina, a polychromatic design for the restoration of which he exhibited at the Salon des Beaux-Arts in 1853, and at the Exposition Universelle of 1855. Returning to France in 1854, after a short visit to Constantinople, M. Garnier was attached as a sub-inspector to the works at the Tour de Saint-Jacques la Boucherie, under M. Ballu. In 1856 he published in the "Revue Archéologique" an explanatory paper relative to the Temple of Egina. He exhibited various works in water-colours, &c., at the salons of 1857, 1859, and 1863, obtained a third-class medal in 1857, a first-class medal in 1863, and was decorated with the Cross of the Legion of Honour, Aug. 9, 1864. In 1861 he took part in the open competition for the new Opera-House at Paris; his plans were unanimously adopted by the jury, over which Count Walewski presided, and he was entrusted with the execution of this important work. The Grand Opera-House, which had been nearly completed under Imperial auspices, was opened Jan. 5, 1875. There was a large concourse of foreign visitors present, and many of the highest rank; the ex-King of Hanover, the ex-Queen of Spain, her son, the young King Alfonso, and the Lord Mayor of London. On this occasion M. Garnier was decorated as an Officer of the Legion of Honour. He was appointed Inspector-General of Civil Constructions, Paris, in October, 1877. The new theatre at Monaco, designed by him, was opened in Jan., 1879. In 1886 M. Garnier visited London, and was presented with the gold medal of the Institute of British Architects.

GARRETT, Edward, *nom-de-plume* of MAYO, ISABELLA FRYIE (q.v.).

GARROD, Sir Alfred Baring, M.D., F.R.S., F.R.C.P., Physician Extraordinary to Her Majesty the Queen, was born at Ipswich, May 13, 1819, educated at the Ipswich Grammar School and at University College and Hospital; graduated at the University of London, and was placed first in medicine, both at the M.B. examination, 1842, and at the M.D. examination, 1843. He was Assistant-Physician to University College Hospital, 1847, and Physician and Professor of Therapeutics and Clinical Medicine in 1851. In 1863 he became Physician to King's College Hospital and Professor at the College, and in 1874 was made Con-

sulting Physician to King's College Hospital. He was made a Member of the Royal College of Physicians of London in 1851, Fellow in 1856, Senior Censor in 1887, and Vice-President in 1888. He delivered the Gulstonian Lectures at the College, on Diabetes, in 1858; lectures on the New Remedies of the British Pharmacopœia in 1864, and the Lumleian Lectures on the Physiology and Pathology of Uric Acid, especially in relation to Renal Calculi, in 1883. He was elected a Fellow of the Royal Society in 1858. The following is a list of Sir Alfred Garrod's contributions to medical science:—"On the Conversion of Benzoic into Hippuric Acid in the Animal Economy," 1843, Chemical Society's Transactions. In June, 1847, Sir Alfred Garrod discovered the presence of uric acid in the blood of gouty subjects. A communication upon this was read before the Medical and Chirurgical Society in February, 1848, and published in the Transactions for that year. In 1849 he published in the *London Journal of Medicine*, "Researches on the Pathological Condition of the Blood in Cholera." During the next seven years various papers were published in the Medico-Chirurgical Transactions "On the Condition of the Blood and Urine in Gout, Rheumatism, and Bright's Disease," and "On the Treatment of Acute Rheumatism by Alkalies;" also "On the Effects of Caustic Alkalies in decomposing the active principles of Belladonna, Stramonium, and Hyoscyamus, and destroying their Physiological and Medicinal Effects." In 1855 he published "The Essentials of Materia Medica and Therapeutics," a work which has gone through a large number of editions, and has been very extensively used as a textbook on the subject. In 1860 Sir Alfred Garrod published his work "On the Nature and Treatment of Gout and Rheumatic Gout," for which latter he proposed to substitute the name of Rheumatoid Arthritis, a name which is now almost universally received by the Profession. This work contained all his researches on the pathology of those diseases. It also contained an account of the action of the Lithia salts and their value as remedial agents. Sir Alfred Garrod first introduced Lithia as an internal remedy. Lithia was, at the time he published his work, almost unknown, but is now used in every country in the treatment of gout and renal calculi. The work has been translated and published in German and French. In 1889 Sir Alfred Garrod published in the pages of the *Lancet* the results of his inquiries, over many years, of the value of very

small but long continued doses of sulphur in the treatment of liver, skin, and joint affections; also on the value of the treatment at Aix-les-Bains.

GARTH, The Rt. Hon. Sir Richard, P.C., is the son of the late Rev. Richard Garth, of Farnham, Surrey, and was born in 1820, was educated at Eton and at Christchurch, Oxford, where he proceeded to the degree of M.A. He was called to the Bar at Lincoln's Inn in 1847, and went on the Home Circuit. He sat in Parliament for a short time (1866-68) in the Conservative interest, as one of the members for Guildford. In March, 1875, he was nominated Chief-Justice of Bengal, and received the honour of knighthood. Sir Richard Garth is a member of the Privy Council. He resigned the Chief Justiceship in 1886.

GASKELL, Walter Holbrook, M.A., M.D., F.R.S., son of John Dakin Gaskell, of Highgate, Barrister-at-Law, was born at Naples on Nov. 1, 1847, educated at Sir Roger Cholmondeley's School, Highgate, and entered at Trinity College, Cambridge, in Oct., 1865. He was elected to a foundation scholarship in 1868, and obtained a degree in the Mathematical Tripos (26th Wrangler) in 1869. After taking his degree, he determined to read for a medical career. At that time Dr. M. Foster came to Cambridge, and under his influence he determined to devote himself to physiological research. He went to University Hospital in 1872, finished his medical studies, and took his M.D. degree in 1878. In 1874 he went over to Leipzig and worked with Professor C. Ludwig for a year, mainly at the circulation of blood through muscle. In 1875 he came back to England, and settled down at Grantchester, near Cambridge, working in the physiological laboratory and assisting in the teaching of the physiological department in Cambridge. At the end of 1888 he left Grantchester and went into Cambridge to reside. In 1881, his paper "On the Rhythm of the Heart of the Frog, and the Action of the Vagus Nerve" was chosen for the Croonian lecture, and in the following year he was elected to the Fellowship of the Royal Society. In 1883 he was made a University Lecturer in Physiology; in 1889 was elected to a Fellowship at Trinity Hall; in 1888 was awarded the Marshall Hall Prize of the Royal Medical and Chirurgical Society for his investigations on the "Sympathetic Nervous System," and elected to the fellowship of that society. In 1889 he was awarded the

Gold Medal of the Royal Society for his researches into the innervation of the heart and the nature of the sympathetic nervous system. Since 1876 he has published—chiefly in the *Journal of Physiology*—a series of papers relating, in the first place, to the innervation of the heart, which led to the investigation of the structure of the heart, nerves, and so to that of the whole sympathetic system. The main paper, giving the results of these investigations, was published in the *Journal of Physiology*, 1886, vol. vii., under the title "On the Relation between the Structure, Function, and Distribution of the Nerves, which Innervate the Vascular and Visceral Systems." The continuance of the same line of thought has led to a new conception of the meaning of the cranial nerves and to the theory that the central nervous system of the vertebrates is in reality derived from the coalesced central nervous system and alimentary canal of a crustacean-like ancestor. The three chief papers, in which the evidence for this theory is given, are "On the Relation between the Structure, Function, Distribution, and Origin of the Cranial Nerves; together with a Theory of the Origin of the Nervous System of Vertebrata," *Journal of Physiology*, vol. x., 1889; "On the Origin of the Central Nervous System of Vertebrates," *Brain*, vol. xii., 1889; "On the Origin of Vertebrates from a Crustacean-like Ancestor," *Quarterly Journal of Microscopic Science*, 1890. The last paper is the beginning of a series, which will deal with the whole question of the origin of the vertebrata. In 1875 he married Catherine Sharpe, daughter of R. A. Parker, of Highgate, of the firm of Messrs. Sharpe, Parker & Co., solicitors.

GATLING, Richard Jordan, M.D., was born in North Carolina, Sept. 12, 1818. While a boy he assisted his father in perfecting a machine for sowing cottonseed, and another for thinning out cotton plants. Subsequently he invented a machine for sowing rice. Removing to St. Louis, in 1844, he adapted this invention to sowing wheat in drills. For several winters he attended medical lectures at Laporte (Ind.) and at Cincinnati, and in 1849 removed to Indiana, where he engaged in railroad enterprises and real estate speculations. In 1850 he invented a double-acting hemp-brake, and in 1857 a steam-plough, which, however, he did not bring to any practical result. In 1861 he conceived the idea of the revolving battery gun which bears his name. Of these he constructed six at Cincinnati, which were

destroyed by the burning of his factory. Afterwards he had twelve manufactured elsewhere, which were used by General Butler on the James River. In 1865 he improved his invention, and in the year following, after satisfactory trial, it was adopted into the United States service. It has also been adopted by several European governments. More recently he has invented an improved method of casting large cannon of steel, and also a torpedo and gunboat, and a pneumatic gun for discharging high explosives. He has visited Europe several times, and he exhibited his guns at the Paris Exposition in 1867.

GATTY, The Rev. Alfred, D.D., is a member of a Cornish family, but was born in the city of London, April 18, 1813. He was educated at the Charterhouse and Eton. For a short time he prepared for the legal profession, but in April, 1831, he entered at Exeter College, Oxford, and whilst an undergraduate printed a small volume of Poems. At the beginning of 1836 he took the degree of B.A., and in 1837 was ordained by the Bishop of Ripon to the curacy of Bellerby, in the parish of Spennithorne, Yorkshire. In 1838 he graduated M.A., and in the following year married Margaret, the younger daughter of the Rev. Dr. Scott, best known as having been the friend and chaplain of Lord Nelson. In the year of his marriage he was presented to the vicarage of Ecclesfield, near Sheffield, where he has ever since resided. The 50th year of Dr. Gatty's incumbency was celebrated on September 26, 1889, with great cordiality by his parishioners, who presented him with an admirable portrait of himself, painted in oils by Mrs. S. E. Waller. Mrs. Gatty, being highly accomplished, and with fine literary taste, joined her husband in writing a *Life of Dr. Scott* in 1842, which was quickly out of print. They also subsequently edited a *Life of Dr. Wolff*, the missionary, which passed through two editions; and they described their Tour in Ireland in 1861, under the title of "*The Old Folks from Home*," which had a like success. Mrs. Gatty was also assisted by her husband, during her long fatal illness, in the compilation of her last work, "*A Book of Sundials*." On Oct. 4, 1873, Dr. Gatty had the misfortune to lose his amiable and gifted wife, after ten years of suffering, during which time her intellect never lost its strength or clearness. The late Mrs. Ewing was their daughter, who wrote tales for the young, including "*Jackanapes*," "*The Story of a*

Short Life," &c. Dr. Gatty's own literary works are a volume of *Sermons*, 1846; a second volume of *Sermons*, 1848; "*The Bell; its origin, history, and uses*," second edition, 1848; "*The Vicar and his Duties*," 1853; "*Twenty Plain Sermons*," 1858; "*The Testimony of David*," 1870; a folio edition of Hunter's "*History of Hallamshire*," to which he added about one-third new matter, 1869; also "*Sheffield: Past and Present*," 1873; "*A Life at one Living*," 1884; and in 1885, a third edition of "*A Key to In Memoriam*," annotated by Lord Tennyson. In 1861 he was appointed a rural dean by Archbishop Longley, who during the following year bestowed upon him the honorary dignity of Sub-dean of York Cathedral.

GAULTIER, Bon. See MARTIN, SIR THEODORE.

GAYÁNGOS Y ARCE, Pascual de, was born at Seville, the 21st of June, 1809, being the son of brigadier-general D. José de Gayángos y Nebot. He made his first studies at Madrid, and was, at the age of 13, sent to France, where at Fontlevozy in the department of Loire and Cher, first, and afterwards in Paris, he completed his education, having attended for two years the lectures of Baron Silvestre de Sacy, the celebrated orientalist. After a few years passed in France he came to England, married, and returned to Madrid, where he obtained a post in the Treasury, and in 1833 was appointed interpreter to the Foreign Office till 1836, when the political events, and the Carlist war, made him resign his post, and come to England. In London, where he resided till 1843, he devoted his attention to Oriental and Spanish literature, and besides numerous contributions to reviews, magazines, and other periodical issues, he made, at the request of the Royal Asiatic Society of England, a translation into English of the *History of the Mohammedan dynasties by Almakkarí* (2 vols., 4to, 1841-3). In March of the same year (1843), he was invited to return to Spain, and take charge of the professorship of Oriental languages recently created at the University of Madrid, which post he accepted and filled until 1872. Thence he was promoted, in 1881, to the office of Director of Public Instruction, but having in the same year been elected Senator by the town of Huelva, he was obliged to resign, that office being incompatible with a seat in the Spanish Senate. Since then he has mostly resided in London, engaged in various publications, such as

a detailed and classified catalogue of the Spanish MSS. in the British Museum, of which three volumes have already been published, as well as the "Calendar of Letters and Papers illustrative of the History of England in connection with that of Spain, during the reign of Henry VIII." (7 vols., royal 8vo). The above works are in English. In Spain Señor Gayángos has contributed largely to illustrate the history of his native country. Besides several learned papers on the history of Mohammedan Spain, such as "Memoria del Moro Raris," Madrid, 1845, 4to, and "Memorial Historico Español," 19 vols., small 4to, his contributions to various societies, and chiefly to that of Los Bibliófilos, have been very numerous.

GEDDES, William Duguid, LL.D., Principal and Vice-Chancellor of the University of Aberdeen, was born in Glass, near Huntly, Aberdeenshire, on Nov. 21, 1823, and educated chiefly at Elgin Academy and University, and King's College, Aberdeen. He obtained his first important appointment by competitive trial in 1853 as Rector of the Grammar School of Aberdeen, in succession to Dr. James Melvin: in 1855 he was elected Professor of Greek in his own University; thereafter became, in 1860, Professor of Greek in the United University at the union of King's and Marischal Colleges in Aberdeen, in which office he continued until Dec., 1885, when he became Principal of the University. In 1876 he received the degree of LL.D. from the University of Edinburgh, and he is also Vice-President of the "Society for Hellenic Studies." Among his numerous published works have been—"A Greek Grammar," first issued in 1855; this has gone through many editions; an edition of the "Phædo of Plato," first published in 1863, second edition in 1885; "Problem of the Homeric Poems," 1878; "Flosculi Græci Boreales," 1882. He is also a Vice-President of the New Spalding Club in Aberdeen; and he issued in 1888, along with Mr. Peter Duguid, a volume on the Heraldic Ceiling of the Cathedral Church of St. Machar in Aberdeen. It is as a classical scholar, and teacher, and a literary archæologist that he has attained distinction.

GEIKIE, Archibald, F.R.S., F.R.S.E., LL.D., Director-General of the Geological Survey of the United Kingdom, born in Edinburgh in 1835, and educated at the High School and the University; was appointed to the Geological Survey in 1855. He is a Fellow of the Royal Societies of London and Edinburgh, of

the Geological Society of London, &c., and of many foreign academies; is the author of numerous geological memoirs in the *Quarterly Journal of the Geological Society*, in the "Transactions of the Royal Society of Edinburgh," in "Memoirs of the Geological Survey," in the *Quarterly and North British Review*, in *Nature*, &c.; of "The Story of a Boulder," 1858; "The Life of Professor Edward Forbes" (conjointly with the late Dr. George Wilson), 1861; "The Phenomena of the Glacial Drift of Scotland," 1863; "The Scenery of Scotland viewed in connection with its Physical Geology," 1865 (new edit., largely re-written, 1887); "A Student's Manual of Geology" (in conjunction with the late J. B. Jukes), 1871; and "Physical Geography," "Geology," in the "Science Primers," 1873; "Memoir of Sir Roderick I. Murchison; with Notices of his Scientific Contemporaries, and of the Rise and Progress of Palæozoic Geology in Britain," 2 vols., 1874; "Geological Map of Scotland," 1876; "Class-Book of Physical Geography," 1877; "Outlines of Field-Geology," 1879; "Geological Sketches at Home and Abroad," 1882; "A Text-Book of Geology," 1882; "A Class-Book of Geology," 1886. Dr. Geikie was associated with Sir Roderick Murchison in the Scottish Highlands, in the preparation of a Memoir of that district, and of a new Geological Map of Scotland, both published in 1861. On the extension of the Geological Survey, in 1867, he was appointed Director of the Survey of Scotland; and in Dec., 1870, he was nominated by Sir Roderick Murchison as first occupant of the new chair of Geology and Mineralogy founded in the University of Edinburgh by Sir Roderick and the Crown. He resigned the chair in 1882, and was succeeded by his brother. The University of St. Andrews conferred on him the degree of LL.D. in Feb., 1872; and the same degree was given to him by the University of Edinburgh at its tercentenary celebration in April, 1885. On the resignation of Sir Andrew Ramsay he was, at the close of 1881, appointed Director-General of the Geological Survey of the United Kingdom, and Director of the Museum of Practical Geology, London. He is Foreign Secretary of the Royal Society, and Past President of the Geological Society. He has received the Murchison Medal of the latter society, and has been twice awarded the McDougal Brisbane Medal of the Royal Society of Edinburgh.

GEIKIE, Professor James, LL.D., D.C.L.,

F.R.S., F.R.S.E., the younger brother of the above Dr. Archibald Geikie, was born in 1839 at Edinburgh; and is the son of Mr. J. S. Geikie, author of "My Heather Hills" and other well-known Scottish songs; and was educated at the High School and University of Edinburgh. In 1861 he joined the Geological Survey, in which service he rose to be District Surveyor or local director of the Survey in Scotland. He resigned this position on his appointment, in 1882, to the Murchison Chair of Geology and Mineralogy in Edinburgh University, which he now occupies, in succession to his brother. Professor Geikie holds the above honorary degrees, and is member of other scientific societies in this country, and honorary member of the Geologiska Föreningens i Stockholm, the Société Belge de Géologie, the American Philosophical Society, &c. He is the author of many papers dealing with Palæozoic and Pleistocene Geology and Physical Geography. His principal works are: "The Great Ice Age, and its Relation to the Antiquity of Man," 1874 (2nd edit., 1877); "Prehistoric Europe; a Geological Sketch," 1881; "Outlines of Geology," 1886 (2nd edit., 1888); "Songs and Lyrics by H. Heine and other German Poets," 1887. In 1876, at the request of the Colonial Office, he accompanied Professor (now Sir Andrew) Ramsay to inspect and report on the water-supply for the town and garrison of Gibraltar. Professor Geikie is an original member and one of the founders of the Royal Scottish Geographical Society, of whose organ—the *Scottish Geographical Magazine*—he is honorary editor. In 1890 he was elected President of the Geological Society.

GELL, The Right Rev. Frederick, D.D., Bishop of Madras, son of the late Rev. Philip Gell, of Derby, born in 1821, took his B.A. degree at Trinity College, Cambridge, in 1843, and soon afterwards became Fellow and Tutor of Christ's College. He proceeded to the degree of M.A. in 1846. Having been chaplain to the Bishop of London, and one of Her Majesty's preachers at Whitehall, he, in 1861, was consecrated to the See of Madras.

GENOA (DUKE OF), Thomas Albert Victor de Savoy, only son of the late Prince Ferdinand, Duke of Genoa, the brother of King Victor Emmanuel, was born Feb. 6, 1854. After receiving an English education at Harrow School, he went through a regular course of study in the Marine College at Genoa, and

came out an officer of the Royal Italian Navy, in which capacity he was entrusted with the command of the *Vettor Pisani*, a corvette of the first rank, bound on a voyage round the world. The vessel completed her cruise in 1880, and the Duke's journal of the voyage was published at the close of that year.

GEORGE I. (Christian William Ferdinand Adolphus George), King of the Hellenes, second son of the King of Denmark, and brother of the Czarina and of the Princess of Wales, was born Dec. 24, 1845, and served for some time in the Danish navy. After the Abdication of Otho I., the late King of Greece, in 1863, the vacant throne was first tendered by a majority of the Greek people to Prince Alfred of England, whose nomination the English Government refused to accept. It was then offered to Duke Ernest of Saxe-Coburg Gotha, who declined it; and eventually to Prince Christian, who, with the concurrence of his own family and the consent of the Great Powers, accepted it, and began to reign as King George I. on June 6, 1863. Since the year 1876, when active trouble broke out in the Balkan Peninsula, King George's position has been very difficult; but as yet he has maintained it without going to war. His country gained a considerable addition of territory by the decision of the Conference which followed the Congress of Berlin. In 1886, after the revolution at Philippopolis and the Servo-Bulgarian war, Greece (under a rash minister, M. Delyannis) was for declaring war against Turkey, and was only stopped by the firm attitude of England. He was married at St. Petersburg to the Princess Olga, daughter of the Grand Duke Constantine, Oct. 27, 1867. The Princess Olga was born Sept. 3, 1851. His son Constantine, Duke of Sparta, the Crown Prince of Greece, was married at Athens on Oct. 20, 1889, to the Princess Sophie of Prussia, the aunt of the Emperor of Germany. The Princess Alexandra of Greece was married in June of the same year to the Grand Duke Paul of Russia.

GEORGE, Henry, was born at Philadelphia, September 2, 1839. He attended the public schools until 1853, when he went into a counting-room, and then to sea, learning something of printing in the meanwhile. In 1858 he reached California, where he worked at the case again until 1866, when he became a reporter and afterwards editor of various papers, among them the San Francisco

Times and *Post*. He was State Inspector of Gas Meters for California from 1876 to 1880, and Trustee of the San Francisco Free Public Library from 1879 to 1880. In Aug. 1880, he removed to New York, where he has since resided. He spent a year in England and Ireland, 1881-82, where he was for a very brief time under arrest as a "suspect," but was immediately released upon his identity being established. Mr. George is chiefly known through his addresses and books upon economic subjects, in which he traces the evils of society to the existence of private property in land. He has published "Our Land and Land Policy," 1871; "Progress and Poverty," 1879; "Irish Land Question," 1881; "Social Problems," 1883; "The Land Question," 1884; and "Protection or Free Trade," 1886. Mr. George visited Great Britain again in 1883, 1884, 1888, and 1889, lecturing on economic questions, particularly that of land ownership, and is now (1890) on a similar mission in Australia. In 1886 he was nominated by the United Labour Party as candidate for the Mayoralty of New York, and polled 68,000 votes against 90,000 for his Democratic opponent and 60,000 for the Republican one. The following year he received over 70,000 votes as the same party's candidate for Secretary of State of New York (State). On the adoption by the Democratic party in 1888 of a low tariff as a national issue, Mr. George announced that he should support that organization, and this ended the United Labour Party. In Jan., 1887, he founded *The Standard*, a weekly paper published in New York, devoted to the advocacy of his economic ideas; and of this he is still the editor.

GERMAIN, Antoine - Henri - Marie, a French politician and financier, was born at Lyons, Feb. 19, 1824. He was one of the founders, and is now the Chairman, of the great financial company, the *Crédit Lyonnais*. In 1869, he was elected as Liberal member for the 3rd circumscription of the Ain, and was chosen again at the general election for the National Assembly in 1871. As the embodiment of "Left Centre" principles, and as one of the highest French authorities on finance, M. Germain has always held a very distinguished position, and his rare speeches on the different budgets have made an impression not only in Paris, but throughout Europe. He is opposed to the recent financial policy of the Republic.

GERMANY, Emperor of. See **WILLIAM II.**

GÉRÔME, Jean Léon, Hon. R.A., was born at Vesoul, Haute-Saône, May 11, 1824, studied in his native place, went to Paris in 1841, and entered the studio of Paul Delaroche, under whose direction he pursued, for a time, his studies at the *École des Beaux-Arts*. He remained under that celebrated artist until 1844, and accompanied him in his journey to Italy. Returning to France in 1845, he exhibited, for the first time, at the Salon of 1847; went on an excursion to Turkey and the eastern banks of the Danube in 1853, and to Upper and Lower Egypt in 1856. These travels furnished him with numerous subjects for his paintings. In Dec., 1863, he was appointed Professor of Painting in the *École des Beaux-Arts*. Since 1847, M. Gérôme has exhibited "The Virgin, the Infant Jesus, and Saint John;" "Bacchus and Cupid;" "A Greek Interior;" the "Frieze" of the vase commemorative of the Great Exhibition held in London in 1851; "The Age of Augustus and the Birth of Jesus Christ;" "Rembrandt;" a "Portrait of Rachel;" "The Plague at Marseilles;" "The Death of St. Jerome;" "Lioness meeting a Jaguar;" "Rex Tibicen," 1874; and "L'Eminence Grise," 1874. To these may be added several classical and Eastern subjects, especially "Cæsar and Cleopatra," a very famous picture; "The Slave Market of Cairo;" "Promenade of the Harem;" and numerous pictures of Arab and Egyptian life. M. Gérôme obtained a third-class medal in 1847, two second-class medals in 1848 and 1855, and higher medals at more recent dates, and the decoration of the Legion of Honour in Nov., 1855. He was decorated with the order of the Red Eagle in 1869, and appointed a Commander of the Legion of Honour, in Feb., 1878, and is a Member of the *Académie des Beaux-Arts*.

GERSPACH, Edouard, was born at Thann (Alsace) in 1833, and is now Director of the National manufactory of the Gobelins, and of Mosaics. His publications have chiefly been upon Mosaics, the manufacture of glass, and the decorative arts. He has now in preparation two works, one, "La Manufacture des Gobelins," and the other, "Les Anciennes Fainceries Françaises."

GERSTER, Madame Etelka, was born at Kaschau, in Hungary, June 16, 1857. At a very early age she evinced musical abilities of no ordinary kind. By the advice of the director of the Conservatoire at Vienna, who chanced to hear her sing at the head of one of the Catholic pro-

cessions of her native town, she was placed under the tuition of the far-famed Madame Marchesi, with whom she studied most diligently for three years (1873-76). In the meantime, rumours of her wonderful voice had got abroad, and offers were made to her from several German towns. Etelka, however, declined these, as she was determined to begin her career in an Italian school; and in Jan., 1876, she made her *debut* at Venice, under the management of Signor Gardini, in the character of Gilda, in Verdi's "Rigoletto," and with wonderful success. Almost at once followed the parts of Ophelia, Lucia, Amina in "La Somnambula," and "Marguerite," which last character she at first sang, as it was originally written, in French. Her next triumph was at Berlin, where she created such a *furor* as had never been known previously in the German capital. The demand for places was so great that the administration of the theatre was compelled to ask the public to apply by writing, and it is said that more than 21,000 applications were refused. She then made a short sojourn at Buda-Pesth, where she appeared in the operas of "La Somnambula," and "Hamlet." The "Hungarian Nightingale," as she has been called, next went to St. Petersburg and Moscow, where she carried everything before her, and was, at the Emperor's express desire, appointed "Kammersängerin." For her co-operation in the Court concerts, His Majesty presented her with 4,000 marks and a handsome bracelet, while the Empress gave her a magnificent chain ornamented with pearls and diamonds. After she had sung at Pesth and Breslau, Mr. Mapleson had the good fortune to secure her, and she came to London. Here she first sang before an English audience on June 23, 1877, in "La Somnambula." She at once became a great favourite with the English public, and her performances at Her Majesty's Theatre during the season of 1878, were a continued series of successes.

GEVAERT, François Auguste, born July 31, 1828, at Huyse, near Oudenarde, is the son of a baker, and was originally destined by his parents to follow that trade. His great musical talent, however, becoming apparent, he was sent in 1841 to the Conservatoire at Ghent, where he studied under Sommère and Mengal. He was then appointed organist of the Jesuits' Church, and in 1846 a Christmas cantata of his composition was performed in Ghent. In May, 1847, he gained the first prize for composition at

the national competition at Brussels, but was allowed to postpone his foreign tour for two years, during which his first two operas, "Hughes de Somerghem," and "La Comédie à la Ville," were produced in Ghent. In 1849 he proceeded on his tour, and went to Spain. His reports on Spanish music were printed in the bulletin of the Académie of Brussels for 1851. On Nov. 27, 1852, he produced "Georgette" at the Théâtre Lyrique in Paris, and in Oct., 1854, "Le Billet de Marguerite," both with extraordinary success. For his cantata, "De Nationale Verjaerdag," composed in honour of the twenty-fifth anniversary of the reign of King Leopold, he received the Order of Leopold. In 1867 he was appointed Inspecteur de la musique at the Académie de Musique, Paris, a post which he retained until Sept., 1870, since which time he has devoted his attention more especially to the history of music, and in 1875 brought out the first part of his "Histoire et Théorie de la Musique dans l'Antiquité." His other works comprise "Quentin Durward," 1858; "Château Trompette," 1860; and "Le Capitaine Henric," 1864: all produced at the Opéra Comique, Paris, with great success, as was also "Les Deux Amours," at the theatre of Baden-Baden, 1861. In connection with the history of music he has written "Leerboek van den Gregoriaenschen zang," 1856; "Traité d'Instrumentation," 1863; and "Les Gloires d'Italie," 1868; and in the five last years, "Nouveau Traité d'Instrumentation," 1885; "Traité d'Orchestration," and "Les Origines du Chant Liturgique de l'Eglise Latine," 1890. In 1871 he succeeded Fétis as director of the Conservatoire at Brussels, and was elected a Member of the Académie des Beaux-Arts in 1873.

GIARD, Professor Alfred, Ancien Député du Nord, was born at Valenciennes, Aug. 8, 1846, and educated in his native city, and also at Douai until 1867, when he entered l'école normale supérieure. He took his degree in 1875; and, after holding some minor appointments, became professor of zoology à la Faculté des Sciences de Paris, in 1880. He is the author of numerous papers on zoological subjects, respecting which he is a strong supporter of Darwinianism. He is a member of the Comité Consultatif des Pêches Maritimes; and founder and director of the Laboratoire de Zoologie Maritime de Wimereux. Since his election to the Chamber, in 1882, he has taken an active part in politics, holding the views of the extreme left.

GIBBONS, Cardinal James, Archbishop of Baltimore, was born in Baltimore, U.S.A., on July 23, 1834, entered St. Charles' College, transferred in 1857 to St. Mary's Seminary, and on June 30, 1861, was ordained priest there. He was made assistant priest at St. Patrick's, Baltimore; made pastor of St. Bridget's, Canton; was promoted to the Cathedral, and made secretary to Archbishop Spalding. He became assistant Chancellor of the Second Plenary Council of Baltimore in 1866; was made Vicar-Apostolic of North Carolina in 1868, and opened schools, built asylums, erected churches, and increased the number of priests from 5 to 15. He was translated to Richmond in 1872, and made its bishop and the coadjutor of Archbishop Boyle of Baltimore in 1877, and succeeded him the same year. At the age of 43, he was Archbishop of the greatest See in N. America. Working with the same activity in establishing asylums, schools, homes, etc., he was appointed by Leo. XIII. to preside over the Third Plenary Council of Baltimore, and was rewarded for his services by a Cardinal's hat, June 30, 1886. He has written many pastorals and two books; "The Faith of Our Fathers," 1876, said to be the most popular book of the kind of our day; and "Our Christian Heritage," 1889. Both books have been translated into many languages, and have served to increase his popularity with all classes, Protestants as well as Catholics, rich as well as poor.

GIBSON, The Right Hon. John George, youngest son of Mr. William Gibson, of Rochforest, co. Tipperary (who was Taxing Master in Chancery), and brother of Lord Ashbourne, was born in 1846, and educated at Trinity College, Dublin, where he had a brilliant career, taking the first two gold medals in Classics and History and Political Science. He was called to the Irish Bar in 1870, and joined the Leinster Circuit. He was created a Queen's Council in 1880, and in 1885 was elected Conservative member for the Walton Division of Liverpool, which he represents also in the present Parliament. In 1885 he was appointed her Majesty's Third Serjeant-at-Law, and in Lord Salisbury's second administration (1886) holds the post of Solicitor-General for Ireland.

GIERS, Nicholas Carlovitch de; See DE GIERS.

GIFFEN, Robert, LL.D., was born at Strathaven, Lanarkshire, in 1837, and educated chiefly at the parish school in that town. He was employed as clerk in

a solicitor's office, partly in Strathaven and partly in Glasgow from 1850 to 1857, attending for two sessions at Glasgow College in 1856-7 and 1857-8; and was afterwards employed in a commercial house in Glasgow from 1858 to 1860, becoming connected with the press in the latter year as sub-editor and reporter on the staff of the *Stirling Journal*. In 1862 he left Stirling for London, to occupy a position on the staff of the *Globe* newspaper, with which he was connected, as sub-editor and contributor, until 1866; for a short time after that he assisted Mr. Morley in the *Fortnightly Review*; from 1868 to 1876 he was assistant editor and principal contributor to the *Economist*, under Mr. Bagehot, being also from 1873 to 1876 city editor of and writer of the Trade and Finance article in the *Daily News*. In 1876 he was appointed chief of the Statistical Department of the Board of Trade, the office being merged in 1882 in that of Assistant-Secretary, Commercial Department. During his connection with the press he was a contributor to the *Fortnightly Review*, *Saturday Review*, *Spectator*, and other journals, and in his official capacity has written numerous reports on commercial matters, besides giving evidence on similar subjects, e.g., sugar bounties, gold and silver, Channel tunnel, &c., before nine Committees of the House of Commons and Royal Commissions. In 1881 Mr. Giffen resigned his post at the Board of Trade, and was understood to be for some time on the staff of the *Times*, but the post was not actually vacated, only leave of absence was given for a considerable time to enable him to fulfil the engagements which he had made in view of his resignation. He is the author of "Stock Exchange Securities: an Essay on the general causes of Fluctuation in their Price," published 1878; "Essays in Finance," 1st series, 1879 (4th ed. 1886), 2nd series, 1886, &c. Several of the papers published in the two volumes of "Essays in Finance" above noticed consisted of papers read before the Statistical Society, or addresses as President, among the principal being a paper on Recent Accumulations of Capital in the United Kingdom, read 1878; the Use of Import and Export Statistics, read 1882, and the Progress of the Working Classes, read 1883. Among other subjects treated are the Depreciation of Gold, 1848-72 (1887); Trade Depression and Low Prices, 1885, and Gold Supply, the Rate of Discount and Prices, 1886.

GIGLIUCCI, Countess, née Clara Anastasia Novello, fourth daughter of

Mr. Vincent Novello, musical composer, born in London, June 10, 1818, at an early age displayed so much musical talent as to induce her father to give her a thoroughly professional education. Her progress repaid the care bestowed upon her, for at the early age of eleven years she won, by competition, her admission as a pupil into the Conservatoire de Musique Sacrée at Paris, where, for two years, she studied assiduously, and at one of the public examinations of the pupils was complimented by Charles X. and his Court. On the closing of the institution, in the revolution of 1830, she returned home, fitted to take a prominent part among the singers of the day, at the concerts of the Philharmonic Society, and other leading musical entertainments. When only seventeen years of age she was elected an Associate of that Society, and soon afterwards accepted an invitation from Mendelssohn to take part in the Leipsic Gewandhaus Concerts. In Berlin and Vienna she was equally well received; and so great was her success at the first-mentioned place, that the late king presented her with introductions to his sister, the Empress of Russia, and to the Court of Vienna. Before this time Malibran and Rubini advised her to go to Italy, and study for the stage. Her success at Vienna induced her to take part in the musical festivals in Lombardy, and she felt disposed to follow their advice, but, owing to engagements at St. Petersburg and in Germany, could not carry out this plan until 1839-40. She appeared at Padua in 1841 in the character of Semiramide with such success, that engagements at Bologna, Modena, and Genoa followed, and in 1842 both Rome and Genoa endeavoured to secure her for the *fêtes* of the Carnival. In 1843 she returned to England, and sang in London and Manchester; and having married Count Gigliucci, she withdrew from the stage in 1844. Circumstances, however, induced her to return in 1850; and she constantly appeared in concerts, oratorios, and operas, on the Continent and in London, until 1860, when she finally retired.

GILBERT, Alfred, A.R.A., sculptor, was born in Berners Street, London, in 1854, and first studied his art under Boehm, in 1874, after which he went to Paris, where he studied at the École Des Beaux-Arts under M. Cavalier. At the end of three years he went to Rome, where he executed the "Kiss of Victory" in marble. He first attracted attention by his "Perseus Arming," and some time later he exhibited a small bronze head, which

made a great impression on all the artists who saw it. In Rome he also executed "Icarus" amongst many other works. In 1886 he exhibited at the Royal Academy the plaster model of the "Enchanted Chair," and at the Grosvenor Gallery a small statuette.

GILBERT, Sir John, R.A., President of the Royal Society of Painters in Water-Colours, was born in 1817. In 1836 his first exhibited picture, a water-colour drawing, "The Arrest of Lord Hastings by the Protector, Richard, Duke of Gloucester," was in the Suffolk Street Gallery, and an oil painting was in the Royal Academy, then at Somerset House, in the same year. In 1839 he first exhibited at the British Institution, and from that time has been almost constantly represented at that Gallery, and occasionally at the Royal Academy. His best-known oil pictures are—"Don Quixote giving advice to Sancho Panza," followed by many other subjects from Cervantes; "The Education of Gil Blas;" a scene from "Tristram Shandy;" "Othello before the Senate;" "The Murder of Thomas Becket;" "The Plays of Shakspeare," a kind of tableau, in which the principal characters in each play are introduced; "Charge of Cavaliers at Naseby;" "A Drawing-room at St. James's;" "A Regiment of Royalist Cavalry;" "Rubens and Teniers;" "The Studio of Rembrandt;" "Wolsey and Buckingham;" "A Convocation of Clergy;" and "The Entry of Joan of Arc into Orleans." More recently he has exhibited at the Royal Academy, "The Field of the Cloth of Gold," in 1874; "Tewkesbury Abbey: Queen Margaret carried prisoner to Edward after the Battle of Tewkesbury;" "Mrs. Gilbert," and "Don Quixote and Sancho at the Castle of the Duke and Duchess," in 1875; "Crusaders," and "Richard II. Resigning the Crown to Bolingbroke," in 1876; "Cardinal Wolsey at Leicester Abbey," and "Doge and Senators of Venice," in 1877; "Ready!" and "Maydew," in 1878. "Ego et Rex Meus," in 1889, and "Onward," in 1890. As an illustrator of books, pictorial newspapers, and other weekly publications, his name has, for a long period, been familiar to the public. He contributed in this way to the *Illustrated London News* for many years, from the first number of that journal, but has for some time ceased to do so. Most of the best editions of the British classics have been illustrated by him, concluding with an edition of Shakspeare, a work upon which he was occupied for many years. In 1852 he was elected an Associate, in

1853 a member, and in 1871 the President, of the Royal Society of Painters in Water-Colours, in whose gallery he has been a constant exhibitor. He shortly afterwards received the honour of knighthood. He is an honorary member of the Royal Society of Painters in Water-Colours of Belgium, of the Society of Artists of Belgium, and Honorary President of the Liverpool Society of Water-Colour Painters. He was elected an Associate of the Royal Academy Jan. 29, 1872, and an Academician June 29, 1876. He is a Chevalier of the Legion of Honour.

GILBERT, John Thos., F.S.A., M.R.I.A., was born in 1829, in Dublin, in which city his father was Consul for Portugal and Algrave. He was educated at Dublin and in England; was appointed Secretary of the Public Record Office of Ireland in 1867, and held that Post till its abolition in 1875. He edited "Facsimiles of National Manuscripts of Ireland," by command of Her Majesty Queen Victoria. He is a Governor of the National Gallery of Ireland, and a Trustee, on behalf of the Crown, of the National Library of Ireland, Dublin; Inspector of MSS. in Ireland for the Royal Commission on Historical Manuscripts; Member of the Council and Librarian of the Royal Irish Academy, Dublin; Fellow of the Society of Antiquaries, London; Hon. Professor of Archaeology in the Royal Academy of Arts, Dublin; editor of a series of important publications entitled "Historic Literature of Ireland," and also editor in the collection of "Chronicles and Memorials of Great Britain and Ireland." Mr. Gilbert has received the Gold Medal of the R. I. Academy. He has been thanked by the Municipal Corporation of Dublin for his archivist work, and appointed to edit the ancient records of that city. As member of the Council of the Royal Irish Academy, and its honorary Librarian, he gave a vast impetus to Celtic studies by effecting the publication of some of the most important manuscripts in the ancient Irish language. Mr. Gilbert's principal published works are—"History of the City of Dublin," 3 vols., 8vo, 1854-59; "History of the Viceroy's of Ireland, 1172-1509," 1865; "Historical and Municipal Documents of Ireland, A.D. 1172-1320," 8vo, 1870; "National Manuscripts of Ireland," 5 vols., large folio, with coloured plates, 1874-84; "History of Affairs in Ireland, 1641-52," 6 parts, 1879-81; "History of the Irish Confederation and the War in Ireland, 1641-49," 7 vols., quarto, 1882-90; various Treatises on History and the

Literature of Great Britain and Ireland, published by the Royal Commission on Historical Manuscripts, London, 1870; the chartularies of St. Mary's Abbey at Dublin and Dunbrody, 1884; Register of the Abbey of St. Thomas, Dublin, 1889; Calendar of ancient records of Dublin, 1890.

GILBERT, Professor Joseph Henry, Ph.D., LL.D., F.R.S., son of the late Rev. Joseph Gilbert, was born at Hull, Aug. 1, 1817. After his school education, he met with a gun-shot accident, which much impaired his health for some time, and also deprived him of the sight of one eye. He commenced his College courses at the University of Glasgow, where, as elsewhere he devoted special attention to Chemistry, working in the Laboratory of the late Professor Thomas Thomson. He next studied at University College, London; attending the classes of Professor Graham, and others, and working in the Laboratory of the late Dr. Anthony Todd Thomson, then the Professor of *Materia Medica, Therapeutics, and Toxicology*. A short time was then spent in the Laboratory of Professor Liebig, at Giessen, where he took the degree of Doctor of Philosophy. Returning to University College, London, Dr. Gilbert acted as class and Laboratory Assistant to Professor A. T. Thomson, in the winter and summer sessions of 1840-41; attending other courses at the College at the same time. He next devoted some time to the chemistry of calico printing, dyeing, etc., in the neighbourhood of Manchester. In 1843, Dr. Gilbert became associated with Mr. (now Sir) J. B. Lawes, of Rothamsted, Hertfordshire; and, from that time, he has continued to be engaged with him in a systematic series of researches on Agricultural Chemistry and Physiology. The results of their investigations have been published in a series of papers, now numbering more than 100, in various journals, among which may be mentioned: The Proceedings and Transactions of the Royal Society, the Journal of the Royal Agricultural Society of England, the Journal of the Chemical Society, the Reports of the British Association for the Advancement of Science, the Journal of the Society of Arts, etc.; also in some Official Reports, and elsewhere. Dr. Gilbert was elected a member of the Chemical Society in 1841, the year of its formation; and he contributed to the first volume of its "Memoirs," a translation from the original German, of a paper on the Atomic weight of Carbon, by Professors Redtenbacher and Liebig.

He was President of the Society in 1882-3. He was elected a Fellow of the Royal Society in 1860, and in 1867 the Council of the Society awarded to him, in conjunction with Mr. Lawes, one of the Royal Medals. He is also Fellow of the Linnean Society, and of the Royal Meteorological Society. In 1880, he was President of the Chemical Section of the British Association for the Advancement of Science. In 1882 and 1884, he visited Canada and the United States, travelling over wide areas, to study the conditions of the agriculture of those countries. In 1884, he was appointed Sibthorpe Professor of Rural Economy in the University of Oxford, and he was re-appointed for a second period of 3 years in 1887. He has retained the Directorship of the Rothamsted Laboratory ever since 1843. Dr. Gilbert received the Honorary Degree of M.A., at Oxford, in 1884, and that of LL.D., at Glasgow in 1883, and in Edinburgh in 1890. He is Honorary Member of the Royal Agricultural Society of England, of the Chemico-Agricultural Society of Ulster, of the Academy of Agriculture and Forestry of Petrovskoie, and of the Royal Agricultural Society of Hanover; Foreign Member of the Royal Agricultural Academy of Sweden; and Corresponding Member of the Institute of France (Academy of Sciences), of the Society of Agriculturists of France, of the Society for the Encouragement of National Industry in Paris, and of the Institut Agronomique of Gorigoretsk. He is also Chevalier du Mérite Agricole (France); and (in conjunction with Sir J. B. Lawes), Gold Medallist of Merit for Agriculture (Germany).

GILBERT, Josiah, born at the Independent College, Rotherham, Yorkshire, Oct. 7, 1814, son of the Rev. Joseph Gilbert, grandson of the Rev. Isaac Taylor, of Ongar, was educated chiefly at home, became afterwards a student in the Royal Academy, practised as a portrait-painter for some years in London, but has lived since 1843 at Marden Ash, Ongar, engaged in literary and artistic pursuits. He is the author of "Art, its Scope and Purpose," 1858; "Cadore, or Titian's Country," 1869; "Art and Religion," 1871; was joint-author of "The Dolomite Mountains," 1864; edited "Autobiography and other Memorials of Mrs. Gilbert (formerly Ann Taylor)," 1875, which has gone through four editions; and he published "Landscape in Art before Claude and Salvator," in 1885. Mr. Gilbert is a member of the Alpine Club,

GILBERT, William Schwenck, B.A., was born Nov. 18, 1836, at 17, Southampton Street, Strand, London, and educated at Great Ealing School. He took the degree of B.A. at the University of London, was called to the Bar of the Inner Temple in Nov. 1864; was Clerk in the Privy Council Office from 1857 to 1862; and was appointed Captain of the Royal Aberdeenshire Highlanders (Militia) in 1868. Mr. Gilbert is well known as a dramatic author and contributor to periodical literature. His first piece, "Dulcamara," was produced at the St. James's Theatre, in Jan. 1866. He is also author of "An Old Score;" "The Princess;" "Ages Ago;" "Randall's Thumb;" "Creatures of Impulse;" "A Sensation Novel;" "Happy Arcadia" (Gallery of Illustration); "The Palace of Truth," a fairy comedy, Nov. 1870; "Pygmalion and Galatea," a fairy comedy, Dec. 1871; "The Wicked World," a fairy comedy, Jan. 1873; "Charity," a play, Jan. 1874, at the Haymarket Theatre, where the three preceding pieces had also first appeared; "Sweethearts," a dramatic contrast, Prince of Wales's Theatre, Nov. 1874; "Broken Hearts," a fairy comedy, Court Theatre, 1876; "Tom Cobb," a farcical comedy, St. James's in the same year, and "Trial by Jury" (written in conjunction with Sir Arthur Sullivan), at the Royalty; "Dan'l Druce," a drama, at the Haymarket; and "Engaged," a farcical comedy, at the same theatre; the "Ne'er-do-Weel," Olympic, 1878; "Gretchen," Olympic, 1879; "Foggerty's Fairy," Criterion; "Comedy and Tragedy," Lyceum; and the "Sorcerer," an opera, Opera Comique, Sept., 1877; "H.M.S. Pinafore," which ran two years at that theatre; the "Pirates of Penzance," which ran more than a year; and "Patience, or Bunthorne's Bride," Opera Comique and the new Savoy Theatre in 1881, ran twenty months. This was followed by "Iolanthe, or the Peer and the Peri," which ran thirteen months; "Princess Ida or Castle Adamant," which ran nearly as long; "The Mikado, or the Town of Titipu," which ran nearly two years; "Ruddigore, or the Witch's Curse," which ran ten months; "The Yeoman of the Guard," which ran fifteen months; and "The Gondoliers," which was produced in 1889, and is still running, 1890. The "Mikado" has been performed in Berlin, Vienna, Amsterdam and other continental towns. These operas were all written in conjunction with Sir Arthur Sullivan. "The Palace of Truth" is based on a story of Madame de Genlis; "Gretchen" on the "Faust"

legend; and "The Princess" on Mr. Tennyson's poem; but the other pieces are original. Mr. Gilbert's "Bab Bal-lads," originally published in *Fun*, have since been printed in a separate form.

GILBERTSON, Edward, was born in London in 1813. The early years of his life were passed in various parts of Russia, the language of which country he speaks fluently. He left Russia in 1840, and for several years after his return to London was a frequent contributor of leading articles to the *Daily News* and other papers. In 1857 he became Secretary to the Ottoman Bank in London, and during the following four years paid several visits of inspection to the branches at Beyrout, Smyrna, and Constantinople. In 1861 he undertook the management of the bank in the latter city, and in 1862, as member of the Financial commission, had the chief direction, under Edhem Pacha, of the operations for withdrawing the Caimé; for which service he received the third class of the Medjidieh. In 1863 he was one of the signatories of the concession of the Imperial Ottoman Bank; and from that date until May, 1871, was Assistant Director-General of the Bank at Constantinople. He has taken an active part in negotiating all the Turkish public loans in which the bank was interested since 1858, and has been a member of various financial commissions formed by the Ottoman Government; such as that for the improvement of the system of public accounts, for the Budget of 1867, &c. The Sultan, in recognition of his services to the imperial treasury, has conferred on him the order of the Osmanieh of the third class. Upon his arrival in England, in May, 1871, he was unanimously elected a member of the committee of the Bank in London.

GILBEY, Walter, third son of the late Henry Gilbey of Bishop Stortford, was born in that town in the year 1831, is the head of the firm of W. & A. Gilbey, wine merchants, and also devotes much of his time to matters pertaining to the interests of Agriculture. He is a Governor and Vice-President of the Royal Agricultural Society, and is on the Councils of the Smithfield Club, the Royal Agricultural Benevolent Institution, and the English Jersey Society, of which he was President in the year 1886. He also occupies the position of Vice-Chairman of the Royal Agricultural Hall Company; and the Horse Shows held there for a number of years past have been largely under his management. Mr. Walter Gilbey is also one of the Governors, and a member of the

General Purposes Committee, of the Royal Veterinary College. He has in addition taken an active part in the formation of the Shire Horse Society, of which he was President in 1883, succeeding the Earl of Powis. He is the first Commoner who has held that position, his Vice-President in that year being the Duke of Westminster, K.G. The Hunters Improvement Society, the Hackney Horse Society, and the London Cart Horse Parade Society may be said to have been created by him. Mr. Walter Gilbey, when residing, some fifteen years ago, at Hargrave Park, Stanstead, Essex, was a successful breeder of Jersey cattle, and he has been also a very successful breeder of horses at the Elsenham Paddocks. He twice won the Champion Prize for the best horse in all classes at the Shire Horse Society's London shows, viz., in 1883 and 1886. He was also a successful exhibitor at the Hamburg International show in 1883, the International Exhibition at Amsterdam in 1884, and the International Exhibition at Brussels in 1888. He is the author of various articles and pamphlets having for their object the encouragement and improvement of horse breeding, notably the "Old English War Horse and the Shire Horse," identifying the present breed of Shire Horses with the old English War Horse, a pamphlet which was very favourably reviewed by the press.

GILDER, Richard Watson, LL.D., American poet, was born at Bordentown, N.J., Feb. 8, 1844. He was educated mainly by his father, the late Rev. W. H. Gilder, a Methodist minister and writer, who had established a seminary at Bordentown. For a brief time, when the Confederates invaded Pennsylvania in 1863, he served in the Union army, and took part in the defence of Carlisle. He began the study of law, but the death of his father (1864) compelled him to abandon it in order to earn his own living. For a year he was a paymaster on the Camden and Amboy railway, and then became journalist. From 1865-68 he was on the staff of the Newark (N.J.) *Advertiser*. In 1868 he, with Newton Crane, established the Newark *Register*, to the editorship of which in the following year he added that of *Hours at Home*, a New York monthly. The *Register* not proving profitable, the owners sold it, and Mr. Gilder in 1870 accepted the associate editorship of *Scribner's Monthly* (now *The Century Magazine*), then recently started, into which *Hours at Home* was incorporated. On the death of Dr. Holland in 1881, Dr. Gilder was made

editor-in-chief of *The Century*, a position which he still holds. In addition to his editorial and literary labours, Mr. Gilder takes an active interest in all public matters. He is a member of many clubs in New York, of one of which, the Fellowshipcraft, he has been President since its formation in 1888. He is President of the Kindergarten Association, and is one of the founders of the Society of American Artists, the American Copyright League, the Authors' Club, and the Free Art League. He received the degree of LL.D. from Dickinson College in 1883. His published works (all poems) are: "The New Day," 1875; "The Poet and His Master," 1878; "Lyrics," 1885; and "The Celestial Passion," 1887.

GILKES, Arthur Herman, Head Master of Dulwich College, was born Nov. 2, 1849. Is the son of Wm. Gilkes of Leominster, Herefordshire, and was educated at Shrewsbury School, 1859-1868; Christ Church, Oxford, 1868-1872; was first class in moderations 1870, and first class in literis humanioribus, 1872. He was assistant Master at Shrewsbury School, 1873-1885, and Head Master of Dulwich College, 1885. He is the author of "School Lectures on Electra and Macbeth," and "Boys and Masters."

GILL, David, F.R.S., LL.D., Astronomer Royal at the Cape, born June 12, 1843, is the eldest son of the late David Gill, Esq., J.P., of Blairrythan and Savock, Aberdeenshire, by Margaret, daughter of Gilbert Mitchell, Esq., of Savock, in the same county. He was educated at Marischal College, Aberdeen. He obtained his first experience in practical astronomy in the Observatory at Aberdeen, and in a private observatory which he erected in the same city. Mr. Gill was associated with Lord Lindsay in the designs and details of the large observatory founded by that nobleman at Dunecht in 1870, taking the position as chief of the staff. He thus became engaged in the organization of the expedition to the Mauritius, fitted out by Lord Lindsay, for the observation of the transit of Venus, on which occasion advantage was taken of the circumstance of a heliometer forming part of the equipment, to determine the sun's distance by measures of the planet Juno. The details of this work were published by Lord Lindsay as the joint work of himself and Mr. Gill. In connection with the same expedition, Mr. Gill arranged and personally conducted the whole of the chronometric and telegraphic longitude determinations connecting Berlin, Malta, Alexandria,

Suez, Aden, Bombay, Seychelles, Réunion, Mauritius, and Rodriguez. It was while engaged upon these operations that he undertook, at the request of the Khedive, the measurement of the first base line of the geodetic survey of Egypt. In 1877 he went to Ascension to observe the apposition of Mars. In 1881 he published in the *Memoirs of the Royal Astronomical Society* an account of a determination of the Solar Parallax from observations of Mars, at Ascension, in 1877. In the same year a difficult task, the organization of elaborate longitude operations connecting Aden, Zanzibar, Mozambique, Delagoa Bay, Durban, Port Elizabeth, and the Cape, was performed with equal care; 1882 saw him organizing observations of the minor planets Victoria and Sappho, which were carried out at the principal observatories of the world; and the same year he made the arrangements for the observation of the transit of Venus, in South Africa. In 1883 he set on foot the geodetic survey of South Africa, a scheme which he had urged upon Government without ceasing since 1879. From 1881-83 he was likewise engaged in researches on the Parallax of the fixed stars, an elaborate memoir on which subject he has published in the *Memoirs of the Royal Astronomical Society*. In 1875 he received the Medjidieh (3rd class) from the Khedive for his scientific labours in Egypt. In 1881 he was made LL.D. of Aberdeen University; in the same year he received the Valz Medal of the Paris Academy of Sciences for researches on the Solar Parallax; and in 1882 the Gold Medal of the Royal Astronomical Society of London for his Heliometric observations of Mars and the discussion of his results. In 1883 he was elected a Fellow of the Royal Society, and in 1884 made LL.D. of Edinburgh University. Dr. Gill is a Magistrate for County Aberdeen, one of the trustees of the South African Museum, and was also sometime a Member of the South African University Council.

GILL, Edmund, landscape painter, was born Nov. 29, 1820, in the parish of Clerkenwell. His father was by trade a japanner, but Edmund soon turned his attention to painting, and succeeded in occasionally exhibiting pictures in the Academy. After passing some years in Shropshire, Edmund Gill came, in 1841, to London, and became a student at the Academy. He has since been a regular exhibitor of landscapes, stormy coast scenes, and waterfalls, chiefly from Welsh and Scottish scenery, painted in the minute style that recalls the manner of the early Dutch artists.

GILLIES, The Hon. Duncan, Ex-Premier of Victoria, was born in Scotland, in 1830, and went out to Victoria in 1854. He was elected a Member of the Victorian Parliament in 1859, and was Minister for Lands in 1868, and again from 1875 to 1877. He held the office of Minister for Railways from 1872 to 1875, and from 1880 to 1883; and became Premier in 1886. He was Chairman of the Federal Conference held at Melbourne in 1890; on Nov. 5 of which year, his Ministry being defeated, he resigned, and Mr. Munro became Premier. He, on taking office, gave, in a few plain figures, the sort of *damnosa hereditas* to which he had succeeded. He said:—"The late Treasurer took office early in 1886. He had a large income from revenue during the specially-favoured Exhibition and land-boom years. He supplemented his actual income by mortgaging our future income from the sale of valuable city and suburban lands. He borrowed £1,500,000 in February, 1886; £3,000,000 in January, 1887; £1,500,000 in January, 1888; and £3,000,000 in January, 1889. From the Victorian stock he got £130,000 in December, 1888. He borrowed £4,000,000 in April, 1890, and got from the Victorian stock £26,411 in June, 1890. In all he received £13,156,411 of borrowed money in a little over four years. He went out of office on Nov. 5, 1890, leaving to his successor a debit balance in the revenue account of £502,282, and the ear-marked farmers' bonuses to be provided for, contracts in hand between one and a-half and two millions, the trust funds reduced to £337,271, the loan funds to £394,404, and matured debentures amounting to £850,000 to meet immediately!"

GILMAN, Daniel Coit, LL.D., President of the Johns Hopkins' University, Baltimore, was born in Norwich, Conn., July 6, 1831. After graduating as Bachelor of Arts at Yale College, in 1852, he devoted two years to travel and study in Europe, and subsequently became Librarian and Professor of Physical Geography in Yale College, where he remained from 1856 to 1872. He took an active part in the organisation of the Sheffield Scientific School, the Yale School of Fine Arts, and the Winchester Observatory of Yale College. His interest in public instruction led to his appointment, in 1856, as Superintendent of the Public Schools of New Haven, and afterwards, in 1865-66, as Superintendent of the Public Schools of Connecticut. In 1872, he became President of the University of California; and, in 1875, he was called as President to take part in the organisation of a uni-

versity in Baltimore, Ind., to which Johns Hopkins had given a large endowment. This institution is devoted to the advancement of the higher education of young men, the encouragement of research, and the publication of learned works. Mr. Gilman was one of the judges in the Centennial Exhibition of 1876, one of the original trustees of the Slater Fund for the education of Freedmen, an official visitor of the United States Military Academy, in 1875, and of the United States Naval Academy, in 1876 and 1888. He has been President of the American Social Science Association, a Vice-President of the American Oriental Society, an active promoter of Civil Service reform, and of charity organisation, and of training in handicrafts. He is a member of many literary and scientific associations. He has travelled widely in the United States and Europe, especially on the Mediterranean. His addresses, reports, and reviews, chiefly, but not wholly, pertaining to educational subjects, would make, if collected, several octavo volumes. His views upon higher education may be gathered from fifteen reports to the Johns Hopkins University, from many addresses delivered in Baltimore, from an address before the Phi Beta Kappa Society of Harvard University (1887), and from three articles in the *North American Review*, "On American Education," 1776-1876; "On the Idea of the University," 1881; "On the Idea of the College," 1882. He delivered opening addresses at Sibley College (Cornell University), Adelbert College (Cleveland), Bryn Mawr College (near Philadelphia), the Women's College (Baltimore), the Slater Museum of the Fine Arts (Norwich), the Dearborn Astronomical Observatory (near Chicago), and the College for Promoting Manual Instruction (New York), in all which he has discussed some educational theme. He has also published many articles on biographical, historical, and geographical subjects. The honorary degree of Doctor of Laws has been conferred on him by Harvard, Yale, and Columbia Colleges.

GINSBURG, Christian, LL.D., an eminent Rabbinical scholar, born in Warsaw in 1830, and educated there in the Rabbinic College. He was one of the original members appointed by Convocation for the revision of the English version of the Old Testament Scriptures, and is the author of "An Historical and Critical Commentary on the Song of Songs," and on "Ecclesiastes," 1857; "The Kariates, their History and Literature,"

1862; "The Essenes," 1864; "The Kabbalah, its Doctrines, Development, and Literature," 1865; "The Massoreth-ha-Massoreth of Elias Levita," in Hebrew, with Translation and Commentary, 1867; "Jacob ben Chajin's Introduction to the Rabbinic Bible," Hebrew and English, with notices, 1867; "The Moabite Stone," 1871; "A Commentary on Leviticus," 1882; "The Massorah," four imperial folio volumes, 1880-86, a work of vast erudition. Dr. Ginsburg has been a contributor also to Kitto's "Encyclopædia of Biblical Literature;" Smith's "Dictionary of the Bible;" and the "Encyclopædia Britannica."

GIRAUD, Herbert, M.D., Deputy Inspector-General of Her Majesty's Bombay army, was born at Faversham, Kent, in 1817, of a Waldensian family. He graduated with honours in 1840 in the University of Edinburgh, where he was a member of the so-called "Oinomathic Brotherhood," of which the naturalist, Edward Forbes, the two Goodsirs, George Wilson, J. Hughes Bennett, and others since eminent in science, were members. In 1842 he entered the H.E.I. Co.'s Bombay Medical Service, and in that year the Linnæan Society published in their *Transactions* his "Observations on Vegetable Embryology," which were subsequently embodied in several of the British and Foreign systematic works on Botany. In 1845 he was appointed Professor of Chemistry and Botany in the Grant Medical College, Bombay, of which institution he became Principal, and also Chief Medical Officer of Sir Jamsetjee Jeejeebhoy's Hospital, and Chemical Analyst to the Bombay Government. He was the first to introduce the study of chemistry and botany into Western India. In 1863 Dr. Giraud was Syndic and Dean of the Faculty of Medicine in the University of Bombay. He was also on the staff of Lord Elphinstone, of Sir George Clerk, and of Sir Bartle Frere, as surgeon to those Governors of Bombay. Dr. Giraud has contributed papers on chemical and botanical subjects to the *Transactions of the Botanical Society of Edinburgh*, the *Annals of Natural History*, the *London and Edinburgh Philosophical Magazine*, the *Edinburgh Philosophical Journal*, the *Transactions of the Bombay Branch of the Royal Asiatic Society*, and the *Transactions of the Medical and Physical Society of Bombay*. Several of his chemical lectures have been published.

GLADSTONE, Miss Helen, Vice-Principal of Newnham College.

GLADSTONE, Professor John Hall, Ph.D., F.R.S., was born March 7, 1827, and educated at home. He studied chemistry at University College, London, under Professor Graham; and at Giessen under Professor Liebig. He took the degree of Ph.D. in 1848; lectured on Chemistry at St. Thomas's Hospital from 1850 to 1852; was elected a Fellow of the Royal Society in 1853; was a Member of the Royal Commission on Lighthouses, Buoys, and Beacons, from 1859 to 1862; a Member of the Gun Cotton Committee (appointed by the War Office) from 1864 to 1868; Fullerian Professor of Chemistry at the Royal Institution from 1874 to 1877; President of the Physical Society from its formation in 1874 to 1876; and President of the Chemical Society from 1877 to 1879. Since 1846 Dr. Gladstone has been constantly engaged in scientific research, principally in chemistry and optics, and the points of contact between these two sciences. The results have been published by the Royal and Chemical Societies, and by the British Association. For many years he has been engaged also in various philanthropic and religious movements; and since 1873 he has been one of the representatives of the Chelsea Division on the School Board for London. He is Vice-Chairman of the Board, and Chairman of the Books and Apparatus Sub-Committee, and of that on Technical Education. He is the author of "The Biography of Michael Faraday," 1872; "Points of supposed Collision between the Scriptures and Natural Science: a lecture delivered in connection with the Christian Evidence Society," 1872; "Miracles as Credentials of a Revelation: a lecture delivered in the new Hall of Science, Old Street, City Road, under the auspices of the Christian Evidence Society," 1873; "Spelling Reform, from an Educational Point of View," 1878; "The Chemistry of Secondary Batteries," 1893; and upwards of fifty memoirs in the *Philosophical Transactions* and other Proceedings of the learned societies.

GLADSTONE, The Right Hon. William Ewart, M.P., P.C., is the fourth son of the late Sir John Gladstone, Bart., of Fasque, county Kincardine, N.B., a well-known merchant of Liverpool, and was born there, Dec. 29, 1809. He was educated at Eton and Christ Church, Oxford, of which he was nominated a student in 1829, and graduated, taking a double first class, in Michaelmas term, 1831. Having spent some time in a continental tour, he was returned at the

general election in Dec. 1832, in the Conservative interest, for Newark, and entered Parliament just as the struggle of parties was at its height. On Jan. 25, 1833, he entered Lincoln's Inn, and when he had been a member for six years and three months, petitioned to have his name removed from the books of the Society, on the ground of his having given up his intention of being called to the Bar. In the House of Commons, his mercantile origin, the success of his university career, his habits of business, and his high character, recommended him to the notice of Sir Robert Peel, who, in Dec., 1834, appointed him to a junior Lordship of the Treasury, and in Feb., 1835, Under-Secretary for Colonial affairs. Mr. Gladstone retired from office, with his ministerial leader, in April, and remained in Opposition until Sir Robert Peel's return to power in Sept., 1841. On accepting office under Sir Robert Peel, in 1841, as Vice-President of the Board of Trade and Master of the Mint, Mr. Gladstone was sworn a member of the Privy Council. In his new position he had to explain and defend in the Lower House of Parliament the commercial policy of the Government; and in the discharge of this duty he had whatever advantage his mercantile origin and connection could give him. The revision of the tariff in 1842 was almost entirely the result of his energy and industry. When this laborious work was brought before the House of Commons, it was found to be as admirably executed in its details as it was complete in its mastery of general principles, and it received the sanction of both Houses with scarcely an alteration. In 1843, Mr. Gladstone succeeded the Earl of Ripon as President of the Board of Trade, but resigned that office early in 1845. In Jan., 1846, Sir Robert Peel announced his intention of proposing a modification of the Corn Laws. Mr. Gladstone, who had succeeded Lord Stanley (the late Earl of Derby) in the post of Secretary of State for the Colonies, adhered to the leader under whom he had entered upon ministerial life; but, possibly, unwilling to remain under obligations to the late Duke of Newcastle, who sympathised strongly with the Opposition party, resigned his seat for Newark, and remained for some time out of Parliament. At the general election in Aug., 1847, he was, with the late Sir Robert Harry Inglis, elected for the University of Oxford. In the Parliament of 1847-52, the questions of University Reform and the removal of Jewish disabilities were frequently and earnestly

agitated in the Lower House. Though Mr. Gladstone's early sympathies no doubt bound him strongly to the High Church and Tory party, yet he felt that on both these points the exigencies of the times required that some concessions should be made. He consequently found himself frequently opposed to his former friends, and eventually separated himself from the great body of the Conservative party, in Feb., 1851. At the general election in July following, Mr. Gladstone was re-elected for the University of Oxford, but not without a severe contest. On the formation of what is generally known as the "Coalition" ministry, under the Earl of Aberdeen, in Dec., 1852, Mr. Gladstone was appointed to the Chancellorship of the Exchequer, in which office, the thorough knowledge of finance which he had acquired, and had tested by practical experience at the Board of Trade, proved of the greatest assistance to the ministry. After the breaking up of the Aberdeen administration, or rather, on its reconstruction under Lord Palmerston at the beginning of 1855, Mr. Gladstone at first continued to occupy the same post, but he resigned in the course of a few weeks, on finding that it was not the intention of the ministry collectively to oppose the vote of censure implied in the resolution of Mr. Roebuck, in favour of the appointment of a committee of inquiry into the state of the British army before Sebastopol, and the causes of its sufferings. For some time Mr. Gladstone, who held no public office, gave Lord Palmerston's ministry an independent support. In the winter of 1858-9 he accepted, under Lord Derby's second cabinet, a special mission to the Ionian Islands, to arrange certain difficulties which had arisen in the administration of that dependency; and in June, 1859, resumed office under Lord Palmerston as Chancellor of the Exchequer. In this capacity he was mainly instrumental in repealing the paper duty, and in promoting the negotiations conducted by Mr. Cobden, which resulted in the commercial treaty between this country and France. Mr. Gladstone, though originally very jealous of an intervention on the part of the State in the matter of University Reform, lent the Government from time to time very valuable assistance, by supporting the suggestions of the Oxford University Commissioners, through his extensive personal and official influence with the authorities at Oxford as one of the representatives of that university in Parliament. Besides being eminent as a statesman, Mr. Gladstone had acquired

celebrity as an author. His first work, a treatise entitled "The State in its Relations with the Church," published in 1838 (4th edit. enlarged, 2 vols., 1841), and followed, in 1841, by his "Church Principles considered in their Results," stamped him, while still a young man, as a deep and original thinker. His views on these subjects, as they are unfolded in these treatises, had, we need scarcely say, been formed and moulded by the education and associations of Oxford, to which university they are dedicated as the first-fruits of her teaching and training. Soon after their appearance, they were thought worthy of a long and elaborate criticism by the late Lord Macaulay in the pages of the *Edinburgh Review*. Mr. Gladstone's "Remarks on Recent Commercial Legislation," published in 1845, while the country was on the eve of an important change in her commercial system, were intended to pave the way for the extensive modification in the restrictions on commerce imposed by the corn laws, and contain an able and comprehensive summary of the beneficial results of the tariff of 1842. In 1851 he published a work of a different kind, which created considerable interest both at home and abroad. During a visit to Naples in the previous year, he learned that a large number of citizens of that place, who had formed the "Opposition" in the Neapolitan Chamber of Deputies, were exiled or imprisoned by King Ferdinand, and that above 20,000 of his subjects had been thrown into prison on a charge of political disaffection. Having ascertained the truth of these statements, Mr. Gladstone wrote to the Earl of Aberdeen, urging his interposition on their behalf; and that noble lord's remonstrances proving ineffectual, he published an indignant letter on the subject of the State prosecutions at Naples, which was translated into several foreign languages, and was sent by Lord Palmerston to our ambassadors and ministers on the Continent, with orders to forward copies of it to their respective courts. In 1858 he published an elaborate work on Homer ("Studies on Homer and the Homeric Age," 3 vols.), and in July, 1861, he was solicited to become a candidate, in the Liberal interest, for South Lancashire, but refused to forsake his former constituents. Having been rejected by the University of Oxford at the general election in July, 1865, Mr. Gladstone was returned, being third on the poll, for South Lancashire. After the death of Lord Palmerston, he became leader of the House of Commons, retaining the

Chancellorship of the Exchequer in Lord Russell's second administration. Early in the session of 1866 he brought in a Reform Bill, and a motion in committee having been carried, June 18, against the Government by eleven votes, Mr. Gladstone and his colleagues resigned. The divisions in the Liberal ranks prevented him from defeating Mr. Disraeli's Reform Bill, which he strenuously opposed. In the early part of the session of 1868, Mr. Gladstone brought forward and passed through the House of Commons a series of resolutions, having for their object the disestablishment and disendowment of the Irish Church. These resolutions were the basis of the Irish Church Suspensory Bill, which, on May 22, passed a second reading in the Lower House by 312 votes to 258, but was soon afterwards rejected in the House of Peers by a majority of 95. At the general election of 1868, Mr. Gladstone stood as one of the candidates for South-west Lancashire. After a fierce contest, the result of which excited the most intense interest throughout the country, he was defeated; but this defeat did not exclude him from the House of Commons, as in anticipation of such an event, the electors of Greenwich had, a few days previous, returned him by a large majority, as one of the members for that borough. On the resignation of Mr. Disraeli's Ministry, in Dec., 1868, Mr. Gladstone succeeded that statesman as First Lord of the Treasury. The principal events of his administration were the passing of the Irish Church Disestablishment Act (1869), of the Irish Land Act (1870), and of the Elementary Education Act (1870); the abolition of Purchase in the Army by the exercise of the Royal Prerogative, in consequence of an adverse vote by the House of Lords on the Army Regulation Bill (1871); the negotiation of the Treaty of Washington respecting the Alabama Claims (1871); the passing of the Ballot Act (1872); and the Judicature Act (1873). The principal measure proposed by the Government in the session of 1873, was the University Education (Ireland) Bill, which was opposed by the Roman Catholic members, who, voting on this occasion with the Conservatives, caused the rejection of the Bill by 287 votes against 284 (March 11). Upon this Mr. Gladstone tendered his resignation to Her Majesty, and Mr. Disraeli was sent for; but as he declined to take office, Mr. Gladstone, though with reluctance, undertook (March 16) to reconstruct the cabinet. In August, 1873, immediately after the close of the session, the cabinet was considerably remodelled,

Mr. Gladstone assuming the Chancellorship of the Exchequer, in addition to his office of First Lord of the Treasury. On Jan. 24, 1874, a fortnight before both Houses were to have met for the despatch of public business, Mr. Gladstone took everybody by surprise by announcing the immediate dissolution of Parliament, and issuing his address to his constituents at Greenwich, in which he promised to abolish the Income Tax. At the general election which ensued, the votes were, for the first time, taken by secret ballot. The result proved most disastrous to the Liberal party. The returns, completed on Feb. 27, showed that 351 Conservatives had been elected and 302 Liberals, inclusive of the Home Rulers, who in point of fact, declined to identify themselves with either of the old political parties. Mr. Gladstone at once resigned, and Mr. Disraeli became Prime Minister. In the session of 1874, Mr. Gladstone, who had been re-elected for Greenwich, was rarely to be seen in his place in the House of Commons; but at its close he offered a persistent opposition to the Public Worship Regulation Bill. Even amid the turmoil of political life, Mr. Gladstone had devoted a portion of his time to literature. His "Ecce Homo," reprinted from *Good Words*, appeared in 1868; a pamphlet on the Irish Church question, entitled, "A Chapter of Autobiography," was published Nov. 23, 1885; and "Juventus Mundi: the Gods and Men of the Heroic Age," in 1869. After his unsuccessful attempt to prevent the passing of the Public Worship Regulation Act, he contributed to the *Contemporary Review* for Oct., 1874, an article on "Ritualism," which gave rise to an animated controversy. In it he asserted that "Rome had substituted for the proud boast of *semper eadem* a policy of violence and change in faith," that she "had refurbished and paraded anew every trusty tool which she was fondly thought to have disused," that, "no one could become her convert without renouncing his moral and mental freedom, and placing his civil loyalty and duty at the mercy of another," and that "she had equally repudiated modern thought and ancient history." Challenged by his Roman Catholic friends to substantiate these grave charges, Mr. Gladstone published (Nov. 7, 1874) a bulky pamphlet entitled "The Vatican Decrees in their bearing on Civil Allegiance: a Political Expostulation," which elicited numerous elaborate replies from Mgr. Capel, Dr. Newman, Archbishop Manning, and other distinguished members of the Roman

Catholic Church. Mr. Gladstone's reply to his opponents, published Feb. 24, 1875, is entitled "Vaticanism; an Answer to Replies and Reproofs." Mr. Gladstone followed up his attacks on the Roman Catholic Church in an article on "The Speeches of Pius IX." in the *Quarterly Review* for Jan., 1875. On Jan. 13, 1875, three weeks before the assembling of Parliament, Mr. Gladstone announced in a letter to Earl Granville, his determination to retire from the leadership of the Liberal party. "At the age of sixty-five," he remarked, "and after forty-two years of a laborious public life, I think myself entitled to retire on the present opportunity. This retirement is dictated to me by my personal views as to the best method of spending the closing years of my life." Soon afterwards the Marquis of Hartington was chosen by the Liberal party to be their leader in the House of Commons. Subsequently, however, Mr. Gladstone constantly took part in the discussions of that assembly. In 1876 he published "Homeric Synchronism: an Inquiry into the Time and Place of Homer," and on Sept. 6 in the same year appeared his famous pamphlet on "Bulgarian Horrors and the Question of the East." It was followed (March 13, 1877) by another pamphlet, entitled "Lessons in Massacre: an Exposition of the Conduct of the Porte in and about Bulgaria since May, 1876." Mr. Gladstone took an active part in the agitation respecting the massacres in Bulgaria, and strenuously opposed, both in and out of Parliament, the policy of the Conservative Government, which resulted in the Treaty of Berlin and the signing of the Anglo-Turkish Convention. In the autumn of 1877 (Oct. 17—Nov. 12) he paid a visit to Ireland, and was presented with the freedom of the city of Dublin. On Nov. 15 in that year he was elected Lord Rector of the University of Glasgow, succeeding Lord Beaconsfield. Mr. Gladstone sent a letter to the president of the Greenwich Liberal "Five Hundred," on March 9, 1878, stating that he should represent the borough only until the next general election. In the course of the year 1879 he contributed to the *British Quarterly Review* an article on "The Evangelical Movement; its Percentage, Progress, and Issue;" and published a collection of his fugitive writings under the title of "Gleanings of Past Years." Early in the same year (1879) he had been invited to become the Liberal candidate for Midlothian, and the crowning incident of the electoral campaign in the ensuing Parliamentary

recess was his visit to Scotland in connection with his purpose of contesting that county at the general election. He set out from Liverpool for Edinburgh on Nov. 24, and from that date, with the exception of two days' rest at Taymouth Castle, his life, till his return to Hawarden on Dec. 9, was a long succession of enthusiastic receptions and unwearied speech-making in condemnation of the policy of the Conservative Government. In the course of this tour he delivered the Rectorial Address before the University of Glasgow (Dec. 5). On the dissolution of Parliament at Easter, 1880, Mr. Gladstone renewed in Midlothian the oratorical *tours de force* of the preceding winter, and he was successful in his candidature, polling 1597 votes against 1368 recorded in favour of the Earl of Dalkeith, his Conservative opponent. When the composition of the new House of Commons was made known, it appeared that it consisted of 349 Liberals, 243 Conservatives, and 60 Home Rulers. The Earl of Beaconsfield tendered his resignation to the Queen as soon as it was manifest that the Liberal party had obtained an unquestionable majority. The Marquis of Hartington, who had been leader of the Opposition in the Lower House, and Earl Granville, the Opposition leader in the House of Peers, were sent for by Her Majesty in the first instance, but, in accordance with consultations among the chiefs of the party, they recommended the Queen to entrust the task of forming a Cabinet to Mr. Gladstone. He consented to accept the duty (April 23), and his Cabinet was constructed with a view to conciliate and to represent the different sections of the Liberal majority. Mr. Gladstone himself superadded to his duties as First Lord of the Treasury the functions of Chancellor of the Exchequer, but he resigned the latter office in 1883 into the hands of Mr. Childers. The history of Mr. Gladstone's second Ministry may be summed up in three words—Ireland, Egypt, Franchise—though of course a large number of other matters (such as Mr. Chamberlain's Bankruptcy Bill and Merchant Shipping Bill) were long under consideration. Ireland was the great question during the sessions of 1880 (May—August), 1881, 1882, and the debates on the Compensation for Disturbance Bill, on Mr. Forster's Coercion Bill, and (after the murder of Lord Frederick Cavendish and Mr. Burke, May 6, 1882) on the Crimes Bill, occupied the greater part of the time and attention of the country. What prolonged and exasperated the discussions was the method of

obstruction invented and practised not only by the followers of Mr. Parnell, but also by some members of the Tory party. After the passing of the Crimes Act, which closed a period of almost unexampled Parliamentary and administrative difficulty, Egypt began to occupy the mind of Parliament. The struggle with Arabi [q.v.] came to a head in July, when Sir B. Seymour (now Baron Alcester) bombarded the forts of Alexandria; and was ended on Sept. 13, when Sir Garnet Wolseley won the battle of Tel-el-Kebir. But Mr. Gladstone's difficulties were only just beginning. The revolt of the Arab tribes of the Soudan, the destruction of Hicks Pasha's Egyptian army, the two Suakim expeditions, the despatch of General Gordon to Khartoum, and long afterwards of Lord Wolseley's relieving force, the advance of this latter, its difficulties and its hard-won victories, its failure to reach Khartoum in time to save Gordon—these things are too fresh in the public memory to need a detailed repetition. The session of 1884 was occupied, as far as home politics are concerned, with the Franchise Bill—a Bill for extending household suffrage to the counties, and thus completing the democratising of our constitution. Passed in the Commons, it was thrown out by the Lords, who, under the guidance of Lord Salisbury, declined to pass it until the Redistribution scheme was before them. But after an autumn of popular "demonstrations" a series of conferences between the Liberal and Tory leaders were held, in which the lines of a Redistribution Bill were settled. After this both Bills passed in due course (1885); but soon afterwards, on June 9, Mr. Gladstone was overthrown by a vote on the Budget, and Lord Salisbury came into power. At the general election of Nov., 1885, the Liberals were returned with numbers almost exactly equal to those of Tories and Parnellites combined. Soon afterwards Mr. Gladstone returned to office, and at the same time caused it to be known that he was prepared to introduce a Home Rule measure for Ireland. This broke up the Liberal party. Lord Hartington and others refused office, and Mr. Chamberlain and Mr. Trevelyan only accepted on grounds which were soon afterwards shown to be untenable. Mr. Gladstone introduced his Home Rule Bill in a long and powerful speech on April 8 (the scene in the House before, during, and after the speech being one that will not be forgotten), and on June 9 the second reading was rejected by a majority of 30. He appealed to the

country, and as a result an overwhelming majority of Conservatives and Unionist Liberals was returned. He resigned without meeting Parliament, and Lord Salisbury became for the second time Prime Minister, Aug. 3, 1886. On Dec. 29, 1889, Mr. Gladstone celebrated his eightieth birthday, and received congratulations from all parts of the world, the Prince and Princess of Wales being of those who offered their congratulations to the venerable statesman. On March 3, 1890, Mr. Gladstone delivered what was considered one of his finest orations in Parliament, the subject being The "Parnell Commission." In the autumn of that year, Mr. Parnell having been found guilty of committing adultery with the wife of Captain O'Shea, Mr. Gladstone justly demanded of Mr. Parnell, in the interests of Ireland, that he should retire from the leadership of the Irish party. This occasioned a split among the Irish Members, the majority of whom, to their honour be it said, sided with the just demands of Mr. Gladstone. His latest literary work is "The Impregnable Rock of Holy Scripture," originally published in *Good Words* in 1890. In 1839 Mr. Gladstone married Catherine, sister of the late Sir Stephen Glynne, M.P., and of the late Lady Lyttelton; and on July 25, 1889, Mr. and Mrs. Gladstone celebrated their golden wedding. Of his sons, the eldest sat in Parliament for some time as member for East Worcestershire; the second, the Rev. Stephen Gladstone, is Rector of Hawarden; and the third, Mr. Herbert Gladstone, has sat, since 1880, for Leeds.

GLAISHER, James, F.R.S., was born in London on April 7, 1809. In 1829 he was appointed Assistant on the Principal Triangulation of the Ordnance Survey of Ireland, and in that capacity was charged with the meteorological observations on the mountains Bencorr in Galway, and the Keeper mountain near Limerick. These observations were published by Sir Henry James in 1856. From 1833 to 1836 Mr. Glaisher was Assistant at the Cambridge Observatory. In 1836 he was appointed Assistant in the Astronomical Department of the Royal Observatory, Greenwich, and in 1840, on the establishment of the Magnetical and Meteorological Department, he was appointed its Superintendent, and continued to hold that office until his retirement from the public service at the end of 1874. In 1841 he began the series of quarterly and annual meteorological reports which have been published by the Registrar-General in his *Quarterly and Annual Reports*, without

any interruption from that time to the present. These meteorological reports are the result of the reduction and discussion of the observations of about sixty voluntary observers scattered over England. Mr. Glaisher was elected a Fellow of the Royal Society in 1849, and was the founder of the Royal Meteorological Society, of which he was Secretary for nearly twenty years, and President in 1867-8. He is also a past President of the Royal Microscopical Society. On the death of the late Lord Chief Baron Sir F. Pollock, he succeeded him as third President of the Photographic Society of Great Britain, an office which he still holds. He has also since 1880 been the Chairman of the Executive Committee of the Palestine Exploration Fund. He was a Juror in the Class of Scientific and Philosophical Instruments at the Exhibitions of 1851 and 1863, and was the Reporter of this Class in 1851. He is the author of a "Report on the Meteorology of London in relation to the Cholera-epidemic of 1853-4," published by the Board of Health in 1855, and of a "Report on the Meteorology of India in relation to the Health of the Troops," 1863, which formed an Appendix to a Report of a Royal Commission on the Army in India. He was a member of the Royal Commission on the Warming and Ventilation of Dwellings (1857), for which he conducted most of the experiments, and wrote the report. He is the author of more than a hundred books and papers relating to astronomy, meteorology, and the theory of numbers. In 1845 he published his "Hygrometrical Tables," which has passed through seven editions, and is regarded as a fundamental work in connection with meteorology. "A Memoir on the Radiation of Heat from various Substances," published in the "Philosophical Transactions" for 1848, and certain papers on the forms of snow crystals, published in 1855, are also noticeable. Between 1863 and 1866 he made twenty-nine balloon ascents for scientific purposes, in one of which (Sept. 5, 1863), he attained the greatest height yet reached (nearly seven miles). He was insensible for more than ten minutes, and Mr. Coxwell, the aeronaut, only just succeeded in opening the valve by pulling it with his teeth. The results are printed in the Reports of the British Association. The observations made were very numerous and varied, and still form a unique series. Some of the results have been published in a popular form in "Travels in the Air." Mr. Glaisher is also President of the Aeronautical Society. He translated

and edited "The Atmosphere" (by Flammarion), and "The World of Comets" (by Guillemin). After his retirement from the Royal Observatory he devoted himself to the completion of the Factor Tables begun by Burckhardt in 1814, and continued by Dase in 1862-5. Burckhardt published the first three millions, and Dase the seventh, eighth, and ninth. The three intervening millions have been calculated by Mr. Glaisher, and published, with a full enumeration relating to the whole nine millions, in 3 vols., 4to, 1879-83.

GLAISHER, James Whitbread Lee, Sc.D., F.R.S., is the eldest and only surviving son of James Glaisher, F.R.S., and was born at Lewisham, Kent, on Nov. 5, 1848. He was educated at St. Paul's School, 1858-67, and was senior Campden Exhibitioner in 1867. He proceeded to Trinity College, Cambridge; was elected scholar in 1868, and graduated as second wrangler in the Mathematical Tripos of 1871. In that year he was elected Fellow of Trinity, and was appointed assistant-tutor at the same time; tutor in 1883; and senior tutor in 1886. In 1887 he received the degree of Sc.D. from his own university. He was elected Fellow of the Royal Society in 1875; was President of the Cambridge Philosophical Society 1882-84, of the London Mathematical Society, 1884-86, and of the Royal Astronomical Society, 1886-88. He was Moderator in 1877, and examiner for the Mathematical Tripos in 1878, and (second post only) in 1886, 1887, and 1888. Dr. Glaisher's writings, all which are mathematical, relate principally to the subjects of "Elliptic Functions," "Definite Integrals," "Theory of Numbers," mathematical tables, and mathematical bibliography.

GLASGOW and GALLOWAY, Bishop of. See HARRISON, THE RT. REV. WM. T., D.D.

GLAZEBROOK, R. T., M.A., F.R.S., son of N. S. Glazebrook, Surgeon, of West Derby, near Liverpool, was born in 1854, educated at Liverpool College, and entered at Trinity College, Cambridge, in 1872; became scholar and prizeman of the College, and took his degree of B.A. 1876 as fifth wrangler; and was elected Fellow in 1877. He became Demonstrator of Physics at the Cavendish Laboratory in 1880, and has held that post up to the present date. He is also Lecturer and assistant tutor of Trinity College; and was elected a Fellow of the Royal Society in 1882; and Treasurer of

the Cambridge Philosophical Society. He was Hopkins' Prizeman, 1888; Secretary of the Electrical Standards Committee of the British Association; Examiner in the University of London. He is the author of various papers on Mathematical and Experimental Physics published in the Transactions of the Royal Society and elsewhere; and of a Text-book of Physical Optics; and (jointly with Mr. W. N. Shaw) a Text-book of Practical Physics. His writings treat chiefly of Optical and Electrical questions. One of the most important contains a verification of Fresnel's theory of double refraction for a bi-axial crystal; while others deal with the absolute resistance of the B.A. Unit, and the specific resistance of mercury. In some recent papers, published in the *Philosophical Magazine*, the theory of double refraction is treated from a dynamical standpoint, suggested by some work of Sir Wm. Thomson's.

GLEICHEN (Count), H.S.H. Prince Victor Ferdinand Francis Eugene Gustavus Adolphus Constantine Frederic, of Hohenlohe, Langenburg, was born at Langenburg, Nov. 11, 1833. He is brother of the reigning Prince Hermann Ernest Francis Bernard, and son of the late Prince Ernest, and the Princess Feodor, daughter of the late Prince Emich Charles of Leiningen. Prince Victor of Hohenlohe is therefore the nephew of Her Majesty the Queen. He is a retired captain in the Royal Navy, and served in the Baltic campaign of 1854, with the Naval Brigade before Sebastopol in 1855, and in the China war of 1857. In common with many members of the Royal family, he possesses a keen taste for the arts, and has exhibited statues at the Royal Academy and other exhibitions of sculpture since 1867. Among his numerous works may be mentioned a fine marble group of "The Deluge;" an ideal figure for his mother's grave at Baden, several statuettes and busts of members of the Royal family, and a monumental figure of Sir George Seymour. In 1875 he undertook, at the desire of Colonel Loyd Lindsay, a colossal statue of Alfred the Great, in Sicilian marble, for erection in the market-place of Wantage, the birthplace of the Saxon monarch. On the completion of the statue in 1877 it was presented to the inhabitants of the town by Colonel Lindsay. The ceremony of inauguration (July 14, 1877), was performed by the Prince of Wales, the cousin of the sculptor, and was the occasion of great rejoicings in the neighbourhood. Prince Victor of Hohenlohe holds the office of Governor

and Constable of Windsor Castle, and bears for himself, his wife (Laura, youngest daughter of the late Admiral Sir George Seymour, G.C.B.), and for his descendants by this marriage, his second title of Count Gleichen.

GLENN, Robert George, LL.B., J.P., Recorder of Croydon, was born June 5, 1844, in London, and is the son of the late R. Glenn, by his wife Rosalind, grand-daughter of the Rev. Charles Wesley. He was educated at Christ's Hospital, where he became a "Grecian," and obtained an open exhibition at the University. He proceeded to Magdalene College, Cambridge, where he gained an open scholarship in classics and mathematics, and was classical prizeman in his first year; and was head of the second class in the Law Tripos, 1864, and took the degree of LL.B. He was called to the Bar by the Inner Temple in 1867, and has continued to practise since. He supported the petitions for incorporation presented by Croydon, Tunbridge Wells, Bournemouth, and Lowestoft; was appointed by the Charter to revise the first Burgess's Roll at Croydon, and sat there for some years as Revising Assessor. He established the *Norwood Post*, which was contributed to by the late Professor Palmer and other writers of eminence; was appointed first Recorder of Croydon in 1889, and is, by virtue of his office, a J.P. for the borough; is the author of "A Manual of the Laws affecting Medical Men," and is Standing Counsel to the Hospital Saturday Fund. He married in 1871 Eleanor, daughter of Harry Hayward, Esq., of Wilsford, Wilts, and has issue, two sons, Cecil Hayward and Hugh Wesley, and one daughter, Elsie Glenn.

GLOUCESTER and BRISTOL, Bishop of.
See ELLICOTT, THE RT. REV. CHARLES JOHN.

GLOVER, James Grey, M.D., Edin. (1854), is the sixth son of the late Alderman Glover, J.P., of South Shields, and was born in that town on May 11, 1832. He studied in the University of Edinburgh; has been on the active staff of the *Lancet* for many years, first under the late Dr. James G. Wakley, and now under the joint editorship of Mr. Thomas H. Wakley and Mr. Thomas Wakley. Dr. Glover is a Member of the General Medical Council of Education and Registration of the United Kingdom. He was elected to that body in Nov., 1886, under the provisions of the Medical Act of that year, as Direct Representative of the Medical Profession in England and

Wales, together with Mr. Wheelhouse, of Leeds, and Sir Walter B. Foster, M.D., M.P., of Birmingham. Dr. Glover married in 1869, Mary, daughter of the late William Muller, Esq., of Clapton.

GNEIST, Rudolph, Doctor of Laws and Philosophy, Professor of Jurisprudence in the University of Berlin, was born in that city Aug. 13, 1816. After the usual course of study, he adopted the legal profession, and in 1836 became "Auscultator." In 1841 he was Assessor at the Superior Court, or "Chamber;" and in 1846 Assistant-Judge in the Supreme Tribunal. This post, and with it the judicial career, he abandoned in 1850. Already, in 1839, he was a *privat-docent* in law; in 1844, professor; in 1872-3, rector and pro-rector. His political career began in 1848, with a seat in the Municipal Council. From 1858 to the present time, he has been a member of the Prussian Lower House; in the Imperial Parliament he has sat from the first. In his earlier days he belonged to the so-called "Faction Vincke;" later he was leader of the Left Centre; and now he ranks among the National Liberals. In 1875 he was again called to the Bench as a Senior Judge of the Supreme Court of Prussia and a member of the Privy Council. By an order of Emperor William I. he was nominated instructor to Prince William (the present Emperor William II.) in matters of political science. He is the author of numerous works on historical, constitutional and social subjects, the most important being: "The Constitution of Trial by Jury in Germany," 1849; "Nobility and Knighthood in England," 1853; "The English Constitutional and Administrative Law of the Present Day," 1857-63; "The Self-Government in England," 1863; "The Administrative Law in England," 3rd edit., 1883-84, two vols.; "Der Rechtsstaat," 1872; "Die Preussische Finanzreform," 1881; "Englische Verfassungsgeschichte," 1882. "Geschichte des Engliches Parlament," 1886. The last-named have been recently translated into English.

GOBLET, René, French Statesman, was born at Aire-sur-la-Lys, Sept. 26, 1828. He was called to the Bar at Amiens, and under the Empire took an active part in the establishment of a Liberal newspaper. He resigned his legal appointments, in 1871, in order to enter political life, and was elected to the National Assembly. He identified himself with the Republican Left, and in the important debates in which he took part soon made his mark

as an orator. At the general election of 1876 he failed in his candidature for the representation of Amiens, but in the following year was successful, and in 1879 was appointed Under-Secretary of State for Justice. At the same time he took a prominent part in the affairs of his own town, and was Mayor of Amiens, and representative for its north-east division at the Council of the Somme. In Aug., 1881, he was re-elected for Amiens, and in M. de Freycinet's Cabinet of 1882 was appointed Minister of the Interior. He resigned with his colleagues on the Egyptian Question on July 29 of the same year. After the fall of M. Ferry, M. Goblet was appointed Minister of Education and Public Worship in the Cabinet of M. Brisson, in which capacity he introduced many important reforms. He resigned office with the Brisson Ministry in 1885, but was appointed to the same post under the new Prime Minister M. de Freycinet (Jan., 1886). In the long and important debate before the Senate on the subject of lay organization and primary education, M. Goblet made several striking speeches, that of Feb. 4 in particular being pronounced so admirable that it was ordered by the Senate to be published throughout the whole of France. On the fall of the Freycinet Cabinet in Dec., 1886, M. Goblet became Prime Minister, taking upon himself the additional offices of Minister of the Interior and *ad interim* Minister of Foreign Affairs. M. Goblet is a progressive Republican, and still takes a deep interest in politics, although at the 1889 election he was defeated by a coalition of Monarchists and Boulangists.

GODDARD, Arabella. See DAVISON, MRS.

GODLEY, John Arthur, C.B., son of the late J. R. Godley, of Killegar, co. Leitrim, and of Charlotte, daughter of the late C. G. Wynne, Esq., of Voelas, Denbighshire, was born in Portman Square, London, June 17, 1847, and educated at Rugby and at Balliol College, Oxford. He obtained the Hertford, Ireland, and Eldon Law Scholarships, and other distinctions, and took his M.A. degree in 1873. He was a Fellow of Hertford College from 1874 to 1881, was called to the Bar (Lincoln's Inn) in 1876; was private secretary to the Right Hon. W. E. Gladstone, 1872-74; to Earl Granville, 1875-80; and again to Mr. Gladstone, 1880-82; was a Commissioner of Inland Revenue, 1882-83, and in 1883 was appointed permanent Under-Secretary of State for India, which post he now holds.

He was made a C.B. in 1882. In 1871 Mr. Godley married Miss Sarah James, only daughter of the first Lord Northbourne.

GODWIN, Parke, was born at Paterson, New Jersey, Feb. 25, 1816. He graduated from Princeton College in 1834, studied law and was admitted to practice, but preferred literary pursuits; and from 1837 until within the last few years was connected with the *New York Evening Post*. He edited in 1843-4 *The Pathfinder*, a literary journal, and was for some years a contributor to the *Democratic Review*. Of *Putnam's Magazine*, he was for a considerable time one of the principal editors, and always a contributor. Two volumes of critical and miscellaneous essays in that magazine have been collected under the titles, "Political Essays" and "Out of the Past," 1870. Besides his almost continuous journalistic labour, he has translated and edited Goethe's "Autobiography" and Zschokke's "Tales;" and compiled a "Handbook of Universal Biography," 1851; a new edit. entitled "Cyclopædia of Biography," 1878; and has written, among other works, "A Popular View of the Doctrines of Fourier," 1844; "Constructive Democracy;" and "Vala, a Mythological Tale," 1851. Many years ago he began an elaborate "History of France," of which only the first volume has been published. During the administration of President Polk he was Deputy Collector of New York, and subsequently took an active part in the formation of the Republican Party. In 1883 he published a "Biography of Wm. Cullen Bryant," in 2 vols., and superintended a new edition of his poems and prose writings in 4 vols. He married a daughter of William Cullen Bryant.

GOE, The Rt. Rev. Field Flowers, D.D., Bishop of Melbourne, son of the late Mr. Field Flowers Goë, solicitor, was born at Louth, Lincolnshire, in 1832. He was educated at King Edward's Grammar School, Louth; and, after studying law for a time, went to Oxford in 1854, graduating at Magdalen Hall (now Hertford College) in 1857. He was ordained in 1858 by the Archbishop of York to the Curacy of Christ Church, Hull, and in the same year was ordained priest, and succeeded the Rev. John King as Incumbent of that church. He held this post until 1873, when he was appointed to the Rectory of Sunderland. Four years later he was appointed by the Lord Chancellor to the Rectory of St. George's, Bloomsbury. In 1884 he was

Select Preacher to the University of Cambridge. Mr. Goe took an active part in the meetings of the Church Congress and in parochial missions, and was one of the representatives of the Rural Deanery of St. George's, Bloomsbury, in the London Diocesan Conference. In Oct., 1886, he was selected by the Archbishops of Canterbury and York, the Bishops of Durham and Manchester, and Bishop Perry, by delegation from the Melbourne Board of Electors, to fill the Bishopric of Melbourne, vacant by the translation of Dr. Moorhouse to the See of Manchester. He was consecrated in Westminster Abbey on St. Matthias' Day, 1887, by the Archbishop of Canterbury (Dr. Benson).

GOLDSMID, Major-General Sir Frederic John, C.B., K.C.S.I., born at Milan, Aug. 19, 1818, was educated at the private English School of the Rev. Mr. Maturin in Paris, at King's College School, and at King's College, London. He was appointed ensign in the Madras Army in 1839; lieutenant in 1840; captain in 1851; brevet major in 1856; major in 1861; brevet lieutenant-colonel in 1863; lieutenant-colonel in 1865; brevet colonel in 1870; and retired with rank of major-general from Jan. 1, 1875. From 1839 to 1856 he held several military staff appointments, general and regimental; but from 1852 to 1873 he was chiefly in civil and political employ. From 1865 to 1870 he was chief director of the Government Indo-European Telegraph; from 1870 to 1873, Boundary Commissioner and Arbitrator for the Eastern Frontiers of Persia, with the rank of major-general. He served in the Chinese campaign of 1840-42; and with the Turkish troops in the Eastern Crimea in 1855-56; was afterwards employed on several official missions, to Makran in 1856, 1863, and 1869; through Turkish Arabia and Asia Minor to Constantinople in 1864; to Eastern Persia and Baluchistan in 1866-70-71; and Western-Afghanistan in 1872. He laid down the Perso-Baluch frontier in 1871; and arbitrated on the Perso-Afghan frontier in 1872. In 1877 he was appointed British Commissioner on the International Commission for Immigration of Indian Coolies in the French island of Bourbon, and was employed on a later commission assembled in Paris on the same question in 1880. He was English Controller of Daira Sanieh, in Egypt, from 1880 to 1883; and in 1882 he organized a Local Intelligence Department at Alexandria, which had existence throughout the war. For this last-named service, at the close of opera-

tions, he, and those employed under him, received the thanks of the General commanding the expeditionary force, and of the War Office. In 1883 he proceeded to the Congo for H.M. the King of the Belgians; but returned at the close of the year to Europe on account of ill-health. Besides pamphlets or miscellaneous writings of a minor character, he brought out in 1874, a volume entitled "Telegraph and Travel;" edited "Eastern Persia" in 1876; and published the "Life of Sir James Outram," 2 vols., in 1880. He was created a C.B. in 1866; K.C.S.I. in 1870; has the 2nd class Order of the Osmanieh, 4th class Order of the Medjidieh, the China Medal, Turkish War Medal, Egyptian War Medal, and Khedive's Bronze Star. He is a Vice-President of the Royal Geographical and of the Royal Asiatic Societies.

GOLDSMID, Sir Julian, M.P., eldest son of the late Frederick Goldsmid, was born in Oct. 1838. He was educated at University College, London, and was called to the Bar at Lincoln's Inn in Jan. 1864, when he chose the Oxford Circuit. He is a magistrate for Kent, Middlesex, and London, and a deputy-lieutenant for Kent, Sussex, and Berks. He is a Fellow of University College, London, and a member of the Senate of the University of London. He sat as a Liberal for Honiton from March, 1866, till its disfranchisement in 1868, when he was an unsuccessful candidate for Mid-Surrey. He was returned for Rochester in July, 1870, and sat for that constituency until 1880. He was returned for South St. Pancras in 1885, and again as a Unionist Liberal in 1886.

GONCOURT, Edmond Louis Antoine Huot de, a French writer, born at Nancy, May 26, 1822, is a grandson of Jean Antoine Huot de Goncourt, a deputy in the National Assembly of 1789. As an author he became known by a long series of works written in conjunction with his brother, Jules Alfred Huot de Goncourt, who was born at Paris in 1830, and who died at Auteuil in June, 1870. Some were novels; others, and the more important, were a series of studies on the society and art of the 18th century in France. The two brothers published in their joint names, "En 18 . . .," a novel, 1851; "Salon de 1852;" "Les Mystères des Théâtres," and "La Lorette," 1853; "Histoire de la Société Française pendant la Révolution, et sous la Direction," 2 vols., 1854-5; "La Révolution dans les Mœurs," 1854; "La Peinture à

l'Exposition Universelle de 1855;" "Les Actrices," and "Une Voiture de Masques," 1856, republished under the title of "Quelques Créatures de ce Temps," 1876; "Portraits intimes du XVIII^e Siècle," two series, 1856-8; "Sophie Arnould, d'après sa correspondance et ses mémoires inédits," 1857; "Histoire de Marie-Antoinette," 1858; "Les Maîtresses de Louis XV," 2 vols., and "Les Hommes des Lettres," 1860, a novel republished under the title of "Charles Demailly," 1869; "Sœur Philomène," a novel, 1861; "La Femme au XVIII^e Siècle," 1862, reprinted in 1877, with the addition of a chapter entitled "L'Amour au XVIII^e Siècle;" "Renée Mauperm," a novel, 1864; "Germinie Lacerteux," 1865; "Idées et Sensations," 1866; "Manette Salomon," 2 vols., 1867; "Madame Gervaisais," 1869; "Gavarni, l'Homme et l'Artiste," 1873; "L'Art au XVIII^e Siècle," 3 vols., 1874; and three dramas, "Henriette Maréchal," 1865; "La Patrie en danger," 1873; and "Germinie Lacerteux," a piece based upon the novel issued in 1865. Since the death of his brother, M. Edmond de Goncourt has published under his own name, "L'Œuvre de Watteau," a classified catalogue, 1876; "L'Œuvre de Prudhon," 1877; "La Fille Elisa," a novel, 1878; "Les Frères Zemganno," a novel, 1879; "La Maison d'un Artist," 2 vols., 1881; "La Faustin," roman, 1882; "Chérie," roman, 1884; "Madame Saint-Huberty, biographie de la Chanteuse," 1885; "Mademoiselle Clairon, biographie de la Tragédienne," 1890. M. Edmond de Goncourt has recently published "Journal des Goncourt, Mémoires de la Vie Littéraire, 1851-70," 3 vols., and in March, 1890, commenced the publication of a second series extending from 1870 to 1890.

GONZALEZ, Gen. Manuel, Mexican soldier and statesman, was born near Matamoros Tamaulipas, Mexico, in 1820. He was intended for a mercantile career, but relinquished it to enter the army. From 1853 to 1876 he took an active part in the various attempts made by the Liberals to overthrow the successive Mexican governments, and rose to the rank of Brigadier-General, which Juarez conferred upon him in 1867. On the accession of the Presidency of Diaz, Gonzalez was appointed Secretary of War, 1878, and subsequently was made Commander-in-Chief of the North-Western District, 1879. For his services in quelling seditious movements in this region he received from the Mexican Congress the rank of General of Division, and the title of "Pacificator of the Occident."

In 1880 he succeeded Diaz as President, but his administration was not a successful one, and he left the government at the end of his term, in 1884, with a bankrupt exchequer. Since 1885 he has been Governor of the State of Guanajuato.

GOODALE, George Lincoln, M.D., American botanist, was born at Saco, Maine, Aug. 3, 1839. He graduated at Amherst College in 1860, and received his degree of M.D. at Bowdoin College and at Harvard in 1863. He began the practice of his profession at Portland (Maine), and was soon appointed Instructor in Anatomy at the medical school located there, assuming also, in 1864, the duties of State Assayer of Maine. In 1867 he became Professor of Natural Science and Applied Chemistry in Bowdoin; and in 1868 was given the chair of Materia Medica in the Maine Medical School, and was also made a Member of the Board of Agriculture. These positions he resigned in 1872, to accept the Instructorship in Botany, and the University Lectureship on Vegetable Physiology at Harvard. In 1873 he was made Assistant Professor of Vegetable Physiology; in 1878 Professor of Botany; and in 1879 Director of the Botanic Garden. He was elected a Member of the Council of Harvard College Library in 1875; and a Member of the Faculty of the Museum of Comparative Anatomy in 1881. Professor Goodale is President of the American Association for the Advancement of Science, and a Member of the American Academy of Arts and Sciences, and of many other scientific bodies. Among his publications are: "Wild Flowers of North America," 1882; "Vegetable Physiology," 1885; and "Vegetable Histology," 1885. The last two have been combined with other matter to form the second part ("Physiological Botany") of "Gray's Botanical Text-Book," 1885.

GOODALL, Frederick, R.A., son of the late Mr. Edward Goodall, the eminent engraver (who died April 11, 1870), was born in London, Sept. 17, 1822. Before he was fifteen he had won the "Isis," and the large silver medal of the Society of Arts. In 1838 he went on a sketching tour through Normandy. In 1839, when but seventeen, he exhibited his first picture at the Academy—"Card Players." Subsequent visits to Normandy, Brittany, and Ireland, supplied him with materials for a long series of popular pictures. One of these early pictures, "The Return from Christening," received a prize of £50 from the British Institution. Two others, "The Tired Soldier," 1842, and

"The Village Holiday," 1847, are now in the National Gallery. Other important pictures drawn from old English life were "Hunt the Slipper" and "Raising the Maypole," 1851. A charming scene from Milton's "L'Allegro" was in a walk he had seldom trod. In 1853 he was elected an Associate of the Academy. Two years later he exhibited "An Episode of the Happier Days of Charles I.," representing a water party in the Royal barge at Hampton Court: and after this came "The Swing," 1855, and "Cranmer at the Traitor's Gate," 1856, engraved in line by his father. In 1857 Mr. Goodall visited Venice and Chioggia, where he made studies for "Felice Ballarin reciting Tasso," which was not completed for the following exhibition, but exhibited in 1859. The winter of 1858 and the spring of 1859 he spent in Egypt and several pictures have been the result of that journey. In 1863 he was elected a Royal Academician. Since then he has exhibited "The Song of the Nubian Slave," his diploma work, and "The Messenger from Sinai at the Wells of Moses," in 1864; "Rising of the Nile," in 1865; "Hagar and Ishmael," in 1866; "Mater Purissima" and "Mater Dolorosa," in 1868; "Jochebed," in 1870; "The Head of the House at Prayer," in 1872; "An Arab Improvisatore," and "Subsiding of the Nile," in 1873; "Rachel and her Flock," "Agriculture in the Valley of the Nile," "A Fruit Woman of Cairo," "A Seller of Doves," and "The Day of Palm Offering," in 1875; "An Intruder on the Bedouin's Pasture," "The Holy Mother," and "Sheep-washing near the Pyramids of Ghizeh," in 1876; "Glencoe," "The Time of Roses," and "The Water-carriers: Egypt," in 1877; "Oxhey Place, Herts," "The Daughters of Laban," and "Palm Sunday," in 1878; "Water for the Camp," "Sarah and Isaac," and "Hagar and Ishmael," in 1879; "Moving to Fresh Pastures," "Time of the Overflow, Egypt," "Hannah's Vow," "An Egyptian Pastoral," and "Holy Childhood," in 1880; "The Road to Mecca," "The Return from Mecca," "Artist and Model," and "Rebecca," in 1881; "Memphis," and "The Arrival at the Well," in 1882; "Crossing the Desert," "Returning from the Pasture, Ghizeh," "A Coffee Shop, Cairo," "Outside the Tent," and "Water for the Camp," 1883; "A New Light in the Hareem," "The Flight into Egypt," "Sword of the Faithful," 1884; "Finding of Moses," "The Holy Child," "Gordon's last Messenger," 1885; "Misery," 1887; "Leading the Flock," 1889; and "The Thames from Windsor Castle," 1890.

GOODE, George Brown, American ichthyologist, was born at New Albany, Indiana, Feb. 13, 1851. He graduated at the Wesleyan College in 1870, and in 1871 took charge of the College Museum. He joined the staff of the Smithsonian Museum in 1873, and from 1874 to 1887 was Chief of the Division of Fisheries. On the organization of the National Museum he became its Assistant Director. He supervised the Natural History department of the government at the Philadelphia Exhibition in 1876; was the United States Commissioner to the Fisheries Exhibition at Berlin in 1880, and at London in 1883; and was a Member of the Government Executive Board for the New Orleans, Cincinnati, and Louisville Expositions in 1884. In 1887 he succeeded the late Professor Baird as United States Fish Commissioner. His published papers on ichthyology, museum administration and fish economy number over a hundred. He has issued, in book-form, "Catalogue of the Fishes of the Bermudas," 1876; "Annual Resources of the United States," 1876; with T. H. Bean, "A Catalogue of the Fishes of Essex County," 1879; "Game Fishes of the United States," 1879; "American Fisheries: a History of the Menhaden," 1880; "Materials for a History of the American Mackerel Fishery," 1882; "Materials for a History of the Sword-Fishes," 1882; "The Natural History of the Bermuda Islands," edited 1882; "A Review of the Fishing Industries of the United States," 1883; "The Fisheries of the United States," 1884; "Status of the United States Fish Commission in 1884," 1884; "Beginning of Natural History in America," 1886; "Britons, Saxons and Virginians," 1887; "American Fishes," and "Virginia Cousins," 1888.

GOODWIN, The Right Rev. Harvey, D.D., Bishop of Carlisle, formerly Dean of Ely, was born at King's Lynn, Norfolk, in 1818, and educated privately. Entering Caius College, Cambridge, in 1836, he graduated as second Wrangler and Smith's Prizeman in 1840. He was Fellow and Mathematical Lecturer of his College, and incumbent of St. Edward's Church, Cambridge, from 1848 to 1858, during part of which time he held the Hulsean Lectureship in the University. He was Dean of Ely from 1858 to 1869, when he was appointed Bishop of Carlisle in succession to Dr. Waldegrave. He is the author of "A Memoir of Bishop Mackenzie," "Essays on the Pentateuch," a "Commentary on St. Matthew, St. Mark, and St. Luke," "Hulsean Lec-

tures," in 1855-6; "Lectures on the Church Catechism;" a "Guide to the Parish Church," Parish Sermons, University Sermons, etc., "Walks in the Region of Science and Faith," 1883; "The Foundations of the Creed," 1889; and of some mathematical treatises, including an "Elementary Course of Mathematics," "Elementary Statics," and "Elementary Dynamics."

GORDON, The Hon. Sir Arthur Hamilton, Governor of Ceylon, is the youngest son of the fourth Earl of Aberdeen, and was born in 1817, and educated at Trinity College, Cambridge. He sat in Parliament as Liberal member for Beverley from 1854 to 1857; was Secretary to the special mission to the Ionian Islands, in 1858; appointed Governor of New Brunswick, in 1866; Governor of Trinidad, in 1870; the first Governor of the Fiji Islands, in 1874; High Commissioner for the Western Pacific, in 1877; Governor of New Zealand, in 1880; and Governor of Ceylon, in 1883.

GORDON, John B., born in Upson county, Georgia, Feb. 6, 1832, was educated at the University of Georgia, and admitted to the Bar. At the beginning of the civil war he entered the Confederate army as Captain, and rose to the rank of Lieut.-General. He became prominent towards the end of the war, especially during the protracted siege of Petersburg by General Grant. He commanded at the close of the war one wing of Lee's army, and led the last assault at Appomattox Court House. The State of Georgia having been "reconstructed," as a member of the Union, he was in 1868, the Democratic candidate for Governor, but his Republican opponent was declared to be elected. In 1873 he was chosen Senator from Georgia, and re-elected in 1879, but resigned his seat in 1880. He took a leading part in the Senate, and although a Democrat, gave a moderate support to the policy of President Hayes. On his retirement from the Senate he became interested in various railroad enterprises, but in 1886 was elected Governor of Georgia, an office to which he was re-elected in 1888, and which he now (1890) holds.

GORDON-CUMMING, Miss Constance Frederica, sixth daughter of Sir William Gordon-Cumming, of Altyre and Gordonstoun, Morayshire, was born at Altyre, May 26, 1837. Homes so beautiful early inspired in her a deep love of nature, but for the first thirty years of her life, her wanderings were entirely confined to

Great Britain. Then an invitation to join a married sister in the Himalayas resulted in her penetrating to the boundaries of Chinese Tartary, and, the taste for travel being now fairly awakened, the next twelve years were spent in various Oriental countries, and Pacific Isles. Miss Gordon-Cumming has published accounts of her travels in the following volumes: "In the Hebrides;" "Via Cornwall to Egypt;" "In the Himalayas;" "At Home in Fiji;" "A Lady's Cruise in a French Man-of-War;" "Fire Fountains of Hawaii;" "Granite Crags of California;" "Wanderings in China;" and lastly, "Work for the Blind in China:" this work of training the blind of China as successful mission agents, and especially of training blind girls to read and sing in the secluded homes of their countrywomen, being one in which Miss Gordon-Cumming takes the deepest interest.

GORE, The Rev. Charles, M.A., is the son of the Hon. Charles Alexander Gore, and the nephew of the fourth Earl of Arran, and was born in 1853. He is a Fellow of Trinity College, Oxford, and Principal of the Pusey Library, and one of the literary executors of the will of the late Canon Liddon. He has "come to the front" principally as the editor of "Lux Mundi," a book which has excited great discussion among theologians. He is the Bampton Lecturer for 1891.

GORE, George, LL.D., F.R.S., was born Jan., 1826, at Bristol, and attended a private school until of the age of twelve years; but has otherwise been entirely self-educated and self-trained, without the aid of scientific teachers, lectures, or lessons, or the advantage of working with scientific persons. Yet so well did he educate himself, and so important were his scientific discourses that he was elected a Fellow of the Royal Society, 1865, and received the honorary degree of LL.D. of Edinburgh University, 1877. He was Lecturer on Physics and Chemistry during many years at the Grammar School of King Edward VI., Birmingham; and is the author of "Theory and Practice of Electro-deposition," 1856; "The Art of Electro-metallurgy," 1877; "The Art of Scientific Discovery," 1878; "The Scientific Basis of National Progress and Morality," 1882; "Electro-chemistry," 1885; and "The Art of Electrolytic Separation and Refining of Metals," 1890. He has made numerous scientific discoveries in physics and chemistry, which have been published in a series of papers in the Philosophical Transactions of the

Royal Society, the Proceedings of that Society, the Proceedings of the Birmingham Philosophical Society, the *Philosophical Magazine*, &c. A list of most of his original electrical researches is given in "The Electrician's Directory," 1889, p. 163. He is chiefly distinguished by his discoveries in, and writings upon, the subjects of Electro-chemistry, Electro-metallurgy, and Chemistry; his experimental investigations of the highly dangerous substance anhydrous hydrofluoric acid and the fluorides; his discovery of "explosive antimony," and his recent invention of the "voltaic balance," by means of which he has been enabled to discover and investigate invisible molecular changes (and measure their rates) in a number of liquids, to measure the effect of light upon chlorine-water, to discover a number of isomeric liquids, to prove the existence of several hundreds of new chemical substances termed "solution compounds," and to detect the influence of one part by weight of chlorine in 500,000 million parts of water. He was the first to observe the remarkable molecular change which occurs in iron at a dull red heat, his original observation of the decolorising effect of chlorine-water on crude phosphorus gave rise to the present mode of bleaching that substance, and his solution for electro-depositing nickel, made known in the year 1856, was the first to be commercially employed in electro-plating articles with nickel. Of his writings on the subject of original scientific research an article entitled "The National Importance of Scientific Research," published in *The Westminster Review*, April 1873, excited public attention, and received favourable notice of many members of her Majesty's Government; and the view expressed and illustrated in his book on "The Scientific Basis of National Progress and Morality,"—that new knowledge is the starting-point of all human advance, and is gradually regenerating mankind,—is now beginning to be publicly recognised.

GORGEI, General Arthur, was born at Toporcz in Upper Hungary, on Jan. 30, 1818; and having received a military education at Tuln, entered the Hungarian Body-Guard; but subsequently relinquished the profession of arms, and studied chemistry in the University of Prague. However, on the outbreak of the Hungarian revolution in 1848, his military ardour revived, and he went to the aid of Kossuth, and by his genius for war soon rose to the rank of General. His retreat through the defiles of the Carpathians was one of the most brilliant

feats of the war. In 1849 he won a succession of victories, and was made Minister of War, refusing at the same time the rank of Field Marshal. Subsequently, through refusing to co-operate with his colleagues, he caused them to be defeated in detail; and, on Aug. 13, he was completely surrounded at Valagos, and surrendered to the Russian General, Rudiger. "His treason," wrote Kossuth, "has inflicted on me, and through me, on the Republic, a death-blow." Ultimately he was pardoned; and he published in 1851 a narrative of his connection with the insurrection, under the title of "My Life and Acts in Hungary." From that time he has lived in retirement, keeping completely aloof from politics. In 1885 a proposal was made formally to reinstate him in public favour, but it was not well received in Hungary.

GORRIE, Sir John, K.B., born in the parish of Kettle, Fifeshire, in 1829, is the son of the Rev. Daniel Gorrie, United Presbyterian Minister, and was educated at the village school, subsequently at the Madras College, St. Andrews, and then at the University of Edinburgh. He was called to the Bar of Scotland in 1856. To Sir John's advocacy that the Volunteer movement should be made a national one, by including all ranks of the people, that Force owed a great deal at its start. At the request of the Lord Provost of Edinburgh he himself raised a couple of artizan companies of 100 men each in a single day, and this continued until a whole battalion was formed out of similar materials. The example of Edinburgh was quickly followed throughout the country, and the impulse then given has never been lost. Mr. Gorrie visited America in 1860, the year of the election of Abraham Lincoln to the Presidency, and all his anti-slavery views being confirmed by what he saw and heard he was able to do effective service in the cause of the Northern States when the great Civil War broke out. He then became a leader-writer on the *Morning Star*, having as colleagues many men who have since distinguished themselves in literature and politics. In 1865, on the news reaching this country of the disturbances in Jamaica which led ultimately to the removal and attempted trial of Governor Eyre, Mr. Gorrie was invited by the Jamaica Committee to go out to represent them before the Royal Commission in the Colony. This service, which extended over several months, having been performed to the entire satisfaction of his constituents, Mr. Gorrie returned to his usual vocations in London until 1868,

when he offered his services to the Border Burghs. Finding, however, that his candidature would split up the advanced liberal party, a portion of whom considered themselves pledged to Sir George, then Mr., Trevelyan, he withdrew. In 1869 he was offered and accepted the post of Substitute Procureur-General in Mauritius, and a few months after his arrival became a Puisne Judge. He was a member of a commission which discovered an extraordinary system of legal oppression upon natives of India who had completed their indentures as Coolies, and he also showed how properties were wasted by legal costs, because of the officials' misunderstanding the spirit and meaning of the local ordinances. Mr. Gorrie boldly protected the Creoles and Coolies alike from all attempted oppression; and when, in 1876, he was removed to take the post of Chief Justice of the new Colony of Fiji, he received a striking testimonial of the respect and esteem in which he was held by the whole community. In Fiji, an altogether different native race and language had to be studied, and as the chief justice was a member of the Legislative Council, a different class of work had to be undertaken. Perhaps the most useful work done by Mr. Gorrie at that time was the application of the Torrens system of land titles to the lands which had been acquired by Europeans in the new Colony. Whilst engaged in these labours the High Commission for the Western Pacific was organized by an Order in Council, the Chief Justice becoming Chief Judicial Commissioner. He also acted for upwards of one year as High Commissioner. After being knighted in 1882, Sir John was appointed to the old West India Colonies, now united into the Leeward group. While there, he contributed most materially to overthrow the custom of consignee's lien, which favoured the London merchant at the expense of local creditors; and also the Encumbered Estates Court, which made West Indian properties change hands in London without giving people in the locality a chance to bid. Sir John drafted with great labour an ordinance to introduce Indefeasible Titles, and to give security for local advances. This ordinance ultimately became law, and Sir John received a unanimous vote of thanks from the Leeward Islands Legislature. In 1885 Sir John was transferred to Trinidad, and both in that island and in Tobago, now annexed to Trinidad, he has been energetically endeavouring to make the Courts of Justice accessible to all, to administer justice impartially, and to pro-

mote measures for the well-being of the Colony. On his return to the Colony lately from a visit home, the reception accorded to him was of an impressive and enthusiastic character.

GORST, The Right Hon. Sir John Eldon, P.C., Q.C., M.P., the Under-Secretary of State for India, is a son of the late Mr. Edward Chaddock Lowndes (the last name assumed instead of Gorst), of Preston, Lancashire, and was born in May, 1835. He was educated at St. John's College, Cambridge, of which he was sometime a Fellow, and was third Wrangler in 1857. From 1861-63 he was Civil Commissioner of Waikato, New Zealand, and in 1865 was called to the Bar at the Inner Temple, becoming a Q.C. in 1875. In 1866 he entered Parliament as Conservative member for Cambridge, but was defeated in 1868. In 1875 he was returned for Chatham, which he has continued to represent ever since. Mr. Gorst was from 1880 to 1885 one of the small group of members known as the Fourth Party, who all have since received such remarkable political advancement. In Lord Salisbury's first administration (1885) he was Solicitor-General; and in the present Government he holds the post of Under-Secretary for India, and was created a Privy Councillor in 1890.

GOSCHEN, The Right Hon. George Joachim, M.P., P.C., son of the late William Henry Goschen, a London merchant, of German extraction, was born Aug. 10, 1831. He received his education at Rugby, under Drs. Tait and Goulburn, and at Oriel College, Oxford, where he graduated B.A., taking a first-class in classics, in 1853. Soon after, he became a merchant in partnership with Messrs. Frühling and Goschen, of Austinfriars, and a Director of the Bank of England; but he retired from the partnership on taking office in the Russell-Gladstone ministry. He was returned in the Liberal interest for the City of London, in May, 1863, on the death of Mr. W. Wood; and he took an active part in the movement for throwing open the universities to dissenters, and the abolition of religious tests. Mr. Goschen, who was re-elected for the City of London, at the head of the poll, at the general election in July, 1865, was made Vice-President of the Board of Trade, Nov. 20, 1865, when he was sworn of the Privy Council, and Chancellor of the Duchy of Lancaster and a Cabinet Minister Jan. 26, 1866, retiring with the Russell ministry in June of that year. On the accession of Mr. Gladstone to power, in Dec., 1868, he was appointed President

of the Poor-Law Board, which office he held till March, 1871, when he succeeded Mr. Childers as First Lord of the Admiralty. He went out of office with his party in Feb., 1874. At the general election which was held in that year he was the only Liberal candidate returned for the City. In 1876 Mr. Goschen and M. Joubert were chosen as delegates of the British and French holders of the Egyptian debts to concert measures for the conversion of the debts. They proceeded to Egypt, where they were received by the Khedive (Aug. 14), and eventually an agreement was signed at Cairo (Nov. 18) for a reorganisation of the finances and public debt of Egypt. On July 17, 1878, Mr. Goschen issued an address to the Liberal electors of the City of London, declining to come forward again at the next general election, on the ground that his votes on the County Franchise question had not been in accord with the views generally entertained by the party. Mr. Goschen attended the International Monetary Conference held at the Foreign Office, Paris, in Aug., 1878. In May, 1880, immediately after Mr. Gladstone's accession to power, Mr. Goschen consented to undertake the special duties of Ambassador Extraordinary at Constantinople, in the place of Sir Henry Layard, who retired, nominally on leave of absence, but in fact finally. Before proceeding to Constantinople Mr. Goschen visited the most important political centres in Europe, and this was the first step towards the formation of a European concert for the execution of the unperformed parts of the Treaty of Berlin. In 1881 the ambassadors of the Great Powers in the Conference of Constantinople, after long and patient negotiations, joined in a note to the Greek Government recommending the acceptance of the utmost that Turkey could be brought to yield. The new frontier line left the greater part of Epirus, with Janina and Metzovo, to Turkey, giving Greece possession of almost all Thessaly, and the command of the Gulf of Arta. The Cabinet of Athens was forced, under pressure, to agree to this frontier line, which deprived Greece of nearly one-third of the territory promised to her at Berlin. It was admitted by all the Powers that the assent of Turkey to these terms was obtained chiefly through the persistence and firmness of Mr. Goschen. His mission came to an end in April, 1881. Mr. Goschen was appointed an Ecclesiastical Commissioner for England in Nov., 1882. He has written largely on financial questions, and his treatise on "The Theory of the Foreign Exchanges,"

5th edit., 1864, has been translated into French by M. Léon Say. He has published in pamphlet form his "Speech on the Oxford University Tests Abolition Bill," 1865, and his "Speech on Bankruptcy Legislation and other Commercial Subjects," 1868. At the general election of 1885, Mr. Goschen, who had sat for Ripon since his retirement from the representation of the City of London in 1880, was elected, after a severe contest (in which he was opposed by a Radical, but obtained a great majority), to represent the Eastern Division of Edinburgh. In 1886, however, he was defeated by a large Gladstone-Liberal majority, Mr. Gladstone himself having denounced him as a Tory. Mr. Goschen had taken a foremost place in the campaign against the Home Rule Bill. On the resignation of Lord Randolph Churchill in Dec., 1886, and when Lord Salisbury had failed to induce Lord Hartington to join his Government, Mr. Goschen was prevailed upon to accept the Chancellorship of the Exchequer, though he declined the leadership of the House. Mr. Goschen's scheme for the reduction of the interest on the National Debt was cordially accepted by all parties, and successfully brought to a conclusion in July, 1889. He was elected Lord Rector of the University of Edinburgh in 1890.

GOSSE, Edmund William, M.A., only son of the late Mr. Philip Henry Gosse, F.R.S., was born in London, Sept. 21, 1849, and educated in Devonshire. He was appointed assistant-librarian at the British Museum in 1867; but has held since 1875 the post of Translator to the Board of Trade. In 1872 and 1874 he visited Norway, Denmark, and Sweden, for the purpose of studying the literature of those countries; and in 1877 he visited Holland with a similar purpose. His poetical writings consist of "Madrigals, Songs, and Sonnets" (in conjunction with a friend), 1870; "On Viol and Flute," lyrical poems, 1873; "King Erik," a tragedy, 1876; "The Unknown Lover," a drama, 1878; "New Poems," 1879; and "Firdausi in Exile, and other Poems," 1886. Mr. Gosse wrote "The Masque of Painters," which was performed by the Royal Institute of Painters in Water Colours, on May 19, 1885, and on subsequent evenings, with great success. A collected edition of Mr. Gosse's poems called "On Viol and Flute," appeared in 1890. His chief prose writings are a volume of "Northern Studies," 1879, consisting of critical essays in Scandinavian, Dutch, and German literature; a "Life of Gray," 1882 (*English Men of*

Letters Series); about thirty essays contributed to Ward's "English Poets," in 1880-81; "Seventeenth Century Studies; a contribution to the history of English Poetry," 1883; "From Shakespeare to Pope; an inquiry into the causes of the rise of classical poetry in England," 1885. He has also edited a volume of "English Odes," 1881; a complete edition of the works of Gray, in 4 vols., 1884; a "Life of William Congreve," 1888; a "History of Eighteenth Century Literature," 1889; and a new series of translated foreign novels, the first of which is "In God's Way," by Björnson, 1890. He is at present (1890) engaged on a biography of his father, the naturalist. In the spring of 1884, Mr. Gosse was elected Clark Lecturer in English Literature at Trinity College, Cambridge, in the place of Mr. Leslie Stephen, who retired; and in 1885 he received the honorary degree of M.A. from the University of Cambridge. He was re-elected Clark Lecturer in 1886, and retired in 1889. In the winter of 1884-85, Mr. Gosse, who had been invited to deliver the Lowell Lectures that season, visited America, and lectured not only in Boston, but before Harvard and Yale Colleges, before the Johns Hopkins University in Baltimore, and in New York. In 1875 Mr. Gosse married a lady who is well known as an artist, and as a contributor to the principal exhibitions.

GOT, François Jules Edmond, an eminent French comedian, born at Lignerolles (Orne), Oct. 1, 1822, received his education at the Collège Charlemagne, and after being employed for a short time at the Prefecture of the Seine, entered M. Provost's class at the Conservatoire, where, in 1842, he carried off the second, and in 1843 the first, prize for comedy. After a year's compulsory service in the army, he made his first bow to a Parisian audience in 1844 at the Comédie Française, of which Society he became a member in 1850. M. Got's reputation steadily increased, and he is now most deservedly regarded as one of the greatest actors on the French stage. He excels in the representation of the leading comic parts in the old classical dramas, and has created scores of original characters in modern pieces. M. Got's name has been frequently before the public, in connection with the internal dissensions of the Comédie Française. When M. Got and his colleagues of the Théâtre Français visited London in 1871, they were entertained at a public dinner at the Crystal Palace. On Aug. 4, 1881, M. Turquet, the Under Secretary of State for Fine

Arts, publicly conferred the Cross of the Legion of Honour on M. Got at the Conservatoire. It was as Professor of the Conservatoire and Maître de Conférences à l'École Normale Supérieure, that M. Got received this high recompense for his services. But perhaps it may with truth be considered, as was said by the Vice-Secretary of State, that M. Got was the first dramatic artist who, while following his profession, has been decorated.

GOUGH, Lieut.-General Sir Charles John Stanley, K.C.B., F.C., entered the army on March 20, 1848; Lieutenant, Sept. 1, 1849; Captain, June 9, 1857; Major, July 20, 1858; Lieut.-Colonel, Jan. 24, 1867; Colonel, Nov. 28, 1875; Major-General, July 2, 1885; Lieut.-General, June 5, 1889. Sir Charles Gough served throughout the Punjab campaign of 1848-9, including the action of Ramnuggur, passage of the Chenab, and battles of Sadoolapore, Chillianwalla, and Goojerat (Medal with two Clasps); served in the Indian Mutiny Campaign of 1857-8; was with the Guide Corps at the siege and capture of Delhi; was Commander of the Guide Cavalry in the affairs at Kurkonda on the 15th, and Rhotuck on the 17th and 18th of August, 1857, engaged in the cavalry affair in rear of the camp on Sept. 11. He served with Brigadier Showers' Column in the Delhi and Hujjur districts; was engaged in the action of Narnole on Nov. 16th; served with Hodson's Horse in the actions of Gungeeree, Putteallee, Mynpoorie, and Shumshabad (wounded); commanded a squadron of Hodson's Horse in the action of Meangunge; was present throughout the siege and capture of Lucknow (Medal with two Clasps, Victoria Cross, and Brevet of Major). "He was awarded the F.C., 1st, For gallantry in an affair at Khurkondah, near Rhotuck, on Aug. 15, 1857, in which he saved his brother, who was wounded, and killed two of the enemy. 2nd, For gallantry on Aug. 18, when he led a troop of the Guide Cavalry in a charge, and cut down two of the enemy's sowars, with one of whom he had a desperate hand-to-hand combat. 3rd, For gallantry, on Jan. 27, 1858, at Shumshabad, where, in a charge, he attacked one of the enemy's leaders, and pierced him with his sword, which was carried off of his hand in the *mêlée*. He defended himself with his revolver, and shot two of the enemy. 4th, For gallantry, on Feb. 23, 1858, at Meangunge, where he came to the assistance of Brevet-Major O. H. St. George Anson, and killed his opponent, immediately afterwards cutting down another of the enemy

in the same gallant manner." Sir Charles Gough served with the Bhootan Expedition in 1864-65 (Medal with Clasp); served in the Afghan War of 1878-80, and was present at the attack and capture of Ali Musjid, and in the engagement at Futtehabad (mentioned in despatches); commanded a force of all arms which proceeded from Gundamuck to the relief of Cabul in Dec., 1879 (mentioned in despatches); and commanded a brigade in the engagement at Saidabad (mentioned in despatches, K.C.B., and Medal with two Clasps).

GOUGH, Major-General Sir Hugh Henry, K.C.B., F.C., entered the army on Sept. 4, 1853; Lieutenant, Aug. 9, 1855; Captain, Jan. 4, 1861; Brevet Major, Jan. 5, 1861; Major, Sept. 4, 1873; Brevet Lieutenant-Col., March 30, 1869; Lieut.-Col., Sept. 4, 1879; Brevet Col., Oct. 1, 1877; Major-General, Feb. 6, 1887. Sir Hugh Gough served as Adjutant of Hodson's Horse throughout the siege of Delhi (wounded); commanded a wing of the regiment in the actions of Bolundshur, Allyghur, and Agra, relief of Lucknow by Lord Clyde, battle of Cawnpore, affairs at Seraighat and Khodagunge, siege and capture of Lucknow (severely wounded and two horses killed), and action of Ranode (mentioned in despatches on several occasions for "distinguished bravery," and thanked by the Governor-General of India, Brevet of Major, Victoria Cross, and Medal with three Clasps). He received the F.C. for the following circumstances:—"Lieutenant Gough, when in command of a party of Hodson's Horse near Alumbagh on Nov. 12, 1857, particularly distinguished himself by his forward bearing in charging across a swamp, and capturing two guns, although they were defended by a vastly superior body of the enemy. On this occasion he had his horse wounded in two places, and his turban cut through by a sword, whilst engaged in combat with three sepoy. Lieutenant Gough particularly distinguished himself also near Jellalabad, Lucknow, on Feb. 25, 1858, by showing a brilliant example to his regiment, when ordered to charge the enemy's guns; and, by his gallant and forward conduct he enabled his men to effect their object. On this occasion he engaged himself in a series of single combats, until at last he was disabled by a musket-ball through the leg, while charging two sepoy with fixed bayonets. Lieutenant Gough on this day had two horses killed under him, a shot through his helmet, and another through his scabbard, besides being severely wounded." He commanded the

12th Bengal Cavalry in the Abyssinian Campaign in 1868, and was present at the capture of Magdala (mentioned in despatches, C.B., and Medal); served throughout the Afghan War of 1878-80; commanded the cavalry of the Koorum Force in 1878-79, and was present at the capture of the Peiwar Kotal, in the pursuit of the Afghans over the Shutargardan, in the affair of the Maugior Pass, and during the operations in Khost. He served with the Cabul Field Force in 1879-80 as Brigadier-General of Communications, and was present in the engagement at Charasiab, and in the various operations around Cabul in Dec., 1879 (wounded); accompanied Sir Frederick Roberts in the march to Candahar in command of the Cavalry Brigade, and was present at the reconnaissance of Aug. 31 in command of the troops engaged and in the cavalry pursuit on the following day (frequently mentioned in despatches, K.C.B., Medal with four Clasps, and Bronze Decoration).

GOULBURN, The Very Rev. Edward Meyrick, D.D., late Dean of Norwich, son of Edward Goulburn, Esq., Serjeant-at-Law, born about 1818, was educated at Eton and Balliol College, Oxford, of which he was elected a scholar in 1835, and where he graduated B.A. in 1839, taking first-class honours in the School of *Literæ Humaniores*, and was elected Fellow of Merton College in 1841. Having held for some years a College tutorship conjointly with the incumbency of Holywell, in Oxford, he was elected in 1850 successor to Dr. Tait, Dean of Carlisle, in the Head Mastership of Rugby School, from which post he retired in 1858. He preached the Bampton Lectures at Oxford in 1850; was appointed minister of Quebec Chapel and prebendary of St. Paul's in 1858; one of the Queen's chaplains in ordinary, and incumbent of St. John's, Paddington, in 1859; and Dean of Norwich in 1866. He resigned the Deanery of Norwich, June 17, 1889. In addition to a large number of single sermons and lectures, Dean Goulburn has published "The Doctrine of the Resurrection of the Body, as taught in Holy Scripture," eight Sermons, 1851; "Elementary Treatise on the Philosophy of Grammar, with especial reference to the Doctrine of the Cases," 1852; "Introduction to the Devotional Study of the Holy Scriptures," 1854, third edit., 1860; "The Idle Word: short religious essays upon the gift of speech and its employment in conversation," 1855, second edit., 1864; "Manual of Confirmation," 1855, ninth edit., 1872; "The

Book of Rugby School," 1856; a collection of "Family Prayers," 1857, new edit., 1868; "The Inspiration of the Holy Scriptures," 1857; "Sermons preached on different occasions during the last twenty years," 2 vols., 1862; "Thoughts on Personal Religion," 2 vols., 1862; "The Office of the Holy Communion in the Book of Common Prayer: a series of lectures," 2 vols., 1863; "The Functions of our Cathedrals," 1869; "The Pursuit of Holiness," 1869, fifth edit., 1873; "The Ancient Sculptures in the Roof of Norwich Cathedral described and illustrated; with a History of the See and Cathedral of Norwich from its Foundation to Modern Times," London, 1872, &c.; "The Great Commission: Meditations on Home and Foreign Missions," 1872; "Is it true? Is it widely received and believed by God's Church? Reasons for neither mutilating nor muffling the Athanasian Creed," 1872; "The Holy Catholic Church; its divine ideal, ministry, and institution," 1873; "The Collects of the Day;" "Thoughts upon the Liturgical Gospels for the Sundays; one for each day in the week;" "Holy Week in Norwich Cathedral;" "Life, Letters and Sermons of Bishop Hubert de Losenga;" "The Prayer-Book Doctrine of Absolution: an Ordination Sermon;" and "Three Counsels of the Divine Master," 2 vols, 8vo., 1889.

GOULD, Benjamin Apthorp, was born at Boston, Mass., Sept. 27, 1824. He graduated at Harvard College, 1844; and afterwards pursued his scientific studies for several years in Paris, and Berlin, and at Göttingen, and other European observatories. Returning to America in 1849 he was soon appointed to the charge of the longitude-determinations of the Coast Survey, in which he did much to develop the telegraphic methods, determining many longitudes telegraphically, and with unsurpassed accuracy, before the method was adopted anywhere in Europe. In 1856 he was made Director of the Dudley Observatory at Albany, N.Y., and retained that position until the beginning of 1859. During the Civil War he served as Actuary of the U.S. Sanitary Commission. In 1866, immediately after the successful laying of the transatlantic cable, he determined by telegraph the longitude between the two continents, going himself to Valentia in Ireland, and establishing there a temporary observatory. In 1868 he organised a private expedition for cataloguing the stars of the southern hemisphere, at Cordoba, in the Argentine Republic; but, before starting,

accepted an invitation from the Government there to carry out the plans as a national undertaking. He left the U.S. in May 1870, intending to be absent three years; but remained at Cordoba until 1885: building a National Observatory, completing three extensive catalogues of stars, establishing an Argentine Meteorological Office, investigating the climatology and determining the geographical positions of a large number of points, as well as the magnetic constants for various places. He also made, between 1872 and 1884, photographs of precision for all important southern clusters of stars. In 1819 he founded the *Astronomical Journal*, which he edited and published until 1861, the expenses being borne by himself and a few friends. The outbreak of the war caused its discontinuance; but immediately after returning from South America, he resumed the publication, which is an important aid to astronomical progress in the U.S., and has now (1890) reached its tenth volume. Among his principal works are: "Report on the Discovery of the Planet Neptune" (Smithsonian Miscellaneous Collection, 1850); "Discussion of the Observations made by the United States Astronomical Expedition to Chili, for determining the Solar Parallax," 1856; "Reply to the 'Statement of the Trustees' of the Dudley Observatory," 1859; "On the Transatlantic Longitude," 1868; "Military and Anthropological Statistics of American Soldiers," 1869, and the series of about twenty quarto volumes of the Argentine National Observatory, and Argentine Meteorological Office. One volume of the Results of the Observatory is formed by the "Uranometria Argentina," which gives the brightness and position of every fixed star, to the 7th magnitude inclusive, within 100° of the South Pole; two by the "Zone-Catalogue," which contains more than 105,000 observations of 73,160 stars; and one by the "General Catalogue," which contains the positions of about 34,000 stars, each on the average observed four times. The "Uranometria" is accompanied by an elaborate series of maps.

GOUNOD, Charles François, composer, was born in Paris, June 17, 1818, where he entered the Conservatoire at the age of twenty; and, in the following year, carried off the great "Rome" prize entitling him to residence in Italy, where he studied early Italian church music. On his return to France, he soon became known as a lyric composer for the stage by his pastoral of "Philemon and Baucis." This was followed by "La Nonne Sanglante;"

"Sappho," a cantata; and "La Colombe." Although these works contained unquestionable marks of genius, none achieved success. Indeed, few composers who have risen to eminence have had more failures at the outset of their career than the author of one of the most successful of modern operas, "Faust," which, although not actually the first successful work of Gounod, took all the lovers of operatic music by surprise. What rendered his success more remarkable was the fact that, though Goethe's masterpiece had been previously set to music a hundred times, not one of these efforts was considered worthy of the theme. M. Gounod is the composer, amongst other works, of a comic opera founded on Molière's "Médecin malgré lui," produced in London by the English Opera Company under the title of the "Mock Doctor;" of "La Reine de Saba;" "Mirelle," brought out in London in 1864; "Romeo and Juliet," produced in Paris and London in 1867; and "Polyeucte," produced at the Grand Opéra, Paris, Oct. 7, 1878. He was elected a member of the French Institute, section of Music, in May, 1866, and was promoted to the rank of Commander of the Legion of Honour in Aug., 1877. His opera, "The Tribute of Zomora," was produced at the Grand Opéra in Paris on April 1, 1881; and in the following year his sacred work, "The Redemption," was produced at the Birmingham Musical Festival. In 1885 his new oratorio, "Mors et Vita," was produced at the Albert Hall, and a second performance, by special command of the Queen (who was present), took place in Feb., 1886. M. Gounod's latest opera is "Charlotte Corday."

GOURAUD, Colonel George Edward, was born in 1841, at Niagara Falls, U.S.A. At the outbreak of the great war of secession, he entered the cavalry arm of the army of the United States and served with distinction until peace was proclaimed. His military career was both active and brilliant, and he was several times mentioned in general orders "for gallant conduct on the field of battle." It is related by General Stewart L. Woodford that "Gouraud, then a subaltern and but 19 years of age, at his first engagement, when making the first reconnaissance with a handful of men from Edward's Ferry towards Leesburg, was surprised by a body of rebels 1000 strong, which delivered a volley at less than fifty yards. Gouraud, when all the survivors of his small band were at full gallop in retreat, stopped his horse and, under a withering fire, rescued a

wounded comrade whose horse had been killed. While encumbered with the weight of this man, he charged a fully-armed rebel cavalryman and carried him a prisoner into the Union lines." For this he was immediately promoted to the staff of the Commanding-General as Aide-de-Camp. Again, at the battle of Honey Hill, when in Hartwell's assault on the enemy's works every other mounted officer of his brigade was either unhorsed or killed, finding himself alone mounted, with nearly 1,000 men stampeded by a terrific discharge of artillery at a distance of less than a hundred yards, he galloped to the centre of what had been "the line," and succeeded in rallying the retreating troops in time to receive and successfully repulse a charge of the enemy's infantry. For this Captain Gouraud was promoted to the rank of Brevet-Major. At Pocotaligo, when aide-de-camp on the staff of General John G. Foster, and while reconnoitring in advance of the column accompanied by only two troopers, he accidentally came upon an entrenched outpost of about twenty of the enemy. With singular presence of mind, having recognized the glitter of two 12-pound brass Napoleon guns, Gouraud shouted commands to imaginary Infantry and Cavalry as, with his two men, he charged and occupied the redoubt which the enemy left by the rear. He sent one of his men to report the situation to his commanding officer while he remained with the other until the column came up and carried off the two guns. He served as Assistant Inspector-General of the Dept. of the South, and in Virginia and East Tennessee as Special Inspector of cavalry. Colonel Gouraud resigned from the army shortly after the conclusion of hostilities, and in 1870 first visited Europe on a special mission from the United States Treasury. Since leaving the army Colonel Gouraud has been prominently identified with the foremost inventions of his time, having brought to Europe three of the most remarkable, namely: The Telephone, the Electric Light, and the Phonograph. His association with Mr. Edison has extended over twenty years; and the acquaintance was formed at a period when Mr. Edison's name was unknown. He has been Mr. Edison's equal partner in Europe in several of his principal inventions, and is commonly credited with having enlisted more capital in successful enterprises based upon patents than any of his contemporaries. With a due regard to health, he contrives to find time, in the midst of pursuits which demand much industry and close application to business, for the numerous

manly sports to which he is addicted. He is also a prominent member of the Grand Army of the Republic, being a comrade of Fort Lafayette, New York.

GOURKO (Count), Joseph Vassilyévich, one of the most distinguished generals of the Russo-Turkish war, is of Lithuanian origin, and was born in 1828, and educated in the imperial "Corps de Pages." He was created ensign of the regiment of Hussars of the Imperial Body Guard in 1846. In 1857 he was already captain, and commanded a squadron in the same regiment, and was made in 1860 adjutant to the Emperor. In 1861 he received his colonel's commission. In 1866 Gourko was appointed commander of the 4th Hussar regiment of Marinopol. In 1867 the Emperor named him major-general, and ordered him to be of his *suite*. Then he commanded the Grenadier regiment of the Imperial Guards, and in 1873 the 1st brigade of the 2nd division of the Cavallerie de la Garde. We may add that Count Gourko took part, although in inferior rank, in the Crimean war, being stationed at Belbeck. His heroic deeds are almost too well known to be minutely recorded; we will mention only some of the principal feats of this valiant general, who commanded the vanguard of the Imperial army. On June 25, 1877, with a detachment of cavalry and a single battery, he attacked and took by assault the strong and powerfully occupied town of Tyrnovo (Tirnovo). On July 5 he occupied Kazanlyk and the village of Shipka, and after occupying and defending the passes of Shipka, Hanko, and others, he, together with General Radetzky, traversed the Balkans in the middle of the winter snowstorms and frosts, with but few losses, and led the victorious Russian troops into the fertile valleys beyond, thus occupying Sofia, Philippopolis, and Adrianople. The hazardous and almost impossible feat of traversing the Balkans in the middle of winter will for ever remain one of the greatest deeds performed by the soldiers of Russia. Count Gourko has been elevated to the rank of Adjutant-General, is a Knight of St. George of the second class, and of several other high orders. He was made a Count in April, 1878, and was afterwards appointed Governor of Warsaw. Count Gourko is married to a French Lady.

GOW, Andrew Carrick, A.R.A., was born in London June 15, 1848, and educated at St. John's School, Warwick, and in London. He was trained as a litho-

graphic artist by the late Andrew Maclure, of Walbrook, and became a student of Heatherley's School of Art, Newman Street. In 1868 he was elected a Member of the Institute (now Royal Institute), and since 1869 has been a constant exhibitor at the Royal Academy. Amongst his chief works may be mentioned "A Suspicious Guest," 1870; "Introduction of Lady Mary Wortley to the Kit Kat Club," 1873; "Sophy Baddeley at the Pantheon," 1875; "The Relief of Leyden," 1876, now in the National Gallery of Sydney; "The Tumult in the House of Commons in 1640," 1877; "No Surrender," 1878, now in the National Gallery at Melbourne; "The Last Days of Edward VI.," 1880; "Bothwell," 1884; "Absolution for the Lost at Sea," 1885; "Cromwell at Dunbar," 1886. Mr. Gow was elected an Associate of the Royal Academy in 1881.

GOWER, Mrs., née Mdlle. Nordica, the *prima donna*, is an American by birth, and received her early musical education at the Boston Conservatoire of Music, where she greatly distinguished herself. She afterwards proceeded to Italy to complete her training. Her chief triumph on the operatic stage has been her impersonation of the part of Marguerite in Gounod's "Faust." Gounod is said to regard her Marguerite as second to that only of Mme. Patti. Mdlle. Nordica married some years ago Mr. Gower, who is now deceased.

GOWERS, William Richard, M.D., F.R.S., was born in London in 1845, and educated chiefly at Christchurch College School, Oxford. He commenced the study of medicine in 1861 as pupil to a surgeon at Coggeshall, Essex, and continued it at University College and Hospital, graduating at the University of London in 1869 and 1870. In 1873 he was appointed Assistant Physician to University College Hospital, and to the National Hospital for the Paralysed and Epileptic, and subsequently became Physician to each institution, and a Professor of Clinical Medicine in University College. He was elected a F.R.C.P. in 1879, and F.R.S. in 1887. His contributions to medical science have embraced many subjects, but he is chiefly known to the profession on account of his work on the structure and diseases of the nervous system. A special tract of fibres in the spinal cord, which he first described, is often called after him. The extent to which his work upon this subject has been based on original observation and re-

search, and the manner in which facts thus ascertained have been applied to the elucidation of the practical problems of disease, their diagnosis and treatment, have secured for his works a wide circulation, not only in this country but also in America, and in most European countries, and have made them popular alike with students and practitioners. He was one of the early investigators of the changes that occur within the eye in diseases of the brain, kidneys, &c., and his "Manual and Atlas of Medical Ophthalmoscopy" (of which a third edition has been published) is the chief authority on the subject. It is also of interest as containing the first systematic use of the Autotype process for illustrating the processes of disease, most of the plates having been thus reproduced from the Author's own drawings. A course of lectures delivered before the College of Physicians in 1880 formed the basis of a work on "Epilepsy and the Convulsive Diseases." A small book on the "Diagnosis of Diseases of the Spinal Cord" has been described as marking a turning-point in professional knowledge of the subject, and was followed by a similar work dealing with the Diseases of the Brain. Dr. Gowers' chief work, however, is a general "Manual of Diseases of the Nervous System," in 2 vols. Besides these subjects he is known in connection with diseases of the blood, and has improved or invented apparatus for counting the number of the blood corpuscles, and ascertaining their quality. Like many members of the medical profession, he has found a recreative occupation in etching, and his work has been seen at the Royal Academy and other Exhibitions. He is, indeed, apparently the first F.R.S. whose etching has been seen at the Academy, although many Fellows have exhibited work in oil and water-colour.

GOWING, Mrs. Emilia Aylmer, *née* Blake, daughter of an eminent Queen's Counsel of Dublin, who died when she was a child. She is, through her mother, the representative of the second branch of the Aylmers, and was born in Bath, Oct., 1816. Miss Blake received a classical education under her mother's care, partly in Brighton, partly in Paris, where she early rose into note as a poet and reciter in French, under the auspices of Lamartine. While yet in her teens, her "Leon de Beaumanoir," a Breton story in blank verse, met with favourable criticism, and was followed, after an apprenticeship to the stage in the provinces, by several dramas, of which "A Life Race," and "A Crown for Love," were success-

fully produced in London. She is also not undistinguished as a writer and reciter of dramatic verse. Her "Ballads and Poems," and "The Cithern," have become popular. Amongst a varied range of literary work, her two recent novels, "The Jewel Reputation," and "An Unruly Spirit," have made their mark. Miss Aylmer Blake was married, in 1877, to Mr. William Gowing, known in the artistic world as "Walter Gordon," who assumed, under family arrangement, the additional surname of Aylmer.

GRACE, Dr. William Gilbert, the famous cricketer, was born at Downend, near Bristol, July 18, 1848. He early evinced a great aptitude for cricket, and in 1864 played with the South Wales team at Brighton against the Gentlemen of Sussex, scoring 170 and 56 not out. The next year he was eagerly sought for, and his reputation established. Between 1864 and 1890 Mr. Grace completed 814 innings in first-class matches, and obtained in all 35,466 runs, being an average of 43½ per innings, the most extraordinary record of batting performances ever chronicled. He captured 2,230 wickets in first-class matches, between the same years, at a cost of 36,170 runs; average per wicket, 16. In July, 1879, he was presented with a costly testimonial, subscribed for by all classes of players, in recognition of his merits as an all-round cricketer. He is said to be the best bat in England, a good bowler, an excellent field, and a first-rate captain. In 1884 he played three innings of over 100 against the Australians, and repeated the feat in 1886. Altogether in first-class matches he has scored in a single innings over 300 runs twice, over 200 runs seven times, and over 100 runs eighty-five times. Like his father and brother (Dr. E. M. Grace) he is a member of the medical profession, and took his degree in 1879.

GRAHAM, Miss C. H., M.D., is descended from an old Scotch family. Her medical career has so far been unusually brilliant, and justifies the high hopes which are entertained with regard to her future. Ten years ago, whilst a student at Edinburgh University, she gained a scholarship offered by the British Medical Association for open competition amongst the candidates of the United Kingdom. This scholarship enabled her to complete the whole course of her medical studies. Miss Graham came up to London, where she enrolled herself at the School of Medicine for Women. After passing with distinction in all the preliminary

examinations, she obtained, in 1855, the diploma of Physician and Licentiate of King's and Queen's College of Physicians, Dublin, and at the same college a special diploma in midwifery and diseases of women. She matriculated a year later at the University of Berne, in Switzerland, and there obtained the M.D. degree. To the knowledge acquired in the course of a long period of study, Miss Graham joins the invaluable experience of hospital management, having held posts at the Royal Free Hospital for Women in London. It remains to add that Miss Graham is an accomplished woman in other respects. Had she not been a doctor, it is probable that she would have become an artist. She paints both in oils and in water-colours, has a knowledge of etching; and that she is something more than an amateur sculptor was proved by the busts of Col. Hutchinson and of Surgeon-Gen. C. A. Gordon, M.D., which were exhibited at the Royal Academy in 1888 and 1889 respectively.

GRAHAM, Lieutenant-General. Sir Gerald, G.C.M.G., K.C.B., F.R.C.S., son of the late Robert Hay Graham, M.D., of Eden Bross, Cumberland, was born in 1831, and educated at private schools, three years being spent at a school in Dresden, Saxony. He entered the Royal Military Academy, Woolwich, in 1847, and received his commission, as Second Lieutenant in the Corps of Royal Engineers in 1850. He became Captain in 1858, Major in 1859, Lieutenant-Colonel in 1861, Colonel in 1869, Major-General in 1881, and Lieutenant-General in 1884. He served throughout the Crimean campaign, landing with the first troops at Old Fort on Sept. 14, 1854, and leaving when the Russian guard took over Balaklava in May, 1856. He was present at the battles of Alma and Inkerman, did nearly 100 turns of duty in the trenches, and led a ladder-party at the assault of the Redan on June 18, 1855. He took part in the demolition of the docks and "White Buildings" during the winter of 1855-56, and was twice wounded. For the Crimean campaign he received the medal with three clasps, 5th class Medjidieh, Turkish medal, Victoria Cross, and was made a Knight of the Legion of Honour. He was twice mentioned in despatches, and obtained the brevet rank of Major. He took part in the China war of 1860, and was severely wounded at the assault of the Taku Forts; was present at the capture of Peking, mentioned in despatches, obtained brevet rank of Lieutenant-Colonel, C.B., and medal, with two

clasps. In the Egyptian campaign of 1882 Major-General Graham commanded the 2nd brigade of the 1st division throughout the campaign. He took part in the action of El Magfar, commanded at Kassassin on Aug. 28, took part in the subsequent action of Sept. 9, and in the battle of Tel-el-Kebir; he was mentioned in despatches, thanked by both Houses of Parliament, received K.C.B., 2nd class Medjidieh medal, with clasp and Bronze Star. Major-General Sir Gerald Graham was put in command of the expedition for the relief of Tokar in Feb., 1884, after the destruction of an Egyptian force under Baker Pacha. The British force fought a severely-contested action with the rebel Hadendowas at El Teb on Feb. 29, 1884, and relieved Tokar on the following day. On March 13, Sir Gerald Graham again defeated a large force of Arabs, with great slaughter, at Tamai. The road to Berber was then open, but the British troops were withdrawn. For these services Major-General Sir Gerald Graham was promoted to the rank of Lieutenant-General. In 1885, after receiving news of the fall of Khartoum, another expedition was sent under the command of Lieutenant-General Sir Gerald Graham to Suakim to open the road to Berber and to lay down a railway. This expedition arrived at Suakim about March 13, and on the 20th fought the battle of Hasheen. Sir Gerald received the F.R.C.S. for "determined gallantry at the head of a ladder party at the assault of the Redan (Sebastopol), on June 18, 1855; and for devoted heroism in sallying out of the trenches on numerous occasions, and bringing in wounded officers and men." For his services Lieutenant-General Sir Gerald Graham was thanked by both Houses of Parliament, and was decorated with the Grand Cross of SS. Michael and George by Her Majesty. He has contributed some articles to the Royal Engineers' Professional Corps papers, and translated Von Goetze's "Account of the German Engineers' operations during the campaign, 1870-71." In Jan., 1886, he contributed a paper to the *Fortnightly* called "Last Words with General Gordon."

GRANIER DE CASSAGNAC, Paul de.
See DE CASSAGNAC.

GRANT, Baron Albert, D.L., the well-known financier and banker, was born at Dublin Dec. 17, 1830, and was educated in London and Paris. In 1865 he was elected M.P. for Kidderminster as a Liberal Conservative, defeating the present Lord Annaly, then a Lord of

the Treasury, and was again elected in 1874. He was appointed Deputy-Lieutenant of the Tower Hamlets in 1868. While President of a Society for the improvement of the city of Milan, Italy, consisting of Earl Somers, Earl Warwick, Sir Coutts Lindsay, and other dilettante, he completed and opened the celebrated Victor Emanuel Gallery in that city, erected by the late Signor Mengone, an architect of great talent; to mark his appreciation of the gigantic work, the King of Italy, Victor Emanuel, conferred on Mr. Grant, on May 3, 1868, by *propria motu*, the hereditary dignity of Baron, and also appointed him a Commander of the Order of St. Maurice and Lazare of Italy. He is also a Commander of the Order of Christ of Portugal. The great work for which, however, Baron Grant will always be remembered is the gift of Leicester Square to the Metropolis at a cost to him of upwards of £30,000. For years this square had become dilapidated and a disgrace to London with a huge hoarding round it, but owing to the place being freehold, and held by various persons in shares, it had become impossible for any authorities to deal with it or remove the eyesore. Baron Grant, however, by his liberality became sole owner by purchase of all the rights of the respective owners. He then planted the gardens and erected therein a handsome statue of Shakespeare by Signor Fontana, which is the only one existing out of doors in England; he further placed in the square busts (which he had specially made) of worthies who had lived in Leicester Square and the vicinity, viz: Sir Isaac Newton, by Calder Marshall, R.A.; John Hunter, by Woolner, R.A.; William Hogarth, by Durham, A.R.A., and Sir Joshua Reynolds, by Weekes, R.A. The Square was opened by the Chairman of the Metropolitan Board of Works on July 15, 1874, which body in full session passed a vote of thanks to Baron Grant, and gave direction that an inscription commemorating the gift should be cut and preserved for all time on the base of the Shakespeare statue. Baron Grant also, in Feb., 1875, widened at his own cost, with the co-operation of the First Commissioner of Works and with the approval of Her Majesty, the road leading to the gate to Kensington House so as to avoid the curve which was dangerous to carriages when driving in, as Her Majesty frequently did. Baron Grant's public spirit was also shown in a highly interesting manner on the occasion of the sale at Christie's on May 18, 1874, of the works of the great artist Landseer; amongst others was a very

fine portrait of Sir Walter Scott by the eminent artist himself. A great competition for this work took place, but it was secured by Baron Grant for 800 guineas. On the same evening, in the House of Commons, Sir Stafford Northcote, then leader of the House, was asked by a member why the Nation had not secured so priceless a treasure; to which he replied, that whilst he regretted that so interesting a picture should be lost, there were no funds available for the outlay: thereupon Baron Grant rose and said his object in buying it was to present it to the National Portrait Gallery, to the trustees of which he had already on that day sent to offer it. On this Sir Stafford Northcote rose and proposed a vote of thanks of the House of Commons to Baron Grant, which was passed amid great enthusiasm. Baron Grant thus secured what is looked upon as a very rare and distinguished honour. Baron Grant also caused great attention to be drawn to his ability as a legal orator by his remarkable speech before Lord Coleridge at Guildhall in May, 1875. The subject was the interpretation to be given to one of the sections (38) of the Limited Liability Act, since become famous. As defendant in an action for damages involving the construction of this article he pleaded his own cause and with such ability (during an address occupying three-and-a-half days in the delivery, believed to be the longest speech ever made in a Court of Law by a layman), that the jury, notwithstanding his being opposed by Sir H. James, ex-Attorney-General, adopted Baron Grant's view as to the interpretation of the motives and manner in which he had acted in the matter at issue. Baron Grant is a member of many learned societies, of various city guilds, including the ancient one of the Society of Musicians, and is a great supporter of most of the leading Metropolitan charities. He is also known as a collector of works of art, of which he is looked upon as an able critic.

GRANT, The Very Rev. George Monro, D.D., Principal of Queen's University, Kingston, Ontario, who is of Scottish parentage, was born at Stellarton, Pictou county, Nova Scotia, Dec. 22, 1835. He received his education at Pictou Academy and at the West River Seminary of the Presbyterian Church in his native province. At the latter, at the age of eighteen, he won a bursary which entitled him to a collegiate course in the University of Glasgow, the bursary being awarded by the Synod of the Old Kirk in Nova Scotia. During his university course

at Glasgow he won academic distinction, taking the highest honours in philosophy at his examination for M.A., the Lord Rector's Prize for the best Essay on Hindoo Literature and Philosophy, and other prizes and scholarships. On his return to Nova Scotia, he spent some time as a missionary in the Maritime Provinces, and became pastor of St. Matthew's Church, Halifax, a position which he held until his acceptance, in 1877, of the Principalship of Queen's University. In 1872 he published "Ocean to Ocean," an interesting diary of a tour across the American Continent, in connection with a surveying expedition, to locate the line of the Canadian Pacific Railway; and, in 1884, "Picturesque Canada," an elaborate work illustrative of the scenery, the industries, and the social life of the Canadian Dominion.

GRANT, Lieut.-Colonel James Augustus, C.B., C.S.I., F.R.S., F.L.S., LL.D., son of the late Rev. James Grant, minister of Nairn, N.B., born at Nairn in 1827, was educated at the grammar-school, and Marischal College, Aberdeen. He was appointed in 1846 to the Indian army, served under Gen. Whish at both sieges of Mooltan; was present at the battle of Goojerat under Lord Gough, for which he received the Medal and two Clasps; was Adjutant of the 8th N.I. for five years; baggage-master to Sir James Outram's force in Aug. 1857; and did duty with the 78th Highlanders, under Gen. Havelock, at the relief of Lucknow, where he was wounded while in command of two companies of the 78th Highlanders who formed the rear guard of the army. For these services he received the Mutiny medal and clasp for "Relief of Lucknow." In 1860-3 he explored the sources of the Nile in company with the late Capt. Speke, who published his "Journal of the Discovery of the Source of the Nile" in 1863. For this service he was made a C.B. (civil division) in Sept. 1866. He served in the Intelligence Department with the Abyssinian expedition under the late Lord Napier of Magdala in 1868, and was nominated a Companion of the Order of the Star of India for his services in that capacity (medal for Abyssinia). He is the author of a "Walk across Africa," "Summary of the Speke and Grant Expedition" in the *Journal of the Royal Geographical Society* for 1872, and of "The Botany of the Speke and Grant Expedition," forming the 29th vol. of the *Transactions of the Linnean Society*, 1872. He is gold medallist of the Royal Geographical Society, and has received medals from Pope Pius IX. and King Victor

Emanuel. He is a Justice of the Peace and Deputy Lieutenant of Nairnshire. Residence, Househill, Nairn, N.B.

GRANT, Field-Marshal, Sir Patrick, G.C.B., G.C.M.G., Governor of Chelsea Hospital, son of the late Major John Grant, of Auchterblair, co. Inverness, born at Auchterblair, Strathspey, in that county, in 1804, entered the military service of the East India Company in 1820. During the Gwalior Campaign of 1843-4, Captain Grant served on Sir Hugh Gough's Staff as Deputy Adjutant-General, and obtained his brevet majority and Bronze Star for Maharajpur. As Adjutant-General in the Sutlej Campaign of 1845-6, he fought under the same chief at Mudki and Sohraon, was twice severely and dangerously wounded by grape-shot in the arm, and musket-ball in the left breast, and had three horses shot under him. He was frequently mentioned in despatches, and was made Brevet Colonel and C.B., receiving a Medal and three Clasps. In the same capacity he again followed Lord Gough through the Punjab campaign, sharing in the hard-won fight of Chilianwalla and the crowning victory of Gujarat. At the end of the campaign he was made an A.D.C. to the Queen with the rank of Colonel (Medal with two Clasps). In 1849-50 Colonel Grant again served as Adjutant-General in Sir C. Napier's campaign against the hill-tribes of Kohat (Medal with Clasp). In 1856, as Major-General and K.C.B., he was appointed Commander-in-chief of the Madras army, and on the death of General Anson, in the first days of the Mutiny in 1857, Sir Patrick went over to Calcutta as acting Commander-in-Chief of Bengal, pending the arrival of Anson's successor, Sir Colin Campbell. After the Mutiny, he was rewarded with the Grand Cross of the Bath; and in March, 1867, was preferred to the Governorship of Malta; and appointed G.C.M.G. in 1858. The latter post he resigned in April, 1872, and in 1874 he was appointed Governor of Chelsea Hospital, left vacant by the death of Sir Sydney Cotton. In Oct. 1885 he was appointed Colonel of the Royal Horse Guards (the Blues) and Gold Stick in Waiting. The following are the dates of his appointments:—Ensign, July 16, 1820; Lieut., July 11, 1823; Captain, May 14, 1832; Bt. Major, April 30, 1844; Major, June 15, 1845; Bt. Lieut.-Colonel, April 3, 1846; Colonel, Aug. 2, 1850; Lieut.-Colonel, Aug. 29, 1851; Major-General, Nov. 28, 1854; Lieut.-General, Oct. 24, 1862; General, Nov. 19, 1870; Field-Marshal, June 24, 1883.

GRANT, Professor Robert, LL.D., F.R.S., was born in 1814, at Grantown-on-Spey. Owing to serious and long-continued illness in early life, he was debarred from attending any educational establishment after his fourteenth year; but, on recovering, he devoted himself most assiduously to the study of Greek, Latin, French, Italian, and especially mathematics. After a short course of study at King's College, Aberdeen, he went up to London, and having formed the resolution of writing a history of Physical Astronomy, he proceeded to Paris with the view of taking advantage of the facilities for study and research offered by the great libraries of the French Metropolis. There he resided nearly two years, during which he was in the habit of attending the lectures of Arago at the Paris Observatory, and the lectures delivered by Le Verrier, and other eminent men of science, at the Sorbonne. He returned to London in 1847, and devoted five years more of study and research to the preparation of his "History of Physical Astronomy." The work was finally published in 1852, and was at once favourably received by the astronomical world. A few months afterwards he was appointed editor of the "Monthly Notices" of the Royal Astronomical Society, of which he had been elected a Fellow in 1850, and a Member of the Council. In 1856 the Gold Medal of the Royal Astronomical Society was awarded to Mr. Grant for his "History of Physical Astronomy." In concert with Admiral Smyth he executed a translation of "Arago's Popular Astronomy," with editorial foot-notes; this was published in 1858. In the same year he acquired experience in Observational Astronomy by a residence of a few months at the Royal Observatory, Greenwich; and in 1859, upon the death of Professor J. P. Nichol, Mr. Grant was appointed by the Crown to be Professor of Astronomy in the University of Glasgow. In the following year he proceeded to Spain, as one of the Astronomers of the Himalaya Expedition, to observe the total eclipse of the sun which occurred on the 18th of July in that year. On this occasion he had the satisfaction of obtaining a good observation of the scarlet sierra indicative of a continuous envelope encompassing the sun, of which he was the first to announce the existence in his "History of Physical Astronomy," having been led to that conclusion by an inductive inquiry based upon a discussion of all the eclipses of the sun recorded in history. In 1865 the University of Aberdeen (from which he had in 1855 received the degree of M.A.) conferred upon him the honorary

degree of LL.D. In the same year he was elected a Fellow of the Royal Society of London. In 1883 he published a Catalogue containing the mean places of 6415 stars, chiefly telescopic, deduced from observations made under his direction at the Glasgow University Observatory from 1860 to 1881. This Catalogue has been extensively used by astronomers in connexion with extra-meridional observations of comets and the minor planets. Professor Grant has for three years filled the office of President of the Philosophical Society of Glasgow. He was an extensive contributor to Charles Knight's "English Cyclopædia." He is also the author of numerous Astronomical papers which have been published in the Monthly Notices of the Royal Astronomical Society, the "Proceedings of the Glasgow Philosophical Society," the "Astronomische Nachrichten," and the "Comptes Rendus" of the Academy of Sciences of the Institute of France.

GRANTHAM, The Hon. Sir William, son of George Grantham, of Barcombe Place, Sussex, was born at Lewes, Oct. 23, 1835, and educated at King's College School. He was called to the Bar in 1863, after obtaining the studentship given by the four Inns of Court to the most distinguished student of the term; was made Q.C. 1877; and became a Bencher of the Inner Temple in 1878; J.P. and Deputy-Chairman of Sussex; and Judge of the High Court of Justice, 1886. In 1871 he was largely instrumental in securing the return of Mr. Watney for East Surrey, this being the first Conservative victory in the constituency for 27 years. At the General Election of 1874 he himself contested the county against the Hon. Locke King, whom he defeated by the large majority of 1,107; and in 1880 he was again returned with a majority of 2,006. On the passing of the Redistribution Bill of 1885, he was asked to give up his seat for the county, to contest the new borough of Croydon, as no Conservative candidate could be found to contest it owing to the great popularity of the Liberal candidate, Mr. J. S. Balfour, who had been instrumental in getting Croydon made a corporation a few years before, and who had been twice mayor. Mr. Grantham, however, defeated him by a majority of 1,157. In Jan. 1886, Mr. Grantham was made a Judge and consequently retired from Parliament.

GRANVILLE (Earl), The Right Hon. Granville George Leveson-Gower, K.G., P.C., eldest son of the first earl, born May 11, 1815, was educated at Eton, and Christ Church, Oxford, where he took his degree

in 1834, became attaché to the embassy in Paris in 1835, and was elected to the House of Commons for the borough of Morpeth in 1836, and re-elected in 1837. Early in 1840 he accepted the appointment of Under-Secretary of State for Foreign Affairs, which he held for some months, and shortly after took his seat as member for Lichfield. While in the House of Commons he supported the Liberal party, and was an able and consistent advocate of free trade. In 1846 he succeeded to the peerage; in 1848 was appointed Vice-President of the Board of Trade; in 1851 obtained a seat in the cabinet; and in Dec. of that year succeeded Lord Palmerston in the Foreign Office, retiring with the Russell Ministry early in 1852. Lord Granville, who has held the offices of Master of the Buckhounds, Paymaster-General of the Forces, Chancellor of the Duchy of Lancaster, and Treasurer of the Navy, was appointed President of the Council in 1853, and in 1855 undertook the ministerial leadership in the House of Lords. In 1850 Lord Granville acted as Vice-President of the Royal Commission for the Great Exhibition, of which he was one of the most diligent working members, and accepted, in the autumn of 1860, the Chairmanship of the Commission for the Great Exhibition of 1862. In 1856 he was sent upon an extraordinary mission to the court of St. Petersburg, as representative of the English nation at the coronation of Alexander II. Lord Granville, who retired with Lord Palmerston's first ministry in 1858, was re-appointed President of the Council (having failed in an attempt to form a ministry himself) in Lord Palmerston's second administration in 1859, and retired on the fall of Lord Russell's second administration in 1866. Lord Granville was made Lord Warden of the Cinque Ports in Dec. 1865. In Dec. 1868, his lordship accepted office under Mr. Gladstone as Colonial Secretary, and retained that position till July, 1870, when he was appointed Secretary for Foreign Affairs, in succession to the late Earl of Clarendon. He occupied the latter position until the resignation of the Liberal Cabinet in Feb. 1874. Early in the following year, when Mr. Gladstone retired from the leadership of the Opposition, Lord Granville became, by general consent, the leader of the Liberal party, Lord Hartington being chosen as its spokesman in the House of Commons. On Mr. Gladstone returning to power in May, 1880, Earl Granville again became Secretary of State for Foreign Affairs; and, in Mr. Gladstone's ministry of 1886, Secretary of State for the Colonies. He is Chancellor of the University of London.

GRAVES; The Right Rev. Charles, D.D., D.C.L. (Oxon.), F.R.S., Bishop of Limerick, Ardfer, and Aghadoe, was born Nov. 6, 1812, and educated at Trinity College, Dublin, where he took high honours, and became a Fellow and Professor of Mathematics. He was President of the Royal Irish Academy from 1860 to 1865; and was for some time Dean of the Chapel Royal in Ireland, and Chaplain to the Lord Lieutenant. He was consecrated Bishop of Limerick, June 29, 1866.

GRAY, Miss Frances Helena, LL.D., was educated at the Methodist College, Belfast, and took first place in Ireland at the Intermediate Examinations, gaining at the same time two gold medals. In 1884 she matriculated with Honours in the Royal University, Dublin, gaining third place in the ensuing scholarship examination in Modern Literature. She took the degree of B.A. in 1888, with Honours in Geology and Biology. In the following year she turned her attention to Law, and succeeded in taking the degree of LL.B.; while this year, 1890, she has just gained the high distinction of LL.D.

GREECE, King of. See **GEORGE, KING OF THE HELLENES.**

GREELY, Brigadier-General Adolphus W., was born at Newburyport, Mass., March 27, 1844. Entering the volunteer service, he attained the rank of Captain during the Civil War, and at its close was transferred to the Regular Army with the rank of Lieutenant. In 1868 he was placed in the Signal service; and in 1881, was assigned to the command of the Lady Franklin Bay Expedition to Northern Greenland. After suffering extreme and terrible hardships, Greely and a few survivors, having reached the farthest point north of any Arctic explorers, were rescued in 1884, by an expedition sent to their relief by the U.S. Government. He published an account of the expedition in 1885, under the title of "Three Years of Arctic Service," which has been translated into French and German. In 1887 he was raised to the rank of Brigadier-General and Chief Signal Officer, being appointed head of the corps in which he had served for twenty years.

GREEN, Professor Alexander Henry, M.A. (Cambridge and Oxford), F.G.S., F.R.S., the son of the Rev. Thomas Sheldon Green, sometime Fellow of Christ's College, Cambridge, was born Oct. 10, 1832, at Maidstone, and was educated at the Grammar School, Ashby de la Zouche,

Leicestershire, and at Gonville and Caius College, Cambridge. He was Sixth Wrangler in 1855, and was elected Fellow of his College the same year. In 1861 he was appointed to a post on the Government Geological Survey of England and Wales; and became Professor of Geology, and afterwards Professor of Geology and Mathematics in the Yorkshire College at Leeds in 1875; and Professor of Geology in the University of Oxford in 1888. He is the author of "Physical Geology," 3rd edit., 1882; "The Geology of the Yorkshire Coalfield" (Memoirs of the Geological Survey), 1878, and other Memoirs of the Geological Survey; and various papers on geological subjects.

GREEN, Anna Katharine. See ROHLFS, MRS. CHARLES.

GREEN, Mrs. Mary Anne Everett, whose maiden name was Wood, was born at Sheffield in 1818, and, in early life, resided in several parts of Lancashire and Yorkshire, and received an excellent education. Her intellectual tastes were fostered by the late James Montgomery, the "bard of Sheffield," an intimate friend of her father's. In 1841 her parents removed to London, and having now freer access to libraries and MS. collections, she conceived the idea of compiling the "Lives of the Princesses of England," the first volume of which appeared in 1849, and the sixth and last in 1855. Mrs. Green edited "Letters of Royal and Illustrious Ladies," published in 1846; "The Diary of John Rous," printed for the Camden Society, in 1856; "The Letters of Queen Henrietta Maria," in 1857; and has contributed occasionally to periodical literature, chiefly on antiquarian subjects. She has been intrusted by the Master of the Rolls with the duty of calendaring the State Papers in the Record Office. The papers of the reign of James I., four volumes, were published in 1857-9, and of those of Charles II. seven volumes appeared 1860-68. Mrs. Green was then requested to complete the calendar of the State Papers of Queen Elizabeth, left unfinished by the late Mr. Lemon, which, with addenda from Edward VI. to James I., forms six vols., published 1869-1874. She is now occupied upon the papers of the Interregnum, of which thirteen volumes were published, 1875-1886. These complete the general historical portion of the work from 1649 to 1660. She has since calendared the proceedings of the Committee for Advance of Money from 1642 to 1656, in three vols., published in 1888. She is now at work upon the papers of the Committee

for Compositions with Royalists, 1643-1660, of which one volume of general proceedings appeared in 1889, and one volume of the cases of the compounders from 1643 to 1646, in 1890. In 1845 she was married to Mr. G. P. Green, artist, of Cottingham, near Hull, and of London.

GREENWELL, The Rev. William, M.A., D.C.L., F.R.S., F.S.A., is the eldest son of the late William Thomas Greenwell, Esq., J.P., D.L., of Greenwell Ford, co. Durham. He was born there March 23, 1820, and educated at Durham School, and the University of Durham, where he graduated in 1839, and ultimately became Fellow of University College, and afterwards Principal of Neville Hall, Newcastle-on-Tyne. In 1847 he was preferred to the vicarage of Ovingham, Northumberland, and is now Minor Canon and Librarian of Durham Cathedral, and Rector of St. Mary, in the South Bailey, in the city of Durham. Dr. Greenwell is well known as an archaeologist, principally in connection with the sepulchral remains of the early inhabitants of Britain. His investigations with regard to the territorial possessions of the bishopric of Durham, as well as those of the Prior and Convent of the same place, are familiar to all interested in these and cognate subjects. He has written also on Greek numismatics, and other branches of Greek archaeology. His large series of skulls, many of which were derived from the barrows of England, was given by him some years ago to the University of Oxford. In 1879 he presented to the nation a collection, second to none in Britain, of urns and other sepulchral pottery, weapons and implements of stone and bronze and ornaments, the result of above twenty years' researches in the burial mounds of many counties of England. These are now lodged in the British Museum. His principal works are "Boldon Buke, a Survey of the Possessions of the See of Durham in 1183" (1852); "Bishop Hatfield's survey," a record of the possessions of the See of Durham (1857); "Wills and Inventories from the Registry at Durham" (1860); "Feodarium Prioratus Dunelmensis," a survey of the possessions of the Prior and Convent of Durham in the fifteenth century (1872), being publications of the Surtees Society; "British Barrows," a record of the examination of sepulchral mounds in various parts of England (1877); "Durham Cathedral," an address illustrative of the building and its history (1881); "Electrum Coin-

age of Cyzicus" (1887). Dr. Greenwell is a Justice of the Peace for the county of Durham.

GREGG, The Right Rev. Robert Samuel, D.D., Bishop of Cork, Cloyne, and Ross, younger son of the late Right Rev. Dr. John Gregg, Bishop of Cork, by Elizabeth, daughter of Mr. Robert Law, of Dublin, was born in 1834, and educated at Trinity College, Dublin (B.A., 1857; M.A., 1860). He was formerly Rector of Carrigrohane, co. Cork, and Precentor of Cork, and afterwards Incumbent of St. Finbar in that city. He was appointed to the deanery of the cathedral church of St. Finbar, Cork, in 1874; and in March, 1875, he was elected to the Bishopric of Ossory, Ferns, and Leighlin, which had been left vacant by the death of the Right Rev. James Thomas O'Brien, D.D. On June 27, 1878, he was elected in the room of his father, the late Dr. John Gregg, to the Bishopric of Cork. Bishop Gregg married, in 1863, Elinor, daughter of Mr. J. H. Bainbridge, of Frankfield, co. Cork.

GREGORY, Edward John, A.R.A., son of an engineer in the Peninsular and Oriental Company's service, was born at Southampton in 1850. He was educated in the Middle Class School there under Mr. David Cruickshank, who did much to encourage his artistic proclivities. He was then placed in the Engineers' drawing office of the Peninsular and Oriental Company at Southampton, where he remained till 1869. During this time he attended the Southampton School of Art. He also became acquainted with Mr. Herkomer, and took part in the formation of a Life Class, chiefly under his direction. He then came to London, studied at South Kensington for a few months; took up some other mechanical decorative work for the "department;" and finally succeeded Herkomer. He exhibited his first picture (in water colour) at the Dudley Gallery, and was then for a number of years a regular member of the *Graphic* artistic staff. In 1873 he was elected a member of the Institute of Painters in Water Colours, and has since that time exhibited many admirable drawings in the rooms of that body. His first considerable success dates from 1876, when he exhibited, at Mr. Deschamps' Gallery in New Bond Street, a powerful picture of morning light streaming in on the host and hostess of an otherwise deserted ball-room. Among the pictures exhibited by him at the Institute are "Norwegian Pirates;" "Pet of the Crew;" "Sir Galahad" (which gained the Watts Prize at

Manchester); "St. George;" and "Last Touches." At the Grosvenor Gallery he has exhibited portraits of the Chairman of Lloyd's Register, Mr. W. T. Eley, and Miss Galloway; and "The Rehearsal" and other pictures; and at the Royal Academy, his own portrait, and portraits of Mr. H. R. Robertson, and the Rev. Thos. Stevens, Warden of Bradford College. Mr. Gregory was elected an Associate of the Royal Academy, Jan. 30, 1883.

GREGORY, The Very Rev. Robert, M.A., Dean of St. Paul's, son of Robert Gregory, Esq., of Nottingham, born in 1819, was educated at private schools and at Corpus Christi College, Oxford (B.A., 1843; M.A., 1846). In 1850 he gained the Denyer Theological Prize at Oxford. He was ordained deacon at Christmas, 1843, and priest in 1844; and became curate of Panton and Wragby, in Lincolnshire, in 1847; curate of the parish church of Lambeth in 1851; and, in 1853, perpetual curate of St. Mary-the-Less, Lambeth, which living he resigned in 1873. In 1868 he was appointed Canon of St. Paul's; and in 1882 he was appointed by the Bishop of London, Treasurer of the cathedral. He became Treasurer of the National Society for the Education of the Children of the Poor in the Principles of the Established Church in 1868, and has taken a decided line of action on the question of religious education. He was a member of the Ritual Commission and also of the Royal Commission upon the Administration and Operation of the Contagious Diseases Act. Canon Gregory was elected in 1868 Proctor for the Clergy of the Archdeaconry of Surrey, which post he held till he was elected for the Chapter of St. Paul's in 1874. He was re-elected for the Chapter in 1880 and 1885. Canon Gregory has taken an energetic share in the action of the Chapter since his appointment to the Canonry, and, in conjunction with Dean Church did much to popularize the services of the cathedral. In 1870 he was appointed Rural Dean of Camberwell, which post he resigned in 1873; in which year he was elected a member of the London School Board for the City Division, and he sat on the Board till 1876, when he did not seek re-election. On Aug. 9, 1878, he was appointed a Royal Commissioner to inquire into the Parochial Charities of the City of London; and in January, 1886, a commissioner to inquire into the working of the Education Acts. Dean Gregory is the author of "Plea for Small Parishes," 1849; "The Difficulties and Organization

of a Small Metropolitan Parish," 1866; "Sermons," 1869; "Lectures at St. Paul's," 1871-2; "The Cost of Voluntary Schools and of Board Schools," 1875; "Is the Canadian System of Education Rates possible in England?" 1875; "Position of the Celebrant Aspect in Convocation," 1875; "The Position of the Priest ordered by the Rubric in the Communion Service," 1876. In Dec., 1890, the Rev. Canon Gregory was appointed Dean of St. Paul's in succession to the late Dean Church. He married first, in 1844, Mary Frances, younger daughter of William Stewart, Esq., of Frescati, near Dublin (she died in 1851); secondly, in 1861, Charlotte Anne, youngest daughter of Admiral the Hon. Sir Robert Stopford, G.C.B.

GREGORY, The Right Hon. Sir William Henry, P.C., is the only son of the late Mr. Robert Gregory, of Coote Park, co. Galway, and grandson of the late Right Hon. William Gregory, who was Under-Secretary for Ireland for several years during the administration of Lord Liverpool. He was born in 1817, and educated at Harrow, where he gained the Peel Medal, a scholarship, and other prizes; and afterwards at Christ Church, Oxford. He entered Parliament in 1842 as a Conservative, on a casual vacancy in the representation of the city of Dublin; but at the general election of 1847 he failed to secure his re-election. He did not again enter Parliament until 1857, when he was returned for Galway county as a Liberal-Conservative. Sir W. Gregory is a magistrate and Deputy-Lieutenant for the county with which he is connected by the ties of property, and as High Sheriff, serving as such in 1849. He is a Trustee of the National Gallery; and in 1871 he was sworn a member of the Privy Council for Ireland. He retired from the representation of Galway on being appointed Governor of Ceylon, Jan. 8, 1872. While occupying that position Sir W. Gregory restored many of the ancient structures of the Kandyan Kings and greatly beautified the city of Kandy. He built the museum at Colombo, and established a widespread system of restoration of the village tanks in the North Central portion of the island. These irrigation works have restored to health and prosperity those famine and disease-stricken districts. He resigned the Governorship of Ceylon in 1877.

GRENFELL, Major-General Sir Francis Wallace, K.C.B., Sirdar of the Egyptian Armies, was born in Swansea on April 29, 1841; entered the army, Aug. 5, 1859;

became Lieut. July 16, 1863; Captain, Oct. 28, 1871; Major, Nov. 11, 1878; Lieut.-Colonel, Nov. 29, 1879; Colonel, Nov. 18, 1882; Major-General, Aug. 3, 1889; served as Aide-de-Camp to Sir Arthur Cunynghame, also as Staff Officer to Colonel Glyn, commanding a field force in the Transkei in 1877-8, and was present in the engagement with the Galekas and Gaikas at Quintana Mountain on Feb. 7, 1878 (mentioned in despatches, brevet of Major); was Deputy Assistant-Adjutant and Quartermaster-General at headquarters in the Kafir war of 1878; and was Deputy Assistant-Adjutant-General at Head-Quarters in the Zulu war of 1879, where he was present in the engagement at Ulundi (mentioned in despatches, brevet of Lieut.-Colonel, Medal with Clasp); was Assistant-Quartermaster-General, under Sir Evelyn Wood, in the Boer war of 1881; was Assistant-Adjutant and Quartermaster-General on the Head Quarters Staff, in the Egyptian war of 1882; and was present at the engagements of Tel-el-Mahuta, and Kassassin, and in the battle of Tel-el-Kebir (mentioned in despatches, Aide-de-Camp to the Queen, Medal with Clasp, 3rd class of Medjidieh, and Khedive's Star); was with the Nile Expedition in 1884-5 on the lines of communication (mentioned in despatches, C.B. and Clasp); was with the Egyptian Field Force in 1885-6, and was present in the engagement at Giniss in command of a Division (mentioned in despatches, K.C.B., and promoted to 1st class of the Medjidieh, and 3rd class of the Osmanieh). Sir Francis Grenfell also commanded the troops during the operations near Suakim in Dec., 1888, including the engagement at Gemaizah (mentioned in despatches). On the day previous to General Grenfell's departure from Egypt on leave of absence his Highness the Khedive presented him with a sword of honour. The sword is of the Turkish scimitar form, the handle of rhinoceros horn, metal work all massive gold, with the Khedive's initials and Khedivial crown set in brilliants immediately below the hilt. The blade is one of great value, which has been for a long time in the Khedive's possession. It bears the following inscription in gold Arabic characters:—"A present from Mohammed Thewfik, Khedive of Egypt, to the brave and courageous Francis Grenfell, Sirdar of the Egyptian armies, in souvenir of the victories of Giniss, Gamaiza, and Toski."

GRENFELL, Colonel Henry Riversdale, born April 5, 1824, is second son of Charles Pascoe Grenfell, at one time M.P. for

Preston, and of Lady Georgina, eldest daughter of Wm. Philip, 2nd Earl of Sefton. He was educated at Harrow and Christ Church, Oxford; was private secretary to Lord Panmure at the close of the Crimean War, and to Sir Charles Wood during the period of the reconstruction of the Indian administration from 1859 to 1861; was elected M.P. for Stoke-upon-Trent on the death of John Lewis Ricardo in 1862, and sat for that place till 1868, when he stood with Mr. Gladstone for South-West Lancashire, since which date he has not succeeded in obtaining a seat. He was elected a director of the Bank of England in 1865, Deputy-Governor in 1879, and Governor in 1881. He was Captain of 2nd Middlesex Militia in 1851, and was made Lieut.-Colonel of that regiment in 1870. He is also a Commissioner of Lieutenancy for the city of London, and sat as commissioner on the Metropolitan Board of Works in 1888. Col. Grenfell is the author of several political pamphlets and magazine articles, principally on economical subjects, banking legislation, and the standard of value. He is a Liberal in politics, and has supported Mr. Gladstone in all questions except those connected with Ireland.

GRÉVILLE, Henry. See DURAND, ALICE MARIE CELESTE.

GRÉVY, François Jules P., Ex-President of the French Republic, was born at Mont-sous-Vaudrey, in the Jura, Aug. 15, 1807. He was educated in the College of Poligny, afterwards studied law in Paris, and in due course was admitted an advocate. He took part in the Revolution of July, 1830, and was subsequently much employed at the Bar as a defender of members of the Radical party who were charged with the commission of political offences. In 1848 he was appointed Commissary of the Provisional Government in his department, and was returned to the Constituent Assembly, heading the list of the successful candidates for the Jura. As a member of the Committee of Justice and Vice-President of the Assembly, M. Grévy frequently ascended the tribune, and proved himself to be one of the most able speakers among the democratic party. While maintaining an independent attitude, far removed from the Socialists and not so far from the Moderates, he usually voted with the extreme Left. Above all, his name is connected with a Radical amendment on the question of the Presidency. He proposed that articles 41, 43, and 45 of the Constitution should run in the follow-

ing terms:—"Article 41. The National Assembly delegates the executive power to a citizen who receives the title of President of the Council of Ministers." "Article 43. The President of the Council of Ministers is appointed by the National Assembly by secret ballot, and an absolute majority of votes." "Article 45. The President of the Council is elected for an unlimited period; but the appointment is always revocable." This amendment was rejected by 633 votes to 158, at the sitting of Oct. 7, 1848, when the Assembly decided that the President of the Republic should be elected by universal suffrage and hold office for four years. After the election of the 10th of December, M. Grévy opposed the Government of Louis Napoleon, and protested against the expedition to Rome. After the *coup d'état*, he held aloof from politics, and confined himself to the practice of his profession. In 1868 he was appointed *bâtonnier* of the order of Advocates, and the following year he was again returned as Deputy for the Jura. On Feb. 17, 1871, M. Grévy was elected President of the National Assembly, then sitting at Bordeaux, and afterwards removed to Versailles, and in discharging the duties of this important office, he displayed remarkable tact, judgment, and moderation. He resigned this office in April, 1873, when he was succeeded by M. Buffet. In Oct., 1873, he published a pamphlet, entitled "The Necessary Government," in which he declared that "France has been transformed, and has become a pure Democracy;" that "her first mistake was not to have founded a Constitutional Monarchy when she possessed the elements of one;" and that "her second mistake would be to attempt to establish it when those elements no longer exist." At the general election of Feb., 1876, he was returned to the National Assembly by the arrondissement of Dôle in the department of the Jura, and on the meeting of the Chamber he was elected its President. He was re-elected by the new Chamber of Deputies, Nov. 10, 1877, and again in Jan., 1879. After the resignation of Marshal Macmahon, M. Grévy was elected President of the Republic for seven years on Jan. 30, 1879, when 563 votes were recorded in his favour, 99 being given to General Chanzy (against his will), 5 to M. Gambetta, one each to General Ladmirault, the Duc d'Aumale, and General Galliffet. Forty-three voting-papers were blank, and 87 senators and deputies were absent. On the expiration of this period he was again elected; but resigned in 1887; his

resignation being indirectly due to the decoration scandals in which his son-in-law was implicated.

GREY, Sir George, K.C.B., Ex-Premier of New Zealand, was born at Lisbon, in 1812; educated at Sandhurst, entered the Army in 1829, and became Captain in 1835. In 1839 he retired from the profession and was engaged in an exploration of Western Australia; and in 1841 was appointed Governor of South Australia; and, in 1845, Governor of New Zealand. In 1854 he was Governor of Cape Colony; and, in 1861, again Governor of New Zealand. In 1875 he became Superintendent of the Province of West Auckland; and, in 1877, Premier of New Zealand, from which office he retired in 1884.

GREY (Earl), The Right Hon. Henry Grey, K.G., born Dec. 28, 1802, the eldest son of the late earl, who was Premier in 1830-34, was educated at Trinity College, Cambridge, and, as Lord Howick, was returned to the House of Commons in 1826, as member for Winchelsea; in 1830 for Higham Ferrars; at the general election of 1831 for Northumberland; and after the passing of the Reform Bill, for the northern division of that county. On the formation of his father's ministry, he was appointed Under-Secretary for the Colonies, but in 1833 resigned, in consequence of the determination of the Cabinet not to attempt the immediate emancipation of the slaves. He afterwards held for a short period the post of Under-Secretary for Home Affairs; and on the formation of the Melbourne administration in 1835 became Secretary for War. Having at the general election of 1841 lost his seat for Northumberland, which he had represented for ten years, he was returned in September of that year for Sunderland, and exercised his powers as a debater in opposition to the Peel Government in respect of its protectionist policy. Lord Howick succeeded his father as third Earl Grey, July 17, 1845, and on the construction of a Whig cabinet by Lord J. Russell in 1846, accepted the position of Secretary of State for the Colonies, resigning with his colleagues in 1852. Lord Grey was not included in the Coalition cabinet; did not approve the policy of Lord Aberdeen's cabinet in declaring war against Russia; and explained his peculiar views on this question in a long speech, May 25, 1855. For many years he has only rarely spoken in the House of Lords; but he frequently writes long and weighty letters to the *Times* on the questions of the day. His lordship is the author of

"Colonial Policy of Lord Russell's Administration," 1853; and of "Essay on Parliamentary Government as to Reform," 1858, of which a new edition appeared in 1864.

GREY-WILSON, William, born at Tunbridge Wells on April 7, 1852, is the son of Andrew Wilson, Inspector-General of hospitals, H.E.I.C.S., and great grandson of the first Earl Grey. He was educated at Cheltenham College, and became Private Secretary to Sir William Grey, K.C.S.I., Governor of Jamaica 1874, also to Lieut.-Governor Edward E. Rushworth, General J. R. Mann, R.E., Sir Frederick Barber, and the Earl of Northesk, and clerk of the Executive and Legislative Councils of British Honduras 1878; Magistrate on the Mexican Frontier and in command of the Frontier scouts, 1879; assistant Colonial Secretary and Treasurer, Sierra Leone, 1883; special commissioner to take over the Sulymah country, West Africa; and subsequently sent on several special missions to native states in West Africa; fourth assistant Colonial Secretary to the Gold Coast Colony 1884; Colonial Secretary, Saint Helena, 1886; administered Government, 1887 to 1890. Governor and Commander-in-Chief of Saint Helena, May, 1890.

GRIEG, Edvard Hagerup, musician, was born at Bergen, in Norway, June 15, 1843. At an early age he received his first musical instruction from his mother, who was a highly gifted musician and an accomplished pianist. In 1858 he went to continue his musical training at the Conservatorium of Leipzig, where he became a pupil of Moscheles, Hauptmann, Richter, Reinecke, and Wenzel. In 1863 he went to prosecute his studies at Copenhagen under the late Niels Wilhelm Gade, who, with E. Hartmann, greatly contributed to develop his talent for composition. The turning point in his career, however, was his coming in contact, for a short period, with Richard Nordraak, a young Norwegian composer of brilliant genius, who shortly afterwards died. With regard to this meeting Grieg himself relates that "The scales fell from my eyes. It was from him that I first learned to appreciate the popular melodies of the North, and to be conscious of my own nature. We became determined adversaries of the effeminate Scandinavianism which was an admixture of Gade and Mendelssohn, and with enthusiasm we struck out the new path now trodden by the Northern school." In 1867 he founded at Christiania a musical society, which he still continues

to direct. In 1865 and 1870 he paid visits to Italy, and became intimate in Rome with Liszt. He also repeatedly visited Germany, especially Leipzig, for lengthened periods. Then he brought out his compositions in public, and he himself performed in 1879 at a concert in the Gewandhaus, at Leipzig, his concerto for the piano. Grieg is incontestably a composer of original and sterling talent, and some of his written works are full of poetical feeling, especially his two sonatas for the violin, but some of his other compositions may be described as being decidedly artificial.

GRIFFITH, Sir Samuel Walker, K.C.M.G., Premier of Queensland, was born June 21, 1845, at Merthyr Tydfil, Wales, and is of Welsh descent. He is the second son of Rev. Edward Griffith. He arrived in Australia in 1854; and was educated at Mr. Robert Horniman's School (Sydney); at the High School (Presbyterian), West Maitland, N.S.W.; and at the University of Sydney, where he took the degree of B.A., 1863 (first-class in classics and mathematics); M.A., 1870; and Mort Travelling Fellow, 1865. He was called to the Queensland Bar in Oct., 1867; was made Q.C. in 1876, and also member of the Bar of Victoria. He was elected to the Legislative Assembly of Queensland in March, 1872, and has been a member ever since. He was Attorney-General of Queensland from Aug., 1874 to Dec., 1878; Secretary of Public Instruction, Jan., 1876 to Jan., 1879; Secretary of Public Works, Sept., 1878 to Jan., 1879; Leader of the Opposition 1879 to 1883; and refused a seat on the Bench of the Supreme Court of Queensland, 1879. He was Premier of Queensland, Nov., 1883 to June, 1888, holding from time to time the offices of Colonial Secretary and Secretary of Public Instruction; Colonial Secretary only; Chief Secretary; and Chief Secretary and Treasurer. He was the Leader of the Opposition, 1888. He attended Sydney Convention of Nov.—Dec., 1883, at which the Constitution of the Federal Council of Australasia was framed, and he took considerable part in framing it. He was a member of the Federal Council from its inception in 1885; re-appointed in 1888; Chairman of Standing Committee of F.C., 1887-88; President 1888. He attended the Colonial Conference of 1887 in London, as a representative of Queensland; attended the Federation Conference in Melbourne, Feb., 1890, as a delegate from Queensland; was appointed a delegate to represent Queensland at the coming Federation Convention to frame

Federal Constitution for Australasia; has been for many years the Leader of the anti-servile-labour party in Queensland; and a leader of the Liberal party in Parliament. He has written articles in the *Centennial Magazine* (Sydney), and other papers on social questions, relating to the unequal distribution of the products of labour; and is engaged in active practice at the Bar, of which he has been for some years the recognized leader. He was created K.C.M.G. in 1886. Sir Samuel W. Griffith married, in 1870, Julia Janet, daughter of James Thomson, Esq. (formerly Commissioner of Crown Lands, Maitland N.S.W.), and has issue.

GRILLO, Marquise del, née Adelaide Ristori, tragic actress, born at Cividale, in Friuli, in 1821, being the child of a poor actor, was trained at a very early age for the stage. She appears to have risen through a long series of struggles to the eminence she ultimately attained. Having accepted in 1855 an engagement in Paris, she sought the favour of a French audience as an interpreter of the tragic muse at the very time that Rachel was in the zenith of her fame. Her appearance at such a period was regarded by the French as an open challenge to contest the supremacy of their tragic queen, and they assembled much more disposed to criticise than to applaud. The genius of Ristori, however, triumphed, and from that moment her position has been unassailed. Her reception in England was equally enthusiastic, and she appeared in Spain in 1857, in Holland in 1860, in Russia in 1861, at Constantinople in 1864, in the United States, and other parts of the world, with success. William I. of Prussia gave her the medal in sciences and in arts in 1862. Amongst her most famous characters are those of Medea, Lady Macbeth, Fazio, Phædra, Deborah, Judith, Francesca da Riviera, and Camilla. After an absence of fifteen years, Madame Ristori again appeared in London, June 11, 1873, and on Nov. 8 in that year she took her farewell of the English stage at the Queen's Theatre, Manchester. She appeared again, however, on a few occasions in the year 1882, and acted Lady Macbeth with all her old distinction if with some lack of fire. She is married to the Marquis Capranica del Grillo.

GRIMSTON, Mrs. William Hunter, née Margaret Brunton Robertson, but known to the public, first as "Madge" Robertson; and, after her marriage, as Mrs. Kendal, the name assumed by her

husband, Mr. William Hunter Grimston, the actor. She was born at Great Grimsby, Lincolnshire, March 15, 1849. Her grandfather, her father, and her uncle, were all actors. Her brother was the dramatist T. W. Robertson. Miss Robertson's *début* in London was made on July 29, 1865, when she appeared at the Haymarket as Ophelia to the Hamlet of Walter Montgomery. On March 14, 1868, she made her first decided success in the metropolis, as Blanche Dumont, in Dr. Westland Marston's "Hero of Romance," which was performed for the first time on that occasion, at the Haymarket Theatre. On Aug. 7, 1869, Miss Robertson was married to Mr. William Hunter Grimston, who on the stage is known by his assumed name of Kendal. In the ensuing five years she appeared at the Haymarket in various characters. The creation of the character of Lilian gave Mrs. Kendal a position among the leading *comédiennes* of the day. In Jan., 1875, she began a short engagement at the Opéra Comique; and, in the same year, joined the company organized by Mr. Hare for the Court Theatre. Afterwards she joined the Prince of Wales's Theatre, then under the management of Mr. and Mrs. Bancroft. In Jan., 1879, Mrs. Kendal returned to the Court Theatre. In 1881 she joined the company at the St. James's Theatre, under the joint management of Mr. Kendal and Mr. Hare. In July, 1889, Mr. and Mrs. Kendal went to America. Mrs. Kendal has recently contributed to *Murray's Magazine* a series of gossip articles, chiefly autobiographical, entitled "Dramatic Opinions."

GRIMTHORPE (Lord), Edmund Beckett Denison (afterwards Sir Edmund Beckett, Bart.), LL.D., was born at Carlton Hall, near Newark, May 12, 1816, and was educated at Doncaster, Eton, and Trinity College, Cambridge, of which he was scholar. He graduated B.A. and 28th Wrangler in 1838; was called to the Bar at Lincoln's Inn 1841, and became Q.C. 1854. In 1863 he received the degree of LL.D., and in 1877 was appointed Chancellor and Vicar-General of York. He was for many years a leader of the Parliamentary Bar, and retired in 1881. In 1886 he was created a peer. He has always interested himself greatly in architecture, and has designed no small number of churches and houses, as well as all the new works at St. Alban's Cathedral since 1878; and those at Lincoln's Inn, of which he is a Benchler, and the great Westminster clock and bells. He is President of the British Horological Institute, and of the Protestant Churchmen's Alliance, and is the

author of the following works: "Lectures on Church Building," 1856; "Life of Bishop Lonsdale" (his father-in-law), 2nd edit., 1869; "A Book on Building," 2nd edit., 1880; "Should the Revised New Testament be authorized?" 1882; "Astronomy without Mathematics," 7th edit., 1883; "Treatise on Clocks, Watches, and Bells," 7th edit., 1883; "St. Alban's Cathedral and its Restoration," 2nd edit., 1890; "Origin of the Laws of Nature," and a "Review of Hume and Huxley on Miracles," S.P.C.K.; besides numerous pamphlets and reviews chiefly on questions of ecclesiastical law, and a multitude of caustic letters in the *Times*.

GROVE, Sir George, D.C.L., born at Clapham, Surrey, in 1820, was educated as a civil engineer. In 1841 he erected the first cast-iron lighthouse constructed, on Morant Point, Jamaica; and in 1844 a similar tower on Gibbs' Hill, Bermuda. On his return to England, he joined the staff of the late Mr. Robert Stephenson, by whom he was employed on the works of the Chester and Holyhead Railway and the Britannia Bridge. In 1850 he succeeded Mr. Scott Russell as Secretary to the Society of Arts, and on the formation of the Crystal Palace Company in 1852 was appointed its secretary, a position he occupied till the end of 1873. After this he became a member of the Board of Direction of the Company, and retained his seat until 1878. He was associated with the house of Macmillan and Co., Publishers, and edited *Macmillan's Magazine* for several years. He is also editor of a "Dictionary of Music and Musicians (A.D. 1450-1886)." Some of the principal biographies—amongst them Beethoven, Mendelssohn, and Schubert are from his pen. Sir George Grove was one of the principal contributors to the "Dictionary of the Bible," edited by Dr. William Smith, and took an active part in the formation of the Palestine Exploration Fund, under the patronage of Her Majesty. The University of Durham conferred on Mr. Grove (June 26, 1875) the honorary degree of D.C.L., in recognition of his services to literature. His analyses of classical orchestral music for the Saturday Concerts at the Crystal Palace, and his zeal as a propagandist of good music are well known. Early in 1882 he was appointed by the Prince of Wales to be Director of the "Royal College of Music" at Kensington. Sir George Grove is one of the literary executors of the late Dean of Westminster, with whom he visited the United States in 1878. He was knighted by the Queen

at Windsor, May 24, 1883. He is married to Harriet, daughter of the late Rev. Charles Bradley.

GROVE, The Right Hon. Sir William Robert, D.C.L., LL.D., P.C., F.R.S., son of John Grove, Esq., Swansea, a Justice of the Peace, and a Deputy-Lieutenant of Glamorganshire, was born July 11, 1811. He was educated by the Rev. E. Griffiths, of Swansea, the Rev. J. Kilvert, of Bath, and at Brasenose College, Oxford, where he proceeded to the degree of M.A. in 1833. Two years later he was called to the Bar at Lincoln's Inn. Being temporarily prevented by ill-health from following the legal profession, he turned his attention to the study of electricity, and succeeded in 1839 in contriving the powerful voltaic battery which bears his name and the gas battery. He was Professor of Experimental Philosophy at the London Institution from 1840 till 1847, and he took an active part, as member of the Council, in the business of the Royal Society, particularly in the reform of its constitution, effected, after a severe struggle, in 1847. Mr. Grove, who became a Q.C. in 1853, was for some years the leader of the South Wales and Chester circuits, a member of the Metropolitan Commission of Sewers, and one of the Royal Commissioners on Patent Law, and on Oxford University. He was President of the British Association at Nottingham in 1866, when he selected for the subject of his address the Continuity of Natural Phenomena, as evinced by the recent progress of science, his object being to show that the changes in the inorganic world, in the succession of organized beings, and in the progress of human knowledge, result from gradual minute variations. The honour of knighthood was bestowed upon him (Feb. 21, 1872) a few months after his elevation to the judicial bench (Nov., 1871) as a Justice of the Common Pleas. That office he held until Nov., 1875, when, through the operation of the Judicature Act, he became a Judge of the High Court of Justice. He retired in 1887 and was made a member of the Privy Council. Sir William has made several important discoveries in electricity and optics, and he is the author of a remarkable lecture, printed in 1842, on "The Progress of Physical Science since the opening of the London Institution." In this lecture he first advanced the doctrine of the mutual convertibility of the various natural forces, heat, electricity, &c., and of their being all modes of motion, or forms of persistent force. This doctrine is further developed in his famous essay "On the

Correlation of Physical Forces," on which he gave a course of Lectures in 1843, and which reached a sixth edition, "with other contributions to science," in 1874, and has been translated into French and German, reprinted in America, &c. In 1847 he received the medal of the Royal Society for his Bakerian lecture on "Voltaic Ignition, and on the Decomposition of Water into its constituent Gases by Heat." Sir William has contributed many papers to the Transactions of the Royal Society, and the *Philosophical Magazine*; he is a Fellow of the Royal Society, and a member of the Academies of Rome and Turin, Knight of the Order of the Rose, Brazil, &c.

GROVES, Charles Edward, F.R.S., the son of Charles Groves, of Highgate, was born there on March 4, 1841, and was educated at the College, Brixton Hill, under the late Dr. Wilson, and at the Royal College of Chemistry (Royal School of Mines) under Dr. A. W. Hofmann, to whom he was afterwards private assistant, and then assistant in the Laboratory of the College. In 1862 he went as assistant to Dr. Stenhouse, with whom he remained until his death in 1880. In 1882 he was appointed Lecturer in Practical Chemistry at Guy's Hospital, where he is also Lecturer in Dental Metallurgy; and in 1885 consulting chemist to the Hon. the Conservators of the River Thames. In 1878 he became sub-editor of the *Journal of the Chemical Society*, and on the decease of Mr. H. Watts, in 1884, succeeded him as editor of the journal. He was elected a Fellow of the Chemical Society in 1871, and of the Royal Society in 1883, and is one of the founders of the Institute of Chemistry, of which he is Registrar and Secretary. He is the editor of several important works:—Dr. F. Crace-Calvert's "Dyeing and Calico Printing," 1876; "Miller's Chemistry; Part II., Inorganic Chemistry," 1878; (and in conjunction with Dr. Armstrong) of Part III., "Organic Chemistry," 1880; and "Fuel," 1889, in the first volume of Groves' and Thorp's "Chemical Technology." He is also the sole author, or joint author with his friend, the late Dr. Stenhouse, of numerous papers on Organic Chemistry, being the discoverer of tetrabromide of carbon, of Beta-naphtha quinone, and of the corresponding diquinone, the last two belonging to classes of compounds hitherto unknown.

GRUNDY, The Rev. William, M.A., was born in 1850, and educated at St. John's Foundation School for the sons of Clergy, from 1861 to 1866, and at Rossall

School from 1866 to 1870. He was Gold Medallist of the Royal Geographical Society in Physical Geography, 1869; Rossall Exhibitioner and Scholar (Open) of Worcester College, Oxford, 1870; First Class, Classical Moderations, 1872; and Second Class, Final Classical Schools, 1874. He was elected Fellow (Open) of Worcester College, Oxford, 1875; Lecturer, Worcester College, Oxford, from 1875 to 1878; and Head Master's assistant, Rossall School, from 1878 to 1880. He was ordained Deacon by the Lord Bishop of Oxford, 1878; ordained priest by the Lord Bishop of Oxford, 1879; was Head Master of the King's School, Warwick, from 1881 to 1885; and has been Head Master of Malvern College, from 1885 to the present date, 1890. He is the author of "Chief Ancient Philosophies, Aristotelianism, Part II., The Logical Treatises, The Metaphysics, The Psychology, The Politics," 1889.

GUBERNATIS, Angelo de, an Italian author, born at Turin, April 7, 1840, was educated in the University of Turin, where he received the degree of Doctor of Philology. He was appointed in 1860 Professor of Rhetoric in the Gymnasium of Chieri, near Turin; was sent in 1862, at the expense of the government, to Berlin, where he studied under Professors Bopp and Weber; became extraordinary Professor of Sanscrit in the University of Florence (*Istituto di Studi Superiori*) in 1863, and ordinary professor in 1869. Signor De Gubernatis has obtained celebrity as a dramatist, a lyric poet, a journalist, a critic, an orientalist, and a mythologist. He made his *début* with his tragedy entitled "Pier delle Vigne." The principal character was sustained by the celebrated actor Ernesto Rossi, and the piece proved a great success. Afterwards he published the following dramas in verse:—"La Morte di Catone," "Romolo," 1874; "Il Rè Nala," "Il Rè Dasarata," "Mayá," "Romolo Augustolo," and "Savitri: Idillio Drammatico Indiano," 1878. He has founded five journals—*L'Itali Letteraria*, 1862, *La Civiltà Italiana*, 1869, *La Rivista Orientale*, 1867, *La Rivista Europea*, 1869, and the *Bollettino Italiano degli studi Orientali*, 1876. He is the Italian correspondent of the *Athenæum* and of the *Contemporary Review* of London, of the *International Review* of New York, of the *Deutsche Rundschau* of Berlin, and of the *Wiestnik Europy* of St. Petersburg. Among his scientific works the following deserve special mention: "Piccolo Enciclopedia Indiana," Florence, 1867; "Fonti vediche dell' epopea," Florence, 1867; "Memoria

sui viaggiatori Italiani nelle Indie Orientali," Florence, 1867; "Storia comparata degli usi nuziali Indo-Europei," Milan, 1869; "Storia comparata degli usi funebri e natalizii," Milan, 1877; "Zoological Mythology: or, the Legends of Animals," 2 vols., London, 1872, translated into German, Leipsic, 1873, and into French, Paris, 1874; "Letture sopra la Mitologia Vedica," Florence, 1874; "Ricordi biografici," Florence, 1873; "Storia dei viaggiatori Italiani nelle Indie," Leghorn, 1875; "Matériaux pour servir à l'Histoire des Etudes Orientales en Italie," Paris and Florence, 1876; and "Mythologie des Plantes," 2 vols., Paris, 1878. He is general Secretary of the Italian Oriental Academy. In May, 1878, he delivered in the Taylor Institute at Oxford a series of three lectures on the life and works of Manzoni. They were published at Florence in 1879, under the title of "Alessandro Manzoni: Studio Biografico." He acted as General secretary to the Congress of Orientalists held at Florence in Sept. 1878.

GUILDFORD, Bishop of. *See* SUMNER, THE RIGHT REV. GEORGE HENRY.

GUILLAUME, Jean Baptiste Claude Eugène, Hon. R.A., a distinguished French sculptor, was born at Montbard (Côte d'Or), Feb. 3, 1822, and after passing through the usual course of studies in the College of Dijon, went to Paris to become a pupil of Pradier at the École des Beaux-Arts, where he obtained the prize of Rome in 1845. On the reorganization of the École des Beaux-Arts at the close of 1873, M. Guillaume was appointed to a professorship; and a twelvemonth later was nominated Director of that Institution. He was elected a member of the Institute in 1862; promoted to the rank of Officer of the Legion of Honour in 1867; and elected an honorary member of the Royal Academy of London, Dec. 15, 1869. This artist's name is familiar to those visitors at the London International Exhibition of 1862 who noticed "The Tomb of the Gracchi," which was suggested by the double busts of the great brethren placed as on a tomb, side by side. His statue of Napoleon I., which was at the French Universal Exhibition of 1867, attracted great attention. Among the other productions of his chisel are "Theseus finding his Father's Sword on a Rock;" "Anacreon's Guests," a bas-relief; bust of M. Hittorff in the Universal Exposition of 1855; "The Lives of SS. Clotilde and Valere," bas-reliefs, in the new church of St. Clotilde; the statue of L'Hôpital, in the new Louvre;

the "Monument of Colbert," at Rheims; and a bust of Monseigneur Darboy. He is now head of the French Art School at Rome.

GUINNESS, Sir Edward Cecil, Bart., J.P., D.L., of Castlenock, co. Dublin, born in 1847, formerly a member of the great firm of brewers in Dublin, is the younger brother of Lord Ardilaun, and is well known as a munificent philanthropist, who has lately given a quarter of a million to be applied to the better housing of the poor, and also as a scion of a house whose wealth has been systematically employed for the promotion of schemes of public utility. His father, it will be remembered, rebuilt St. Patrick's Cathedral in Dublin; and even the most rigid of teetotalers, when they see the purposes to which the great fortune of the Guinness family has been devoted, may almost be expected to forgive the source from which it has been derived. Sir Edward married, in 1873, Adelaide Maria, daughter of Richard Samuel Guinness, M.P. for Deepwell, co. Dublin.*

GUINNESS, The Rev. H. Grattan, D.D., born August, 1835, near Dublin, is the son of Captain John Guinness, H.E.I.C.S., and Grandson of Arthur Guinness, of Beaumont, co. Dublin. He was educated at private schools and at New College, London; ordained, in 1856, as an undenominational Evangelist, a preacher of the Gospel both in Great Britain and Ireland, in America, and on the Continent. He is the Founder and Director of the East London Institute for Home and Foreign Missions, Harley House, Bow, London, E., which has sent out over 500 missionaries into all parts of the world. Dr. Grattan Guinness is the author of "The Approaching End of the Age, viewed in the Light of History, Prophecy, and Science," a work which has passed through ten editions; "Light for the Last Days;" "Romanism and the Reformation;" "The Divine Programme of the World's History," and other works.

GUINNESS, Mrs. H. Grattan, wife of the above, daughter of Ed. Marlborough FitzGerald, and granddaughter of Maurice FitzGerald, of Upper Merion St., Dublin, born in April 1831, and married in 1860, is one of the earliest lady preachers of the gospel (members of the Society of Friends excepted); Secretary of the above Missionary Institute; and Secretary of the first Christian Mission on the Congo,

the Livingstone Inland Mission; and joint authoress of the above works, and authoress of "The Life of Mrs. Henry Denig," "The New World of Central Africa," and Editor of "The Regions Beyond," &c.

GUINON, Georges, M.D., was born in Paris, August 6, 1859; commenced his medical studies in 1877; and has worked chiefly under the direction of Professors Charcot and Bouchard. He obtained his degree of M.D. in 1889; and soon after was appointed Chef de clinique des maladies du système nerveux, à la Salpêtrière. He has written many articles, chiefly on hysteria, has assisted Prof. Charcot in his "leçons sur les maladies du système nerveux;" is secretary to the Editor of the Archives de Neurologie, and Editor of the "Nouvelle Iconographie de la Salpêtrière.

GUNTER, Archibald Clavering, Ph.B., was born in Liverpool, Oct. 25, 1847, of English parents, his father, Henry Gunter, being a merchant engaged in the West India trade. When about five years of age he was taken to California by his parents, arriving there in Feb., 1853. He was educated partly in England and partly in California, taking the degree of Ph.B. in the University College, San Francisco; and afterwards, from 1867 to 1874, he followed his profession of Mining and Civil Engineer, doing some work on the Central Pacific Railway, and being superintendent of several mines; also erecting smelting works at Battle Mountain, Nevada, and Homansville in the Tintic mining district, Utah, as well as chlorination works at Havilah, California, and being superintendent of several large mines in Utah and Nevada. He always had, however, a passion for literature; and, during his collegiate course, and while following his profession of engineer, wrote several plays, one of them being produced at the California Theatre under the name of "Cuba," and another at the Grand Opera House, San Francisco, under the title of "Our Reporter." In 1874 he became a stockbroker in San Francisco, operating in mining stocks until 1877, when he went to New York, having fully intended to make literature his occupation in life. His first play, which was produced in New York at the Union Square Theatre, Aug., 1880, was "Two Nights in Rome." In Feb., 1890, "Fresh, the American," was played at the Park Theatre. Since then he has had a number of plays performed, among them "Courage," "After the Opera," "The Wall Street Bandit,"

* While these pages were passing through the press Sir Edward was raised to the peerage, Jan. 1, 1891.

"Prince Karl," "The Deacon's Daughter," and his own dramatization of his novel "Mr. Barnes of New York," which was the first that he wrote: it was finished in 1885, and published in 1887. It having been refused by all the publishing houses to which it had been submitted, Mr. Gunter was compelled for the publication of his book to form the Home Publishing Co. "Mr. Barnes" in two or three months became a great success as a novel, and has since been published in several different languages, and also by four or five English publishing houses. His second novel, "Mr. Potter of Texas," was published in Feb., 1888, the first edition produced in America being the largest first edition of a novel ever published in the world, 61,262 copies. Since then this novel has also been translated into several languages. His next work, "That Frenchman," was published in May, 1889, the first edition being 61,069 copies, being practically equal in size to that of "Mr. Potter." This book, which at present is being translated into German and French, has been prohibited by the Czar of Russia from circulation in his dominions, on account of a portion of the story referring to the Secret Police (Third Section) of the Russian Empire. Mr. Gunter's latest novel is "Miss Nobody of Nowhere." He has recently published a story for children, "Small Boys in Big Boots." His dramatization of his novel, "Mr. Potter of Texas," has just been produced with marked success in the United States. Mr. Gunter is, perhaps, the only author who has successfully carried on the business of publishing his own works.

GÜNTHER, Albert Charles Lewis Gott-hilf, M.A., Ph.D., M.D., F.R.S., born at Esslingen (Württemberg), Oct. 3, 1830, and educated at the Universities of Tübingen, Berlin, and Bonn, entered the service of the Trustees of the British Museum in 1857, and was appointed Keeper of the Department of Zoology in 1875; since that time he has devoted himself exclusively to the administration of the extensive collections under his charge. Dr. Günther, who is a member of many academies and learned societies at home and abroad, has published:—"Die Fische des Neckars," Stuttgart, 1853; "Medicinische Zoologie," Stuttgart, 1858; "Catalogue of Colubrine Snakes in the Collection of the British Museum," London, 1858; "Catalogue of the Batrachia Salientia in the Collection of the British Museum," 1859; "The Reptiles of British India," 1864; "Catalogue of Fishes," vols. 1-8, London,

1859-70; "The Fishes of the South Seas," Hamburg, 1873-78; "The Gigantic Land Tortoises, Living and Extinct," London, 1877; "An Introduction to the Study of Fishes," Edinb., 1880; the Reports on the "Shore Fishes," "Deep Sea Fishes," and "Pelagic Fishes," in the "Voyage of H.M.S. Challenger," 1887-88; and numerous papers in the Philosophical Transactions, the Proceedings of the Zoological and Linnean Societies, and other periodicals. He is the founder of the "Record of Zoological Literature," of which he has edited the first six volumes (1864-70); and co-editor of the "Annals and Magazine of Natural History." The Royal Society awarded to him, in 1878, one of its Royal Medals for his merits in advancing zoological science, and especially for his herpetological and ichthyological researches.

GUTHRIE, James Cargill, born Aug. 27, 1814, at Airnefoul farm, in the parish of Glamis, Forfarshire, is descended from a long line of proprietors and agriculturists in the Vale of Strathmore. He was educated at the parish school of Kinnettles and Montrose Academy. Being intended by his parents for the church, he studied for some years in the University of Edinburgh, but being disappointed in his early hopes and ambition, he entered the mercantile world. He was appointed in 1868 Principal Librarian to the Dundee Free Library, the first institution of the kind in Scotland established under the Free Libraries Act. He is the author of numerous poems and popular Scotch songs, and some anthems and hymns which have been set to music by Dr. Spark and other composers. In 1883, he published "Adieu to the Good Ship Mars," a naval part-song; original music by James Yorkson. And in 1887, "Hark the Trump of Jubilee," the first Jubilee March or Ode that appeared in public to commemorate the anniversary of the 50th year of Her Majesty Queen Victoria's reign—circulation 110,000 copies; and in 1888, "Dalhousie No More," a Masonic Ode, with appropriate music, in Memoriam of the late Earl of Dalhousie, Grand Master Mason of Scotland. He is also the author of several prose works, including "George Gilfillan, as a Literateur and as a Man;" "Dr. Thomas Guthrie: His Outer and Inner Life;" novelette, "No! Thank You; or Second Thoughts are Best;" "What is Genius?" "The Genius of Literature;" "The Genius of Love;" "The Genius of Music;" "The Genius of Earth;" "The Genius of Heaven;" and in 1890, "Eventide; or, Fading Away."

GUTHRIE, Thomas Anstey (who publishes under the name of F. Anstey), was born in 1856 at Kensington, and educated at a private school, and at King's College, Strand. He matriculated at Trinity Hall, Cambridge, in 1875, took his degree in the Law Tripos, 1879, and was called to the Bar by the Benchers of the Middle Temple, 1880. He read in Chambers with a Conveyancer and Equity Draughtsman, but never practised as a barrister. He published short stories in various magazines between 1878-81. His first book "Vice Versa" appeared in 1882 and achieved an immense success, running through many editions within the year of publication. It was also dramatised and performed on the London and provincial stage for many nights. It was followed in 1883 by "The Giant's Robe;" "The Black Poodle," and other stories, 1884; "The Tinted Venus," 1885; "The Fallen Idol," 1886; "The Pariah," 1889.

GUTHRIE, William, was born at Culhorn, Stranraer, N.B., 1835, being the son of the late George Guthrie, Esq., of Appleby and Ernambrrie. He was educated at Glasgow and Edinburgh Universities, and was admitted an advocate at the Scotch Bar in 1861. Mr. Guthrie was appointed one of the Commissioners under the Truck Commission Act, in Dec., 1871; Registrar of Friendly Societies in Scotland, from Oct., 1869, to Feb., 1874; and Sheriff-substitute of Lanarkshire at Glasgow, Jan. 1874. He edited the *Journal of Jurisprudence* (Edinburgh) from 1866 to 1874; and was one of the Reporters of Court of Session Cases, Scotland, from 1871 to 1874. He has published a translation of Savigny on "Private International Law" (System of Modern Roman Law, vol. viii.), 1869; an edition of Erskine's "Principles of Scots Law," 1870, second edit. 1874; two editions of Bell's "Principles of the Law of Scotland," 1871 and 1876; "The Law of Trade Unions in England and Scotland," 1873; "Select Cases decided in the Sheriff Courts of Scotland," 1879.

GYE, Madame, née Marie Emma Lajeunesse, but popularly known as Madame Albani, American singer, was born of French-Canadian parentage, at Chambly, near Montreal, in 1851. She was educated in the Convent of the Sacred Heart at Montreal, but her first musical training came from her father, who was himself a skilful musician. In 1864 he removed to Albany, N.Y., where her singing in the cathedral attracted much attention. A little later she was sent to Europe for the more thorough instruction which she

could not obtain in America, and under the care of Baroness Lafitte, was two years in Paris, where she studied with the famous Duprez. She then became a pupil of the old *maestro* Lamperti at Milan. Several years of hard study followed, till at last, in 1870, she made her *début* at Messina under the name of Albani, adopted out of compliment to the city where her musical promise was first recognized. Immediately afterwards she sang at Malta, and then, in the winter of 1871-72 at the theatre of La Pergola at Florence. Her crowning effort was in the "Mignon" of Ambrose Thomas, already condemned in four theatres in Italy, but which, in Madame Albani's hands, obtained the complete success which all the parts identified with her have met with. When her fame was established in Italy she appeared at the Royal Italian Opera, London, in 1872, and since then has been a great favourite both in this country and the United States. In St. Petersburg, Paris, Berlin, and most of the European capitals she has been received with equal enthusiasm, and she is to-day certainly one of the most popular singers in the world. In 1883 she made a tour of the United States, and in May, 1886, sang the ode written by Tennyson for the opening of the Colonial Exhibition in London. Madame Albani, before leaving Scotland in Oct., 1890, sang at Balmoral before the Queen and the Royal Family, on which occasion Her Majesty was pleased to give Madame Albani a valuable picture containing portraits of the whole of the Royal Family at the time of her Jubilee. Besides singing in opera, Madame Albani has studied specially oratorio singing, and she is now acknowledged to be the first oratorio singer in England, and is engaged at all our principal festivals. In 1878 she was married to Mr. Ernest Gye, the theatrical manager.

GZOWSKI, Lieut.-Col. Casimir Stanislaus, one of Her Majesty's Aides-de-Camp in Canada, was born in St. Petersburg, in March, 1813, and is the son of Count Gzowski, a Polish noble and officer of the Imperial Guard. In 1830, Col. Gzowski graduated as an engineer from the military college of Kremenetz, in the province of Volhynia, and entered the Russian army. He was concerned in the Polish insurrections of 1830-32, and exiled to the United States in the latter year. There his linguistic accomplishments for a time served him in good stead; but he resumed his profession, and soon went to Upper Canada, where he connected himself with the Department

of Public Works for the Province, and has been interested in many public enterprises of a professional character for the past fifty years. With all the important engineering products of Canada, in railway construction, in river and railway-bridge building, Col. Gzowski has been identified; and many public and private enterprises have had the benefit of his experience and skill. He has for many years taken an active part in furthering the aims of the Dominion Rifle Association; and was well known at Wimbledon, on the occasion of the visit of the Canadian team. In May, 1879, he was appointed Aide-de-Camp to the Queen.

H.

HAAG, Carl, R. W. S., a painter, born at Erlangen, in Bavaria, in 1820, began his artistic education at the Academy of Nuremberg in 1837, afterwards continuing it at Munich and Rome. In 1847 he settled in this country, and his admiration for the perfection of English water-colour painting induced him to abandon oil, and adopt water colour in preference. In 1850 he was elected a member of the Royal Society of Painters in Water Colours. He has been a constant contributor to the Exhibitions of that Society, the subjects of his earlier pictures being chiefly from the Tyrol, Dalmatia, and Montenegro. In 1853 the reigning Duke of Saxe-Coburg and Gotha conferred upon him the honorary title of Hofmaler; he was introduced at the Court of Queen Victoria by the late Prince of Leiningen, and Her Majesty gave him many commissions for sketches of life in the Highlands of Scotland, and also for important pictures, such as "The Royal Family ascending Loch-na-Gar;" "Evening at Balmoral—the Stags brought Home;" "The Queen and Prince Consort fording Pool Tarff;" and others, which were exhibited, and have since been engraved. He then travelled in Greece, Egypt, Syria, and Palestine, painting important views of Athens, Ba'albek, Palmyra, and many of the Holy Places in Jerusalem, among them "The Ancient Vestibule beneath the Temple Area;" "The Golden Gateway;" and "The Holy Rock in the so-called Mosque of Omar;" most of which were finished on the spot. His chief aim, however, was to study the life of the Bedaween tribes, and the scenes of different deserts, for which purpose he made long stays among these nomadic hordes, learning their mode of life, their manners and customs, and has since painted a

series of pictures illustrative of Arab life, the best known of which are, "Aghile Agha receiving the visit of H. R. H. the Prince of Wales and suite in his Encampment near Mount Tabor;" "The tribe of the Anazeh Bedaween departing from Palmyra;" "A Bivouac in the Desert;" "The Arrival at a Well in the Desert;" "Preparing the Evening Meal;" "Desert Hospitality;" "Happiness in the Desert;" "A Bedaween's Devotion;" "Danger in the Desert;" "On the Alert;" "Ready for Defence;" "A Caravan of Bedaween Encamping near the Sphinx of Ghizeh against an approaching Sandstorm;" and "La Ilah il Allah," 1889. A special exhibition of Mr. C. Haag's works was held at the Goupil Galleries in Bond Street, 1885. He is an honorary member of the Royal Society of British Artists in London, and a membre honoraire de la Société Royal Belge des Aquarellistes of Brussels. He received the Royal Bavarian Cross of Merit in 1872. In 1874 he became an Officer of the Order of the Medjidieh; in 1878 a Knight of the Legion of Honour of France; and in 1887 a Knight-Commander of the Saxe-Coburg-Gotha Family Order.

HABBERTON, John, was born in Brooklyn, New York, in 1842. At the age of eight years he was taken to the West, where he was educated chiefly in the common schools of Southern Illinois. From 1859 until he entered the Army in 1862, he was connected with the publishing house of Harper Brothers, New York. He was literary editor of the *Christian Union* from 1873 to 1876, and since then has been an editorial writer on the *New York Herald*. His first literary work was a series of sketches of Western life. This was followed, in 1877, by "Helen's Babies," of which nearly a quarter of a million copies have been sold in the United States, besides large editions in England, France, and Germany. He has since written "The Barton Experiment," 1876; "The Jericho Road," "Other People's Children," "The Scripture Club of Valley Rest," and "Some Folks," 1877; "The Crew of the Sam Weller," and "Little Guzzy," 1878; "The Worst Boy in Town," 1879; "Just One Day," 1880; "Who was Paul Grayson?" 1883; "Bowsham Puzzle," and "George Washington," 1884; "Bruston's Bayou," 1887; "Country Luck," 1888; "All He Knew," "Well Out of It," and "Couldn't Say No," 1889; and "Out at Twinnett's," 1890. He also published in 1877 an additional series of selections from the "Spectator," comprising "The Roger de

Coverley Papers;" and in 1878 "Selections from the Tatler, Guardian, and Freeholder;" and wrote, in conjunction with Charles L. Norton, "Canoeing in Kanuckia," 1878.

HADEN, Francis Seymour, F.R.C.S., was born Sept. 16, 1818, at 62, Sloane Street, London, and educated at University College and at the Sorbonne, Paris. He became in 1842 a member, and in 1857 a Fellow, of the Royal College of Surgeons of England. The International Jury Report on Surgical Instruments, drawn up by Mr. Haden, was the first public document in which the operation of Ovariectomy (till then universally condemned) was recommended. Three letters, contributed by him to the *Times*, under the title of "Earth to Earth," in Jan., May, and June, 1875, brought about considerable amelioration in the practices pursued by undertakers and cemetery companies, and led to a system of interment founded on reason and sanitary consideration, which has ever since been successfully carried out at Woking. Mr. Haden is also the author of certain art publications. These began in 1858, and are still going on; they have been partly artistic and partly literary,—the artistic part of the work consisting:—(1.) Of a large folio work (in French), entitled, "Études à l'Eau Forte," published in Paris and in London in 1865 and 1866; (2.) Of a large number of engraved plates (185 in all), which have been catalogued and described by Sir William R. Drake, F.S.A., under the title of "The Etched Work of Francis Seymour Haden." Mr. Seymour Haden is also the possessor of one of the finest collections ever formed of the etched works of the old masters, particularly of Rembrandt, and on which during more than thirty years he has expended a fortune, giving at auctions often as much as £300 or £400 for a single print. On the other hand, one of his own plates—that of the "Agamemnon"—has realised, chiefly for the benefit of the publishers, upwards of £4,000. Mr. Seymour Haden is President of the Society of Painter Etchers, and a member of the Athenæum and of the Burlington Fine Arts Clubs. He is also Vice-President of the Obstetrical Society of London.

HADING, Madame Jane, née Jeanette Hadingue, was born at Marseilles. At the age of three, she played *Blanche de Caylus*, in "Le Bossu," her father at the same time playing the leading character. Some years later she was sent to the Marseilles Conservatoire, where she won

considerable distinction. On leaving, she entered upon an engagement at the Algiers Theatre, and when but fourteen played *Zanella*, in "Le Passant;" Stefano, in "Chef d'œuvre inconnu;" the blind-girl, in "Les Deux Orphelines;" and Pedro, in "Giroflé Girofla." From Algiers she went to Cairo, to perform at the Khedival Theatre. She returned to Marseilles in 1876, and for a time devoted herself to drama and comedy, but the lyric stage again attracted her, and she went to Paris. At the Palais Royal she played "La Chaste Suzanna," and at the Renaissance, in 1879, she was the original *Jolie Persane* and *Belle Lurette*, and the heroine in "Héloïse and Abelard." At the Gymnase in 1883, she again appeared in comedy as *Paulette* in "Autour de Mariage." The piece was a failure, but M^{me}. Hading made a great personal success. In Dec., 1883, she was the original *Claire de Beaulieu*, in "Le Maître de Forges," and her impersonation of this part confirmed her success. In Jan., 1885, she appeared in this character in London, at the Royalty Theatre. In 1889, in company with M. Coquelin, Madame Hading made an American tour.

HAECKEL, Ernst, a celebrated German naturalist and writer, was born at Potsdam, Feb. 16, 1834, and studied medicine and Science at Würzburg, Berlin, and Vienna. In 1859 he went to Italy, and studied zoology at Naples and Messina, returning in 1861 to Jena, where, after further studies, he was appointed Professor of Zoology. Between 1866 and 1875, he travelled over the greater part of Europe, besides visiting Asia Minor, Syria and Egypt. In 1881, he visited India and Ceylon, and published an account of his travels. He is regarded in Germany as the foremost supporter of Darwin's theories. Amongst his works may be mentioned "Natural History of Creation," translated into twelve languages, 8th edit., 1889; "Generelle Morphologie," 1866; "Gastraen-Theorie," 1873; "The Origin of the Human Race," 4th edit., 1878; "Life in the Deep Seas," 1870; "The History of Man's Development," 1874; "Anthropogenie," 3rd edit., 1877; "Popular Lectures on Evolution," 1878. His Monographs on the "Radiolaria," 1862; "Calospongiae," 1872; "Medusae," 1881, and "Siphonophorae," 1888, illustrated by 200 original plates. His contributions to the Zoology of the "Voyage of H.M.S. Challenger," comprehend four volumes of that work, with 230 plates. Notwithstanding splendid offers from the Universities of Würzburg,

Vienna, Strasburg and Bonn, Haeckel has decided to remain at the small University of Jena, the picturesque country and peaceful solitude of which give him the best opportunity for continuous scientific work.

HAGARTY, The Hon. John Hawkins, D.C.L. Chief Justice of the Supreme Court of Ontario, was born in Dublin on Sept. 17, 1816. He entered Trinity College, Dublin, in 1832; but, two years afterwards, emigrated to Canada, where he studied law, and in 1840 was admitted to the Bar of the Upper Province. His educated tastes and love of letters for a time drew him to literature; but, continuing the practice of his profession, he was made a Queen's Counsel in 1850, and elevated to the Bench in 1856. In 1868 he was appointed Chief Justice of the Common Pleas; was subsequently transferred to the Queen's Bench; and in 1878 received the appointment of Chief Justice of Ontario, which he still holds.

HAGGARD, Henry Rider, of Ditchingham House, Norfolk, son of William Meybohm Rider Haggard, J.P., D.L., of Bradenham Hall, Norfolk, was born June 22, 1856. He accompanied Sir Henry Bulwer, G.C.M.G., as secretary to Natal in 1875, and served on the staff of Sir Theophilus Shepstone, K.C.M.G., the Special Commissioner to the Transvaal 1876-7, and together with Colonel Brooke, R.E., formally hoisted the British flag over the Transvaal territory, on May 24, 1877. He was subsequently appointed to the post of Master of the High Court of the Transvaal. During the Zulu War he was elected adjutant and lieutenant of the Pretoria Horse, a gentleman volunteer corps, raised for service in Zululand, but which was prevented from proceeding there by the threatening action of the Boers. He retired from the Colonial service in 1879, and returned to England. Mr. Rider Haggard's first book, of a political character, published in 1882, is named "Cetywayo and his White Neighbours, or Remarks on Recent Events in South Africa." This work was favourably received here and in South Africa, but, owing to its author being unknown, it did not then attain a large circulation. Subsequently, he published "Dawn," a novel, 1884, and "The Witch's Head," a novel, 1885. Both these books were well received, especially the latter, but in 1886 he brought out "King Solomon's Mines," the work by which he established his reputation. This book was, on its appearance, most favourably noticed, and became popular in this country, America,

and on the Continent. Among other well known works by the same writer we may mention "She," "Jess," "Allan Quatermain," "Colonel Quaritch, V.C.," "Cleopatra," "Beatrice," and "Eric." Mr. Rider Haggard is also a barrister of Lincoln's Inn and a Justice of the Peace for Norfolk. He married, in 1880, Marianna Louisa, only child and heiress of the late Major Margitson, of Ditchingham House, Norfolk.

HAINES, Field Marshal Sir Frederick Paul, G.C.B., C.I.E., G.C.S.I., son of the late Mr. Gregory Haines, C.B., of Dublin, Commissary-General of the Forces, by Harriet, daughter of Mr. John Eldridge, of Kirdford, Sussex, was born in 1819. He entered the army as ensign in 1839, became lieutenant, 1840; captain, 1846; colonel, 1854; lieutenant-colonel, 1855; major-general, 1864; lieutenant-general, 1873; general, 1877; and field-marshal, 1890. At the beginning of the war on the Sutlej in 1845, he was appointed to act as military secretary to Sir Hugh Gough, then Commander-in-chief in India. He was present at the battles of Moodkee and Ferozeshah, and upon the latter occasion was severely wounded by grape-shot, his horse being at the same moment killed under him. For his conduct in this campaign he was promoted on the recommendation of Lord Gough, and received a Medal and one Clasp. He served also in the same capacity throughout the Punjab campaign of 1848 and 1849, taking part in the affair of outposts at Ramnuggur, the passage of the Chenab, and the battles of Chillianwallah and Goojerat. He served with the 21st Fusiliers through the campaign of the Crimea in 1854-55, up to the siege of Sebastopol. He was created a K.C.B. in 1871, and was created a G.C.B. in 1877. He was Commander-in-chief of the Madras army from May, 1871, to 1874, when he was appointed colonel of the 104th Regiment (Bengal Fusiliers). In 1876 he received the local rank of general in India, and some time later was appointed Commander-in-chief in India. He held this post the customary period of five years. General Haines received the thanks of Parliament "for the ability and judgment with which he directed operations," in Afghanistan in 1878-80, and was appointed field-marshal 20th May, 1890.

HALDANE, The Right Rev. J. R. A. See CHINNERY-HALDANE.

HALE, Edward Everett, D.D., was born at Boston, Massachusetts, April 3, 1822.

He graduated at Harvard College in 1839, studied theology, and was pastor of the (Unitarian) Church of the Unity, Worcester, Massachusetts, from 1846 to 1856. Since that time he has been pastor of the South Congregational Church, Boston. He has published a large number of books, amongst which are—"The Rosary," 1848; "Sketches of Christian History," 1850; "Letters on Irish Immigration," 1852; "America," 1856; "The Man without a Country," 1861; "The President's Words," 1865; "Sybaris and other Homes," 1869; "Puritan Politics in England and New England," 1869; "Ingham Papers," 1870; "Christmas Eve and Christmas Day," and "His Level Best, and other Stories," 1872; "Ups and Downs," 1873; "Working-men's Homes," and "In His Name," 1874; "Our New Crusade," and "One Hundred Years," 1875; "Philip Nolan's Friends," 1876; "Back to Back," 1878; "The Bible and its Revision," and "The Life in Common, and other Sermons," 1879; "The Kingdom of God, and other Sermons," and "Crusoe in New York," 1880; "Our Christmas in a Palace," 1882; "Seven Spanish Cities," 1883; "Fortunes of Rachel," 1884; "Boys' Heroes," and "What is the American People?" 1885; "Easter," a volume of sermons, 1886; "Life of George Washington Studied Anew," "How They Lived in Hampton," "My Friend the Boss," "Mr. Tangier's Vacations," "Tom Torrey's Tariff Talks," "Red and White," and "Naval History of the American Revolution" (in the Narrative and Critical History of America), 1888; and (with E. E. Hale, jun.) "Franklin in France," 1887-88. He has edited a series of "Stories" of the War, Sea, Adventure, Discovery and Invention, 1880-85; "Lights of Two Centuries," 1887; "The Arabian Nights," 1888; and "Sunday School Stories on the Golden Texts," 1889; and, in conjunction with his daughter, has written several volumes describing "A family flight" through France, Germany, &c., 1881-85, and one telling "The Story of Spain," 1886. Mr. Hale has been a frequent contributor to periodicals, was editor of the *Christian Examiner*, the founder and editor of *Old and New*, and is now the editor of *Lend a Hand*, and, with Mrs. Bernard Whitman, of *The Lookout*.

HALES, John Wesley, was born at Ashby-de-la-Zouch, Leicestershire, Oct. 5, 1836, being the son of a Nonconformist minister. He was educated at Glasgow High School and University, Durham Grammar School, and Cambridge Univer-

sity. He was elected Fellow of Christ's College in 1860, called to the Bar in 1867, appointed Professor of English Language and Literature at King's College, London, Dec. 1877, succeeding to the chair vacated by Dr. Brewer. Mr. Hales co-edited "The Percy Folio Manuscript," 3 vols., in 1867-88; wrote on "The Teaching of English" in Farrar's "Essays on a Liberal Education," 1867; edited "Longer English Poems," 1872; Milton's "Areopagitica," 1874; was one of the two general editors of the "London Series of English Classics;" and has contributed various papers on English literature to the *Cornhill Magazine*, the *Quarterly Review*, *Macmillan's Magazine*, the *Fortnightly Review*, the *Academy*, the *Athenæum*, and *Fraser's Magazine*.

HALÉVY, Ludovic, a novelist and dramatic author, the son of Léon Halévy, was born at Paris, in 1834, and received his education at the Lycée Louis le Grand. He entered the service of the Government, and from 1852 to 1858 was employed in the Secretary's office of the Minister of State. He was chief of the department for Algiers and the Colonies, and in 1861 he was appointed to edit the proceedings of the Corps Législatif. This position he resigned to devote himself to the drama. M. Halévy has, since 1855, written the librettos of a large number of the most popular operettas, many of them in collaboration with M. Henri Meilnac. It is to these brilliant sketches, as well as to his dramas, that he owes his election to the French Academy, his reception at which (M. Pailleron pronouncing the speech of welcome) was one of the most memorable of recent times.

HALL, Granville Stanley, Ph.D., was born at Ashfield, Mass., May 6, 1845. He was graduated at Williams College in 1867, and subsequently studied at Berlin, Bonn, Heidelberg, and Leipzig. From 1872 to 1876 he was Professor of Psychology in Antioch College (Ohio); in 1876 and again in 1881-82 he became Lecturer on Psychology at Harvard; and in 1882 he became Professor of that subject in the Johns Hopkins University at Baltimore. On the establishment of Clark University at Worcester, Mass., in 1888 Professor Hall was made its President. The degree of Ph.D. was conferred upon him by Harvard in 1876. In addition to extensive contributions to periodicals on psychological and educational topics, he edits the "American Journal of Psychology," and is the author of "Aspects of

German Culture," 1881; and (with John M. Mansfield) of "Hints towards a Select and Descriptive Bibliography of Education," 1886.
